
(c) **REPORT ON RECOMMENDATIONS.**—

(1) **REQUIREMENT.**—Not later than 180 days after the date of the enactment of this Act, the Attorney General shall submit to the Committees on the Judiciary of the Senate and House of Representatives a report which shall—

(A) set forth the recommendations of the special unit under subsection (b)(2); and

(B) specify the allocations and reallocations of resources that the Attorney General proposes to make in response to the recommendations.

(2) **TREATMENT OF REPORT.**—Nothing in paragraph (1) may be construed to prohibit the Attorney General or the Administrator of the Drug Enforcement Administration from making any reallocation of existing resources that the Attorney General or the Administrator, as the case may be, considers appropriate.

SEC. 9. TECHNICAL AMENDMENT.

Section 401 of the Controlled Substances Act (21 U.S.C. 841) is amended by redesignating subsections (d), (e), (f), and (g) as subsections (c), (d), (e), and (f), respectively.

Amend the title so as to read: “An Act to amend the Controlled Substances Act to direct the emergency scheduling of gamma hydroxybutyric acid, to provide for a national awareness campaign, and for other purposes.”.

AMENDMENT NO. 2784

(Purpose: To modify the short title)

Ms. COLLINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS], for Mrs. HUTCHISON, proposes an amendment numbered 2784.

Ms. COLLINS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, beginning on line 4, strike “Samantha Reid and Hillory J. Farias” and insert “Hillory J. Farias and Samantha Reid”.

On page 6, line 21, strike “Samantha Reid and Hillory J. Farias” and insert “Hillory J. Farias and Samantha Reid”.

On page 7, line 12, strike “Samantha Reid and Hillory J. Farias” and insert “Hillory J. Farias and Samantha Reid”.

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to, the committee amendment, as amended, be agreed to, and the bill be read the third time. I further ask unanimous consent that the Senate proceed to the consideration of the House companion bill, H.R.

2130, all after the enacting clause be stricken and the text of S. 1561, as amended, be inserted in lieu thereof. I further ask that the bill be read the third time and passed, the motion to reconsider be laid upon the table, the amendment to the title be agreed to, and that any statements relating to the bill be printed in the RECORD. Finally, I ask that S. 1561 be placed back on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2784) was agreed to.

The committee amendments, as amended, were agreed to.

The bill (H.R. 2130), as amended, was read the third time and passed.

The title was amended so as to read:

"An Act to amend the Controlled Substances Act to direct the emergency scheduling of gamma hydroxybutyric acid, to provide for a national awareness campaign, and for other purposes."

Ms. COLLINS. Mr. President, I yield to the distinguished Senator from Michigan, Mr. ABRAHAM, who has been a real leader on this bill, for any comments he might have.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. ABRAHAM. Mr. President, I wanted to make a few comments about the legislation we are about to pass. Before I do so, I would like to thank a number of people for their help in this effort.

First, I would like to thank my colleagues who cosponsored this legislation: Senators FEINSTEIN, LIEBERMAN, DEWINE, GRASSLEY, COVERDELL, and GRAHAM. Their support was crucial to moving forward with this bill and doing so in a timely fashion. Second, I would like to thank Senator HATCH, his Judiciary Chief Counsel Manus Cooney, his Deputy Chief Counsel Sharon Prost, his Chief of Staff Patricia Knight, and Bruce Artim and Pattie DeLoatche, all of whose commitment to seeing this effort through to fruition I appreciate both for the advice and guidance they provided and as the act of friendship I recognize it to be. Third, I would like to thank Senator BIDEN and his staff, especially Marcia Lee, whose assistance and cooperation in working out a final version of this bill acceptable to all involved, including the Administration, was indispensable. I would also like to thank my good friend Fred Upton, who first brought the serious problem that is the focus of this legislation to my attention, and Congressman BLILEY and his able staff, especially John Manthei, who patiently tolerated and assisted with the vagaries of bicameral legislative drafting. Finally, I would like to thank my own staff, especially my Subcommittee General Counsel Chase Hutto, who worked tirelessly and creatively on this effort, and Lee Otis, my Subcommittee Chief Counsel.

S. 1561, and its counterpart, H.R. 2130, are named for a young woman by the name of Samantha Reid. Samantha was born in the Henry Ford Hospital in Detroit on January 2, 1984. She grew up in Lincoln Park. She played trumpet in her elementary school band. She was a girl scout for eight years, with the help of her mother, Judi Clark, who was a troop leader. She was an "all star" 6th grade baseball player. She went on to attend Carlson High School in Gibraltar, where she played freshman basketball. Her favorite restaurant was McDonald's, and her favorite meal there was a Big Mac. She loved to go to Cedar Point Amusement Park, and got mad if she couldn't go at least twice a year. She earned her spending money by helping around the house with chores and babysitting, and indeed, on February 11, 1995, she earned an award for outstanding performance in completing babysitting training from the City of Lincoln Park. Her mother called her "Hammy Sammy" because of the way she always smiled in pictures. Her older brother Charles Reid, who is 18, remembers and misses her loud voice.

On January 17, 1999, Samantha died a few weeks after turning 15. She and two friends, none of them yet 16, were at a party given by a 25 year-old man in Woodhaven, Michigan. Samantha Reid drank a Mountain Dew—a soft drink—and passed out within minutes. She vomited in her sleep, and she died. Her friend, Melanie Sindone, also 15, passed out as well. Melanie lapsed into a coma, but she has survived.

These two girls had no reason to believe that they were drinking anything dangerous. But they were wrong. Their drinks had been laced with the drug GHB, commonly known as a "date rape drug." Samantha was undoubtedly slipped it for the purpose that this name suggests, although she died before that purpose was accomplished.

Mr. President, GHB and its analogues are becoming increasingly common in our nation. They are finding their way into nightclubs, onto campuses and into homes. They are being used by sexual predators against young—sometimes very young—women. Their unwitting victims may be raped, become violently ill, and even die.

GHB is especially dangerous because it is relatively easy to produce. According to the DEA, the clandestine synthesis involves the use of two common, non-regulated chemicals: gamma-butyrolactone (GBL), the primary precursor chemical, and sodium hydroxide (lye). GBL is a solvent with a wide range of industrial uses. Tens of thousands of metric tons are produced annually and it is readily available from chemical supply companies. The synthesis is a simple one-pot method requiring no special chemical expertise. In addition, kits for making GHB containing GBL and sodium hydroxide are

being sold on the Internet. GBL, once absorbed from the gastrointestinal tract after oral administration, is readily converted to GHB in the body and produces the same profile of physiological and behavioral effects as GHB. The combination of the ease with which GHB can be produced and widespread ignorance about GHB's dangers especially among our nation's youth has led the law enforcement community to view GHB as a serious and growing threat.

The Controlled Substances Act provides an administrative mechanism for the Attorney General, in consultation with the Secretary of HHS, to place dangerous substances susceptible of abuse on a "schedule" of controlled substances, thereby restricting access to them and imposing criminal penalties for their illicit sale and manufacture. The Attorney General and the Secretary are in agreement that GHB should in fact be scheduled, but they are in disagreement over which schedule it should be placed on. This is because GHB is currently under investigational use as a means of treating narcolepsy and cataplexy, afflictions affecting about 70,000 Americans, and HHS has been understandably reluctant to agree that GHB belongs on Schedule I or II, which would carry the most serious penalties for illicit sale, because the security requirements that would accompany such scheduling would interfere with this medical research. On the other hand, the DEA has been understandably reluctant to agree to any lesser scheduling, because the result would be lower penalties for the unauthorized sale and distribution of this drug. Moreover, under the Controlled Substances Act, the fact that GHB is under investigation for possible medical use precludes the Attorney General from using her emergency authority to schedule it as an "imminent hazard to the public safety."

The result has been an administrative deadlock that has resulted in a complete failure to schedule GHB at all. Hence legislative intervention is needed.

This legislation has been drafted as a specific response to these various competing considerations, which the current scheduling categories are not all that well suited to handle in any event. Notwithstanding the current investigational medical use, the legislation determines that GHB is an imminent hazard to public safety. It therefore directs the Attorney General to place it on the schedule on which imminent hazards are ordinarily placed, which is Schedule I. It relaxes the physical security requirements that would ordinarily apply to Schedule I substances for the investigational medical uses of the drug, however, following the recommendation of the Secretary of HHS on what is appropriate in that area and thereby avoiding interfering with the

ongoing research. It also makes clear that should this research pay off with a drug that the FDA approves because it concludes that it can responsibly be prescribed to treat narcolepsy, cataplexy, or other diseases, the FDA approved drug will be classified as a Schedule III drug, although the Attorney General can impose additional record keeping requirements to help assure that it is not diverted to improper uses. Finally, anyone involved in selling or distributing the diverted product will be subject to the same tough "Schedule I" penalties that apply to the sale or distribution of the illicit or unapproved drug.

In practice, this means that while medical research will continue unhampered by the most cumbersome consequences of placing this drug in Schedule I, the harsh penalties provided for the sale, manufacture, and distribution of all Schedule I substances will apply to any and all illicit trafficking in GHB, whether the drug originated in a bathtub or a medical facility. This means that traffickers will be subject to a 20 year statutory maximum for distributing this drug, and that if, as in the case of Samantha Reid, the drug is slipped to someone who dies, or if it is slipped to someone who is raped or suffers serious bodily injury, that 20 year maximum become a 20 year minimum.

This legislation also addresses three other major problems society has had in responding to the threat posed by this drug. First, it would require the Attorney General to develop, and make available to Federal, State, and local authorities, model protocols for taking toxicology specimens and victim statements in connection with suspected crimes involving GHB and other controlled substances or so-called designer drugs. The Attorney General also would be required to provide training materials for law enforcement officials responsible for investigating these offenses. And finally, she would be directed to make a grant for the development of standardized tests that could be used in the field to test for the presence of these drugs.

The reason for these requirements is that even many in law enforcement are unfamiliar with the operation of GHB. As a result, they may defer testing for it or taking victim statements on the mistaken assumption that the victim is drunk and will be more coherent later, whereas in fact this drug can be processed very quickly by the body and no longer be detectable at that time. Moreover, the victim's memory may be impaired by the substance and she may forget events that she would have remembered had her statement been taken more quickly. Hence the need for model protocols, training, and tests.

Second, the legislation directs the Secretary of HHS to conduct a National Awareness Campaign about the

dangers of GHB. Consciousness of the dangers of this drug is lagging far behind the threat the drug presents, and it is critical that we make it a national priority to remedy that problem.

Finally, the legislation would direct the Attorney General to examine and recommend improvements to current mechanisms for coordinating federal, state and local investigations and prosecutions in this area. And it would establish a special unit within the DEA to assess the federal response to the abuse and trafficking of GHB, other controlled substances, and other designer drugs associated with sexual assault, recommended any reallocations of enforcement resources necessary to improve that response, and direct the Attorney General to make any such reallocations she believes are appropriate.

It is time to act, Mr. President, to save young people, and young women in particular, from these deadly drugs and the predators who use them.

I ask my colleagues to give their full support to this amendment.

I also ask unanimous consent that a number of letters from families and victims of date-rape drugs be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

TRINKA D. PORRATA, DESIGNER
DRUGS—TEACHING & CONSULTING,
Pasadena, CA, October 3, 1999.

Senator SPENCER ABRAHAM,
Dirksen Senate Office Building,
Washington, DC.

DEAR SENATOR ABRAHAM: I'm writing in support of Senate Bill 1561. For four years, my life has revolved around a world of drug abuse little known by law enforcement, medical personnel, politicians and parents. I've watched MDMA explode worldwide in the rave, college and club scenes. I've seen flunitrazepam (Rohypnol, aka roofies) make its mark on sexual assaults. I've seen LSD resurface. And, I've watched in horror as the drug gamma hydroxy butyrate (GHB) has marched coast to coast, plucking out young lives in its path, picking up momentum as it goes. I consider it simply the most dangerous drug I've encountered in 25 years as a police officer. This is because of the overwhelming amount of misinformation spread about GHB, the dramatic lack of real scientific knowledge of it, the difficulty in testing for it and recognizing it in the street, and how easily and unpredictably it kills. GHB is indeed the Bad Child of the Internet. And, it has forever change the face of sexual assault investigations.

Despite a world brimming with technology and communication devices, knowledge of this drug has been based primarily on information via the Internet that runs the gamut from outdated to totally false. Any drug abuser or drug pusher can go on the Internet and pump out volumes of lies and half truths unabated. There are thousands of websites claiming GHB to be the wonder drug that will cure anything you can think of and instructing everyone NOT to call 911 for the victim of a GHB overdose. Deadly advice indeed. Meanwhile, government, law enforcement and the medical world have failed to make significant gain in countering the

flood of bad information, identifying and making available accurate testing methods for it and providing even the most basic education about GHB. The "system" has truly failed the American public on this drug. As a friend of Samantha Reid, the 15-year-old Michigan victim of GHB, so aptly put it, "You tell us every day about marijuana and other drugs. Why didn't you tell us about GHB?" Daily, I am asked by the families who have lost loved ones to GHB—"I've never heard of this drug. Why, why didn't we know about this drug?"

Each day that GHB is not a federally controlled substance is another day of failure by the "system." No, controlling a drug does not solve the problem, but it allows additional resources to be plugged into the tasks of educating the public, providing more standardized information to law enforcement, and developing testing procedures. It would be a giant step toward stopping the lies about GHB as a totally safe, wonder drug.

There isn't a meaningful data collection mechanism to capture drug trends like this. Existing systems are cumbersome, far behind in reporting statistics, and non-responsive to changing trends. In early 1997, the tally of GHB-related deaths kept by the Drug Enforcement Administration was seven. We knew that there was no way to put a figure on the possible number of deaths related to GHB where neither law enforcement nor the coroners knew to test for it. During our hearings before the California Legislature, Dennis Fraga showed up on the witness list. He arrived with autopsy report in hand, showing that his 25-year-old son, Jeffery, had died from alcohol and GHB ingestion. We realized that if we hadn't known about this death, there were undoubtedly more where the coroner knew that GHB was involved but hadn't known to report it to anyone. Dr. Jim Tolliver, who was at that time tracking GHB information for the DEA, began to make inquiries around the country, and the death count rapidly jumped to 26. The death toll continued to slowly increase, based on word of mouth, followed by the DEA obtaining a copy of the autopsy to review before including each death in the tally. Still, there was no reporting mechanism, no blanket means of obtaining information. Despite DEA polling its offices, where knowledge of this drug was limited by DEA agents and local authorities, it was obvious that not all cases were being spotted. I have personally worked closely with Dr. Chris Sannerud, who is now tracking GHB data for the DEA, and have referred numerous leads about deaths to her for investigation.

The count recently jumped to 49. I would like to point out to you that of the 49, ten have been in 1999. Furthermore, 25 additional cases have come to light, all but one of them in 1999. These cases are now being reviewed. That would mean more than 30 in 1999 to date. The victims get younger. More of them involve GHB and its analogs only (no alcohol or other drugs). I receive leads on GHB related death and rape cases virtually daily. And, we have only scratched the surface at this point. Law enforcement, legislators, doctors and parents are still largely unfamiliar with GHB. Remember too, these figures do not reflect the victims of impaired drivers under the influence of GHB.

Meanwhile, the drug company and the pro-drug abuse element want to divert attention saying that it is the homebrew aspect of GHB that is the problem and that it is only dangerous with alcohol and other drugs. The homebrew aspect occasionally adds an extra

element of burns from high pH levels. But that isn't the problem. It is GHB that impairs, resulting in dangerous users behind the wheel causing accidents and deaths and resulting in victims unable to protect themselves from sexual assault. Look beyond the smoke and mirrors. The fact remains: 25-year-olds don't die from a .17 blood alcohol; Jeffery Fraga died that night BECAUSE he took GHB. Samantha Reid was drinking a Mountain Dew the night she died. And 20-year olds don't die from sleeping face down on a pillow . . . unless in coma from GHB ingestion. Kyle Hagmann took it as a sleep aid (after reading on the Internet that it is "totally safe"), not a recreational drug. It is GHB that kills.

Not nearly enough is known about this drug from a medical and scientific viewpoint. The literature is old and outdated. New information is being learned daily and still not nearly enough is known. The old literature says GHB is not addictive. We know this to be untrue. In fact, withdrawal from GHB addiction is life threatening. This is simply not a market-ready product—any drug that is leaving 13-year olds suffering pulmonary edema in our nation's hospitals and alleys is not ready for market. One doctor with nine years of GHB research walked away from it, saying a much safer, longer acting product is needed. One doctor currently researching GHB for narcolepsy first told me personally that it was eight to ten years away from being ready and changed his story only after claims were publicized that the supply would cease for research if it became a Schedule I drug. There is simply no reason to give concessions to future issues re this drug. Let the research take its course and determine the future. Other drugs have been developed in Schedule I. I personally do not believe it will be GHB, but a safer, longer acting cousin that is yet to be developed. Don't let them bypass proper research and development!!!!

I have no doubt that if GHB is ever approved for narcolepsy, the horror of abuse will only skyrocket as doctors blatantly abuse the controversial, dangerous "off label use" policy that would enable them to prescribe it for anything, not just the combination of narcolepsy and cataplexy of which it is being researched. There is simply no mechanism in place that will prevent such abuse (there is plenty of evidence of abuse of other drugs because of this policy). And, I cannot imagine in my wildest dreams a company saying, "Oh excuse me, we are making too much money!!!!" If the Legislature is determined to deal with future issues, then I adamantly urge that this drug be specifically excluded from the "off label use" policy. Any use of GHB beyond narcolepsy/cataplexy would require its own proper research and development. If, as the drug company claims, their only interest is for narcolepsy/cataplexy patients, then there is simply no reason they would protest such a clause being included.

There is much work to be done on this drug in all arenas. The dangers of GHB need to be made crystal clear to America's youth and parents. Law enforcement, prosecutors and medical personnel are not uniformly prepared to handle cases involving GHB. GHB has brought to the sexual assault investigation a unbelievably challenge to overcome and an added horror for rape victims that I cannot even begin to address in this document. As a start, we need to standardize all sexual assault medical kits nationwide to include urine samples from victims and upgrade investigative and testing procedures.

Changes need to be made in the impaired driving world as well. Aggressive federal/state prosecution is needed against manufacturers and distributors of GHB and analogs.

The GHB death toll speaks for itself. Legislation and strong federal backing for education and enforcement is clearly overdue and urgently needed.

Sincerely,

TRINKA D. PORRATA,
Drug Consultant.

To the members of the Judiciary Committee:

On Jan. 17, 1999 I lost my only daughter, Samantha Reid, when GHB and/or GBL was slipped into her Mountain Dew soft drink. I knew nothing about GHB before this tragic event. I took six months off of work and began educating myself on GHB. The more I learn about this invisible predator the more concerned for our nations safety I become.

I have joined Spencer Abraham on campaigning to pass S. 1561. This bill is long overdue in our country and contains many positive programs for awareness and will give law enforcement the much needed tools necessary to prosecute GHB cases. S. 1561 will allow for education targeting teens who are now receiving false information on GHB. A nation wide awareness campaign will give many young ladies the information necessary to protect and ultimately save themselves from GHB. Parents can be reached through public service announcements giving them the opportunity to communicate the dangers of GHB to their children.

Samantha and I were not given the opportunity that S. 1561 has to offer.

Lets not wait for one more senseless death before passing this legislation. Not one more mother should have to water the grass of a fresh grave, or place wind chimes on a tender, young tree planted to shade the site of their daughter. Pumpkins for Halloween should be carved at the kitchen table together, not placed by a headstone.

Our country is in desperate need of all the good this bill has to offer.

Respectfully,

JUDI CLARK,
Rockwood, Michigan.

Mr. ABRAHAM. Mr. President, I would like to close by reading one of those letters, the letter I received from Judi Clark, Samantha Reid's mother, that, better than anything I can say, makes the case as to why this legislation is needed now. She wrote this letter to the members of the Senate Judiciary Committee.

It is as follows:

To the Members of the Senate Judiciary Committee:

On January 17, 1999, I lost my only daughter, Samantha Reid, when GHB and/or GBL was slipped into her Mountain Dew soft drink. I knew nothing about GHB before this tragic event. I took six months off of work and began educating myself on GHB. The more I learned about this invisible predator the more concerned for our nations safety I become.

I have joined Spencer Abraham on campaigning to pass S. 1561. This bill is long overdue in our country and contains many positive programs for awareness, and will give law enforcement the much needed tools necessary to prosecute GHB cases. S. 1561 will allow for education targeting teens who are now receiving false information on GHB. A nationwide awareness campaign will give many young ladies the information necessary to protect and ultimately save them-

selves from GHB. Parents can be reached through public service announcements giving them the opportunity to communicate the dangers of GHB to their children.

Samantha and I were not given the opportunity that S. 1561 has to offer. Lets not wait for one more senseless death before passing this legislation. Not one more mother should have to water the grass of a fresh grave, or place wind chimes on a tender young tree planted to shade the site of their daughter. Pumpkins for Halloween should be carved at the kitchen table together, not placed by a headstone.

Our country is in desperate need of all the good this bill has to offer.

Respectfully,

JUDI CLARK,
Rockwood, Michigan.

Mr. President, I would say in closing that I am happy we have finally taken the action which Judi Clark and other parents across this country have been asking us to take, to make sure that other children will be made aware of the dangers of GHB. Hopefully the predators who use drugs such as this will be treated in the fashion they deserve, which is to be prosecuted effectively and put behind bars where they belong.

No one else should have to go through what this family has suffered.

I am very determined to not only see this legislation pass, but also to work closely with the Department of Justice, the Drug Enforcement Agency, and State and local law enforcement agencies, to make sure this is just the first step in what will ultimately be a successful campaign to rid this Nation of the illicit use of this drug, and to make sure the children of our country are no longer the victims of predators who use it for criminal purposes.

I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Maine.

Ms. COLLINS. Mr. President, I commend the Senator from Michigan for his leadership and his eloquent statement.

Mr. HATCH. Mr. President, Today, the Senate adopted a significant measure against date rape and other heinous crimes associated with abusing certain types of drugs. I want to make a few comments on this bill, S. 1561, which addresses the abuse of the dangerous drug GHB which has been used to commit date rape and other crimes.

As Chairman of the Senate Judiciary Committee, I am proud that it was a member of our Committee, Senator SPENCER ABRAHAM, who introduced and has played the key leadership role in Senate passage of S. 1561, The Samantha Reid and Hillary J. Farias Date Rape Prohibition Act of 1999." I am also proud that other members of the Judiciary Committee, Senators DEWINE, FEINSTEIN, and GRASSLEY have joined Senator ABRAHAM in co-sponsoring this legislation.

It is only through the hard work and insistence of Senator ABRAHAM that

this bill will pass the Senate today. I also want to commend his able staff, especially Lee Otis and Chase Hutto, who have spent considerable time and effort in improving this legislation. Their efforts were in the best tradition of staff of the United States Senate.

I also want to thank my friend on the other side of the aisle, Senator BIDEN, who has long been in the forefront of controlled substances and other drug abuse issues. I must also recognize the efforts of Ms. Marcia Lee of his staff for her diligence and creativity in developing this language.

I must also recognize the efforts of Chairmen THOMAS BLILEY and FRED UPTON for their work in developing and shepherding the House companion to S. 1561, H.R. 2310, through that body. In this regard, I must mention the efforts of John Manthei of the House Commerce Committee as well as Ms. Jane Williams of Rep. UPTON's staff. Both of them deserve recognition for their dedication to passing this bill.

S. 1561 is concerned with the proper regulation of gamma hydrobutyric acid, the chemical known on the street as GHB which has both hateful and hopeful uses. On one hand, many families across America have suffered due to abuse of this agent which has been used to lull unsuspecting women into a date-rape situation and has even resulted in death through overdose. On the other hand, GHB holds unprecedented promise to those one-quarter million Americans suffering from extreme sleep disorders such as cataplexy and narcolepsy.

Cataplexy is a debilitating condition suffered by some 70,000 Americans that results in an inability of the muscles to function. Narcolepsy, which attacks 170,000 Americans, causes a person suddenly and unpredictably to fall asleep. Neither of these terrible diseases have an effective treatment today. As author of the 1984 Orphan Drug Act which creates incentives for private sector drug firms to investigate treatments for rare diseases, I am particularly sensitive to the needs of families suffering from low-prevalence conditions. We need to do everything we can to get academic researchers and the pharmaceutical industry to find cures for the hundreds of currently untreatable rare diseases.

The problem for policymakers, both in the Congress and at the DEA, is how to encourage the use of the medically promising uses of GHB while discouraging and outlawing the illicit uses such as date rape.

While there are no known cases of diversion of this drug from the on-going and highly promising clinical trials of GHB as a treatment for cataplexy and narcolepsy, the problem of GHB abuse demands our attention.

According to DEA, hospital and law enforcement officials have reported about 5,500 cases of GHB abuse, includ-

ing 49 deaths. Aggregate statistics, as alarming as they may be, cannot convey the absolute upheaval that GHB abuse can cause for an individual and a family.

Senator ABRAHAM has told me the story about the untimely death of a bright and vivacious 15-year-old young woman from Michigan, Samantha Reid. She went to a small gathering of friends, was given a drink from a soft drink bottle laced with GHB, and died. Samantha did nothing wrong. Her mother, Judi Clark, did nothing wrong. Unfortunately, this tragedy has struck this family.

Four young men have been charged under Michigan law for involuntary manslaughter and poisoning. But, given the prevalence and, as the Reid case highlights, the potential severity of GHB abuse, it seems clear—and both public health and law enforcement officials agree on this—that this chemical warrants regulation under the Controlled Substances Act. That's exactly what S. 1561 and its House companion accomplish.

Some may raise a question about whether the federal Controlled Substances Act failed to operate in a fashion that could have prevented deaths or sexual assaults through abuse of GHB.

Although there have been reports of substantial GHB abuse for several years now, I do not know why the Attorney General and Secretary of Health and Human Services have been unable to resolve the matters that have precluded this drug from being scheduled through the normal procedures under the Controlled Substances Act. I don't know why it took until September of 1997 for the DEA to request FDA to analyze the medical and scientific matters relating to GHB. I don't know why it took until May 19, 1999 to get a response to this request. I don't know why DEA has not acted in the last six months to bring this matter to a conclusion through administrative means. It should not take an act of Congress to schedule a dangerous drug under the Controlled Substances Act.

I do know that part of the unjustifiable delay in the scheduling of GHB stemmed from the fact that there is a difference of opinion between DEA and FDA about how to schedule this drug. But that answer is not good enough. It is simply inadequate to tell a mother of a child like Samantha Reid, a promising young woman with her whole life ahead of her, that the system "just takes time" because two bureaucracies disagreed about how something so serious should be handled.

This situation points out that a significant breakdown in the system has occurred with respect to the scheduling of GHB. It behooves the Congress to deliberate more over ways to make the key agencies, DEA and FDA, be more responsive in the future, rather than be

forced to do their jobs for them. The lesson of GHB should not be to teach the agencies to wait for Congressional action whenever the bureaucracy cannot act.

Let me just say that as a general matter I do not favor legislative scheduling or rescheduling. By statute, the responsibility for scheduling is delegated to the experts at DOJ and HHS. The world is turned upside down when DOJ informs Congress, as it did on May 3, 1999, that: "DOJ believes that it is appropriate for Congress to schedule GHB at this time."

By any measure, a fair reading of the Controlled Substances Act places the primary responsibility for regulating dangerous drugs upon law enforcement and public health experts at the appropriate federal agencies. I do have a concern about Congress legislating on the safety and efficacy of individual drug products, especially before clinical testing or introduction into commerce commences. Nor should we allow the Congress to be placed in the position of making technical, scientific and law enforcement judgment whenever an individual drug product with an actual or potential legitimate medicinal use is determined by experts to warrant the application of the CSA.

I am firmly behind efforts to stop so-called "date rapes,"; this is a despicable crime and the Federal Government should take action to make sure it does not occur. While I wholeheartedly applaud the efforts of the House to strike a blow against abuse of GHB, I am concerned about Congress getting directly involved in the scheduling process as the House mandated in adopting H.R. 2130. In this regard, it was my strong sense that rather than for Congress to legislatively schedule GHB, it would have more impact to amend the statute and direct DEA to implement the Surgeon General's recommendations that were issued back on May 19, 1999.

I will not take the time today to consider the full implications of a policy of legislative rescheduling. I do plan in the future to re-examine the scheduling provisions of the Controlled Substances Act.

At this point, let me elaborate further on some of the issues I have raised.

Subsections (b) and (c) of section 201 of the Controlled Substances Act identify eight criteria that must be taken into account in scheduling a drug. With respect to scheduling a drug, these factors are:

- (1) Its actual or relative potential for abuse.
- (2) Scientific evidence of its pharmacological effect, if known.
- (3) The state of current scientific knowledge regarding the drug or other substance.
- (4) Its history and current pattern of abuse.
- (5) The scope, duration, and significance of abuse.
- (6) What, if any, risk there is to the public health.

(7) Its psychic or physiological dependence liability.

(8) Whether the substance is an immediate precursor of a substance already controlled under this title.

The statute proscribes that.

The recommendations of the Secretary (of Health and Human Services) to the Attorney General shall be binding on the Attorney General as to such scientific and medical matters, and if the Secretary recommends that a drug or other substance not be controlled, the Attorney General shall not control the drug or other substances.

This is the section of the law which appears not to have functioned optimally in the case of GHB. We can, and should, do better in anticipating and combating the next GHB.

To a large degree, the legislation we adopt today implements the May 19, 1999 HHS recommendations and the accompanying "Eight Factor Analysis Report" that take into account both the illicit abuse of GHB as well as the highly promising legitimate uses of this substance. While I believe that the language worked out by Senators ABRAHAM and BIDEN, Chairman BLILEY, Chairman MCCOLLUM, and the DEA, is preferable to the earlier versions of the bill, I remain troubled by some aspects of how the current statute has worked and may work in the future.

First, I am troubled that if we place promising pharmaceutical candidates such as GHB into Schedule I of the Controlled Substance Act we undermine its integrity of the CSA and will discourage the legitimate, potential life-saving uses of such compounds. According to the statute, one of the three requirements of schedule I is that there is "no accepted medical use" in the United States. But the May 19, 1999 HHS recommendation has already found that the cataplexy product has cleared this hurdle:

... the abuse potential of GHB, when used under an authorized research protocol, is consistent with substances typically controlled under Schedule IV . . . An authorized formulation of GHB is far enough along in the development process to meet the standard under Schedule II of a drug or substance having a "currently accepted medical use with severe restrictions." Under these circumstances, HHS recommends placing authorized formulations of GHB in Schedule III.

On October 12, 1999 DOJ sent a letter that disregards the May 19th HHS schedule III recommendation. DOJ first states ". . . the DEA strongly supports the control of GHB in Schedule I of the CSA" and then asserts: "The data collected to date would support control of the GHB product in Schedule II."

Second, in addition to giving no apparent deference to HHS on matters supposedly binding on DOJ under section 201(b) of the CSA, DOJ almost seems to be interpreting the statute as requiring full FDA approval before the "currently accepted medical use" language of the CSA can be satisfied. Such an outcome is neither compelled by the

statute, nor does it reflect sound public health policy as it acts to discourage drug development and patient access to promising drugs in clinical trials.

I hasten to point out that I have advocated stiffening the penalties for abuse of date-rape drugs such as GHB. In 1997 I successfully led the charge to enact a law that imposed schedule I-level penalties for another date rape drug, flunitrazepam. This product was marketed for legitimate medical purposes overseas and did not meet the Schedule I requirement that "there is lack of accepted safety for use of the drug or other substance under medical supervision." Therefore, the Congress passed, and the President signed, my legislation to increase the penalties for this drug. But we stopped short of scheduling the pharmaceutical into Schedule I, recognizing that the product does have accepted medical uses. It was my hope that this could be the model for GHB legislation as well.

I want to work constructively with my colleagues in Congress to achieve our common goals of taking immediate action against GHB, preserving the integrity of the CSA, and sending a strong message to those agencies charged with implementing the CSA that they must work together in a cooperative and expeditious way to protect the American public.

While I think the bill we adopt today might have been written differently, I agree with my colleagues that our foremost goal must be to take quick and decisive action with respect to the criminalization of GHB used for non-medical purposes. Senator Abraham's bill is a good bill and he deserves a lot of credit for putting this improved legislative package together.

Let me also note that the bill we have just passed includes language I drafted requiring DEA to create a Special Unit to assess the abuse and trafficking of GHB and other date rape drugs, and will identify the threat posed by date rape drugs on a national and regional basis. I am pleased to be the sponsor of S. 1947, the bill that creates this Special Unit. S. 1947 has been incorporated in the final language that we adopt today. I can assure all my colleagues that this is one Senator that will closely review the Attorney General's report on the allocation and reallocation of resources to combat date rape and other crimes related to designer drugs.

We can and should look further into the problems associated with the scheduling of drugs under CSA and whether we need to change the relevant laws. But today we honor the memory of Hillory Farias and Samantha Reid by taking an act that will hopefully reduce the risk of GHB abuse being visited upon unsuspecting women.

ELECTRONIC BENEFIT TRANSFER INTEROPERABILITY AND PORTABILITY ACT OF 1999

Ms. COLLINS. Mr. President, I ask unanimous consent that the Agriculture Committee be discharged from further consideration of S. 1733, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1733) to amend the Food Stamp Act of 1977 to provide for a national standard of interoperability and portability applicable to electronic food stamp benefit transactions.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2785

Ms. COLLINS. Mr. President, there is a substitute amendment at the desk submitted by Senator FITZGERALD, and I ask for its consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine (Ms. COLLINS), for Mr. FITZGERALD, proposes an amendment numbered 2785.

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Electronic Benefit Transfer Interoperability and Portability Act of 1999".

SEC. 2. PURPOSES.

The purposes of this Act are—

(1) to protect the integrity of the food stamp program;

(2) to ensure cost-effective portability of food stamp benefits across State borders without imposing additional administrative expenses for special equipment to address problems relating to the portability;

(3) to enhance the flow of interstate commerce involving electronic transactions involving food stamp benefits under a uniform national standard of interoperability and portability; and

(4) to eliminate the inefficiencies resulting from a patchwork of State-administered systems and regulations established to carry out the food stamp program

SEC. 3. INTEROPERABILITY AND PORTABILITY OF FOOD STAMP TRANSACTIONS.

Section 7 of the Food Stamp Act of 1977 (7 U.S.C. 2016) is amended by adding at the end the following:

"(k) INTEROPERABILITY AND PORTABILITY OF ELECTRONIC BENEFIT TRANSFER TRANSACTIONS.—

"(1) DEFINITIONS.—In this subsection:

"(A) ELECTRONIC BENEFIT TRANSFER CARD.—The term 'electronic benefit transfer card' means a card that provides benefits under this Act through an electronic benefit transfer service (as defined in subsection (i)(11)(A)).

"(B) ELECTRONIC BENEFIT TRANSFER CONTRACT.—The term 'electronic benefit transfer contract' means a contract that provides for the issuance, use, or redemption of coupons in the form of electronic benefit transfer cards.

"(C) INTEROPERABILITY.—The term 'interoperability' means a system that enables a coupon issued in the form of an electronic benefit transfer card to be redeemed in any State.

“(D) INTERSTATE TRANSACTION.—The term ‘interstate transaction’ means a transaction that is initiated in 1 State by the use of an electronic benefit transfer card that is issued in another State.

“(E) PORTABILITY.—The term ‘portability’ means a system that enables a coupon issued in the form of an electronic benefit transfer card to be used in any State by a household to purchase food at a retail food store or wholesale food concern approved under this Act.

“(F) SETTLING.—The term ‘settling’ means movement, and reporting such movement, of funds from an electronic benefit transfer card issuer that is located in 1 State to a retail food store, or wholesale food concern, that is located in another State, to accomplish an interstate transaction.

“(G) SMART CARD.—The term ‘smart card’ means an intelligent benefit card described in section 17(f).

“(H) SWITCHING.—The term ‘switching’ means the routing of an interstate transaction that consists of transmitting the details of a transaction electronically recorded through the use of an electronic benefit transfer card in 1 State to the issuer of the card that is in another State.

“(2) REQUIREMENT.—Not later than October 1, 2002, the Secretary shall ensure that systems that provide for the electronic issuance, use, and redemption of coupons in the form of electronic benefit transfer cards are interoperable, and food stamp benefits are portable, among all States.

“(3) COST.—The cost of achieving the interoperability and portability required under paragraph (2) shall not be imposed on any food stamp retail store, or any wholesale food concern, approved to participate in the food stamp program.

“(4) STANDARDS.—Not later than 210 days after the date of enactment of this subsection, the Secretary shall promulgate regulations that—

“(A) adopt a uniform national standard of interoperability and portability required under paragraph (2) that is based on the standard of interoperability and portability used by a majority of State agencies; and

“(B) require that any electronic benefit transfer contract that is entered into 30 days or more after the regulations are promulgated, by or on behalf of a State agency, provide for the interoperability and portability required under paragraph (2) in accordance with the national standard.

“(5) EXEMPTIONS—

“(A) CONTRACTS.—The requirements of paragraph (2) shall not apply to the transfer of benefits under an electronic benefit transfer contract before the expiration of the term of the contract if the contract—

“(i) is entered into before the date that is 30 days after the regulations are promulgated under paragraph (4); and

“(ii) expires after October 1, 2002.

“(B) WAIVER.—At the request of a State agency, the Secretary may provide 1 waiver to temporarily exempt, for a period ending on or before the date specified under clause (iii), the State agency from complying with the requirements of paragraph (2), if the State agency—

“(i) establishes to the satisfaction of the Secretary that the State agency faces unusual technological barriers to achieving by October 1, 2002, the interoperability and portability required under paragraph (2);

“(ii) demonstrates that the best interest of the food stamp program would be served by granting the waiver with respect to the electronic benefit transfer system used by the

State agency to administer the food stamp program; and

“(iii) specifies a date by which the State agency will achieve the interoperability and portability required under paragraph (2).

“(C) SMART CARD SYSTEMS.—The Secretary shall allow a State agency that is using smart cards for the delivery of food stamp program benefits to comply with the requirements of paragraph (2) at such time after October 1, 2002, as the Secretary determines that a practicable technological method is available for interoperability with electronic benefit transfer cards.

“(6) FUNDING.—

“(A) IN GENERAL.—In accordance with regulations promulgated by the Secretary, the Secretary shall pay 100 percent of the costs incurred by a State agency under this Act for switching and settling interstate transactions—

“(i) incurred after the date of enactment of this subsection and before October 1, 2002, if the State agency uses the standard of interoperability and portability adopted by a majority of State agencies; and

“(ii) incurred after September 30, 2002, if the State agency uses the uniform national standard of interoperability and portability adopted under paragraph (4)(A).

“(B) LIMITATION.—The total amount paid to State agencies for each fiscal year under subparagraph (A) shall not exceed \$500,000.”.

SEC. 4. STUDY OF ALTERNATIVES FOR HANDLING ELECTRONIC BENEFIT TRANSACTIONS INVOLVING FOOD STAMP BENEFITS.

Not later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall study and report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on alternatives for handling interstate electronic benefit transactions involving food stamp benefits provided under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.), including the feasibility and desirability of a single hub for switching (as defined in section 7(k)(1) of that Act (as added by section 3)).

Mr. FITZGERALD. Mr. President, I rise today to recognize the passage of the Electronic Benefit Transfer Interoperability and Portability Act of 1999. This legislation addresses the problem of food stamp beneficiaries being unable to redeem their benefits in authorized stores that may be located outside their state of residence.

As you may know, Congress passed legislation in 1996 that required the federal government to deliver food stamp benefits electronically, rather than using paper coupons. Most states have started the process of issuing plastic cards, very similar to ATM cards, to access these benefits. The federal government termed this new process, electronic benefits transfer (EBT).

You may have noticed a separate button on the payment terminal in your local supermarket with the designation “EBT” or a separate stand-alone payment terminal to handle these new transactions.

More than half of the country has already switched from the paper coupons to this new EBT card. However, one significant issue is causing problems in the program for retailers, states, and

recipients. That issue is the inability of recipients to use their state-issued cards across state lines. This is especially true in communities that are near a state border.

Under the old paper system, recipients could use the coupons in any state in the country. Under the new electronic system, that is the case. Customers go into a food store expecting to use their federal benefits to purchase food. When they cannot use their EBT cards, they become frustrated and dissatisfied with the food stamp program.

For example, under the old system, a food stamp recipient living in Palmyra, Missouri could use his food stamp coupons in his favorite grocery store in Quincy, Illinois, just over the border. Similarly, a recipient living in Illinois could visit family in Tennessee and still purchase food for his children. Food stamp beneficiaries are not unlike the average shopper. Cross-border shopping occurs for a variety of reasons. One reason is convenience; another equally important reason is the cost of groceries. The supermarket industry is very competitive. Customers paying with every type of tender except EBT have the ability to shop around for the best prices. Shouldn't recipients of our nation's federal food assistance benefits be able to stretch their dollars without regard to state borders?

Another reason for cross-border shopping is convenience. While one of my constituents may live in the metro east area of Illinois, he or she may work in St. Louis. Under the current situation, if the only grocery store between work and home is in Missouri, the recipient cannot purchase food without traveling miles out of the way.

The legislation would once again provide for the portability of food assistance benefits and allow food stamp recipients the flexibility of shopping at locations that they choose.

Interoperability works well today with ATM/Debit cards, the type of cards that EBT was modeled after. Consumers and merchants are confident that when a MAC card issued by a bank in Pittsburgh is presented, authorization and settlement of that transaction will work the same as when a Star card, issued by Bank of America in California is presented. This occurs regardless of where the merchant is located.

Unfortunately, this is currently not the case with EBT cards. If every state operated their EBT program under a standard set of operating rules, as this legislation requires, companies operating in multiple states could be more efficient, resolve any discrepancies in customer accounts more quickly, and ultimately hold down the price of groceries for all consumers.

This legislation is more about good government than it is about food

stamps. Since 1996, the transition from paper coupons to electronic benefit transfers has saved the federal government a significant amount of money. For example, while the food stamp caseload decreased 24 percent from fiscal year 1995 to 1998, food stamp production and redemption costs dropped by an impressive 39 percent. While it is estimated that the bill's implementation will cost the federal government no more than \$500,000 annually, it will save at least \$20 million per year when paper coupons are a thing of the past.

This legislation is sound public policy that enjoys strong bipartisan support. I thank my colleagues, Senators LEAHY, LUGAR, HARKIN, CRAIG, COCHRAN, CRAPO, KOHL, and KERREY for joining me as co-sponsors of this bill. This legislation is vitally important to every food stamp recipient, every state food stamp program administrator, and every grocery store in the country.

I thank the presiding officer, and I yield the floor.

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to, the bill be read a third time and passed, as amended, the motion to reconsider be laid upon the table, and that any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2785) was agreed to.

The bill (S. 1733), as amended, was read the third time and passed, as follows:

[The bill was not available for printing. It will appear in a future edition of the RECORD.]

MAKING TECHNICAL CORRECTIONS TO THE ENROLLMENT OF H.R. 3194

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Senate Concurrent Resolution 77 now at the desk introduced earlier by Senators LOTT and DASCHLE, and that the resolution be considered read a third time and passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 77) making technical corrections to the enrollment of H.R. 3194.

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. Without objection, the concurrent resolution is agreed to.

The concurrent resolution (S. Con. Res. 77) was agreed to.

The concurrent resolution (S. Con. Res. 77) is as follows:

S. CON. RES. 77

Resolved by the Senate (the House of Representatives concurring), That the Clerk of the

House of Representatives, in the enrollment of the bill (H.R. 3194), making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against revenues of said District for the fiscal year ending September 30, 2000, and for other purposes, shall make the following correction:

At the appropriate place of the bill insert the following:

COMMODITY CREDIT CORPORATION PRODUCER-OWNED MARKETING ASSOCIATIONS FORGIVENESS

SEC. 1. The Secretary of Agriculture shall reduce the amount of any principal due on a loan made to marketing association incorporated in the State of North Carolina for the 1999 crop of an agricultural commodity by at least 75 percent if the marketing association suffered losses of the agricultural commodity in a county with respect to which—(1) a natural disaster was declared by the Secretary for losses due to Hurricane Dennis, Floyd, or Irene; or (2) a major disaster or emergency was declared by the President for losses due to Hurricane Dennis, Floyd, or Irene under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.)

If the Secretary assigns a grade quality for the 1999 crop of an agricultural commodity marketed by an association described in this section that is below the base quality of the agricultural commodity, the Secretary shall compensate the association for losses incurred by the association as a result of the reduction in grade quality.

Up to \$81,000,000 of the resources of the Commodity Credit Corporation shall be used for the cost of this section: *Provided*, That the entire amount necessary to carry out this section shall be available only to the extent that an official budget request for the entire amount, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, is transmitted by the President to the Congress: *Provided further*, That the entire amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) and Section 252(e) of such Act.

SEC. 2. In administering \$50,000,000 in emergency supplemental funding for the Emergency Conservation Program, the Secretary shall give priority to the repair of structures essential to the operation of the farm.

EXEMPTIONS PURSUANT TO THE FEDERAL REPORTS ELIMI- NATION AND SUNSET ACT OF 1995

Ms. COLLINS. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of H.R. 3111, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title. The legislative clerk read as follows:

A bill (H.R. 3111) to exempt certain reports from automatic elimination and sunset pursuant to the Federal Reports Elimination and Sunset Act.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2786

(Purpose: To provide continued reporting of intercepted wire, oral, and electronic communications)

Ms. COLLINS. Mr. President, Senator LEAHY has an amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine (Ms. COLLINS), for Mr. LEAHY, proposes an amendment numbered 2786.

Add at the end the following:

SEC. 2. (a) SHORT TITLE.—This Act may be cited as the "Continued Reporting of Intercepted Wire, Oral, and Electronic Communications Act".

(b) FINDINGS.—Congress makes the following findings:

(1) Section 2519(3) of title 18, United States Code, requires the Director of the Administrative Office of the United States Courts to transmit to Congress a full and complete annual report concerning the number of applications for orders authorizing or approving the interception of wire, oral, or electronic communications. This report is required to include information specified in section 2519(3).

(2) The Federal Reports Elimination and Sunset Act of 1995 provides for the termination of certain laws requiring submittal to Congress of annual, semiannual, and regular periodic reports as of December 21, 1999, 4 years from the effective date of that Act.

(3) Due to the Federal Reports Elimination Act and Sunset Act of 1995, the Administrative Office of United States Courts is not required to submit that annual report described in section 2519(3) of title 18, United States Code, as of December 21, 1999.

(c) CONTINUED REPORTING REQUIREMENTS.—

(1) CONTINUED REPORTING REQUIREMENTS.—Section 2519 of title 18, United States Code, is amended by adding at the end the following:

"(4) The reports required to be filed by subsection (3) are exempted from the termination provisions of section 3003(a) of the Federal Reports Elimination and Sunset Act of 1995 (Public Law 104-66)."

(2) EXEMPTION.—Section 3003(d) of the Federal Reports Elimination and Sunset Act of 1995 (Public Law 104-66) is amended—

(a) in paragraph (31), by striking "or" at the end;

(b) in paragraph (32), by striking the period and inserting "; or"; and

(c) by adding at the end the following:

"(33) section 2519(3) of title 18, United States Code."

(d) ENCRYPTION REPORTING REQUIREMENTS.—

(1) Section 2519(2)(b) of title 18, United States Code, is amended by striking "and (iv)" and inserting "(iv) the number of orders in which encryption was encountered and whether such encryption prevented law enforcement from obtaining the plain text of communications intercepted pursuant to such order, and (v)".

(2) The encryption reporting requirement in subsection (a) shall be effective for the report transmitted by the Director of the Administrative Office of the Courts for calendar year 2000 and in subsequent reports.

(e) REPORTS CONCERNING PEN REGISTERS AND TRAP AND TRACE DEVICES.—Section 3126 of title 18, United States Code, is amended by striking the period and inserting ", which report shall include information concerning—

"(1) the period of interceptions authorized by the order, and the number and duration of any extensions of the order;

"(2) the offense specified in the order or application, or extension of an order;

"(3) the number of investigations involved;

"(4) the number and nature of the facilities affected; and

"(5) the identity, including district, of the applying investigative or law enforcement agency making the application and the person authorizing the order."

Mr. LEAHY. Mr. President, I am pleased that the Senate is today considering H.R. 3111 to exempt from automatic elimination and sunset certain reports submitted to Congress that are useful and helpful in informing the Congress and the public about the activities of federal agencies in the enforcement of federal law. Senator HATCH and I offer as an amendment to H.R. 3111 the text of a bill, S. 1769, which I introduced with Chairman HATCH on October 22, 1999 and which passed the Senate on November 5, 1999. This amendment will continue and enhance the current reporting requirements for the Administrative Office of the Courts and the Attorney General on the eavesdropping and surveillance activities of our federal and state law enforcement agencies.

For many years, the Administrative Office (AO) of the Courts has complied with the statutory requirement, in 18 U.S.C. §2519(3), to report to Congress annually the number and nature of federal and state applications for orders authorizing or approving the interception of wire, oral or electronic communications. By letter dated September 3, 1999, the AO advised that it would no longer submit this report because "as of December 21, 1999, the report will no longer be required pursuant to the Federal Reports Elimination and Sunset Act of 1995." I commend the AO for alerting Congress that their responsibility for the wiretap reports would lapse at the end of this year, and for doing so in time for Congress to take action.

The AO has done an excellent job of preparing the wiretap reports. We need to continue the AO's objective work in a consistent manner. If another agency took over this important task at this juncture and the numbers came out in a different format, it would immediately generate questions and concerns over the legitimacy and accuracy of the contents of that report.

In addition, it would create difficulties in comparing statistics from prior years going back to 1969 and complicate the job of congressional oversight. Furthermore, transferring this reporting duty to another agency might create delays in issuance of the report since no other agency has the methodology in place. Finally, federal, state and local agencies are well accustomed to the reporting methodology developed by the AO. Notifying all these agencies that the reporting standards and agency have changed would inevitably create more confusion and more expense as law enforcement

agencies across the country are forced to learn a new system and develop a liaison with a new agency.

The system in place now has worked well and we should avoid any disruptions. We know how quickly law enforcement may be subjected to criticism over their use of these surreptitious surveillance tools and we should avoid aggravating these sensitivities by changing the reporting agency and methodology on little to no notice. I appreciate, however, the AO's interest in transferring the wiretap reporting requirement to another entity. Any such transfer must be accomplished with a minimum of disruption to the collection and reporting of information and with complete assurances that any new entity is able to fulfill this important job as capably as the AO has done.

The amendment would update the reporting requirements currently in place with one additional reporting requirement. Specifically, the amendment would require the wiretap reports prepared beginning in calendar year 2000 to include information on the number of orders in which encryption was encountered and whether such encryption prevented law enforcement from obtaining the plain text of communications intercepted pursuant to such order.

Encryption technology is critical to protect sensitive computer and online information. Yet, the same technology poses challenges to law enforcement when it is exploited by criminals to hide evidence or the fruits of criminal activities. A report by the U.S. Working Group on Organized Crime titled, "Encryption and Evolving Technologies: Tools of Organized Crime and Terrorism," released in 1997, collected anecdotal case studies on the use of encryption in furtherance of criminal activities in order to estimate the future impact of encryption on law enforcement. The report noted the need for "an ongoing study of the effect of encryption and other information technologies on investigations, prosecutions, and intelligence operations". As part of this study, "a database of case information from federal and local law enforcement and intelligence agencies should be established and maintained." Adding a requirement that reports be furnished on the number of occasions when encryption is encountered by law enforcement is a far more reliable basis than anecdotal evidence on which to assess law enforcement needs and make sensible policy in this area.

The final section of this amendment would codify the information that the Attorney General already provides on pen register and trap and trace device orders, and would require further information on where such orders are issued and the types of facilities—telephone, computer, pager or other device—to which the order relates. Under the

Electronic Communications Privacy Act ("ECPA") of 1986, P.L. 99-508, codified at 18 U.S.C. §3126, the Attorney General of the United States is required to report annually to the Congress on the number of pen register orders and orders for trap and trace devices applied for by law enforcement agencies of the Department of Justice. As the original sponsor of ECPA, I believed that adequate oversight of the surveillance activities of federal law enforcement could only be accomplished with reporting requirements such as the one included in this law.

The reports furnished by the Attorney General on an annual basis compile information from five components of the Department of Justice: the Federal Bureau of Investigation, the Drug Enforcement Administration, the Immigration and Naturalization Service, the United States Marshals Service and the Office of the Inspector General. The report contains information on the number of original and extension orders made to the courts for authorization to use both pen register and trap and trace devices, information concerning the number of investigations involved, the offenses on which the applications were predicted and the number of people whose telephone facilities were affected.

These specific categories of information are useful, and the amendment would direct the Attorney General to continue providing these specific categories of information. In addition, the amendment would direct the Attorney General to include information on the identity, including the district, of the agency making the application and the person authorizing the order. In this way, the Congress and the public will be informed of those jurisdictions using this surveillance technique—information which is currently not included in the Attorney General's annual reports.

The requirement for preparation of the wiretap reports will soon lapse so I am delighted to see the Congress take prompt action on this legislation to continue the requirement for submission of the wiretap reports and to update the reporting requirements for both the wiretap reports submitted by the AO and the pen register and trap and trace reports submitted by the Attorney General.

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to, the bill, as amended, be read a third time and passed, the motion to reconsider be laid upon the table, and that any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2786) was agreed to.

The bill (H. R. 3111), as amended, was read the third time and passed.

THIRD MILLENNIUM ELECTRONIC COMMERCE ACT

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of Calendar No. 243, S. 761.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 761) to regulate interstate commerce by electronic means by permitting and encouraging the continued expansion of electronic commerce through the operation of free market forces, and other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Third Millennium Digital Commerce Act".

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) The growth of electronic commerce and electronic government transactions represent a powerful force for economic growth, consumer choice, improved civic participation and wealth creation.

(2) The promotion of growth in private sector electronic commerce through Federal legislation is in the national interest because that market is globally important to the United States.

(3) A consistent legal foundation, across multiple jurisdictions, for electronic commerce will promote the growth of such transactions, and that such a foundation should be based upon a simple, technology neutral, non-regulatory, and market-based approach.

(4) The Nation and the world stand at the beginning of a large scale transition to an information society which will require innovative legal and policy approaches, and therefore, States can serve the national interest by continuing their proven role as laboratories of innovation for quickly evolving areas of public policy, provided that States also adopt a consistent, reasonable national baseline to eliminate obsolete barriers to electronic commerce such as undue paper and pen requirements, and further, that any such innovation should not unduly burden inter-jurisdictional commerce.

(5) To the extent State laws or regulations do not provide a consistent, reasonable national baseline or in fact create an undue burden to interstate commerce in the important burgeoning area of electronic commerce, the national interest is best served by Federal preemption to the extent necessary to provide such consistent, reasonable national baseline eliminate said burden, but that absent such lack of consistent, reasonable national baseline or such undue burdens, the best legal system for electronic commerce will result from continuing experimentation by individual jurisdictions.

(6) With due regard to the fundamental need for a consistent national baseline, each jurisdiction that enacts such laws should have the right to determine the need for any exceptions to protect consumers and maintain consistency with existing related bodies of law within a particular jurisdiction.

(7) Industry has developed several electronic signature technologies for use in electronic transactions, and the public policies of the United States should serve to promote a dynamic marketplace within which these technologies can compete. Consistent with this Act, States should permit the use and development of

any authentication technologies that are appropriate as practicable as between private parties and in use with State agencies.

SEC. 3. PURPOSES.

The purposes of this Act are—

(1) to permit and encourage the continued expansion of electronic commerce through the operation of free market forces rather than proscriptive governmental mandates and regulations;

(2) to promote public confidence in the validity, integrity and reliability of electronic commerce and online government under Federal law;

(3) to facilitate and promote electronic commerce by clarifying the legal status of electronic records and electronic signatures in the context of writing and signing requirements imposed by law;

(4) to facilitate the ability of private parties engaged in interstate transactions to agree among themselves on the terms and conditions on which they use and accept electronic signatures and electronic records; and

(5) to promote the development of a consistent national legal infrastructure necessary to support of electronic commerce at the Federal and State levels within existing areas of jurisdiction.

SEC. 4. DEFINITIONS.

In this Act:

(1) **ELECTRONIC.**—The term "electronic" means relating to technology having electrical, digital, magnetic, wireless, optical, electromagnetic, or similar capabilities.

(2) **ELECTRONIC AGENT.**—The term "electronic agent" means a computer program or an electronic or other automated means used to initiate an action or respond to electronic records or performances in whole or in part without review by an individual at the time of the action or response.

(3) **ELECTRONIC RECORD.**—The term "electronic record" means a record created, generated, sent, communicated, received, or stored by electronic means.

(4) **ELECTRONIC SIGNATURE.**—The term "electronic signature" means an electronic sound, symbol, or process attached to or logically associated with an electronic record and executed or adopted by a person with the intent to sign the electronic record.

(5) **GOVERNMENTAL AGENCY.**—The term "governmental agency" means an executive, legislative, or judicial agency, department, board, commission, authority, institution, or instrumentality of the Federal Government or of a State or of any county, municipality, or other political subdivision of a State.

(6) **RECORD.**—The term "record" means information that is inscribed on a tangible medium or that is stored in an electronic or other medium and is retrievable in perceivable form.

(7) **TRANSACTION.**—The term "transaction" means an action or set of actions relating to the conduct of commerce between 2 or more persons, neither of which is the United States Government, a State, or an agency, department, board, commission, authority, institution, or instrumentality of the United States Government or of a State.

(8) **UNIFORM ELECTRONIC TRANSACTIONS ACT.**—The term "Uniform Electronic Transactions Act" means the Uniform Electronic Transactions Act as reported to State legislatures by the National Conference of Commissioners on Uniform State Law in the form or any variation thereof that is authorized or provided for in such report.

SEC. 5. PRINCIPLES GOVERNING THE USE OF ELECTRONIC SIGNATURES IN INTERNATIONAL TRANSACTIONS.

To the extent practicable, the Federal Government shall observe the following principles in an international context to enable commercial electronic transaction:

(1) Remove paper-based obstacles to electronic transactions by adopting relevant principles from the Model Law on Electronic Commerce adopted in 1996 by the United Nations Commission on International Trade Law (UNCITRAL).

(2) Permit parties to a transaction to determine the appropriate authentication technologies and implementation models for their transactions, with assurance that those technologies and implementation models will be recognized and enforced.

(3) Permit parties to a transaction to have the opportunity to prove in court or other proceedings that their authentication approaches and their transactions are valid.

(4) Take a non-discriminatory approach to electronic signatures and authentication methods from other jurisdictions.

SEC. 6. INTERSTATE CONTRACT CERTAINTY.

(a) **IN GENERAL.**—The following rules apply to any commercial transaction affecting interstate commerce:

(1) A record or signature may not be denied legal effect or enforceability solely because it is in electronic form.

(2) A contract may not be denied legal effect or enforceability solely because an electronic record was used in its formation.

(3) If a law requires a record to be in writing, or provides consequences if it is not, an electronic record satisfies the law.

(4) If a law requires a signature, or provides consequences in the absence of a signature, the law is satisfied with respect to an electronic record if the electronic record includes an electronic signature.

(b) **METHODS.**—The parties to a contract may agree on the terms and conditions on which they will use and accept electronic signatures and electronic records, including the methods therefor, in commercial transactions affecting interstate commerce. Nothing in this subsection requires that any party enter into such a contract.

(c) **INTENT.**—The following rules apply to any commercial transaction affecting interstate commerce:

(1) An electronic record or electronic signature is attributable to a person if it was the act of the person. The act of the person may be established in any manner, including a showing of the efficacy of any security procedures applied to determine the person to which the electronic record or electronic signature was attributable.

(2) The effect of an electronic record or electronic signature attributed to a person under paragraph (1) is determined from the context and surrounding circumstances at the time of its creation, execution, or adoption, including the parties' agreement, if any, and otherwise as provided by law.

(d) **FORMATION OF CONTRACT.**—A contract relating to a commercial transaction affecting interstate commerce may not be denied legal effect solely because its formation involved—

(1) the interaction of electronic agents of the parties; or

(2) the interaction of an electronic agent of a party and an individual who acts on that individual's own behalf or for another person.

(e) **APPLICATION IN UETA STATES.**—This section does not apply in any State in which the Uniform Electronic Transactions Act is in effect.

SEC. 7. STUDY OF LEGAL AND REGULATORY BARRIERS TO ELECTRONIC COMMERCE.

(a) **BARRIERS.**—Each Federal agency shall, not later than 6 months after the date of enactment of this Act, provide a report to the Director of the Office of Management and Budget and the Secretary of Commerce identifying any provision of law administered by such agency, or any regulations issued by such agency and in effect on the date of enactment of this Act, that may impose a barrier to electronic transactions,

or otherwise to the conduct of commerce online or be electronic means. Such barriers include, but are not limited to, barriers imposed by a law or regulation directly or indirectly requiring that signatures, or records of transactions, be accomplished or retained in other than electronic form. In its report, each agency shall identify the barriers among those identified whose removal would require legislative action, and shall indicate agency plans to undertake regulatory action to remove such barriers among those identified as are caused by regulations issued by the agency.

(b) **REPORT TO CONGRESS.**—The Secretary of Commerce, in consultation with the Director of the Office of Management and Budget, shall, within 18 months after the date of enactment of this Act, and after the consultation required by subsection (c) of this section, report to the Congress concerning—

(1) legislation needed to remove barriers to electronic transactions or otherwise to the conduct of commerce online or by electronic means; and

(2) actions being taken by the Executive Branch and individual Federal agencies to remove such barriers as are caused by agency regulations or policies.

(c) **CONSULTATION.**—In preparing the report required by this section, the Secretary of Commerce shall consult with the General Services Administration, the National Archives and Records Administration, and the Attorney General concerning matters involving the authenticity of records, their storage and retention, and their usability for law enforcement purposes.

(d) **INCLUDE FINDINGS IF NO RECOMMENDATIONS.**—If the report required by this section omits recommendations for actions needed to fully remove identified barriers to electronic transactions or to online or electronic commerce, it shall include a finding or findings, including substantial reasons therefor, that such removal is impracticable or would be inconsistent with the implementation or enforcement of applicable laws.

AMENDMENT NO. 2787

Ms. COLLINS. Mr. President, Senators ABRAHAM, WYDEN, and LEAHY have an amendment at the desk, and I ask for its consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS] for Mr. ABRAHAM, for himself, Mr. WYDEN, and Mr. LEAHY, proposes an amendment numbered 2787.

The amendment is as follows:

[The amendment is printed in today's RECORD under "Amendments Submitted."]

Ms. COLLINS. I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2787) was agreed to.

Ms. COLLINS. It is my understanding the Senator from Michigan, Senator ABRAHAM, has a statement to make on this important legislation.

I yield to the Senator from Michigan.

Mr. ABRAHAM. Mr. President, I will briefly comment on this legislation. First, I thank the cosponsors of this legislation, the Millennium Digital Commerce Act, and Senator WYDEN, the lead cosponsor of the legislation,

and Senators MCCAIN, BURNS, and LOTT, who joined as cosponsors. I also thank Senator LEAHY, Senator SARBANES, Senator HOLLINGS, Senator MCCAIN and others who have worked with Senator WYDEN and me in moving this through the legislative process. I express my appreciation to all my colleagues.

As we move into the era of e-commerce it is important that people who wish to engage in commercial transactions online over the Internet be able to do so as effectively and efficiently as possible. Part of the challenge we confront is when people are entering into contracts in this nonwritten context, the potential exists for questions to be raised as to the validity of the contractual arrangements. Without getting into all the details, the goal of the Millennium Digital Commerce Act is to address this issue. Approximately 42 States have already passed what in effect are digital signature authentication laws which address contracts entered into online or which address the validity of contracts entered into through the web. The problem is those 42 bills are all different. It is possible for people to argue that a contract is valid in one State and not valid in the State of the other contracting party and, thus, is an invalid document.

The purpose of our legislation is to try to make all such agreements valid if they fit or meet some parameters, identical to the ones the States are moving toward; a uniform system. In short, we believe this will be an interim approach until the States have passed a model uniform act. If we don't do this, impediments will exist between parties who wish to contract via the Internet and through electronic commerce. We believe the passage of this bill will relieve those impediments and allow for e-commerce to continue to expand and grow and strengthen our economy.

I am very pleased at the passage of the bill today, and look forward to working with our counterparts in the House, they have passed a slightly different bill, to pound out a final consensus through the conferencing process and bring back to the Senate the output of that process. I hope to do this very early in the next session, so we can enact this legislation and move it to the President for his signature, and, as I said at the outset, improve the efficiency with which we engage in an expanded e-commerce universe.

I yield the floor.

Mr. LOTT. Mr. President, I want to acknowledge the significant efforts of Senator ABRAHAM to author and pass legislation aimed at facilitating the growth of electronic commerce. Commerce that everyone agrees is a significant driving force behind our nation's robust and expanding economy.

Today, the Senate passed by unanimous consent an Abraham substitute

for S. 761, the Millennium Digital Commerce Act. This measure is important because it would ensure the legal certainty of electronic signatures in interstate commerce.

Mr. President, right now, there are over forty different state electronic authentication regimes in play. This patchwork of inconsistent and often conflicting state laws makes it difficult to conduct business-to-business and business-to-consumer transactions over the Internet. Those involved in electronic transactions want assurance that their contractual arrangements are legally binding.

Senator ABRAHAM took the lead on this issue and crafted a bill to ensure that a national framework would govern the use of electronic signatures. It is a rational, coherent, and minimalist approach. An approach supported by America Online, American Bankers Association, American Council of Life Insurance, the American Electronics Association, American Financial Services Association, American Insurance Association, Apple, Business Software Alliance, Charles Schwab, the Coalition for Electronic Authentication, Consumer Mortgage Coalition, DLJ Direct, the Electronic Industry Alliance, FORD, Gateway2000, General Electric Company, GTE, Hewlett-Packard, IBM, Intel, Intuit, the Information Technology Association of America, the Information Technology Industry Council, Microsoft, NCR, the National Association of Manufacturers, National Retail Federation, and the U.S. Chamber of Commerce, among others.

Mr. President, in drafting his legislation, Senator ABRAHAM included key concepts and provisions developed by the National Conference of Commissioners on Uniform State Law (NCCUSL). A NCCUSL working group, which included legal scholars, experts on electronic commerce, state officials and other interested stakeholders, spent the better part of two years drafting the Uniform Electronic Transactions Act (UETA). This model legislation was formally approved in August and is expected to be enacted on a state-by-state basis, much like the process followed in approving the Uniform Commercial Code, over the next three to five years.

Senator ABRAHAM's electronic signatures measure is timely in that it serves as an interim solution needed to fill the void until states approve the model UETA package.

I applaud the junior Senator from Michigan for his continuing leadership on technology issues and commend the Senate's action today. This is definitely a significant step in the right direction.

Mr. President, Senator ABRAHAM, my colleagues on this side of the aisle, and I agree that the measure passed today, while a significant accomplishment, only gets consumers to the 50-yard line

when it comes to e-commerce. In order to get to the end-zone, Congress still needs to address the issue of electronic records.

The Millennium Digital Commerce Act that was unanimously approved by the Senate Commerce Committee in July would have also provided legal certainty to electronic records. However, eleventh hour objections from the minority, some of which were completely unrelated to this bill, thwarted repeated efforts to bring this crucial measure to the floor.

Mr. President, I would point out that the reported bill, with its electronic records provisions, had bipartisan support and was strongly endorsed by the Administration, not once, but twice. In fact the Office of Management and Budget's Statement of Administration Policy noted "the Administration supports the passage of S. 761 . . . [Its] provisions strike the appropriate balance between the needs of each State to develop its own laws in relation to commercial transactions and the needs of the Federal government to ensure that electronic commerce will not be impeded by the lack of consistency in the treatment of electronic authentication."

The Commerce Committee reported measure did not, as some contend, alter federal or state consumer protection laws. Instead, Senator ABRAHAM's bill simply held that records could not be denied legal effect solely, and the key word is "solely," because such records were in electronic form.

Mr. President, consumers stand the most to gain from electronic records and the most to lose if such records are not clearly granted legal effect, validity, and enforceability. In order to further assuage concerns, Senator ABRAHAM, in earnest, offered a substitute version that largely incorporated key provisions of UETA, verbatim. Even so, and as perplexing as it would seem, his UETA substitute was opposed by the minority. Remember, these are the words developed and agreed to by an esteemed panel of national and state legal experts, and these are the same words that will go into effect as states adopt UETA during the next few years.

I would point out that the Department of Commerce, in its June 22, 1999 position letter supporting the Abraham substitute bill that passed the Commerce Committee, noted that "In the view of the Administration, the current UETA draft adheres to the minimalist 'enabling' framework advocated by the Administration, and we believe that UETA will provide an excellent domestic legal model for electronic transactions, as well as a strong model for the rest of the world."

With these glowing endorsements of both the Commerce Committee reported measure and UETA, both of which provide legal certainty to electronic records, I was surprised and dis-

mayed that the Administration flip-flopped on the records issue at the last moment. One has to wonder what motivated this 180-degree change in position and why the Administration went to great lengths to stall and eventually oppose electronic transactions legislation that included digital records.

Consumers want and need electronic records, not only because digitized records are the equivalent of paper-notices, records, and disclosures, but also because such information is often easier to access, read, store and maintain. Electronic records will save consumers time, money, and the hassle of waiting for paper notices and disclosures. Used in conjunction with an electronic signature, electronic records, with appropriate and effective electronic disclosures, allow anyone, with a hook-up to the borderless World Wide Web, to transact business at any time and at any place.

Mr. President, it is the seamless nature of the Internet that makes it such a phenomenal communications and business medium. To ensure that no one is left out of this new millennium paradigm, the legal certainty of electronic records must be codified in federal statute—at least until UETA is adopted nationally. It is my sincere hope that Congress will address the legality of electronic records in the near term so consumers will experience the full benefits and to reap the rewards of the Internet.

Again, I want to applaud the efforts of the Senate in passing S. 761, Senator ABRAHAM's electronic signatures bill. This action is good for America's consumers, good for America's businesses, and good for our nation's economy and prosperity.

Mr. President, Senator ABRAHAM has once again proven that he is a champion of technology, a guardian of the consumer, and an extremely effective legislator.

Mr. LEAHY. Mr. President, I am pleased that the Senate today is passing the Abraham-Leahy substitute amendment to S. 761, the Millennium Digital Commerce Act. This bill seeks to permit and encourage the continued expansion of electronic commerce, and to promote public confidence in its integrity and reliability. These are worthy goals—goals that I have long sought to advance. In the last Congress, many of us worked together to pass the Government Paperwork Elimination Act, which established a framework for the federal government's use of electronic forms and electronic signatures. Today's legislation is part of our continuing efforts to ease the burdens of conducting business electronically.

This is an important bill on an issue of paramount concern to American businesses that engage in electronic commerce. It has had a long journey since it was reported by the Commerce

Committee in June. As reported, the bill took a sweeping approach, preempting untold numbers of federal, state and local laws that require contracts, records and signatures to be in traditional written form. I was concerned that such a sweeping approach would radically undermine legislation that is currently in place to protect consumers.

For example, the Committee-passed bill would have enabled businesses to use their superior bargaining power to compel or confuse consumers into waiving their rights to insist on paper disclosures and communications, even when they do not have the technological capacity to receive, retain, and print electronic records. Could a borrower be compelled to receive delinquency or foreclosure notices by electronic mail, even if she did not have a computer, or her computer could not read the notices in the electronic format in which they were sent? Would she be entitled to revert to paper communications if her computer broke or became obsolete? Could a company require customers to check its Web site for important safety information regarding its products, or for recall notices?

Under S. 761 as reported, the company would not have been required to provide any information on paper, even if a state consumer protection law so required. Crucial information about the consumer's rights and obligations would not be received. It was federal preemption beyond need, to the detriment of American consumers.

The problem did not stop there. When information is provided electronically, for it to be useful at a later time to prove its contents, the electronic file must be tamperproof. Otherwise, a consumer could inadvertently change a single byte on the file and thus make it technically different from the original, and useless to prove its contents. The consumer would be left without any means of proving critical terms of the contract, including the terms of the warranty.

I have been working with Senator ABRAHAM and others since August to address these and other concerns I had with the bill. We crafted a bipartisan compromise several weeks ago, but it fell apart after certain industry representatives complained that it did not go far enough to relieve them of federal and state regulatory authority. Fortunately, other industry representatives recognized that this was not the primary or even an intended purpose of this legislation, and worked to get the legislative process back on track. I am pleased that we were able to do this and that we were able to reach agreement, for the second time, on an Abraham-Leahy substitute that encourages the continued expansion of electronic commerce, while leaving in place essential safeguards protecting the nation's consumers.

In a letter dated November 5, 1999, the National Conference of State Legislatures identified what it believed were four essential criteria for any federal legislation related to electronic signatures:

(1) Any preemption of state law and authority must be limited in duration. The idea should be to ensure the validity of most electronic signatures for a period of time, thus giving the states time to act. (2) States must be allowed to adopt the Uniform Electronic Transactions Act or some similar legislation. (3) Essential state consumer protections must be preserved, along with the capacity of states to enact consumer protection measures in the future. (4) Any federal legislation must be limited to the topic of electronic signatures. It must not embrace any preemption of state regulatory and record keeping authority.

The Abraham-Leahy substitute meets these criteria.

Most importantly, the scope of the bill has been limited to address the principal concern of industry. When Senator ABRAHAM introduced S. 761 earlier this year, he said it was designed to eliminate uncertainty about the legality of electronic contracts signed with electronic signatures. Consistent with this design, the Abraham-Leahy substitute ensures that contracts will not be denied legal effect that they otherwise have under state law solely because they are in electronic form or because they were signed electronically. However, as section 4(4) of the bill makes clear, an electronic signature is valid only if executed by a person who intended to sign the contract.

The purpose of this legislation is to facilitate electronic commerce over the Internet. It is not intended that this legislation be the basis for unfair or deceptive attempts by some to avoid providing mandated information, disclosures, notices or content. For example, when the parties have conducted a transaction entirely in person, the fine print of a form contract cannot include an agreement that the contract can be provided electronically rather than on paper. The basic rules of good faith and fair dealing apply to electronic commerce, and this legislation is not intended to be a basis upon which consumers can be asked to agree to terms and conditions for using electronic signatures and electronic records which are unreasonable based on the circumstances surrounding the transaction.

Further, accurate copies of contracts must be delivered to consumers. The Abraham-Leahy substitute amendment therefore provides that if a law requires a contract to be in writing, an electronic record of the contract will not satisfy such law unless it is delivered to all parties in a form that can be retained for later reference and used to prove the terms of the agreement. This important provision is intended to protect consumers who execute contracts

online, by ensuring that contracts are provided in a tamperproof, or "read-only" format. The delivery of any other type of electronic record would make it useless to prove its terms in court.

The new legislation also improves on the Committee-passed version by eliminating its "intent" section, which established interpretive rules regarding the intent of the parties to an electronic transaction. These rules inappropriately allowed businesses to put the risk of forgery, unauthorized use, and identity theft on consumers, by making it easier for the proponent of an electronic record or electronic signature to prove its authenticity. By eliminating these rules, we have ensured that current contract and evidence laws remain in place. A person is always entitled to assert that an electronic signature is a forgery, was used without authority, or otherwise is invalid for reasons that would invalidate the effect of a signature in written form.

Having just last year worked with Senator KYL on passage of the Kyl-Leahy substitute to S. 512, the Identity Theft and Assumption Deterrence Act, to combat identity theft, we should be careful to avoid taking actions that could have the unintended consequence of making such crimes easier to commit.

In his introductory floor statement, Senator ABRAHAM stressed that S. 761 was an interim measure, which would provide a national baseline for the use of electronic signatures only until the states enacted their own e-signature legislation. To ensure the temporary nature of the federal preemption, the Abraham-Leahy substitute which passes the Senate today includes a significant change from earlier versions of S. 761, including the version reported by the Commerce Committee. The Committee bill preempted a state's laws until the state enacted the Uniform Electronic Transactions Act ("UETA") as reported by the National Conference of Commissioners on Uniform State Law, or any variation that was "authorized or provided for in such report." The full Senate votes today on language that gives states more leeway on the version of the UETA that they choose to pass—including more leeway to adopt strong consumer protections. The revised definition is meant to cover the electronic transactions legislation passed earlier this year by the State of California, and will preserve the capacity of states to perform their traditional role in protecting the health and safety of their citizens.

Nothing in this bill would allow any of the notices that may accompany an electronic contract to be provided electronically. This is especially important to ensure that consumers are apprised of all their rights under federal and state laws. It was the records language

of S. 761 that held the greatest potential to harm consumers, with its across-the-board invalidation of hard-won consumer protections embodied in such laws as the Truth in Lending Act, the Fair Credit Reporting Act, the Real Estate Settlement Procedures Act, and others. I am pleased that the sponsors of this legislation agreed to remove the electronic records language so that we can allow the critical provisions regarding contracts and signatures to move forward. There will be time in the coming months to revisit the broader issue of electronic records, and to craft legislation that will not place consumers at risk.

In the meantime, contrary to some of the rhetoric that has been heard of late, nothing prevents companies from providing notices and disclosures to consumers electronically, so long as they also provide paper notices and disclosures in the limited set of circumstances in which a law so requires. Requirements that certain information be provided in a particular format, or by a particular method of delivery, are often adopted to serve consumers' interests by providing them with information critical to making informed choices in the marketplace, understanding their rights and obligations during commercial transactions, and enforcing their rights when transactions go sour. Such laws should not be swept away without adequate assurance that consumers will be able to receive and retain the information electronically.

The AARP made this point in a letter to all Senators dated November 15, 1999, with respect to the more sweepingly preemptive H.R. 1714: "The time to investigate the implications of such a pivotal change in established consumer protections . . . is before, not after, legislation is enacted. Measures to take advantage of electronic market efficiencies must be tempered by a concern for legal and technological responsibilities that are being shifted to the consumer."

The benefits of electronic commerce should not, and need not, come at the expense of increased risk to consumers. I commend the Department of Commerce for its help in crafting a substitute amendment that is more carefully tailored to protect the interests of America's consumers. I also thank Senators SARBANES, who shared many of my concerns about the original bill's impact on consumers, and Senators ABRAHAM and WYDEN, for agreeing to address our concerns.

This bill shows what can be achieved by bipartisan cooperation and compromise. It enjoys broad support from the Administration, the states, consumer representatives, and responsible companies and trade associations that care about their customers. I urge its speedy enactment into law.

I ask unanimous consent to include in the RECORD a Statement of Administration Policy dated November 8, 1999, in support of the Abraham-Leahy substitute amendment; a letter dated November 8, 1999, from the National Automobile Dealers Association, and a letter dated November 5, 1999, from the National Conference of State Legislatures.

STATEMENT OF ADMINISTRATION POLICY,
NOVEMBER 8, 1999 (SENATE)

(This statement has been coordinated by
OMB with the concerned agencies.)

S. 761—MILLENNIUM DIGITAL COMMERCE ACT
(ABRAHAM (R) MICHIGAN AND 11 COSPONSORS)

Electronic commerce can provide consumers and businesses with significant benefits in terms of costs, choice, and convenience. The Administration strongly supports the development of this marketplace and supports legislation that will advance that development, while providing appropriate consumer protection. Many businesses and consumers are still wary of conducting extensive business over the Internet because of the lack of a predictable legal environment governing transactions. Both the Congress and the Administration have been working to address this important potential impediment to commerce.

S. 761 addresses important concerns associated with electronic commerce and the rise of the Internet as a worldwide commercial forum and marketplace. The Administration supports Senate passage of the amendment in the nature of a substitute to S. 761 expected to be offered by Senator Abraham, based on an agreement with Senators Leahy and Wyden. The Administration supports this version of S. 761 because the bill, as proposed to be amended, would: Ensure the legal validity of contracts between private parties that are made and signed electronically; preserve the ability of States to establish safeguards, such as consumer protection laws, to promote the public interest in electronic commerce among private parties just as they can now establish safeguards for paper-based commerce; cover only commercial transactions between private parties that affect interstate commerce; not affect Federal laws or regulations, but instead would give Federal agencies six months to conduct a careful study of barriers to electronic transactions under Federal laws or regulations and to develop plans to remove such barriers, where appropriate; and sunset completely as to the law of any State that enacts the Uniform Electronic Transactions Act.

NATIONAL AUTOMOBILE DEALERS ASSOCIATION, OFFICE OF LEGISLATIVE
AFFAIRS,

Washington, DC, November 8, 1999.

Hon. PATRICK J. LEAHY,

Ranking Member, Committee on the Judiciary,
Dirksen Senate Office Building, Wash-
ington, DC.

DEAR SENATOR LEAHY: On behalf of the National Automobile Dealers Association (NADA), I am writing to express our views on S. 761, the Millennium Digital Commerce Act.

Like many entrepreneurs throughout the country, America's new car and truck dealers are using today's technological advances to better serve customers, and at NADA we understand the desire to accelerate the role of electronic commerce. Even so, we share your desire to preserve the state's role in this process.

The automobile is one of the single biggest purchases that a consumer makes. As a result, state legislatures throughout the country have enacted various requirements and disclosures governing the purchase and sale of motor vehicles. In light of this extensive body of existing state law, an overly preemptive federal statute would deny the states the ability to protect their citizens in the manner they deem appropriate in these types of transactions.

NADA does not oppose a temporary federal rule to ensure that contracts can not be invalidated solely because they are in electronic form or because they are signed electronically. We believe, however, that any federal legislation should only be an interim measure to provide stability while the states consider the Uniform Electronic Transactions Act (UETA). Once a state adopts the UETA, the temporary federal rule should sunset.

We understand that some drafts of the legislation that have been put forward would allow the federal rule to preempt the UETA in effect in a state, thus denying the states the opportunity to be more protective of consumers should they so desire. If that provision is retained, we believe that motor vehicle transactions should not be covered by the federal rule. This exception would be necessary to ensure that the states could still perform their traditional role of establishing the legal framework for major purchases.

We appreciate the opportunity to bring our concerns to your attention, and we appreciate all your efforts in addressing these matters before the legislation moves forward in the Senate.

Sincerely,

H. THOMAS GREENE,
Chief Operating Officer, Legislative Affairs.

NATIONAL CONFERENCE OF
STATE LEGISLATURES,
Washington, DC, November 5, 1999.

Hon. PATRICK J. LEAHY
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR LEAHY: The National Conference of State Legislatures understands the need to revise federal and state laws as a means of encouraging electronic commerce. In particular, NCSL understands that legislation is needed to allow the more widespread use of electronic signatures as a means of encouraging such commerce.

Over 40 state legislatures have addressed various state law issues related to the validity of electronic signatures. Nevertheless, NCSL has in principle no objection to federal legislation on this same topic, provided that it is tightly focused on removing barriers to legitimate electronic commerce and does not broadly preempt essential elements of state consumer protection and contract law.

NCSL believes that federal legislation related to electronic signatures must meet four criteria: (1) Any preemption of state law and authority must be limited in duration. The idea should be to ensure the validity of most electronic signatures for a period of time, thus giving the states time to act. (2) States must be allowed to adopt the Uniform Electronic Transactions Act or some similar legislation. (3) Essential state consumer protections must be preserved, along with the capacity of states to enact consumer protection measures in the future. (4) Any federal legislation must be limited to the topic of electronic signatures. It must not embrace any preemption of state regulatory and record keeping authority.

The version of S. 761 that is now being presented comes closer to meeting NCSL's criteria than earlier versions of the bill. In general, this "compromise" version is taking the right approach to the issue. NCSL looks forward to working with the sponsors and others to resolve any remaining issues of preemption and consumer protection. NCSL much prefers the new compromise to other earlier versions of electronic signatures legislation which we vigorously opposed because of its unnecessary preemption of state consumer protection and contract law.

For additional information about NCSL's position, please call Neal Osten (202-624-8660) or Michael Bird (202-624-8686).

Sincerely,

Joanne G. Emmons, Michigan State Sen-
ate, Chair, NCSL Commerce and Commu-
nications Committee.

Mr. ABRAHAM. Mr. President, the Senate is soon expected to pass the Millennium Digital Commerce Act—a bill introduced by Senators WYDEN, MCCAIN, BURNS, LOTT and myself which is designed to promote electronic commerce. I rise today to speak in support of this legislation and to thank the cosponsors for their tireless efforts to pass this legislation. I believe it will have a profound impact on the way commerce is conducted on the Internet.

By now, all of us have heard the prophetic pronouncements: "The Internet will change of all of our lives." "The Computer Age is reshaping the world." And so on. These words are true, and a review of the indicators which document the Internet's extraordinary growth bear this out. In 1993 about 90,000 Americans had access to these on-line resources. By early 1999 that number had grown to about 81 million, an increase of about 900 percent. The Computer Industry Almanac predicts 320 million Internet users world-wide by the end of the year 2000.

And now the figures are coming in on how electronic commerce is transforming the way we do business. They are equally impressive. E-commerce between businesses has grown to an estimate \$64.8 billion for 1999. 10 million customers shopped for some product using the Internet in 1998 alone. And 5.3 million households had access to financial transactions like electronic banking and stock trading by the end of 1999.

While the Internet has experienced almost exponential growth since its inception, there is still room to expand. Today, new technologies enable the Internet to serve as an efficient new tool for companies to transact business as never before. This capability is provided by the development of secure electronic authentication methods. These technologies permit an individual to positively identify the person with whom they are transacting business and to ensure that information being shared by the parties has not been tampered with or modified without the knowledge of both parties.

While such technologies are seeing limited use today, the growth of this application has out-paced government's ability to appropriately modify the legal framework governing the use of electronic signatures and other authentication methods.

The growth of electronic signature technologies will increasingly allow organizations to enter into contractual arrangements without ever having to drive across town or fly thousands of miles to personally meet with a client or potential business partner. The Internet is prepared to go far beyond the ability to buy a book or order apparel on-line. It is ready to lead a revolution in the execution of business transactions which may involve thousands or millions of dollars in products or services; transactions so important they require that both parties enter into a legally binding contract.

Mr. President, the Millennium Digital Commerce Act is designed to promote the use of electronic signatures in business transactions and contracts. At present, the greatest barrier to such transactions is the lack of a consistent and predictable national framework of rules governing the use of electronic signatures. Over forty States have enacted electronic authentication laws, and no two laws are the same. This inconsistency deters businesses from fully utilizing electronic signature technologies for contracts and other business transactions. The differences in our State laws create uncertainty about the effectiveness or legality of an electronic contract signed with an electronic signature. This legal uncertainty limits the potential of electronic commerce, and, thus, our nation's economic growth.

Fortunately, the need for uniformity in electronic authentication rules was recognized early by the States. For the past two years, the National Conference of Commissioners on Uniform State Law, an organization comprised of e-commerce experts from the States, has been working to develop a uniform system for the use of electronic signatures for all fifty States. Their product, the Uniform Electronic Transactions Act, or UETA, was finished in July. As was expected, the UETA is an excellent piece of work and I look forward to the day when this model legislation is enacted by each of the 50 states.

But agreement on the final language of the UETA proposal is not the same as enactment, and despite the hard work of the Commissioners, uniformity will not occur until all fifty States actually enact the UETA. That will likely take some time. Because some State legislatures are not in session next year and other States have more pressing legislative items, it could take three to four years for forty-five or fifty States to enact the UETA. When you consider the changes that have

taken place in just the last two years, it is obvious that in the high-technology sector four years is an eternity.

The Digital Millennium Commerce Act is therefore designed as an interim measure to provide relief until the States adopt the provisions of the UETA. It will provide companies the federal framework they need until a national baseline governing the use of electronic authentication exists at the State level. Once States enact the UETA, the Federal preemption is lifted.

To be specific, this legislation promotes electronic commerce in the following manner. First and foremost, the legislation provides that the electronic signatures used to agree to a contract shall not be denied effect solely because they are electronic in nature. This provision assures that a company will be able to rely on an electronic contract and that another party will not be able to escape such certainty, this bill will reduce the likelihood of dissatisfied parties attempting to escape electronic contractual agreements and transactions.

To ensure a level playing field for all types of authentication, the bill grants parties to a transaction the freedom to determine the technologies to be used in the execution of an electronic contract. In essence, this assures technology neutrality because businesses and consumers, not government, will make the decisions as to what type of electronic signatures and authentication technologies will be used in transactions.

Since the Internet is inherently an international medium, consideration must also be given to the manner in which the U.S. conducts business with overseas governments and businesses. This legislation therefore sets forth a series of principles for the international use of electronic signatures. In the last year, U.S. negotiators have been meeting with the European Commissioners to discuss electronic signatures in international commerce. In these negotiations, the U.S. Department of Commerce and the State Department have worked in support of an open system governing the use of authentication technologies. Some European nations oppose this concept, however. For example, Germany insists that electronic transactions involving a German company must utilize a German electronic signature application. I applaud the Administration for their steadfast opposition to that approach. This bill will bolster and strengthen the U.S. position in these international negotiations by establishing the following principles as the will of the Congress:

One, paper-based obstacles to electronic transactions must be eliminated.

Two, parties to an electronic transaction should choose the electronic authentication technology.

Third, parties to a transaction should have the opportunity to prove in court that their authentication approach and transactions are valid.

Fourth, the international approach to electronic signatures should take a non-discriminatory approach to electronic signature. This will allow the fees market—not a government—to determine the type of authentication technologies used in international commerce.

Mr. President, it is my hope that adoption of these principles will increase the likelihood of an open, market-based international framework for electronic commerce.

Finally, the bill directs the Department of Commerce and Office of Management and Budget to report on Federal laws and regulations that might pose barriers to e-commerce and report back to Congress on the impact of such provisions and provide suggestions for reform. Such a report will serve as the basis for Congressional action, or inaction, in the future.

Mr. President, Senator WYDEN, Senator MCCAIN, Senator BURNS, the Majority Leader and I worked very hard to address the multiple of issues and concerns raised by those most affected by this legislation, namely the high-tech industry, the states and the consumer. I also want to recognize the considerable time and effort dedicated to this legislation by Senator LEAHY, Senator HOLLINGS and Senator SARBANES. Senators LEAHY and SARBANES worked diligently with the sponsors of this bill to address protection issues. In particular, my colleagues were concerned about the effects of this legislation on the notification and disclosure requirements required by law. I understand very well the concerns my colleagues raised and I agree with many, but not all, of their conclusions.

I believe the use of electronic records in electronic transactions is crucial to real growth in electronic commerce. And if e-commerce is to truly expand the opportunities for individuals, businesses and consumers must have the freedom to agree to the types of documents and information they receive electronically. This right to choose to receive records electronically must be provided by Congress. The best way to do that is to pass laws which establish legal certainties for the sending, receipt and storage for the broad range of electronic records, and in particular, for records associated with loans and mortgages. Today, a vacuum exists with respect to these records. Aggressive businesses and small banks are filling this vacuum by providing loans and mortgages electronically even though there is question as to whether such transactions are protected under law. The increasing demand for such services demonstrates the popularity for electronic loans. By making applications easier and reducing associated

consumer costs, these businesses are providing a service which is becoming increasingly popular with the American public. Rather than ignore this new market, or worse, condemn it, Congress should work with the industry and the proper regulatory agencies to ensure that these increased consumer opportunities are maintained and that relevant consumer protection provisions are modernized. I believe my proposal to permit individuals to opt-in to the receipt of records and to opt-out of receipt at any time represented reasonable middle ground on this issue, and am disappointed that my colleagues and I could not agree on a framework for records based on this model.

I intend to continue working toward a resolution which will permit individuals to have access to electronic records. It is simply in the long-term best interest of both consumers and the economy. And I am sure I will not labor on this effort alone. I am pleased to note that, among parties familiar with this debate, there is growing support for legislation to quickly address this important issue.

Mr. President, despite our philosophical differences, it was clear from the beginning that everyone involved was interested in working cooperatively to enact good legislation. And while I wish this bill could go further, I am nevertheless pleased with the product that we have passed today. So I want to thank Senator LEAHY and Senator SARBANES for their cooperation and hard work. I also want to recognize the efforts of the Ranking Member of the Commerce Committee, Senator HOLLINGS. Senator HOLLINGS made it clear very early that he had concerns surrounding the issue of preemption. His staff and mine worked quickly and effectively to find common ground on this legislation and his spirit of compromise allowed us to move forward on a bill that I do not doubt he would have written differently. I want to thank him for his contribution.

Finally, I wish to express my thanks to the Technology Division of the State of Massachusetts. Governor Paul Cellucci's staff provided indispensable counsel on existing State law governing the use of electronic signatures and the manner in which Federal law can bolster or hamstring State contract law. I value the Governor's input and will continue to work with him to address the extent to which the States are impacted by this legislation as it advances. Of course, the business and technology sectors have also been crucial in helping to craft this bill. Representatives from the Information Technology Association of America, Ford, the Coalition for Electronic Authentication, the Information Technology Industry Council, Apple, the American Electronics Association, NCR, America Online, the Electronic

Industry Alliance, Microsoft, Hewlett-Packard, IBM and the National Association of Manufacturers have each lent their time and expertise to this effort. I appreciate their contributions and look forward to continuing this effort to ensure that we develop the best approach possible to promote use of electronic signatures in business transactions.

Mr. President, despite the great work that has taken place here in the Senate, there is more work to do on this legislation. The House is currently working on a companion bill and I look forward to working with the Chairman of the Commerce Committee and other Representatives to ensure that the legislation sent to the President for his signature is the best and most effective approach to expanding electronic commerce possible.

Mr. SARBANES. Mr. President, I rise today to discuss S. 761, the Third Millennium Digital Commerce Act. This is an important bill at a pivotal time in our nation's history. The rapid growth of the Internet, and its transformation from an academic research tool to a truly global communications network, is exerting its influence in more and more areas of our daily lives.

One area of enormous change is the way in which Americans buy, sell, and trade products and services. Just as the general store gave way to the shopping mall and mail order catalogues, these now "traditional" forms of retailing are being supplanted by electronic commerce over the Internet. Electronic retailers are providing consumers with a broad range of new choices in goods and services.

Electronic transactions are also becoming an integral part of business-to-business relationships. Ordering, billing, and a host of other activities are now being handled by electronic means, cutting both costs and transaction times. These techniques will make our overall economy more efficient, and the benefits should eventually be passed on to consumers.

The world of electronic commerce is not without its problems, however. One of the largest of these is the lack of coherent legal framework for the conduct of electronic transactions. The commercial world is governed by a patchwork of Federal, state, and local laws. Because electronic commerce is such a recent phenomenon, it can be difficult to apply existing commercial codes and statutes to these new kinds of transactions. Often the laws are simply silent on electronic issues, leading to uncertainty for businesses and consumers alike.

One such area is electronic signatures. Technology now exists that can replace written signatures on paper documents with computer code that performs the same functions. However, many states have not yet enacted laws to ensure that digital signature tech-

nologies, when used in a reasonable and appropriate manner, will be considered valid. According to business groups, this uncertainty has had a dampening effect on the growth of electronic commerce.

Many state legislatures are hard at work to devise a workable, consistent legal framework for electronic records and signatures. Until their efforts are complete, however, S. 761, the bill introduced by Senator ABRAHAM, will serve as a stop-gap measure. It will provide a measure of legal certainty, while protecting the rights of consumers under existing laws governing many types of transactions.

I am pleased to have worked closely with Senator ABRAHAM, Senator LEAHY, Senator WYDEN, members of the Commerce Committee, industry, and consumer groups to craft a bill that answers the legal need, yet provides for continued consumer protections. I would like briefly to describe some of these critical consumer protection aspects of the bill.

While electronic commerce can provide consumers with enormous benefits, a sad stream of news articles over the past few years show clearly that there are unscrupulous operators on the Internet. The passage of this Act is intended to serve as a means of protecting consumers from deceptive practices.

To provide businesses with greater legal certainty, the bill stipulates that contracts cannot be deemed unenforceable solely because they involved the use of an electronic signature. Under this bill, companies and consumers should only be able to agree to reasonable and appropriate electronic signature technologies that provide adequate security to both parties. However, as the definition of the electronic signature makes clear, the electronic signature is only valid under this Act if the person intended to sign the contract.

The basic rules of good faith and fair dealing apply to electronic commerce, and this Act should not be the basis upon which parties to a contract can be asked to agree to terms and conditions for using electronic signatures and electronic contracts which are unreasonable based on the circumstances surrounding the transaction. For example, when the parties have conducted a transaction entirely in person, the fine print of a form contract should not include an agreement that the contract can be provided electronically rather than on paper. In addition, companies must deliver to consumers electronic records of the contract in a form they can receive, retain, and use to prove the terms of an agreement. Such an electronic record would have to be provided in a "locked," or tamper proof, format.

Regarding new laws on electronic transactions, the states have been engaged for some time, through the National Conference of Commissioners on Uniform State Laws, in the formulation of a model Uniform Electronic Transactions Act (UETA). Versions of the UETA will be enacted by the individual states. The bill we are considering today includes a revised definition of UETA, changed from the bill reported by the Commerce Committee, that gives states more flexibility to pass versions of UETA that best meet the needs of their citizens. It is intended that California's recently passed version of UETA, for example, meet this test.

I would like once again to thank my colleagues, Senator ABRAHAM, Senator LEAHY, and Senator WYDEN for their hard work on this issue. I believe that we have reached an accommodation on this legislation that provides industry with the provisional legal certainty they seek, while ensuring that existing consumer laws are not diluted by the increasing use of electronic commerce. This is an important step toward making our commercial laws ready for the twenty-first century.

Mr. LIEBERMAN. Mr. President, I rise today to express my support for the Millennium Digital Commerce Act of 1999. I thank Senators ABRAHAM, LEAHY, and WYDEN for their leadership on this important issue. As a cosponsor of this legislation, I am proud of the steps it takes to support an important and still emerging technology and industry. The Millennium Digital Commerce Act will facilitate the continued growth of the Internet and of electronic commerce. With this legislation, the Senate recognizes the significant transformations taking place in our economy and how we do business today and into the future.

I think we all recognize that we are witnessing an electronic revolution. There is no shortage of statistics to prove what we are seeing all around us. According to a recent U.S. Department of Commerce report, approximately one third of the U.S. economic growth in the past few years has come from information technologies (over \$1.1 trillion). Just this year, venture capitalists have invested more than \$8 billion in Internet companies—twice the rate of last year.

According to a University of Texas report, e-commerce is growing at a much faster rate than many had expected. The digital economy generated more than \$300 billion in revenue in 1998 and was responsible for 1.2 million jobs. Many e-commerce companies in my State of Connecticut, like Micro-Warehouse in Norwalk, Coastal Tool & Supply in West Hartford, and Sagemaker Inc. of Fairfield, are leading the way in the digital economy.

In the Senate, I have worked to support the growth of e-commerce by co-

sponsoring the Internet Tax Freedom Act which places a three year moratorium on new state and local taxes on the Internet in order to give the digital economy some breathing room to evolve.

This legislation takes further steps to continue the growth of e-commerce and is a powerful follow-on to the Internet Tax Freedom Act. With this legislation we will eliminate a major barrier to e-commerce by providing for the legal recognition of electronic signatures in contracting and by creating a consistent, but temporary, national electronic signatures law to preempt a multitude of sometimes inconsistent state laws. This bill is technology neutral, allowing contracting parties to determine the appropriate electronic signature technology for their transaction. Importantly, this legislation is the result of thoughtful compromise. It gives electronic signatures more legal certainty but also provides for consumer protection. It deals with electronic signatures only in creating contracts. It preempts state law only until the states enact their own statutes and standards as provided for by the Uniform Electronic Transactions Act (UETA).

Mr. President, I would like to thank those who have worked so diligently to create this Act. Through the considerate and collaborative approach of several of my colleagues, including Senators ABRAHAM, LEAHY, and WYDEN, we now have legislation with language that achieves a broad public purpose. We are now able to continue supporting the growth and evolution of electronic commerce and technologies that will effectively bring us into the next century.

Mr. WYDEN. Mr. President, for the past several years, Congress has been working in a bipartisan way to write the rules of the digital economy. We have made significant progress on Internet taxes, privacy, encryption and the Y2K problem. Now is the time to move forward on rules for electronic signatures.

The bill before us today, S. 761, is based on the premise that it's better to be online than waiting in line. A growing number of Americans who now have to wait in line for things like a driver's license or construction permit, could see their business expedited by a few clicks of their mouse.

We live in an increasingly mobile society, where young people get recruited for jobs clear across the country. They may need to move in a hurry but don't have the time, for example, to pack up a home in Virginia and look for another one in Portland, Oregon. With the Internet, they can shop for a house in another town. With this electronic signatures bill, they can pretty much conclude the whole transaction of purchasing the house online.

The legislation puts electronic and paper contracts and agreements on

equal footing legally. Like the Internet Tax Freedom Act, the bill would establish technological neutrality between electronic and paper contracts and agreements. This means consumers will enjoy the same legal protections when purchasing a car or home online as when they walk into an auto dealership or real estate office and sign all the documents in person. We worked long and hard to make sure that the system established here benefits consumers who wish to receive information electronically without treating those without computers as second class citizens.

This legislation does not address the issue of electronic records because this matter deserves more thorough study and discussion. I intend to work with all interested parties on this—from consumer groups to financial services firms—over the course of the coming months to craft legislation that will extend the benefits of this measure to electronic records in a way that continues consumer protections.

Commercial transactions have traditionally been governed by State laws which are modeled on the Uniform Commercial Code. Forty-two states have some law in place relating to digital authentication. But differences between and among these laws can create confusion for e-entrepreneurs. The unstoppable growth of electronic commerce has led the States recently to develop a Uniform Electronic Transactions Act, or UETA (as part of the Uniform Commercial Code), to serve as a model for each State legislature in developing further its own electronic signatures law. However, only one State—California—has enacted a UETA. The purpose of this legislation is to provide interim Federal legal validity for electronic contracts and agreements until each state enacts its own UETA. This means e-commerce will not be hamstrung by the lack of legal standing.

I would like to take a minute to run through the highlights of S. 761:

Technological neutrality: It allows electronic signatures to replace written signatures. In interstate commerce a contract cannot be denied legal effect solely because of an electronic signature, electronic record or an electronic agent was used in its formation.

Choice of technology: It does not dictate the type of electronic signature technology to be used; it allows the parties to a transaction to choose their own authentication technology.

Consumer protections: It protects consumer rights under State laws; it does not preempt State consumer protection laws. It assures that consumers without a computer are not treated as second class citizens. If a consumer buys a car online, the consumer cannot be forced to use the computer to receive important recall or safety notices but retains the option to continue to get such notices through the mail.

No State preemption: Its provisions sunset when a State enacts UETA.

Excludes matters of family law: It specifically excludes agreements relating to marriage, adoption, premarital agreements, divorce, residential landlord-tenant matters because these are not commercial transactions.

Report on Federal statutory barriers to electronic transactions: It requires OMB to report to Congress 18 months after enactment identifying statutory barriers to electronic transactions and recommending legislation to remove such barriers.

In conclusion, M. President, I wish to acknowledge the leadership of Sen. ABRAHAM in moving this legislation forward. He and I have teamed up successfully on other legislation, and it was a pleasure to work with him and his tireless staff on this bill. I also want to recognize the contribution of Senator LEAHY, particularly with regard to the consumer protection provisions, as well as the effort of Senator HOLLINGS. It took a bipartisan team to get this bill through the Senate today, and I look forward to continuing to work with this team as we go to conference with the House on S. 761.

I ask unanimous consent that my statement be printed in the record following Senator ABRAHAM's statement on the passage of S. 761.

Mr. LIEBERMAN. Mr. President, I rise today to express my support for the Millennium Digital Commerce Act of 1999. I thank Senators ABRAHAM, LEAHY, and WYDEN for their leadership on this important issue. As a cosponsor of this legislation, I am proud of the steps it takes to support an important and still emerging technology and industry. The Millennium Digital Commerce Act will facilitate the continued growth of the Internet and of electronic commerce. With this legislation, the Senate recognizes the significant transformations taking place in our economy and how we do business today and into the future.

I think we all recognize that we are witnessing an electronic revolution. There is no shortage of statistics to prove what we are seeing all around us. According to a recent U.S. Department of Commerce report, approximately one third of the U.S. economic growth in the past few years has come from information technologies (over \$1.1 trillion). Just this year, venture capitalists have invested more than \$8 billion in Internet companies—twice the rate of last year.

According to a University of Texas report, e-commerce is growing at a much faster rate than many had expected. The digital economy generated more than \$300 billion in revenue in 1998 and was responsible for 1.2 million jobs. Many e-commerce companies in my State of Connecticut, like Micro Warehouse in Norwalk, Coastal Tool & Supply in West Hartford, and

Sagemaker Inc. of Fairfield, are leading the way in the digital economy.

In the Senate, I have worked to support the growth of e-commerce by cosponsoring the Internet Tax Freedom Act which places a three year moratorium on new state and local taxes on the Internet in order to give the digital economy some breathing room to evolve.

This legislation takes further steps to continue the growth of e-commerce and is a powerful follow-on to the Internet Tax Freedom Act. With this legislation we will eliminate a major barrier to e-commerce by providing for the legal recognition of electronic signatures in contracting and by creating a consistent, but temporary, national electronic signatures law to preempt a multitude of sometimes inconsistent state laws. This bill is technology neutral, allowing contracting parties to determine the appropriate electronic signature technology for their transaction. Importantly, this legislation is the result of thoughtful compromise. It gives electronic signatures more legal certainty but also provides for consumer protection. It deals with electronic signatures only in creating contracts. It preempts state law only until the states enact their own statutes and standards as provided for by the Uniform Electronic Transactions Act (UETA).

Mr. President, I thank those who have worked so diligently to create this Act. Through the considerate and collaborative approach of several of my colleagues, including Senators ABRAHAM, LEAHY, and WYDEN, we now have legislation with language that achieves a broad public purpose. We are now able to continue supporting the growth and evolution of electronic commerce and technologies that will effectively bring us into the next century.

Ms. COLLINS. Mr. President, I ask unanimous consent the committee amendment in the nature of a substitute be agreed to as amended, the bill be read the third time and passed, the motion to reconsider laid upon the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 761), as amended, was read the third time and passed, as follows:

[The bill was not available for printing. It will appear in a future edition of the RECORD.]

UNANIMOUS-CONSENT AGREEMENT

Ms. COLLINS. Mr. President, I ask unanimous consent at 4 p.m. the Senate proceed to the Work Incentives conference report, and that there be 120 minutes equally divided in the usual form, with an additional 10 minutes

under the control of Senator LOTT. I further ask consent that following the use or yielding back of time, the vote on the adoption of the conference report occur immediately following the vote on adoption of the conference report to accompany H.R. 3195.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. COLLINS. I further ask consent immediately following the vote on the adoption of the conference report, H. Con. Res. 236 be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

CHURCH PLAN PARITY AND ENTANGLEMENT PREVENTION ACT OF 1999

Ms. COLLINS. Mr. President, I ask unanimous consent the health committee be discharged from further consideration of S. 1309 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title. The legislative clerk read as follows:

A bill (S. 1309) to amend title I of the Employee Retirement Income Security Act of 1974 to provide for the preemption of State law in certain cases relating to certain church plans.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2788

(Purpose: To provide for a complete substitute)

Ms. COLLINS. Mr. President, there is a substitute amendment at the desk submitted by Senators SESSIONS and JEFFORDS. I ask for its consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS] for Mr. SESSIONS, for himself, and Mr. JEFFORDS, proposes an amendment numbered 2788.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. PURPOSE.

The purpose of this Act is only to clarify the application to a church plan that is a welfare plan of State insurance laws that require or solely relate to licensing, solvency, insolvency, or the status of such plan as a single employer plan.

SEC. 2. CLARIFICATION OF CHURCH WELFARE PLAN STATUS UNDER STATE INSURANCE LAW.

(a) IN GENERAL.—For purposes of determining the status of a church plan that is a welfare plan under provisions of a State insurance law described in subsection (b), such a church plan (and any trust under such plan) shall be deemed to be a plan sponsored by a single employer that reimburses costs from general church assets, or purchases insurance coverage with general church assets, or both.

(b) STATE INSURANCE LAW.—A State insurance law described in this subsection is a law that—

(1) requires a church plan, or an organization described in section 414(e)(3)(A) of the Internal Revenue Code of 1986 and section 3(33)(C)(i) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(33)(C)(i)) to the extent that it is administering or funding such a plan, to be licensed; or

(2) relates solely to the solvency or insolvency of a church plan (including participation in State guaranty funds and associations).

(c) DEFINITIONS.—For purposes of this section:

(1) CHURCH PLAN.—The term “church plan” has the meaning given such term by section 414(e) of the Internal Revenue Code of 1986 and section 3(33) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(33)).

(2) REIMBURSES COSTS FROM GENERAL CHURCH ASSETS.—The term “reimburses costs from general church assets” means engaging in an activity that is not the spreading of risk solely for the purposes of the provisions of State insurance laws described in subsection (b).

(3) WELFARE PLAN.—The term “welfare plan”—

(A) means any church plan to the extent that such plan provides medical, surgical, or hospital care or benefits, or benefits in the event of sickness, accident, disability, death or unemployment, or vacation benefits, apprenticeship or other training programs, or day care centers, scholarship funds, or prepaid legal services; and

(B) does not include any entity, such as a health insurance issuer described in section 9832(b)(2) of the Internal Revenue Code of 1986 or a health maintenance organization described in section 9832(b)(3) of such Code, or any other organization that does business with the church plan or organization sponsoring or maintaining such a plan.

(d) ENFORCEMENT AUTHORITY.—Notwithstanding any other provision of this section, for purposes of enforcing provisions of State insurance laws that apply to a church plan that is a welfare plan, the church plan shall be subject to State enforcement as if the church plan were an insurer licensed by the State.

(e) APPLICATION OF SECTION.—Except as provided in subsection (d), the application of this section is limited to determining the status of a church plan that is a welfare plan under the provisions of State insurance laws described in subsection (b). This section shall not otherwise be construed to recharacterize the status, or modify or affect the rights, of any plan participant or beneficiary, including participants or beneficiaries who make plan contributions.

Ms. COLLINS. I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2788) was agreed to.

Ms. COLLINS. Mr. President, I ask unanimous consent the bill be read the third time and passed, as amended, the motion to reconsider be laid upon the table and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1309), as amended, was read the third time and passed, as follows:

S. 1309

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PURPOSE.

The purpose of this Act is only to clarify the application to a church plan that is a welfare plan of State insurance laws that require or solely relate to licensing, solvency, insolvency, or the status of such plan as a single employer plan.

SEC. 2. CLARIFICATION OF CHURCH WELFARE PLAN STATUS UNDER STATE INSURANCE LAW.

(a) IN GENERAL.—For purposes of determining the status of a church plan that is a welfare plan under provisions of a State insurance law described in subsection (b), such a church plan (and any trust under such plan) shall be deemed to be a plan sponsored by a single employer that reimburses costs from general church assets, or purchases insurance coverage with general church assets, or both.

(b) STATE INSURANCE LAW.—A State insurance law described in this subsection is a law that—

(1) requires a church plan, or an organization described in section 414(e)(3)(A) of the Internal Revenue Code of 1986 and section 3(33)(C)(i) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(33)(C)(i)) to the extent that it is administering or funding such a plan, to be licensed; or

(2) relates solely to the solvency or insolvency of a church plan (including participation in State guaranty funds and associations).

(c) DEFINITIONS.—For purposes of this section:

(1) CHURCH PLAN.—The term “church plan” has the meaning given such term by section 414(e) of the Internal Revenue Code of 1986 and section 3(33) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(33)).

(2) REIMBURSES COSTS FROM GENERAL CHURCH ASSETS.—The term “reimburses costs from general church assets” means engaging in an activity that is not the spreading of risk solely for the purposes of the provisions of State insurance laws described in subsection (b).

(3) WELFARE PLAN.—The term “welfare plan”—

(A) means any church plan to the extent that such plan provides medical, surgical, or hospital care or benefits, or benefits in the event of sickness, accident, disability, death or unemployment, or vacation benefits, apprenticeship or other training programs, or day care centers, scholarship funds, or prepaid legal services; and

(B) does not include any entity, such as a health insurance issuer described in section 9832(b)(2) of the Internal Revenue Code of 1986 or a health maintenance organization described in section 9832(b)(3) of such Code, or any other organization that does business with the church plan or organization sponsoring or maintaining such a plan.

(d) ENFORCEMENT AUTHORITY.—Notwithstanding any other provision of this section, for purposes of enforcing provisions of State insurance laws that apply to a church plan that is a welfare plan, the church plan shall be subject to State enforcement as if the church plan were an insurer licensed by the State.

(e) APPLICATION OF SECTION.—Except as provided in subsection (d), the application of this section is limited to determining the status of a church plan that is a welfare plan

under the provisions of State insurance laws described in subsection (b). This section shall not otherwise be construed to recharacterize the status, or modify or affect the rights, of any plan participant or beneficiary, including participants or beneficiaries who make plan contributions.

Mr. LEAHY. Mr. President, the Senate is today passing an important bill, S. 1257, the Hatch-Leahy-Schumer “Digital Theft Deterrence and Copyright Damages Improvement Act of 1999.” This legislation should help our copyright industries, which in turn helps both those who are employed in those industries and those who enjoy the wealth of consumer products, including books, magazines, movies, and computer software, that makes the vibrant culture of this country the envy of the world. This legislation has already traveled an unnecessarily bumpy road to get to this stage, and it is my hope that it will be sent promptly to the President’s desk.

On July 1, 1999, the Senate passed four intellectual property bills which Senator HATCH and I had joined in introducing and which the Judiciary Committee had unanimously reported. Each of these bills (S. 1257, which we consider today; S. 1258, the Patent Fee Integrity and Innovation Protection Act; S. 1259, the Trademark Amendments Act; and S. 1260, the Copyright Act Technical Corrections Act) make important improvements to our intellectual property laws, and I congratulate Senator HATCH for his leadership in moving these bills promptly through the Committee.

Three of those four bills then passed the House without amendment and were signed by the President on August 5, 1999. The House sent back to the Senate S. 1257, the Digital Theft Deterrence and Copyright Damages Improvement Act, with two modifications which I will describe below.

I have long been concerned about reducing the levels of software piracy in this country and around the world. The theft of digital copyrighted works and, in particular, of software, results in lost jobs to American workers, lost taxes to Federal and State governments, and lost revenue to American companies. A recent report released by the Business Software Alliance estimates that worldwide theft of copyrighted software in 1998 amounted to nearly \$11 billion. According to the report, if this “pirated software has instead been legally purchased, the industry would have been able to employ 32,700 more people. In 2008, if software piracy remains at its current rate, 52,700 jobs will be lost in the core software industry.” This theft also reflects losses of \$991 million in tax revenue in the United States.

These statistics about the harm done to our economy by the theft of copyrighted software alone, prompted me to introduce the “Criminal Copyright Improvement Act” in both the 104th and

105th Congresses, and to work for passage of this legislation, which was finally enacted as the "No Electronic Theft Act of 1997," Pub. L. 105-147. The current rates of software piracy show that we need to do better to combat this theft, both with enforcement of our current copyright laws and with strengthened copyright laws to deter potential infringers.

The Hatch-Leahy-Schumer "Digital Theft Deterrence and Copyright Damages Improvement Act" would help provide additional deterrence by amending the Copyright Act, 17 U.S.C. §504(c), to increase the amounts of statutory damages recoverable for copyright infringements. These amounts were last increased in 1988 when the United States acceded to the Berne Convention. Specifically, the bill would increase the cap on statutory damages by 50 percent, raising the minimum from \$500 to \$750 and raising the maximum from \$20,000 to \$30,000. In addition, the bill would raise from \$100,000 to \$150,000 the amount of statutory damages for willful infringements.

Courts determining the amount of statutory damages in any given case would have discretion to impose damages within these statutory ranges at just and appropriate levels, depending on the harm caused, ill-gotten profits obtained and the gravity of the offense. The bill preserves provisions of the current law allowing the court to reduce the award of statutory damages to as little as \$200 in cases of innocent infringement and requiring the court to remit damages in certain cases involving nonprofit educational institutions, libraries, archives, or public broadcasting entities.

Finally, the bill provides authority for the Sentencing Commission expeditiously to fulfill its responsibilities under the No Electronic Theft Act, which directed the Commission to ensure that the guidelines provide for consideration of the retail value and quantity of the items with respect to which the intellectual property offense was committed. Since the time that this law became effective, the Sentencing Commission has not had a full slate of Commissioners serving. In fact, we have had no Commissioners since October, 1998. This situation was corrected last week with the confirmation of seven new Commissioners.

As I noted, the House amended the version of S. 1257 that the Senate passed in July in two ways. First, the original House version of this legislation, H.R. 1761, contained a new proposed enhanced penalty for infringers who engage in a repeated pattern of infringement, but without any scienter requirement. I shared the concerns raised by the Copyright Office that this provision, absent a willfulness scienter requirement, would permit imposition of the enhanced penalty even against person who negligently, albeit repeat-

edly, engaged in acts of infringement. Consequently, the Hatch-Leahy-Schumer bill, S. 1257, that we sent to the House in July avoided casting such a wide net, which could chill legitimate fair uses of copyrighted works. Instead, the bill we sent to the House would have created a new tier of statutory damages allowing a court to award damages in the amount of \$250,000 per infringed work where the infringement is part of a willful and repeated pattern or practice of infringement. The entire "pattern and practice" provision, which originated in the House, has been removed from the version of S. 1257 sent back to the Senate.

Second, the original House version of this legislation provided a direction to the Sentencing Commission to amend the guidelines to provide an enhancement based upon the retail price of the legitimate items that are infringed and the quantity of the infringing items. I was concerned that this direction would require the Commission and, ultimately, sentencing judges to treat similarly a wide variety of infringement crimes, no matter the type and magnitude of harm. This was a problem we avoided in the carefully crafted Sentencing Commission directive originally passed as part of the No Electronic Theft Act. Consequently, the version of S. 1257 passed by the Senate in July did not include the directive to the Sentencing Commission. The House then returned S. 1257 with the same problematic directive to the Sentencing Commission.

I appreciate that my House colleagues and interested stakeholders have worked over the past months to address my concerns over the breadth of the proposed directive to the Sentencing Commission, and to find a better definition of the categories of cases in which it would be appropriate to compute the applicable sentencing guideline based upon the retail value of the infringed upon item. A better solution than the one contained in the No Electronic Theft Act remains elusive, however.

For example, one recent proposal seeks to add to S. 1257 a direction to the Sentencing Commission to enhance the guideline offense level for copyright and trademark infringements based upon the retail price of the legitimate products multiplied by the quantity of the infringing products, except where "the infringing products are substantially inferior to the infringed upon products and there is substantial price disparity between the legitimate products and the infringing products." This proposed direction appears to be under-inclusive since it would not allow a guideline enhancement in cases where fake goods are passed off as the real item to unsuspecting consumers, even though this is clearly a situation in which the Commission may decide to provide an enhancement.

In view of the fact that the full Sentencing Commission has not had an opportunity for the past two years to consider and implement the original direction in the No Electronic Theft Act, passing a new and flawed directive appears to be both unnecessary and unwise. This is particularly the case since the new Commissioners have already indicated a willingness to consider this issue promptly. In response to questions posed at their confirmation hearings, each of the nominated Sentencing Commissioners indicated that they would make this issue a priority. For example, Judge William Sessions of the District of Vermont specifically noted that:

If confirmed, our first task must be to address Congress' longstanding directives, including implementation of the guidelines pursuant to the NET Act. Congress directed the Sentencing Commission to fashion guidelines under the NET Act that are sufficiently severe to deter such criminal activity. I personally favor addressing penalties under this statute expeditiously.

I fully concur in the judgment of Chairman HATCH that the Sentencing Commission directive provision added by the House and to send, again, S. 1257 to the House for action.

This bill represents an improvement in current copyright law, and I hope that it will soon be sent to the President for enactment.

TO AMEND THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

Ms. COLLINS. Mr. President, I ask unanimous consent the Agriculture Committee be discharged from further consideration of S. 961, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 961) to amend the Consolidated Farm and Rural Development Act to improve shared appreciation arrangements.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2789

(Purpose: To provide a substitute amendment)

Ms. COLLINS. Mr. President, there is a substitute amendment at the desk submitted by Senator BURNS, and I ask for its consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS] for Mr. BURNS, proposes an amendment numbered 2789.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHARED APPRECIATION ARRANGEMENTS.

(a) IN GENERAL.—Section 353(e) of the Consolidated Farm and Rural Development Act

(7 U.S.C. 2001(e)) is amended by striking paragraph (2) and inserting the following:

"(2) TERMS.—A shared appreciation agreement entered into by a borrower under this subsection shall—

"(A) have a term not to exceed 10 years;

"(B) provide for recapture based on the difference between—

"(i) the appraised value of the real security property at the time of restructuring; and

"(ii) that value at the time of recapture, except that that value shall not include the value of any capital improvements made to the real security property by the borrower after the time of restructuring; and

"(C) allow the borrower to obtain a loan, in addition to any other outstanding loans under this title, to pay any amounts due on a shared appreciation agreement, at a rate of interest that is not greater than the rate of interest on outstanding marketable obligations of the United States of a maturity comparable to that of the loan."

(b) APPLICATION.—The amendment made by subsection (a) shall apply to a shared appreciation arrangement entered into under section 353(e) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2001(e)) that matures on or after the date of enactment of this Act.

Ms. COLLINS. Mr. President, I ask unanimous consent the amendment be agreed to, the bill be read the third time and passed as amended, the motion to reconsider be laid upon the table, and that any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2789) was agreed to.

The bill (S. 961), as amended, was read the third time and passed, as follows:

[The bill was not available for printing. It will appear in a future edition of the RECORD.]

COPYRIGHT DAMAGES IMPROVEMENT ACT OF 1999

Ms. COLLINS. I ask unanimous consent the Chair lay before the Senate a message from the House to accompany S. 1257.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1257) entitled "An Act to amend statutory damages provisions of title 17, United States Code", do pass with the following amendment:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Copyright Damages Improvement Act of 1999".

SEC. 2. STATUTORY DAMAGES ENHANCEMENT.

Section 504(c) of title 17, United States Code, is amended—

(1) in paragraph (1)—

(A) by striking "\$500" and inserting "\$750"; and

(B) by striking "\$20,000" and inserting "\$30,000"; and

(2) in paragraph (2), by striking "\$100,000" and inserting "\$150,000".

SEC. 3. SENTENCING COMMISSION GUIDELINES.

Section 2(g) of the No Electronic Theft (NET) Act (28 U.S.C. 994 note) is amended by striking paragraph (2) and inserting the following:

"(2) In implementing paragraph (1), the Sentencing Commission shall amend the guideline applicable to criminal infringement of a copyright or trademark to provide an enhancement based upon the retail price of the legitimate items that are infringed upon and the quantity of the infringing items. To the extent the conduct involves a violation of section 2319A of title 18, United States Code, the enhancement shall be based upon the retail price of the infringing items and the quantity of the infringing items.

"(3) Paragraph (1) shall be implemented not later than 3 months after the later of—

"(A) the first day occurring after May 20, 1999; or

"(B) the first day after the date of the enactment of this paragraph, on which sufficient members of the Sentencing Commission have been confirmed to constitute a quorum.

"(4) The Commission shall promulgate the guidelines or amendments provided for under this section in accordance with the procedures set forth in section 21(a) of the Sentencing Act of 1987, as though the authority under that Act had not expired."

SEC. 4. EFFECTIVE DATE.

The amendments made by section 2 shall apply to any action brought on or after the date of the enactment of this Act, regardless of the date on which the alleged activity that is the basis of the action occurred.

AMENDMENT NO. 2790

(Purpose: To provide for the promulgation of emergency guidelines by the United States Sentencing Commission relating to criminal infringement of a copyright or trademark, and for other purposes)

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate concur in the House amendment with a further amendment which is at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS] for Mr. HATCH, for himself, and Mr. LEAHY, proposes an amendment numbered 2790.

The amendment is as follows:

On page 1, line 2, insert "Digital Theft Deterrence and" before "Copyright".

On page 2, strike lines 2 through 26 and insert the following:

Within 120 days after the date of the enactment of this Act, or within 120 days after the first date on which there is a sufficient number of voting members of the Sentencing Commission to constitute a quorum, whichever is later, the Commission shall promulgate emergency guideline amendments to implement section 2(g) of the No Electronic Theft (NET) Act (28 U.S.C. 994 note) in accordance with the procedures set forth in section 21(a) of the Sentencing Act of 1987, as though the authority under that Act had not expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDING THE INSPECTOR GENERAL ACT

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar No. 408, S. 1707.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1707) to amend the Inspector General Act of 1978 (5 U.S.C. app.) to provide that certain designated Federal entities shall be establishments under such Act, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. THE TENNESSEE VALLEY AUTHORITY AS AN ESTABLISHMENT UNDER THE INSPECTOR GENERAL ACT OF 1978.

(a) FINDINGS.—Congress finds that—

(1) Inspectors General serve an important function in preventing and eliminating fraud, waste, and abuse in the Federal Government; and

(2) independence is vital for an Inspector General to function effectively.

(b) ESTABLISHMENT OF INSPECTOR GENERAL.—The Inspector General Act of 1978 (5 U.S.C. App.) is amended—

(1) in section 8G(a)(2) by striking "the Tennessee Valley Authority,"; and

(2) in section 11—

(A) in paragraph (1) by striking "or the Commissioner of Social Security, Social Security Administration," and inserting "the Commissioner of Social Security, Social Security Administration; or the Board of Directors of the Tennessee Valley Authority,"; and

(B) in paragraph (2) by striking "or the Social Security Administration," and inserting "the Social Security Administration, or the Tennessee Valley Authority,".

(c) EXECUTIVE SCHEDULE POSITION.—Section 5315 of title 5, United States Code, is amended by inserting after the item relating to the Inspector General of the Small Business Administration the following:

"Inspector General, Tennessee Valley Authority."

(d) EFFECTIVE DATE AND APPLICATION.—

(1) IN GENERAL.—The amendments made by this section shall take effect 30 days after the date of enactment of this Act.

(2) INSPECTOR GENERAL.—The person serving as Inspector General of the Tennessee Valley Authority on the effective date of this section—

(A) may continue such service until the President makes an appointment under section 3(a) of the Inspector General Act of 1978 (5 U.S.C. App.) consistent with the amendments made by this section; and

(B) shall be subject to section 8G (c) and (d) of the Inspector General Act of 1978 (5 U.S.C. App.) as applicable to the Board of Directors of the Tennessee Valley Authority, unless that person is appointed by the President, by and with the advice and consent of the Senate, to be Inspector General of the Tennessee Valley Authority.

SEC. 2. ESTABLISHMENT OF INSPECTORS GENERAL CRIMINAL INVESTIGATOR ACADEMY AND INSPECTORS GENERAL FORENSIC LABORATORY.

(a) INSPECTORS GENERAL CRIMINAL INVESTIGATOR ACADEMY.—

(1) ESTABLISHMENT.—There is established the Criminal Investigator Academy within the Department of the Treasury. The Criminal Investigator Academy is established for the purpose of performing investigator training services for offices of inspectors general created under the Inspector General Act of 1978 (5 U.S.C. App.).

(2) EXECUTIVE DIRECTOR.—The Criminal Investigator Academy shall be administered by an Executive Director who shall report to an inspector general for an establishment as defined

in section 11 of the Inspector General Act of 1978 (5 U.S.C. App.)—

(A) designated by the President's Council on Integrity and Efficiency; or

(B) if that council is eliminated, by a majority vote of the inspector generals created under the Inspector General Act of 1978 (5 U.S.C. App.).

(b) INSPECTORS GENERAL FORENSIC LABORATORY.—

(1) ESTABLISHMENT.—There is established the Inspectors General Forensic Laboratory within the Department of the Treasury. The Inspector General Forensic Laboratory is established for the purpose of performing forensic services for offices of inspectors general created under the Inspector General Act of 1978 (5 U.S.C. App.).

(2) EXECUTIVE DIRECTOR.—The Inspectors General Forensic Laboratory shall be administered by an Executive Director who shall report to an inspector general for an establishment as defined in section 11 of the Inspector General Act of 1978 (5 U.S.C. App.)—

(A) designated by the President's Council on Integrity and Efficiency; or

(B) if that council is eliminated, by a majority vote of the inspector generals created under the Inspector General Act of 1978 (5 U.S.C. App.).

(c) SEPARATE APPROPRIATIONS ACCOUNT.—Section 1105(a) of title 31, United States Code, is amended by adding at the end the following:

“(33) a separate appropriation account for appropriations for the Inspectors General Criminal Investigator Academy and the Inspectors General Forensic Laboratory of the Department of the Treasury.”.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to carry out this section such sums as may be necessary for fiscal year 2001 and each fiscal year thereafter.

Ms. COLLINS. Mr. President, I ask unanimous consent that the committee substitute be agreed to, the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 1707), as amended, was read the third time and passed, as follows:

S. 1707

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. THE TENNESSEE VALLEY AUTHORITY AS AN ESTABLISHMENT UNDER THE INSPECTOR GENERAL ACT OF 1978.

(a) FINDINGS.—Congress finds that—

(1) Inspectors General serve an important function in preventing and eliminating fraud, waste, and abuse in the Federal Government; and

(2) independence is vital for an Inspector General to function effectively.

(b) ESTABLISHMENT OF INSPECTOR GENERAL.—The Inspector General Act of 1978 (5 U.S.C. App.) is amended—

(1) in section 8G(a)(2) by striking “the Tennessee Valley Authority.”; and

(2) in section 11—

(A) in paragraph (1) by striking “or the Commissioner of Social Security, Social Security Administration;” and inserting “the Commissioner of Social Security, Social Security Administration; or the Board of Directors of the Tennessee Valley Authority;”;

and

(B) in paragraph (2) by striking “or the Social Security Administration;” and inserting

“the Social Security Administration, or the Tennessee Valley Authority;”.

(c) EXECUTIVE SCHEDULE POSITION.—Section 5315 of title 5, United States Code, is amended by inserting after the item relating to the Inspector General of the Small Business Administration the following:

“Inspector General, Tennessee Valley Authority.”.

(d) EFFECTIVE DATE AND APPLICATION.—

(1) IN GENERAL.—The amendments made by this section shall take effect 30 days after the date of enactment of this Act.

(2) INSPECTOR GENERAL.—The person serving as Inspector General of the Tennessee Valley Authority on the effective date of this section—

(A) may continue such service until the President makes an appointment under section 3(a) of the Inspector General Act of 1978 (5 U.S.C. App.) consistent with the amendments made by this section; and

(B) shall be subject to section 8G (c) and (d) of the Inspector General Act of 1978 (5 U.S.C. App.) as applicable to the Board of Directors of the Tennessee Valley Authority, unless that person is appointed by the President, by and with the advice and consent of the Senate, to be Inspector General of the Tennessee Valley Authority.

SEC. 2. ESTABLISHMENT OF INSPECTORS GENERAL CRIMINAL INVESTIGATOR ACADEMY AND INSPECTORS GENERAL FORENSIC LABORATORY.

(a) INSPECTORS GENERAL CRIMINAL INVESTIGATOR ACADEMY.—

(1) ESTABLISHMENT.—There is established the Criminal Investigator Academy within the Department of the Treasury. The Criminal Investigator Academy is established for the purpose of performing investigator training services for offices of inspectors general created under the Inspector General Act of 1978 (5 U.S.C. App.).

(2) EXECUTIVE DIRECTOR.—The Criminal Investigator Academy shall be administered by an Executive Director who shall report to an inspector general for an establishment as defined in section 11 of the Inspector General Act of 1978 (5 U.S.C. App.)—

(A) designated by the President's Council on Integrity and Efficiency; or

(B) if that council is eliminated, by a majority vote of the inspector generals created under the Inspector General Act of 1978 (5 U.S.C. App.).

(b) INSPECTORS GENERAL FORENSIC LABORATORY.—

(1) ESTABLISHMENT.—There is established the Inspectors General Forensic Laboratory within the Department of the Treasury. The Inspector General Forensic Laboratory is established for the purpose of performing forensic services for offices of inspectors general created under the Inspector General Act of 1978 (5 U.S.C. App.).

(2) EXECUTIVE DIRECTOR.—The Inspectors General Forensic Laboratory shall be administered by an Executive Director who shall report to an inspector general for an establishment as defined in section 11 of the Inspector General Act of 1978 (5 U.S.C. App.)—

(A) designated by the President's Council on Integrity and Efficiency; or

(B) if that council is eliminated, by a majority vote of the inspector generals created under the Inspector General Act of 1978 (5 U.S.C. App.).

(c) SEPARATE APPROPRIATIONS ACCOUNT.—Section 1105(a) of title 31, United States Code, is amended by adding at the end the following:

“(33) a separate appropriation account for appropriations for the Inspectors General Criminal Investigator Academy and the In-

spectors General Forensic Laboratory of the Department of the Treasury.”.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to carry out this section such sums as may be necessary for fiscal year 2001 and each fiscal year thereafter.

CHEYENNE RIVER SIOUX TRIBE EQUITABLE COMPENSATION ACT

Ms. COLLINS. I ask unanimous consent the Senate now proceed to the immediate consideration of Calendar No. 407, S. 964.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 964) to provide for equitable compensation for the Cheyenne River Sioux Tribe, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Indian Affairs, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

TITLE I—CHEYENNE RIVER SIOUX TRIBE EQUITABLE COMPENSATION

SEC. 101. SHORT TITLE.

This title may be cited as the “Cheyenne River Sioux Tribe Equitable Compensation Act”.

SEC. 102. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) by enacting the Act of December 22, 1944, (58 Stat. 887, chapter 665; 33 U.S.C. 701-1 et seq.), commonly known as the “Flood Control Act of 1944”, Congress approved the Pick-Sloan Missouri River Basin program (referred to in this section as the “Pick-Sloan program”)—

(A) to promote the general economic development of the United States;

(B) to provide for irrigation above Sioux City, Iowa;

(C) to protect urban and rural areas from devastating floods of the Missouri River; and

(D) for other purposes;

(2) the Oahe Dam and Reservoir project—

(A) is a major component of the Pick-Sloan program, and contributes to the economy of the United States by generating a substantial amount of hydropower and impounding a substantial quantity of water;

(B) overlies the eastern boundary of the Cheyenne River Sioux Indian Reservation; and

(C) has not only contributed little to the economy of the Tribe, but has severely damaged the economy of the Tribe and members of the Tribe by inundating the fertile, wooded bottom lands of the Tribe along the Missouri River that constituted the most productive agricultural and pastoral lands of the Tribe and the homeland of the members of the Tribe;

(3) the Secretary of the Interior appointed a Joint Tribal Advisory Committee that examined the Oahe Dam and Reservoir project and concluded that—

(A) the Federal Government did not justify, or fairly compensate the Tribe for, the Oahe Dam and Reservoir project when the Federal Government acquired 104,492 acres of land of the Tribe for that project; and

(B) the Tribe should be adequately compensated for the land acquisition described in subparagraph (A);

(4) after applying the same method of analysis as is used for the compensation of similarly situated Indian tribes, the Comptroller General of the United States (referred to in this title as the “Comptroller General”) determined that the appropriate amount of compensation to pay the Tribe for the land acquisition described in paragraph (3)(A) would be \$290,723,000;

(5) the Tribe is entitled to receive additional financial compensation for the land acquisition described in paragraph (3)(A) in a manner consistent with the determination of the Comptroller General described in paragraph (4); and

(6) the establishment of a trust fund to make amounts available to the Tribe under this title is consistent with the principles of self-governance and self-determination.

(b) **PURPOSES.**—The purposes of this title are as follows:

(1) To provide for additional financial compensation to the Tribe for the acquisition by the Federal Government of 104,492 acres of land of the Tribe for the Oahe Dam and Reservoir project in a manner consistent with the determinations of the Comptroller General described in subsection (a)(4).

(2) To provide for the establishment of the Cheyenne River Sioux Tribal Recovery Trust Fund, to be managed by the Secretary of the Treasury in order to make payments to the Tribe to carry out projects under a plan prepared by the Tribe.

SEC. 103. DEFINITIONS.

In this title:

(1) **TRIBE.**—The term “Tribe” means the Cheyenne River Sioux Tribe, which is comprised of the Itazipco, Siha Sapa, Minniconjou, and Oohenumpa bands of the Great Sioux Nation that reside on the Cheyenne River Reservation, located in central South Dakota.

(2) **TRIBAL COUNCIL.**—The term “Tribal Council” means the governing body of the Tribe.

SEC. 104. CHEYENNE RIVER SIOUX TRIBAL RECOVERY TRUST FUND.

(a) **CHEYENNE RIVER SIOUX TRIBAL RECOVERY TRUST FUND.**—There is established in the Treasury of the United States a fund to be known as the “Cheyenne River Sioux Tribal Recovery Trust Fund” (referred to in this title as the “Fund”). The Fund shall consist of any amounts deposited into the Fund under this title.

(b) **FUNDING.**—On the first day of the 11th fiscal year that begins after the date of enactment of this Act, the Secretary of the Treasury shall, from the General Fund of the Treasury, deposit into the Fund established under subsection (a)—

(1) \$290,722,958; and

(2) an additional amount that equals the amount of interest that would have accrued on the amount described in paragraph (1) if such amount had been invested in interest-bearing obligations of the United States, or in obligations guaranteed as to both principal and interest by the United States, on the first day of the first fiscal year that begins after the date of enactment of this Act and compounded annually thereafter.

(c) **INVESTMENT OF TRUST FUND.**—It shall be the duty of the Secretary of the Treasury to invest such portion of the Fund as is not, in the Secretary of Treasury's judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. The Secretary of the Treasury shall deposit interest resulting from such investments into the Fund.

(d) **PAYMENT OF INTEREST TO TRIBE.**—

(1) **WITHDRAWAL OF INTEREST.**—Beginning on the first day of the 11th fiscal year after the date of enactment of this Act and, on the first day of each fiscal year thereafter, the Secretary of the Treasury shall withdraw the aggregate amount of interest deposited into the Fund for that fiscal year and transfer that amount to the Secretary of the Interior for use in accordance with paragraph (2). Each amount so transferred shall be available without fiscal year limitation.

(2) **PAYMENTS TO TRIBE.**—

(A) **IN GENERAL.**—The Secretary of the Interior shall use the amounts transferred under

paragraph (1) only for the purpose of making payments to the Tribe, as such payments are requested by the Tribe pursuant to tribal resolution.

(B) **LIMITATION.**—Payments may be made by the Secretary of the Interior under subparagraph (A) only after the Tribe has adopted a plan under subsection (f).

(C) **USE OF PAYMENTS BY TRIBE.**—The Tribe shall use the payments made under subparagraph (B) only for carrying out projects and programs under the plan prepared under subsection (f).

(e) **TRANSFERS AND WITHDRAWALS.**—Except as provided in subsections (c) and (d)(1), the Secretary of the Treasury may not transfer or withdraw any amount deposited under subsection (b).

(f) **PLAN.**—

(1) **IN GENERAL.**—Not later than 18 months after the date of enactment of this Act, the governing body of the Tribe shall prepare a plan for the use of the payments to the Tribe under subsection (d) (referred to in this subsection as the “plan”).

(2) **CONTENTS OF PLAN.**—The plan shall provide for the manner in which the Tribe shall expend payments to the Tribe under subsection (d) to promote—

(A) economic development;

(B) infrastructure development;

(C) the educational, health, recreational, and social welfare objectives of the Tribe and its members; or

(D) any combination of the activities described in subparagraphs (A) through (C).

(3) **PLAN REVIEW AND REVISION.**—

(A) **IN GENERAL.**—The Tribal Council shall make available for review and comment by the members of the Tribe a copy of the plan before the plan becomes final, in accordance with procedures established by the Tribal Council.

(B) **UPDATING OF PLAN.**—The Tribal Council may, on an annual basis, revise the plan to update the plan. In revising the plan under this subparagraph, the Tribal Council shall provide the members of the Tribe opportunity to review and comment on any proposed revision to the plan.

(C) **CONSULTATION.**—In preparing the plan and any revisions to update the plan, the Tribal Council shall consult with the Secretary of the Interior and the Secretary of Health and Human Services.

(4) **AUDIT.**—

(A) **IN GENERAL.**—The activities of the Tribe in carrying out the plan shall be audited as part of the annual single-agency audit that the Tribe is required to prepare pursuant to the Office of Management and Budget circular numbered A-133.

(B) **DETERMINATION BY AUDITORS.**—The auditors that conduct the audit described in subparagraph (A) shall—

(i) determine whether funds received by the Tribe under this section for the period covered by the audit were expended to carry out the plan in a manner consistent with this section; and

(ii) include in the written findings of the audit the determination made under clause (i).

(C) **INCLUSION OF FINDINGS WITH PUBLICATION OF PROCEEDINGS OF TRIBAL COUNCIL.**—A copy of the written findings of the audit described in subparagraph (A) shall be inserted in the published minutes of the Tribal Council proceedings for the session at which the audit is presented to the Tribal Council.

(g) **PROHIBITION ON PER CAPITA PAYMENTS.**—No portion of any payment made under this title may be distributed to any member of the Tribe on a per capita basis.

SEC. 105. ELIGIBILITY OF TRIBE FOR CERTAIN PROGRAMS AND SERVICES.

No payment made to the Tribe under this title shall result in the reduction or denial of any

service or program with respect to which, under Federal law—

(1) the Tribe is otherwise entitled because of the status of the Tribe as a federally recognized Indian tribe; or

(2) any individual who is a member of the Tribe is entitled because of the status of the individual as a member of the Tribe.

SEC. 106. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such funds as may be necessary to cover the administrative expenses of the Fund.

SEC. 107. EXTINGUISHMENT OF CLAIMS.

Upon the deposit of funds (together with interest) into the Fund under section 104(b), all monetary claims that the Tribe has or may have against the United States for the taking, by the United States, of the land and property of the Tribe for the Oahe Dam and Reservoir Project of the Pick-Sloan Missouri River Basin program shall be extinguished.

TITLE II—BOSQUE REDONDO MEMORIAL

SEC. 201. SHORT TITLE.

This title may be cited as the “Bosque Redondo Memorial Act”.

SEC. 202. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds that—

(1) in 1863, the United States detained nearly 9,000 Navajo and forced their migration across nearly 350 miles of land to Bosque Redondo, a journey known as the “Long Walk”;

(2) Mescalero Apache people were also incarcerated at Bosque Redondo;

(3) the Navajo and Mescalero Apache people labored to plant crops, dig irrigation ditches and build housing, but drought, cutworms, hail, and alkaline Pecos River water created severe living conditions for nearly 9,000 captives;

(4) suffering and hardships endured by the Navajo and Mescalero Apache people forged a new understanding of their strengths as Americans;

(5) the Treaty of 1868 was signed by the United States and the Navajo tribes, recognizing the Navajo Nation as it exists today;

(6) the State of New Mexico has appropriated a total of \$123,000 for a planning study and for the design of the Bosque Redondo Memorial;

(7) individuals and businesses in DeBaca County donated \$6,000 toward the production of a brochure relating to the Bosque Redondo Memorial;

(8) the Village of Fort Sumner donated 70 acres of land to the State of New Mexico contiguous to the existing 50 acres comprising Fort Sumner State Monument, contingent on the funding of the Bosque Redondo Memorial;

(9) full architectural plans and the exhibit design for the Bosque Redondo Memorial have been completed;

(10) the Bosque Redondo Memorial project has the encouragement of the President of the Navajo Nation and the President of the Mescalero Apache Tribe, who have each appointed tribal members to serve as project advisors;

(11) the Navajo Nation, the Mescalero Tribe and the National Park Service are collaborating to develop a symposium on the Bosque Redondo Long Walk and a curriculum for inclusion in the New Mexico school curricula;

(12) an interpretive center would provide important educational and enrichment opportunities for all Americans; and

(13) Federal financial assistance is needed for the construction of a Bosque Redondo Memorial.

(b) **PURPOSES.**—The purposes of this title are as follows:

(1) To commemorate the people who were interned at Bosque Redondo.

(2) To pay tribute to the native populations' ability to rebound from suffering, and establish the strong, living communities that have long

been a major influence in the State of New Mexico and in the United States.

(3) To provide Americans of all ages a place to learn about the Bosque Redondo experience and how it resulted in the establishment of strong American Indian Nations from once divergent bands.

(4) To support the construction of the Bosque Redondo Memorial commemorating the detention of the Navajo and Mescalero Apache people at Bosque Redondo from 1863 to 1868.

SEC. 203. DEFINITIONS.

In this title:

(1) **MEMORIAL.**—The term “Memorial” means the building and grounds known as the Bosque Redondo Memorial.

(2) **SECRETARY.**—The term “Secretary” means the Secretary of Defense.

SEC. 204. BOSQUE REDONDO MEMORIAL

(a) **ESTABLISHMENT.**—Upon the request of the State of New Mexico, the Secretary is authorized to establish a Bosque Redondo Memorial within the boundaries of Fort Sumner State Monument in New Mexico. No memorial shall be established without the consent of the Navajo Nation and the Mescalero Tribe.

(b) **COMPONENTS OF THE MEMORIAL.**—The memorial shall include—

(1) exhibit space, a lobby area that represents design elements from traditional Mescalero and Navajo dwellings, administrative areas that include a resource room, library, workrooms and offices, restrooms, parking areas, sidewalks, utilities, and other visitor facilities;

(2) a venue for public education programs; and

(3) a location to commemorate the Long Walk of the Navajo people and the healing that has taken place since that event

SEC. 205. CONSTRUCTION OF MEMORIAL.

(a) **GRANT.**—

(1) **IN GENERAL.**—The Secretary may award a grant to the State of New Mexico to provide up to 50 percent of the total cost of construction of the Memorial.

(2) **NON-FEDERAL SHARE.**—The non-Federal share of construction costs for the Memorial shall include funds previously expended by the State for the planning and design of the Memorial, and funds previously expended by non-Federal entities for the production of a brochure relating to the Memorial.

(b) **REQUIREMENTS.**—To be eligible to receive a grant under this section, the State shall—

(1) submit to the Secretary a proposal that—

(A) provides assurances that the Memorial will comply with all applicable laws, including building codes and regulations; and

(B) includes such other information and assurances as the Secretary may require; and

(2) enter into a Memorandum of Understanding with the Secretary that shall include—

(A) a timetable for the completion of construction and the opening of the Memorial;

(B) assurances that construction contracts will be competitively awarded;

(C) assurances that the State or Village of Fort Sumner will make sufficient land available for the Memorial;

(D) the specifications of the Memorial which shall comply with all applicable Federal, State, and local building codes and laws;

(E) arrangements for the operation and maintenance of the Memorial upon completion of construction;

(F) a description of Memorial collections and educational programming;

(G) a plan for the design of exhibits including the collections to be exhibited, security, preservation, protection, environmental controls, and presentations in accordance with professional standards;

(H) an agreement with the Navajo Nation and the Mescalero Tribe relative to the design and location of the Memorial; and

(I) a financing plan developed by the State that outlines the long-term management of the Memorial, including—

(i) the acceptance and use of funds derived from public and private sources to minimize the use of appropriated or borrowed funds;

(ii) the payment of the operating costs of the Memorial through the assessment of fees or other income generated by the Memorial;

(iii) a strategy for achieving financial self-sufficiency with respect to the Memorial by not later than 5 years after the date of enactment of this Act; and

(iv) a description of the business activities that would be permitted at the Memorial and appropriate vendor standards that would apply.

SEC. 206. AUTHORIZATION OF APPROPRIATIONS.

(a) **IN GENERAL.**—There are authorized to be appropriated to carry out this title—

(1) \$1,000,000 for fiscal year 2000; and

(2) \$500,000 for each of fiscal years 2001 and 2002.

(b) **CARRYOVER.**—Any funds made available under this section that are unexpended at the end of the fiscal year for which those funds are appropriated, shall remain available for use by the Secretary through September 30, 2002 for the purposes for which those funds were made available.

Ms. COLLINS. Mr. President, I ask unanimous consent that the committee amendment be agreed to, the bill, as amended, be read three times, passed, and the motion to reconsider be laid upon the table, and that any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 964), as amended, was read the third time and passed, as follows:

S. 964

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—CHEYENNE RIVER SIOUX TRIBE EQUITABLE COMPENSATION

SEC. 101. SHORT TITLE.

This title may be cited as the “Cheyenne River Sioux Tribe Equitable Compensation Act”.

SEC. 102. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds that—

(1) by enacting the Act of December 22, 1944, (58 Stat. 887, chapter 665; 33 U.S.C. 701-1 et seq.), commonly known as the “Flood Control Act of 1944”, Congress approved the Pick-Sloan Missouri River Basin program (referred to in this section as the “Pick-Sloan program”);—

(A) to promote the general economic development of the United States;

(B) to provide for irrigation above Sioux City, Iowa;

(C) to protect urban and rural areas from devastating floods of the Missouri River; and

(D) for other purposes;

(2) the Oahe Dam and Reservoir project—

(A) is a major component of the Pick-Sloan program, and contributes to the economy of the United States by generating a substantial amount of hydropower and impounding a substantial quantity of water;

(B) overlies the eastern boundary of the Cheyenne River Sioux Indian Reservation; and

(C) has not only contributed little to the economy of the Tribe, but has severely damaged the economy of the Tribe and members

of the Tribe by inundating the fertile, wooded bottom lands of the Tribe along the Missouri River that constituted the most productive agricultural and pastoral lands of the Tribe and the homeland of the members of the Tribe;

(3) the Secretary of the Interior appointed a Joint Tribal Advisory Committee that examined the Oahe Dam and Reservoir project and concluded that—

(A) the Federal Government did not justify, or fairly compensate the Tribe for, the Oahe Dam and Reservoir project when the Federal Government acquired 104,492 acres of land of the Tribe for that project; and

(B) the Tribe should be adequately compensated for the land acquisition described in subparagraph (A);

(4) after applying the same method of analysis as is used for the compensation of similarly situated Indian tribes, the Comptroller General of the United States (referred to in this title as the “Comptroller General”) determined that the appropriate amount of compensation to pay the Tribe for the land acquisition described in paragraph (3)(A) would be \$290,723,000;

(5) the Tribe is entitled to receive additional financial compensation for the land acquisition described in paragraph (3)(A) in a manner consistent with the determination of the Comptroller General described in paragraph (4); and

(6) the establishment of a trust fund to make amounts available to the Tribe under this title is consistent with the principles of self-governance and self-determination.

(b) **PURPOSES.**—The purposes of this title are as follows:

(1) To provide for additional financial compensation to the Tribe for the acquisition by the Federal Government of 104,492 acres of land of the Tribe for the Oahe Dam and Reservoir project in a manner consistent with the determinations of the Comptroller General described in subsection (a)(4).

(2) To provide for the establishment of the Cheyenne River Sioux Tribal Recovery Trust Fund, to be managed by the Secretary of the Treasury in order to make payments to the Tribe to carry out projects under a plan prepared by the Tribe.

SEC. 103. DEFINITIONS.

In this title:

(1) **TRIBE.**—The term “Tribe” means the Cheyenne River Sioux Tribe, which is comprised of the Itazipco, Siha Sapa, Minniconjou, and Oohenumpa bands of the Great Sioux Nation that reside on the Cheyenne River Reservation, located in central South Dakota.

(2) **TRIBAL COUNCIL.**—The term “Tribal Council” means the governing body of the Tribe.

SEC. 104. CHEYENNE RIVER SIOUX TRIBAL RECOVERY TRUST FUND.

(a) **CHEYENNE RIVER SIOUX TRIBAL RECOVERY TRUST FUND.**—There is established in the Treasury of the United States a fund to be known as the “Cheyenne River Sioux Tribal Recovery Trust Fund” (referred to in this title as the “Fund”). The Fund shall consist of any amounts deposited into the Fund under this title.

(b) **FUNDING.**—On the first day of the 11th fiscal year that begins after the date of enactment of this Act, the Secretary of the Treasury shall, from the General Fund of the Treasury, deposit into the Fund established under subsection (a)—

(1) \$290,722,958; and

(2) an additional amount that equals the amount of interest that would have accrued on the amount described in paragraph (1) if

such amount had been invested in interest-bearing obligations of the United States, or in obligations guaranteed as to both principal and interest by the United States, on the first day of the first fiscal year that begins after the date of enactment of this Act and compounded annually thereafter.

(c) **INVESTMENT OF TRUST FUND.**—It shall be the duty of the Secretary of the Treasury to invest such portion of the Fund as is not, in the Secretary of Treasury's judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. The Secretary of the Treasury shall deposit interest resulting from such investments into the Fund.

(d) **PAYMENT OF INTEREST TO TRIBE.**—

(1) **WITHDRAWAL OF INTEREST.**—Beginning on the first day of the 11th fiscal year after the date of enactment of this Act and, on the first day of each fiscal year thereafter, the Secretary of the Treasury shall withdraw the aggregate amount of interest deposited into the Fund for that fiscal year and transfer that amount to the Secretary of the Interior for use in accordance with paragraph (2). Each amount so transferred shall be available without fiscal year limitation.

(2) **PAYMENTS TO TRIBE.**—

(A) **IN GENERAL.**—The Secretary of the Interior shall use the amounts transferred under paragraph (1) only for the purpose of making payments to the Tribe, as such payments are requested by the Tribe pursuant to tribal resolution.

(B) **LIMITATION.**—Payments may be made by the Secretary of the Interior under subparagraph (A) only after the Tribe has adopted a plan under subsection (f).

(C) **USE OF PAYMENTS BY TRIBE.**—The Tribe shall use the payments made under subparagraph (B) only for carrying out projects and programs under the plan prepared under subsection (f).

(e) **TRANSFERS AND WITHDRAWALS.**—Except as provided in subsections (c) and (d)(1), the Secretary of the Treasury may not transfer or withdraw any amount deposited under subsection (b).

(f) **PLAN.**—

(1) **IN GENERAL.**—Not later than 18 months after the date of enactment of this Act, the governing body of the Tribe shall prepare a plan for the use of the payments to the Tribe under subsection (d) (referred to in this subsection as the "plan").

(2) **CONTENTS OF PLAN.**—The plan shall provide for the manner in which the Tribe shall expend payments to the Tribe under subsection (d) to promote—

(A) economic development;

(B) infrastructure development;

(C) the educational, health, recreational, and social welfare objectives of the Tribe and its members; or

(D) any combination of the activities described in subparagraphs (A) through (C).

(3) **PLAN REVIEW AND REVISION.**—

(A) **IN GENERAL.**—The Tribal Council shall make available for review and comment by the members of the Tribe a copy of the plan before the plan becomes final, in accordance with procedures established by the Tribal Council.

(B) **UPDATING OF PLAN.**—The Tribal Council may, on an annual basis, revise the plan to update the plan. In revising the plan under this subparagraph, the Tribal Council shall provide the members of the Tribe opportunity to review and comment on any proposed revision to the plan.

(C) **CONSULTATION.**—In preparing the plan and any revisions to update the plan, the Tribal Council shall consult with the Secretary of the Interior and the Secretary of Health and Human Services.

(4) **AUDIT.**—

(A) **IN GENERAL.**—The activities of the Tribe in carrying out the plan shall be audited as part of the annual single-agency audit that the Tribe is required to prepare pursuant to the Office of Management and Budget circular numbered A-133.

(B) **DETERMINATION BY AUDITORS.**—The auditors that conduct the audit described in subparagraph (A) shall—

(i) determine whether funds received by the Tribe under this section for the period covered by the audit were expended to carry out the plan in a manner consistent with this section; and

(ii) include in the written findings of the audit the determination made under clause (i).

(C) **INCLUSION OF FINDINGS WITH PUBLICATION OF PROCEEDINGS OF TRIBAL COUNCIL.**—A copy of the written findings of the audit described in subparagraph (A) shall be inserted in the published minutes of the Tribal Council proceedings for the session at which the audit is presented to the Tribal Council.

(g) **PROHIBITION ON PER CAPITA PAYMENTS.**—No portion of any payment made under this title may be distributed to any member of the Tribe on a per capita basis.

SEC. 105. ELIGIBILITY OF TRIBE FOR CERTAIN PROGRAMS AND SERVICES.

No payment made to the Tribe under this title shall result in the reduction or denial of any service or program with respect to which, under Federal law—

(1) the Tribe is otherwise entitled because of the status of the Tribe as a federally recognized Indian tribe; or

(2) any individual who is a member of the Tribe is entitled because of the status of the individual as a member of the Tribe.

SEC. 106. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such funds as may be necessary to cover the administrative expenses of the Fund.

SEC. 107. EXTINGUISHMENT OF CLAIMS.

Upon the deposit of funds (together with interest) into the Fund under section 104(b), all monetary claims that the Tribe has or may have against the United States for the taking, by the United States, of the land and property of the Tribe for the Oahe Dam and Reservoir Project of the Pick-Sloan Missouri River Basin program shall be extinguished.

TITLE II—BOSQUE REDONDO MEMORIAL

SEC. 201. SHORT TITLE.

This title may be cited as the "Bosque Redondo Memorial Act".

SEC. 202. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds that—

(1) in 1863, the United States detained nearly 9,000 Navajo and forced their migration across nearly 350 miles of land to Bosque Redondo, a journey known as the "Long Walk";

(2) Mescalero Apache people were also incarcerated at Bosque Redondo;

(3) the Navajo and Mescalero Apache people labored to plant crops, dig irrigation ditches and build housing, but drought, cutworms, hail, and alkaline Pecos River water created severe living conditions for nearly 9,000 captives;

(4) suffering and hardships endured by the Navajo and Mescalero Apache people forged a new understanding of their strengths as Americans;

(5) the Treaty of 1868 was signed by the United States and the Navajo tribes, recognizing the Navajo Nation as it exists today;

(6) the State of New Mexico has appropriated a total of \$123,000 for a planning study and for the design of the Bosque Redondo Memorial;

(7) individuals and businesses in DeBaca County donated \$6,000 toward the production of a brochure relating to the Bosque Redondo Memorial;

(8) the Village of Fort Sumner donated 70 acres of land to the State of New Mexico contiguous to the existing 50 acres comprising Fort Sumner State Monument, contingent on the funding of the Bosque Redondo Memorial;

(9) full architectural plans and the exhibit design for the Bosque Redondo Memorial have been completed;

(10) the Bosque Redondo Memorial project has the encouragement of the President of the Navajo Nation and the President of the Mescalero Apache Tribe, who have each appointed tribal members to serve as project advisors;

(11) the Navajo Nation, the Mescalero Tribe and the National Park Service are collaborating to develop a symposium on the Bosque Redondo Long Walk and a curriculum for inclusion in the New Mexico school curricula;

(12) an interpretive center would provide important educational and enrichment opportunities for all Americans; and

(13) Federal financial assistance is needed for the construction of a Bosque Redondo Memorial.

(b) **PURPOSES.**—The purposes of this title are as follows:

(1) To commemorate the people who were interned at Bosque Redondo.

(2) To pay tribute to the native populations' ability to rebound from suffering, and establish the strong, living communities that have long been a major influence in the State of New Mexico and in the United States.

(3) To provide Americans of all ages a place to learn about the Bosque Redondo experience and how it resulted in the establishment of strong American Indian Nations from once divergent bands.

(4) To support the construction of the Bosque Redondo Memorial commemorating the detention of the Navajo and Mescalero Apache people at Bosque Redondo from 1863 to 1868.

SEC. 203. DEFINITIONS.

In this title:

(1) **MEMORIAL.**—The term "Memorial" means the building and grounds known as the Bosque Redondo Memorial.

(2) **SECRETARY.**—The term "Secretary" means the Secretary of Defense.

SEC. 204. BOSQUE REDONDO MEMORIAL.

(a) **ESTABLISHMENT.**—Upon the request of the State of New Mexico, the Secretary is authorized to establish a Bosque Redondo Memorial within the boundaries of Fort Sumner State Monument in New Mexico. No memorial shall be established without the consent of the Navajo Nation and the Mescalero Tribe.

(b) **COMPONENTS OF THE MEMORIAL.**—The memorial shall include—

(1) exhibit space, a lobby area that represents design elements from traditional Mescalero and Navajo dwellings, administrative areas that include a resource room, library, workrooms and offices, restrooms, parking areas, sidewalks, utilities, and other visitor facilities;

(2) a venue for public education programs; and

(3) a location to commemorate the Long Walk of the Navajo people and the healing that has taken place since that event

SEC. 205. CONSTRUCTION OF MEMORIAL.

(a) GRANT.—

(1) IN GENERAL.—The Secretary may award a grant to the State of New Mexico to provide up to 50 percent of the total cost of construction of the Memorial.

(2) NON-FEDERAL SHARE.—The non-Federal share of construction costs for the Memorial shall include funds previously expended by the State for the planning and design of the Memorial, and funds previously expended by non-Federal entities for the production of a brochure relating to the Memorial.

(b) REQUIREMENTS.—To be eligible to receive a grant under this section, the State shall—

(1) submit to the Secretary a proposal that—

(A) provides assurances that the Memorial will comply with all applicable laws, including building codes and regulations; and

(B) includes such other information and assurances as the Secretary may require; and

(2) enter into a Memorandum of Understanding with the Secretary that shall include—

(A) a timetable for the completion of construction and the opening of the Memorial;

(B) assurances that construction contracts will be competitively awarded;

(C) assurances that the State or Village of Fort Sumner will make sufficient land available for the Memorial;

(D) the specifications of the Memorial which shall comply with all applicable Federal, State, and local building codes and laws;

(E) arrangements for the operation and maintenance of the Memorial upon completion of construction;

(F) a description of Memorial collections and educational programming;

(H) an agreement with the Navajo Nation and the Mescalero Tribe relative to the design and location of the Memorial; and

(I) a financing plan developed by the State that outlines the long-term management of the Memorial, including—

(i) the acceptance and use of funds derived from public and private sources to minimize the use of appropriated or borrowed funds;

(ii) the payment of the operating costs of the Memorial through the assessment of fees or other income generated by the Memorial;

(iii) a strategy for achieving financial self-sufficiency with respect to the Memorial by not later than 5 years after the date of enactment of this Act; and

(iv) a description of the business activities that would be permitted at the Memorial and appropriate vendor standards that would apply.

SEC. 206. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to carry out this title—

(1) \$1,000,000 for fiscal year 2000; and

(2) \$500,000 for each of fiscal years 2001 and 2002.

(b) CARRYOVER.—Any funds made available under this section that are unexpended at the end of the fiscal year for which those funds are appropriated, shall remain available for use by the Secretary through September 30, 2002 for the purposes for which those funds were made available.

INDIAN TRIBAL JUSTICE TECHNICAL AND LEGAL ASSISTANCE ACT OF 1999

Ms. COLLINS. I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 409, S. 1508.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1508) to provide technical and legal assistance to tribal justice systems and members of Indian tribes, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Indian Affairs, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

S. 1508

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Indian Tribal Justice Technical and Legal Assistance Act of 1999".

SEC. 2. FINDINGS.

The Congress finds and declares that—

(1) *there is a government-to-government relationship between the United States and Indian tribes;*

(2) *Indian tribes are sovereign entities and are responsible for exercising governmental authority over Indian lands;*

(3) *the rate of violent crime committed in Indian country is approximately twice the rate of violent crime committed in the United States as a whole;*

(4) *in any community, a high rate of violent crime is a major obstacle to investment, job creation and economic growth;*

(5) *tribal justice systems are an essential part of tribal governments and serve as important forums for ensuring the health and safety and the political integrity of tribal governments;*

(6) *Congress and the Federal courts have repeatedly recognized tribal justice systems as the most appropriate forums for the adjudication of disputes affecting personal and property rights on Native lands;*

(7) *enhancing tribal court systems and improving access to those systems serves the dual Federal goals of tribal political self-determination and economic self-sufficiency;*

(8) *there is both inadequate funding and an inadequate coordinating mechanism to meet the technical and legal assistance needs of tribal justice systems and this lack of adequate technical and legal assistance funding impairs their operation;*

(9) *tribal court membership organizations have served a critical role in providing training and technical assistance for development and enhancement of tribal justice systems;*

(10) *Indian legal services programs, as funded partially through the Legal Services Corporation, have an established record of providing cost effective legal assistance to Indian people in tribal court forums, and also contribute significantly to the development of tribal courts and tribal jurisprudence; and*

(11) *the provision of adequate technical assistance to tribal courts and legal assistance to both individuals and tribal courts is an essential element in the development of strong tribal court systems.*

SEC. 3. PURPOSES.

The purposes of this Act are as follows:

(1) *to carry out the responsibility of the United States to Indian tribes and members of Indian tribes by ensuring access to quality technical and legal assistance.*

(2) *To strengthen and improve the capacity of tribal court systems that address civil and criminal causes of action under the jurisdiction of Indian tribes.*

(3) *To strengthen tribal governments and the economies of Indian tribes through the enhancement and, where appropriate, development of tribal court systems for the administration of justice in Indian country by providing technical and legal assistance services.*

(4) *To encourage collaborative efforts between national or regional membership organizations and associations whose membership consists of judicial system personnel within tribal justice systems; non-profit entities which provide legal assistance services for Indian tribes, members of Indian tribes, and/or tribal justice systems.*

(5) *To assist in the development of tribal judicial systems by supplementing prior Congressional efforts such as the Indian Tribal Justice Act (Public Law 103-176).*

SEC. 4. DEFINITIONS.

For purposes of this Act:

(1) **ATTORNEY GENERAL.**—The term "Attorney General" means the Attorney General of the United States.

(2) **INDIAN LANDS.**—The term "Indian lands" shall include lands within the definition of "Indian country", as defined in 18 U.S.C. 1151; or "Indian reservations", as defined in section 3(d) of the Indian Financing Act of 1974, 25 U.S.C. 1452(d), or section 4(10) of the Indian Child Welfare Act, 25 U.S.C. 1903(10). For purposes of the preceding sentence, such section 3(d) of the Indian Financing Act shall be applied by treating the term "former Indian reservations in Oklahoma" as including only lands which are within the jurisdictional area of an Oklahoma Indian Tribe (as determined by the Secretary of Interior) and are recognized by such Secretary as eligible for trust land status under 25 CFR part 151 (as in effect on the date of enactment of this sentence).

(3) **INDIAN TRIBE.**—The term "Indian tribe" means any Indian tribe, band, nation, pueblo, or other organized group or community, including any Alaska Native entity, which administers justice or plans to administer justice under its inherent authority or the authority of the United States and which is recognized as eligible for the special programs and services provided by the United States to Indian tribes because of their status as Indians.

(4) **JUDICIAL PERSONNEL.**—The term "judicial personnel" means any judge, magistrate, court counselor, court clerk, court administrator, bailiff, probation officer, officer of the court, dispute resolution facilitator, or other official, employee, or volunteer within the tribal judicial system.

(5) **NON-PROFIT ENTITIES.**—The term "non-profit entity" or "non-profit entities" has the meaning given that term in section 501(c)(3) of the Internal Revenue Code.

(6) **OFFICE OF TRIBAL JUSTICE.**—The term "Office of Tribal Justice" means the Office of Tribal Justice in the United States Department of Justice.

(7) **TRIBAL JUSTICE SYSTEM.**—The term "tribal court", "tribal court system", or "tribal justice system" means the entire judicial branch, and employees thereof, of an Indian tribe, including, but not limited to, traditional methods and fora for dispute resolution, trial courts, appellate courts, including inter-tribal appellate courts, alternative dispute resolution systems, and circuit rider systems, established by inherent tribal authority whether or not they constitute a court of record.

TITLE I—TRAINING AND TECHNICAL ASSISTANCE, CIVIL AND CRIMINAL LEGAL ASSISTANCE GRANTS

SEC. 101. TRIBAL JUSTICE TRAINING AND TECHNICAL ASSISTANCE GRANTS.

Subject to the availability of appropriations, the Attorney General, in consultation with the Office of Tribal Justice, shall award grants to national or regional membership organizations and associations whose membership consists of judicial system personnel within tribal justice systems which submit an application to the Attorney General in such form and manner as the Attorney General may prescribe to provide training and technical assistance for the development, enrichment, enhancement of tribal justice systems, or other purposes consistent with this Act.

SEC. 102. TRIBAL CIVIL LEGAL ASSISTANCE GRANTS.

Subject to the availability of appropriations, the Attorney General, in consultation with the Office of Tribal Justice, shall award grants to non-profit entities, as defined under section 501(c)(3) of the Internal Revenue Code, which provide legal assistance services for Indian tribes, members of Indian tribes, or tribal justice systems pursuant to federal poverty guidelines that submit an application to the Attorney General in such form and manner as the Attorney General may prescribe for the provision of civil legal assistance to members of Indian tribes and tribal justice systems, and/or other purposes consistent with this Act.

SEC. 103. TRIBAL CRIMINAL ASSISTANCE GRANTS.

Subject to the availability of appropriations, the Attorney General, in consultation with the Office of Tribal Justice, shall award grants to non-profit entities, as defined by section 501(c)(3) of the Internal Revenue Code, which provide legal assistance services for Indian tribes, members of Indian tribes, or tribal justice systems pursuant to federal poverty guidelines that submit an application to the Attorney General in such form and manner as the Attorney General may prescribe for the provision of criminal legal assistance to members of Indian tribes and tribal justice systems, and/or other purposes consistent with this Act. Funding under this title may apply to programs, procedures, or proceedings involving adult criminal actions, juvenile delinquency actions, and/or guardian-ad-litem appointments arising out of criminal or delinquency acts.

SEC. 104. NO OFFSET.

No Federal agency shall offset funds made available pursuant to this Act for Indian tribal court membership organizations or Indian legal services organizations against other funds otherwise available for use in connection with technical or legal assistance to tribal justice systems or members of Indian tribes.

SEC. 105. TRIBAL AUTHORITY.

Nothing in this Act shall be construed to—
 (1) encroach upon or diminish in any way the inherent sovereign authority of each tribal government to determine the role of the tribal justice system within the tribal government or to enact and enforce tribal laws;

(2) diminish in any way the authority of tribal governments to appoint personnel;

(3) impair the rights of each tribal government to determine the nature of its own legal system or the appointment of authority within the tribal government;

(4) alter in any way any tribal traditional dispute resolution fora;

(5) imply that any tribal justice system is an instrumentality of the United States; or

(6) diminish the trust responsibility of the United States to Indian tribal governments and tribal justice systems of such governments.

SEC. 106. AUTHORIZATION OF APPROPRIATIONS.

For purposes of carrying out the activities under this title, there are authorized to be ap-

propriated such sums as are necessary for fiscal years 2000 through 2004.

TITLE II—INDIAN TRIBAL COURTS

SEC. 201. GRANTS.

(a) IN GENERAL.—The Attorney General may award grants and provide technical assistance to Indian tribes to enable such tribes to carry out programs to support—

(1) the development, enhancement, and continuing operation of tribal justice systems; and

(2) the development and implementation of—

(A) tribal codes and sentencing guidelines;

(B) inter-tribal courts and appellate systems;

(C) tribal probation services, diversion programs, and alternative sentencing provisions;

(D) tribal juvenile services and multi-disciplinary protocols for child physical and sexual abuse; and

(E) traditional tribal judicial practices, traditional tribal justice systems, and traditional methods of dispute resolution.

(b) CONSULTATION.—In carrying out this section, the Attorney General may consult with the Office of Tribal Justice and any other appropriate tribal or Federal officials.

(c) REGULATIONS.—The Attorney General may promulgate such regulations and guidelines as may be necessary to carry out this title.

(d) AUTHORIZATION OF APPROPRIATIONS.—For purposes of carrying out the activities under this section, there are authorized to be appropriated such sums as are necessary for fiscal years 2000 through 2004.

SEC. 202. TRIBAL JUSTICE SYSTEMS.

Section 201 of the Indian Tribal Justice Act (25 U.S.C. 3621) is amended—

(1) in subsection (a), by striking “1994, 1995, 1996, 1997, 1998, 1999, and 2000” and inserting “2000 through 2007”;

(2) in subsection (b), by striking “1994, 1995, 1996, 1997, 1998, 1999, and 2000” and inserting “2000 through 2007”;

(3) in subsection (c), by striking “1994, 1995, 1996, 1997, 1998, 1999, and 2000” and inserting “2000 through 2007”; and

(4) in subsection (d), by striking “1994, 1995, 1996, 1997, 1998, 1999, and 2000” and inserting “2000 through 2007”.

Ms. COLLINS. I ask unanimous consent that the committee amendment be agreed to, the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 1508), as amended, was read the third time and passed, as follows:

S. 1508

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Indian Tribal Justice Technical and Legal Assistance Act of 1999”.

SEC. 2. FINDINGS.

The Congress finds and declares that—

(1) there is a government-to-government relationship between the United States and Indian tribes;

(2) Indian tribes are sovereign entities and are responsible for exercising governmental authority over Indian lands;

(3) the rate of violent crime committed in Indian country is approximately twice the rate of violent crime committed in the United States as a whole;

(4) in any community, a high rate of violent crime is a major obstacle to investment, job creation and economic growth;

(5) tribal justice systems are an essential part of tribal governments and serve as important forums for ensuring the health and safety and the political integrity of tribal governments;

(6) Congress and the Federal courts have repeatedly recognized tribal justice systems as the most appropriate forums for the adjudication of disputes affecting personal and property rights on Native lands;

(7) enhancing tribal court systems and improving access to those systems serves the dual Federal goals of tribal political self-determination and economic self-sufficiency;

(8) there is both inadequate funding and an inadequate coordinating mechanism to meet the technical and legal assistance needs of tribal justice systems and this lack of adequate technical and legal assistance funding impairs their operation;

(9) tribal court membership organizations have served a critical role in providing training and technical assistance for development and enhancement of tribal justice systems;

(10) Indian legal services programs, as funded partially through the Legal Services Corporation, have an established record of providing cost effective legal assistance to Indian people in tribal court forums, and also contribute significantly to the development of tribal courts and tribal jurisprudence; and

(11) the provision of adequate technical assistance to tribal courts and legal assistance to both individuals and tribal courts is an essential element in the development of strong tribal court systems.

SEC. 3. PURPOSES.

The purposes of this Act are as follows:

(1) to carry out the responsibility of the United States to Indian tribes and members of Indian tribes by ensuring access to quality technical and legal assistance.

(2) To strengthen and improve the capacity of tribal court systems that address civil and criminal causes of action under the jurisdiction of Indian tribes.

(3) To strengthen tribal governments and the economies of Indian tribes through the enhancement and, where appropriate, development of tribal court systems for the administration of justice in Indian country by providing technical and legal assistance services.

(4) To encourage collaborative efforts between national or regional membership organizations and associations whose membership consists of judicial system personnel within tribal justice systems; non-profit entities which provide legal assistance services for Indian tribes, members of Indian tribes, and/or tribal justice systems.

(5) To assist in the development of tribal judicial systems by supplementing prior Congressional efforts such as the Indian Tribal Justice Act (Public Law 103-176).

SEC. 4. DEFINITIONS.

For purposes of this Act:

(1) ATTORNEY GENERAL.—The term “Attorney General” means the Attorney General of the United States.

(2) INDIAN LANDS.—The term “Indian lands” shall include lands within the definition of “Indian country”, as defined in 18 U.S.C. 1151; or “Indian reservations”, as defined in section 3(d) of the Indian Financing Act of 1974, 25 U.S.C. 1452(d), or section 4(10) of the Indian Child Welfare Act, 25 U.S.C. 1903(10). For purposes of the preceding sentence, such section 3(d) of the Indian Financing Act shall be applied by treating the term

"former Indian reservations in Oklahoma" as including only lands which are within the jurisdictional area of an Oklahoma Indian Tribe (as determined by the Secretary of Interior) and are recognized by such Secretary as eligible for trust land status under 25 CFR part 151 (as in effect on the date of enactment of this sentence).

(3) **INDIAN TRIBE.**—The term "Indian tribe" means any Indian tribe, band, nation, pueblo, or other organized group or community, including any Alaska Native entity, which administers justice or plans to administer justice under its inherent authority or the authority of the United States and which is recognized as eligible for the special programs and services provided by the United States to Indian tribes because of their status as Indians.

(4) **JUDICIAL PERSONNEL.**—The term "judicial personnel" means any judge, magistrate, court counselor, court clerk, court administrator, bailiff, probation officer, officer of the court, dispute resolution facilitator, or other official, employee, or volunteer within the tribal judicial system.

(5) **NON-PROFIT ENTITIES.**—The term "non-profit entity" or "non-profit entities" has the meaning given that term in section 501(c)(3) of the Internal Revenue Code.

(6) **OFFICE OF TRIBAL JUSTICE.**—The term "Office of Tribal Justice" means the Office of Tribal Justice in the United States Department of Justice.

(7) **TRIBAL JUSTICE SYSTEM.**—The term "tribal court", "tribal court system", or "tribal justice system" means the entire judicial branch, and employees thereof, of an Indian tribe, including, but not limited to, traditional methods and fora for dispute resolution, trial courts, appellate courts, including inter-tribal appellate courts, alternative dispute resolution systems, and circuit rider systems, established by inherent tribal authority whether or not they constitute a court of record.

TITLE I—TRAINING AND TECHNICAL ASSISTANCE, CIVIL AND CRIMINAL LEGAL ASSISTANCE GRANTS

SEC. 101. TRIBAL JUSTICE TRAINING AND TECHNICAL ASSISTANCE GRANTS.

Subject to the availability of appropriations, the Attorney General, in consultation with the Office of Tribal Justice, shall award grants to national or regional membership organizations and associations whose membership consists of judicial system personnel within tribal justice systems which submit an application to the Attorney General in such form and manner as the Attorney General may prescribe to provide training and technical assistance for the development, enrichment, enhancement of tribal justice systems, or other purposes consistent with this Act.

SEC. 102. TRIBAL CIVIL LEGAL ASSISTANCE GRANTS.

Subject to the availability of appropriations, the Attorney General, in consultation with the Office of Tribal Justice, shall award grants to non-profit entities, as defined under section 501(c)(3) of the Internal Revenue Code, which provide legal assistance services for Indian tribes, members of Indian tribes, or tribal justice systems pursuant to federal poverty guidelines that submit an application to the Attorney General in such form and manner as the Attorney General may prescribe for the provision of civil legal assistance to members of Indian tribes and tribal justice systems, and/or other purposes consistent with this Act.

SEC. 103. TRIBAL CRIMINAL ASSISTANCE GRANTS.

Subject to the availability of appropriations, the Attorney General, in consultation with the Office of Tribal Justice, shall award grants to non-profit entities, as defined by section 501(c)(3) of the Internal Revenue Code, which provide legal assistance services for Indian tribes, members of Indian tribes, or tribal justice systems pursuant to federal poverty guidelines that submit an application to the Attorney General in such form and manner as the Attorney General may prescribe for the provision of criminal legal assistance to members of Indian tribes and tribal justice systems, and/or other purposes consistent with this Act. Funding under this title may apply to programs, procedures, or proceedings involving adult criminal actions, juvenile delinquency actions, and/or guardian-ad-litem appointments arising out of criminal or delinquency acts.

SEC. 104. NO OFFSET.

No Federal agency shall offset funds made available pursuant to this Act for Indian tribal court membership organizations or Indian legal services organizations against other funds otherwise available for use in connection with technical or legal assistance to tribal justice systems or members of Indian tribes.

SEC. 105. TRIBAL AUTHORITY.

Nothing in this Act shall be construed to—
(1) encroach upon or diminish in any way the inherent sovereign authority of each tribal government to determine the role of the tribal justice system within the tribal government or to enact and enforce tribal laws;

(2) diminish in any way the authority of tribal governments to appoint personnel;

(3) impair the rights of each tribal government to determine the nature of its own legal system or the appointment of authority within the tribal government;

(4) alter in any way any tribal traditional dispute resolution fora;

(5) imply that any tribal justice system is an instrumentality of the United States; or

(6) diminish the trust responsibility of the United States to Indian tribal governments and tribal justice systems of such governments.

SEC. 106. AUTHORIZATION OF APPROPRIATIONS.

For purposes of carrying out the activities under this title, there are authorized to be appropriated such sums as are necessary for fiscal years 2000 through 2004.

TITLE II—INDIAN TRIBAL COURTS

SEC. 201. GRANTS.

(a) **IN GENERAL.**—The Attorney General may award grants and provide technical assistance to Indian tribes to enable such tribes to carry out programs to support—

(1) the development, enhancement, and continuing operation of tribal justice systems; and

(2) the development and implementation of—

(A) tribal codes and sentencing guidelines;

(B) inter-tribal courts and appellate systems;

(C) tribal probation services, diversion programs, and alternative sentencing provisions;

(D) tribal juvenile services and multi-disciplinary protocols for child physical and sexual abuse; and

(E) traditional tribal judicial practices, traditional tribal justice systems, and traditional methods of dispute resolution.

(b) **CONSULTATION.**—In carrying out this section, the Attorney General may consult

with the Office of Tribal Justice and any other appropriate tribal or Federal officials.

(c) **REGULATIONS.**—The Attorney General may promulgate such regulations and guidelines as may be necessary to carry out this title.

(d) **AUTHORIZATION OF APPROPRIATIONS.**—For purposes of carrying out the activities under this section, there are authorized to be appropriated such sums as are necessary for fiscal years 2000 through 2004.

SEC. 202. TRIBAL JUSTICE SYSTEMS.

Section 201 of the Indian Tribal Justice Act (25 U.S.C. 3621) is amended—

(1) in subsection (a), by striking "1994, 1995, 1996, 1997, 1998, 1999, and 2000" and inserting "2000 through 2007";

(2) in subsection (b), by striking "1994, 1995, 1996, 1997, 1998, 1999, and 2000" and inserting "2000 through 2007";

(3) in subsection (c), by striking "1994, 1995, 1996, 1997, 1998, 1999, and 2000" and inserting "2000 through 2007"; and

(4) in subsection (d), by striking "1994, 1995, 1996, 1997, 1998, 1999, and 2000" and inserting "2000 through 2007".

REAUTHORIZATION OF THE FEDERAL EMERGENCY MANAGEMENT FOOD AND SHELTER PROGRAM

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate now proceed to the consideration of Calendar No. 406, S. 1516.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1516) to amend title III of the Stewart B. McKinney Homeless Assistance Act and so forth and Shelter Program, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. Mr. President, I note I am proud to be a cosponsor of this important legislation. I am pleased to see the Senate take final action on it today.

I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and that any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1516) was read the third time and passed, as follows:

S. 1516

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION OF APPROPRIATIONS.

Section 322 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11352) is amended to read as follows:

"SEC. 322. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to carry out this title \$125,000,000 for fiscal year 2000, \$130,000,000 for fiscal year 2001, and \$135,000,000 for fiscal year 2002."

SEC. 2. NAME CHANGE TO NOMINATING ORGANIZATION.

Section 301(b) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11331(b)) is amended by striking paragraph (5) and inserting the following:

"(5) United Jewish Communities."

SEC. 3. PARTICIPATION OF HOMELESS INDIVIDUALS ON LOCAL BOARDS.

Section 316(a) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11346(a)) is amended by striking paragraph (6) and inserting the following:

"(6) guidelines requiring each local board to include in their membership not less than 1 homeless individual, former homeless individual, homeless advocate, or recipient of food or shelter services, except that such guidelines may waive such requirement for any board unable to meet such requirement if the board otherwise consults with homeless individuals, former homeless individuals, homeless advocates, or recipients of food or shelter services."

FEDERAL REPORTS ELIMINATION AND SUNSET ACT AMENDMENTS OF 1999

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate now proceed to the consideration of Calendar No. 405, S. 1877.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1877) to amend the Federal Report Elimination and Sunset Act of 1995.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1877) was read the third time and passed, as follows:

S. 1877

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Reports Elimination and Sunset Act Amendments of 1999".

SEC. 2. CLARIFICATION OF SCOPE OF SUNSET.

Section 3003(a)(1) of the Federal Report Elimination and Sunset Act of 1995 (Public Law 104-66; 109 Stat. 734) is amended by—

(1) striking "regular"; and

(2) inserting "at predetermined and regular time intervals," after "report".

SEC. 3. EXEMPTIONS OF CERTAIN REPORTS FROM SUNSET.

Section 3003(d) of the Federal Reports Elimination and Sunset Act of 1995 (Public Law 104-66; 109 Stat. 734-36) is amended—

(1) in paragraph (31) by striking "or" after the semicolon;

(2) in paragraph (32) by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following new paragraphs:

"(33)(A) sections 1105(a), 1106(a) and (b), and 1109(a) of title 31, United States;

"(B) section 446 of the District of Columbia Self-Government and Governmental Reorganization Act (Public Law 93-198; 87 Stat. 801); and

"(C) any other law relating to the budget of the United States Government;

"(34) the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 900 et seq.);

"(35) section 22(a) of the Act entitled 'An Act to provide for the fifteenth and subsequent decennial censuses and to provide for apportionment of Representatives in Congress', approved June 28, 1929 (2 U.S.C. 2a(a));

"(36) section 3514(a)(1)(B) of title 44, United States Code;

"(37) section 202(e) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483(e));

"(38) section 203(o) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484(o));

"(39) section 202(e)(1) and (3) of Congressional Budget Act of 1974 (2 U.S.C. 602(e)(1) and (3));

"(40) section 1014(e) of the Congressional Budget and Impoundment Control Act of 1974 (2 U.S.C. 685(e)); and

"(41) section 6 of title 3, United States Code."

SEC. 4. EXTENSION OF REPORTS CONSOLIDATION AUTHORITY.

Section 404(b) of the Government Management Reform Act of 1994 (31 U.S.C. 501 note) is amended by striking "December 31, 1999" and inserting "April 30, 2000".

OFFICE OF GOVERNMENT ETHICS AUTHORIZATION ACT OF 1999

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate proceed to the consideration of Calendar No. 403, S. 1503.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1503) a bill to amend the Ethics in Government Act of 1978 (U.S.C. App.) to extend the authorization of appropriations for the Office of Government Ethics through fiscal year 2003.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1503) was read the third time and passed, as follows:

S. 1503

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Office of Government Ethics Authorization Act of 1999".

SEC. 2. EXTENSION OF AUTHORIZATION OF APPROPRIATIONS.

Section 405 of the Ethics in Government Act of 1978 (5 U.S.C. App.) is amended by striking "1997 through 1999" and inserting "2000 through 2003".

SEC. 3. EFFECTIVE DATE:

This Act shall take effect on October 1, 1999.

VETERANS' COMPENSATION COST-OF-LIVING ADJUSTMENT ACT OF 1999

Ms. COLLINS. Mr. President, I ask the Chair lay before the Senate a mes-

sage from the House of Representatives on the bill (H.R. 2280) to amend title 38, United States Code, to provide a cost-of-living adjustment in rates of compensation paid for service-connected disabilities, to enhance the compensation, memorial affairs, and housing programs of the Department of Veterans Affairs, to improve retirement authorities applicable to judges of the United States Court of Appeals for Veterans Claims, and for other purposes.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 2280) entitled "An Act to amend title 38, United States Code, to provide a cost-of-living adjustment in rates of compensation paid for service-connected disabilities, to enhance the compensation, memorial affairs, and housing programs of the Department of Veterans Affairs, to improve retirement authorities applicable to judges of the United States Court of Appeals for Veterans Claims, and for other purposes", with the following amendments:

In lieu of the matter proposed to be inserted by the amendment of the Senate, insert the following:

SECTION 1. SHORT TITLE; REFERENCES TO TITLE 38, UNITED STATES CODE.

(a) *SHORT TITLE*.—This Act may be cited as the "Veterans' Compensation Cost-of-Living Adjustment Act of 1999".

(b) *REFERENCES TO TITLE 38, UNITED STATES CODE*.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 2. DISABILITY COMPENSATION.

(a) *INCREASE IN RATES*.—Section 1114 is amended—

(1) by striking "\$95" in subsection (a) and inserting "\$98";

(2) by striking "\$182" in subsection (b) and inserting "\$188";

(3) by striking "\$279" in subsection (c) and inserting "\$288";

(4) by striking "\$399" in subsection (d) and inserting "\$413";

(5) by striking "\$569" in subsection (e) and inserting "\$589";

(6) by striking "\$717" in subsection (f) and inserting "\$743";

(7) by striking "\$905" in subsection (g) and inserting "\$937";

(8) by striking "\$1,049" in subsection (h) and inserting "\$1,087";

(9) by striking "\$1,181" in subsection (i) and inserting "\$1,224";

(10) by striking "\$1,964" in subsection (j) and inserting "\$2,036";

(11) in subsection (k)—

(A) by striking "\$75" both places it appears and inserting "\$76"; and

(B) by striking "\$2,443" and "\$3,426" and inserting "\$2,533" and "\$3,553", respectively;

(12) by striking "\$2,443" in subsection (l) and inserting "\$2,533";

(13) by striking "\$2,694" in subsection (m) and inserting "\$2,794";

(14) by striking "\$3,066" in subsection (n) and inserting "\$3,179";

(15) by striking "\$3,426" each place it appears in subsections (o) and (p) and inserting "\$3,553";

(16) by striking "\$1,471" and "\$2,190" in subsection (r) and inserting "\$1,525" and "\$2,271", respectively; and

(17) by striking "\$2,199" in subsection (s) and inserting "\$2,280".

(b) **SPECIAL RULE.**—The Secretary of Veterans Affairs may authorize administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

SEC. 3. ADDITIONAL COMPENSATION FOR DEPENDENTS.

Section 1115(1) is amended—

(1) by striking "\$114" in clause (A) and inserting "\$117";

(2) by striking "\$195" and "\$60" in clause (B) and inserting "\$201" and "\$61", respectively;

(3) by striking "\$78" and "\$60" in clause (C) and inserting "\$80" and "\$61", respectively;

(4) by striking "\$92" in clause (D) and inserting "\$95";

(5) by striking "\$215" in clause (E) and inserting "\$222"; and

(6) by striking "\$180" in clause (F) and inserting "\$186".

SEC. 4. CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS.

Section 1162 is amended by striking "\$528" and inserting "\$546".

SEC. 5. DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES.

(a) **NEW LAW RATES.**—Section 1311(a) is amended—

(1) by striking "\$850" in paragraph (1) and inserting "\$881"; and

(2) by striking "\$185" in paragraph (2) and inserting "\$191".

(b) **OLD LAW RATES.**—The table in section 1311(a)(3) is amended to read as follows:

"Pay grade	Monthly rate	Pay grade	Monthly rate
E-1	\$881	W-4	\$1,054
E-2	881	O-1	930
E-3	881	O-2	962
E-4	881	O-3	1,028
E-5	881	O-4	1,087
E-6	881	O-5	1,198
E-7	911	O-6	1,349
E-8	962	O-7	1,458
E-9	¹ 1,003	O-8	1,598
W-1 ...	930	O-9	1,712
W-2 ...	968	O-10 ...	² 1,878
W-3 ...	997		

¹If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 1302 of this title, the surviving spouse's rate shall be \$1,082.

²If the veteran served as Chairman or Vice-Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, Commandant of the Marine Corps, or Commandant of the Coast Guard, at the applicable time designated by section 1302 of this title, the surviving spouse's rate shall be \$2,013."

(c) **ADDITIONAL DIC FOR CHILDREN.**—Section 1311(b) is amended by striking "\$215" and inserting "\$222".

(d) **AID AND ATTENDANCE ALLOWANCE.**—Section 1311(c) is amended by striking "\$215" and inserting "\$222".

(e) **HOUSEBOUND RATE.**—Section 1311(d) is amended by striking "\$104" and inserting "\$107".

SEC. 6. DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

(a) **DIC FOR ORPHAN CHILDREN.**—Section 1313(a) is amended—

(1) by striking "\$361" in paragraph (1) and inserting "\$373";

(2) by striking "\$520" in paragraph (2) and inserting "\$538";

(3) by striking "\$675" in paragraph (3) and inserting "\$699"; and

(4) by striking "\$675" and "\$132" in paragraph (4) and inserting "\$699" and "\$136", respectively.

(b) **SUPPLEMENTAL DIC FOR DISABLED ADULT CHILDREN.**—Section 1314 is amended—

(1) by striking "\$215" in subsection (a) and inserting "\$222";

(2) by striking "\$361" in subsection (b) and inserting "\$373"; and

(3) by striking "\$182" in subsection (c) and inserting "\$188".

SEC. 7. EFFECTIVE DATE.

The amendments made by this Act shall take effect on December 1, 1999.

Amend the title so as to read "An Act to amend title 38, United States Code, to provide a cost-of-living adjustment in the rates of disability compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for survivors of such veterans."

Ms. COLLINS. I ask unanimous consent the Senate agree to the amendments of the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

U.S. HOLOCAUST ASSETS COMMISSION EXTENSION ACT OF 1999

Ms. COLLINS. Mr. President, I ask unanimous consent the Banking Committee be discharged from further consideration of H.R. 2401, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 2401) to amend the U.S. Holocaust Assets Commission Act of 1998 to extend the period by which the final report is due and to authorize additional funding.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 2401) was read the third time and passed.

AMENDING THE FEDERAL RESERVE ACT

Ms. COLLINS. Mr. President, I ask unanimous consent the Banking Committee be discharged from further consideration of H.R. 1094, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1094) to amend the Federal Reserve Act to broaden the range of discount window loans which may be used as collateral for Federal reserve notes.

There being no objection, the Senate proceeded to consider the bill.

Mr. GRAMM. Mr. President, today the Senate is taking up for its consid-

eration H.R. 1094, a bill to amend the Federal Reserve Act to broaden the range of discount window loans which may be used as collateral for Federal Reserve notes. This legislation will expand the field of assets that the Federal Reserve may use to collateralize Federal Reserve notes. All currency in circulation must be backed by specific assets, but much of the collateral that the Federal Reserve accepts for discount window loans is ineligible under current law for use to back the currency. The changes put in place by this legislation will allow the Federal Reserve to apply all eligible discount loan assets to collateralize the currency.

This legislation poses some risks unless adequate safeguards are in place. The Federal Reserve applies a discount to each type of asset used as collateral. Broadening the scope of eligible assets makes it even more imperative that strict and aggressive discounting be applied to any assets used to back U.S. currency. The Federal Reserve should discount aggressively these assets through an objective and clearly defined process that leaves no room for doubt that our currency is fully backed by reliable assets. At the most basic level, when valuing these assets this should be our general rule: when in doubt, discount.

Failure to discount collateral assets aggressively would do more than threaten the safety and soundness of the Federal Reserve's balance sheet; it would threaten the U.S. economy and all economies that rely on a stable dollar. Many countries around the world recently have learned a painful lesson on the value of a sound currency.

We must remember that any country can engage in monetary mismanagement, and most have at some point in time. The United States must avoid that path. With a currency that is considered a stable medium by U.S. citizens and a store of value by both domestic and foreign investors, the Federal Reserve must hold sound money paramount as it implements this important change in currency collateral requirements. It has taken nearly two decades to rebuild the reputation of the dollar after the inflation of the Carter years. Today, "sound as a dollar" has meaning here and all over the world. We must do nothing to undermine it.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1094) was read the third time and passed.

PARTICIPATION OF TAIWAN IN THE WORLD HEALTH ORGANIZATION

Ms. COLLINS. I ask unanimous consent the Senate proceed to the consideration of Calendar No. 382, H.R. 1794.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1794) concerning the participation of Taiwan in the World Health Organization.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1794) was read the third time and passed.

VETERANS' MILLENNIUM HEALTH CARE ACT—CONFERENCE REPORT

Ms. COLLINS. Mr. President, I submit a report of the committee of conference on the bill (H.R. 2116) to amend title 38, United States Code, to establish a program of extended care services for veterans and to make other improvements in health care programs of the Department of Veterans Affairs, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee on conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill, H.R. 2116, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 16, 1999.)

Mr. SPECTER. Mr. President, I urge my colleagues to join me in support of the Veterans Millennium Health Care and Benefits Act of 1999. On Veterans Day, many of the members honored America's veterans and acknowledged our debt to them for their service. This legislation gives the Senate an opportunity to do something tangible to honor our veterans.

The Veterans Millennium Health Care and Benefits Act of 1999 contains 74 substantive provisions; I refer the Members to the conference report text for a complete description. Let me highlight just a few provisions now.

Long-term care for veterans is one of the most pressing issues facing America—and the Department of Veterans Affairs (VA). A half century ago, the 16 million youthful veterans of World War

II looked forward to building new civilian lives. Today, only about 6 million survive, and their average age is 75. Health care is their primary concern, the long-term care is a critical component of their health care needs. Simply put, what World War II veterans need from VA is long-term care. Soon, so too will the 4 million Korean war veterans, now in their mid-sixties, and the 8 million Vietnam veterans, now in their fifties, who follow them.

Under current law, VA is not required to provide long-term care to any veteran. Such care is purely discretionary to VA; it is supplied on a space available basis only. Under this "discretionary" authority—as inadequate as it has been—VA has made a substantial contribution to the long term care needs of veterans—by directly providing (at an annual cost of \$1.1 billion) nursing home care to an average of approximately 13,000 veterans per day; by paying for nursing home care received by approximately 6,500 veterans per day in private nursing homes (at an annual cost of \$316.8 million); by subsidizing (at an annual cost approximately \$200 million per year) nursing home care provided to approximately 14,000 veterans per day in State veterans' homes; and by providing non-institutional alternatives to nursing home care to an average of 11,000 veterans at any given time at an annual cost of \$154 million.

Notwithstanding these significant contributions by VA, there is increasing evidence that the discretionary nature of VA's long-term care mission has created an incentive for VA to divert resources to other missions and reduce its capacity to provide long-term care. This bill responds to that negative trend by requiring VA to maintain long term capacity at least the 1998 level. In addition, this legislation would, for the first time, require—not authorize—VA to provide nursing home care to veterans who need it to treat service-connected conditions, and to severely service-disabled veterans who need it to cope with other conditions.

Nursing home care is the most expensive form of long-term care and, from the veterans' standpoint, the form of care which is to be avoided if possible, or delayed until it is inevitable. This bill will assure that non-institutional alternatives to nursing home care—home-based primary care, home health aide visits, adult day health care, and similar services—will be available to veterans who need such services by requiring that VA include them in the package of medical services to which each veteran who enrolls for VA care is entitled. The provision of such services, as an alternative to much more expensive inpatient nursing home care, will save money and improve aging veterans' lives.

This legislation also directs VA to operate pilot programs to identify the

best—and most cost-effective—ways to meet veterans' long term needs. Armed with the data generated by these pilot programs, Congress will reevaluate VA nursing home and non-institutional long term care after three years and determine how best to proceed at the four-year "sunset" point of this legislation. I might add that the conferees were all in agreement that, when we get to the point where we consider renewal of this legislation, we will be looking for ways to improve it, not to repeal it.

There is one additional key feature of this legislation that merits mention: this bill will plug a substantial hole in VA health care coverage by allowing VA to fund the emergency care needs of all enrolled veterans who do not have other health care coverage to fund such care. The President has stated that all Americans should have access to emergency care. This bill assures that veterans who rely on VA for care will.

I am particularly pleased that this bill will extend, expand, and improve VA's authority to provide counseling to the victims of sexual trauma while on active duty. It will also extend and improve services for homeless veterans; it will liberalize eligibility for survivors' benefits for widows of totally disabled ex-POWs; it will expand benefits available to veterans exposed to radiation while in service; and—importantly—it will ensure that the World War II Veterans' Memorial is constructed in a timely manner by facilitating fund raising for that monument.

This legislation does many positive things, particularly for our older veterans. The Committee on Veterans' Affairs, however, must also respond to the needs of veterans who are leaving the service today. Educational assistance is the most important benefit that our Nation provides to young veterans. Earlier this year, the Senate passed legislation which would have substantially improved benefits under the Montgomery GI bill. Unfortunately, budgetary pressures compelled the conferees to set these provisions aside for now. I know, however, that the House supports improvements in Montgomery GI bill benefits, and we will take that issue up again in the second session.

This legislation reflects the hard work and dedication of many members of the Senate and the other body. I particularly acknowledge the contribution of the Ranking Minority Member of the Committee on Veterans' Affairs, Senator ROCKEFELLER, and our Committee's longest-serving member and a member of the conference committee, Senator THURMOND. The conference committee could not have reached a successful conclusion without them, or without the energy and commitment of the chairman of the House Committee,

BOB STUMP and his ranking member, LANE EVANS, I thank them. And I urge the Senate to approve this conference report.

Mr. DOMENICI. Mr. President, it is with great pleasure that I rise today to talk about the Senate passage of the Veterans' Millennium Health Care Act.

I am extremely pleased the act contains a provision that will extend the useful life of the Santa Fe National Cemetery in New Mexico. I also want to thank Senator SPECTER for his assistance in making passage of this Bill possible.

The men and women who have served in the United States Armed Forces have made immeasurable sacrifices for the principles of freedom and liberty that make this Nation unique throughout civilization. The service of veterans has been vital to the history of the Nation, and the sacrifices made by veterans and their families should not be forgotten.

These veterans at the very least deserve every opportunity to be buried at a National Cemetery of their choosing. Unfortunately, projections show the Santa Fe National Cemetery will run out of space to provide casketed burials for our veterans at the conclusion of 2000. However, with Senate passage of this bill we are ensuring the continued viability of the Santa Fe National Cemetery.

I believe all New Mexicans can be proud of the Santa Fe National Cemetery that has grown from 39/100 of an acre to its current 77 acres. The cemetery first opened in 1868 and within several years was designated a National Cemetery in April of 1875.

Men and women who have fought in all of nation's wars hold an honored spot within the hallowed ground of the cemetery. Today the Santa Fe National Cemetery contains almost 27,000 graves that are mostly marked by upright headstones.

The Senate's action today guarantees the Santa Fe National Cemetery will not be forced to close next year. A provision in the bill passed today allows the Secretary of Veterans Affairs to provide for the use of flat grave markers that will extend the useful life of the cemetery until 2008.

While I wish the practice of utilizing headstones could continue indefinitely if a veteran chose, my wishes are outweighed by my desire to extend the useful life of the cemetery. I would note that my desire is shared by the New Mexico Chapter of the American Legion, the Albuquerque Chapter of the Retired Officers' Association, and the New Mexico Chapter of the VFW who have all endorsed the use of flat grave markers.

Finally, this is not without precedent because exceptions to the law have been granted on six prior occasions with the most recent action occurring in 1994 when Congress authorized the

Secretary of Veterans Affairs to provide for flat grave markers at the Wilamette National Cemetery in Oregon.

Mr. President, I again want to thank Senator SPECTER for his assistance and state how pleased I am with the final passage of this important bill.

Mr. ROCKEFELLER. Mr. President, as the ranking member of the Committee on Veterans' Affairs, I am enormously pleased that the Congress has passed this comprehensive bill which would make extensive changes to a wide range of veterans' benefits and services. This legislation is the culmination of extensive oversight and investigation, as well as the normal process of developing legislation—hearings and markups in both the House and Senate. Further, the bill represents compromise on both sides of the aisle and in both Houses of Congress. It represents many, many hours of staff and Members' work, and for that, I thank everyone involved.

The bill covers a wide spectrum of issues—from long-term care to new educational benefits for servicemembers. I will address some of the more substantive provisions.

Mr. President, H.R. 2116, as amended, represents a comprehensive effort to address the long-term care needs of our veterans.

We know that there is an expanding need for long-term care in our country, and in the VA, the demand is even more pressing. About 35 percent of the veteran population is 65 years or older, and that number will grow dramatically in the next few years. With this legislation, we are taking an important step forward for our veterans, and I am hopeful that it signals a new concern for providing long-term care for all elderly Americans.

For the first time, the VA will be required to provide extended care services to enrolled veterans. Section 101 directs the VA to provide nursing home care to any veteran who is in need of such care for a service-connected condition, or who is 70 percent or more service-connected disabled. In addition, the VA is directed to provide non-institutional care, such as home care and adult day health care, to all enrolled veterans. This latter provision was included in the Veterans' Long-term Care Enhancement Act of 1999 which I introduced this summer. Within three years of the bill's enactment, VA would evaluate and report to the House and Senate Committees on Veterans' Affairs on its experience in providing services under both of these provisions.

Under the bill, the VA is also required to operate and maintain extended care programs so as to ensure that the level of extended care services is not less than the level of such services provided during fiscal year 1998.

Finally, in order to offset the cost of this new program expansion, the con-

ference agreement requires new long-term care copayments for services exceeding 21 days in any year. Veterans who have compensably rated service-connected conditions and veterans with incomes below the pension rate are exempted from these copayments. Under this provision, VA would be required to develop a methodology for establishing the amount of copayments, taking into account the income of the veterans, the need to protect the veteran's spouse from financial difficulties, and the desire to allow the veteran to retain a personal allowance. Further, it was the conferees' desire that copayments would not apply to patients who are currently receiving long-term care services.

Section 102—also based on the Veterans' Long-term Care Enhancement Act of 1999 which I authored—mandates that the Secretary of Veterans Affairs carry out a series of pilot programs, over a period of three years, which would be designed to gauge the best way for VA to meet veterans' long-term care needs: either directly, through cooperative arrangements with community providers, or by purchasing services from non-VA providers.

While VA has developed significant expertise in long-term care over the past 20-plus years, it has not done so with any mandate to share its learning with others, nor has it pushed its program development beyond that which met the current needs at the time. Some experts even believe that VA's expertise is gradually eroding. For VA's expertise to be of greatest use to others, it needs both to better capture what it has done and to develop new learning that would be most applicable to other health care entities.

A key purpose of the pilot program would be to test and evaluate various approaches to meeting the long-term care needs of eligible veterans, both to develop approaches that could be expanded across VA, as well as to demonstrate to others outside of VA the effectiveness and impact of various approaches to long-term care. To this end, the pilot program would include specific data collection on matters such as cost effectiveness, quality of health care services provided, enrollee and health care provider satisfaction, and the ability of participants to carry out basic activities of daily living.

Another provision based on my veterans' long-term care legislation would authorize the VA to establish a pilot program for assisted living services. Assisted living is the last remaining gap in VA's long-term care continuum, and the Federal Advisory Committee on the Future of VA Long-Term Care recommended that VA be granted the authority to provide assisted living services. I urge VA to undertake this pilot program, as it will provide a basis on which to recommend expanding the authority.

Mr. President, earlier this year I joined with Senator DASCHLE as an original cosponsor to S. 1146, the Veterans' Access to Emergency Care Act of 1999. In June, I offered the provisions included in this bill as an amendment to a veterans omnibus measure being discussed at a Senate Committee on Veterans' Affairs markup. The amendment was agreed to by a majority of the Committee members.

Just this week I was reminded of the need for better coverage for non-VA emergency care. The wife of a seriously ill veteran in my state of West Virginia called my office. Her husband is a non-service-connected, low income veteran with no health insurance. Recently, severe chest pains sent him to a VA medical center. Because he is a cardiac patient and because he was in so much distress, his family wanted to call the rescue squad to transport him to the VA medical center. The veteran refused. Why? Because he had used the ambulance service before in an emergency situation, leaving the family with a sizeable bill that they are unable to pay. So, this sick veteran almost crawled to the family car, insisting that his family drive him. Once there, the VA medical staff told the veteran and his family that by not calling for an ambulance, the veteran was placed at risk.

Section 111 would authorize the VA to make non-VA emergency care reimbursement payments on behalf of enrolled veterans in all priority groups, provided the veteran has received VA care within a two-year period prior to the emergency and has no other health insurance options.

While this emergency care provision is significantly more restrictive than I had wanted, it is a valuable first attempt at ensuring that veterans who do not have other health insurance options—like the seriously ill West Virginia veteran who refused when his family tried to call for an ambulance—will be reimbursed for their non-VA emergency care services. In negotiating this provision, I was resolute in pushing for all enrolled veterans to have this coverage. I will be watching closely to ensure that this more limited emergency care provision is working for our veterans.

Section 112 is based on legislation introduced by Senator ROBB. It would establish a specific eligibility for VA health care for veterans who were awarded the Purple Heart. This provision is designed to provide priority for enrollment to these veterans who have no other special eligibility for care.

According to the Military Order of the Purple Heart, there are about one-half million veterans with this award. Roughly half of these honored veterans already would qualify for high priority care based on a service-connected disability or because of income.

The recipients of the Purple Heart award are American heroes, and I

thank Senator ROBB for his leadership on this measure, which will ensure that the remaining 500,000 Purple Heart veterans will have unfettered access to VA health care services.

Military retirees have had a difficult time accessing various health care programs. Reductions in military treatment facilities, in particular, have restricted military retirees' health care options. Section 113 attempts to improve their situation.

Under the bill, the Secretaries of Defense and Veterans Affairs will be directed to enter into an agreement to allow for VA reimbursement for health care services provided to military retirees. Veterans who have retired from military service and who are not otherwise eligible for VA care will not be responsible for copayments.

In order to protect current enrollees, the Secretary must document that VA—in a given area—has the capacity in such an area to provide timely care to enrollees and has determined that VA would recover its cost of providing such care.

I am very pleased that House and Senate conferees were able to reach agreement on this provision to improve care for military retirees.

Section 117 is of particular interest to me as it addresses VA's specialized mental health services for veterans.

Last year, I directed my staff on the Committee on Veterans' Affairs to undertake a study of the services the Department of Veterans Affairs offers to veterans with special needs. Earlier this summer, I received the report my Committee staff wrote based on their 8-month oversight investigation, which sought to determine if VA is complying with a Congressional mandate to maintain capacity in five of the specialized programs: Prosthetics and Sensory Aids Services, Blind Rehabilitation, Spinal Cord Injury (SCI), Post-Traumatic Stress Disorders (PTSD), and Substance Use Disorders. I was dismayed to learn that because of staff and funding reductions, with the resulting workload increases and excessive waiting times, the latter two programs are failing to sustain services at the needed levels.

With specific regard to PTSD, VA has been moving to reduce inpatient treatment of PTSD, while expanding its use of outpatient programs. VA's decision has been fueled in part by studies of the cost effectiveness of various treatment approaches. The potential to stretch limited VA dollars to be able to treat more veterans is appealing. However, VA needs to be cautious before subscribing to the idea that outpatient care is as good as inpatient care for all veterans with PTSD. For some of the more seriously affected veterans—those who have not succeeded in shorter inpatient or outpatient programs, are homeless or unemployed, or have dual diagnoses—longer inpatient or bed-based care may be a necessity.

Substance use disorders also present complex treatment problems and have taken the brunt of reductions in specialized programs. Some substance use disorder programs have terminated inpatient treatment completely, except for veterans requiring short detoxifications in extreme situations. While some medical centers have closed inpatient substance use disorder beds, they have worked to provide alternative, sheltered living arrangements. Unfortunately, not all facilities have made these efforts. Many have moved directly to the closure of inpatient units without first developing these other alternatives.

As an outgrowth of this oversight effort, I developed legislation to require that VA provide better care for veterans in need. I thank Chairman SPECTER for accepting this legislation and including it in S. 1076, the Veterans Benefits Act of 1999.

Under section 117, the Secretary of Veterans Affairs is required to carry out programs to enhance the provision of specialized mental health services to veterans. The conference agreement specifically targets services for those afflicted with PTSD and substance use disorders. The legislation also requires that \$15 million in funding will be made available, in a centralized manner, to fund proposals from the VISNs and the individual facilities to provide specialized mental health services. The legislation specifically ensures that this \$15 million in grant funding will be over and above what VA currently spends on these programs.

The focus of Section 117 is on expanding outpatient and residential treatment facilities, developing better case management, and generally improving the availability of services. Though not specifically mentioned in the legislation, I encourage VA to carry out programs for the following: (1) additional outpatient and residential treatment facilities for PTSD in areas that are underserved by existing programs; (2) short-term or long-term care services that combine residential treatment of PTSD; (3) dedicated case management services on an outpatient basis for veterans suffering from PTSD; (4) enhanced staffing of existing PTSD programs; (5) additional community-based residential treatment facilities for substance use disorder programs; (6) expanded opioid treatment services; and (7) enhanced substance use disorder services at facilities where such services have been eliminated.

In my view, VA's mental health treatment programs, in general, have been cut back to the point that veterans in some areas of the country are suffering needlessly. That is why I am so pleased that H.R. 2116 includes provisions to prompt VA to begin to rebuild some of what has been lost.

Section 201—based on the House bill—would allow the Secretary of Veterans Affairs the authority to set copayments, both for pharmaceuticals and for outpatient treatment. Currently, all veterans who are below 50 percent service-connected disabled, and veterans whose income is below the pension level, are required to pay \$2 for each 30-day supply of medication. And all “category C” veterans are required to pay copayments based on the estimated average cost of an outpatient visit—currently \$45.80.

The outpatient copayment rate needs to be adjusted. This charge is incurred each and every time a category C veteran receives outpatient care, regardless of the services provided. There is no doubt that \$45 for a routine outpatient visit is unreasonable at best, and at its worst, may, in fact, discourage veterans from getting the primary care they need. I am confident that VA will study this issue closely and will set the outpatient copayment to be more in line with managed care plans which charge either \$5 or \$10.

While I am supportive of adjusting the outpatient copayment, I have serious concerns about increasing the pharmaceutical drug copayment. The House Committee on Veterans’ Affairs was adamant that the Senate recede to this increase to help offset the Senate-sponsored program expansions in long-term care and emergency care. And although the \$2 per prescription charge that veterans are paying now may seem like an insignificant amount to some, I can assure my colleagues that to the veteran and his family living on a very limited income, it is quite significant. I hear from a number of veterans whose income hovers just above the pension level, who must pay the assigned copayment for their pharmaceuticals. Many of them are older veterans who are on a number of different medications for multiple medical conditions.

It is critically important that we do not place this segment of our veteran population in the same situation as many of our aging population receiving care in the private sector—having to choose between buying their medication or putting food on the table.

In an effort to prevent this from happening, I strongly urge the VA to set maximum monthly and annual copayment amounts which are sensitive to the financial situation of veterans for those who have multiple outpatient prescriptions. I will be closely watching the implementation of this provision to ensure that it does not impose an undue burden on our veterans.

While the Senate was not able to stave off the House in increasing prescription copayments, we were able to flatly reject a House provision to require copayments for hearing aids and eyeglasses. Such a provision would penalize veterans who are taking advantage of a needed benefit.

Section 206 extends the VA’s program for the evaluation of the health of spouses and children of Gulf War veterans for four years. I pushed for the original legislation providing for these health evaluations after hearing about Gulf War veterans and their families who reported miscarriages, birth defects, and other reproductive problems.

Last year, the Congress modified this program to allow VA to use fee-basis care. It seems that these modifications are working well, as many new dependents have applied and are now waiting to be seen.

I am delighted that this program has been extended because the need for assessments continues. By this time last year, 2,800 dependents had applied for the program, and this year that total is up to 4,000. However, although 4,000 dependents have applied for the evaluations, VA has only completed 1,140 examinations. I urge VA to process these examinations as rapidly as possible. These dependents of servicemembers should not be delayed in their quest for answers.

Section 208 contains provisions to improve VA’s enhanced use lease authority. I am delighted with these provisions, because I believe enhanced use leases are a critical component of VA’s management strategy for its property. Many terrific projects that better serve veterans and assist the VA have been developed under this authority. By way of this legislation, we are encouraging VA to develop more enhanced use lease projects to leverage its assets, rather than begin to dispose of irreplaceable property.

Since VA received enhanced use authority, it has been used in a variety of ways. One approach has been to lease land to companies that build nursing homes where VA can place veterans at discounted rates, resulting in savings of millions of dollars. Another use has been to provide transitional housing for homeless veterans. Other projects have created reliable child care and adult day care facilities for VA employees’ families, so that they can care for veterans without having to worry about the health and safety of their loved ones. In other locations, VA regional offices are moving onto VA medical center campuses, resulting in more convenient access for veterans and better cooperation between the Veterans Benefits Administration and the Veterans Health Administration.

Section 208 of H.R. 2116 would remove many of the current barriers preventing VA from having an even more successful enhanced use lease program. It would allow VA to enter into leases with terms of up to 75 years, rather than the current 20 and 35 years, while eliminating the distinction in lease terms that exists between leases involving new construction or substantial renovation, and those involving current structures.

I am very interested in seeing VA engage in more of these projects, so I am pleased to see that H.R. 2116 would require the Secretary to provide training and outreach regarding enhanced use leasing to personnel at VA medical centers. The bill also requires the Secretary to contract for independent assessments of opportunities for enhanced use leases. These assessments would include surveys of suitable facilities, determinations of the feasibility of projects at those facilities, and analyses of the resources required to enter into a lease. I hope that more training—which until now has been sporadic and provided primarily on a by-request basis—and a more systematic and centralized approach would assist the VA in maximizing its enhanced use lease opportunities.

While VA currently has a policy which allows for fee-basis care for chiropractic care, section 303 of H.R. 2116 requires the VA Under Secretary for Health, in consultation with chiropractors, to establish a wider VA policy on chiropractic care. While conferees have agreed that VA should establish a policy regarding chiropractic care, they have remained silent on mandating that VA furnish veterans with chiropractic treatment. Indeed, it is Congress’ intent that this provision not be read as an endorsement for chiropractic care.

Complementary and alternative medicine, including chiropractic care, are important aspects of health care. I urge VA to use this opportunity to develop a policy on all forms of complementary and alternative medicine. In particular, the report “VHA Complementary and Alternative Medicine Practices and Future Opportunities” recommended that VHA consider providing acupuncture, following guidelines set forth by the National Institutes of Health, since NIH has already approved acupuncture as an effective treatment for back pain.

I am extremely disappointed that the House would not move the Senate Montgomery GI Bill (MGIB) enhancement legislation. The Senate passed MGIB enhancements on three occasions this year, but the House did not respond.

S. 1402, the education bill reported out of the Senate Committee on Veterans’ Affairs, contained a provision, among others, to increase the monthly benefit provided to current servicemembers from \$528 to \$600. This more than 12 percent increase would have followed on the heels of a 20 percent increase last year. Additionally, the Senate bill would have allowed servicemembers to elect to contribute up to an additional \$600, in exchange for receiving four times their contribution. Although these increases fall short of the full tuition recommended by the so-called Transition Commission, they would have provided a substantial assistance to veterans. The

costs of tuition and fees for public and private educational institutions rose approximately 90 percent from 1980–1995, while the MGIB benefit rates only increased 42 percent from 1985 to 1995.

The statistics regarding education and employment for veterans are also revealing. Despite almost full enrollment in the program by servicemembers, the number of eligible veterans who take advantage of their MGIB benefits is startlingly low, around 50 percent. Less than 20 percent of those who use the MGIB attend private institutions. And the Transition Commission reports that the unemployment rate for veterans ages 20–24 and 35–39 is higher than their non-veteran counterparts. All these are reasons why I believe that there is more that we can and must do. Unfortunately, we will need to wait until at least next year to tackle these issues.

H.R. 2116 does provide for two provisions—relating to test preparation and Officer Candidate Training—which while small, can make a significant difference to the individual veterans affected.

The Department of Veterans Affairs currently has authority to provide MGIB benefits for post-graduate exam preparatory courses that are required for a particular profession, such as CPA exam or bar review courses. However, it does not have authority to provide for pre-admission preparatory coursework.

Nevertheless, studies by national consulting companies have shown improvement of over 100 points on the SAT exam and an average improvement of seven points in LSAT scores for students who take exam preparatory courses. An article in the April 13, 1998, *New Republic* stated, “[t]horough, expertly taught preparation can raise a student’s ability to cope with, and hence succeed on, a particular exam. In many cases, then, test prep can make the difference between getting into a top-flight law school and settling for the second tier.” At some of the nation’s top schools, scores on entrance exams can count for half of the total application.

The problem is that many of these exam preparatory courses are quite costly. One national provider charges as much as \$750 for a two-month, part-time, SAT preparatory course. One educational advocacy group, Fairtest, argues that “[t]he SAT has always favored students who can afford coaching over those who cannot . . .” To be able to compete, it is critical that veterans have access to such courses.

That is why I am pleased that section 701 corrects that disparity by allowing veterans to use their MGIB benefits for preparatory courses for entrance examinations required for college and graduate school admission (“test prep”). By giving veterans the opportunity to better their admissions test

scores, this amendment would expand the choices available to veterans in their course of higher education. It will also improve access to the top educational institutions for veterans.

Section 702 allows servicemembers who failed to complete their initial period of service—because of entry to Officer Candidate School or Officer Training School (“OCS”)—to retain their eligibility for MGIB benefits. This would allow their OCS service to count toward that initial obligated period of service (generally three years total).

In most instances, these servicemembers had already made a \$1,200 contribution to the MGIB, which cannot be refunded, by law. Rather than refund this money, the House and Senate agree that we should allow these men and women to retain their MGIB eligibility and further their education.

Like the test prep provision, it should be our policy to always encourage servicemembers and veterans to strive for greater achievement. This provision corrects an oversight in the MGIB statutes that penalizes servicemembers for seeking promotions.

As we are all sadly aware, the veteran population is aging rapidly. In 1997, 537,000 veterans died. Projections of the veteran death rate show an increase through the year 2008, when the death rate of the world War II and Korea-era veterans will peak at 620,000 veterans. Unless expanded, 21 national cemeteries are scheduled to close to inground burial or close completely by FY 2005. National cemeteries take an average of seven years to open. That is why I felt it was critical to address now VA’s plan to provide burial sites for our nation’s veterans.

VA conducted studies in 1987 and 1994 that identified the top 10 veteran population areas that are not served by a national cemetery. Pursuant to those studies, VA has begun, and in some cases completed, construction of six cemeteries in: Cleveland (OH), Chicago (IL), Seattle (WA), Dallas (TX), Saratoga (NY), and San Joaquin Valley (CA).

However, there has been no activity in the remaining six locations contained on the 1987 and 1994 lists: Detroit (MI), Sacramento (CA), Miami (FL), Atlanta (GA), Pittsburgh (PA), and Oklahoma City (OK). That is why I am pleased that H.R. 2116 authorizes VA to build cemeteries in the top areas in need. I am hopeful that the Appropriations Committee will fund construction of these cemeteries, particularly in light of their direction of advanced planning funds in this year’s VA–HUD Appropriations bill.

Sections 601–603 authorize the American Battle Monuments Commission to borrow funds from the Treasury Department to construct the WWII memorial on the Mall if it is unable to

raise sufficient funds through private donations. It also extends the authority to break ground for four years. This will ensure that the veterans who are to be honored by this memorial will be able to see it constructed.

I have agreed to a study, based on a House provision, of the current state of cemeteries to assess repair needs, ways to improve appearance, and the number of cemeteries needed to serve veterans who die after 2005. Finally, section 621 requires that the VA study the adequacy and effectiveness of burial benefits that a veteran’s dependents receive, as well as options to better serve veterans and their families. In light of inflation in the cost of burials, as well as the increase in options such as cremation and burial at sea, it is appropriate that VA reevaluate this program.

This bill contains a number of benefits provisions that will aid veterans. For example, section 503 will add bronchiolo-alveolar carcinoma to the list of presumptive conditions associated with exposure to ionizing radiation. Bronchiolo-alveolar carcinoma is a type of lung cancer. The Senate has passed provisions adding lung cancer to the list of presumptive conditions on several occasions, but the House has not moved similar legislation.

Section 711 will extend the reservist home loan guaranty authority to December 31, 2007. The current authority is set to expire in 2003. However, a reservist must serve six years before being eligible for the home loan guaranty. Therefore, in order for it to be used as a recruiting incentive, the authority must be extended beyond 2006.

I am extremely gratified that section 501 authorizes payment of dependency and indemnity compensation (“DIC”) to the surviving spouse of a former POW veteran who dies of a non-service-connected condition if the former POW was rated totally disabled due to a POW-related presumptive condition for a period of one or more years immediately prior to death. In the case of former POWs, this reduces the 10-year period prior to death that a veteran must be rated 100 percent service-connected for the spouse to receive DIC if the veteran dies of a non-service-connected condition. This provision recognizes that former POWs suffered extreme hardships and that their spouses cared for them throughout the years that VA did not recognize their health conditions as being service-related. I am proud that we named this provision of the bill the “John William Rolan Act.” John passed away this year. He was a tireless advocate for America’s former POWs, and I will miss him.

Section 502 of H.R. 2116 corrects an oversight in last year’s transportation bill (TEA 21) that reinstated DIC to remarried widows of veterans whose remarriages have now been terminated. The benefit had previously been cut off

as a budget reconciliation item. While reinstating DIC payments, however, the transportation bill failed to restore the limited ancillary benefits that accompany the receipt of DIC: CHAMPVA, home loan guaranty, and educational benefits. This bill restores those ancillary benefits.

Finally, I am so glad that we will maintain our commitment to homeless veterans by reauthorizing the Homeless Veteran Reintegration Program (HVRP). Section 901 authorizes increased funding levels for job training for veterans for four consecutive years, beginning with \$10 million additional in the first year, \$15 million additional in the second year, and \$20 million additional in each of the third and fourth years. We have also required, in section 903, that VA formulate a comprehensive plan that includes the Departments of Labor and Housing and Urban Development, to conduct a cross-cutting report evaluating the effectiveness of homeless programs beyond six months of placement or service delivery.

Title XI of H.R. 2116 provides VA with authority to offer voluntary separation incentives through December 31, 2000, to a specified number of FTEE. As is well known, inadequate VA budgets in the last several years have forced VA to make sweeping changes, (many of which were warranted, including the downsizing of employees. VHA has already eliminated thousands of employees via "reductions in force" ("RIFs")). VHA FTEE staff now stands at 182,000, down from 218,000 in 1994. VBA FTEE has also declined, from 13,500 in 1994 to 11,200 today. All this is occurring at a time when VA is treating more patients and deciding more claims.

Usually, a condition of voluntary separation incentives—or buyouts as they are known—is that the FTEE slot is eliminated in a one-for-one reduction, i.e. downsizing. But I believe that VA has already reached the precipice of staff reductions—the point beyond which we should not go if quality of VA health care is to be maintained. However, VA says that it still requires buyouts in order to "rightsize." That is, VA must let go of employees who do not have the needed skills, in order to free up FTEE positions so that VA can hire the most appropriately qualified people. The buyout language in this bill prohibits VA from eliminating the FTEE positions of employees who have received buyouts.

If we do not provide VA with buyout authority, VA will proceed down the path of reductions regardless. For example, VHA will RIF thousands of employees next year. However, RIFs are an inexact management tool. RIFs would not necessarily result in the skills mix VA needs, due to the civil service employment rights that allow senior employees to take the job of junior employees. I believe that

buyouts offer a better option, but one that must still be used wisely and monitored carefully—which is why H.R. 2116 allows only limited buyouts under very strict conditions.

I am very disappointed that we were unable to move the Senate provision overturning the "\$1,500 rule." Since 1933, the law has required VA to suspend the compensation or pension benefits of incompetent veterans who have no dependents and are hospitalized at government expense. This suspension is triggered when the veteran's estate exceeds \$1,500, and VA benefits are cut off until the veteran's estate is spent down to \$500. At that time, the VA commences reinstating the veteran's compensation, until such time the veteran is hospitalized again and the estate exceeds \$1,500, when the benefits are cut off again. No similar suspension is made for competent veterans or for incompetent veterans who are not hospitalized.

The rationale for cutting off benefits was that these veterans might have been institutionalized for years, and that it was not good policy to allow their estates to build up when they have no dependents to inherit them. There was also a fear of fraud on the part of the veteran's guardian or fiduciary.

The dollar amounts have not changed since 1933, when \$1,500 equaled almost three years' worth of VA benefits at a 100 percent rating level. In today's dollars, this is less than one month's benefit at a 100 percent rating level.

Although veterans are generally being hospitalized for shorter periods of time, based on the low dollar limit, the rule may be applied very quickly, sometimes immediately, when it does apply. Further, it takes VA an average of 66 days to restore the benefits to incompetent veterans once their estates have been spent down. Since incompetent veterans are no longer routinely institutionalized for years at a time, it is very difficult for a non-Medicaid eligible veteran (which would be any veteran receiving any significant amount of VA compensation) to be released from the hospital and placed in either a private assisted living or group home with only \$500 in his bank account. I fear some of these veterans may end up on the streets because of this policy, despite the best efforts of VHA to place them at discharge.

I believe that this outdated and indefensible policy discriminates against incompetent veterans—those who are least likely to be able to fight for themselves. The fact is, we are means testing VA compensation for this one class of veterans. Why is a competent veteran with no dependents entitled to receive his compensation, but an incompetent veteran not entitled? There is no justification for this discrimination. It may also have some harmful effects for a small population of vet-

erans, facilitating their downward spiral into homelessness. That may be too much of a price to pay for the government to save some money from reverting to the state if that veteran died while hospitalized. While we were not successful in addressing this issue in this bill, I plan to readdress this policy until it is corrected.

Mr. President, in closing, I want to acknowledge the work of our Committee's Chairman, Senator SPECTER, in developing this comprehensive legislation. Through his efforts, and that of his staff—especially the former Committee Staff Director, Charles Battaglia, and the new Committee Staff Director, William Tuerk—the Senate Committee on Veterans' Affairs has fully met its responsibilities and can be proud of the legislation we consider today.

I appreciate the willingness of the House Committee on Veterans' Affairs, especially Chairman BOB STUMP and Ranking Member LANE EVANS, to work together to reach compromise on so many vital issues.

And I would be remiss if I did not acknowledge the efforts of my own staff, Minority Staff Director, Jim Gottlieb, Professional Staff Member, Kim Lipsky, and Counsel, Mary Schoelen. I am enormously grateful for their diligence, and for their commitment to the work we do in this Committee on behalf of our Nation's veterans.

Ms. SNOWE. Mr. President, I rise in support of H.R. 2116, the Veterans Millennium Health Care and Benefits Act of 1999.

I would like to begin by thanking my colleague, Senator SPECTER, chairman of the Senate Veterans' Affairs Committee, for his leadership on issues of importance to veterans. H.R. 2116 contains a number of provisions that will benefit veterans in Maine and elsewhere because of his strong leadership. I applaud Senator SPECTER for his efforts.

I would especially like to thank the chairman for his efforts to address a concern I had about a specific provision in the House-passed version of the bill, which would have jeopardized millions of dollars in grant funding for the Maine State Veterans Homes system.

H.R. 2116 contains a provision which fundamentally reorders the manner in which VA construction grants will be awarded in the future, placing the focus on renovation of existing facilities so that maintenance projects will take precedence in grant awards over proposals to construct new facilities. The House-passed version of the bill would have made Maine veterans homes and state homes in a number of states ineligible for funding, even though they had already prepared and filed grant applications under existing law and regulations.

In an effort to address this concern, I worked closely with Senator SPECTER

to craft a transition provision balancing the need to treat current state home applicants fairly and not change the rules in the middle of the game, while at the same time implementing the new rules as soon as possible.

I am very pleased that the conference for H.R. 2116 agreed to the measure I helped author that grandfathers proposals already filed by veterans homes, thereby exempting them from new criteria in the bill that would have precluded funding in this and coming fiscal years.

I believe this compromise remains true to the intent of the new criteria included in the House-passed version of the bill, while at the same time protecting the interests of states that had already submitted applications for funding.

In addition to work with Senator SPECTER personally, I wrote a letter to the chairman in September alerting him to my concerns, followed by a letter to my colleague from Maine, Senator COLLINS. In addition, last month, I spearheaded a letter with 14 other Senators urging modification of the House construction grant provision to grandfather proposals made by Maine and other states under existing law, so that it would not change the methodology in the middle of the current fiscal year—after applications have been filed; after architectural, engineering, and legal fees have been incurred, and after local matching funds have been appropriated or borrowed by states for these projects.

If the House-passed provision had been enacted without this change, many states veterans homes would have lost their positions for Fiscal Year 2000 grants because these applications would have been judged according to a new set of criteria.

In Maine, this would have jeopardized funding for the entire Maine Veterans Homes system, which earlier this year applied for about \$9.3 million in grant funding, and is seeking to construct new veterans' residential care facilities in Augusta, Bangor, Caribou, and Scarborough. In their applications, the Maine Veterans Home System notes that more than half of Maine's veterans population is reaching the age where long-term nursing care or domiciliary care is typically required. Since 1991, the number of Maine veterans aged 75–79 has doubled, from 6,000 to 12,500. Over the same time period, the numbers of veterans aged 80–84 has doubled from 2,400 to 6,000; and veterans over the age of 85 has increased by 50 percent from 1,200 to 1,800.

I would also like to thank Senator SPECTER for supporting another provision in H.R. 2116 based on legislation I introduced in the Senate, S. 1579, the Veterans Sexual Trauma Treatment Act. S. 1579 extends a VA program that offers counseling and medical treatment to veterans who were sexually

abused while serving in the military, and requires a VA mental health professional to determine when counseling is necessary. Currently, the VA Secretary makes this determination. The bill also calls for the dissemination of information concerning the availability of counseling services to veterans through public service announcements.

According to the Department of Defense, at least 55 percent of active duty women and 14 percent of active duty men have been subjected to sexual harassment. As a member of the Senate Armed Services Committee, I credit the DoD with working to reduce the prevalence of sexual harassment in the military. However, as long as there is harassment in the military, it is vital that victims have access to treatment, and H.R. 2116 provides the tools to do this.

Finally, I would like to commend the Senate and House Veterans' Affairs Committees and the conferees for H.R. 2116 for their efforts to expand a whole range of benefits for veterans in this conference report. For example, the bill expands long-term care for veterans, and will increase home and community-based care and assisted-living options for veterans. It expands mental health services, and requires the VA to enhance specialized services for PTSD and drug abuse disorders. It provides coverage for uninsured veterans who need care but who do not have access to a VA facility. It expands VA authority to provide services to homeless veterans. It improves Montgomery GI bill benefits by providing benefits for students in preparatory courses and to those whose enlistment is interrupted to attend officers training school. And these are just a few of the important provisions in this bill.

Mr. President, this is a strong bill, and I urge my colleagues to join me in a strong show of support.

I yield the floor.

SECTION 207

Mr. SMITH of New Hampshire. Mr. President, I too, would like to recognize Senator SPECTER, for his tremendous work and skillful leadership and sensitivity in bringing the Veterans Millennium Health Care bill (H.R. 2116) to the floor. As a veteran myself, I can assure you that this bill means a great deal in providing for the health and welfare of our veterans both in my state of New Hampshire as well as those veterans throughout the country. I congratulate Senator SPECTER's leadership on issues that are of particular importance to our veteran community.

If I may also ask the senator to clarify the transition clause of Section 207(c) of the bill. Does the Senator mean that provided that state home grant applicants covered by the transition clause follow all applicable laws and regulations in effect on November 10, 1999, that the Secretary of Veterans

Affairs shall award grants to all applications remaining unfunded for fiscal year 1999 priority one projects first, then proceed to awarding grants to priority one projects as outlined and in the order in which they appeared in the Department of Veteran Affairs Fiscal Year 2000 priority list as covered by Section 207(c) of the bill, prior to awarding grants to any other applicants?

Mr. SPECTER. Yes, the Senator is correct. The purpose of this section is to reform the priorities under which state home grant applications are considered so that much needed renovation and maintenance projects will receive more appropriate consideration for funding than under the current system.

I am pleased that we were able to craft a transition provision that balanced the desire to ensure that all states had an opportunity to participate under the old rules, with the desire to implement the new rules as quickly as possible.

Mr. SMITH of New Hampshire. Thank you Mr. Chairman and again I appreciate your consideration and sensitivity to the veteran community. Your leadership on this issue will enable the Veterans Home in Tilton, New Hampshire to better meet the medical needs of veterans in New Hampshire. I yield the floor.

Ms. SNOWE. I commend my colleague, Senator SPECTER, chairman of the Senate Veterans' Affairs Committee, for the remarkably responsive and skillful manner in which he managed the progress of H.R. 2116. This bill means a lot to veterans throughout the nation, and especially in my home state of Maine. I applaud Senator SPECTER's leadership on issues of importance to veterans.

I have only one point of clarification. Does the transition clause of Section 207(c) of the bill mean, that for all state home grant applications covered by the transition clause and otherwise in compliance with applicable law and regulations in effect on November 10, 1999, the Secretary of Veterans Affairs shall award grants first to all unfunded applications remaining for fiscal year 1999 priority one projects? And that following those projects, the Secretary shall next fund those FY 2000 applications and which both meet the criteria set forth in the bill and which were accorded priority one status for FY 2000? And that the Secretary would fund these projects in the order in which they would appear on the fiscal year 2000 priority one list, prior to awarding grants to any other applications?

Mr. SPECTER. Yes, the Senator is correct. The purpose of this section is to reform the priorities under which state home grant applications are considered so that much needed renovation and maintenance projects will receive more appropriate consideration

for funding than under the current system. I am pleased that we were able to craft a transition provision that balanced the desire to ensure that all states had an opportunity to participate under the old rules, with the desire to implement the new rules as quickly as possible.

Ms. SNOWE. I thank the chairman once again, and I yield the floor.

Ms. COLLINS. I ask unanimous consent the conference report be agreed to, the motion to reconsider be laid upon the table, and any statements related to the conference report be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUDAN PEACE ACT

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate proceed to the consideration of Calendar No. 410, S. 1453.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1453) to facilitate famine relief efforts and a comprehensive solution to the war in Sudan,

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Foreign Relations, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

S. 1453

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Sudan Peace Act".

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) With clear indications that the Government of Sudan intends to intensify its prosecution of the war against areas outside of its control, which has already cost nearly 2,000,000 lives and has displaced more than 4,000,000, a sustained and coordinated international effort to pressure combatants to end hostilities and to address the roots of the conflict offers the best opportunity for a comprehensive solution to the continuing war in Sudan.

(2) A viable, comprehensive, and internationally sponsored peace process, protected from manipulation, presents the best chance for a permanent resolution of the war, protection of human rights, and a self-sustaining Sudan.

(3) Continued strengthening of humanitarian relief operations in Sudan is an essential element in the effort to bring an end to the war.

(4) Continued leadership by the United States is critical.

(5) Regardless of the future political status of the areas of Sudan outside of the control of the Government of Sudan, the absence of credible civil authority and institutions is a major impediment to achieving self-sustenance by the Sudanese people and to meaningful progress toward a viable peace process.

(6) Through manipulation of traditional rivalries among peoples in areas outside their full control, the Government of Sudan has effectively used divide and conquer techniques to

subjugate their population, and Congress finds that internationally sponsored reconciliation efforts have played a critical role in reducing the tactic's effectiveness and human suffering.

(7) The Government of Sudan is increasingly utilizing and organizing militias, Popular Defense Forces, and other irregular troops for raiding and slaving parties in areas outside of the control of the Government of Sudan in an effort to severely disrupt the ability of those populations to sustain themselves. The tactic is in addition to the overt use of bans on air transport relief flights in prosecuting the war through selective starvation and to minimize the Government of Sudan's accountability internationally.

(8) The Government of Sudan has repeatedly stated that it intends to use the expected proceeds from future oil sales to increase the tempo and lethality of the war against the areas outside its control.

(9) Through its power to veto plans for air transport flights under the United Nations relief operation, Operation Lifeline Sudan (OLS), the Government of Sudan has been able to manipulate the receipt of food aid by the Sudanese people from the United States and other donor countries as a devastating weapon of war in the ongoing effort by the Government of Sudan to subdue areas of Sudan outside of the Government's control.

(10) The efforts of the United States and other donors in delivering relief and assistance through means outside OLS have played a critical role in addressing the deficiencies in OLS and offset the Government of Sudan's manipulation of food donations to advantage in the civil war in Sudan.

(11) While the immediate needs of selected areas in Sudan facing starvation have been addressed in the near term, the population in areas of Sudan outside of the control of the Government of Sudan are still in danger of extreme disruption of their ability to sustain themselves.

(12) The Nuba Mountains and many areas in Bahr al Ghazal, Upper Nile, and Blue Nile regions have been excluded completely from relief distribution by OLS, consequently placing their populations at increased risk of famine.

(13) At a cost which can exceed \$1,000,000 per day, and with a primary focus on providing only for the immediate food needs of the recipients, the current international relief operations are neither sustainable nor desirable in the long term.

(14) The ability of populations to defend themselves against attack in areas outside the Government of Sudan's control has been severely compromised by the disengagement of the front-line sponsor states, fostering the belief within officials of the Government of Sudan that success on the battlefield can be achieved.

(15) The United States should use all means of pressure available to facilitate a comprehensive solution to the war, including—

(A) the maintenance and multilateralization of sanctions against the Government of Sudan with explicit linkage of those sanctions to peace;

(B) the support or creation of viable democratic civil authority and institutions in areas of Sudan outside government control;

(C) continued active support of people-to-people reconciliation mechanisms and efforts in areas outside of government control;

(D) the strengthening of the mechanisms to provide humanitarian relief to those areas;

(E) cooperation among the trading partners of the United States and within multilateral institutions toward those ends; and

(F) the use of any and all possible unilateral and multilateral economic and diplomatic tools to compel Ethiopia and Eritrea to end their hostilities and again assume a constructive stance

toward facilitating a comprehensive solution to the ongoing war in Sudan.

SEC. 3. DEFINITIONS.

In this Act:

(1) GOVERNMENT OF SUDAN.—The term "Government of Sudan" means the National Islamic Front government in Khartoum, Sudan.

(2) IGAD.—The term "IGAD" means the Inter-Governmental Authority on Development.

(3) OLS.—The term "OLS" means the United Nations relief operation carried out by UNICEF, the World Food Program, and participating relief organizations known as "Operation Lifeline Sudan".

SEC. 4. CONDEMNATION OF SLAVERY, OTHER HUMAN RIGHTS ABUSES, AND NEW TACTICS BY THE GOVERNMENT OF SUDAN.

Congress hereby—

(1) condemns—

(A) violations of human rights on all sides of the conflict in Sudan;

(B) the Government of Sudan's overall human rights record, with regard to both the prosecution of the war and the denial of basic human and political rights to all Sudanese;

(C) the ongoing slave trade in Sudan and the role of the Government of Sudan in abetting and tolerating the practice; and

(D) the Government of Sudan's increasing use and organization of "murahalliin" or "mujahadeen", Popular Defense Forces (PDF), and regular Sudanese Army units into organized and coordinated raiding and slaving parties in Bahr al Ghazal, the Nuba Mountains, Upper Nile, and Blue Nile regions; and

(2) recognizes that, along with selective bans on air transport relief flights by the Government of Sudan, the use of raiding and slaving parties is a tool for creating food shortages and is used as a systematic means to destroy the societies, culture, and economies of the Dinka, Nuer, and Nuba peoples in a policy of low-intensity ethnic cleansing.

SEC. 5. SUPPORT FOR THE IGAD PEACE PROCESS.

(a) SENSE OF CONGRESS.—Congress hereby—

(1) declares its support for the efforts by executive branch officials of the United States and the President's Special Envoy for Sudan to lead in a reinvigoration of the IGAD-sponsored peace process;

(2) calls on IGAD member states, the European Union, the Organization of African Unity, Egypt, and other key states to support the peace process; and

(3) urges Kenya's leadership in the implementation of the process.

(b) RELATION TO UNITED STATES DIPLOMACY.—It is the sense of Congress that any such diplomatic efforts toward resolution of the conflict in Sudan are best made through a peace process based on the Declaration of Principles reached in Nairobi, Kenya, on July 20, 1994, and that the President should not create any process or diplomatic facility or office which could be viewed as a parallel or competing diplomatic track.

(c) UNITED STATES DIPLOMATIC SUPPORT.—The Secretary of State is authorized to utilize the personnel of the Department of State for the support of—

(1) the secretariat of IGAD;

(2) the ongoing negotiations between the Government of Sudan and opposition forces;

(3) any peace settlement planning to be carried out by the National Democratic Alliance and IGAD Partners' Forum (IPF); and

(4) other United States diplomatic efforts supporting a peace process in Sudan.

SEC. 6. INCREASED PRESSURE ON COMBATANTS.

It is the sense of Congress that the President, acting through the United States Permanent Representative to the United Nations, should—

(1) sponsor a resolution in the United Nations Security Council to investigate the practice of

slavery in Sudan and provide recommendations on measures for its eventual elimination;

(2) sponsor a condemnation of the human rights practices of the Government of Sudan at the United Nations conference on human rights in Geneva in 2000;

(3) press for implementation of the recommendations of the United Nations Special Rapporteur for Sudan with respect to human rights monitors in areas of conflict in Sudan;

(4) press for UNICEF, International Committee of the Red Cross, or the International Federation of Red Cross and Red Crescent Societies, or other appropriate international organizations or agencies to maintain a registry of those individuals who have been abducted or are otherwise held in bondage or servitude in Sudan;

(5) sponsor a condemnation of the Government of Sudan each time it subjects civilian populations to aerial bombardment; and

(6) sponsor a resolution in the United Nations General Assembly condemning the human rights practices of the Government of Sudan.

SEC. 7. REPORTING REQUIREMENT.

Beginning 3 months after the date of enactment of this Act, and every 3 months thereafter, the President shall submit a report to Congress on—

(1) the specific sources and current status of Sudan's financing and construction of oil exploitation infrastructure and pipelines;

(2) the extent to which that financing was secured in the United States or with involvement of United States citizens;

(3) such financing's relation to the sanctions described in subsection (a) and the Executive Order of November 3, 1997;

(4) the extent of aerial bombardment by the Government of Sudan forces in areas outside its control, including targets, frequency, and best estimates of damage;

(5) the number, duration, and locations of air strips or other humanitarian relief facilities to which access is denied by any party to the conflict; and

(6) the status of the IGAD-sponsored peace process and any other ongoing effort to end the conflict, including the specific and verifiable steps taken by parties to the conflict, the members of the IGAD Partners Forum, and the members of IGAD toward a comprehensive solution to the war.

SEC. 8. REFORM OF OPERATION LIFELINE SUDAN (OLS).

It is the sense of Congress that the President should organize and maintain a formal consultative process with the European Union, its member states, the members of the United Nations Security Council, and other relevant parties on coordinating an effort within the United Nations to revise the terms of OLS to end the veto power of the Government of Sudan over the plans by OLS for air transport relief flights.

SEC. 9. CONTINUED USE OF NON-OLS ORGANIZATIONS FOR RELIEF EFFORTS.

(a) FINDING.—Congress recognizes the progress made by officials of the executive branch of Government toward greater utilization of non-OLS agencies for more effective distribution of United States relief contributions.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the President should continue to increase the use of non-OLS agencies in the distribution of relief supplies in southern Sudan.

(c) REPORT.—Not later than 90 days after the date of enactment of this Act, the President shall submit a detailed report to Congress describing the progress made toward carrying out subsection (b).

SEC. 10. CONTINGENCY PLAN FOR ANY BAN ON AIR TRANSPORT RELIEF FLIGHTS.

(a) PLAN.—The President shall develop a detailed and implementable contingency plan to

provide, outside United Nations auspices, the greatest possible amount of United States Government and privately donated relief to all affected areas in Sudan, including the Nuba Mountains, Upper Nile, and Blue Nile, in the event the Government of Sudan imposes a total, partial, or incremental ban on OLS air transport relief flights.

(b) ELEMENT OF PLAN.—The plan developed under subsection (a) shall include coordination of other donors in addition to the United States Government and private institutions.

(c) REPORT.—Not later than 2 months after the date of enactment of this Act, the President shall submit a classified report to Congress on the costs and startup time such a plan would require in the event of a total ban on air transport relief flights or in the event of a partial or incremental ban on such flights if the President has made the determination required by subsection (a)(2).

(d) REPROGRAMMING AUTHORITY.—Notwithstanding any other provision of law, in carrying out the plan developed under subsection (a), the President may reprogram up to 100 percent of the funds available for support of OLS operations (but for this subsection) for the purposes of the plan.

SEC. 11. NEW AUTHORITY FOR USAID'S SUDAN TRANSITION ASSISTANCE FOR REHABILITATION (STAR) PROGRAM.

(a) SENSE OF CONGRESS.—Congress hereby expresses its support for the President's ongoing efforts to diversify and increase effectiveness of United States assistance to populations in areas of Sudan outside of the control of the Government of Sudan, especially the long-term focus shown in the Sudan Transition Assistance for Rehabilitation (STAR) program with its emphasis on promoting future democratic governance, rule of law, building indigenous institutional capacity, promoting and enhancing self-reliance, and actively supporting people-to-people reconciliation efforts.

(b) ALLOCATION OF FUNDS.—Of the amounts made available to carry out chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 et seq.; relating to development assistance) for the period beginning on October 1, 2000, and ending on September 30, 2003, \$16,000,000 shall be available for development of a viable civil authority, and civil and commercial institutions, in Sudan, including the provision of technical assistance, and for people-to-people reconciliation efforts.

(c) ADDITIONAL AUTHORITIES.—Notwithstanding any other provision of law, the President is granted authority to undertake any appropriate programs using Federal agencies, contractual arrangements, or direct support of indigenous groups, agencies, or organizations in areas outside of control of the Government of Sudan in an effort to provide emergency relief, promote economic self-sufficiency, build civil authority, provide education, enhance rule of law and the development of judicial and legal frameworks, support people-to-people reconciliation efforts, or implementation of any programs in support of any viable peace agreement at the local, regional, or national level.

(d) IMPLEMENTATION.—It is the sense of Congress that the President should immediately and to the fullest extent possible utilize the Office of Transition Initiatives at the Agency for International Development in an effort to pursue the type of programs described in subsection (c).

(e) SENSE OF CONGRESS.—It is the sense of Congress that enhancing and supporting education and the development of rule of law are critical elements in the long-term success of United States efforts to promote a viable economic, political, social, and legal basis for development in Sudan. Congress recognizes that the gap of 13–16 years without secondary edu-

cational opportunities in southern Sudan is an especially important problem to address with respect to rebuilding and sustaining leaders and educators for the next generation of Sudanese. Congress recognizes the unusually important role the secondary school in Rumbek has played in producing the current generation of leaders in southern Sudan, and that priority should be given in current and future development or transition programs undertaken by the United States Government to rebuilding and supporting the Rumbek Secondary School.

(f) PROGRAMS IN AREAS OUTSIDE GOVERNMENT CONTROL.—Congress also intends that such programs include cooperation and work with indigenous groups in areas outside of government control in all of Sudan, to include northern, southern, and eastern regions of Sudan.

SEC. 12. ASSESSMENT AND PLANNING FOR NUBA MOUNTAINS AND OTHER AREAS SUBJECT TO BANS ON AIR TRANSPORT RELIEF FLIGHTS.

(a) FINDING.—Congress recognizes that civilians in the Nuba Mountains, Red Sea Hills, and Blue Nile regions of Sudan are not receiving assistance through OLS due to restrictions by the Government of Sudan.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the President should—

(1) conduct comprehensive assessment of the humanitarian needs in the Nuba Mountains, Red Sea Hills, and Blue Nile regions of Sudan;

(2) respond appropriately to those needs based on such assessment; and

(3) report to Congress on an annual basis on efforts made under paragraph (2).

SEC. 13. OPTIONS OR PLANS FOR NONLETHAL ASSISTANCE FOR NATIONAL DEMOCRATIC ALLIANCE PARTICIPANTS.

(a) REPORT.—Not later than 90 days after the date of enactment of this Act, the President shall submit to the appropriate congressional committees a report, in classified form if necessary, detailing possible options or plans of the United States Government for the provision of nonlethal assistance to participants of the National Democratic Alliance.

(b) CONSULTATIONS.—Not later than 30 days after submission of the report required by subsection (a), the President should begin formal consultations with the appropriate congressional committees regarding the findings of the report.

(c) DEFINITION.—In this section, the term "appropriate congressional committees" means the Committee on Foreign Relations and the Committee on Appropriations of the Senate and the Committee on International Relations and the Committee on Appropriations of the House of Representatives.

Ms. COLLINS. I ask unanimous consent the committee substitute amendment be agreed to, the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 1453), as amended, was read the third time and passed, as follows:

S. 1453

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Sudan Peace Act".

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) With clear indications that the Government of Sudan intends to intensify its prosecution of the war against areas outside of its control, which has already cost nearly 2,000,000 lives and has displaced more than 4,000,000, a sustained and coordinated international effort to pressure combatants to end hostilities and to address the roots of the conflict offers the best opportunity for a comprehensive solution to the continuing war in Sudan.

(2) A viable, comprehensive, and internationally sponsored peace process, protected from manipulation, presents the best chance for a permanent resolution of the war, protection of human rights, and a self-sustaining Sudan.

(3) Continued strengthening of humanitarian relief operations in Sudan is an essential element in the effort to bring an end to the war.

(4) Continued leadership by the United States is critical.

(5) Regardless of the future political status of the areas of Sudan outside of the control of the Government of Sudan, the absence of credible civil authority and institutions is a major impediment to achieving self-sustenance by the Sudanese people and to meaningful progress toward a viable peace process.

(6) Through manipulation of traditional rivalries among peoples in areas outside their full control, the Government of Sudan has effectively used divide and conquer techniques to subjugate their population, and Congress finds that internationally sponsored reconciliation efforts have played a critical role in reducing the tactic's effectiveness and human suffering.

(7) The Government of Sudan is increasingly utilizing and organizing militias, Popular Defense Forces, and other irregular troops for raiding and slaving parties in areas outside of the control of the Government of Sudan in an effort to severely disrupt the ability of those populations to sustain themselves. The tactic is in addition to the overt use of bans on air transport relief flights in prosecuting the war through selective starvation and to minimize the Government of Sudan's accountability internationally.

(8) The Government of Sudan has repeatedly stated that it intends to use the expected proceeds from future oil sales to increase the tempo and lethality of the war against the areas outside its control.

(9) Through its power to veto plans for air transport flights under the United Nations relief operation, Operation Lifeline Sudan (OLS), the Government of Sudan has been able to manipulate the receipt of food aid by the Sudanese people from the United States and other donor countries as a devastating weapon of war in the ongoing effort by the Government of Sudan to subdue areas of Sudan outside of the Government's control.

(10) The efforts of the United States and other donors in delivering relief and assistance through means outside OLS have played a critical role in addressing the deficiencies in OLS and offset the Government of Sudan's manipulation of food donations to advantage in the civil war in Sudan.

(11) While the immediate needs of selected areas in Sudan facing starvation have been addressed in the near term, the population in areas of Sudan outside of the control of the Government of Sudan are still in danger of extreme disruption of their ability to sustain themselves.

(12) The Nuba Mountains and many areas in Bahr al Ghazal, Upper Nile, and Blue Nile

regions have been excluded completely from relief distribution by OLS, consequently placing their populations at increased risk of famine.

(13) At a cost which can exceed \$1,000,000 per day, and with a primary focus on providing only for the immediate food needs of the recipients, the current international relief operations are neither sustainable nor desirable in the long term.

(14) The ability of populations to defend themselves against attack in areas outside the Government of Sudan's control has been severely compromised by the disengagement of the front-line sponsor states, fostering the belief within officials of the Government of Sudan that success on the battlefield can be achieved.

(15) The United States should use all means of pressure available to facilitate a comprehensive solution to the war, including—

(A) the maintenance and multilateralization of sanctions against the Government of Sudan with explicit linkage of those sanctions to peace;

(B) the support or creation of viable democratic civil authority and institutions in areas of Sudan outside government control;

(C) continued active support of people-to-people reconciliation mechanisms and efforts in areas outside of government control;

(D) the strengthening of the mechanisms to provide humanitarian relief to those areas;

(E) cooperation among the trading partners of the United States and within multilateral institutions toward those ends; and

(F) the use of any and all possible unilateral and multilateral economic and diplomatic tools to compel Ethiopia and Eritrea to end their hostilities and again assume a constructive stance toward facilitating a comprehensive solution to the ongoing war in Sudan.

SEC. 3. DEFINITIONS.

In this Act:

(1) GOVERNMENT OF SUDAN.—The term "Government of Sudan" means the National Islamic Front government in Khartoum, Sudan.

(2) IGAD.—The term "IGAD" means the Inter-Governmental Authority on Development.

(3) OLS.—The term "OLS" means the United Nations relief operation carried out by UNICEF, the World Food Program, and participating relief organizations known as "Operation Lifeline Sudan".

SEC. 4. CONDEMNATION OF SLAVERY, OTHER HUMAN RIGHTS ABUSES, AND NEW TACTICS BY THE GOVERNMENT OF SUDAN.

Congress hereby—

(1) condemns—

(A) violations of human rights on all sides of the conflict in Sudan;

(B) the Government of Sudan's overall human rights record, with regard to both the prosecution of the war and the denial of basic human and political rights to all Sudanese;

(C) the ongoing slave trade in Sudan and the role of the Government of Sudan in abetting and tolerating the practice; and

(D) the Government of Sudan's increasing use and organization of "murahalliin" or "mujahadeen", Popular Defense Forces (PDF), and regular Sudanese Army units into organized and coordinated raiding and slaving parties in Bahr al Ghazal, the Nuba Mountains, Upper Nile, and Blue Nile regions; and

(2) recognizes that, along with selective bans on air transport relief flights by the

Government of Sudan, the use of raiding and slaving parties is a tool for creating food shortages and is used as a systematic means to destroy the societies, culture, and economies of the Dinka, Nuer, and Nuba peoples in a policy of low-intensity ethnic cleansing.

SEC. 5. SUPPORT FOR THE IGAD PEACE PROCESS.

(a) SENSE OF CONGRESS.—Congress hereby—

(1) declares its support for the efforts by executive branch officials of the United States and the President's Special Envoy for Sudan to lead in a reinvigoration of the IGAD-sponsored peace process;

(2) calls on IGAD member states, the European Union, the Organization of African Unity, Egypt, and other key states to support the peace process; and

(3) urges Kenya's leadership in the implementation of the process.

(b) RELATION TO UNITED STATES DIPLOMACY.—It is the sense of Congress that any such diplomatic efforts toward resolution of the conflict in Sudan are best made through a peace process based on the Declaration of Principles reached in Nairobi, Kenya, on July 20, 1994, and that the President should not create any process or diplomatic facility or office which could be viewed as a parallel or competing diplomatic track.

(c) UNITED STATES DIPLOMATIC SUPPORT.—The Secretary of State is authorized to utilize the personnel of the Department of State for the support of—

(1) the secretariat of IGAD;

(2) the ongoing negotiations between the Government of Sudan and opposition forces;

(3) any peace settlement planning to be carried out by the National Democratic Alliance and IGAD Partners' Forum (IPF); and

(4) other United States diplomatic efforts supporting a peace process in Sudan.

SEC. 6. INCREASED PRESSURE ON COMBATANTS.

It is the sense of Congress that the President, acting through the United States Permanent Representative to the United Nations, should—

(1) sponsor a resolution in the United Nations Security Council to investigate the practice of slavery in Sudan and provide recommendations on measures for its eventual elimination;

(2) sponsor a condemnation of the human rights practices of the Government of Sudan at the United Nations conference on human rights in Geneva in 2000;

(3) press for implementation of the recommendations of the United Nations Special Rapporteur for Sudan with respect to human rights monitors in areas of conflict in Sudan;

(4) press for UNICEF, International Committee of the Red Cross, or the International Federation of Red Cross and Red Crescent Societies, or other appropriate international organizations or agencies to maintain a registry of those individuals who have been abducted or are otherwise held in bondage or servitude in Sudan;

(5) sponsor a condemnation of the Government of Sudan each time it subjects civilian populations to aerial bombardment; and

(6) sponsor a resolution in the United Nations General Assembly condemning the human rights practices of the Government of Sudan.

SEC. 7. REPORTING REQUIREMENT.

Beginning 3 months after the date of enactment of this Act, and every 3 months thereafter, the President shall submit a report to Congress on—

(1) the specific sources and current status of Sudan's financing and construction of oil exploitation infrastructure and pipelines;

(2) the extent to which that financing was secured in the United States or with involvement of United States citizens;

(3) such financing's relation to the sanctions described in subsection (a) and the Executive Order of November 3, 1997;

(4) the extent of aerial bombardment by the Government of Sudan forces in areas outside its control, including targets, frequency, and best estimates of damage;

(5) the number, duration, and locations of air strips or other humanitarian relief facilities to which access is denied by any party to the conflict; and

(6) the status of the IGAD-sponsored peace process and any other ongoing effort to end the conflict, including the specific and verifiable steps taken by parties to the conflict, the members of the IGAD Partners Forum, and the members of IGAD toward a comprehensive solution to the war.

SEC. 8. REFORM OF OPERATION LIFELINE SUDAN (OLS).

It is the sense of Congress that the President should organize and maintain a formal consultative process with the European Union, its member states, the members of the United Nations Security Council, and other relevant parties on coordinating an effort within the United Nations to revise the terms of OLS to end the veto power of the Government of Sudan over the plans by OLS for air transport relief flights.

SEC. 9. CONTINUED USE OF NON-OLS ORGANIZATIONS FOR RELIEF EFFORTS.

(a) **FINDING.**—Congress recognizes the progress made by officials of the executive branch of Government toward greater utilization of non-OLS agencies for more effective distribution of United States relief contributions.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that the President should continue to increase the use of non-OLS agencies in the distribution of relief supplies in southern Sudan.

(c) **REPORT.**—Not later than 90 days after the date of enactment of this Act, the President shall submit a detailed report to Congress describing the progress made toward carrying out subsection (b).

SEC. 10. CONTINGENCY PLAN FOR ANY BAN ON AIR TRANSPORT RELIEF FLIGHTS.

(a) **PLAN.**—The President shall develop a detailed and implementable contingency plan to provide, outside United Nations auspices, the greatest possible amount of United States Government and privately donated relief to all affected areas in Sudan, including the Nuba Mountains, Upper Nile, and Blue Nile, in the event the Government of Sudan imposes a total, partial, or incremental ban on OLS air transport relief flights.

(b) **ELEMENT OF PLAN.**—The plan developed under subsection (a) shall include coordination of other donors in addition to the United States Government and private institutions.

(c) **REPORT.**—Not later than 2 months after the date of enactment of this Act, the President shall submit a classified report to Congress on the costs and startup time such a plan would require in the event of a total ban on air transport relief flights or in the event of a partial or incremental ban on such flights if the President has made the determination required by subsection (a)(2).

(d) **REPROGRAMMING AUTHORITY.**—Notwithstanding any other provision of law, in carrying out the plan developed under subsection (a), the President may reprogram up to 100 percent of the funds available for support of OLS operations (but for this subsection) for the purposes of the plan.

SEC. 11. NEW AUTHORITY FOR USAID'S SUDAN TRANSITION ASSISTANCE FOR REHABILITATION (STAR) PROGRAM.

(a) **SENSE OF CONGRESS.**—Congress hereby expresses its support for the President's on-

going efforts to diversify and increase effectiveness of United States assistance to populations in areas of Sudan outside of the control of the Government of Sudan, especially the long-term focus shown in the Sudan Transition Assistance for Rehabilitation (STAR) program with its emphasis on promoting future democratic governance, rule of law, building indigenous institutional capacity, promoting and enhancing self-reliance, and actively supporting people-to-people reconciliation efforts.

(b) **ALLOCATION OF FUNDS.**—Of the amounts made available to carry out chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 et seq., relating to development assistance) for the period beginning on October 1, 2000, and ending on September 30, 2003, \$16,000,000 shall be available for development of a viable civil authority, and civil and commercial institutions, in Sudan, including the provision of technical assistance, and for people-to-people reconciliation efforts.

(c) **ADDITIONAL AUTHORITIES.**—Notwithstanding any other provision of law, the President is granted authority to undertake any appropriate programs using Federal agencies, contractual arrangements, or direct support of indigenous groups, agencies, or organizations in areas outside of control of the Government of Sudan in an effort to provide emergency relief, promote economic self-sufficiency, build civil authority, provide education, enhance rule of law and the development of judicial and legal frameworks, support people-to-people reconciliation efforts, or implementation of any programs in support of any viable peace agreement at the local, regional, or national level.

(d) **IMPLEMENTATION.**—It is the sense of Congress that the President should immediately and to the fullest extent possible utilize the Office of Transition Initiatives at the Agency for International Development in an effort to pursue the type of programs described in subsection (c).

(e) **SENSE OF CONGRESS.**—It is the sense of Congress that enhancing and supporting education and the development of rule of law are critical elements in the long-term success of United States efforts to promote a viable economic, political, social, and legal basis for development in Sudan. Congress recognizes that the gap of 13–16 years without secondary educational opportunities in southern Sudan is an especially important problem to address with respect to rebuilding and sustaining leaders and educators for the next generation of Sudanese. Congress recognizes the unusually important role the secondary school in Rumbek has played in producing the current generation of leaders in southern Sudan, and that priority should be given in current and future development or transition programs undertaken by the United States Government to rebuilding and supporting the Rumbek Secondary School.

(f) **PROGRAMS IN AREAS OUTSIDE GOVERNMENT CONTROL.**—Congress also intends that such programs include cooperation and work with indigenous groups in areas outside of government control in all of Sudan, to include northern, southern, and eastern regions of Sudan.

SEC. 12. ASSESSMENT AND PLANNING FOR NUBA MOUNTAINS AND OTHER AREAS SUBJECT TO BANS ON AIR TRANSPORT RELIEF FLIGHTS.

(a) **FINDING.**—Congress recognizes that civilians in the Nuba Mountains, Red Sea Hills, and Blue Nile regions of Sudan are not receiving assistance through OLS due to restrictions by the Government of Sudan.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that the President should—

(1) conduct comprehensive assessment of the humanitarian needs in the Nuba Mountains, Red Sea Hills, and Blue Nile regions of Sudan;

(2) respond appropriately to those needs based on such assessment; and

(3) report to Congress on an annual basis on efforts made under paragraph (2).

SEC. 13. OPTIONS OR PLANS FOR NONLETHAL ASSISTANCE FOR NATIONAL DEMOCRATIC ALLIANCE PARTICIPANTS.

(a) **REPORT.**—Not later than 90 days after the date of enactment of this Act, the President shall submit to the appropriate congressional committees a report, in classified form if necessary, detailing possible options or plans of the United States Government for the provision of nonlethal assistance to participants of the National Democratic Alliance.

(b) **CONSULTATIONS.**—Not later than 30 days after submission of the report required by subsection (a), the President should begin formal consultations with the appropriate congressional committees regarding the findings of the report.

(c) **DEFINITION.**—In this section, the term "appropriate congressional committees" means the Committee on Foreign Relations and the Committee on Appropriations of the Senate and the Committee on International Relations and the Committee on Appropriations of the House of Representatives.

REAUTHORIZING THE COASTAL WETLANDS PLANNING, PROTECTION AND RESTORATION ACT

Ms. COLLINS. Mr. President, I now ask unanimous consent the Senate proceed to the consideration of Calendar No. 328, S. 1119.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1119) to amend the act of August 9, 1950, to continue funding for the Coastal Wetlands Planning, Protection and Restoration Act.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1119) was read the third time and passed, as follows:

S. 1119

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FUNDING OF THE COASTAL WETLANDS PLANNING, PROTECTION AND RESTORATION ACT.

Section 4(a) of the Act of August 9, 1950 (16 U.S.C. 777c(a)), is amended in the second sentence by striking "1999" and inserting "2009".

HOLDING OF COURT AT NATCHEZ, MISSISSIPPI, IN THE SAME MANNER AS COURT IS HELD AT VICKSBURG, MISSISSIPPI

Ms. COLLINS. Mr. President, I now ask unanimous consent the Chair lay

before the Senate a message from the House to accompany S. 1418.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

Resolved, That the bill from the Senate (S. 1418) entitled "An Act to provide for the holding of court at Natchez, Mississippi, in the same manner as court is held at Vicksburg, Mississippi, and for other purposes," do pass with the following amendment:

Strike out all after the enacting clause and insert:

SECTION 1. HOLDING OF COURT AT NATCHEZ, MISSISSIPPI.

Section 104(b)(3) of title 28, United States Code, is amended in the second sentence by striking all beginning with the colon through "United States".

SEC. 2. HOLDING OF COURT AT WHEATON, ILLINOIS.

Section 93(a)(1) of title 28, United States Code, is amended by adding after Chicago "and Wheaton".

Ms. COLLINS. I ask unanimous consent the Senate agree to the amendment of the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDING THE CONGRESSIONAL BUDGET ACT OF 1974

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate proceed to the consideration of H.R. 3257, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3257) to amend the Congressional Budget Act of 1974 to assist the Congressional Budget Office with the scoring of State and local mandates.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3257) was read the third time and passed.

COMMUNICATIONS SATELLITE COMPETITION AND PRIVATIZATION ACT OF 1999

Ms. COLLINS. Mr. President, I ask the Chair lay before the Senate a message from the House of Representatives on the bill (S. 376) to amend the Communications Satellite Act of 1962 to promote competition and privatization in satellite communications, and for other purposes.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 376) entitled "An Act to amend the Communications Satellite Act of 1962 to promote competition and privatization in satellite

communications, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Communications Satellite Competition and Privatization Act of 1999".

SEC. 2. PURPOSE.

It is the purpose of this Act to promote a fully competitive global market for satellite communication services for the benefit of consumers and providers of satellite services and equipment by fully privatizing the intergovernmental satellite organizations, INTELSAT and Inmarsat.

SEC. 3. REVISION OF COMMUNICATIONS SATELLITE ACT OF 1962.

The Communications Satellite Act of 1962 (47 U.S.C. 101) is amended by adding at the end the following new title:

"TITLE VI—COMMUNICATIONS COMPETITION AND PRIVATIZATION

"Subtitle A—Actions To Ensure Procompetitive Privatization

"SEC. 601. FEDERAL COMMUNICATIONS COMMISSION LICENSING.

"(a) LICENSING FOR SEPARATED ENTITIES.—

"(1) COMPETITION TEST.—The Commission may not issue a license or construction permit to any separated entity, or renew or permit the assignment or use of any such license or permit, or authorize the use by any entity subject to United States jurisdiction of any space segment owned, leased, or operated by any separated entity, unless the Commission determines that such issuance, renewal, assignment, or use will not harm competition in the telecommunications market of the United States. If the Commission does not make such a determination, it shall deny or revoke authority to use space segment owned, leased, or operated by the separated entity to provide services to, from, or within the United States.

"(2) CRITERIA FOR COMPETITION TEST.—In making the determination required by paragraph (1), the Commission shall use the licensing criteria in sections 621 and 623, and shall not make such a determination unless the Commission determines that the privatization of any separated entity is consistent with such criteria.

"(b) LICENSING FOR INTELSAT, INMARSAT, AND SUCCESSOR ENTITIES.—

"(1) COMPETITION TEST.—The Commission shall substantially limit, deny, or revoke the authority for any entity subject to United States jurisdiction to use space segment owned, leased, or operated by INTELSAT or Inmarsat or any successor entities to provide non-core services to, from, or within the United States, unless the Commission determines—

"(A) after April 1, 2001, in the case of INTELSAT and its successor entities, that INTELSAT and any successor entities have been privatized in a manner that will not harm competition in the telecommunications markets of the United States; or

"(B) after April 1, 2000, in the case of Inmarsat and its successor entities, that Inmarsat and any successor entities have been privatized in a manner that will not harm competition in the telecommunications markets of the United States.

"(2) CRITERIA FOR COMPETITION TEST.—In making the determination required by paragraph (1), the Commission shall use the licensing criteria in sections 621, 622, and 624, and shall not make such a determination unless the Commission determines that such privatization is consistent with such criteria.

"(3) CLARIFICATION: COMPETITIVE SAFEGUARDS.—In making its licensing decisions under this subsection, the Commission shall con-

sider whether users of non-core services provided by INTELSAT or Inmarsat or successor or separated entities are able to obtain non-core services from providers offering services other than through INTELSAT or Inmarsat or successor or separated entities, at competitive rates, terms, or conditions. Such consideration shall also include whether such licensing decisions would require users to replace equipment at substantial costs prior to the termination of its design life. In making its licensing decisions, the Commission shall also consider whether competitive alternatives in individual markets do not exist because they have been foreclosed due to anticompetitive actions undertaken by or resulting from the INTELSAT or Inmarsat systems. Such licensing decisions shall be made in a manner which facilitates achieving the purposes and goals in this title and shall be subject to notice and comment.

"(c) ADDITIONAL CONSIDERATIONS IN DETERMINATIONS.—In making its determinations and licensing decisions under subsections (a) and (b), the Commission shall take into consideration the United States obligations and commitments for satellite services under the Fourth Protocol to the General Agreement on Trade in Services.

"(d) INDEPENDENT FACILITIES COMPETITION.—Nothing in this section shall be construed as precluding COMSAT from investing in or owning satellites or other facilities independent from INTELSAT and Inmarsat, and successor or separated entities, or from providing services through reselling capacity over the facilities of satellite systems independent from INTELSAT and Inmarsat, and successor or separated entities. This subsection shall not be construed as restricting the types of contracts which can be executed or services which may be provided by COMSAT over the independent satellites or facilities described in this subsection.

"SEC. 602. INTELSAT OR INMARSAT ORBITAL LOCATIONS.

"(a) REQUIRED ACTIONS.—Unless, in a proceeding under section 601(b), the Commission determines that INTELSAT or Inmarsat have been privatized in a manner that will not harm competition, then—

"(1) the President shall oppose, and the Commission shall not assist, any registration for new orbital locations for INTELSAT or Inmarsat—

"(A) with respect to INTELSAT, after April 1, 2001; and

"(B) with respect to Inmarsat, after April 1, 2000; and

"(2) the President and Commission shall, consistent with the deadlines in paragraph (1), take all other necessary measures to preclude procurement, registration, development, or use of new satellites which would provide non-core services.

"(b) EXCEPTION.—

"(1) REPLACEMENT AND PREVIOUSLY CONTRACTED SATELLITES.—Subsection (a) shall not apply to—

"(A) orbital locations for replacement satellites (as described in section 622(2)(B)); and

"(B) orbital locations for satellites that are contracted for as of March 25, 1998, if such satellites do not provide additional services.

"(2) LIMITATION ON EXCEPTION.—Paragraph (1) is available only with respect to satellites designed to provide services solely in the C and Ku for INTELSAT, and L for Inmarsat bands.

"SEC. 603. ADDITIONAL SERVICES AUTHORIZED.

"(a) SERVICES AUTHORIZED DURING CONTINUED PROGRESS.—

"(1) CONTINUED AUTHORIZATION.—The Commission may issue an authorization, license, or permit to, or renew the license or permit of, any provider of services using INTELSAT or Inmarsat space segment, or authorize the use of

such space segment, for additional services (including additional applications of existing services) or additional areas of business, subject to the requirements of this section.

“(2) **ADDITIONAL SERVICES PERMITTED UNDER NEW CONTRACTS UNLESS PROGRESS FAILS.**—If the Commission makes a finding under subsection (b) that conditions required by such subsection have not been attained, the Commission may not, pursuant to paragraph (1), permit such additional services to be provided directly or indirectly under new contracts for the use of INTELSAT or Inmarsat space segment, unless and until the Commission subsequently makes a finding under such subsection that such conditions have been attained.

“(3) **PREVENTION OF EVASION.**—The Commission shall, by rule, prescribe means reasonably designed to prevent evasions of the limitations contained in paragraph (2) by customers who did not use specific additional services as of the date of the Commission's most recent finding under subsection (b) that the conditions of such subsection have not been obtained.

“(b) **REQUIREMENTS FOR ANNUAL FINDINGS.**—

“(1) **GENERAL REQUIREMENTS.**—The findings required under this subsection shall be made, after notice and comment, on or before January 1 of 2000, 2001, and 2002. The Commission shall find that the conditions required by this subsection have been attained only if the Commission finds that—

“(A) substantial and material progress has been made during the preceding period at a rate and manner that is probable to result in achieving pro-competitive privatizations in accordance with the requirements of this title; and

“(B) neither INTELSAT nor Inmarsat are hindering competitors' or potential competitors' access to the satellite services marketplace.

“(2) **FIRST FINDING.**—In making the finding required to be made on or before January 1, 2000, the Commission shall not find that the conditions required by this subsection have been attained unless the Commission finds that—

“(A) COMSAT has submitted to the INTELSAT Board of Governors a resolution calling for the pro-competitive privatization of INTELSAT in accordance with the requirements of this title;

“(B) the United States has submitted such resolution at the first INTELSAT Assembly of Parties meeting that takes place after such date of enactment; and

“(C) the INTELSAT Assembly of Parties has created a working party to consider and make recommendations for the pro-competitive privatization of INTELSAT consistent with such resolution.

“(3) **SECOND ANNUAL FINDING.**—In making the finding required to be made on or before January 1, 2001, the Commission shall not find that the conditions required by this subsection have been attained unless the INTELSAT Assembly of Parties has approved a recommendation for the pro-competitive privatization of INTELSAT in accordance with the requirements of this title.

“(4) **THIRD ANNUAL FINDING.**—In making the finding required to be made on or before January 1, 2002, the Commission shall not find that the conditions required by this subsection have been attained unless the pro-competitive privatization of INTELSAT in accordance with the requirements of this title has been achieved by such date.

“(5) **CRITERIA FOR EVALUATION OF HINDERING ACCESS.**—The Commission shall not make a determination under paragraph (1)(B) unless the Commission determines that INTELSAT and Inmarsat are not in any way impairing, delaying, or denying access to national markets or orbital locations.

“(c) **EXCEPTION FOR SERVICES UNDER EXISTING CONTRACTS IF PROGRESS NOT MADE.**—This

section shall not preclude INTELSAT or Inmarsat or any signatory thereof from continuing to provide additional services under an agreement with any third party entered into prior to any finding under subsection (b) that the conditions of such subsection have not been attained.

“Subtitle B—Federal Communications Commission Licensing Criteria: Privatization Criteria

“SEC. 621. GENERAL CRITERIA TO ENSURE A PRO-COMPETITIVE PRIVATIZATION OF INTELSAT AND INMARSAT.

“The President and the Commission shall secure a pro-competitive privatization of INTELSAT and Inmarsat that meets the criteria set forth in this section and sections 622 through 624. In securing such privatizations, the following criteria shall be applied as licensing criteria for purposes of subtitle A:

“(1) **DATES FOR PRIVATIZATION.**—Privatization shall be obtained in accordance with the criteria of this title of—

“(A) INTELSAT as soon as practicable, but no later than April 1, 2001; and

“(B) Inmarsat as soon as practicable, but no later than April 1, 2000.

“(2) **INDEPENDENCE.**—The successor entities and separated entities of INTELSAT and Inmarsat resulting from the privatization obtained pursuant to paragraph (1) shall—

“(A) be entities that are national corporations; and

“(B) have ownership and management that is independent of—

“(i) any signatories or former signatories that control access to national telecommunications markets; and

“(ii) any intergovernmental organization remaining after the privatization.

“(3) **TERMINATION OF PRIVILEGES AND IMMUNITIES.**—The preferential treatment of INTELSAT and Inmarsat shall not be extended to any successor entity or separated entity of INTELSAT or Inmarsat. Such preferential treatment includes—

“(A) privileged or immune treatment by national governments;

“(B) privileges or immunities or other competitive advantages of the type accorded INTELSAT and Inmarsat and their signatories through the terms and operation of the INTELSAT Agreement and the associated Headquarters Agreement and the Inmarsat Convention; and

“(C) preferential access to orbital locations, including any access to orbital locations that is not subject to the legal or regulatory processes of a national government that applies due diligence requirements intended to prevent the warehousing of orbital locations.

“(4) **PREVENTION OF EXPANSION DURING TRANSITION.**—During the transition period prior to full privatization, INTELSAT and Inmarsat shall be precluded from expanding into additional services (including additional applications of existing services) or additional areas of business.

“(5) **CONVERSION TO STOCK CORPORATIONS.**—Any successor entity or separated entity created out of INTELSAT or Inmarsat shall be a national corporation established through the execution of an initial public offering as follows:

“(A) Any successor entities and separated entities shall be incorporated as private corporations subject to the laws of the nation in which incorporated.

“(B) An initial public offering of securities of any successor entity or separated entity shall be conducted no later than—

“(i) April 1, 2001, for the successor entities of INTELSAT; and

“(ii) April 1, 2000, for the successor entities of Inmarsat.

“(C) The shares of any successor entities and separated entities shall be listed for trading on

one or more major stock exchanges with transparent and effective securities regulation.

“(D) A majority of the board of directors of any successor entity or separated entity shall not be subject to selection or appointment by, or otherwise serve as representatives of—

“(i) any signatory or former signatory that controls access to national telecommunications markets; or

“(ii) any intergovernmental organization remaining after the privatization.

“(E) Any transactions or other relationships between or among any successor entity, separated entity, INTELSAT, or Inmarsat shall be conducted on an arm's length basis.

“(6) **REGULATORY TREATMENT.**—Any successor entity or separated entity shall apply through the appropriate national licensing authorities for international frequency assignments and associated orbital registrations for all satellites.

“(7) **COMPETITION POLICIES IN DOMICILIARY COUNTRY.**—Any successor entity or separated entity shall be incorporated and headquartered in a nation or nations that—

“(A) have effective laws and regulations that secure competition in telecommunications services;

“(B) are signatories of the World Trade Organization Basic Telecommunications Services Agreement; and

“(C) have a schedule of commitments in such Agreement that includes non-discriminatory market access to their satellite markets.

“(8) **RETURN OF UNUSED ORBITAL LOCATIONS.**—INTELSAT, Inmarsat, and any successor entities and separated entities shall not be permitted to warehouse any orbital location that—

“(A) as of March 25, 1998, did not contain a satellite that was providing commercial services, or, subsequent to such date, ceased to contain a satellite providing commercial services; or

“(B) as of March 25, 1998, was not designated in INTELSAT or Inmarsat operational plans for satellites for which construction contracts had been executed.

Any such orbital location of INTELSAT or Inmarsat and of any successor entities and separated entities shall be returned to the International Telecommunication Union for reallocation.

“(9) **APPRAISAL OF ASSETS.**—Before any transfer of assets by INTELSAT or Inmarsat to any successor entity or separated entity, such assets shall be independently audited for purposes of appraisal, at both book and fair market value.

“(10) **LIMITATION ON INVESTMENT.**—Notwithstanding the provisions of this title, COMSAT shall not be authorized by the Commission to invest in a satellite known as K-TV, unless Congress authorizes such investment.

“SEC. 622. SPECIFIC CRITERIA FOR INTELSAT.

“In securing the privatizations required by section 621, the following additional criteria with respect to INTELSAT privatization shall be applied as licensing criteria for purposes of subtitle A:

“(1) **NUMBER OF COMPETITORS.**—The number of competitors in the markets served by INTELSAT, including the number of competitors created out of INTELSAT, shall be sufficient to create a fully competitive market.

“(2) **PREVENTION OF EXPANSION DURING TRANSITION.**—

“(A) **IN GENERAL.**—Pending privatization in accordance with the criteria in this title, INTELSAT shall not expand by receiving additional orbital locations, placing new satellites in existing locations, or procuring new or additional satellites except as permitted by subparagraph (B), and the United States shall oppose such expansion—

“(i) in INTELSAT, including at the Assembly of Parties;

“(ii) in the International Telecommunication Union;

“(iii) through United States instructions to COMSAT;

“(iv) in the Commission, through declining to facilitate the registration of additional orbital locations or the provision of additional services (including additional applications of existing services) or additional areas of business; and

“(v) in other appropriate fora.

“(B) EXCEPTION FOR CERTAIN REPLACEMENT SATELLITES.—The limitations in subparagraph (A) shall not apply to any replacement satellites if—

“(i) such replacement satellite is used solely to provide public-switched network voice telephony or occasional-use television services, or both;

“(ii) such replacement satellite is procured pursuant to a construction contract that was executed on or before March 25, 1998; and

“(iii) construction of such replacement satellite commences on or before the final date for INTELSAT privatization set forth in section 621(1)(A).

“(3) TECHNICAL COORDINATION AMONG SIGNATORIES.—Technical coordination shall not be used to impair competition or competitors, and coordination under Article XIV(d) of the INTELSAT Agreement shall be eliminated.

“SEC. 623. SPECIFIC CRITERIA FOR INTEL SAT SEPARATED ENTITIES.

“In securing the privatizations required by section 621, the following additional criteria with respect to any INTEL SAT separated entity shall be applied as licensing criteria for purposes of subtitle A:

“(1) DATE FOR PUBLIC OFFERING.—Within one year after any decision to create any separated entity, a public offering of the securities of such entity shall be conducted.

“(2) PRIVILEGES AND IMMUNITIES.—The privileges and immunities of INTEL SAT and its signatories shall be waived with respect to any transactions with any separated entity, and any limitations on private causes of action that would otherwise generally be permitted against any separated entity shall be eliminated.

“(3) INTERLOCKING DIRECTORATES OR EMPLOYEES.—None of the officers, directors, or employees of any separated entity shall be individuals who are officers, directors, or employees of INTEL SAT.

“(4) SPECTRUM ASSIGNMENTS.—After the initial transfer which may accompany the creation of a separated entity, the portions of the electromagnetic spectrum assigned as of the date of the enactment of this title to INTEL SAT shall not be transferred between INTEL SAT and any separated entity.

“(5) REAFFILIATION PROHIBITED.—Any merger or ownership or management ties or exclusive arrangements between a privatized INTEL SAT or any successor entity and any separated entity shall be prohibited until 15 years after the completion of INTEL SAT privatization under this title.

“SEC. 624. SPECIFIC CRITERIA FOR INMARSAT.

“In securing the privatizations required by section 621, the following additional criteria with respect to Inmarsat privatization shall be applied as licensing criteria for purposes of subtitle A:

“(1) MULTIPLE SIGNATORIES AND DIRECT ACCESS.—Multiple signatories and direct access to Inmarsat shall be permitted.

“(2) PREVENTION OF EXPANSION DURING TRANSITION.—Pending privatization in accordance with the criteria in this title, Inmarsat should not expand by receiving additional orbital locations, placing new satellites in existing locations, or procuring new or additional satellites, except for specified replacement satellites for which construction contracts have been executed as of March 25, 1998, and the United States shall oppose such expansion—

“(A) in Inmarsat, including at the Council and Assembly of Parties;

“(B) in the International Telecommunication Union;

“(C) through United States instructions to COMSAT;

“(D) in the Commission, through declining to facilitate the registration of additional orbital locations or the provision of additional services (including additional applications of existing services) or additional areas of business; and

“(E) in other appropriate fora.

This paragraph shall not be construed as limiting the maintenance, assistance or improvement of the GMDSS.

“(3) NUMBER OF COMPETITORS.—The number of competitors in the markets served by Inmarsat, including the number of competitors created out of Inmarsat, shall be sufficient to create a fully competitive market.

“(4) REAFFILIATION PROHIBITED.—Any merger or ownership or management ties or exclusive arrangements between Inmarsat or any successor entity or separated entity and ICO shall be prohibited until 15 years after the completion of Inmarsat privatization under this title.

“(5) INTERLOCKING DIRECTORATES OR EMPLOYEES.—None of the officers, directors, or employees of Inmarsat or any successor entity or separated entity shall be individuals who are officers, directors, or employees of ICO.

“(6) SPECTRUM ASSIGNMENTS.—The portions of the electromagnetic spectrum assigned as of the date of the enactment of this title to Inmarsat—

“(A) shall, after January 1, 2006, or the date on which the life of the current generation of Inmarsat satellites ends, whichever is later, be made available for assignment to all systems (including the privatized Inmarsat) on a non-discriminatory basis and in a manner in which continued availability of the GMDSS is provided; and

“(B) shall not be transferred between Inmarsat and ICO.

“(7) PRESERVATION OF THE GMDSS.—The United States shall seek to preserve space segment capacity of the GMDSS.

“SEC. 625. ENCOURAGING MARKET ACCESS AND PRIVATIZATION.

“(a) NTIA DETERMINATION.—

“(1) DETERMINATION REQUIRED.—Within 180 days after the date of the enactment of this section, the Secretary of Commerce shall, through the Assistant Secretary for Communications and Information, transmit to the Commission—

“(A) a list of Member countries of INTEL SAT and Inmarsat that are not Members of the World Trade Organization and that impose barriers to market access for private satellite systems; and

“(B) a list of Member countries of INTEL SAT and Inmarsat that are not Members of the World Trade Organization and that are not supporting pro-competitive privatization of INTEL SAT and Inmarsat.

“(2) CONSULTATION.—The Secretary's determinations under paragraph (1) shall be made in consultation with the Federal Communications Commission, the Secretary of State, and the United States Trade Representative, and shall take into account the totality of a country's actions in all relevant fora, including the Assemblies of Parties of INTEL SAT and Inmarsat.

“(b) IMPOSITION OF COST-BASED SETTLEMENT RATE.—Notwithstanding—

“(1) any higher settlement rate that an overseas carrier charges any United States carrier to originate or terminate international message telephone services; and

“(2) any transition period that would otherwise apply,

the Commission may by rule prohibit United States carriers from paying an amount in excess of a cost-based settlement rate to overseas carriers in countries listed by the Commission pursuant to subsection (a).

“(c) SETTLEMENTS POLICY.—The Commission shall, in exercising its authority to establish settlements rates for United States international common carriers, seek to advance United States policy in favor of cost-based settlements in all relevant fora on international telecommunications policy, including in meetings with parties and signatories of INTEL SAT and Inmarsat.

“Subtitle C—Deregulation and Other Statutory Changes

“SEC. 641. ACCESS TO INTEL SAT.

“(a) ACCESS PERMITTED.—Beginning on the date of the enactment of this title, users or providers of telecommunications services shall be permitted to obtain direct access to INTEL SAT telecommunications services and space segment capacity through purchases of such capacity or services from, or through investment in, INTEL SAT.

“(b) RULEMAKING.—Within 180 days after the date of the enactment of this title, the Commission shall complete a rulemaking, with notice and opportunity for submission of comment by interested persons, to determine if users or providers of telecommunications services have sufficient opportunity to access INTEL SAT space segment capacity directly from INTEL SAT to meet their service or capacity requirements. If the Commission determines that such opportunity to access does not exist, the Commission shall take appropriate action to facilitate such direct access pursuant to its authority under this Act and the Communications Act of 1934. The Commission shall take such steps as may be necessary to prevent the circumvention of the intent of this section.

“(c) CONTRACT PRESERVATION.—Nothing in this section shall be construed to permit the abrogation or modification of any contract.

“SEC. 642. SIGNATORY ROLE.

“(a) LIMITATIONS ON SIGNATORIES.—

“(1) NATIONAL SECURITY LIMITATIONS.—The Federal Communications Commission, after a public interest determination, in consultation with the executive branch, may restrict foreign ownership of a United States signatory if the Commission determines that not to do so would constitute a threat to national security.

“(2) NO SIGNATORIES REQUIRED.—The United States Government shall not require signatories to represent the United States in INTEL SAT or Inmarsat or in any successor entities after a pro-competitive privatization is achieved consistent with sections 621, 622, and 624.

“(b) CLARIFICATION OF PRIVILEGES AND IMMUNITIES OF COMSAT.—

“(1) GENERALLY NOT IMMUNIZED.—Notwithstanding any other law or executive agreement, COMSAT shall not be entitled to any privileges or immunities under the laws of the United States or any State on the basis of its status as a signatory of INTEL SAT or Inmarsat.

“(2) LIMITED IMMUNITY.—COMSAT and any other company functioning as United States signatory to INTEL SAT or Inmarsat shall not be liable for action taken by it in carrying out the specific, written instruction of the United States issued in connection with its relationships and activities with foreign governments, international entities, and the intergovernmental satellite organizations.

“(3) PROVISIONS PROSPECTIVE.—Paragraph (1) shall not apply with respect to liability for any action taken by COMSAT before the date of the enactment of the Communications Satellite Competition and Privatization Act of 1999.

“(c) PARITY OF TREATMENT.—Notwithstanding any other law or executive agreement, the Commission shall have the authority to impose similar regulatory fees on the United States signatory which it imposes on other entities providing similar services.

"SEC. 643. ELIMINATION OF PROCUREMENT PREFERENCES."

"Nothing in this title or the Communications Act of 1934 shall be construed to authorize or require any preference, in Federal Government procurement of telecommunications services, for the satellite space segment provided by INTELSAT, Inmarsat, or any successor entity or separated entity."

"SEC. 644. USE OF ITU TECHNICAL COORDINATION."

"The Commission and United States satellite companies shall utilize the International Telecommunication Union procedures for technical coordination with INTELSAT and its successor entities and separated entities, rather than INTELSAT procedures."

"SEC. 645. TERMINATION OF COMMUNICATIONS SATELLITE ACT OF 1962 PROVISIONS."

"Effective on the dates specified, the following provisions of this Act shall cease to be effective:

"(1) Date of the enactment of this title: Sections 101 and 102; paragraphs (1), (5) and (6) of section 201(a); section 301; section 303; section 502; and paragraphs (2) and (4) of section 504(a)."

"(2) On the effective date of the Commission's order that establishes direct access to INTELSAT space segment: Paragraphs (1), (3) through (5), and (8) through (10) of section 201(c); and section 304."

"(3) On the effective date of the Commission's order that establishes direct access to Inmarsat space segment: Subsections (a) through (d) of section 503."

"(4) On the effective date of a Commission order determining under section 601(b)(2) that Inmarsat privatization is consistent with criteria in sections 621 and 624: Section 504(b)."

"(5) On the effective date of a Commission order determining under section 601(b)(2) that INTELSAT privatization is consistent with criteria in sections 621 and 622: Paragraphs (2) and (4) of section 201(a); section 201(c)(2); subsection (a) of section 403; and section 404."

"SEC. 646. REPORTS TO CONGRESS."

"(a) ANNUAL REPORTS.—The President and the Commission shall report to the Committees on Commerce and International Relations of the House of Representatives and the Committees on Commerce, Science, and Transportation and Foreign Relations of the Senate within 90 calendar days of the enactment of this title, and not less than annually thereafter, on the progress made to achieve the objectives and carry out the purposes and provisions of this title. Such reports shall be made available immediately to the public."

"(b) CONTENTS OF REPORTS.—The reports submitted pursuant to subsection (a) shall include the following:

"(1) Progress with respect to each objective since the most recent preceding report."

"(2) Views of the Parties with respect to privatization."

"(3) Views of industry and consumers on privatization."

"(4) Impact privatization has had on United States industry, United States jobs, and United States industry's access to the global marketplace."

"SEC. 647. CONSULTATION WITH CONGRESS."

"The President's designees and the Commission shall consult with the Committees on Commerce and International Relations of the House of Representatives and the Committees on Commerce, Science, and Transportation and Foreign Relations of the Senate prior to each meeting of the INTELSAT or Inmarsat Assembly of Parties, the INTELSAT Board of Governors, the Inmarsat Council, or appropriate working group meetings."

"SEC. 648. SATELLITE AUCTIONS."

"Notwithstanding any other provision of law, the Commission shall not have the authority to

assign by competitive bidding orbital locations or spectrum used for the provision of international or global satellite communications services. The President shall oppose in the International Telecommunication Union and in other bilateral and multilateral fora any assignment by competitive bidding of orbital locations or spectrum used for the provision of such services."

"SEC. 649. EXCLUSIVITY ARRANGEMENTS."

"(a) IN GENERAL.—No satellite operator shall acquire or enjoy the exclusive right of handling telecommunications to or from the United States, its territories or possessions, and any other country or territory by reason of any concession, contract, understanding, or working arrangement to which the satellite operator or any persons or companies controlling or controlled by the operator are parties."

"(b) EXCEPTION.—In enforcing the provisions of this section, the Commission—

"(1) shall not require the termination of existing satellite telecommunications services under contract with, or tariff commitment to, such satellite operator; but

"(2) may require the termination of new services only to the country that has provided the exclusive right to handle telecommunications, if the Commission determines the public interest, convenience, and necessity so requires."

"Subtitle D—Negotiations To Pursue Privatization"**"SEC. 661. METHODS TO PURSUE PRIVATIZATION."**

"The President shall secure the pro-competitive privatizations required by this title in a manner that meets the criteria in subtitle B."

"Subtitle E—Definitions"**"SEC. 681. DEFINITIONS."**

"(a) IN GENERAL.—As used in this title:

"(1) INTELSAT.—The term 'INTELSAT' means the International Telecommunications Satellite Organization established pursuant to the Agreement Relating to the International Telecommunications Satellite Organization (INTELSAT)."

"(2) INMARSAT.—The term 'Inmarsat' means the International Mobile Satellite Organization established pursuant to the Convention on the International Maritime Organization."

"(3) SIGNATORIES.—The term 'signatories'—
"(A) in the case of INTELSAT, or INTELSAT successors or separated entities, means a Party, or the telecommunications entity designated by a Party, that has signed the Operating Agreement and for which such Agreement has entered into force or to which such Agreement has been provisionally applied; and
"(B) in the case of Inmarsat, or Inmarsat successors or separated entities, means either a Party to, or an entity that has been designated by a Party to sign, the Operating Agreement."

"(4) PARTY.—The term 'Party'—
"(A) in the case of INTELSAT, means a nation for which the INTELSAT agreement has entered into force or been provisionally applied; and
"(B) in the case of Inmarsat, means a nation for which the Inmarsat convention has entered into force."

"(5) COMMISSION.—The term 'Commission' means the Federal Communications Commission."

"(6) INTERNATIONAL TELECOMMUNICATION UNION.—The term 'International Telecommunication Union' means the intergovernmental organization that is a specialized agency of the United Nations in which member countries cooperate for the development of telecommunications, including adoption of international regulations governing terrestrial and space uses of the frequency spectrum as well as use of the geostationary satellite orbit."

"(7) SUCCESSOR ENTITY.—The term 'successor entity'—
"(A) means any privatized entity created from the privatization of INTELSAT or Inmarsat or from the assets of INTELSAT or Inmarsat; but

"(B) does not include any entity that is a separated entity."

"(8) SEPARATED ENTITY.—The term 'separated entity' means a privatized entity to whom a portion of the assets owned by INTELSAT or Inmarsat are transferred prior to full privatization of INTELSAT or Inmarsat, including in particular the entity whose structure was under discussion by INTELSAT as of March 25, 1998, but excluding ICO."

"(9) ORBITAL LOCATION.—The term 'orbital location' means the location for placement of a satellite on the geostationary orbital arc as defined in the International Telecommunication Union Radio Regulations."

"(10) SPACE SEGMENT.—The term 'space segment' means the satellites, and the tracking, telemetry, command, control, monitoring and related facilities and equipment used to support the operation of satellites owned or leased by INTELSAT, Inmarsat, or a separated entity or successor entity."

"(11) NON-CORE SERVICES.—The term 'non-core services' means, with respect to INTELSAT provision, services other than public-switched network voice telephony and occasional-use television, and with respect to Inmarsat provision, services other than global maritime distress and safety services or other existing maritime or aeronautical services for which there are not alternative providers."

"(12) ADDITIONAL SERVICES.—The term 'additional services' means Internet services, high-speed data, interactive services, non-maritime or non-aeronautical mobile services, Direct to Home (DTH) or Direct Broadcast Satellite (DBS) video services, or Ka-band services."

"(13) INTELSAT AGREEMENT.—The term 'INTELSAT Agreement' means the Agreement Relating to the International Telecommunications Satellite Organization ('INTELSAT'), including all its annexes (TIAS 7532, 23 UST 3813)."

"(14) HEADQUARTERS AGREEMENT.—The term 'Headquarters Agreement' means the International Telecommunication Satellite Organization Headquarters Agreement (November 24, 1976) (TIAS 8542, 28 UST 2248)."

"(15) OPERATING AGREEMENT.—The term 'Operating Agreement' means—

"(A) in the case of INTELSAT, the agreement, including its annex but excluding all titles of articles, opened for signature at Washington on August 20, 1971, by Governments or telecommunications entities designated by Governments in accordance with the provisions of the Agreement; and
"(B) in the case of Inmarsat, the Operating Agreement on the International Maritime Satellite Organization, including its annexes."

"(16) INMARSAT CONVENTION.—The term 'Inmarsat Convention' means the Convention on the International Maritime Satellite Organization (Inmarsat) (TIAS 9605, 31 UST 1)."

"(17) NATIONAL CORPORATION.—The term 'national corporation' means a corporation the ownership of which is held through publicly traded securities, and that is incorporated under, and subject to, the laws of a national, state, or territorial government."

"(18) COMSAT.—The term 'COMSAT' means the corporation established pursuant to title III of the Communications Satellite Act of 1962 (47 U.S.C. 731 et seq.)"

"(19) ICO.—The term 'ICO' means the company known, as of the date of the enactment of this title, as ICO Global Communications, Inc."

"(20) REPLACEMENT SATELLITE.—The term 'replacement satellite' means a satellite that replaces a satellite that fails prior to the end of the duration of contracts for services provided over such satellite and that takes the place of a satellite designated for the provision of public-switched network and occasional-use television

services under contracts executed prior to March 25, 1998 (but not including K-TV or similar satellites). A satellite is only considered a replacement satellite to the extent such contracts are equal to or less than the design life of the satellite.

“(21) GLOBAL MARITIME DISTRESS AND SAFETY SERVICES OR GMDSS.—The term ‘global maritime distress and safety services’ or ‘GMDSS’ means the automated ship-to-shore distress alerting system which uses satellite and advanced terrestrial systems for international distress communications and promoting maritime safety in general. The GMDSS permits the worldwide alerting of vessels, coordinated search and rescue operations, and dissemination of maritime safety information.

“(b) COMMON TERMINOLOGY.—Except as otherwise provided in subsection (a), terms used in this title that are defined in section 3 of the Communications Act of 1934 have the meanings provided in such section.”

Mr. SCHUMER. Mr. President, I rise today to speak about the Satellite Home Viewer Act, which is part of the Intellectual Property and Communications Omnibus Reform Act of 1999. There are approximately half a million direct broadcast satellite households in New York State that have been disadvantaged by the restrictions currently facing satellite service providers. There are countless others who would like the privilege of having satellite service as a multi-channel video program provider.

Earlier this year, direct broadcast satellite customers in many areas of New York State had their local network service shut-off as a result of a court order. This meant that satellite service customers were unable to receive their local news, weather, and major broadcast stations from their local broadcast companies. We now have a bill that will allow direct broadcast satellite companies the ability to provide their local customers with local programming. For small, rural communities, it is imperative that residents be allowed to receive notice of local events, like school closings, weather reports, cultural happenings, and local business developments. In addition, New York is one of the two states that will benefit from retroactive local programming via satellites.

For residents of New York rural counties like Allegheny, Chenango, Clinton, Niagara, Ulster, and many others, that rely on distant broadcast network programming because they are typically unable to receive over-the-air broadcast signals, this bill allows them to continue to receive far-away television networks.

While I am pleased that we were able to pass the Satellite Home Viewer Act before it expired on December 31, 1999, I hope we will continue to further its progress. The federal loan provision that was included during conference, and regrettably taken out of the Senate conference report, must be revisited. It is my understanding that the Senate Banking committee plans on

holding hearings next year to ensure that multi-channel service providers are encouraged to extend satellite service to rural and underserved communities. I look forward to working with my colleagues on that committee to make sure my constituents in Western and Northern New York have the same viewing options as those in downstate New York.

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate disagree to the amendment of the House, request a conference with the House, and the Chair be authorized to appoint conferees on the part of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the Presiding Officer appointed Mr. McCAIN, Mr. STEVENS, Mr. BURNS, Mr. HOLLINGS, and Mr. INOUE conferees on the part of the Senate.

RADIATION EXPOSURE COMPENSATION ACT AMENDMENTS OF 1999

Ms. COLLINS. Mr. President, I now ask unanimous consent the Senate proceed to the consideration of Calendar No. 370, S. 1515.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1515) to amend the Radiation Exposure Compensation Act, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary, with an amendment; as follows:

(The part of the bill intended to be inserted is shown in *italic*.)

S. 1515

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Radiation Exposure Compensation Act Amendments of 1999”.

SEC. 2. FINDINGS.

Congress finds that—

(1) the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) recognized the responsibility of the Federal Government to compensate individuals who were harmed by the mining of radioactive materials or fallout from nuclear arms testing;

(2) a congressional oversight hearing conducted by the Committee on Labor and Human Resources of the Senate demonstrated that since enactment of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note), regulatory burdens have made it too difficult for some deserving individuals to be fairly and efficiently compensated;

(3) reports of the Atomic Energy Commission and the National Institute for Occupational Safety and Health testify to the need to extend eligibility to States in which the Federal Government sponsored uranium mining and milling from 1941 through 1971;

(4) scientific data resulting from the enactment of the Radiation Exposed Veterans Compensation Act of 1988 (38 U.S.C. 101 note), and obtained from the Committee on the Bi-

ological Effects of Ionizing Radiations, and the President's Advisory Committee on Human Radiation Experiments provide medical validation for the extension of compensable radiogenic pathologies;

(5) above-ground uranium miners, millers and individuals who transported ore should be fairly compensated, in a manner similar to that provided for underground uranium miners, in cases in which those individuals suffered disease or resultant death, associated with radiation exposure, due to the failure of the Federal Government to warn and otherwise help protect citizens from the health hazards addressed by the Radiation Exposure Compensation Act of 1990 (42 U.S.C. 2210 note); and

(6) it should be the responsibility of the Federal Government in partnership with State and local governments and appropriate healthcare organizations, to initiate and support programs designed for the early detection, prevention and education on radiogenic diseases in approved States to aid the thousands of individuals adversely affected by the mining of uranium and the testing of nuclear weapons for the Nation's weapons arsenal.

SEC. 3. AMENDMENTS TO THE RADIATION EXPOSURE COMPENSATION ACT.

(a) CLAIMS RELATING TO ATMOSPHERIC NUCLEAR TESTING.—Section 4(a)(1) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended to read as follows:

“(1) CLAIMS RELATING TO LEUKEMIA.—

“(A) IN GENERAL.—An individual described in this subparagraph shall receive an amount specified in subparagraph (B) if the conditions described in subparagraph (C) are met. An individual referred to in the preceding sentence is an individual who—

“(i)(I) was physically present in an affected area for a period of at least 1 year during the period beginning on January 21, 1951, and ending on October 31, 1958;

“(II) was physically present in the affected area for the period beginning on June 30, 1962, and ending on July 31, 1962; or

“(III) participated onsite in a test involving the atmospheric detonation of a nuclear device; and

“(ii) submits written documentation that such individual developed leukemia—

“(I) after the applicable period of physical presence described in subclause (I) or (II) of clause (i) or onsite participation described in clause (i)(III) (as the case may be); and

“(II) more than 2 years after first exposure to fallout.

“(B) AMOUNTS.—If the conditions described in subparagraph (C) are met, an individual—

“(i) who is described in subclause (I) or (II) of subparagraph (A)(i) shall receive \$50,000; or

“(ii) who is described in subclause (III) of subparagraph (A)(i) shall receive \$75,000.

“(C) CONDITIONS.—The conditions described in this subparagraph are as follows:

“(i) Initial exposure occurred prior to age 21.

“(ii) The claim for a payment under subparagraph (B) is filed with the Attorney General by or on behalf of the individual.

“(iii) The Attorney General determines, in accordance with section 6, that the claim meets the requirements of this Act.”

(b) DEFINITIONS.—Section 4(b) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended—

(1) in paragraph (1)—

(A) in subparagraph (A) by inserting “Wayne, San Juan,” after “Millard,”; and

(B) by amending subparagraph (C) to read as follows:

"(C) in the State of Arizona, the counties of Coconino, Yavapai, Navajo, Apache, and Gila; and"; and

(2) in paragraph (2)—

(A) by striking "the onset of the disease was between 2 and 30 years of first exposure," and inserting "the onset of the disease was at least 2 years after first exposure, lung cancer (other than in situ lung cancer that is discovered during or after a post-mortem exam),";

(B) by striking "(provided initial exposure occurred by the age of 20)" after "thyroid";

(C) by inserting "male or" before "female breast";

(D) by striking "(provided initial exposure occurred prior to age 40)" after "female breast";

(E) by striking "(provided low alcohol consumption and not a heavy smoker)" after "esophagus";

(F) by striking "(provided initial exposure occurred before age 30)" after "stomach";

(G) by striking "(provided not a heavy smoker)" after "pharynx";

(H) by striking "(provided not a heavy smoker and low coffee consumption)" after "pancreas"; and

(I) by inserting "salivary gland, urinary bladder, brain, colon, ovary," after "gall bladder,".

(c) CLAIMS RELATING TO URANIUM MINING.—(1) IN GENERAL.—Section 5(a) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended to read as follows:

"(a) ELIGIBILITY OF INDIVIDUALS.—

"(1) IN GENERAL.—An individual shall receive \$100,000 for a claim made under this Act if—

"(A) that individual—

"(i) was employed in a uranium mine or uranium mill (including any individual who was employed in the transport of uranium ore or vanadium-uranium ore from such mine or mill) located in Colorado, New Mexico, Arizona, Wyoming, South Dakota, Washington, Utah, Idaho, North Dakota, Oregon, and Texas at any time during the period beginning on January 1, 1942, and ending on December 31, 1971; and

"(ii)(I) was a miner exposed to 40 or more working level months of radiation and submits written medical documentation that the individual, after that exposure, developed lung cancer or a nonmalignant respiratory disease; or

"(II) was a miller or ore transporter who worked for at least 1 year during the period described under clause (i) and submits written medical documentation that the individual, after that exposure, developed lung cancer or a nonmalignant respiratory disease or renal cancers and other chronic renal disease including nephritis and kidney tubal tissue injury;

"(B) the claim for that payment is filed with the Attorney General by or on behalf of that individual; and

"(C) the Attorney General determines, in accordance with section 6, that the claim meets the requirements of this Act.

"(2) INCLUSION OF ADDITIONAL STATES.—Paragraph (1)(A)(i) shall apply to a State, in addition to the States named under such clause, if—

"(A) an Atomic Energy Commission uranium mine was operated in such State at any time during the period beginning on January 1, 1942, and ending on December 31, 1971;

"(B) the State submits an application to the Department of Justice to include such State; and

"(C) the Attorney General makes a determination to include such State.

"(3) PAYMENT REQUIREMENT.—Each payment under this section may be made only in accordance with section 6."

(2) DEFINITIONS.—Section 5(b) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended—

(A) in paragraph (3)—

(i) by striking "and" before "corpulmonale";

(ii) by striking "and if the claimant," and all that follows through the end of the paragraph and inserting "silicosis, and pneumoconiosis"; and

(iii) by striking "and" at the end of the paragraph;

(B) by striking the period at the end of paragraph (4) and inserting a semicolon; and

(C) by adding at the end the following:

"(5) the term 'written medical documentation' for purposes of proving a nonmalignant respiratory disease or lung cancer means, in any case in which the claimant is living—

"(A)(i) an arterial blood gas study; or

"(ii) a written diagnosis by a physician meeting the requirements of subsection (c)(1); and

"(B)(i) a chest x-ray administered in accordance with standard techniques and the interpretive reports of a maximum of 2 National Institute of Occupational Health and Safety certified 'B' readers classifying the existence of the nonmalignant respiratory disease of category 1/0 or higher according to a 1989 report of the International Labor Office (known as the 'ILO'), or subsequent revisions;

"(ii) high resolution computed tomography scans (commonly known as 'HRCT scans') (including computer assisted tomography scans (commonly known as 'CAT scans'), magnetic resonance imaging scans (commonly known as 'MRI scans'), and positron emission tomography scans (commonly known as 'PET scans')) and interpretive reports of such scans;

"(iii) pathology reports of tissue biopsies; or

"(iv) pulmonary function tests indicating restrictive lung function, as defined by the American Thoracic Society;

"(6) the term 'lung cancer'—

"(A) means any physiological condition of the lung, trachea, or bronchus that is recognized as lung cancer by the National Cancer Institute; and

"(B) includes in situ lung cancers;

"(7) the term 'uranium mine' means any underground excavation, including 'dog holes', as well as open pit, strip, rim, surface, or other aboveground mines, where uranium ore or vanadium-uranium ore was mined or otherwise extracted; and

"(8) the term 'uranium mill' includes milling operations involving the processing of uranium ore or vanadium-uranium ore, including both carbonate and acid leach plants."

(3) WRITTEN DOCUMENTATION.—Section 5 of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended by adding at the end the following:

"(c) WRITTEN DOCUMENTATION.—

(1) DIAGNOSIS ALTERNATIVE TO ARTERIAL BLOOD GAS STUDY.—

"(A) IN GENERAL.—For purposes of this Act, the written diagnosis and the accompanying interpretive reports described in subsection (b)(5)(A) shall—

"(i) be considered to be conclusive; and

"(ii) be subject to a fair and random audit procedure established by the Attorney General.

"(B) CERTAIN WRITTEN DIAGNOSES.—

"(i) IN GENERAL.—For purposes of this Act, a written diagnosis made by a physician de-

scribed under clause (ii) of a nonmalignant pulmonary disease or lung cancer of a claimant that is accompanied by written documentation shall be considered to be conclusive evidence of that disease.

"(ii) DESCRIPTION OF PHYSICIANS.—A physician referred to under clause (i) is a physician who—

"(I) is employed by the Indian Health Service or the Department of Veterans Affairs; or

"(II) is a board certified physician; and

"(III) has a documented ongoing physician patient relationship with the claimant.

"(2) CHEST X-RAYS.—

"(A) IN GENERAL.—For purposes of this Act, a chest x-ray and the accompanying interpretive reports described in subsection (b)(5)(B) shall—

"(i) be considered to be conclusive; and

"(ii) be subject to a fair and random audit procedure established by the Attorney General.

"(B) CERTAIN WRITTEN DIAGNOSES.—

"(i) IN GENERAL.—For purposes of this Act, a written diagnosis made by a physician described in clause (ii) of a nonmalignant pulmonary disease or lung cancer of a claimant that is accompanied by written documentation that meets the definition of that term under subsection (b)(5) shall be considered to be conclusive evidence of that disease.

"(ii) DESCRIPTION OF PHYSICIANS.—A physician referred to under clause (i) is a physician who—

"(I) is employed by—

"(aa) the Indian Health Service; or

"(bb) the Department of Veterans Affairs; and

"(II) has a documented ongoing physician patient relationship with the claimant."

(d) DETERMINATION AND PAYMENT OF CLAIMS.—

(1) FILING PROCEDURES.—Section 6(a) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended by adding at the end the following: "In establishing procedures under this subsection, the Attorney General shall take into account and make allowances for the law, tradition, and customs of Indian tribes (as that term is defined in section 5(b)) and members of Indian tribes, to the maximum extent practicable."

(2) DETERMINATION AND PAYMENT OF CLAIMS, GENERALLY.—Section 6(b)(1) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended by adding at the end the following: "All reasonable doubt with regard to whether a claim meets the requirements of this Act shall be resolved in favor of the claimant."

(3) OFFSET FOR CERTAIN PAYMENTS.—Section 6(c)(2)(B) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended—

(A) in clause (i), by inserting "(other than a claim for workers' compensation)" after "claim"; and

(B) in clause (ii), by striking "Federal Government" and inserting "Department of Veterans Affairs".

(4) APPLICATION OF NATIVE AMERICAN LAW TO CLAIMS.—Section 6(c)(4) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended by adding at the end the following:

"(D) APPLICATION OF NATIVE AMERICAN LAW.—In determining those individuals eligible to receive compensation by virtue of marriage, relationship, or survivorship, such determination shall take into consideration and give effect to established law, tradition, and custom of the particular affected Indian tribe."

(5) ACTION ON CLAIMS.—Section 6(d) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended—

(A) by inserting “(1) IN GENERAL.—” before “The Attorney General”;

(B) by inserting at the end the following: “For purposes of determining when the 12-month period ends, a claim under this Act shall be deemed filed as of the date of its receipt by the Attorney General. In the event of the denial of a claim, the claimant shall be permitted a reasonable period in which to seek administrative review of the denial by the Attorney General. The Attorney General shall make a final determination with respect to any administrative review within 90 days after the receipt of the claimant’s request for such review. In the event the Attorney General fails to render a determination within 12 months after the date of the receipt of such request, the claim shall be deemed awarded as a matter of law and paid.”; and

(C) by adding at the end the following:

“(2) ADDITIONAL INFORMATION.—The Attorney General may request from any claimant under this Act, or from any individual or entity on behalf of any such claimant, any reasonable additional information or documentation necessary to complete the determination on the claim in accordance with the procedures established under subsection (a).

“(3) TREATMENT OF PERIOD ASSOCIATED WITH REQUEST.—

“(A) IN GENERAL.—The period described in subparagraph (B) shall not apply to the 12-month limitation under paragraph (1).

“(B) PERIOD.—The period described in this subparagraph is the period—

“(i) beginning on the date on which the Attorney General makes a request for additional information or documentation under paragraph (2); and

“(ii) ending on the date on which the claimant or individual or entity acting on behalf of that claimant submits that information or documentation or informs the Attorney General that it is not possible to provide that information or that the claimant or individual or entity will not provide that information.

“(4) PAYMENT WITHIN 6 WEEKS.—The Attorney General shall ensure that an approved claim is paid not later than 6 weeks after the date on which such claim is approved.

“(5) NATIVE AMERICAN CONSIDERATIONS.—Any procedures under this subsection shall take into consideration and incorporate, to the fullest extent feasible, Native American law, tradition, and custom with respect to the submission and processing of claims by Native Americans.”.

(e) REGULATIONS.—

(1) IN GENERAL.—Section 6(i) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended by adding at the end the following: “Not later than 180 days after the date of enactment of the Radiation Exposure Compensation Act Amendments of 1999, the Attorney General shall issue revised regulations to carry out this Act.”.

(2) AFFIDAVITS.—

(A) IN GENERAL.—The Attorney General shall take such action as may be necessary to ensure that the procedures established by the Attorney General under section 6 of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) provide that, in addition to any other material that may be used to substantiate employment history for purposes of determining working level months, an individual filing a claim under those procedures may make such a substantiation by

means of an affidavit described in subparagraph (B).

(B) AFFIDAVITS.—An affidavit referred to under subparagraph (A) is an affidavit—

(i) that meets such requirements as the Attorney General may establish; and

(ii) is made by a person other than the individual filing the claim that attests to the employment history of the claimant.

(f) LIMITATIONS ON CLAIMS.—Section 8 of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended—

(1) by inserting “(a) IN GENERAL.—” before “A claim”; and

(2) by adding at the end the following:

“(b) RESUBMITTAL OF CLAIMS.—After the date of enactment of the Radiation Exposure Compensation Act Amendments of 1999, any claimant who has been denied compensation under this Act may resubmit a claim for consideration by the Attorney General in accordance with this Act not more than 3 times. Any resubmittal made before the date of enactment of the Radiation Exposure Compensation Act Amendments of 1999 shall not be applied to the limitation under the preceding sentence.”.

(g) EXTENSION OF CLAIMS AND FUND.—

(1) EXTENSION OF CLAIMS.—Section 8 of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended by striking “20 years after the date of the enactment of this Act” and inserting “22 years after the date of enactment of the Radiation Exposure Compensation Act Amendments of 1999”.

(2) EXTENSION OF FUND.—Section 3(d) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended in the first sentence by striking “date of the enactment of this Act” and inserting “date of enactment of the Radiation Exposure Compensation Act Amendments of 1999”.

(h) ATTORNEY FEES LIMITATIONS.—Section 9 of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) is amended in the first sentence by striking “10 per centum” and inserting “2 percent”.

(i) GAO REPORTS.—

(1) IN GENERAL.—Not later than 18 months after the date of enactment of this Act, and every 18 months thereafter, the General Accounting Office shall submit a report to Congress containing a detailed accounting of the administration of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) by the Department of Justice.

(2) CONTENTS.—Each report submitted under this subsection shall include an analysis of—

(A) claims, awards, and administrative costs under the Radiation Exposure Compensation Act (42 U.S.C. 2210 note); and

(B) the budget of the Department of Justice relating to such Act.

SEC. 4. ESTABLISHMENT OF PROGRAM OF GRANTS TO STATES FOR EDUCATION, PREVENTION, AND EARLY DETECTION OF RADIOGENIC CANCERS AND DISEASES.

Subpart I of part C of title IV of the Public Health Service Act (42 U.S.C. 285 et seq.) is amended by adding at the end the following:

“SEC. 417C. GRANTS FOR EDUCATION, PREVENTION, AND EARLY DETECTION OF RADIOGENIC CANCERS AND DISEASES.

“(a) DEFINITION.—In this section the term ‘entity’ means any—

“(1) National Cancer Institute-designated cancer center;

“(2) Department of Veterans Affairs hospital or medical center;

“(3) Federally Qualified Health Center, community health center, or hospital;

“(4) agency of any State or local government, including any State department of health; or

“(5) nonprofit organization.

“(b) IN GENERAL.—The Secretary, acting through the Administrator of the Health Resources and Services Administration in consultation with the Director of the National Institutes of Health and the Director of the Indian Health Service, may make competitive grants to any entity for the purpose of carrying out programs to—

“(1) screen individuals described under section 4(a)(1)(A)(i) or 5(a)(1)(A) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note) for cancer as a preventative health measure;

“(2) provide appropriate referrals for medical treatment of individuals screened under paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services;

“(3) develop and disseminate public information and education programs for the detection, prevention, and treatment of radiogenic cancers and diseases; and

“(4) facilitate putative applicants in the documentation of claims as described in section 5(a) of the Radiation Exposure Compensation Act (42 U.S.C. 2210 note).

“(c) INDIAN HEALTH SERVICE.—The programs under subsection (a) shall include programs provided through the Indian Health Service or through tribal contracts, compacts, grants, or cooperative agreements with the Indian Health Service and which are determined appropriate to raising the health status of Indians.

“(d) GRANT AND CONTRACT AUTHORITY.—Entities receiving a grant under subsection (b) may expend the grant to carry out the purpose described in such subsection.

“(e) HEALTH COVERAGE UNAFFECTED.—Nothing in this section shall be construed to affect any coverage obligation of a governmental or private health plan or program relating to an individual referred to under subsection (b)(1).

“(f) REPORT TO CONGRESS.—Beginning on October 1 of the year following the date on which amounts are first appropriated to carry out this section and annually on each October 1 thereafter, the Secretary shall submit a report to the Committee on the Judiciary and the Committee on Health, Education, Labor, and Pensions of the Senate and to the Committee on the Judiciary and the Committee on Commerce of the House of Representatives. Each report shall summarize the expenditures and programs funded under this section as the Secretary determines to be appropriate.

“(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for the purpose of carrying out this section \$20,000,000 for fiscal year 1999 and such sums as may be necessary for each of the fiscal years 2000 through 2009.”.

Ms. COLLINS. I ask unanimous consent the committee substitute amendment be agreed to, the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 1515), as amended, was read the third time and passed.

FOR THE RELIEF OF KERANTHA POOLE-CHRISTIAN

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate now proceed to the immediate consideration of Calendar No. 384, S. 302.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 302) for the relief of Kerantha Poole-Christian.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 302) was read the third time and passed, as follows:

S. 302

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLASSIFICATION AS A CHILD UNDER THE IMMIGRATION AND NATIONALITY ACT.

(a) IN GENERAL.—In the administration of the Immigration and Nationality Act, Kerantha Poole-Christian shall be classified as a child within the meaning of section 101(b)(1)(E) of such Act, upon approval of a petition filed on her behalf by Clifton or Linette Christian, citizens of the United States, pursuant to section 204 of such Act.

(b) LIMITATION.—No natural parent, brother, or sister, if any, of Kerantha Poole-Christian shall, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

RELIEF OF REGINE BEATIE EDWARDS

Ms. COLLINS. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 385, S. 1019.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1019) for the relief of Regine Beatie Edwards.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1019) was read the third time and passed, as follows:

S. 1019

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLASSIFICATIONS AS A CHILD UNDER THE IMMIGRATION AND NATIONALITY ACT.

(a) IN GENERAL.—In the administration of the Immigration and Nationality Act,

Regine Beatie Edwards shall be classified as a child within the meaning of section 101(b)(1)(E) of such Act, upon approval of a petition filed on her behalf by Stan Edwards, a citizen of the United States, pursuant to section 204 of such Act.

(b) LIMITATION.—No natural parent, brother, or sister, if any, of Regine Beatie Edwards shall, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

RELIEF OF SERGIO LOZANO, FAURICIO LOZANO AND ANA LOZANO

Ms. COLLINS. Mr. President, I now ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 383, S. 276.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 276) for relief of Sergio Lozano, Fauricio Lozano, and Ana Lozano.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. PERMANENT RESIDENT STATUS FOR SERGIO LOZANO.

(a) IN GENERAL.—Notwithstanding subsections (a) and (b) of section 201 of the Immigration and Nationality Act, Sergio Lozano shall be eligible for issuance of an immigrant visa or for adjustment of status to that of an alien lawfully admitted for permanent residence upon filing an application for issuance of an immigrant visa under section 204 of such Act or for adjustment of status to lawful permanent resident.

(b) ADJUSTMENT OF STATUS.—If Sergio Lozano enters the United States before the filing deadline specified in subsection (c), he shall be considered to have entered and remained lawfully and shall, if otherwise eligible, be eligible for adjustment of status under section 245 of the Immigration and Nationality Act as of the date of the enactment of this Act.

(c) DEADLINE FOR APPLICATION AND PAYMENT OF FEES.—Subsections (a) and (b) shall apply only if the application for issuance of an immigrant visa or the application for adjustment of status are filed with appropriate fees within 2 years after the date of the enactment of this Act.

(d) REDUCTION OF IMMIGRANT VISA NUMBER.—Upon the granting of an immigrant visa or permanent residence to Sergio Lozano, the Secretary of State shall instruct the proper officer to reduce by one, during the current or next following fiscal year, the total number of immigrant visas that are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas that are made available to natives of the country of the alien's birth under section 202(e) of such Act.

Amend the title to read as follows: "For the relief of Sergio Lozano".

Ms. COLLINS. I ask unanimous consent the committee substitute be agreed to, the bill be read the third time and passed, the amendment to the title be agreed to, the motion reconsider be laid upon the table, and any

statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 276), as amended, was read the third time and passed, as follows:

S. 276

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PERMANENT RESIDENT STATUS FOR SERGIO LOZANO.

(a) IN GENERAL.—Notwithstanding subsections (a) and (b) of section 201 of the Immigration and Nationality Act, Sergio Lozano shall be eligible for issuance of an immigrant visa or for adjustment of status to that of an alien lawfully admitted for permanent residence upon filing an application for issuance of an immigrant visa under section 204 of such Act or for adjustment of status to lawful permanent resident.

(b) ADJUSTMENT OF STATUS.—If Sergio Lozano enters the United States before the filing deadline specified in subsection (c), he shall be considered to have entered and remained lawfully and shall, if otherwise eligible, be eligible for adjustment of status under section 245 of the Immigration and Nationality Act as of the date of the enactment of this Act.

(c) DEADLINE FOR APPLICATION AND PAYMENT OF FEES.—Subsections (a) and (b) shall apply only if the application for issuance of an immigrant visa or the application for adjustment of status are filed with appropriate fees within 2 years after the date of the enactment of this Act.

(d) REDUCTION OF IMMIGRANT VISA NUMBER.—Upon the granting of an immigrant visa or permanent residence to Sergio Lozano, the Secretary of State shall instruct the proper officer to reduce by one, during the current or next following fiscal year, the total number of immigrant visas that are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas that are made available to natives of the country of the alien's birth under section 202(e) of such Act.

Amend the title to read as follows: "For the relief of Sergio Lozano".

MINTING OF COINS IN CONJUNCTION WITH REPUBLIC OF ICELAND

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 3373, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3373) to require the Secretary of the Treasury to mint coins in conjunction with the minting of coins by the Republic of Iceland in commemoration of the millenium of the discovery of the new world by Leif Ericson.

There being no objection, the Senate proceeded to consider the bill.

Mr. GRAMM. Mr. President, I rise today to speak in support of H.R. 3373, the Leif Ericson Millennium Commemorative Coin Act. This bill authorizes three separate commemorative

coin programs which will commemorate the following historic events: the millennial anniversary of Leif Ericson's discovery of the New World, the bicentennial of the Lewis and Clark expedition, and the bicentennial of the first meeting of the United States Congress in the Capitol building after moving to Washington, D.C.

Companion bills for each of the three coin programs included in H.R. 3373 have also been introduced separately in the Senate. All three of the free-standing bills, S.1710, S. 1187, and S. 1468, have satisfied the rules of the Senate Committee on Banking, Housing, and Urban Affairs on commemorative coin legislation, including having obtained a minimum of sixty-seven Senate cosponsors. The effort to combine the three bills and pass them as one coin package has been worked out by the House and Senate Banking Committees, and this bill was subsequently introduced and passed by the House of Representatives.

Mr. President, this legislation has the support of the Committee on Banking, Housing, and Urban Affairs as it fully meets the standards set forth by the committee and furthermore, each bill adheres to the commemorative coin reforms enacted in the 104th Congress. Those reforms were necessary to keeping the time-honored pastime of coin collecting from becoming overrun with far too many coin programs commemorating events or figures of lesser national recognition. I look forward to swift enactment of this legislation.

Mr. HARKIN. Mr. President, I am pleased to support H.R. 3373, providing for the minting of a Leif Ericson Millennium Commemorative dollar coin. This bipartisan legislation would authorize the U.S. Mint to issue a coin jointly with the Icelandic National Bank in commemoration of Leif Ericson and his voyage and exploration of North America. The part of the measure concerning Leif Ericson is identical to S. 1710 that Senator GRAMS and I introduced which has the support of 74 Senators. The House bill was introduced by Congressman JIM LEACH of my home state of Iowa who has worked hard toward the passage of this measure. I want to commend him for his good work.

The famous Viking explorer is regarded as the first European to set foot on North American soil in the year 1000 AD. In a time of sea voyages and land exploration, perhaps the most recognized Viking in history is Leif Ericson. Ericson's determination, nobility and spirit of exploration are demonstrated in his Voyage of Discovery. Next year marks the 1000th anniversary of Leif Ericson's Voyage of Discovery and this coin will commemorate this landmark event in North American history.

Leif Ericson, son of Eric the Red, was born in Iceland in the mid 900's AD. There he learned about reading and

writing runes, the Celtic and Russian tongue and the ways of trade. Ericson was also taught the old sagas, plant studies and the use of weapons. As a young boy, Ericson and his friends would spend time watching ships coming in and out of the harbor and dream about someday going on voyage of their own. Ericson grew to be a large and imposing man, one known for his far judgment and honesty. Having his father's adventurous hand, Ericson had a strong urge to travel and explore.

Ericson was able to do some traveling between Iceland and Greenland, but his major Voyage of Discovery did not occur until 1000 AD, when explorer Bjarni Herjólfsson relayed exciting news of a new land that he had seen when he lost his course in the fog. Ericson bought Herjólfsson's ship, gathered a crew of 35, and sailed westward. Unlike today, Ericson's voyages on the sea were without many modern conveniences. He did not travel by a motor-powered ship, nor have any of today's advanced technological navigational tools. Instead, Ericson and his small crew used the wind and tides as their primary source of motive power, relying on the weather as the engine for his vessel. His Viking ship did not do too well against hard winds with their single sails, but fortunately, fair weather allowed Ericson to navigate 600 miles west up the western coast. Soon he was following the outlines of the new lands he had heard of.

The first island Ericson landed on was among glaciers and seemed to be one huge slab of rock. Because of this he named it Helluland (Slab Land or Flat Rock Land), which is now believed to be Baffin Island. Ericson then sailed south and found another land that was flat with white beaches and some trees. He named this land Markland (Woodland) which today is believed to be Labrador on the eastern coast of Canada.

Finally, Ericson sailed southeast for two days and came to an island with a mainland. On this land the Viking explorer and his crew came upon an abundance of grapes as well as vegetation they had never seen before. They also were astounded by the size of fish and other animal life they saw while exploring this land. Ericson and his crew settled in for the winter, but the winter here was very peculiar. No frost came to the grasses. They also noticed that the days and nights were of more equal length here. When spring came and the men were ready to go, Ericson gave this land the name Vinland, which either means Wineland or Pastureland. Vinland is believed to be today's L'Anse aux Meadows in Newfoundland and archaeological findings of this winter camp seem to confirm this belief.

Ericson's Voyage of Discovery is a significant event in North American history and symbolizes a long relationship between the U.S. and Iceland. The

Government of Iceland is an important North Atlantic Treaty Organization (NATO) ally and this action would reiterate our strong relationship with and support for their nation. Iceland votes with the United States on virtually all United Nations and NATO issues and has formulated foreign policies parallel to ours. They also are cutting costs at our military base in Keflavik. Iceland has refrained from whaling, encouraged more U.S. trade and investment and initiated a partnership with the state of Alaska. The Government of Iceland has already approved a silver 1000 Kroner Icelandic coin to be produced by the U.S. Mint that will be packaged and issued simultaneously with the U.S. Leif Ericson Commemorative Coin. We believe jointly issuing these coins will help further relations between our nations.

The United States Congress strengthened U.S.-Icelandic relations in 1930 by presenting a statue of Leif Ericson as a gift to Iceland memorializing Ericson's Voyage of Discovery. In 1964, President Lyndon B. Johnson made October 9 "Leif Ericson Day" in commemoration of the famous Viking explorer. The Leif Ericson Commemorative Coin in the year 2000 would commemorate the millennial anniversary of Ericson's voyage and would display our commitment to continuing this relationship for the coming millennium.

H.R. 3373 allows a simultaneous issuance of a commemorative U.S. silver dollar coin and a silver 1000 Kroner Icelandic coin. Both coins are to be produced in limited mintages, with U.S. Mint issuing a boxed set. Mint and surcharge proceeds from the coins will fund scholarships and student exchange programs between Iceland and United States. The U.S. Mint has read and approved the identical House version as meeting all the guidelines contained in the 1995 Congressional House Banking Committee Commemorative Coin Reforms Act, which protects the taxpayer from any costs. We feel such a coin is an important step in recognizing the important role Iceland has played in North American history. H.R. 3373 also provides for a Lewis and Clark Expedition Commemorative Coin which I strongly support and a Capitol Visitor Center Commemorative Coin.

Ms. COLLINS. Mr. President, I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and that any statement relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3373) was read the third time and passed.

REAUTHORIZING OVERSEAS PRIVATE INVESTMENT CORPORATION AND TRADE AND DEVELOPMENT AGENCY

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 3381, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3381) to reauthorize the Overseas Private Investment Corporation and the Trade and Development Agency, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. Mr. President, I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and that any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3381) was read the third time and passed.

MIAMI, FLORIDA, AS PERMANENT LOCATION FOR SECRETARIAT OF FTAA

Ms. COLLINS. Mr. President, I ask unanimous consent that the Finance Committee be discharged from further consideration of S. Con. Res. 71 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 71) expressing the sense of the Congress that Miami, Florida, and not a foreign competing foreign city, should serve as the permanent location for the Secretariat of the Free Trade Area of the Americas (FTAA) beginning in 2005.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 71) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 71

Whereas deliberations on establishing a "Free Trade Area of the Americas" (FTAA) will help facilitate greater cooperation and understanding on trade barrier reduction throughout the Americas;

Whereas the trade ministers of 34 countries of the Western Hemisphere agreed in 1998 to create a permanent Secretariat in order to

support negotiations on establishing the FTAA;

Whereas the FTAA Secretariat will employ persons to provide logistical, administrative, archival, translation, publication, and distribution support for the negotiations;

Whereas the FTAA Secretariat will be funded by a combination of local resources and institutional resources from a tripartite committee consisting of the Inter-American Development Bank (IDB), the Organization of American States (OAS), and the United Nations Economic Commission on Latin America and the Caribbean (ECLAC);

Whereas the temporary site of the FTAA Secretariat will be located in Miami, Florida, from 1999 until February 28, 2001, at which point the Secretariat will rotate to Panama City, Panama, until February 28, 2003, and then rotate to Mexico City, Mexico, until February 28, 2005;

Whereas by 2005 the FTAA Secretariat will have international institution status providing jobs and tremendous economic benefits to its host city;

Whereas a permanent site for the FTAA Secretariat after 2005 will likely be selected from among the 3 temporary host cities;

Whereas the city of Miami, Miami-Dade County, and the State of Florida have long served as the gateway for trade with the Caribbean and Latin America;

Whereas trade between the city of Miami, Florida, and the countries of Latin America and the Caribbean totaled \$36,793,000,000 in 1998;

Whereas the Miami-Dade area and the State of Florida possess the necessary infrastructure, local resources, and culture necessary for the FTAA Secretariat's permanent site;

Whereas the United States possesses the world's largest economy and is the leading proponent of trade liberalization throughout the world; and

Whereas the city of Miami, Florida, the State of Florida, and the United States are uniquely situated among other competing locations to host the "Brussels of the Western Hemisphere": Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should direct the United States representative to the "Free Trade Area of the Americas" (FTAA) negotiations to use all available means in order to secure Miami, Florida, as the permanent site of the FTAA Secretariat after February 28, 2005.

CONDEMNING VIOLENCE IN CHECHNYA

Ms. COLLINS. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of S. Res. 223 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 223) condemning the violence in Chechnya.

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, a technical amendment to the preamble be agreed to, the pre-

amble, as amended, be agreed to, the motion to reconsider be laid upon the table, and that any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2791

(Purpose: To make clerical corrections)

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS], for Mr. HELMS, proposes an amendment numbered 2791.

The amendment is as follows:

In the second whereas clause of the preamble, strike "is" and insert "are".

The amendment (No. 2791) was agreed to.

The resolution (S. Res. 223) was agreed to.

The preamble, as amended, was agreed to.

The resolution, with its preamble, as amended, is as follows:

[The resolution was not available for printing. It will appear in a future edition of the RECORD.]

FREEDOM OF BELIEF, EXPRESSION, AND ASSOCIATION IN THE PEOPLES REPUBLIC OF CHINA

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 404, S. Res. 217.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 217) relating to the freedom of belief, expression, and association in the People's Republic of China.

There being no objection, the Senate proceeded to consider the resolution which had been reported from the Committee on Foreign Relations with amendments to the preamble, as follows:

(The parts of the preamble intended to be stricken are shown in boldface brackets, and the parts of the preamble intended to be inserted are shown in italic.)

S. RES. 217

Whereas the United Nations Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights affirm the freedoms of thought, conscience, religion, expression, and assembly as fundamental human rights belonging to all people;

Whereas the United Nations Universal Declaration of Human Rights is a common standard of achievement for all peoples and all nations, including the People's Republic of China, a member of the United Nations;

Whereas the People's Republic of China has signed the International Covenant on Civil and Political Rights but has yet to ratify the treaty and thereby make it legally binding;

Whereas the Constitution of the People's Republic of China provides for the freedom of religious belief and the freedom not to believe;

Whereas according to the Department of State and international human rights organizations, the Government of the People's Republic of China does not provide these freedoms but continues to restrict unregistered religious activities and persecutes persons on the basis of their religious practice through measures including harassment, prolonged detention, physical abuse, incarceration, and police closure of places of worship; and

Whereas under the International Religious Freedom Act, the Secretary of State has designated the People's Republic of China as a country of special concern;

[Whereas the Government of the People's Republic of China has issued a decree declaring a wide range of activities illegal and subject to prosecution, including distribution of Falun Gong materials, gatherings or silent sit-ins, marches or demonstrations, and other activities to promote Falun Gong and has begun the trials of several Falun Gong practitioners;

[Whereas the National People's Congress of the People's Republic of China on October 30, 1999, adopted a new law banning and criminalizing groups labeled by the Government of the People's Republic of China as cults; and

[Whereas the Government of the People's Republic of China has officially labeled the Falun Gong meditation group a cult and has formally charged at least four members of the Falun Gong under this new law:] Now, therefore, be it

Resolved, That the Senate calls on the Government of the People's Republic of China to—

(1) release all prisoners of conscience and put an immediate end to the harassment, detention, physical abuse, and imprisonment of Chinese citizens exercising their legitimate rights to free belief, expression, and association; and

(2) demonstrate its willingness to abide by internationally accepted norms of freedom of belief, expression, and association by repealing or amending laws and decrees that restrict those freedoms and proceeding promptly to ratify and implement the International Covenant on Civil and Political Rights.

Mr. HUTCHINSON. Mr. President, I rise in support of S. Res. 217, which calls upon the Government of the People's Republic of China to release all prisoners of conscience, to end its persecution of people of faith, and to abide by internationally accepted human rights standards. This resolution is cosponsored by Senators LOTT, NICKLES, MACK, COVERDELL, COLLINS, FEINGOLD, DURBIN, LEAHY, SNOWE, GORTON, and WELLSTONE.

Mr. President, the crackdown in China is escalating. The most immediate target is Falun Gong—a movement which combines traditional breathing exercises with elements of Buddhism, Taoism and the beliefs of its founder. Since April, when more than 10,000 practitioners of Falun Gong shocked the Chinese government by gathering in front of the leadership compound in Beijing, the Chinese government has tried to systematically eradicate the practice.

The Beijing regime rounded up thousands of practitioners, arrested its leaders, ransacked homes, confiscated

and burned Falun Gong materials, and forced adherents to renounce their beliefs. The government then banned the practice of Falun Gong in July and officially labeled it a cult as part of a nationwide propaganda campaign to discredit practitioners. But this was not enough. On October 30, 1999, in a perverse maneuver, the National People's Congress raised the stakes of persecution by adopting a new law banning and criminalizing groups deemed by the Chinese government to be cults—perverse because this is the Chinese government's way of legitimizing their abuses of human rights—perverse because the law is being applied retroactively.

Protestors of this law faced police who beat, kicked, and yanked the hair of several elderly women protestors. Practitioners, mostly middle-aged or senior citizens, sitting or standing in silent meditation were dragged away from Tiananmen square. But they remained peaceful.

The Chinese government has wasted no time in arresting Falun Gong leaders and charging them under this law. As of November 9, 1999, according to Chinese officials, 111 people had been formally arrested on charges ranging from disrupting state security to stealing state secrets. Many more have been detained and sent to re-education programs or labor camps. Now, at least four leaders have been convicted, with sentences ranging from two to twelve years. Many more will be convicted.

The truth of the matter is that the Chinese government is insecure and cannot tolerate any group that is outside of its control. That is why it is engaged in this crackdown. That is why it sentenced four pro-democracy activists to jail terms ranging from four to 11 years. That is why it continues to persecute people of faith.

In August, police detained a 65-year-old bishop of China's underground Roman Catholic Church in Hebei province and convicted seven lay members of the underground Catholic church in Jiangxi province.

In October, in Guangzhou, some 200 police officers demolished a shelter used by House Church Christians. They detained, brutalized, and warned five House Church Christians against preaching or practicing their faith. I am extremely concerned about the well being of Christians who are suffering in detention for their faith, including Pastor Li Dexian, one of the Guangzhou House Church members, Zhang Ronglian from Henan, and Zheng Xinqi from Anhui.

These incidents are simply anecdotal. They reflect a greater pattern of ongoing religious persecution.

Mr. President, at the same time that the Chinese government is cracking down on its own citizens, at the same time it is authorizing harsher punishments for believing outside of govern-

ment control, the Beijing regime is flouting international norms, and even tossing aside its own constitution, which supposedly provides for the freedom of religious belief and the freedom not to believe.

The freedoms of thought, conscience, religion, expression, and assembly are not "western values" or "American values" that we are trying to impose on China. These values have been embraced by the international community. And it is up to the international community to uphold them when they are being trampled—to speak out in the face of injustice.

This resolution is part of our responsibility. With this resolution, we urge the Chinese government to step back into the realm of international standards, to end its crackdown, and to release its prisoners of conscience. We urge the Chinese government to end its "campaign for stability," which has only caused far greater instability.

Mr. President, I expect that this resolution will be adopted. I also expect that the Clinton Administration will not offer silence as a hidden concession for the WTO agreement signed with China but will instead use this statement by the Senate to strengthen its hand in advocating an end to persecution in China.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, the amendments to the preamble be agreed to, the preamble, as amended, be agreed to, the motions to reconsider be laid upon the table, and any statements relating to this resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 217) was agreed to.

The amendments to the preamble were agreed to.

The preamble, as amended, was agreed to.

The resolution, with its preamble, as amended, reads as follows:

[The resolution was not available for printing. It will appear in a future edition of the RECORD.]

Ms. COLLINS. Mr. President, I note that I am proud to be a cosponsor of this resolution which was introduced by our colleague, Senator HUTCHINSON of Arkansas, who has been a real leader on this issue.

RECOGNIZING 75 YEARS OF SERVICE OF UNITED STATES BORDER PATROL

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 122, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 122) recognizing the United States Border Patrol's 75 years of service since its founding.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 122) was agreed to.

The preamble was agreed to.

CELEBRATING ONE AMERICA

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 390, H. Con. Res. 141.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 141) celebrating One America.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 141) was agreed to.

The preamble was agreed to.

Mr. LEAHY. Mr. President, I commend Representative CHARLES RANGEL for authorizing the "One America" resolution, H. Con. Res. 141, which we just passed.

VETERANS OF THE BATTLE OF THE BULGE

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 371, H.J. Res. 65.

The PRESIDING OFFICER. The Clerk will report the joint resolution by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 65) commending the World War II veterans who fought in the Battle of the Bulge, and for other purposes.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. HUTCHINSON. Mr. President, I rise today in support of H.J. Res. 65, which commends the World War II veterans who fought bravely in the Battle

of the Bulge. This resolution was passed unanimously by the House on October 5, 1999 and mirrors S.J. Res. 32, which I introduced earlier this year.

Mr. President, in mid-1994, the Allies were hopeful. The Russian Red Army was closing in on the German army on the Eastern front and German cities were being devastated by American bombing. The Allies had taken Paris, Casablanca, Tripoli, Naples, and Rome, and they were looking toward an end to the war in Europe. Hitler was on the run.

In desperation, Hitler planned a surprise counterattack on the Allies on an 80 mile front running from southern Belgium to the middle of Luxembourg. Hitler hoped to break through this thinly held line in the Ardennes forest region, cripple Allied fuel supply lines, and inflame tensions within the alliance.

On the harsh winter morning of December 16, 1944, five months after the Allied landings at Normandy, France, eight German armored divisions and thirteen German infantry divisions launched a brutal onslaught against five divisions of the United States first Army. A screaming hail of artillery fire sent many men to their deaths. Roger Rutland, First Sergeant in the 106th Infantry, described the devastation. "We lost many men that first day. An infantry company was approximately 200 men. A Company was 21 men after the first day. C Company could account for 59 men, and in my company, I lost only 28 men the first day. Every company commander was missing the first day except my company's commander . . . some of my better men in garrison were some of the first to crack under combat conditions. They were like hugging each other and just shivering . . . They never had seen such a thing before." The American forces were pushed back. Many ran out of ammunition. After three days of fighting, more than 4,000 of the 106th were forced to surrender. But the American forces regrouped and pressed on.

For forty-one days, American forces fought against two enemies, German forces and the worst European winter in memory. Freezing conditions made it difficult to see more than ten or twenty yards ahead, much less fight out of frozen foxholes. Halfway through the battle, American troops were still waiting for the main shipment of winter boots. Men became cut off from their division. They lost the feeling in their feet as their toes froze. Some had to have their feet amputated at the ankles. Fifteen thousand soldiers were taken off the line because they suffered from frostbite. Some wounded soldiers froze to death. But the American forces did not give in. They pushed on. They were met with brutality.

On December 17th, 140 Americans were taken prisoner at Baugnez. While

on the road headed for Malmedy, 86 of these unarmed American soldiers were shot by their German captors in cold blood in what is now known as the Malmedy Massacre.

In spite of this horror, American soldiers fought on and took the key Belgian town of Bastogne. One of the heroes at Bastogne was James Hendrix, a Private in the 53rd Armored Infantry Battalion, 4th Armored Division and a native of Lepanto, Arkansas. On the night of December 26th, Private Hendrix was part of the leading element in the final thrust to break through to Bastogne. He and his fellow soldiers were met with fierce artillery and small arms fire. But he did not back down. Instead, he advanced against two 88mm guns and overpowered them. He saved two of his fellow soldiers who were wounded, helpless, and at the mercy of intense machine gun fire. He fought on and in another selfless act, Private Hendrix ran through sniper fire and exploding mines to pull a soldier out of a burning half-track. Because of his courage and valor, because of men who fought like him, because of the heroic efforts of the 101st Airborne, American forces fought successfully at Bastogne. Private Hendrix was later awarded a Medal of Honor for his selfless heroism.

When the skies cleared at the end of December, Allied air forces were able to assist the ground forces. By early January 1945, Allied forces began pushing Hitler's troops back. At the end of January, American troops made their way back to the lines they had held when the battle began. Three months later, Allied forces put an end to Nazi Germany.

Six hundred thousand American troops, 55,000 British soldiers, and other Allied participated in the Battle of the Bulge. With catastrophic casualties, the Army constantly had to find new men to take the place of fallen soldiers. Training was cut. Physical standards were lowered. Many of these soldiers were only 18 or 19 years old. At the end of these forty-one days, over 80,000 American soldiers were maimed, captured, or killed. Nineteen thousand gave their lives to stave off the forces of tyranny.

They made sure that we could live in freedom today. I believe that Ronald Reagan put it well when he said, "If we look to the answer as to why for so many years we achieved so much, prospered as no other people of Earth, it was because here in this land we unleashed the energy and individual genius of man to a greater extent than has ever been done before. Freedom and the dignity of the individual have been more available and assured here than in any other place on Earth. The price for this freedom at times has been high. But we have never been unwilling to pay that price."

Mr. President, the soldiers who fought in the Battle of the Bulge

bought with their lives a precious gift for all Americans—freedom. It is this gift that we must continually cherish.

We cannot forget these sons, husbands, and fathers who died for our great country. We cannot forget their families, who endured through days of worry and nights of grief. We cannot forget those men who were exposed to blistering cold, to unyielding enemy fire—to this unimaginable nightmare.

For those who died at Ardennes—for those who were massacred at Malmedy—for those who won at Bastogne, we must remember their sacrifices. There is no more appropriate time than now, for the Senate and the Congress to honor those who fought in the Battle of the Bulge. I urge my colleagues to support this resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the joint resolution be read a third time and passed, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the joint resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (H.J. Res. 65) was read the third time and passed.

The preamble was agreed to.

NATIONAL FAMILY WEEK

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 351, S. Res. 204.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 204) designating the week beginning November 21, 1999, and the week beginning November 19, 2000, as "National Family Week," and for other purposes.

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statement relating to this resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 204) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 204

Whereas the family is the basic strength of any free and orderly society;

Whereas it is in the family that America's youth are nurtured and taught the values vital to success and happiness in life: respect for others, honesty, service, hard work, loyalty, love, and others;

Whereas the family provides the support necessary for people to pursue their goals;

Whereas it is appropriate to honor the family unit as essential to the continued well-being of the United States; and

Whereas it is fitting that official recognition be given to the importance of family loyalties and ties: Now, therefore, be it

Resolved, That the Senate designates the week beginning on November 21, 1999, and the week beginning on November 19, 2000, as "National Family Week". The Senate requests the President to issue a proclamation calling on the people of the United States to observe each week with appropriate ceremonies and activities.

NATIONAL BIOTECHNOLOGY WEEK

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 200.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 200) designating the week of February 14-20 as "National Biotechnology Week."

There being no objection, the Senate proceeded to consider the resolution, which had been reported from the Committee on Foreign Relations with amendments, as follows:

(The parts of the resolution intended to be stricken are shown in boldface brackets and the parts of the resolution intended to be inserted are shown in italic.)

Whereas biotechnology is increasingly important to the research and development of medical, agricultural, industrial, and environmental products;

Whereas biotechnology has been responsible for breakthroughs and achievements which have benefited people for centuries and, in the 20th century, has contributed to increasing the lifespan of Americans by 25 years through the development of vaccines, antibiotics, and other drugs;

Whereas biotechnology is central to research for cures to diseases such as cancer, diabetes, epilepsy, multiple sclerosis, heart and lung disease, Alzheimer's disease, Acquired Immune Deficiency Syndrome (AIDS), and innumerable other medical ailments;

Whereas biotechnology contributes to crop yields and farm productivity and enhances the quality, value, and suitability of crops for food and other uses which are critical to America's agricultural system;

Whereas biotechnology promises environmental benefits including protection of water quality, conservation of topsoil, improvement of waste management techniques, and reduction of chemical pesticide usage;

Whereas biotechnology contributes to the success of the United States in international commerce and trade;

Whereas biotechnology will be an important catalyst for creating jobs in the 21st century; and

Whereas it is important for all Americans to understand the role biotechnology contributes to their quality of life: Now, therefore, be it

Resolved, That the Senate—

(1) designates [the week of February 14-20] January of the year 2000 as "National Biotechnology [Week] Month"; and

(2) requests that the President issue a proclamation calling on the people of the United States to observe this [week] month with appropriate programs, ceremonies, and activities.

Amend the title so as to read: "A resolution designating January 2000 as 'National Biotechnology Month'."

AMENDMENT NO. 2792

Ms. COLLINS. Mr. President, Senator GRAMS has an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS], for Mr. GRAMS, proposes an amendment numbered 2792.

The amendment is as follows:

In the heading of S. Res. 200: strike "the week of February 14-20" and insert "January 2000;" strike the word "week" and insert "Month."

In the title of S. Res. 200: strike "the week of February 14-20" and insert "January 2000;" strike the word "week" and insert "Month."

On page 2 line 2 strike "the week of February 14-20" and insert "January."

On page 2, line 3, strike "Week" and insert "Month."

On page 2, line 7, strike the word "week" and insert "month."

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2792) was agreed to.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution, as amended, be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, the title amendment be agreed to, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 200), as amended, was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

[The resolution was not available for printing. It will appear in a future edition of the RECORD.]

The title was amended so as to read: "A resolution designating January 2000 as 'National Biotechnology Month'."

NATIONAL CHILDREN'S MEMORIAL DAY

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 388, S. Res. 118.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 118) designating December 12, 1999, as "National Children's Memorial Day."

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution

be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 118) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 118

Whereas approximately 80,000 infants, children, teenagers, and young adults of families living throughout the United States die each year from myriad causes;

Whereas the death of an infant, child, teenager, or young adult of a family is considered to be 1 of the greatest tragedies that a parent or family will ever endure during a lifetime; and

Whereas a supportive environment and empathy and understanding are considered critical factors in the healing process of a family that is coping with and recovering from the loss of a loved one: Now, therefore, be it

Resolved,

SECTION 1. DESIGNATION OF NATIONAL CHILDREN'S MEMORIAL DAY.

The Senate—

(1) designates December 12, 1999, as “National Children’s Memorial Day”; and

(2) requests that the President issue a proclamation calling upon the people of the United States to observe the day with appropriate ceremonies and activities in remembrance of the many infants, children, teenagers, and young adults of families in the United States who have died.

Ms. COLLINS. Mr. President, I also note that the Senator from Nevada is the chief sponsor of this resolution designating December 12 as “National Children’s Memorial Day.” I wanted to recognize his efforts.

DESIGNATING A DAY TO “GIVE THANKS, GIVE LIFE”

Ms. COLLINS. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from consideration of S. Res. 225 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 225) to designate November 23, 2000, Thanksgiving Day, as a day to “Give Thanks, Give Life” and to discuss organ and tissue donation with other family members.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DURBIN. Mr. President, I am delighted to join with my distinguished colleagues, Senators FRIST, DEWINE, KENNEDY, LEVIN and others in supporting the passage of Senate Resolution 225, which designates November 23, 2000, Thanksgiving Day, as a day for families to discuss organ and tissue donation with other family members and to Give Thanks, Give Life. The purpose

of this legislation is to encourage discussions concerning family members’ intentions to donate their organs so that informed decisions can be made if the occasion to donate arises.

As we prepare to recess for the Thanksgiving holiday, we are all aware that this is one of the few times throughout the year for families to take time out of their busy lives to come together and give thanks for the many blessings in their lives. This occasion presents an ideal opportunity for family members to have frank discussions about their intentions on the issue of organ and tissue donation. This is a discussion about life and sharing the gift of life and fits perfectly with the theme of Thanksgiving Day. Although family members may have already designated themselves as organ donors on their driver’s license or voter registration, that step does not ensure donation will take place since the final decision on whether a potential donor will share the gift of life is usually made by surviving family members regardless of their loved one’s initial intent.

There are approximately 21,000 men, women, and children in the United States who receive the gift of life each year through transplantation surgery made possible by the generosity of organ and tissue donors. This is only a small proportion of the more than 66,000 Americans who are on the waiting list, hoping for their chance to prolong their lives by finding a matching donor. Tragically, nearly 5,000 of these patients each year, or 13 patients each day, die while waiting for a donated heart, liver, kidney, or other organ.

In order to narrow the gap between the supply and the increasing demand for donated organs, we must step up our effort to encourage willing donors to make their desire to donate clear to the only people usually able to make the decision if the occasion should arise—their immediate family members. Although there are up to 15,000 potential donors annually, families’ consent to donation is received for less than 6,000 donors. As the demand for transplantation increases due to prolonged life expectancy and increased prevalence of diseases that lead to organ damage and failure, including hypertension, alcoholism, and hepatitis C infection, this shortfall will become even more pronounced. Additionally, the need for a more diverse donor pool, including a variety of racial and ethnic minorities, will also continue to grow with the predicted population trends.

Many Americans will spend part of the Thanksgiving Day with some of those family members who would be most likely approached to make the important decision of whether or not to donate. Therefore, this would be a good time for families to spend a portion of that day discussing how they might give life to others on a day de-

voted to giving thanks for their own blessings. Open family discussions on this topic on a day of relaxation and family togetherness will increase awareness of the intentions of those willing to make the courageous and selfless decision to be organ donors, leading to more lifesaving transplants in the future. Designation of November 23, 2000, Thanksgiving Day, as a day for families to Give Thanks, Give Life is an important next step to promoting the dialogue between willing donors and their families, so that family members will know their loved ones’ wishes long before the issue arises.

We have received a great outpouring of support for this resolution from many of the national organ and tissue donation organizations, including the American Heart Association, American Kidney Fund, American Liver Foundation, American Lung Association, American Society of Transplant Surgeons, American Thoracic Society, Association of Organ Procurement Organizations, Coalition on Donation, Eye Bank Association of America, James Redford Institute for Transplant Awareness, National Kidney Foundation, National Minority Organ and Tissue Transplant Education Program (MOTTEP), Transplant Recipients International Organization (TRIO), United Network for Organ Sharing (UNOS), and the Wendy Marks Foundation for Organ Donor Awareness. The tireless efforts of these groups and others have been critical in increasing donor awareness and education of the public on this extremely important cause. Their willingness to become involved with the Give Thanks, Give Life resolution and to provide their expertise in the development and implementation of a national campaign targeted at Thanksgiving 2000 will be invaluable in making this a national event with far-reaching effects.

The adoption of this resolution is a small victory for the organ donation awareness cause, but we must not forget the many casualties who have died awaiting a donated organ. One tragic loss that so many of us can relate to is the recent death of Walter Payton, an American hero. He contracted a rare liver disease that is often cured if the patient can receive a liver transplant. In Payton’s case, the risk of deadly complications grew too quickly for him to be saved. He likely would have had to wait for years for his life-saving organ. The prevention of deaths like that of this great man and of so many other silent heroes is why our efforts in this life-saving cause must continue. A day must come when no one dies because there is no available liver, kidney, heart, lung or other organ to save his or her life.

Mr. President, I thank all of my colleagues for joining me in supporting this worthwhile resolution designating Thanksgiving day of 2000 as a day for

families to discuss organ and tissue donation with other family members, a day to "Give Thanks, Give Life."

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution and the preamble be agreed to, en bloc, the motion to reconsider be laid upon the table, and that any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 225) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 225

Whereas traditionally, Thanksgiving is a time for families to take time out of their busy lives to come together and to give thanks for the many blessings in their lives;

Whereas approximately 21,000 men, women, and children in the United States are given the gift of life each year through transplantation surgery, made possible by the generosity of organ and tissue donations;

Whereas more than 66,000 Americans are awaiting their chance to prolong their lives by finding a matching donor;

Whereas nearly 5,000 of these patients each year (or 13 patients each day) die while waiting for a donated heart, liver, kidney, or other organ;

Whereas nationwide there are up to 15,000 potential donors annually, but families' consent to donation is received for less than 6,000;

Whereas the need for organ donations greatly exceeds the supply available;

Whereas designation as an organ donor on a driver's license or voter's registration is a valuable step, but does not ensure donation when an occasion arises;

Whereas the demand for transplantation will likely increase in the coming years due to the growing safety of transplantation surgery due to improvements in technology and drug developments, prolonged life expectancy, and increased prevalence of diseases that may lead to organ damage and failure, including hypertension, alcoholism, and hepatitis C infection;

Whereas the need for a more diverse donor pool, including a variety of racial and ethnic minorities, will continue to grow in the coming years;

Whereas the final decision on whether a potential donor can share the gift of life usually is made by surviving family members regardless of the patient's initial intent;

Whereas many Americans have indicated a willingness to donate their organs and tissues but have not discussed this critical matter with the family members who are most likely to make the decision, if the occasion arises, as to whether that person will be an organ and tissue donor;

Whereas some family members may be reluctant to give consent to donate their deceased loved one's organs and tissues at a very difficult and emotional time if that person has not clearly expressed a desire or willingness to do so;

Whereas the vast majority of Americans are likely to spend part of Thanksgiving Day with some of those family members who would be approached to make such a decision; and

Whereas it is fitting for families to spend a portion of that day discussing how they might give life to others on a day devoted to

giving thanks for their own blessings: Now, therefore, be it

Resolved, That the Senate designate November 23, 2000, Thanksgiving Day, as a day to "Give Thanks, Give Life" and to discuss organ and tissue donation with other family members so that informed decisions can be made if the occasion to donate arises.

RECOGNIZING CONTRIBUTIONS OF OLDER PERSONS

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 234 recognizing the contribution of older persons to their communities, submitted earlier today by Senator BAYH and others.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. 234) recognizing the contribution of older persons to their communities and commending the work of organizations that participate in programs assisting elderly persons and that promote the goal of the International Year of Older Persons.

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAYH. Mr. President, today I rise as the author of the International Year of the Older Persons resolution to recognize the contributions of all the individuals, organizations and agencies that have worked hard to participate in the United Nations declared "International Year of the Older Persons." Since 1999 has been declared the Year of the Older Persons, around the world seniors, organizations active in senior issues, and representatives of all generations have spread the message that collectively we should create an environment in which seniors can remain active in their communities during each and every stage of their life. This resolution pays tribute to all the United States' participants for representing our country in the various events held in celebration of the International Year of the Older Persons. They have been active throughout the year. It is time Congress added its voice and support the efforts of these organizations and individuals. This resolution serves as a first step in the role Congress can play to assist with the advancement of this year's theme and goals.

The theme of the year, a "society for all ages," recognizes that longevity is relevant to all stages of the life cycle, and that successful aging is a product of long-term planning, lifelong decisions. It is important for the world to reflect upon this theme. Too often in America we focus on the negative images associated with aging and not the contributions that are made when people remain productive throughout their lifetime. America needs to celebrate that Americans are living longer! We need to acknowledge that aging can be a positive process that benefits everyone in our communities.

The most important goals of the year are to increase awareness about aging within countries and across national boundaries and to formulate policies and programs to promote the well-being of older persons. The principles highlighted by the resolution include independence, participation, care, self-fulfillment, and dignity. The purpose of the year is to empower people to spend their senior years happy and healthy. Although the goals and principles of this year have been advanced internationally, we need to particularly acknowledge that the United States has been well represented by several organizations such as the Federal Committee to Prepare for the International Year of Older Persons, the Leadership Council of Aging Organizations, and the American Association for International Aging.

While America's senior organizations have been deeply involved, it is my hope is this resolution will serve as a signal that it is important for Congress to take the goals set forth this year and continue the efforts to achieve them. Congress should take the leadership the United Nations has provided on this issue and continue to build momentum. We need to not only recognize and assist those spreading the message but implement legislation that actively addresses the needs of seniors. As a member of the Special Committee on Aging, I have learned about the issues that seniors face and have explored viable administrative and legislative solutions.

I know America needs to be better prepared for its future aging population. Currently, about 12.8 million Americans report needing long-term care. By 2018, it is estimated that there will be 3.6 million elderly persons in need of a nursing home bed, an increase of two million from the current future. By 2030, the number of Americans in nursing homes will double and the cost of caring for them will quadruple. Part of creating a society for all ages includes addressing the needs of all ages.

Long-term care insurance is an option that should be more widely discussed among younger people as they begin to prepare for their retirement or senior years. However, often we need raise awareness and encourage people to take responsibility. That is why I support a tax deduction for the purchase of long-term care insurance. In addition, with an increasing number of people needing long-term care, we should make various options for long-term care more available and affordable.

While long-term care insurance for community-based care is one option, being cared for by a loved one at home should be another option. Therefore, in August, I introduced S. 1518, the Caregivers Assistance and Resources Enhancement (CARE) tax credit. It takes courage and dedication to take care of

a loved one at home and the least we can do is make the process less financially burdensome. Research indicates that the services provided by family caregivers annually are valued at \$196 billion. The care these families provide at home is not only more compassionate, it saves the government billions of dollars. Annually, we spend \$83 billion in nursing home care and \$32 billion in formal home health care, we should thank caregivers by providing them with some economic relief.

There is still a great deal of work that can be done to take care of current seniors and prepare for the future. We need to have the difficult discussions and search for the solutions.

I want to thank Senator GRASSLEY and Senator BREAUX for their support and involvement on this resolution and for their leadership on the Special Committee on Aging.

I commend all the organizations and individuals who have worked so hard throughout the year to help spread the message associated with the International Year of the Older Persons. As America works the remainder of this year and in the years to come to achieve the goals set forth by the International Year of the Older Persons, we need to seriously consider what we in Congress can do to create a society for all ages.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution and preamble be agreed to, en bloc, the motion to reconsider be laid upon the table, and any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 234) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

[The resolution was not available for printing. It will appear in a future edition of the RECORD.]

HONORING HEROIC EFFORTS OF AIR NATIONAL GUARD'S 109TH Airlift Wing

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 205, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 205) recognizing and honoring the heroic efforts of the Air National Guard's 109th Airlift Wing and its rescue of Dr. Jerri Nielsen from the South Pole.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the concur-

rent resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements relating to the concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 205) was agreed to.

The preamble was agreed to.

COMMENDING UNITED STATES NAVY ON 100TH ANNIVERSARY OF SUBMARINE FORCE

Ms. COLLINS. Mr. President, I ask unanimous consent that the Armed Services Committee be discharged from further consideration of S. Res. 196 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 196) commending the submarine force of the United States Navy on the 100th anniversary of the force.

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 196) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 196

Whereas the submarine force of the United States was founded with the purchase of the U.S.S. HOLLAND on April 11, 1900;

Whereas in overcoming destruction resulting from the attack of United States forces at Pearl Harbor, Hawaii, on December 7, 1941, and difficulties with defective torpedoes, the submarine force destroyed 1,314 enemy ships in World War II (weighing a cumulative 5,300,000 tons), which accounts for 55 percent of all enemy ships lost in World War II;

Whereas 16,000 United States submariners served with courage during World War II, and 7 United States submariners were awarded Congressional Medals of Honor for their distinguished gallantry in combat above and beyond the call of duty;

Whereas in achieving an impressive World War II record, the submarine force suffered the highest casualty rate of any combatant submarine service of the warring alliances, losing 375 officers and 3,131 enlisted men in 52 submarines;

Whereas from 1948 to 1955, the submarine force, with leadership provided by Admiral Hyman Rickover and others, developed an industrial base in a new technology, pioneered new materials, designed and built a prototype reactor, established a training program, and took to sea the world's first nuclear-powered submarine, the U.S.S. NAUTILUS, thus providing America undersea superiority;

Whereas subsequent to the design of the U.S.S. NAUTILUS, the submarine force continued to develop and put to sea the world's most advanced and capable submarines, which were vital to maintaining our national security during the Cold War;

Whereas the United States Navy, with leadership provided by Admiral Red Raborn, developed the world's first operational ballistic missile submarine, which provided an invaluable asset to our Nation's strategic nuclear deterrent capability, and contributed directly to the eventual conclusion of the Cold War; and

Whereas in 1999, the submarine force provides the United States Navy with the ability to operate around the world, independent of outside support, from the open ocean to the littorals, carrying out multimission taskings on tactical, operational, and strategic levels: Now, therefore, be it

Resolved,

(a) That the Senate—

(1) commends the past and present personnel of the submarine force of the United States Navy for their technical excellence, accomplishments, professionalism, and sacrifices; and

(2) congratulates those personnel for the 100 years of exemplary service that they have provided the United States.

(b) It is the sense of the Senate that, in the next millennium, the submarine force of the United States Navy should continue to comprise an integral part of the Navy, and to carry out missions that are key to maintaining our great Nation's freedom and security as the most superior submarine force in the world.

ORDER FOR REVISION OF STANDING RULES OF THE SENATE AND PRINTING OF A SENATE DOCUMENT

Ms. COLLINS. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be directed to prepare a revised edition of the Standing Rules of the Senate and that such Standing Rules be printed as a Senate document. I further ask unanimous consent that beyond the usual number, 2,500 additional copies of this document be printed for the use of the Committee on Rules and Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZING THE PRINTING OF A REVISED EDITION OF THE SENATE ELECTION LAW GUIDEBOOK

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 235, submitted earlier by Senator MCCONNELL.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 235) to authorize the printing of a revised edition of the Senate Election Law Guidebook.

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution

be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 235) was agreed to, as follows:

S. RES. 235

Resolved, That the Committee on Rules and Administration shall prepare a revised edition of the Senate Election Law Guidebook, Senate Document 105-12, and that such document shall be printed as a Senate document.

SEC. 2. There shall be printed, beyond the usual number, 600 additional copies of the document specified in the first section for the use of the Committee on Rules and Administration.

AUTHORIZING THE PRINTING OF A REVISED EDITION OF THE NOMINATION AND ELECTION OF THE PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 236, submitted earlier by Senator McConnell.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 236) to authorize the printing of a revised edition of the Nomination and Election of the President and Vice President of the United States.

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 236) was agreed to, as follows:

S. RES. 236

Resolved, That the Committee on Rules and Administration shall prepare a revised edition of the document entitled Nomination and Election of the President and Vice President of the United States, Senate Document 102-14, and that such document shall be printed as a Senate document.

SEC. 2. There shall be printed, beyond the usual number, 600 additional copies of the document specified in the first section for the use of the Committee on Rules and Administration.

AUTHORIZING THE PRINTING OF BROCHURES

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 221, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 221) authorizing printing of the brochures entitled "How Our Laws Are Made" and "Our American Government", the pocket version

of the United States Constitution, and the document-sized, annotated version of the United States Constitution.

There being no objection, the Senate proceeded to consider the concurrent resolution.

AMENDMENT NO. 2793

(Purpose: To authorize the printing of documents)

Ms. COLLINS. Mr. President, there is a substitute amendment at the desk, and I ask for its consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS] for Mr. McConnell, for himself and Mr. ROBB, proposes an amendment numbered 2793.

The amendment is as follows:

Strike all after the resolving clause and insert the following:

SECTION 1. OUR AMERICAN GOVERNMENT.

(a) IN GENERAL.—The 1999 revised edition of the brochure entitled "Our American Government" shall be printed as a House document under the direction of the Joint Committee on Printing.

(b) ADDITIONAL COPIES.—In addition to the usual number, there shall be printed the lesser of—

(1) 550,000 copies of the document, of which 440,000 copies shall be for the use of the House of Representatives, 100,000 copies shall be for the use of the Senate, and 10,000 copies shall be for the use of the Joint Committee on Printing; or

(2) such number of copies of the document as does not exceed a total production and printing cost of \$412,873, with distribution to be allocated in the same proportion as described in paragraph (1), except that in no case shall the number of copies be less than 1 per Member of Congress.

SEC. 2. DOCUMENT-SIZED, ANNOTATED UNITED STATES CONSTITUTION.

(a) IN GENERAL.—The 1999 edition of the document-sized, annotated version of the United States Constitution shall be printed as a House document under the direction of the Joint Committee on Printing.

(b) ADDITIONAL COPIES.—In addition to the usual number, there shall be printed the lesser of—

(1) 550,000 copies of the document, of which 440,000 copies shall be for the use of the House of Representatives, 100,000 copies shall be for the use of the Senate, and 10,000 copies shall be for the use of the Joint Committee on Printing; or

(2) such number of copies of the document as does not exceed a total production and printing cost of \$393,316, with distribution to be allocated in the same proportion as described in paragraph (1), except that in no case shall the number of copies be less than 1 per Member of Congress.

SEC. 3. HOW OUR LAWS ARE MADE.

(a) IN GENERAL.—An edition of the brochure entitled "How Our Laws Are Made", as revised under the direction of the Parliamentarian of the House of Representatives in consultation with the Parliamentarian of the Senate, shall be printed as a House document under the direction of the Joint Committee on Printing.

(b) ADDITIONAL COPIES.—In addition to the usual number, there shall be printed the lesser of—

(1) 550,000 copies of the document, of which 440,000 copies shall be for the use of the House of Representatives, 100,000 copies shall

be for the use of the Senate, and 10,000 copies shall be for the use of the Joint Committee on Printing; or

(2) such number of copies of the document as does not exceed a total production and printing cost of \$200,722, with distribution to be allocated in the same proportion as described in paragraph (1), except that in no case shall the number of copies be less than 1 per Member of Congress.

SEC. 4. POCKET VERSION OF THE UNITED STATES CONSTITUTION.

(a) IN GENERAL.—The 20th edition of the pocket version of the United States Constitution shall be printed as a House document under the direction of the Joint Committee on Printing.

(b) ADDITIONAL COPIES.—In addition to the usual number, there shall be printed the lesser of—

(1) 550,000 copies of the document, of which 440,000 copies shall be for the use of the House of Representatives, 100,000 copies shall be for the use of the Senate, and 10,000 copies shall be for the use of the Joint Committee on Printing; or

(2) such number of copies of the document as does not exceed a total production and printing cost of \$115,208, with distribution to be allocated in the same proportion as described in paragraph (1), except that in no case shall the number of copies be less than 1 per Member of Congress.

SEC. 5. CAPITOL BUILDER: THE SHORTHAND JOURNALS OF CAPTAIN MONTGOMERY C. MEIGS, 1853-1861.

(a) IN GENERAL.—There shall be printed as a Senate document the book entitled "Capitol Builder: The Shorthand Journals of Captain Montgomery C. Meigs, 1853-1861", prepared under the direction of the Secretary of the Senate, in consultation with the Clerk of the House of Representatives and the Architect of the Capitol.

(b) SPECIFICATIONS.—The Senate document described in subsection (a) shall include illustrations and shall be in the style, form, manner, and binding as directed by the Joint Committee on Printing after consultation with the Secretary of the Senate.

(c) NUMBER OF COPIES.—In addition to the usual number of copies, there shall be printed with suitable binding the lesser of—

(1) 1,500 copies for the use of the Senate, the House of Representatives, and the Architect of the Capitol, to be allocated as determined by the Secretary of the Senate and the Clerk of the House of Representatives; or

(2) a number of copies that does not have a total production and printing cost of more than \$31,500.

SEC. 6. THE UNITED STATES CAPITOL: A CHRONICLE OF CONSTRUCTION, DESIGN, AND POLITICS.

(a) IN GENERAL.—There shall be printed as a Senate document the book entitled "The United States Capitol: A Chronicle of Construction, Design, and Politics", prepared by the Architect of the Capitol.

(b) SPECIFICATIONS.—The Senate document described in subsection (a) shall include illustrations and shall be in the style, form, manner, and binding as directed by the Joint Committee on Printing after consultation with the Secretary of the Senate.

(c) NUMBER OF COPIES.—In addition to the usual number of copies, there shall be printed with suitable binding the lesser of—

(1) 6,500 copies for the use of the Senate, the House of Representatives, and the Architect of the Capitol, to be allocated as determined by the Secretary of the Senate; or

(2) a number of copies that does not have a total production and printing cost of more than \$143,000.

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to, the resolution be agreed to, as amended, the motion to reconsider be laid upon the table, and any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2793) was agreed to.

The concurrent resolution (H. Con. Res. 221), as amended, was agreed to.

RECOGNIZING THE 4-H YOUTH DEVELOPMENT PROGRAM'S CENTENNIAL

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of S. Res. 218, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 218) expressing the sense of the Senate that a commemorative postage stamp should be issued recognizing the 4-H Youth Development Program's centennial.

There being no objection, the Senate proceeded to consider the resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed, the preamble be agreed to, the motion to reconsider be laid upon the table, and finally that any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 218) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 218

Whereas the 4-H Youth Development Program celebrates its 100th anniversary in 2002;

Whereas the 4-H Youth Development Program has grown to over 5,600,000 annual participants, from 5 to 19 years of age;

Whereas today's 4-H Club is very diverse, offering agricultural, career development, information technology, and general life skills program;

Whereas these programs are offered in rural and urban areas throughout the world; and

Whereas the 4-H Youth Development Program continues to make great contributions toward the development of well-rounded youth; Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the United States Postal Service should make preparations to issue a commemorative postage stamp recognizing the 4-H Youth Development Program's centennial; and

(2) the Citizens' Stamp Advisory Committee should recommend to the Postmaster General that such a postage stamp be issued in 2002.

HONORING THE MEMBERS OF THE ARMED FORCES WHO HAVE BEEN AWARDED THE PURPLE HEART

Ms. COLLINS. Mr. President, I ask unanimous consent that the committee on Governmental Affairs be discharged from further consideration of S. Con. Res. 42, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 42) expressing the sense of the Congress that a commemorative postage stamp should be issued by the United States Postal Service honoring the members of the Armed Forces who have been awarded the Purple Heart.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Ms. COLLINS. Mr. President, I ask unanimous consent that the concurrent resolution and preamble be agreed to, en bloc, the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 42) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. CON. RES. 42

Whereas the Order of the Purple Heart for Military Merit, commonly known as the Purple Heart, is the oldest military decoration in the world in present use;

Whereas the Purple Heart is awarded in the name of the President of the United States to members of the Armed Forces who are wounded in conflict with an enemy force or while held by an enemy force as a prisoner of war, and posthumously to the next of kin of members of the Armed Forces who are killed in conflict with an enemy force or who die of a wound received in conflict with an enemy force;

Whereas the Purple Heart was established on August 7, 1782, during the Revolutionary War, when General George Washington issued an order establishing the Honorary Badge of Distinction, otherwise known as the Badge of Military Merit or the Decoration of the Purple Heart;

Whereas the award of the Purple Heart ceased with the end of the War of the Revolution, but was revived out of respect for the memory and military achievements of George Washington in 1932, the year marking the 200th anniversary of his birth; and

Whereas 1999 is the year marking the 200th anniversary of the death of George Washington; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) a commemorative postage stamp should be issued by the United States Postal Service honoring the members of the Armed Forces who have been awarded the Purple Heart; and

(2) the Citizens' Stamp Advisory Committee should recommend to the Postmaster General that such a stamp be issued in 1999,

the year marking the 200th anniversary of the death of George Washington.

THE CALENDAR

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration, en bloc, of the following bills reported by the Governmental Affairs Committee: S. 1295, calendar No. 398; H.R. 100, calendar No. 391; H.R. 197, calendar No. 392; H.R. 1191, calendar No. 394; H.R. 1251, calendar No. 395; H.R. 1327, calendar No. 396, and H.R. 1377, calendar No. 397.

I ask unanimous consent that any committee amendments, if applicable, be agreed to, that the bills be considered read a third time and passed, the motions to reconsider be laid upon the table, and that any statements related to any of these bills be printed in the RECORD, with the above occurring en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

LANCE CORPORAL HAROLD GOMEZ POST OFFICE

The bill (S. 1295) to designate the United States Post Office located at 3813 Main Street in East Chicago, Indiana, as the "Lance Corporal Harold Gomez Post Office," was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 1295

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF LANCE CORPORAL HAROLD GOMEZ POST OFFICE.

The United States Post Office located at 3813 Main Street in East Chicago, Indiana, shall be known and designated as the "Lance Corporal Harold Gomez Post Office".

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document, paper, or other record of the United States to the post office referred to in section 1 shall be deemed to be a reference to the "Lance Corporal Harold Gomez Post Office".

UNITED STATES POSTAL SERVICE BUILDING IN PHILADELPHIA, PENNSYLVANIA

The bill (H.R. 100) to establish designations for United States Postal Service buildings in Philadelphia, Pennsylvania, was considered, ordered to a third reading, read the third time, and passed.

CLIFFORD R. HOPE POST OFFICE

The bill (H.R. 197) to designate the facility of the United States Postal Service at 410 North 6th Street in Garden City, Kansas, as the "Clifford R. Hope Post Office," was considered, ordered to a third reading, read the third time, and passed.

DESIGNATE FACILITIES OF THE UNITED STATES POSTAL SERVICE IN CHICAGO, ILLINOIS

The bill (H.R. 1191) to designate certain facilities of the United States Postal Service in Chicago, Illinois, was considered, ordered to a third reading, read the third time, and passed.

NOAL CUSHING BATEMAN POST OFFICE BUILDING

The bill (H.R. 1251) to designate the United States Postal Service building located at 8850 South 700 East, Sandy, Utah, as the "Noal Cushing Bateman Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

MAURINE B. NEUBERGER UNITED STATES POST OFFICE

The bill (H.R. 1327) to designate the United States Postal Service building located at 34480 Highway 101 South in Cloverdale, Oregon, as the "Maurine B. Neuberger United States Post Office," was considered, ordered to a third reading, read a third time, and passed.

JOHN J. BUCHANAN POST OFFICE BUILDING

The Senate proceeded to consider the bill (H.R. 1377) to designate the facility of the United States Postal Service at 13234 South Baltimore Avenue in Chicago, Illinois, as the "John J. Buchanan Post Office Building," which had been reported from the Committee on Governmental Affairs, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. DESIGNATION.

The facility of the United States Postal Service, located at 9308 South Chicago Avenue, Chicago, Illinois, 60617, is designated as the "John J. Buchanan Post Office Building".

SEC. 2. REFERENCES.

Any reference in a law, regulation, map, document, paper, or other record of the United States to the facility referred to in section 1 shall be considered to be a reference to the "John J. Buchanan Post Office Building".

The committee amendment, in the nature of a substitute, was agreed to.

The bill (H.R. 1377), as amended, was considered read the third time and passed.

The title was amended so as to read: "To designate the facility of the United States Postal Service located at 9308 South Chicago Avenue, Chicago, Illinois, as the 'John J. Buchanan Post Office Building'."

FOR THE RELIEF OF SUCHADA KWONG

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Judi-

ciary Committee be discharged from further consideration of H.R. 322, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 322) for the relief of Suchada Kwong.

There being no objection, the Senate proceeded to consider the bill.

Ms. COLLINS. Mr. President, I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and that any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 322) was read the third time and passed.

AUTHORIZATION OF REPRESENTATION

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 238 submitted earlier by Senators LOTT and DASCHLE.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 238) to authorize representation of Member of the Senate in the case of Brett Kimberlin v. Orrin Hatch, et al.

There being no objection, the Senate proceeded to consider the resolution.

Mr. LOTT. Mr. President, this resolution concerns a civil action commenced by a pro se plaintiff in the United States District Court for the District of Columbia against Senator HATCH and a former member of the staff of the Judiciary Committee. The plaintiff is a federal prisoner serving a sentence for offenses related to a series of bombings in 1979. The complaint seeks damages from Senator HATCH and staff for their alleged role in the United States Parole Commission's 1997 revocation of the plaintiff's parole for failure to satisfy an outstanding civil judgment against him in favor of one of the victims of his bombings.

The plaintiff's claims of unfairness and political bias in his parole revocation hearing have already been rejected by the federal district court in Maryland in habeas corpus proceedings initiated by the plaintiff.

This resolution authorizes the Senate Legal Counsel to represent Senator HATCH in this action. The Senate Legal Counsel will seek dismissal of the suit for failure to state a claim for relief and for other reasons.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and finally that any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 238) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 238

Whereas, in the case of *Brett Kimberlin v. Orrin Hatch, et al.*, C.A. No. 99-1590, pending in the United States District Court for the District of Columbia, the plaintiff has named as a defendant Senator Orrin G. Hatch;

Whereas, pursuant to sections 703(a) and 704(a)(1) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c(1), the Senate may direct its counsel to defend Members of the Senate in civil actions relating to their official responsibilities: Now therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Senator Hatch in the case of *Brett Kimberlin v. Orrin Hatch, et al.*

DETERMINED AND FULL ENGAGEMENT AGAINST THE THREAT OF METHAMPHETAMINE OR DEFEAT METH ACT OF 1999

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the immediate consideration of calendar No. 260, S. 486.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 486) to provide for the punishment of methamphetamine laboratory operators, provide additional resources to combat methamphetamine production, trafficking, and abuse in the United States, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Methamphetamine Anti-Proliferation Act of 1999".

SEC. 2. ENHANCED PUNISHMENT OF AMPHETAMINE LABORATORY OPERATORS.

(a) *AMENDMENT TO FEDERAL SENTENCING GUIDELINES.*—Pursuant to its authority under section 994(p) of title 28, United States Code, the United States Sentencing Commission shall amend the Federal sentencing guidelines in accordance with this section with respect to any offense relating to the manufacture, importation, exportation, or trafficking in amphetamine (including an attempt or conspiracy to do any of the foregoing) in violation of—

(1) the Controlled Substances Act (21 U.S.C. 801 et seq.);

(2) the Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.); or

(3) the Maritime Drug Law Enforcement Act (46 U.S.C. App. 1901 et seq.).

(b) *GENERAL REQUIREMENT.*—In carrying out this section, the United States Sentencing Commission shall, with respect to each offense described in subsection (a) relating to amphetamine—

(1) review and amend its guidelines to provide for increased penalties such that those penalties are comparable to the base offense level for methamphetamine; and

(2) take any other action the Commission considers necessary to carry out this subsection.

(c) **ADDITIONAL REQUIREMENTS.**—In carrying out this section, the United States Sentencing Commission shall ensure that the sentencing guidelines for offenders convicted of offenses described in subsection (a) reflect the heinous nature of such offenses, the need for aggressive law enforcement action to fight such offenses, and the extreme dangers associated with unlawful activity involving amphetamines, including—

(1) the rapidly growing incidence of amphetamine abuse and the threat to public safety that such abuse poses;

(2) the high risk of amphetamine addiction;

(3) the increased risk of violence associated with amphetamine trafficking and abuse; and

(4) the recent increase in the illegal importation of amphetamine and precursor chemicals.

(d) **EMERGENCY AUTHORITY TO SENTENCING COMMISSION.**—The United States Sentencing Commission shall promulgate amendments pursuant to this section as soon as practicable after the date of the enactment of this Act in accordance with the procedure set forth in section 21(a) of the Sentencing Act of 1987 (Public Law 100-182), as though the authority under that Act had not expired.

SEC. 3. ADVERTISEMENTS FOR DRUG PARAPHERNALIA AND SCHEDULE I CONTROLLED SUBSTANCES.

(a) **DRUG PARAPHERNALIA.**—Section 422 of the Controlled Substances Act (21 U.S.C. 863) is amended—

(1) in subsection (a)(1), by inserting “, directly or indirectly advertise for sale,” after “sell”; and

(2) by adding at the end the following:

“(g) In this section, the term ‘directly or indirectly advertise for sale’ includes the use of any communication facility (as that term is defined in section 403(b)) to initiate the posting, publicizing, transmitting, publishing, linking to, broadcasting, or other advertising of any matter (including a telephone number or electronic or mail address) knowing that such matter has the purpose of seeking or offering, or is designed to be used, to receive, buy, distribute, or otherwise facilitate a transaction in.”.

(b) **SCHEDULE I CONTROLLED SUBSTANCES.**—Section 403(c) of such Act (21 U.S.C. 843(c)) is amended—

(1) in the first sentence, by inserting before the period the following: “, or to directly or indirectly advertise for sale (as that term is defined in section 422(g)) any Schedule I controlled substance”; and

(2) in the second sentence, by striking “term ‘advertisement’” and inserting “term ‘written advertisement’”.

SEC. 4. MANDATORY RESTITUTION FOR VIOLATIONS OF CONTROLLED SUBSTANCES ACT AND CONTROLLED SUBSTANCES IMPORT AND EXPORT ACT RELATING TO AMPHETAMINE AND METHAMPHETAMINE.

(a) **MANDATORY RESTITUTION.**—Section 413(q) of the Controlled Substances Act (21 U.S.C. 853(q)) is amended—

(1) in the matter preceding paragraph (1), by striking “may” and inserting “shall”; and

(2) by inserting “amphetamine or” before “methamphetamine” each place it appears; and

(3) in paragraph (2)—

(A) by inserting “, the State or local government concerned, or both the United States and the State or local government concerned” after “United States” the first place it appears; and

(B) by inserting “or the State or local government concerned, as the case may be,” after “United States” the second place it appears.

(b) **DEPOSIT OF AMOUNTS IN DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.**—Section 524(c)(4) of title 28, United States Code, is amended—

(1) by striking “and” at the end of subparagraph (B);

(2) by striking the period at the end of subparagraph (C) and inserting “; and”; and

(3) by adding at the end the following:

“(D) all amounts collected—

“(i) by the United States pursuant to a reimbursement order under paragraph (2) of section 413(q) of the Controlled Substances Act (21 U.S.C. 853(q)); and

“(ii) pursuant to a restitution order under paragraph (1) or (3) of section 413(q) of the Controlled Substances Act for injuries to the United States.”.

SEC. 5. CRIMINAL PROHIBITION ON DISTRIBUTION OF CERTAIN INFORMATION RELATING TO THE MANUFACTURE OF CONTROLLED SUBSTANCES.

(a) **IN GENERAL.**—Part 1 of title 18, United States Code, is amended by inserting after chapter 21 the following new chapter:

“CHAPTER 22—CONTROLLED SUBSTANCES

“Sec.

“421. Distribution of information relating to manufacture of controlled substances.

“§ 421. Distribution of information relating to manufacture of controlled substances

“(a) **PROHIBITION ON DISTRIBUTION OF INFORMATION RELATING TO MANUFACTURE OF CONTROLLED SUBSTANCES.**—

“(1) **CONTROLLED SUBSTANCE DEFINED.**—In this subsection, the term ‘controlled substance’ has the meaning given that term in section 102(6) of the Controlled Substances Act (21 U.S.C. 802(6)).

“(2) **PROHIBITION.**—It shall be unlawful for any person—

“(A) to teach or demonstrate the manufacture of a controlled substance, or to distribute by any means information pertaining to, in whole or in part, the manufacture or use of a controlled substance, with the intent that the teaching, demonstration, or information be used for, or in furtherance of, an activity that constitutes a Federal crime; or

“(B) to teach or demonstrate to any person the manufacture of a controlled substance, or to distribute to any person, by any means, information pertaining to, in whole or in part, the manufacture or use of a controlled substance, knowing that such person intends to use the teaching, demonstration, or information for, or in furtherance of, an activity that constitutes a Federal crime.

“(b) **PENALTY.**—Any person who violates subsection (a) shall be fined under this title, imprisoned not more than 10 years, or both.”.

(b) **CLERICAL AMENDMENT.**—The table of chapters at the beginning of part 1 of title 18, United States Code, is amended by inserting after the item relating to chapter 21 the following new item:

“22. Controlled Substances 421”.

SEC. 6. NOTICE; CLARIFICATION.

(a) **NOTICE OF ISSUANCE.**—Section 3103a of title 18, United States Code, is amended by adding at the end the following new sentence: “With respect to any issuance under this section or any other provision of law (including section 3117 and any rule), any notice required, or that may be required, to be given may be delayed pursuant to the standards, terms, and conditions set forth in section 2705, unless otherwise expressly provided by statute.”.

(b) **CLARIFICATION.**—(1) Section 2(e) of Public Law 95-78 (91 Stat. 320) is amended by adding at the end the following:

“Subdivision (d) of such rule, as in effect on this date, is amended by inserting ‘tangible’ before ‘property’ each place it occurs.”.

(2) The amendment made by paragraph (1) shall take effect on the date of the enactment of this Act.

SEC. 7. TRAINING FOR DRUG ENFORCEMENT ADMINISTRATION AND STATE AND LOCAL LAW ENFORCEMENT PERSONNEL RELATING TO CLANDESTINE LABORATORIES.

(a) **IN GENERAL.**—

(1) **REQUIREMENT.**—The Administrator of the Drug Enforcement Administration shall carry out the programs described in subsection (b) with respect to the law enforcement personnel of States and localities determined by the Administrator to have significant levels of methamphetamine-related or amphetamine-related crime or projected by the Administrator to have the potential for such levels of crime in the future.

(2) **DURATION.**—The duration of any program under that subsection may not exceed 3 years.

(b) **COVERED PROGRAMS.**—The programs described in this subsection are as follows:

(1) **ADVANCED MOBILE CLANDESTINE LABORATORY TRAINING TEAMS.**—A program of advanced mobile clandestine laboratory training teams, which shall provide information and training to State and local law enforcement personnel in techniques utilized in conducting undercover investigations and conspiracy cases, and other information designed to assist in the investigation of the illegal manufacturing and trafficking of amphetamine and methamphetamine.

(2) **BASIC CLANDESTINE LABORATORY CERTIFICATION TRAINING.**—A program of basic clandestine laboratory certification training, which shall provide information and training—

(A) to Drug Enforcement Administration personnel and State and local law enforcement personnel for purposes of enabling such personnel to meet any certification requirements under law with respect to the handling of wastes created by illegal amphetamine and methamphetamine laboratories; and

(B) to State and local law enforcement personnel for purposes of enabling such personnel to provide the information and training covered by subparagraph (A) to other State and local law enforcement personnel.

(3) **CLANDESTINE LABORATORY RECERTIFICATION AND AWARENESS TRAINING.**—A program of clandestine laboratory recertification and awareness training, which shall provide information and training to State and local law enforcement personnel for purposes of enabling such personnel to provide recertification and awareness training relating to clandestine laboratories to additional State and local law enforcement personnel.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated for each of fiscal years 2000, 2001, and 2002 amounts as follows:

(1) \$1,500,000 to carry out the program described in subsection (b)(1).

(2) \$3,000,000 to carry out the program described in subsection (b)(2).

(3) \$1,000,000 to carry out the program described in subsection (b)(3).

SEC. 8. COMBATING METHAMPHETAMINE AND AMPHETAMINE IN HIGH INTENSITY DRUG TRAFFICKING AREAS.

(a) **IN GENERAL.**—

(1) **IN GENERAL.**—The Director of National Drug Control Policy shall use amounts available under this section to combat the trafficking of methamphetamine and amphetamine in areas designated by the Director as high intensity drug trafficking areas.

(2) **ACTIVITIES.**—In meeting the requirement in paragraph (1), the Director shall provide funds for—

(A) employing additional Federal law enforcement personnel, or facilitating the employment of additional State and local law enforcement personnel, including agents, investigators, prosecutors, laboratory technicians, chemists, investigative assistants, and drug-prevention specialists; and

(B) such other activities as the Director considers appropriate.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section—

(1) \$15,000,000 for fiscal year 2000; and

(2) such sums as may be necessary for each of fiscal years 2001 through 2004.

(c) **APPORTIONMENT OF FUNDS.**—

(1) **FACTORS IN APPORTIONMENT.**—The Director shall apportion amounts appropriated for a fiscal year pursuant to the authorization of appropriations in subsection (b) for activities under subsection (a) among and within areas designated by the Director as high intensity drug trafficking areas based on the following factors:

(A) The number of methamphetamine manufacturing facilities and amphetamine manufacturing facilities discovered by Federal, State, or local law enforcement officials in the previous fiscal year.

(B) The number of methamphetamine prosecutions and amphetamine prosecutions in Federal, State, or local courts in the previous fiscal year.

(C) The number of methamphetamine arrests and amphetamine arrests by Federal, State, or local law enforcement officials in the previous fiscal year.

(D) The amounts of methamphetamine, amphetamine, or listed chemicals (as that term is defined in section 102(33) of the Controlled Substances Act (21 U.S.C. 802(33)) seized by Federal, State, or local law enforcement officials in the previous fiscal year.

(E) Intelligence and predictive data from the Drug Enforcement Administration and the Department of Health and Human Services showing patterns and trends in abuse, trafficking, and transportation in methamphetamine, amphetamine, and listed chemicals (as that term is so defined).

(2) **CERTIFICATION.**—Before the Director apportions any funds under this subsection to a high intensity drug trafficking area, the Director shall certify that the law enforcement entities responsible for clandestine methamphetamine and amphetamine laboratory seizures in that area are providing laboratory seizure data to the national clandestine laboratory database at the El Paso Intelligence Center.

(d) **LIMITATION ON ADMINISTRATIVE COSTS.**—Not more than 5 percent of the amount appropriated in a fiscal year pursuant to the authorization of appropriations for that fiscal year in subsection (b) may be available in that fiscal year for administrative costs associated with activities under subsection (a).

SEC. 9. COMBATING AMPHETAMINE AND METHAMPHETAMINE MANUFACTURING AND TRAFFICKING.

(a) **ACTIVITIES.**—In order to combat the illegal manufacturing and trafficking in amphetamine and methamphetamine, the Administrator of the Drug Enforcement Administration may—

(1) assist State and local law enforcement in small and mid-sized communities in all phases of investigations related to such manufacturing and trafficking, including assistance with foreign-language interpretation;

(2) staff additional regional enforcement and mobile enforcement teams related to such manufacturing and trafficking;

(3) establish additional resident offices and posts of duty to assist State and local law enforcement in rural areas in combating such manufacturing and trafficking;

(4) provide the Special Operations Division of the Administration with additional agents and staff to collect, evaluate, interpret, and disseminate critical intelligence targeting the command and control operations of major amphetamine and methamphetamine manufacturing and trafficking organizations; and

(5) carry out such other activities as the Administrator considers appropriate.

(b) **ADDITIONAL POSITIONS AND PERSONNEL.**—In carrying out activities under subsection (a), the Administrator may establish in the Administration not more than 50 full-time positions, including not more than 31 special-agent positions, and may appoint personnel to such positions.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated for the Drug Enforcement Administration for each fiscal year after fiscal year 1999, \$6,500,000 for purposes of carrying out the activities authorized by subsection (a) and employing personnel in positions established under subsection (b).

SEC. 10. ENVIRONMENTAL HAZARDS ASSOCIATED WITH ILLEGAL MANUFACTURE OF AMPHETAMINE AND METHAMPHETAMINE.

(a) **USE OF AMOUNTS OR DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.**—Section 524(c)(1)(E) of title 28, United States Code, is amended—

(1) by inserting “(i) for” before “disbursements”;

(2) by inserting “and” after the semicolon; and

(3) by adding at the end the following:

“(ii) for payment for—

“(I) costs incurred by or on behalf of the Department of Justice in connection with the removal, for purposes of Federal forfeiture and disposition, of any hazardous substance or pollutant or contaminant associated with the illegal manufacture of amphetamine or methamphetamine; and

“(II) costs incurred by or on behalf of a State or local government in connection with such removal in any case in which such State or local government has assisted in a Federal prosecution relating to amphetamine or methamphetamine, to the extent such costs exceed equitable sharing payments made to such State or local government in such case.”.

(b) **GRANTS UNDER DRUG CONTROL AND SYSTEM IMPROVEMENT GRANT PROGRAM.**—Section 501(b)(3) of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by inserting before the semicolon the following: “and to remove any hazardous substance or pollutant or contaminant associated with the illegal manufacture of amphetamine or methamphetamine”.

(c) **AMOUNTS SUPPLEMENT AND NOT SUPPLANT.**—

(1) **ASSETS FORFEITURE FUND.**—Any amounts made available from the Department of Justice Assets Forfeiture Fund in a fiscal year by reason of the amendment made by subsection (a) shall supplement, and not supplant, any other amounts made available to the Department of Justice in such fiscal year from other sources for payment of costs described in section 524(c)(1)(E)(ii) of title 28, United States Code, as so amended.

(2) **GRANT PROGRAM.**—Any amounts made available in a fiscal year under the grant program under section 501(b)(3) of the Omnibus Crime Control and Safe Streets Act of 1968 for the removal of hazardous substances or pollutants or contaminants associated with the illegal manufacture of amphetamine or methamphetamine by reason of the amendment made by subsection (b) shall supplement, and not supplant, any other amounts made available in such fiscal year from other sources for such removal.

SEC. 11. ANTIDRUG MESSAGES ON FEDERAL GOVERNMENT INTERNET WEBSITES.

Not later than 90 days after the date of the enactment of this Act, the head of each department, agency, and establishment of the Federal Government shall, in consultation with the Director of the Office of National Drug Control Policy, place antidrug messages on appropriate

Internet websites controlled by such department, agency, or establishment which messages shall, where appropriate, contain an electronic hyperlink to the Internet website, if any, of the Office.

SEC. 12. MAIL ORDER REQUIREMENTS.

Section 310(b)(3) of the Controlled Substances Act (21 U.S.C. 830(b)(3)) is amended—

(1) by redesignating subparagraphs (A) and (B) as subparagraphs (B) and (C), respectively;

(2) by inserting before subparagraph (B), as so redesignated, the following new subparagraph (A):

“(A) As used in this paragraph:

“(i) The term ‘drug product’ means an active ingredient in dosage form that has been approved or otherwise may be lawfully marketed under the Food, Drug, and Cosmetic Act for distribution in the United States.

“(ii) The term ‘valid prescription’ means a prescription which is issued for a legitimate medical purpose by an individual practitioner licensed by law to administer and prescribe the drugs concerned and acting in the usual course of the practitioner’s professional practice.”;

(3) in subparagraph (B), as so redesignated, by inserting “or who engages in an export transaction” after “nonregulated person”; and

(4) adding at the end the following:

“(D) Except as provided in subparagraph (E), the following distributions to a nonregulated person, and the following export transactions, shall not be subject to the reporting requirement in subparagraph (B):

“(i) Distributions of sample packages of drug products when such packages contain not more than 2 solid dosage units or the equivalent of 2 dosage units in liquid form, not to exceed 10 milliliters of liquid per package, and not more than one package is distributed to an individual or residential address in any 30-day period.

“(ii) Distributions of drug products by retail distributors that may not include face-to-face transactions to the extent that such distributions are consistent with the activities authorized for a retail distributor as specified in section 102(46).

“(iii) Distributions of drug products to a resident of a long term care facility (as that term is defined in regulations prescribed by the Attorney General) or distributions of drug products to a long term care facility for dispensing to or for use by a resident of that facility.

“(iv) Distributions of drug products pursuant to a valid prescription.

“(v) Exports which have been reported to the Attorney General pursuant to section 1004 or 1018 or which are subject to a waiver granted under section 1018(e)(2).

“(vi) Any quantity, method, or type of distribution or any quantity, method, or type of distribution of a specific listed chemical (including specific formulations or drug products) or of a group of listed chemicals (including specific formulations or drug products) which the Attorney General has excluded by regulation from such reporting requirement on the basis that such reporting is not necessary for the enforcement of this title or title III.

“(E) The Attorney General may revoke any or all of the exemptions listed in subparagraph (D) for an individual regulated person if he finds that drug products distributed by the regulated person are being used in violation of this title or title III. The regulated person shall be notified of the revocation, which will be effective upon receipt by the person of such notice, as provided in section 1018(c)(1), and shall have the right to an expedited hearing as provided in section 1018(c)(2).”.

SEC. 13. THEFT AND TRANSPORTATION OF ANHYDROUS AMMONIA FOR PURPOSES OF ILLICIT PRODUCTION OF CONTROLLED SUBSTANCES.

(a) IN GENERAL.—Part D of the Controlled Substances Act (21 U.S.C. 841 et seq.) is amended by adding at the end the following:

“ANHYDROUS AMMONIA

“SEC. 423 (a) It is unlawful for any person—

“(1) to steal anhydrous ammonia, or

“(2) to transport stolen anhydrous ammonia across State lines, knowing, intending, or having reasonable cause to believe that such anhydrous ammonia will be used to manufacture a controlled substance in violation of this part.

“(b) Any person who violates subsection (a) shall be imprisoned or fined, or both, in accordance with section 403(d) as if such violation were a violation of a provision of section 403.”.

(b) CLERICAL AMENDMENT.—The table of contents for that Act is amended by inserting after the item relating to section 421 the following new items:

“Sec. 422. Drug paraphernalia.

“Sec. 423. Anhydrous ammonia.”.

(c) ASSISTANCE FOR CERTAIN RESEARCH.—

(1) AGREEMENT.—The Administrator of the Drug Enforcement Administration shall seek to enter into an agreement with Iowa State University in order to permit the University to continue and expand its current research into the development of inert agents that, when added to anhydrous ammonia, eliminate the usefulness of anhydrous ammonia as an ingredient in the production of methamphetamine.

(2) REIMBURSABLE PROVISION OF FUNDS.—The agreement under paragraph (1) may provide for the provision to Iowa State University, on a reimbursable basis, of \$500,000 for purposes the activities specified in that paragraph.

(3) AUTHORIZATION OF APPROPRIATIONS.—There is hereby authorized to be appropriated for the Drug Enforcement Administration for fiscal year 2000, \$500,000 for purposes of carrying out the agreement under this subsection.

SEC. 14. REPORT ON METHAMPHETAMINE CONSUMPTION IN RURAL AREAS, SUBURBAN AREAS, SMALL CITIES, MIDSIZE CITIES, AND LARGE CITIES.

(a) IN GENERAL.—The Secretary of Health and Human Services shall submit to the designated committees of Congress on an annual basis a report on the problems caused by methamphetamine consumption in rural areas, suburban areas, small cities, midsize cities, and large cities.

(b) CONCERNS ADDRESSED.—Each report submitted under this section shall include an analysis of—

(1) the manner in which methamphetamine consumption in rural areas differs from methamphetamine consumption in areas with larger populations, and the means by which to accurately measure those differences;

(2) the incidence of methamphetamine abuse in rural areas and the treatment resources available to deal with methamphetamine addiction in those areas;

(3) any relationship between methamphetamine consumption in rural areas and a lack of substance abuse treatment in those areas; and

(4) any relationship between geographic differences in the availability of substance abuse treatment and the geographic distribution of the methamphetamine abuse problem in the United States.

(c) DEFINITIONS.—In this section:

(1) The term “designated committees of Congress” means the following:

(A) The Committees on the Judiciary and Appropriations of the Senate.

(B) The Committees on the Judiciary and Appropriations of the House of Representatives.

(2) The term “large city” means any city that is not a small city or a midsize city.

(3) The term “midsize city” means a city with a population under 250,000 and over 20,000.

(4) The term “rural area” means a county or parish with a population under 50,000.

(5) The term “small city” means a city with a population under 20,000.

SEC. 15. EXPANSION OF METHAMPHETAMINE ABUSE PREVENTION EFFORTS.

(a) EXPANSION OF EFFORTS.—Section 515 of the Public Health Service Act (42 U.S.C. 290bb-21) is amended by adding at the end the following:

“(e)(1) The Administrator may make grants to and enter into contracts and cooperative agreements with public and nonprofit private entities to enable such entities—

“(A) to carry out school-based programs concerning the dangers of abuse of and addiction to methamphetamine and other illicit drugs, using methods that are effective and science-based, including initiatives that give students the responsibility to create their own anti-drug abuse education programs for their schools; and

“(B) to carry out community-based abuse and addiction prevention programs relating to methamphetamine and other illicit drugs that are effective and science-based.

“(2) Amounts made available under a grant, contract or cooperative agreement under paragraph (1) shall be used for planning, establishing, or administering prevention programs relating to methamphetamine and other illicit drugs in accordance with paragraph (3).

“(3)(A) Amounts provided under this subsection may be used—

“(i) to carry out school-based programs that are focused on those districts with high or increasing rates of methamphetamine abuse and addiction and targeted at populations which are most at risk to start abuse of methamphetamine and other illicit drugs;

“(ii) to carry out community-based prevention programs that are focused on those populations within the community that are most at-risk for abuse of and addiction to methamphetamine and other illicit drugs;

“(iii) to assist local government entities to conduct appropriate prevention activities relating to methamphetamine and other illicit drugs;

“(iv) to train and educate State and local law enforcement officials, prevention and education officials, members of community anti-drug coalitions and parents on the signs of abuse of and addiction to methamphetamine and other illicit drugs, and the options for treatment and prevention;

“(v) for planning, administration, and educational activities related to the prevention of abuse of and addiction to methamphetamine and other illicit drugs;

“(vi) for the monitoring and evaluation of prevention activities relating to methamphetamine and other illicit drugs, and reporting and disseminating resulting information to the public; and

“(vii) for targeted pilot programs with evaluation components to encourage innovation and experimentation with new methodologies.

“(B) The Administrator shall give priority in making grants under this subsection to rural and urban areas that are experiencing a high rate or rapid increases in methamphetamine abuse and addiction.

“(4)(A) Not less than \$500,000 of the amount available in each fiscal year to carry out this subsection shall be made available to the Administrator, acting in consultation with other Federal agencies, to support and conduct periodic analyses and evaluations of effective prevention programs for abuse of and addiction to methamphetamine and other illicit drugs and the development of appropriate strategies for

disseminating information about and implementing these programs.

“(B) The Administrator shall submit to the committees of Congress referred to in subparagraph (C) an annual report with the results of the analyses and evaluation under subparagraph (A).

“(C) The committees of Congress referred to in this subparagraph are the following:

“(i) The Committees on Health, Education, Labor, and Pensions, the Judiciary, and Appropriations of the Senate.

“(ii) The Committees on Commerce, the Judiciary, and Appropriations of the House of Representatives.”.

(b) AUTHORIZATION OF APPROPRIATIONS FOR EXPANSION OF ABUSE PREVENTION EFFORTS AND PRACTITIONER REGISTRATION REQUIREMENTS.—There is authorized to be appropriated to carry out section 515(e) of the Public Health Service Act (as added by subsection (a)) and section 303(g)(2) of the Controlled Substances Act (as added by section 18(a) of this Act), \$15,000,000 for fiscal year 2000, and such sums as may be necessary for each succeeding fiscal year.

SEC. 16. EXPANSION OF METHAMPHETAMINE RESEARCH.

Section 464N of the Public Health Service Act (42 U.S.C. 285o-2) is amended by adding at the end the following:

“(c) METHAMPHETAMINE RESEARCH.—

“(1) GRANTS OR COOPERATIVE AGREEMENTS.—The Director of the Institute may make grants or enter into cooperative agreements to expand the current and on-going interdisciplinary research and clinical trials with treatment centers of the National Drug Abuse Treatment Clinical Trials Network relating to methamphetamine abuse and addiction and other biomedical, behavioral, and social issues related to methamphetamine abuse and addiction.

“(2) USE OF FUNDS.—Amounts made available under a grant or cooperative agreement under paragraph (1) for methamphetamine abuse and addiction may be used for research and clinical trials relating to—

“(A) the effects of methamphetamine abuse on the human body, including the brain;

“(B) the addictive nature of methamphetamine and how such effects differ with respect to different individuals;

“(C) the connection between methamphetamine abuse and mental health;

“(D) the identification and evaluation of the most effective methods of prevention of methamphetamine abuse and addiction;

“(E) the identification and development of the most effective methods of treatment of methamphetamine addiction, including pharmacological treatments;

“(F) risk factors for methamphetamine abuse;

“(G) effects of methamphetamine abuse and addiction on pregnant women and their fetuses;

“(H) cultural, social, behavioral, neurological and psychological reasons that individuals abuse methamphetamine, or refrain from abusing methamphetamine.

“(3) RESEARCH RESULTS.—The Director shall promptly disseminate research results under this subsection to Federal, State and local entities involved in combating methamphetamine abuse and addiction.

“(4) AUTHORIZATION OF APPROPRIATIONS.—

“(A) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out paragraph (1), such sums as may be necessary for each fiscal year.

“(B) SUPPLEMENT NOT SUPPLANT.—Amounts appropriated pursuant to the authorization of appropriations in subparagraph (A) for a fiscal year shall supplement and not supplant any other amounts appropriated in such fiscal year for research on methamphetamine abuse and addiction.”.

SEC. 17. STUDY OF METHAMPHETAMINE TREATMENT.**(a) STUDY.—**

(1) **REQUIREMENT.**—The Secretary of Health and Human Services shall, in consultation with the Institute of Medicine of the National Academy of Sciences, conduct a study on the development of medications for the treatment of addiction to amphetamine and methamphetamine.

(2) **REPORT.**—Not later than nine months after the date of the enactment of this Act, the Secretary shall submit to the Committees on the Judiciary of the Senate and House of Representatives a report on the results of the study conducted under paragraph (1).

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There are hereby authorized to be appropriated for the Department of Health and Human Services for fiscal year 2000 such sums as may be necessary to meet the requirements of subsection (a).

SEC. 18. REGISTRATION REQUIREMENTS FOR PRACTITIONERS WHO DISPENSE CERTAIN NARCOTIC DRUGS FOR MAINTENANCE TREATMENT OR DETOXIFICATION TREATMENT.

(a) **IN GENERAL.**—Section 303(g) of the Controlled Substances Act (21 U.S.C. 823(g)) is amended—

(1) in paragraph (2), by striking “(A) security” and inserting “(i) security”, and by striking “(B) the maintenance” and inserting “(ii) the maintenance”;

(2) by redesignating paragraphs (1) through (3) as subparagraphs (A) through (C), respectively;

(3) by inserting “(1)” after “(g)”;

(4) by striking “Practitioners who dispense” and inserting “Except as provided in paragraph (2), practitioners who dispense”; and

(5) by adding at the end the following:

“(2)(A) Subject to subparagraphs (D) and (G), the requirements of paragraph (1) are waived in the case of the prescribing or dispensing, by a practitioner, of narcotic drugs in schedule IV or V or combinations of such drugs if the practitioner meets the conditions specified in subparagraph (B) and the narcotic drugs or combinations of such drugs meet the conditions specified in subparagraph (C).

“(B) For purposes of subparagraph (A), the conditions specified in this subparagraph with respect to a practitioner are that, before prescribing or dispensing narcotic drugs in schedule IV or V, or combinations of such drugs, to patients for maintenance or detoxification treatment, the practitioner submit to the Secretary a notification of the intent of the practitioner to begin dispensing the drugs or combinations for such purpose, and that the notification contain the following certifications by the practitioner:

“(i) The practitioner is a physician licensed under State law, and the practitioner has demonstrable training or experience and the ability to treat and manage opiate-dependent patients.

“(ii) With respect to patients to whom the practitioner will provide such drugs or combinations of drugs, the practitioner has the demonstrated capacity to refer the patients for appropriate counseling and other appropriate ancillary services.

“(iii) In any case in which the practitioner is not in a group practice, the total number of such patients of the practitioner at any one time will not exceed the applicable number. For purposes of this clause, the applicable number is 20, except that the Secretary may by regulation change such total number.

“(iv) In any case in which the practitioner is in a group practice, the total number of such patients of the group practice at any one time will not exceed the applicable number. For purposes of this clause, the applicable number is 20, except that the Secretary may by regulation

change such total number, and the Secretary for such purposes may by regulation establish different categories on the basis of the number of practitioners in a group practice and establish for the various categories different numerical limitations on the number of such patients that the group practice may have.

“(C) For purposes of subparagraph (A), the conditions specified in this subparagraph with respect to narcotic drugs in schedule IV or V or combinations of such drugs are as follows:

“(i) The drugs or combinations of drugs have, under the Federal Food, Drug and Cosmetic Act or section 351 of the Public Health Service Act, been approved for use in maintenance or detoxification treatment.

“(ii) The drugs or combinations of drugs have not been the subject of an adverse determination. For purposes of this clause, an adverse determination is a determination published in the Federal Register and made by the Secretary, after consultation with the Attorney General, that the use of the drugs or combinations of drugs for maintenance or detoxification treatment requires additional standards respecting the qualifications of practitioners to provide such treatment, or requires standards respecting the quantities of the drugs that may be provided for unsupervised use.

“(D)(i) A waiver under subparagraph (A) with respect to a practitioner is not in effect unless (in addition to conditions under subparagraphs (B) and (C)) the following conditions are met:

“(I) The notification under subparagraph (B) is in writing and states the name of the practitioner.

“(II) The notification identifies the registration issued for the practitioner pursuant to subsection (f).

“(III) If the practitioner is a member of a group practice, the notification states the names of the other practitioners in the practice and identifies the registrations issued for the other practitioners pursuant to subsection (f).

“(IV) A period of 45 days has elapsed after the date on which the notification was submitted, and during such period the practitioner does not receive from the Secretary a written notice that one or more of the conditions specified in subparagraph (B), subparagraph (C), or this subparagraph, have not been met.

“(ii) The Secretary shall provide to the Attorney General such information contained in notifications under subparagraph (B) as the Attorney General may request.

“(E) If in violation of subparagraph (A) a practitioner dispenses narcotic drugs in schedule IV or V or combinations of such drugs for maintenance treatment or detoxification treatment, the Attorney General may, for purposes of section 304(a)(4), consider the practitioner to have committed an act that renders the registration of the practitioner pursuant to subsection (f) to be inconsistent with the public interest.

“(F) In this paragraph, the term ‘group practice’ has the meaning given such term in section 1877(h)(4) of the Social Security Act.

“(G)(i) This paragraph takes effect on the date of enactment of the Methamphetamine Anti-Proliferation Act of 1999, and remains in effect thereafter except as provided in clause (iii) (relating to a decision by the Secretary or the Attorney General that this paragraph should not remain in effect).

“(ii) For the purposes relating to clause (iii), the Secretary and the Attorney General shall, during the 3-year period beginning on the date of enactment of the Methamphetamine Anti-Proliferation Act of 1999, make determinations in accordance with the following:

“(I)(aa) The Secretary shall—

“(aaa) make a determination of whether treatments provided under waivers under sub-

paragraph (A) have been effective forms of maintenance treatment and detoxification treatment in clinical settings;

“(bbb) make a determination regarding whether such waivers have significantly increased (relative to the beginning of such period) the availability of maintenance treatment and detoxification treatment; and

“(ccc) make a determination regarding whether such waivers have adverse consequences for the public health.

“(bb) In making determinations under this subclause, the Secretary—

“(aa) may collect data from the practitioners for whom waivers under subparagraph (A) are in effect;

“(bb) shall issue appropriate guidelines or regulations (in accordance with procedures for substantive rules under section 553 of title 5, United States Code) specifying the scope of the data that will be required to be provided under this subclause and the means through which the data will be collected;

“(cc) shall, with respect to collecting such data, comply with applicable provisions of chapter 6 of title 5, United States Code (relating to a regulatory flexibility analysis), and of chapter 8 of such title (relating to congressional review of agency rulemaking); and

“(dd) shall make a determination regarding whether such waivers have adverse consequences for the public health.

“(II) The Attorney General shall—

“(aa) make a determination of the extent to which there have been violations of the numerical limitations established under subparagraph (B) for the number of individuals to whom a practitioner may provide treatment; and

“(bb) make a determination regarding whether waivers under subparagraph (A) have increased (relative to the beginning of such period) the extent to which narcotic drugs in schedule IV or V or combinations of such drugs are being dispensed or possessed in violation of this Act.

“(iii) If, before the expiration of the period specified in clause (ii), the Secretary or the Attorney General publishes in the Federal Register a decision, made on the basis of determinations under such clause, that this paragraph should not remain in effect, this paragraph ceases to be in effect 60 days after the date on which the decision is so published. The Secretary shall, in making any such decision, consult with the Attorney General, and shall, in publishing the decision in the Federal Register, include any comments received from the Attorney General for inclusion in the publication. The Attorney General shall, in making any such decision, consult with the Secretary, and shall, in publishing the decision in the Federal Register, include any comments received from the Secretary for inclusion in the publication.

“(H) During the 3-year period beginning on the date of enactment of the Methamphetamine Anti-Proliferation Act 1999, a State may not preclude a practitioner from dispensing narcotic drugs in schedule IV or V, or combinations of such drugs, to patients for maintenance or detoxification treatment in accordance with this paragraph, or the other amendments made by section 22 of that Act, unless, before the expiration of that 3-year period, the State enacts a law prohibiting a practitioner from dispensing such drugs or combination of drugs.”.

(b) **CONFORMING AMENDMENTS.**—Section 304 of the Controlled Substances Act (21 U.S.C. 824) is amended—

(1) in subsection (a), in the matter following paragraph (5), by striking “section 303(g)” each place the term appears and inserting “section 303(g)(1)”; and

(2) in subsection (d), by striking “section 303(g)” and inserting “section 303(g)(1)”.

SEC. 19. ENHANCED PUNISHMENT OF METHAMPHETAMINE LABORATORY OPERATORS.

(a) **FEDERAL SENTENCING GUIDELINES.**—

(1) **IN GENERAL.**—Pursuant to its authority under section 994(p) of title 28, United States Code, the United States Sentencing Commission shall amend the Federal sentencing guidelines in accordance with paragraph (2) with respect to any offense relating to the manufacture, attempt to manufacture, or conspiracy to manufacture amphetamine or methamphetamine in violation of—

(A) the Controlled Substances Act (21 U.S.C. 801 et seq.);

(B) the Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.); or

(C) the Maritime Drug Law Enforcement Act (46 U.S.C. App. 1901 et seq.).

(2) **REQUIREMENTS.**—In carrying out this paragraph, the United States Sentencing Commission shall—

(A) if the offense created a substantial risk of harm to human life (other than a life described in subparagraph (B)) or the environment, increase the base offense level for the offense—

(i) by not less than 3 offense levels above the applicable level in effect on the date of enactment of this Act; or

(ii) if the resulting base offense level after an increase under clause (i) would be less than level 27, to not less than level 27; or

(B) if the offense created a substantial risk of harm to the life of a minor or incompetent, increase the base offense level for the offense—

(i) by not less than 6 offense levels above the applicable level in effect on the date of enactment of this Act; or

(ii) if the resulting base offense level after an increase under clause (i) would be less than level 30, to not less than level 30.

(3) **EMERGENCY AUTHORITY TO SENTENCING COMMISSION.**—The United States Sentencing Commission shall promulgate amendments pursuant to this subsection as soon as practicable after the date of enactment of this Act in accordance with the procedure set forth in section 21(a) of the Sentencing Act of 1987 (Public Law 100-182), as though the authority under that Act had not expired.

(b) **EFFECTIVE DATE.**—The amendments made pursuant to this section shall apply with respect to any offense occurring on or after the date that is 60 days after the date of enactment of this Act.

SEC. 20. METHAMPHETAMINE PARAPHERNALIA.

Section 422(d) of the Controlled Substances Act (21 U.S.C. 863(d)) is amended in the matter preceding paragraph (1) by inserting "methamphetamine," after "PCP,".

AMENDMENT NO. 2794

Ms. COLLINS. Mr. President, there is a substitute amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS], for Mr. HATCH, proposes an amendment numbered 2794.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2794) was agreed to.

Mr. HATCH. Mr. President, I rise today to commend my fellow Senators for unanimously supporting the passage of S. 486, the Methamphetamine Anti-Proliferation Act of 1999. This bill, introduced by Senator ASHCROFT and amended in committee to include provisions from bills that I and Senator GRASSLEY had introduced, passed by acclamation in the Judiciary Committee earlier this year and represents a significant bipartisan effort to combat the scourge of methamphetamine. With this bill we are arming our communities with responsible, innovative enforcement tools designed to curb the manufacturing and trafficking of this most destructive drug.

I want to take a moment to highlight some of the provisions in this bill that will assist Federal, State, and local law enforcement in their efforts against drug traffickers:

(1) The bill bolsters the DEA's ability to combat the manufacturing and trafficking of methamphetamine by authorizing the creation of satellite offices and the hiring of additional agents to assist State and local law enforcement officials. More than any other illicit drug, methamphetamine manufacturers and traffickers operate in small towns and rural areas. And, unfortunately, rural law enforcement agencies often are overwhelmed and in dire need of the DEA's expertise in conducting methamphetamine investigations.

(2) The bill will assist State and local officials in handling the dangerous toxic waste left behind by methamphetamine labs.

(3) Another section of the bill will help prevent the manufacture of methamphetamine by prohibiting the dissemination of drug "recipes" on the Internet.

(4) The bill amends the Federal anti-drug paraphernalia statute to clarify that the ban includes Internet advertising for the sale of controlled substances and drug paraphernalia.

(5) To counter the dangers that manufacturing drugs like methamphetamine inflict on human life and on the environment, the bill imposes stiffer penalties on manufacturers of all illegal drugs when their actions create a substantial risk of harm to human life or to the environment.

(6) The bill also works to keep all drugs away from children and to punish severely those who prey on our children, especially while at school away from their parents. The bill does this by increasing the penalties for distributing illegal drugs to minors and for distributing illegal drugs near schools and other locations frequented by juveniles.

(7) Finally, the bill increases penalties for manufacturing and trafficking the drug amphetamine, a lesser-known, but no-less dangerous drug than methamphetamine. Other than

for a slight difference in potency, amphetamine is manufactured, sold, and used in the same manner as methamphetamine. Moreover, amphetamine labs pose the same dangers as methamphetamine labs. Not surprisingly, every law enforcement officer with whom I have spoken agreed that the penalties for amphetamine should be the same as those for methamphetamine. For these reasons, the bill equalizes the punishment for manufacturing and trafficking the two drugs.

In addition to these law enforcement tools, the bill establishes and funds prevention measures and a creative new treatment program for helping those trapped in drug addiction. Specifically, it contains provisions from S. 324, the "Drug Addiction Treatment Act," which I and my good friend Senator LEVIN introduced earlier this session. These provisions undoubtedly will usher in a new generation of drug treatments. Senators LEVIN, BIDEN, and MOYNIHAN, as well as my colleague in the House, Chairman BLILEY, and experts at the Departments of Justice and Health and Human Services, deserve special thanks for their bipartisan efforts in developing this new treatment paradigm. While we know that vigorous law enforcement is the key to defeating those who manufacture and sell drugs, we must also embrace proven prevention and treatment programs that hold out the promise of turning Americans away from drug use.

Mr. President, as I stated on the floor just last week, the timeliness of this bill cannot be overstated. According to a report prepared by the Community Epidemiology Work Group, which is part of the National Institute on Drug Abuse, methamphetamine abuse levels "remain high . . . and there is strong evidence to suggest this drug will continue to be a problem in west coast areas and to spread to other areas of the United States." This threat is real and immediate, and the numbers are telling. According to the Drug Enforcement Administration the number of labs cleaned up by the Administration has almost doubled each year since 1995. Last year, more than 5,500 amphetamine and methamphetamine labs were seized by DEA and State and local law enforcement officials, and millions of dollars were spent on cleaning up the pollutants and toxins created and left behind by operators of these labs. In Utah alone, there were 266 lab seizures last year, a number which elevated Utah to the unenviable position of being ranked third in the nation for highest per capita clandestine lab seizures.

Mr. President, this bill furnishes the means for our ongoing battle against those who manufacture and sell illicit drugs. Perhaps even more important, this bill underscores our unwavering commitment to win this battle. Let

there be no misunderstanding; we will not throw up our hands and surrender our streets to those who sell misery and destruction. For the sake of our children and grandchildren, we will defeat this plague. I again thank my colleagues for joining with me in this effort.

Mr. LEAHY. The manufacture and distribution of methamphetamines and amphetamines is an increasingly serious problem, and this bill would provide significant additional resources for both law enforcement and treatment. It was unfortunate that the majority has played politics with this important issue and strained the strong bipartisan support for this bill by including its provisions in a larger, controversial amendment to S. 625, the Bankruptcy Reform Act of 1999, which amendment was approved by a vote of 50-49 on November 10, 1999. I strongly opposed that amendment, which significantly increased the use of mandatory minimum penalties for powder cocaine offenses and unwisely diminished local control of schools.

That amendment to the bankruptcy bill mandated a 10-year mandatory minimum sentence for crimes involving 500 grams or more of powder cocaine, instead of the current 5 kilogram threshold. It also instituted a 5-year mandatory minimum sentence for crimes involving 50 grams or more of powder cocaine, instead of the current 500-gram threshold. I oppose mandatory minimums both because they are extraordinarily costly for taxpayers and because they are counterproductive to our law enforcement efforts. The Justice Department estimated that the amendment's powder cocaine provision would cost more than \$10 billion over the next 30 years simply to build 11,000 more prison beds. Moreover, the use of mandatory minimums for smaller and smaller quantities of drugs gives federal prosecutors further incentive to prosecute lower-level drug offenders, further distorting the balance between state and federal law enforcement responsibilities. It simply makes no sense—except perhaps as a matter of politics—to federal our Nation's drug laws to such an extreme extent.

In addition, that amendment provided the wrongheaded approach to the necessary task of rectifying the disparity between sentences for powder and crack cocaine. Under current law, the quantity threshold to trigger mandatory minimum penalties for crack offenders is 100 times more severe than for powder cocaine offenders. Under this amendment the quantity threshold to trigger mandatory minimums for crack offenders would still be 10 times more severe, and the amendment would do nothing to mitigate the unnecessary federalization and extreme penalties that the criminal justice system imposes for lower-level crack offenses.

Finally, that amendment contained education provisions that would take funding and control away from local school authorities. First, it dictates that local school boards adopt certain specific policies on illegal drug use by students, including mandatory reporting of students to law enforcement and mandatory expulsion for at least one year of students who possess illegal drugs on school property. Second, it authorizes the use of public funds to pay tuition for any private schools, including parochial schools, for students who were injured by violent criminal offenses on public school grounds. This provision raises serious constitutional and policy questions, and should not have been slipped into an end-of-session amendment to a bankruptcy bill.

Because of the extreme reservations that I and many of my colleagues from both sides of the aisle expressed about that amendment to the bankruptcy bill, I pressed for the original methamphetamine bill to be considered as a separate matter. I am pleased that we have an opportunity to consider and pass this legislation without the poison pills that the Republican leadership inserted.

I continue to have some reservations about this bill. For example, I disapprove of its order to the Sentencing Commission to increase penalties for certain amphetamine and methamphetamine crimes by a specific number of base offense levels. I oppose such specific directives for some of the same reasons that I oppose mandatory minimums—they subvert the considered sentencing process that Congress wanted when it established the Sentencing Commission.

But the good in this bill outweighs the bad. In addition to creating tougher penalties for those who manufacture and distribute amphetamines as illicit drugs, this bill allocates additional funding to assist local law enforcement, allows for the hiring of new DEA agents, and increases research, training and prevention efforts. This is a good and comprehensive approach to America's growing amphetamine problem.

We significantly improved this bill during committee considerations. As the comprehensive substitute for the original bill was being drafted, I had three primary reservations: First, earlier versions of the bill imposed numerous mandatory minimums. As I stated earlier, I continue to believe that mandatory minimums are generally an inappropriate tool in our critically important national fight against drugs. Simply imposing or increasing mandatory minimums subverts the more considered process Congress set up in the Sentencing Commission. The Federal Sentencing Guidelines already provide a comprehensive mechanism to equalize sentences among persons convicted of the same or similar crime, while al-

lowing judges the discretion they need to give appropriate weight to individual circumstances.

The Sentencing Commission goes through an extraordinary process to set sentence levels. For example, pursuant to our 1996 antimethamphetamine law, the Sentencing Commission increased meth penalties after careful analysis of recent sentencing data, a study of the offenses, and information from the DEA on trafficking levels, dosage unit size, price and drug quantity. Increasing mandatory minimums takes sentencing discretion away from judges. We closely examine judges' backgrounds before they are confirmed and should let them do their jobs.

Mandatory minimums also impose significant economic and social costs. According to the Congressional Budget Office, the annual cost of housing a federal inmate ranges from \$16,745 per year for minimum security inmates to \$23,286 per year for inmates in high security facilities. It is critical that we take steps that will effectively deter crime, but we should not ignore the costs of the one size fits all approach of mandatory minimums. We also cannot ignore the policy implications of the boom in our prison population. In 1970, the total population in the federal prison system was 20,686 prisoners, of whom 16.3 percent were drug offenders. By 1997, the federal prison population had grown to almost 91,000 sentenced prisoners, approximately 60 percent of whom were sentenced for drug offenses. The cost of supporting this expanded federal criminal justice system is staggering. We ignore at our peril the findings of RAND's comprehensive 1997 report on mandatory minimum drug sentences: "Mandatory minimums are not justifiable on the basis of cost-effectiveness at reducing cocaine consumption, cocaine expenditures, or drug-related crime."

This is why I have repeatedly expressed my concerns about creating new mandatory minimum penalties, including as recently as last October, when another antimethamphetamine bill was before the Judiciary Committee.

Second, earlier drafts of this bill would have contravened the Supreme Court's 1999 decision in *Richardson versus U.S. I*, along with some other members of the Committee, believed that it would be inappropriate to take such a step without first holding a hearing and giving thorough consideration to such a change in the law. The Chairman of the Committee, Senator HATCH, was sensitive to this concern and I thank him for agreeing to remove that provision from this legislation.

Third, an earlier version of the bill contained a provision that would have created a rebuttable presumption that may have violated the Constitution's Due Process Clause. Again, I believed that we needed to seriously consider

and debate such a provision before voting on it. And again, the Chairman was sensitive to the concerns of some of us on the Committee and agreed to remove that provision.

By reaching an accord on each of those issues, I was able to join as a cosponsor of this bill. I support it strongly, and I look forward to seeing it become law.

Mr. KOHL. Mr. President, I rise today with my colleagues to express my support for the Methamphetamine Anti-Proliferation Act of 1999, of which I am proud to be a cosponsor. This bipartisan measure is a crucial step in the battle against the spread of Methamphetamine, also known as "Meth." It sets forward a comprehensive approach including targeted enforcement through increased resources, training and penalties, expansion of prevention and intervention programs, environmental cleanup, and research.

The Meth problem is growing rapidly—not only across the country westward, but also in my home state: our Wisconsin State Crime Laboratory has tripled the number of Meth examinations since 1996, with prosecutions doubling from previous years; thefts of the precursor chemical Anhydrous Ammonia from farmers and retailers are becoming routine; and more Meth producers are emptying out shelves of "blister packs"—packages of Sudafed and other cold remedies which are legal products used as precursor chemicals and sold in our markets and retail stores. Just last week, law enforcement officers in Fox Valley, Wisconsin reported their first seizure of a Meth lab, evidencing Meth's quick spread across the state.

In fact, Wisconsin has become a source of one of the most toxic of Meth recipes—known to its Western producers as the "Nazi variety"—which causes the most aggressive behavior. This is largely due to the availability of Anhydrous Ammonia, which accelerates users to a fast and violent high. At the same time, the environmental dangers associated with this chemical pose a serious threat to our law enforcement officers and our communities.

I am particularly pleased that the bill includes several provisions from the Rural Methamphetamine Use Response Act of 1999, introduced by Senator GRASSLEY and me earlier this year. In particular, the underlying bill authorizes \$6.5 million for additional Drug Enforcement Administration (DEA) agents in rural areas and \$5.5 million for DEA training designed to combat "meth" production. In addition, it criminalizes the transport and sale of Anhydrous Ammonia. These provisions will be of great assistance to rural states like Wisconsin, adding to the ongoing efforts of state and local law enforcement and building on the \$1 million in funding I helped secure through the Appropriations process for

a Meth "Task Force" in Western Wisconsin.

As Meth continues its devastation throughout the Midwest, it is time to confront this raging menace at multiple levels and with cooperative strength. This bipartisan legislation is an important step in that direction.

Mr. ASHCROFT. Mr. President, I rise today to commend the Senate for passing, S. 486, the Methamphetamine Anti-Proliferation Act of 1999. I'm proud to say this comprehensive anti-methamphetamine bill was built upon the DEFEAT Meth legislation that I introduced earlier this year. This reflects a tremendous amount of bipartisan work by the members of the judiciary committee.

And the reason for the level of bipartisan effort in crafting this bill was the recognition by all involved that it is needed desperately to combat one of the fastest growing threats to American society: the explosive problem of methamphetamine.

With its roots on the West coast, this epidemic has now exploded in middle America. Meth in the 1990s is what cocaine was in the 1980s and heroin was in the 1970s. It is currently the largest drug threat we face in my home state of Missouri. Unfortunately, it may be coming soon to a city or town near you.

If you wanted to design a drug to have the worst possible effect on your community, you'd make methamphetamine. It is highly addictive, highly destructive, cheap, and easy to manufacture.

To give you an idea of the scope of the problem, in 1992, law enforcement seized 2 clandestine Meth labs in my state of Missouri. By 1994, there were 14 seizures. In 1998, they seized 679 labs. Based on the figures collected so far this year, that number will jump again this year to over 800 labs.

And with this growth have come all of the problems. As meth abuse has increased, domestic abuse, child abuse, burglaries and meth related murders have also increased proportionately. From 1992 to 1998 meth-related emergency room incidents increased 63 percent.

What is more unacceptable is that meth is ensnaring our children. In 1998, the percentage of 12th graders who used meth was double the 1992 level. In recent conversations I have had with local law enforcement officers in Missouri, they estimated that as many as 10% of high school students know the recipe for meth. In fact, one need only log on to the Internet to find scores of web sites giving detailed instructions to set up your own meth lab. This is unacceptable.

Despite the appropriation of over \$35 million dollars in the past two appropriation cycles for the Drug Enforcement Administration to train local law enforcement in the interdiction and

clean-up of methamphetamine labs, the meth problem continues to grow.

And that is why I am so pleased S. 486, the Methamphetamine Anti-Proliferation Act of 1999 passed the Senate. This bill provides the necessary weapons to fight the growing meth problem in this country, including the authorization of \$9.5 million for DEA programs to train State and local law enforcement in techniques used in meth investigations, \$5.5 million for the hiring of new agents to assist State and local law enforcement in small and mid-sized communities, \$15 million for school and community-based meth abuse and addiction prevention programs, \$10 million for treatment of meth addicts, and \$15 million to the Office of National Drug Control Policy to combat trafficking of meth in designated HIDTA's (High Intensity Drug Trafficking Areas) which have had great success in Missouri and the Midwest.

This bill also amends the Sentencing Guidelines by increasing the mandatory minimum sentences for manufacturing meth and significantly increases mandatory minimum sentences if the offense created a risk of harm to the life of a minor or incompetent. Furthermore, the bill includes meth paraphernalia in the federal list of illegal paraphernalia.

But focusing on reducing supply through interdiction and punishment is not enough. The bill also authorizes substantial resources for education and prevention targeted specifically at the problem of meth. Local law enforcement in Missouri tells me that 10% of high school students know the recipe for meth. I want to ensure that 100% of them know that meth is a recipe for disaster.

Meth presents us with a formidable challenge. We have faced many other challenges in the past and we can face this one as well. In fact, the history of America is one of meeting challenges and surpassing people's highest expectations. Meth is no exception. All it takes is that we marshal our will and channel the great indomitable American spirit. Through legislative efforts like this bill we will meet this new meth challenge and defeat it.

Mr. BIDEN. Mr. President, three years ago I joined with my distinguished friend and colleague, Senator HATCH, to introduce the "Hatch-Biden Methamphetamine Control Act" to address the growing threat of methamphetamine use in our country before it was too late.

Our failure to foresee and prevent the crack cocaine epidemic is one of the most significant public policy mistakes in recent history. We were determined not to repeat that mistake with methamphetamine.

That 1996 Act provided crucial tools that we needed to stay ahead of the methamphetamine epidemic—increased

penalties for possessing and trafficking in methamphetamine and the precursor chemicals and equipment used to manufacture the drug; tighter reporting requirements and restrictions on the legitimate sales of products containing precursor chemicals to prevent their diversion; increased reporting requirements for firms that sell those products by mail; and enhanced prison sentences for meth manufacturers who endanger the life of any individual or endanger the environment while making this drug. We also created a national working group of law enforcement and public health officials to monitor any growth in the methamphetamine epidemic.

I have no doubt that our 1996 legislation slowed this epidemic significantly. But we are up against a powerful and highly addictive drug.

The Methamphetamine Anti-Proliferation Act of 1999—which I have cosponsored—builds on the 1996 Act. First and foremost, it closes the “amphetamine loophole” in current law by making the penalties for manufacturing, distribution, importing and exporting amphetamine the same as those for meth. After all, the two drugs differ by only one chemical and are sold interchangeably on the street. If users can’t tell the difference between the two substances, there is no reason why the penalties should be different.

The amendment also addresses the growing problem of meth labs by establishing penalties for manufacturing the drug with an enhanced penalty for those who would put a child’s life at risk in the process. We provide the Drug Enforcement Administration with much needed funding to clean up clandestine labs after they are seized as well as to train state local law enforcement officers to handle the hazardous wastes produced in the meth labs and certify them to train their colleagues.

Methamphetamine is made from an array of hazardous substances—battery acid, lye, ammonia gas, hydrochloric acid, just to name a few—that produce toxic fumes and often lead to fires or explosions when mixed. I am revealing nothing by naming some of these chemical ingredients. Anyone with access to the Internet can download a detailed meth recipe with a few simple keystrokes. Our legislation would make such postings illegal.

We provide money for the Drug Enforcement Administration to clean up these toxic sites and certify state and local officials to handle the hazardous byproducts at the lab sites. We provide funds for additional law enforcement personnel—including agents, investigators, prosecutors, lab technicians, chemists, investigative assistants and drug prevention specialists in High Intensity Drug Trafficking Areas where meth is a problem.

We also provide funds for new agents to assist State and local law enforce-

ment in small- and mid-sized communities in all phases of drug investigations and assist state and local law enforcement in rural areas.

Further, the legislation provides much needed money for prevention, treatment and research, including clinical trials. It asks the Institute of Medicine to issue a report on the status of pharmacotherapies for treatment of amphetamine and methamphetamine addiction.

I understand that the scientists at the National Institute on Drug Abuse are making headway in isolating amino acids and developing medications to deal with meth overdose and addiction.

We also have a provision that would allow certain doctors to dispense Schedule III, IV and V drugs from their offices to treat addiction. I am glad to see this provision included. Ten years ago, I asked the question: “If drug abuse is an epidemic, are we doing enough to find a medical ‘cure?’” Unfortunately that question is still with us. But today we also have another question: “Are we doing enough to get the ‘cures’ we have to those who need them?” We have an enormous “treatment gap” in this country. Less than half of the estimated 4.4 to 5.3 million people who need drug treatment are receiving it. Licensing qualified doctors to prescribe certain pharmacotherapies from their offices is a significant step toward bridging the treatment gap.

Also to that end, this bill authorizes \$10 million for treatment of methamphetamine addiction.

The bill also tightens the restrictions on direct and indirect advertising of illegal drug paraphernalia and Schedule I drugs. Under this legislation, it would be illegal for on-line magazines and other websites to post advertisements for such illegal material or provide “links” to websites that do. We crafted this language carefully so that we restrict the sale of drug paraphernalia without restricting the First Amendment.

All in all, I believe that this is a comprehensive bill that attacks the methamphetamine and amphetamine problem from every angle.

Today the Senate also passed the “Date Rape Drug Control Act of 1999,” a very important piece of legislation which will place the most stringent controls on GHB, a drug which is being used with increasing frequency to commit rape. I commend Senator ABRAHAM for his efforts to get this bill passed and I thank him for acknowledging my efforts as well.

For nearly five years now, I have been working to raise awareness about date rape drugs including rohypnol and ketamine.

In 1996, I first introduced legislation to schedule these drugs under the Controlled Substances Act. This was not a step I took lightly because there is a regulatory procedure in place for

scheduling controlled substances. But my view was that the regulatory process would take years to do what needed to be done in months, forfeiting valuable time in the fight to stop these drugs from being used to commit heinous crimes.

Federal scheduling is important for three simple reasons. First, federal scheduling triggers increased state drug law penalties. This is because state law penalties are linked to the level at which a drug appears on the federal controlled substance schedule. Since more than 95 percent of all drug cases are prosecuted at the state level, not by the federal government, federal scheduling is vitally important.

Second, federal scheduling triggers tough federal penalties.

And third, scheduling has proven to work. In 1984, I worked to reschedule Quaaludes from Schedule II to Schedule I. Congress passed the law and the Quaalude epidemic was greatly reduced. Again in 1990, I worked to reclassify steroids as a Schedule III substance. Congress passed the law and again a drug epidemic that had been on the rise was reversed.

Progress on scheduling date rape drugs has been slow. This past August—four years after I first called for stricter regulations—the Drug Enforcement Administration finally classified ketamine as a Schedule III drug.

Rohypnol has yet to be classified as a Schedule I drug, though we have passed legislation that stipulates that it is subject to federal penalties. Far from perfect, but it is a small step in the right direction.

In 1996, we passed legislation to crack down on those who commit violent crimes—including rape—by giving the victim a controlled substance without that person’s knowledge.

As a result of that legislation, this cowardly act is punishable by up to 20 years in prison.

And today the Senate passed legislation that recognizes that GHB is a significant public safety hazard and will result in the drug being designated as a Schedule I substance. At the same time, the legislation recognizes that there is a public health interest here. GHB is currently being studied as a treatment for narcolepsy and this bill goes to great lengths to ensure that this research can continue without undue burdens.

Further, the “Date Rape Drug Control Act” requires the Attorney General to assist in the development of forensic tests to help law enforcement detect GHB and related substances and develop training materials on date rape drugs for police officers. The bill also calls for a national awareness campaign to warn people about the danger of these drugs.

Recently, these date rape drugs have been used in my State of Delaware. Several women at “The Big Kahuna,”

the largest nightclub in Wilmington have had drugs slipped into their drinks.

This is a serious problem and we must take bold steps, like passing the measure we passed today, to establish strict penalties for this cowardly crime.

I am pleased that the Senate has passed both of these important pieces of legislation today and I hope to see them enacted into law.

Mr. LEVIN. Mr. President, the Senate has now approved a long-time crusade of mine—that of speeding the development and delivery of anti-addiction medications that block the craving for illicit addictive substances. This is one way in which we can fight and win the war on drugs—by blocking the craving for illegal substances. The proposal, which has now passed the Senate as embodied in S. 324, the Drug Addiction Treatment Act, which I introduced in January of this year along with Senator HATCH, Senator MOYNIHAN and Senator BIDEN, will achieve this goal.

Mr. President, the Drug Addiction Treatment Act, reported out of the Judiciary Committee as Sec. 18 of the Methamphetamine Anti-Proliferation Act of 1999, enables qualified physicians to prescribe schedule IV and V anti-addiction medications in their offices, under certain strict conditions. There are a number of reasons why this legislation is necessary. The Narcotic Addict Treatment Act of 1974, requires separate DEA registrations for physicians who want to use approved narcotics in drug abuse treatment and separate approvals of registrants by the U.S. Department of Health and Human Services (HHS) and by state agencies. The result has been a treatment system consisting primarily of large clinics, preventing physicians from treating patients in an office setting or in rural areas or small towns, thereby denying treatment to thousands in need of it. Additionally, experts say that many heroin addicts who want treatment are often deterred because of the stigma that is associated with such clinics.

The medications Buprenorphine and Buprenorphine/naloxone combination have proven to be effective blockers of craving for heroin. Dr. Alan Leshner, Director of the National Institute on Drug Abuse (NIDA) substantiates this finding in the "many NIDA funded studies [that] support the effectiveness, safety and efficacy of Buprenorphine and buprenorphine combined with naloxone for the treatment of opiate dependence."

The intent of the Drug Addiction Treatment Act, S. 324, is to make it possible for medications like Buprenorphine, because of the unlikelihood of diversion or abuse, to be used effectively to block the craving for heroin. To do this, the medication must be

made available in physician offices and there must be safeguards that such availability is not abused. The protections in the legislation against such abuse are as follows: Physicians may not treat more than 20 patients in an office setting unless the Secretary adjusts this number; the Secretary, as appropriate, may add to these conditions and allow the Attorney General to terminate a physician's DEA registration if these conditions are violated; and the program may be discontinued within three years after the date of enactment, if the Secretary and Attorney General determine that this new type of decentralized treatment has not proven to be an effective form of treatment.

States may opt out of the provision. Also, nothing in the waiver policy is intended to change the rules pertaining to methadone clinics or other facilities or practitioners that conduct drug treatment services under the dual registration system imposed by current law. In crafting the waiver provisions of this legislation, we consulted with the U.S. Department of Health and Human Services, including the Federal Drug Administration, and the Drug Enforcement Administration.

The National Institute on Drug Abuse (NIDA), in collaboration with a private pharmaceutical company developed Buprenorphine for the treatment of heroin addiction. Because of the reluctance of the pharmaceutical industry to become involved in developing anti-addiction medications, NIDA has played an active role in supporting research at every step of the drug development process. NIDA's Medications Development Division has been working to accelerate the identification, evaluation, development, and approval of new medications to treat drug addiction, which I call anti-addiction drugs. Through this process, NIDA has been able to bring a number of effective medications into drug treatment. In the case of Buprenorphine products, NIDA has supported research for many years which indicates that the medication is effective in blocking the craving for heroin.

Mr. President, the crisis of illegal drug use continues to cost society both in human toll and in the loss of billions of dollars each year. Consider the startling and compelling findings of the January 1995 Institute of Medicine Report, which estimates the cost to society for drug abuse and dependence treatment at \$66.9 billion in 1990 alone, and estimated the cost of drug-related crime at \$46 billion that same year. A 1995 report of the Office of National Drug Control Policy tells us that users of illegal drugs spent \$48.7 billion on the purchase of illicit substances to feed their addiction.

Recent findings of the Monitoring the Future Program, headed by Dr. Lloyd Johnson of the University of

Michigan, indicates that heroin use among American teens doubled between 1991 and 1998, and represents a clear and present danger for a significant number of American young people. Dr. Johnson attributes this to a "sharp increase in use . . . resulting from adoption of non-injectable modes of administration—smoking and snorting, in particular." Dr. Johnson goes on to say that "the very high purity of heroin on the street has made these new developments possible and that unfortunately, a number of those users will become dependent on heroin and will switch over to injection, which is a more efficient way to derive the equivalent high"

The President of the Michigan Public Health Association, Dr. Stephanie Meyers Schim, has spoken out eloquently about the "great problems" of substance abuse. In her recent letter in support of S. 324, she says: Substance abuse affects health care costs, mortality, workers' compensation claims, reduced productivity, crime, suicide, domestic violence, child abuse, and increases costs associated with extra law enforcement, motor vehicle crashes, crime, and lost productivity. Dr. Schim goes on to say, "Buprenorphine will allow drug addicted individuals to maximize everyday life activities, and participate more fully in work day and family activities while seeking the needed treatment and counseling to become drug free".

Dr. James H. Wood, Professor of Pharmacology at the University of Michigan Medical School recently wrote: "One of the most important aspects of your bill is the use of Buprenorphine by well-trained physicians to treat narcotic addiction from their offices, which has the potential to attract and treat effectively sizable populations of currently untreated addicts . . . a major byproduct of this increased treatment, of course, will be reduction in the demand for illicit narcotics in the U.S."

Dr. Thomas Kosten, President of the American Academy of Addiction Psychiatry echoed these sentiments in recent testimony on The Drug Addiction Treatment Act before the House Commerce Committee on Health and Environment, and I quote: ". . . I would like to support the availability of Buprenorphine for office based practice. Addiction is a brain disease and office-based practice is primarily needed for effective treatment of Buprenorphine."

The American Society of Addiction Medicine (ASAM), and the College on Problems of Drug Dependence which is the nation's longest standing organization of scientists addressing drug dependence and drug abuse, have stated that the availability of Buprenorphine in physicians' offices adds a needed expansion of current treatment for heroin addiction. ASAM also cautioned

that Buprenorphine will have limited utility if it is tied to the regulatory structure for current treatments of heroin addiction.

There are other compelling reasons why we must expedite the delivery of anti-addiction medications. Of the juveniles who land behind bars in state institutions, more than 60 percent of them reported using drugs once a week or more, and over 40 percent reported being under the influence of drugs while committing crimes, according to a report from the Bureau of Justice Statistics. Drug-related incarcerations are up and we are building more jails and prisons to accommodate them—more than 1000 have been built over the past 20 years. According to the July 14, 1999 Office of National Drug Control Policy Update, and I quote: “Drug-related arrests are up from 1.1 million arrests in 1988 to 1.6 million arrests in 1997—steady increases every year since 1991.”

These sentiments were also expressed during a May 9, 1997 Drug Forum on Anti-addiction Research, which I convened along with Senator MOYNIHAN, Senator BOB KERREY and other members of the Senate. Forum participants, including distinguished experts such as Dr. Herbert Kleber and Dr. Donald Landry of Columbia University, Dr. Charles Schuster of Wayne State University and Dr. James Woods of the University of Michigan, made it crystal clear that time is of the essence—we must act expeditiously on new treatment discoveries that block the craving for illicit addictive substances.

Mr. President, I received a very supportive letter from HHS Secretary Donna Shalala: “I am especially encouraged by the results of published clinical studies of Buprenorphine. Buprenorphine is a partial mu opiate receptor agonist, in Schedule V of the Controlled Substances Act, with unique properties which differentiate it from full agonists such as methadone or LAAM. The pharmacology of the combination tablet consisting of Buprenorphine and naloxone results in . . . low value and low desirability for diversion on the street. Published clinical studies suggest that it has very limited euphorogenic affects, and has the ability to precipitate withdrawal in individuals who are highly dependent upon other opioids. Thus, Buprenorphine and Buprenorphine/naloxone products are expected to have low diversion potential. Buprenorphine and Buprenorphine naloxone products are expected to reach new groups of opiate addicts—for example, those who do not have access to methadone programs, those who are reluctant to enter methadone treatment programs, and those who are unsuited to them (this would include for example, those in their first year of opiates addiction or those addicted to lower doses of opiates). Buprenorphine and

Buprenorphine/naloxone products should increase the amount of treatment capacity available and expand the range of treatment options that can be used by physicians. Secretary Shalala went on to say, “Buprenorphine and Buprenorphine/Naloxone would not replace methadone. Methadone and LAAM clinics would remain an important part of the treatment continuum.”

Mr. President, a companion bill has been introduced and reported out of Committee in the House. It is my hope that full House will act as expeditiously as the Senate on this important legislation.

Mr. BIDEN. Mr. President, 3 years ago I joined with my distinguished friend and colleague, Senator HATCH, to introduce the Hatch-Biden Methamphetamine Control Act to address the growing threat of methamphetamine use in our country before it was too late. Our failure to foresee and prevent the crack cocaine epidemic is one of the most significant public policy mistakes in recent history. We were determined not to repeat that mistake with methamphetamine.

That 1996 act provided crucial tools that we needed to stay ahead of the methamphetamine epidemic—increased penalties for possessing and trafficking in methamphetamine and the precursor chemicals and equipment used to manufacture the drug; tighter reporting requirements and restrictions on the legitimate sales of products containing precursor chemicals to prevent their diversion; increased reporting requirements for firms that sell those products by mail; and enhanced prison sentences for meth manufacturers who endanger the life of any individual or endanger the environment while making this drug. We also created a national working group of law enforcement and public health officials to monitor any growth in the methamphetamine epidemic.

I have no doubt that our 1996 legislation slowed this epidemic significantly. But we are up against a powerful and highly addictive drug. The Methamphetamine Anti-Proliferation Act of 1999—which I have cosponsored—builds on the 1996 act. First and foremost, it closes the “amphetamine loophole” in current law by making the penalties for manufacturing, distribution, importing and exporting amphetamine the same as those for meth. After all, the two drugs differ by only one chemical and are sold interchangeably on the street. If users can’t tell the difference between the two substances, there is no reason why the penalties should be different.

The bill also addresses the growing problem of meth labs by establishing penalties for manufacturing the drug with an enhanced penalty for those who would put a child’s life at risk in the process. We provide the Drug En-

forcement Administration with much needed funding to clean up clandestine labs after they are seized as well as to train state and local law enforcement officers to handle the hazardous wastes produced in the meth labs and certify them to train their colleagues. Methamphetamine is made from an array of hazardous substances—battery acid, lye, ammonia gas, hydrochloric acid, just to name a few—that produce toxic fumes and often lead to fires or explosions when mixed. I am revealing nothing by naming some of these chemical ingredients. Anyone with access to the Internet can download a detailed meth recipe with a few simple keystrokes. Our legislation would make such postings illegal.

We provide money for the Drug Enforcement Administration to clean up these toxic sites and certify state and local officials to handle the hazardous byproducts at the lab sites. We provide funds for additional law enforcement personnel—including agents, investigators, prosecutors, lab technicians, chemists, investigative assistants and drug prevention specialists in High Intensity Drug Trafficking Areas where meth is a problem. We also provide funds for new agents to assist State and local law enforcement in small- and mid-sized communities in all phases of drug investigations and assist state and local law enforcement in rural areas. Further, the legislation provides much needed money for prevention, treatment and research, including clinical trials. It asks the Institute of Medicine to issue a report on the status of pharmacotherapies for treatment of amphetamine and methamphetamine addiction. I understand that the scientists at the National Institute on Drug Abuse are making headway in isolating amino acids and developing medications to deal with meth overdose and addiction.

We also have a provision that would allow certain doctors to dispense Schedule III, IV and V drugs from their offices to treat addiction. I am glad to see this provision included. Ten years ago, I asked the question: “If drug abuse is an epidemic, are we doing enough to find a medical ‘cure’?” Unfortunately that question is still with us. But today we also have another question: “Are we doing enough to get the ‘cures’ we have to those who need them?” We have an enormous “treatment gap” in this country. Less than half of the estimated 4.4 to 5.3 million people who need drug treatment are receiving it. Licensing qualified doctors to prescribe certain pharmacotherapies from their offices is a significant step toward bridging the treatment gap. Also to that end, this bill authorizes \$10 million for treatment of methamphetamine addiction.

The bill also tightens the restrictions on direct and indirect advertising of illegal drug paraphernalia and Schedule

I drugs. Under this legislation, it would be illegal for on-line magazines and other websites to post advertisements for such illegal material or provide "links" to websites that do. We crafted this language carefully so that we restrict the sale of drug paraphernalia without restricting the first amendment. All in all, I believe that this is a comprehensive bill that attacks the methamphetamine and amphetamine problem from every angle. Today the Senate also passed the "Date Rape Drug Control Act of 1999," a very important piece of legislation which will place the most stringent controls on GHB, a drug which is being used with increasing frequency to commit rape. I commend Senator ABRAHAM for his efforts to get this bill passed and I thank him for acknowledging my efforts as well.

For nearly 5 years now, I have been working to raise awareness about date rape drugs including rohypnol and ketamine. In 1996, I first introduced legislation to schedule these drugs under the Controlled Substances Act. This was not a step I took lightly because there is a regulatory procedure in place for scheduling controlled substances. But my view was that the regulatory process would take years to do what needed to be done in months, forfeiting valuable time in the fight to stop these drugs from being used to commit heinous crimes. Federal scheduling is important for three simple reasons. First, Federal scheduling triggers increased state drug law penalties. This is because state law penalties are linked to the level at which a drug appears on the Federal controlled substance schedule. Since more than 95 per cent of all drug cases are prosecuted at the state level, not by the Federal government, federal scheduling is vitally important.

Second, Federal scheduling triggers tough federal penalties.

And third, scheduling has proven to work. In 1984, I worked to reschedule Quaaludes from Schedule II to Schedule I, Congress passed the law and the Quaalude epidemic was greatly reduced. Again in 1990, I worked to reclassify steroids as a Schedule III substance, Congress passed the law and again a drug epidemic that had been on the rise was reversed.

Progress on scheduling date rape drugs has been slow. This past August—4 years after I first called for stricter regulations—the Drug Enforcement Administration finally classified ketamine as a Schedule III drug. Rohypnol has yet to be classified as a Schedule I drug, though we have passed legislation that stipulates that it is subject to federal penalties. Far from perfect, but it is a small step in the right direction.

In 1996, we passed legislation to crack down on those who commit violent crimes—including rape—by giving the

victim a controlled substance without that person's knowledge. As a result of that legislation, this cowardly act is punishable by up to 20 years in prison. And today the Senate passed legislation that recognizes that GHB is a significant public safety hazard and will result in the drug being designated as a Schedule I substance. At the same time, the legislation recognizes that there is a public health interest here. GHB is currently being studied as a treatment for narcolepsy and this bill goes to great lengths to ensure that this research can continue without undue burdens.

Further, the Date Rape Drug Control Act requires the Attorney General to assist in the development of forensic tests to help law enforcement detect GHB and related substances and develop training materials on date rape drugs for police officers. The bill also calls for a national awareness campaign to warn people about the danger of these drugs. Recently, these date rape drugs have been used in my State of Delaware. Several women at "The Big Kahuna," the largest nightclub in Wilmington have had drugs slipped into their drinks. This is a serious problem and we must take bold steps, like passing the measure we passed today, to establish strict penalties for this cowardly crime. I am pleased that the Senate has passed both of these important pieces of legislation today and I hope to see them enacted into law.

Mr. MOYNIHAN. Mr. President, I rise to commend the Senate for unanimously passing the Drug Addiction Treatment Act of 1999 (S. 324), as Title II, Subsection B, of the DEFEAT Meth Act of 1999 (S. 486). The Senate's action today marks a milestone in the treatment of opiate dependence. The Drug Addiction Treatment Act increases access to new medications, such as buprenorphine, to treat opiate addiction. I thank my colleagues Senator LEVIN (whose long-term vision inspired this legislation), Senator HATCH, and Senator BIDEN for their leadership and dedication in developing this Act, and I look forward to seeing the Drug Addiction Treatment Act of 1999 become law.

Determining how to deal with the problem of addiction is not a new topic. Just over a decade ago when we passed the Anti-Drug Abuse Act of 1988, I was assigned by our then-Leader ROBERT BYRD, with Sam Nunn, to co-chair a working group to develop a proposal for drug control legislation. We worked together with a similar Republican task force. We agreed, at least for a while, to divide funding under our bill between demand reduction activities (60 percent) and supply reduction activities (40 percent). And we created the Director of National Drug Control Policy (section 1002); next, "There shall be in the Office of National Drug Control Policy a Deputy Director for Demand Reduction and a Deputy Director for Supply Reduction."

We put demand first. To think that you can ever end the problem by interdicting the supply of drugs, well, it's an illusion. There's no possibility.

I have been intimately involved with trying to eradicate the supply of drugs into this country. It fell upon me, as a member of the Nixon Cabinet, to negotiate shutting down the heroin traffic that went from central Turkey to Marseilles to New York—"the French Connection"—but we knew the minute that happened, another route would spring up. That was a given. The success was short-lived. What we needed was demand reduction, a focus on the user. And we still do.

Demand reduction requires science and it requires doctors. I see the science continues to develop, and The Drug Addiction Treatment Act of 1999 will allow doctors and patients to make use of it.

Congress and the public continue to fixate on supply interdiction and harsher sentences (without treatment) as the "solution" to our drug problems, and adamantly refuse to acknowledge what various experts now know and are telling us: that addiction is a chronic, relapsing disease; that is, the brain undergoes molecular, cellular, and physiological changes which may not be reversible.

What we are talking about is not simply a law enforcement problem, to cut the supply; it is a public health problem, and we need to treat it as such. We need to stop filling our jails under the misguided notion that such actions will stop the problem of drug addiction. The Drug Addiction Treatment Act of 1999 is a step in the right direction.

Ms. COLLINS. Mr. President, I ask unanimous consent that the committee substitute, as amended, be agreed to, the bill be read a third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The bill (S. 486), as amended, was read the third time and passed.

ESTABLISHING THE ABRAHAM LINCOLN BICENTENNIAL COMMISSION

Ms. COLLINS. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 1451, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1451) to establish the Abraham Lincoln Bicentennial Commission.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2795

(Purpose: To provide a complete substitute)

Ms. COLLINS. Mr. President, there is a substitute amendment at the desk submitted by Senators HATCH, LEAHY, FITZGERALD, and DURBIN, and I ask for its consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS], for Mr. HATCH, for herself, Mr. LEAHY, Mr. FITZGERALD and Mr. DURBIN, proposes an amendment numbered 2795.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Abraham Lincoln Bicentennial Commission Act".

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) Abraham Lincoln, the 16th President, was one of the Nation's most prominent leaders, demonstrating true courage during the Civil War, one of the greatest crises in the Nation's history.

(2) Born of humble roots in Hardin County, Kentucky, on February 12, 1809, Abraham Lincoln rose to the Presidency through a legacy of honesty, integrity, intelligence, and commitment to the United States.

(3) With the belief that all men were created equal, Abraham Lincoln led the effort to free all slaves in the United States.

(4) Abraham Lincoln had a generous heart, with malice toward none and with charity for all.

(5) Abraham Lincoln gave the ultimate sacrifice for the country Lincoln loved, dying from an assassin's bullet on April 15, 1865.

(6) All Americans could benefit from studying the life of Abraham Lincoln, for Lincoln's life is a model for accomplishing the "American Dream" through honesty, integrity, loyalty, and a lifetime of education.

(7) The year 2009 will be the bicentennial anniversary of the birth of Abraham Lincoln, and a commission should be established to study and recommend to Congress activities that are fitting and proper to celebrate that anniversary in a manner that appropriately honors Abraham Lincoln.

SEC. 3. ESTABLISHMENT.

There is established a commission to be known as the Abraham Lincoln Bicentennial Commission (referred to in this Act as the "Commission").

SEC. 4. DUTIES.

The Commission shall have the following duties:

(1) To study activities that may be carried out by the Federal Government to determine whether the activities are fitting and proper to honor Abraham Lincoln on the occasion of the bicentennial anniversary of Lincoln's birth, including—

(A) the minting of an Abraham Lincoln bicentennial penny;

(B) the issuance of an Abraham Lincoln bicentennial postage stamp;

(C) the convening of a joint meeting or joint session of Congress for ceremonies and activities relating to Abraham Lincoln;

(D) a redesignation of the Lincoln Memorial, or other activity with respect to the Memorial; and

(E) the acquisition and preservation of artifacts associated with Abraham Lincoln.

(2) To recommend to Congress the activities that the Commission considers most fitting and proper to honor Abraham Lincoln on such occasion, and the entity or entities in the Federal Government that the Commission considers most appropriate to carry out such activities.

SEC. 5. MEMBERSHIP.

(a) NUMBER AND APPOINTMENT.—The Commission shall be composed of 15 members appointed as follows:

(1) Two members, each of whom shall be a qualified citizen described in subsection (b), appointed by the President.

(2) One member, who shall be a qualified citizen described in subsection (b), appointed by the President on the recommendation of the Governor of Illinois.

(3) One member, who shall be a qualified citizen described in subsection (b), appointed by the President on the recommendation of the Governor of Indiana.

(4) One member, who shall be a qualified citizen described in subsection (b), appointed by the President on the recommendation of the Governor of Kentucky.

(5) Three members, at least one of whom shall be a Member of the House of Representatives, appointed by the Speaker of the House of Representatives.

(6) Three members, at least one of whom shall be a Senator, appointed by the majority leader of the Senate.

(7) Two members, at least one of whom shall be a Member of the House of Representatives, appointed by the minority leader of the House of Representatives.

(8) Two members, at least one of whom shall be a Senator, appointed by the minority leader of the Senate.

(b) QUALIFIED CITIZEN.—A qualified citizen described in this subsection is a private citizen of the United States with—

(1) a demonstrated dedication to educating others about the importance of historical figures and events; and

(2) substantial knowledge and appreciation of Abraham Lincoln.

(c) TIME OF APPOINTMENT.—Each initial appointment of a member of the Commission shall be made before the expiration of the 120-day period beginning on the date of enactment of this Act.

(d) CONTINUATION OF MEMBERSHIP.—If a member of the Commission was appointed to the Commission as a Member of Congress, and ceases to be a Member of Congress, that member may continue to serve on the Commission for not longer than the 30-day period beginning on the date that member ceases to be a Member of Congress.

(e) TERMS.—Each member shall be appointed for the life of the Commission.

(f) VACANCIES.—A vacancy in the Commission shall not affect the powers of the Commission but shall be filled in the manner in which the original appointment was made.

(g) BASIC PAY.—Members shall serve on the Commission without pay.

(h) TRAVEL EXPENSES.—Each member shall receive travel expenses, including per diem in lieu of subsistence, in accordance with sections 5702 and 5703 of title 5, United States Code.

(i) QUORUM.—Five members of the Commission shall constitute a quorum but a lesser number may hold hearings.

(j) CHAIR.—The Commission shall select a Chair from among the members of the Commission.

(k) MEETINGS.—The Commission shall meet at the call of the Chair. Periodically, the Commission shall hold a meeting in Springfield, Illinois.

SEC. 6. DIRECTOR AND STAFF.

(a) DIRECTOR.—The Commission may appoint and fix the pay of a Director and such additional personnel as the Commission considers to be appropriate.

(b) APPLICABILITY OF CERTAIN CIVIL SERVICE LAWS.—

(1) DIRECTOR.—The Director of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of that title relating to classification and General Schedule pay rates.

(2) STAFF.—The staff of the Commission shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of that title relating to classification and General Schedule pay rates.

SEC. 7. POWERS.

(a) HEARINGS AND SESSIONS.—The Commission may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission considers to be appropriate.

(b) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission may, if authorized by the Commission, take any action that the Commission is authorized to take by this Act.

(c) OBTAINING OFFICIAL DATA.—The Commission may secure directly from any department or agency of the United States information necessary to enable the Commission to carry out this Act. Upon request of the Chair of the Commission, the head of that department or agency shall furnish that information to the Commission.

(d) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) ADMINISTRATIVE SUPPORT SERVICES.—Upon the request of the Commission, the Administrator of General Services shall provide to the Commission, on a reimbursable basis, the administrative support services necessary for the Commission to carry out its responsibilities under this Act.

SEC. 8. REPORTS.

(a) INTERIM REPORTS.—The Commission may submit to Congress such interim reports as the Commission considers to be appropriate.

(b) FINAL REPORT.—The Commission shall submit a final report to Congress not later than the expiration of the 4-year period beginning on the date of the formation of the Commission. The final report shall contain—

(1) a detailed statement of the findings and conclusions of the Commission;

(2) the recommendations of the Commission; and

(3) any other information that the Commission considers to be appropriate.

SEC. 9. BUDGET ACT COMPLIANCE.

Any spending authority provided under this Act shall be effective only to such extent and in such amounts as are provided in appropriation Acts.

SEC. 10. TERMINATION.

The Commission shall terminate 120 days after submitting the final report of the Commission pursuant to section 8.

SEC. 11. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this Act.

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2795) was agreed to.

Ms. COLLINS. Mr. President, I ask unanimous consent that the bill be read a third time and passed, as amended, the motion to reconsider be laid upon the table, and that any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1451), as amended, was read the third time and passed.

Mr. REID addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

UNANIMOUS-CONSENT REQUEST— S. RES. 237

Mr. REID. On behalf of Senator BOXER, I send a Senate resolution to the desk and ask for its immediate consideration.

Ms. COLLINS. On behalf of the Republican leader, I object.

The PRESIDING OFFICER. Objection is heard.

S. Res. 237 will lie over under the rule.

Mrs. BOXER. Mr. President, today I am submitting a resolution on the Convention to Eliminate All Forms of Discrimination Against Women.

For those unfamiliar with this issue, the Treaty, known by its acronym CEDAW, is the most comprehensive and detailed international treaty to date that addresses the rights of women.

The United States was an active participant in drafting this treaty. It was approved by the General Assembly in 1979. President Carter signed the treaty on behalf of the United States.

To date, 165 nations have ratified or acceded to the treaty. The United States joins the likes of Afghanistan, North Korea and Iran as the few nations who have decided not to become state parties to this treaty.

The Convention requires that nations take measures to eliminate discrimination against women. Discrimination is defined as "any distinction, exclusion or restriction made on the basis of sex which has the effect of impairing or nullifying the recognition, enjoyment, or exercise by women, irrespective of their marital status."

The treaty addresses "human rights and fundamental freedoms in the political, economic, social, cultural, civil, or any other field."

Let me be clear, this treaty covers the most basic rights for women. For example, Article 5 recognizes the common responsibility of men and women for raising children. Article 6 requires measures to suppress all forms of traf-

fic in women and exploitation of prostitution of women.

Articles 7 and 8 would ensure that women have the right to vote, run for office, and represent their countries in international activities.

Article 10 calls for the elimination of discrimination in the field of education.

Article 11 gives women the right to work and free choice of employment.

Article 12 eliminates discrimination in the delivery of health care services.

This treaty covers other areas of discrimination as well, but as you can tell by the few Articles I have described, this treaty is extremely important to the rights of women throughout the world.

And, ratification of this treaty will strengthen our capability to urge other nations to promote these rights.

In 1994 the Senate Foreign Relations overwhelmingly supported this treaty approving the resolution of ratification by a vote of 13 to 5.

Unfortunately, time ran out in the 103rd Congress before the full Senate had the opportunity to consider the treaty.

Today, I am offering amendment stating that it is the Sense of the Senate that the Foreign Relations Committee should once again hold hearings on CEDAW.

It also states the Senate should take action on the treaty prior to March 8, 2000—International Women's Day.

The United States needs to show that it is the world leader on promoting human rights and that includes the rights of women throughout the world.

I urge my colleagues to join us in co-sponsoring this resolution.

CHILD ABUSE PREVENTION AND ENFORCEMENT ACT

Ms. COLLINS. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of calendar No. 356, H.R. 764.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 764) to reduce the incidence of child abuse and neglect, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

TITLE I—THE CHILD ABUSE PREVENTION AND ENFORCEMENT ACT

SEC. 101. SHORT TITLE.

This title may be cited as the "Child Abuse Prevention and Enforcement Act".

SEC. 102. GRANT PROGRAM.

Section 102(b) of the Crime Identification Technology Act of 1998 (42 U.S.C. 14601(b)) is amended by striking "and" at the end of paragraph (15), by striking the period at the end of

paragraph (16) and inserting "; and", and by adding after paragraph (16) the following:

"(17) the capability of the criminal justice system to deliver timely, accurate, and complete criminal history record information to child welfare agencies, organizations, and programs that are engaged in the assessment of risk and other activities related to the protection of children, including protection against child sexual abuse, and placement of children in foster care."

SEC. 103. USE OF FUNDS UNDER BYRNE GRANT PROGRAM FOR CHILD PROTECTION.

Section 501(b) of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3751) is amended—

(1) by striking "and" at the end of paragraph (25);

(2) by striking the period at the end of paragraph (26) and inserting a semicolon; and

(3) by adding at the end the following:

"(27) enforcing child abuse and neglect laws, including laws protecting against child sexual abuse, and promoting programs designed to prevent child abuse and neglect; and

"(28) establishing or supporting cooperative programs between law enforcement and media organizations, to collect, record, retain, and disseminate information useful in the identification and apprehension of suspected criminal offenders."

SEC. 104. CONDITIONAL ADJUSTMENT IN SET ASIDE FOR CHILD ABUSE VICTIMS UNDER THE VICTIMS OF CRIME ACT OF 1984.

(a) IN GENERAL.—Section 1402(d)(2) of the Victims of Crime Act of 1984 (42 U.S.C. 10601(d)(2)) is amended—

(1) by striking "(2) the next \$10,000,000" and inserting "(2)(A) Except as provided in subparagraph (B), the next \$10,000,000"; and

(2) by adding at the end the following:

"(B)(i) For any fiscal year for which the amount deposited in the Fund is greater than the amount deposited in the Fund for fiscal year 1998, the \$10,000,000 referred to in subparagraph (A) plus an amount equal to 50 percent of the increase in the amount from fiscal year 1998 shall be available for grants under section 1404A.

"(ii) Amounts available under this subparagraph for any fiscal year shall not exceed \$20,000,000."

(b) INTERACTION WITH ANY CAP.—Subsection (a) shall be implemented so that any increase in funding provided thereby shall operate notwithstanding any dollar limitation on the availability of the Crime Victims Fund established under the Victims of Crime Act of 1984.

TITLE II—JENNIFER'S LAW

SECTION 201. SHORT TITLE.

This title may be cited as "Jennifer's Law".

SEC. 202. PROGRAM AUTHORIZED.

The Attorney General is authorized to provide grant awards to States to enable States to improve the reporting of unidentified and missing persons.

SEC. 203. ELIGIBILITY.

(a) APPLICATION.—To be eligible to receive a grant award under this title, a State shall submit an application at such time and in such form as the Attorney General may reasonably require.

(b) CONTENTS.—Each such application shall include assurances that the State shall, to the greatest extent possible—

(1) report to the National Crime Information Center and when possible, to law enforcement authorities throughout the State regarding every deceased unidentified person, regardless of age, found in the State's jurisdiction;

(2) enter a complete profile of such unidentified person in compliance with the guidelines established by the Department of Justice for the

National Crime Information Center Missing and Unidentified Persons File, including dental records, DNA records, x-rays, and fingerprints, if available;

(3) enter the National Crime Information Center number or other appropriate number assigned to the unidentified person on the death certificate of each such unidentified person; and

(4) retain all such records pertaining to unidentified persons until a person is identified.

SEC. 204. USES OF FUNDS.

A State that receives a grant award under this title may use such funds received to establish or expand programs developed to improve the reporting of unidentified persons in accordance with the assurances provided in the application submitted pursuant to section 203(b).

SEC. 205. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this title \$2,000,000 for each of fiscal years 2000, 2001, and 2002.

Ms. COLLINS. Mr. President, I ask unanimous consent that the committee substitute be agreed to, the bill be read a third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (H.R. 764), as amended, was read the third time and passed.

Mr. LEAHY. Mr. President, I am pleased that the Senate has approved the Child Abuse Prevention and Enforcement Act, which Senator DEWINE and I recently introduced in the Senate. Our bipartisan legislation builds on the successful passage into law of the Crime Identification Technology Act of 1998, which Senator DEWINE and I sponsored in the last Congress. Our bill also complements S. 249, the Missing, Exploited and Runaway Children Protection Act, which Senator HATCH and I worked together to steer to final passage just last month.

Unfortunately, the number of abused or neglected children in this country nearly doubled between 1986 and 1993. Each day there are 9,000 reports of child abuse in America and more than three million cases annually of abused or neglected children. In my home state of Vermont, 2,309 children were reported to child protective services for child abuse or neglect investigations in 1997, the last year data is available. After investigation, 1,041 of these reports found substantiated cases of child maltreatment in Vermont.

Each child behind these statistics is an American tragedy. But we can help. The Child Abuse Prevention and Enforcement Act provides these abused or neglected children with the Federal assistance that they deserve. And our legislation can make a real difference in the lives of our nation's children without any additional cost to taxpayers.

Our bipartisan legislation will make a difference by giving State and local officials the flexibility to use existing Department of Justice grant programs

to prevent child abuse and neglect, investigate child abuse and neglect crimes and protect children who have suffered from abuse and neglect. The bill does this by making three changes to current law.

First, the Child Abuse Prevention and Enforcement Act amends the Crime Identification Technology Act of 1998 to make grant dollars available specifically to enhance the capability of criminal history information to agencies and workers for child welfare, child abuse and adoption purposes. Congress has authorized \$250 million annually for grants under the Crime Identification Technology Act.

Second, the Child Abuse Prevention and Enforcement Act amends the Byrne Grant Program to permit funds to be used for enforcing child abuse and neglect laws, including laws protecting against child sexual abuse, and promoting programs designed to prevent child abuse and neglect. Congress has traditionally funded the Byrne Grant Program at about \$500 million a year.

Third, the Child Abuse Prevention and Enforcement Act doubles the available funds, from \$10 million to \$20 million, for grants to each State for child abuse treatment and prevention from the Crime Victims Fund. This fund is financed through the collection of criminal fines, penalties and other assessments against persons convicted of crimes against the United States. In the 1998 fiscal year, the Crime Victims Fund held \$363 million. To ensure that other crime victim programs support by the Fund are not reduced, the expansion of the child abuse treatment and prevention earmark applies only when the Fund exceeds \$363 million in a fiscal year. This year, the Crime Victims Fund is expected to collect more than \$1 billion due in part to large anti-trust penalties.

Despite the tireless efforts of concerned Vermonters, including the many dedicated workers and volunteers at Prevent Child Abuse in Vermont and the Vermont Department of Social and Rehabilitative Services, Vermont is below the national average for its ability to provide services to abused or neglected children. In 1997, 411 children found to be abused or neglected received no services, about 40 percent of investigated cases. Nationally, about 25 percent of all abused or neglected children received no services. Our legislation provides more resources to help Vermonters and other Americans provide services to all abused or neglected children.

I want to thank the many advocates who support our bill and the companion legislation introduced by Representatives PRYCE and TUBBS JONES, H.R. 764, which passed the House of Representatives by a vote of 425-2 on October 5, 1999. These advocates include the diverse National Child Abuse Coalition: ACTION for Child Protec-

tion; Alliance for Children and Families; American Academy of Pediatrics; American Bar Association; American Dental Association; American Professional Society on the Abuse of Children; American Prosecutors Research Institute; American Psychological Association; Association of Junior Leagues International; Boy Scouts of America; Child Welfare League of America; Childhelp USA; Children's Defense Fund; General Federation of Women's Club; National Alliance of Children's Trust and Prevention Funds; National Association of Child Advocates; National Association of Counsel for Children; National Association of Social Workers; National Children's Alliance; National Committee to Prevent Child Abuse; National Council of Jewish Women; National Court Appointed Special Advocates Association; National Education Association; National Exchange Club Foundation for Prevention of Child Abuse; National Network for Youth; National PTA; Parents Anonymous; and Parents United. In addition, the National Center for Missing and Exploited Children and Prevent Child Abuse America have endorsed our bill and its House counterpart.

I look forward to the House of Representatives passing the Child Abuse Prevention and Enforcement Act for the sake of our nation's children.

Ms. COLLINS. Mr. President, I am sure my colleagues will be as pleased as I am to know we have reached the end, at least of this list, of the bills that we can clear. We are still hoping to clear some additional ones later today.

NATIONAL COLORECTAL CANCER AWARENESS MONTH

Ms. COLLINS. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Res. 108, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 108) designating the month of March each year as "National Colorectal Cancer Awareness Month".

There being no objection, the Senate proceeded to consider the resolution.

AMENDMENT NO. 2796

(Purpose: To amend the designation date of "National Colorectal Cancer Awareness Month.")

Ms. COLLINS. Mr. President, there is a technical amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the technical amendment.

The legislative clerk read as follows:

The Senator from Maine [Ms. COLLINS] for Mr. HATCH, proposes an amendment numbered 2796.

The amendment is as follows:

On page 2, line 5, strike "March of each year" and insert "March, 2000,".

Amend the title so as to read: "Resolution designating the month of March, 2000, as National Colorectal Cancer Awareness Month".

Ms. COLLINS. Mr. President, I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2796) was agreed to.

Ms. COLLINS. Mr. President, I ask unanimous consent that the resolution, as amended, be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and finally, that any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 108), as amended, was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

[The resolution was not available for printing. It will appear in a future edition of the RECORD]

Ms. COLLINS. Mr. President, I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania.

Mr. LEAHY. I wonder if the Senator from Maine would yield for one comment?

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania.

Mr. LEAHY. Would the Senator from Pennsylvania yield for 30 seconds?

Mr. SPECTER. I would.

Mr. LEAHY. Mr. President, I commend the Senator from Maine. She has cleared out the Judiciary Committee docket to a fare-thee-well. A lot of the legislation was worked in a bipartisan fashion by Senator HATCH and myself and the distinguished Senator from Pennsylvania and others.

Ms. COLLINS. I thank the Senator for his comments.

The PRESIDING OFFICER (Mr. AL-LARD). The Senator from Pennsylvania.

FUNDING FOR DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION

Mr. SPECTER. Mr. President, I have sought recognition to comment on the pending appropriations bill which includes funding for the three Departments of Health and Human Services, Education, and Labor, the subcommittee which I chair for the Appropriations Committee.

The legislative process has proceeded to this point in an extraordinary way.

It had been my hope and plan that the bill for my subcommittee would have been taken up by the Congress, passed, and presented to the President in advance of the close of the fiscal year, September 30, but that has not occurred.

It had been my hope and plan to present it to the President before the end of the fiscal year so he could have signed it or vetoed it and, had he chosen to veto it, there could have been a public debate on the priorities in the bill and also the key point of having local control on the decision of \$1.3 billion, which has been allocated for additional teachers for the reduction of classroom size.

Unfortunately, it has been the practice in the Congress in recent years to pass the bills after the close of the fiscal year and in a context where we are going to yield to the President's wishes, subject to a veto, because it may result in the closing down of the Government. Winston Churchill had it right when he said that democracy is a terrible form of government except compared to everything else. I think that would apply to representative democracy as well. Somehow we muddle through. We are in the final stage of the muddling process now.

To describe the process to people who are not familiar with the inside of the Senate is very challenging. I was discussing with my son last night the plan to have the Senate convene at 12:01 a.m., November 20, Saturday morning, to take up a cloture motion on the appropriations bill, and then to vote at 1:01 a.m. It was necessary to have the conversation because I had to defer lunch with my 4-year-old granddaughter, Perri, and picking up my 6-year-old granddaughter, Silvi, from school, all of which is fine, but there has to be some reason for that.

We have Senators exercising their rights which, to be repetitious, they have a right to do, such as to have bills read for several hours, which does not change the ultimate outcome, or to have cloture votes with these extraordinary scheduling problems. I learned a long time ago that the Senate is a lot smarter than I am and the rules of the Senate are in place for a purpose.

As one of our distinguished colleagues said yesterday in a closed caucus, Senators ought not be discouraged from exercising their rights because when they take to the floor and debate, have a filibuster, and have extended discussions for the purpose of acquainting the country with what is going on, perhaps it may arouse some public reaction to perhaps change what the Senate might be doing.

So, in essence, I am delighted to see the Senate rules observed and rights to Senators activated. For whatever delay there is, so be it. It is my hope that next year the appropriations bill for my subcommittee on the Departments

of Labor, Health and Human Services, and Education will be completed at an early date. I have talked to our distinguished majority leader, Senator LOTT, and I have had some encouragement that my bill may be taken up first next year, so that priorities can be established in regular course by the subcommittee, the full committee, and the Senate—the same on the House side—then conferenced and presented to the President for his signature or for his veto. If he chooses to veto the bill, so be it.

The bill which was voted out of the Senate by a vote of 73-25 had been very carefully crafted on a bipartisan basis with my distinguished colleague from Iowa, Senator TOM HARKIN. I learned a long time ago that if you want to get anything done in Washington in the Senate and the Congress, it has to be bipartisan. Senator HARKIN and I worked through our bill. We had a very attractive bill. We had emphasized \$300 million more than the President's figure on education, establishing the priorities which we thought were in order.

We had provided very substantial increases to the National Institutes of Health because of the great work done there in looking for cures and being on the verge of cures for very many major maladies. We are within 5 years striking distance, so the experts say, on Parkinson's and have made great progress on Alzheimer's and heart disease and cancer—prostate cancer, breast cancer and cervical cancer.

We picked a figure of \$93.7 billion because we thought that would attract very substantial bipartisan support, that being \$300 million higher in education than the President had, that it would qualify for a President's signature.

Regrettably, the House of Representatives did not pass the bill. In conference, the bill was substantially altered, being joined with the bill for the District of Columbia. It had an across-the-board cut of almost 1 percent. The bill was ultimately vetoed. Then it came back for reconsideration.

On reconsideration, the White House administration wanted to add some \$2.3 billion more. I knew that would cause a major strain on the Republican side of the aisle, and there was a great deal of pressure to yield to the President because of the bad experience we had in December 1995 and early 1996 when the Government was closed down and the Republican-controlled Congress took the blame. The result is that the Congress is now gun shy to fight with the President, gun shy because, with his threatened veto, the Congress has a strong tendency to back down, perhaps not on every point—the family planning issue and the U.N. dues was a notable exception—but backing down on almost every point. The result has been that we are developing an imperial presidency because we have a gun-shy

or timid Congress. That is very unfortunate.

The issue came into sharp focus on the matter of classroom size reduction and additional teachers, with the President's program to add 100,000 teachers. I think it is a very good program. I support it. But I do not support it if the local school district says that there are other needs at the local level which are more important to the school district than additional teachers and classroom size.

When we crafted our bill, we said we would acknowledge the President's ideas as the first priority, but if the local school district made a decision after a fact finding study that they wanted to use the money for something else, then let them use the money for something else. We held tough to that position. Without going into all the details, finally we were undercut. The rug was pulled out, and there was a concession to the President on that point, with a bone being thrown to the Congress so that 25 percent could be used for teacher training. But that is not the kind of flexibility that is best public policy. The best public policy is, OK, class size reduction and additional teachers are important and they are the first priority, but if a local school district says our local needs are different, then let's not put them in a Washington, DC, bureaucratic strait-jacket. That is the result of what has happened.

It is my hope that next year we can take this bill up early. This issue will still be with us next year and President Clinton will still be with us next year. When Senator HARKIN and I and other Republicans and Democrats, on a bipartisan basis, establish our priorities, let's legislate. As the Constitution says, the power of the purse is with the Congress—the appropriation power—so let us present the bill to the President. If he vetoes it, let's take the case to the public. I think we can certainly win on the issue of local control versus the Washington bureaucratic strait-jacket. To do that, the bill has to be presented to the President before the end of the fiscal year. It has to be presented to the President in September—hopefully early September. That is the plan for next year.

I would like to see the process modified where we do not have the White House officials in the legislative process as part of the negotiations. The Constitution says that Congress submits a bill to the President and he signs it or vetoes it. But that system has been aborted, observed in the breach more often than in the rule by having OMB officials, the Director of OMB, sitting down with the appropriators to decide what the President will accept before the Congress makes a decision and submits a bill to the President. That is not the constitutional way and we ought to change it.

So against that backdrop with substantial concerns about what has been done, I do intend to vote for this appropriations package. I do so because the good points outweigh the bad points, perhaps close, but the benefits do outweigh the negatives. We come through in this bill with an increase in the National Institutes of Health funding by \$2.3 billion, for a total of \$17.9 billion. Senator HARKIN and I have taken the lead with an increase, 2 years ago, of almost \$1 billion, last year \$2 billion, and this year \$2.3 billion. Some objections have been lodged, but nobody with sufficient bravado to try to take it out of the bill.

Enormous advances have been made on dreaded diseases. They are within 5 years of curing Parkinson's, so say the experts, with major research advances in Alzheimer's, cancer, heart ailments, and a whole range of various other ailments. With the Federal budget of \$1.8 trillion, \$17.9 billion is not chopped liver, but it is not too much.

This bill also has an increase in special education by \$913 million, bringing the total to more than \$6 billion on what is essentially a Federal obligation, and it frees State and local funds for other purposes. The Head Start increase is \$608 million, to more than \$5.2 billion. Afterschool learning centers more than doubled for a total of \$453 million. The substance abuse and mental health program increases by \$163 million over fiscal year 1999, for more than \$2.6 billion. AIDS funding increased by \$185 million over last year to almost \$1.6 billion. There is first-time funding of \$75 million for the Ricky Ray Hemophilia Act, which are appropriations that are long past due.

We worked out an accommodation on the issue of organ allocation and, regrettably, at the last minute on a backdoor arrangement, a different provision has been added to another bill that will be voted upon by the Congress. Organ allocation has been very contentious. Last year we agreed, under considerable reluctance, to a 1-year deferral. The Secretary of Health and Human Services, Donna Shalala, promulgated regulations on October 1, and then came the cry for an additional delay. Some wanted it at 90 days.

Finally, in a rather unusual way in my capacity as chairman of the conference, I invited Secretary Shalala to come to the conference on Wednesday, November 10. She was on her way home. We reached her in her car and she turned around from Georgetown and headed back to Capitol Hill. For more than an hour and a half we had a meeting with the House chairman, BILL YOUNG, who very much wanted a 90-day delay and the ranking Democrat on Appropriations, Congressman OBEY from Wisconsin, who also argued strongly for a delay. I urged that we not have the delay, as did Congressman

JOHN PORTER, chairman of the House subcommittee. Finally, we hammered out an agreement for 42 days—21 days for additional comments and 21 more days for a response to those comments.

I had thought that closed the matter out and reported back to the leadership. The general rule is to leave these issues with the subcommittee chairmen, and we have hammered it out. I found out late yesterday that there is another bill with a 90-day extension. It is not possible to put a hold on the other measure, which is a conference report. There could be some delay, such as a reading of the bill, a vote for cloture, but the result would be the same.

Let me say this to those who have increased the delay: It increases our tenacity to get these regulations into effect. There is some thinking that there will be an authorization bill that is going to validate the regulations. I am not one for predictions, but I am prepared to make one here. There won't be 60 votes for cloture. If that should be wrong, there certainly won't be 67 votes to override a Presidential veto. George Shultz, when he was Secretary of State, once made a prophetic comment that "nothing is ever settled in Washington." That very thing is true in Washington; he hit that right on the head. Nothing is ever settled in Washington. I thought the delay on the organ transplant issue had been resolved, but it wasn't settled. George Shultz may be wrong; we may settle it with finality when this 90-day period expires.

In summary, the Congress will finally get the job done on this appropriations bill and finally move ahead on the bill from my subcommittee on funding the Departments of Health and Human Services and Labor and Education. I have given a brief thumbnail description as to what the pluses and minuses are. I will vote for it because the advantages outweigh the disadvantages. But it is my hope that we will learn from the experiences this year and do a much better job next year.

I thank the Chair and yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SHELBY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2000— CONFERENCE REPORT

Mr. SHELBY. Mr. President, on behalf of the majority leader I submit a report of the committee of conference

on the bill (H.R. 1555) to authorize appropriations for fiscal year 2000 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The committee on conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill, H.R. 1555, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The Conference report is printed in the House proceedings of the RECORD of November 5, 1999).

Mr. SHELBY. Mr. President, I ask unanimous consent that there be 60 minutes for debate with the time divided as follows: Forty minutes equally divided between the chairman and vice chairman of the Intelligence Committee; 20 minutes under the control of Senator LEVIN.

I further ask unanimous consent that following the use or yielding back of time, which we anticipate, the conference report be agreed to, the motion to reconsider be laid upon the table, and any additional statements relating to the conference report be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SHELBY. Mr. President, I rise today to ask that my colleagues support the conference report on the Intelligence Authorization Act for Fiscal Year 2000.

I want to thank my colleagues in the House for their work on this legislation and especially Chairman GOSS and Ranking Member DIXON for their leadership in the conference.

I believe that the conference committee put together a solid package for consideration by the full Senate that fairly represents the intelligence priorities set forth in both the Senate and House versions of the Intelligence Authorization Act.

I am pleased to report that the conference committee accomplished its task in a bipartisan manner, and I want to thank my colleague from Nebraska, Senator KERREY, for working so closely with me to produce this legislation.

I believe that the conference report embraces many of the key recommendations that the Senate adopted in its version of the bill.

We recommended significant increases in funding for high-priority projects aimed at better positioning the Intelligence Community for the

threats of the 21st century, while at the same time reducing funds for programs and activities that were not adequately justified or redundant.

In so doing, we authorized a moderate increase in overall funding for intelligence programs above the President's request. This is a positive step and I hope that next year the administration will follow our lead and begin to reinvest in our intelligence gathering capabilities.

The conference report includes key initiatives that I believe are vital for the future of our Intelligence Community.

These initiatives include:

1. bolstering advanced research and development across the Community, to facilitate, among other things, the modernization of NSA and CIA;
2. strengthening efforts in counter-proliferation, counter-terrorism, counter-narcotics, counter-intelligence, and effective covert action;
3. expanding the collection and exploitation of measurements and signatures intelligence, especially ballistic missile intelligence;
4. boosting education, recruiting, and technical training for Intelligence Community personnel;
5. enhancing analytical capabilities;
6. streamlining dissemination of intelligence products;
7. developing our ability to process, exploit and disseminate commercial imagery; and
8. providing new tools for information operations.

I believe that the conferees have provided the funds and guidance necessary to ensure that military commanders and national policymakers continue to receive timely, accurate information on threats to our security.

At the same time, we have found some critical areas within the Community that are in need of major improvements.

In the Senate, we had a distinguished panel of Americans with a broad range of expertise—our Technical Advisory Group—that took a look at some key areas within the Intelligence Community and brought forward some very important recommendations.

We thank all the members of the Technical Advisory Group for their time and efforts.

I will briefly summarize some of their findings, to the extent that I can in open session, along with some of the other findings of our conference.

First, our ability to collect and analyze information on the proliferation of weapons of mass destruction requires renewed emphasis and innovative thinking.

As our potential enemies seek out the ability to produce chemical, biological, and nuclear weapons, we must develop the ability to detect these efforts.

This bill places a great deal of emphasis on our ability to collect such in-

formation known as Measurements and Signatures Intelligence or MASINT.

Second, both the House and Senate Intelligence Committees agree that our Intelligence Community and our Defense Department must move quickly to address what our Technical Advisory Group identifies as a critical shortfall in our ability to properly task, process, exploit, and disseminate intelligence information collection by our airborne and overhead imagery assets.

As we modernize our Imagery Intelligence or IMINT architecture, the Intelligence and Armed Services Committees agree that we should not be spending the taxpayers money on collection architectures that we may not be able to utilize fully.

Third, we have once again placed strong emphasis on recapitalizing the National Security Agency's information technology infrastructure.

As we demand more from our Intelligence Community in a number of areas, we also demand fiscal responsibility. The conference report includes a number of reductions to programs that were not adequately justified or were redundant with other elements within the Intelligence Community.

The legislation contains some important new authorities for the Intelligence Community. I'll mention some of the highlights:

First, there are new protections for the identities of former covert agents and for the operational files of the National Imagery and Mapping Agency or "NIMA."

Second, there are new counterintelligence authorities—these include provisions allowing access to government computers used in classified work by executive branch employees. Also, there are new requirements for the FBI to begin its consultation with agencies that they are investigating at a far earlier stage than before.

Third, we have established a commission to study the role and missions of the National Reconnaissance Office or "NRO." This commission will look at the NRO from top to bottom—its findings and recommendations to us and the Senate Armed Services Committee will serve to guide our committees on the future funding and operations of the NRO.

I look forward to working with the chairman and ranking member of the Senate Armed Services Committee to ensure that the best candidates are selected for membership on this very important commission.

If any Member of the Senate wishes to review the classified portions of the bill, they are available off the Senate floor.

Finally, Mr. President, there is a significant piece of legislation in this bill that is intended to go after foreign international drug traffickers and those that support their illicit activities.

Title eight of this bill, the so-called "Foreign Narcotics Kingpin Designation Act," is modeled after the Executive Order that targets the assets of named Colombian traffickers and those that assist them in their trafficking activities.

Mr. President, I support strongly efforts to target and destroy significant foreign drug trafficking organizations. I have placed significant emphasis on counter-narcotics in this and every Intelligence Authorization bill since I became Chairman of this Committee. The record is clear.

The existing Colombian program has been highly successful. I would be the first to support the President if he chose to expand the program in a thoughtful and measured way. In fact, the Chief Executive already has the constitutional and statutory authority to do so. The President does not need this legislation to expand the scope of this program.

Accordingly, Mr. President, I, along with other Members of Congress, have expressed concern with this legislation because it may have some very serious unintended consequences for innocent American citizens.

Although the express language of the "Kingpin" legislation deals exclusively with foreign persons and entities, it will affect American citizens. Lurking within the seemingly innocuous language is the real possibility of unwitting and innocent American citizens being caught up in its global net. For example, an American business owner may be a joint venture partner with a foreign company that has been designated as "supporting" the activities of a foreign narcotics trafficker. Although the American person may be completely unaware of the illicit activities of their foreign partner, their own assets will also be blocked if they are jointly held.

The "Kingpin" legislation does not provide an opportunity for an American person to seek judicial review of the blocking of their jointly held assets. The result is that Americans may be deprived of their property without due process of law. Let me repeat that, Mr. President, Americans may be deprived of their property without due process of law.

Mr. President, I strongly support the expansion of this successful program. I do not, however, support depriving innocent Americans of their fundamental right to due process.

Many attempts were made to amend the "Kingpin" legislation in conference to make it clear that American citizens have an immediate avenue into Federal District Court should they be snared unjustifiably in this trap. Unfortunately, the sponsors and proponents of this bill in the House and Senate opposed any effort to clarify this fundamental American right. In fact, I have been told that if we were to

expressly state that a United States citizen has the right to immediate judicial review, this would, quote, gut the bill, unquote. I disagree.

Thomas Jefferson said that our "Bill of Rights is what the people are entitled to against any government on earth . . . and what no just government should refuse, or rest on inference." Mr. President, I also believe that our right to due process should not "rest on inference," but rather we should state it clearly and without equivocation. We do not do that in this bill.

Mr. President, I fear that in our earnest to pass a "tough drug bill" we may have sacrificed part of our freedom. I applaud the sponsors and proponents of this bill for their dedication to protecting our shores from the scourge of illegal drugs. I caution them, however, that their enthusiasm may be dampened as the true implications of this legislation become known.

Notwithstanding my concerns, I am encouraged that the conferees did agree to include a provision in the so-called "Kingpin" legislation that creates a panel to study whether these kinds of sanction regimes affect U.S. persons doing legitimate business with foreign partners, and whether there are adequate and fair remedies for honest U.S. persons.

I commend my colleague from Nebraska, Senator KERREY, for suggesting this study and also for other areas of leadership on which I have worked with the Senator during my tenure on the Intelligence Committee. He will be leaving the Intelligence Committee at the end of this year whenever his term is up, and we will miss him because he has certainly been a friend, but he has also been a leader to put America's national security first and foremost everywhere it comes up.

In my opinion, we have put the cart squarely before the horse dealing with due process. I am confident that such a panel as I alluded to earlier will confirm my concerns and the concerns of others and make substantive recommendations that my well-meaning colleagues will ultimately acknowledge and I hope will be able to accept.

The conference committee worked closely together in a bipartisan fashion to produce the comprehensive intelligence authorization act. I urge my colleagues to support its adoption.

Mr. SMITH of New Hampshire. Mr. President, I would like to recognize and thank Senator SHELBY and Senator KERREY for their leadership and support with regard to the POW/MIA sections of the Intelligence Authorization Act that originally passed the full Senate earlier this year. I am pleased that one of these sections has remained largely intact in the conference report we are now adopting. That provision (Section 308), will require a declassification review of two assessments of

Vietnam's cooperation on the POW/MIA issue which were conducted in 1998. One of these assessments was prepared by my office and the other by the National Intelligence Council. Much of the information in both of these documents does not require continued classification, and I believe the interests of the POW/MIA families and our nation's veterans is best served by having as much information as possible in the public domain concerning Vietnam's performance on the POW/MIA question. As the Chairman will recall, there is a provision in Section 308 that allows the Director of Central Intelligence to withhold from declassification the names of living foreign individuals who have cooperated with U.S. efforts to account for missing personnel from the Vietnam War. I wish to make clear that the Congressional intent with respect to this provision was related to individuals identified in the National Intelligence Estimate as "cooperative" with U.S. officials in Hanoi. Indeed, this specific area of concern was cited by the Director of Central Intelligence in a letter to the Senate on August 3, 1998. However, this is not meant to include information pertaining to the two former Vietnamese officials who are alleged to have prepared the so-called "1205" and "735" documents which we received through the Russian government which were reviewed in both of the above-referenced assessments. Is that the Chairman's understanding as well?

Mr. SHELBY. Yes it is.

Mr. SMITH of New Hampshire. I thank the Chairman for that clarification.

Mr. President, I also want to take this opportunity to express by profound disappointment that the other section concerning release of POW/MIA information to the Congress was not adopted by the Conference because of Member opposition from the House Permanent Select Committee on Intelligence. This provision, previously adopted by the full Senate this summer with the support of the Chairman and Vice Chairman of the Senate Select Committee on Intelligence, required our intelligence agencies to provide to Congress, within 120 days, a list of POW-MIA related documents that are still classified. This list would help the Congress exercise oversight on the POW/MIA issue on behalf of the families of missing personnel and our nation's veterans. I fail to see why such a reasonable provision could not have been adopted with the full support of the Conference. I plan to revisit this matter in the coming months, and would appreciate having the Chairman's views as to how we might proceed with respect to this important matter.

Mr. SHELBY. I share the disappointment expressed by my colleague, the senior Senator from New Hampshire.

As he knows, I have worked steadily with him over the past several years to address his well-founded concerns with respect to the way the POW/MIA issue has been addressed by our Intelligence Community. I agree that the provision to which he refers would help us with our oversight responsibilities. That is why I supported his amendment, as did my Vice-Chairman, when our intelligence bill passed the full Senate earlier this year. I want the Senator to know that I will work closely with him over the next few months to find a way to get the listing of POW/MIA reports he seeks provided to the Senate. He has a right to review these reports, as does every Member of the Senate. I would urge the Director of Central Intelligence and heads of each of our intelligence agencies to work cooperatively with the Select Committee on Intelligence on this matter. I also want the Senator to know that I will include his provision in next year's authorization measure if the information he seeks is not provided to the Senate in the next few months. I thank him for his leadership on this important matter.

Mr. SMITH of New Hampshire. I thank my distinguished colleague for that clarification and for his continued support on the POW/MIA issue.

Mr. SHELBY. Mr. President, I ask unanimous consent that, following my remarks, an editorial which appeared recently in the New York Times dealing with drug kingpin legislation, and specifically the due process problem I raised, be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

EXHIBIT 1

Carried Away by Drugs

The target of a new anti-drug initiative now speeding toward final congressional approval is a worthy one—big international drug traffickers. But as too often happens when Congress collaborates with the Clinton administration to toughen law enforcement policies, civil liberties stand to suffer.

The measure, called the Foreign Narcotics Kingpin Designation Act, over-whelmingly passed the House two weeks ago. A House-Senate conference committee incorporated the measure in the annual intelligence authorization bill that needs only a final floor vote in the Senate before going to the president's desk for his signature. All of this occurred without any public hearings or extended debate to explore the legislation's implications for due process and other constitutional values.

Under the measure, the government will be required to compile an annual list of those it determines to be "significant foreign narcotics traffickers" under standards that the bill does not articulate. The government would then have authority to freeze their assets in the United States without any chance for judicial review of the basis of the designation.

Americans who engage in financial dealings with a person or company on the list could have their assets blocked, again without the benefit of full judicial review. The measure makes no exception for those inves-

tors or partners who thought they were dealing with legitimate businesses.

"Is this the America we want?" asked Representative Jerrold Nadler, Democrat of New York, as he waged a lonely and futile fight against the bill in the House. "What is the remedy if the bureaucracy gets the wrong person?" Those pertinent questions were sadly lost in the rush to crack down on foreign drug lords before Congress adjourns.

Mr. SHELBY. I yield the floor.

Mr. KERREY. Mr. President, I rise to join Chairman SHELBY in urging my colleagues to vote in favor of the intelligence authorization conference report. This report is a culmination of the lengthy effort to fund intelligence activities for fiscal year 2000. It has not been easy to arrive at this point because the committee had to address many significant nonintelligence issues ranging from the reorganization of the Department of Energy to the establishment of procedures for blocking the assets of drug kingpins. We have arrived at this point because we have reached several important compromises with our House colleagues, and the report deserves the Senate's full support.

This conference report supports many new initiatives. In my view, one of the most important new initiatives is to make the year 2000 a watershed year for intelligence. The watershed represents a turnaround in spending on intelligence activities. I believe it is time to increase spending because we now have a much better understanding of the threats facing the United States of America and the important role intelligence plays in meeting those threats.

One of the most difficult parts of my job as the Intelligence Committee vice chairman has been to talk to people about the importance of intelligence. This job is difficult because most of the information is classified. Therefore, public debate on the condition of the intelligence community is extremely rare and discussing funding levels is almost impossible.

My colleagues are well aware that classified conference reports and the classified schedules of authorizations are available for their review in S-407 but you have to go there to get the details. We cannot talk about them now.

Let me say, however, intelligence is stretched very thin. Our global reach is supported by intelligence as global coverage. Without adequate coverage, we make policy mistakes. The Intelligence Community is stretched thin in trying to meet all of its commitments to policy makers. But I can't tell you on the floor of the Senate how thin it is stretched, and I can't tell you how much it's going to cost to fix. I can only tell you I'm glad fiscal year 2000 is a watershed year for intelligence.

A second initiative this bill supports is striking the balance between intelligence collection and the subsequent exploitation and dissemination of the

information collected. My colleagues should know that one of the problems of insufficient funding is that the Intelligence Community is unable properly to exploit and disseminate all of the information it gathers. If you think about it, this may seem odd. That is, the Community is collecting more information than it is able to analyze and deliver to its customers. But it is not odd. Among other things, it reflects constrained Intelligence budgets. As the Community has moved into advanced technologies, it has invested in the future by developing new intelligence collection systems. The idea was that by the time these new systems were ready to be used, we would have been able to find the funding to exploit and disseminate the information being collected. Well the future is now, and we haven't been able to find the funding to balance collection, exploitation, and dissemination. In this bill we have confronted the issue and proposed important solutions. Again, I urge my colleagues to read the classified report in S-407 in order to get the details.

Another important provision in this bill is the creation of a National Commission for the review of the National Reconnaissance Office. Mr. President, the NRO is a national treasure. They acquire and operate the nation's space reconnaissance satellites—the so-called spy satellites. They have a long and proud history of being on the leading edge of technology so that our nation's leaders could be better informed about our adversaries. We all got a glimpse at their extraordinary abilities when the Corona spy satellite imagery was released to the public. It is literally an eye-opening experience to be able to see now what our President was able to see years ago about the Soviet Union during the height of the Cold War. This is the type of effort we have come to expect from NRO.

But the NRO has come under public attack in the recent past. Unfavorable news accounts have caused some to be unsure about the NRO and the path it is following. Others have questioned whether the NRO should remain an agency resting somewhere between the authorities of the Director of Central Intelligence and the Secretary of Defense. Moreover, the end of the Cold War has altered forever the nature of the threats we face. New threats mean a changed emphasis for intelligence. Furthermore, the explosion of information technology has created new opportunities for the collection and the delivery of intelligence. Thus, the conferees decided there is a need to evaluate the NRO's roles and missions, organizational structure, technical skills, contractor relationships, uses of commercial satellite imagery, acquisition authorities, and its relationships to other agencies and departments of the Federal Government in order to assure

continuing success in satellite reconnaissance. I look forward to the Commission's work.

Finally, Mr. President, I would like to comment briefly on the "Foreign Narcotics Kingpin Designation Act" contained in the conference report. This is a significant piece of legislation intended to attack drug traffickers at the heart by blocking all of their assets either within the United States or that are under U.S. control. It establishes a procedure for the President of the United States to publicly identify drug kingpins and to block the kingpin's assets. As my colleagues may recall, a similar provision sponsored by Senators COVERDELL and FEINSTEIN was accepted as an amendment to the Intelligence Authorization Bill during floor action.

As I mentioned at the beginning of my statement, this provision has made the Intelligence Conference extremely interesting. Several of us joined the Chairman in being concerned about the right of judicial review for U.S. persons whose assets could be seized as a result of being involved in a joint venture with someone later identified as a drug kingpin. This was a matter of debate during discussions leading to the conference meeting and was addressed during the conference. The House Conference argued strenuously for their vision of the legislation which passed the House by a vote of 385 to 26. Further, the Administration supported the House version. Nonetheless, Chairman SHELBY and several of us remained concerned about due process being afforded to those who might unwittingly get caught up in the kingpin designation and subsequent blocking of assets.

The Conference agreed the concerns were of sufficient merit to warrant the appointment of a special judicial review panel to evaluate these concerns and report its findings. The commission is charged with the responsibility of reviewing judicial, regulatory, and administrative authorities relating to the blocking of assets. It also is to report on its evaluation of the remedies available to U.S. persons affected by the Government's blocking of assets of foreign persons. I believe their detailed and extended evaluation will provide the Congress insights into both the complexities of the Drug Kingpin legislation contained in the Intelligence Conference Report and the consequences to American persons when the assets of foreign persons are blocked under the International Emergency Economic Powers Act.

In conclusion, Mr. President, I would like to note this is my last Conference Report as the committee's Vice Chairman. My term on the Committee expires toward the end of January 2000. I have had the privilege of serving under highly distinguished Chairmen and Vice Chairmen: DAVID BOREN, FRANK MURKOWSKI, DENNIS DECONCINI, JOHN

WARNER, ARLEN SPECTER, and RICHARD SHELBY. In every instance, I have experienced a commitment to a bipartisan approach to intelligence.

Throughout my time on the Committee, the members always have treated intelligence activities and intelligence policy as serious issues deserving their close attention. Because the issues have always been treated very seriously, committee members have had disagreements. But, Mr. President, in the end we always found a bipartisan answer to our differences. Bipartisanship has been a hallmark of the committee because intelligence is not a partisan issue. If it ever should become a partisan issue, I believe we can look forward to a consequent politicization of intelligence.

This can be very bad for Congress and even worse for the country.

Again, I thank Chairman SHELBY for his leadership in delivering the conference report to the floor and for his commitment to finding bipartisan answers to some very complex questions. I look forward to the opportunity in the future to speak more fully on the floor concerning intelligence and its values.

Lastly, I call to my colleagues' attention and to the attention of the American people that the intelligence community is full of highly dedicated men and women who are working under some of the most difficult of circumstances. Their professionalism, their patriotism knows no bounds, and I salute them for their excellent work. Being the committee vice chairman has, indeed, been a great privilege.

I yield the floor.

UNANIMOUS-CONSENT AGREEMENT—H.R. 1180

Mr. LOTT. Mr. President, I ask unanimous consent that the agreement relative to the Work Incentives conference report commence at 3 p.m. today and that the remaining parameters of the consent agreement remain in order.

I further ask consent that the cloture vote relative to the appropriations conference report occur no later than 5 p.m. and that if cloture is invoked, adoption of the conference report immediately occur, without intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LOTT. In light of this agreement, there will be three back-to-back votes that will occur a few minutes before 5 o'clock this afternoon, the first being the cloture vote relative to the appropriations conference report, the second being passage of the appropriations conference report, and the third being passage of the Work Incentives conference report.

There are two very important colloquies we must have this afternoon

before the votes, one with regard to understandings with regard to the Work Incentives bill and another colloquy we will have with the leadership on the Democratic side, and I will participate in, along with Senator LUGAR and others, to discuss the overall dairy situation. We will fulfill that commitment.

I thank Senator DASCHLE, Senator KOHL, Senator FEINGOLD, and everybody who has been involved. I know how emotional and how strongly held these feelings are. I also share those feelings, and I will make that clear in a colloquy here in a few minutes.

Senator DASCHLE, do you want to do that now or in a few minutes?

Mr. DASCHLE. Mr. President, I know there are a number of other Senators who asked to be a part of this colloquy and they are not on the floor yet. I do recognize the importance of the authorization bill that is currently being considered. I know we need to give both of our managers the time they need to be able to complete their work. This is a very important piece of legislation.

Mr. LOTT. Let me just say, Mr. President, if I might, Senator DASCHLE and I will work with Senator KOHL and Senator REID and Senator LUGAR and others and will be prepared to do our colloquy when the debate is concluded on this very important piece of legislation. Thank you for allowing us to interpret at this point. If you will complete your work, we will be ready to go.

INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2000— CONFERENCE REPORT—Continued

Mr. DASCHLE. I might also say, I heard the distinguished Chair talk about the service provided to this committee and to the Senate by the distinguished ranking member, the Senator from Nebraska. I will make a full statement at a later time, but let me say for the record now, no one has served this committee, this caucus, and this Senate more effectively, taking his intelligence responsibility more seriously, than the distinguished Senator from Nebraska. He has been an extraordinary leader, an extraordinary Member, and one who has taken his responsibilities on this committee as seriously as anybody has to date.

He departs with the actions taken today. He will leave the committee as a result of the statute requiring a certain limit of time for each Senator. I know I speak for all Senators in expressing our gratitude to him and our admiration for a job very well done, I yield the floor.

Mr. LOTT. Mr. President, if I may take a moment of my leader time to join Senator DASCHLE in those remarks.

This is a very important committee. It is a committee that operates in the best tradition of total bipartisanship,

nonpartisanship. Chairman SHELBY has been doing an outstanding job. It really makes the leaders feel good when we see two Senators of two parties work together for our national interests and our intelligence community. Senator KERREY certainly has been just outstanding, the way he has handled that job. He has been cooperative, non-partisan.

These two Senators, Senator SHELBY and Senator KERREY, have worked together the way it is supposed to be done. I hope your successors will only do as well. I thank you for your service.

The PRESIDING OFFICER. Senator from Nebraska.

Mr. KERREY. I thank both leaders for their kind remarks.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I start by thanking the Senator from Nebraska for the extraordinary service he has rendered to the Intelligence Committee. I have served with him on that committee for a very short period of time, but I have seen the way he, working with Senator SHELBY, has been able to bring bipartisan leadership to this committee that is so essential for the working of this committee.

I say to our colleagues—I know Senator SHELBY has and as I know every member of the committee feels—Senator KERREY has made a unique and extraordinary contribution to the committee. He has attempted to strengthen the intelligence community every step of the way. He has done so in a bipartisan way. I commend him on his service. I know he is being rotated out of the committee, but that is what our rules provide. He will be missed.

The conference report to H.R. 1555, the Fiscal Year 2000 Intelligence Authorization Act, includes legislation under title 8 entitled "Foreign Narcotics Kingpin Designation Act."

Title 8 is intended to strengthen the Government's efforts to identify the assets, financial networks, and business associates of major foreign narcotics trafficking groups in an effort to disrupt these criminal organizations and bankrupt their leadership. I think all Senators agree with that laudable goal of combating the insidious effects of drug trafficking. In fact, an earlier version of this legislation was seen as being so without controversy that it was added by the Senate to the intelligence authorization bill in July of this year with little debate and on a voice vote.

Senators should be aware, however, that title 8, as it is now written, does have a significant national security, law enforcement, judicial, and drug trafficking implication that belie the legislation's simple design and are somewhat different from the original amendment that was offered, I believe, by Senator COVERDELL and by Senator FEINSTEIN.

I am not aware, however, despite the implications of this new language added in conference, of any committee of jurisdiction in either the Senate or the House having held a single hearing on the provision contained in title 8. The Senate Intelligence Committee has not had a hearing on title 8. The Senate Judiciary Committee has not had a hearing. Not a single legal or national security expert inside or outside of Government has testified before a congressional hearing as to whether title 8 should or should not become law, and if it does, how the legal rights of Americans might be changed as a result.

Except for the recent and very perfunctory House of Representatives debate and vote on this provision, the only public debate on the complexities of title 8 has occurred in the press. The way the issue has been characterized in press reports erroneously suggest that if you are ready to sign up to title 8 as now set forth after this conference committee in H.R. 1555, then you are being tough on foreign drug traffickers. If, however, you are troubled by the effect that the title 8 language would have on currently existing due process protections afforded innocent Americans, you are described by some in the press as doing the bidding of narcolobbyists.

This simplistic characterization is not only false, it is an insult to Members of this body, and it obscures a vitally important civil liberties issue which is at the core of title 8, which is the rights of innocent American citizens to challenge in our courts the taking of their property.

As a member of the Intelligence Committee, I was a conferee. I did not sign the conference report accompanying the bill because of the contradiction existing between the stated legislative intent of title 8 and the actual language contained in the bill, a contradiction which I attempted but failed in conference to correct by amendment.

Specifically, my objection is that title 8, as presently written, would undermine the due process protections now afforded a U.S. citizen or business that has interests or assets blocked under title 8 to challenge the legality of the blocking under the Administrative Procedures Act.

This is what the conference report before us says about title 8:

There is no intention that this legislation affect Americans who are not knowingly and willfully engaged in international narcotics trafficking, nor is it intended in any way to derogate from existing constitutional and statutory due process protections for those whose assets are blocked or seized pursuant to law.

That is the stated intent. That is well and good, and I commend the authors on that intent. The problem is that the words of the bill before us do not, I am afraid, comport with that stated intention.

According to the Department of Treasury, which is tasked in title 8 with developing the list of significant foreign narcotics traffickers, due process protections exist in law today for those U.S. citizens to challenge the legality of the blocking of assets in court.

On November 8, I wrote a letter to the Secretary of Treasury Lawrence Summers requesting an opinion on two legal questions concerning title 8. The first question was the following:

What existing constitutional and statutory due process protections would allow an American citizen who has an interest blocked by executive branch action to challenge the blocking?

Question 2 was:

If H.R. 1555 is enacted into law, how would these existing constitutional and statutory due process protections be changed?

In his November 10 reply to me, Richard Newcomb, who is Director of the Treasury's Office of Foreign Assets Control, or OFAC, stated the following with regard to currently existing judicial review of the blocking of American assets:

The Administrative Procedures Act, or the APA, provides for judicial review of final agency action.

Mr. President, 5 U.S. Code 702 is the citation.

In existing sanctions programs administered by the Office of Foreign Assets Control (OFAC) the final agency action related to blocking are subject to challenge by affected parties through judicial review afforded by the Administrative Procedures Act.

Then they go on to say:

Because of normal rules of standing and other jurisdictional principles, a U.S. citizen may, in many cases, not be able directly to challenge the blocking of a foreign person's assets pursuant to APA. However—

However, and this is the key line—as discussed below, agency review by OFAC, followed by judicial review under APA of any resulting final agency action as to that citizen may still be available. In addition to any statutory review available under the APA, a U.S. citizen may also seek judicial review of constitutional claims or challenges related to blockings under existing OFAC sanctions programs.

Under the process that is currently in place, OFAC determines who is a foreign drug kingpin after an internal Department of Treasury review of the evidence and evidentiary review that is coordinated with the Department of Justice.

Under Executive Order 12978 issued in 1995, the State Department and Justice Department are required to be consulted by Treasury prior to that designation and prior to the blocking of assets. After designation is made and assets are blocked, OFAC regulations allow for a named party to petition OFAC—

The PRESIDING OFFICER. The Senator's time has expired. Under the previous order, we will proceed to H.R. 1180.

Mr. LEVIN. Parliamentary inquiry. I did not realize I was acting under a time constraint.

Mr. SHELBY. Parliamentary inquiry. The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. KERREY. The majority leader did not complete his unanimous consent request as a consequence of some observations.

Mr. SHELBY. He was going to complete it after this.

The PRESIDING OFFICER. The agreement provided we go to this bill at 3 o'clock, and it is now 3 o'clock.

Mr. LEVIN. I ask unanimous consent to be yielded 30 seconds.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The Senator from Michigan is granted 30 seconds.

Mr. KERREY. I ask unanimous consent that the Senator be given an additional minute and the Senator from Georgia be given 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. SPECTER. Mr. President, reserving the right to object, the time had been set at 5 o'clock for the beginning of the votes. There are a number of us who have commitments to depart, and have had for some time. Ordinarily it would not be a matter of concern to this Senator, but if we are to complete the arrangements which have been made with a great many Senators, I understand from the Parliamentarian that under the prevailing order, debate will resume on this matter but at the conclusion of the votes.

The PRESIDING OFFICER. That is correct.

Mr. KERREY. An additional 5 minutes for the Senator from Georgia right now would not affect the 5 o'clock vote.

Mr. ROTH. Reserving the right to object, we do have a number of people who want to speak. We only have an hour.

Mr. LEVIN. If I could just have—

Mr. KERREY. I have a unanimous consent request for time for the Senator from Michigan and the Senator from Georgia.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. LEVIN. I am not going to complete my speech now. I simply want to apologize to my colleagues. I did not realize there was a unanimous consent agreement that would trigger a 3 o'clock debate on a different bill. That is all I had to say.

I am perfectly happy to pick up my speech after whatever is scheduled is completed.

The PRESIDING OFFICER. The Senator from Georgia has 5 minutes.

Mr. COVERDELL. Mr. President, I will try to do this in 2 minutes.

First, I compliment the chairman of the Intelligence Committee, and the

ranking member, the cochair, for their diligent work on the overall bill and for their efforts that dealt with the Narcotic Kingpin Designation Act. There have been some legitimate and reasonable differences of opinion. I am obviously, as a sponsor of the Narcotic Kingpin Designation Act, pleased that it is proceeding to passage.

To make my point, in deference to the difficulties with time here, I simply ask unanimous consent that the letter to Senator LEVIN of November 17 from the Department of the Treasury, by Richard Newcomb, Director, Office of Foreign Assets Control, which says, ". . . we believe that the proposed law would not deny a U.S. citizen any rights he previously would have had to raise constitutional claims," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE TREASURY,
Washington, DC, November 17, 1999.

Hon. CARL LEVIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR LEVIN: I received your November 12 letter to Secretary Summers requesting our position on the following question: Do you support maintaining the present right afforded a United States citizen who has an interest in assets blocked by Executive Branch action to challenge the blocking under the Administrative Procedure Act?

In my October 13 letter to Senator COVERDELL, the Department has indicated that it would not oppose judicial review of Treasury decisions. However, we also can work with the text of Title VIII of H.R. 1555 as finalized by the conference committee. The proposed statute does not eliminate all avenues for seeking relief. I want to emphasize that as the program under the proposed legislation is implemented, the Office of Foreign Assets Control's (OFAC) traditional administrative mechanisms will be employed. Thus, a U.S. citizen whose interests have been blocked will be able, if he chooses, to avail himself of OFAC's licensing authority. In current OFAC-administered programs, this mechanism has served to minimize the adverse impact on innocent U.S. citizens while vigorously implementing sanctions against targeted foreign persons. Additionally, a U.S. citizen will be able to petition OFAC for the unblocking of his interest in blocked property. Similarly, we believe that the proposed law would not deny a U.S. citizen any rights he previously would have had to raise constitutional claims.

We hope that this information is of assistance.

Sincerely,
R. RICHARD NEWCOMB,
Director, Office of Foreign Assets Control.

Mr. COVERDELL. Mr. President, I ask unanimous consent that the letter from the Department of the Treasury dated November 10 to Senator LEVIN of Michigan by Richard Newcomb, Director, Office of Foreign Assets Control, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE TREASURY,
Washington, DC, November 10, 1999.

Hon. CARL LEVIN,
U.S. Senate, Washington, DC.

DEAR SENATOR LEVIN: This letter responds to your letter to Secretary Summers of November 8, 1999, concerning Title VIII of H.R. 1555, the Fiscal Year 2000 Intelligence Authorization Act, entitled the "Foreign Narcotics Kingpin Designation Act" (the "Act"). You requested an opinion concerning two questions arising under sections 804 and 805 of the proposed legislation: What existing constitutional and statutory due process protections would allow an American citizen who has an interest in assets blocked by Executive Branch action to challenge the blocking? If H.R. 1555 is enacted into law, how would these existing constitutional and statutory due process protections be changed?

As noted in my October 13, 1999 letter to Senator Coverdell, the Administrative Procedure Act (the "APA") provides for judicial review of final agency action. 5 U.S.C. 702. In existing sanctions programs administered by the Office of Foreign Assets Control ("OFAC"), final agency actions related to blocking are subject to challenge by affected parties through judicial review afforded by the APA. Because of normal rules of standing and other jurisdictional principles, a U.S. citizen may in many cases not be able directly to challenge the blocking of a foreign person's assets pursuant to the APA. However, as discussed below, agency review by OFAC, followed by judicial review under the APA of any resulting final agency action as to that citizen, may still be available. In addition to any statutory review available under the APA, a U.S. citizen also may seek judicial review of constitutional claims or challenges related to blockings under existing OFAC sanctions programs.

If H.R. is enacted, section 805(f) presumably would foreclose U.S. citizens from bringing a claim under the APA to challenge a blocking. Such statutory preclusion of judicial review under the APA is expressly provided for in the APA itself. 5 U.S.C. 701(a)(1). Despite the limitation on judicial review in section 805(f), however, a U.S. citizen would not be foreclosed from other meaningful avenues of review.

First, even when assets are properly blocked under the law, a U.S. citizen can petition OFAC for a license unblocking the U.S. citizen's interest in blocked assets. OFAC has a long-established practice of utilizing its licensing authority in sanctions programs to minimize the adverse impact on innocent U.S. persons while vigorously implementing the sanctions against targeted foreign persons. OFAC regulations in every major sanctions program contain licensing authority. The Act would provide the Treasury Department with similar authority. The ability of OFAC (or even a reviewing court, if judicial review were available) to grant relief would, of course, depend on the nature of the U.S. citizen's interest in blocked assets.

Second, a U.S. citizen would have recourse to agency reviewing of the blocking. If the U.S. citizen believed that its interest in the foreign person's assets is mistakenly or wrongfully blocked, that U.S. citizen could petition OFAC to have the interest unblocked. OFAC has the authority pursuant to section 805(b) of the proposed legislation to unblock assets.

Also, as section 805(f) must be read to avoid any Constitutional problems, a U.S. citizen would not be precluded by that section from pursuing any Constitutional claims.

Finally, one point in your November 8 letter requires clarification. Paragraph three refers to my October 13 letter to Senator Coverdell. That letter was written in response to the Senate draft of H.R. 1555 received in this office on October 13. My reference to judicial review, quoted only in part in your letter, addressed not the current provisions of the Act, but provisions (section 704(f), and in particular, 704(f)(2) of the October 13 draft) that were subsequently deleted. We believe it is important to understand the context of my letter, as well as to examine my statement in its entirety: "The Administrative Procedure Act already provide for judicial review of final agency actions; and, therefore, additional judicial review provisions are unnecessary" (emphasis supplied). That statement reflected the Department's position that judicial review did not need to be addressed separately in the proposed legislation.

We hope this information is of assistance. Sincerely,

R. RICHARD NEWCOMB,
Director, Office of Foreign Assets Control.

Mr. COVERDELL. Mr. President I ask unanimous consent the New York Times op-ed written by A.M. Rosenthal, of August 27, 1999, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 27, 1999]
ON MY MIND—VOTE ON DRUGS
(A.M. Rosenthal)

Notice to the public: Vote now on drugs, one of the only two ways.

1. If you support the war against drugs, vote now for pending Congressional legislation designed to wound major drug lords around the world. It cuts them off from all commerce with the U.S., now a laundry for bleaching the blood from drug-trade billions and turning them into investments in legitimate businesses.

Vote by telling your members of Congress that when the House-Senate bill authorizing intelligence funds comes up for final decision, probably next month, you want them to vote for the section called "blocking assets of major narcotics traffickers."

Insist they start now to tell the Administration not to try to water it down to satisfy any country for diplomatic or economic reasons—including Mexico, the biggest drug entry point for America, already complaining about "negative consequences" of the proposal.

Turn yourself and your civil, labor or commercial organization, or religious congregation, into lobbies for the bill—counterweight to the lobbies of drug-transfer nations and American companies beholden to them.

2. If you are against the war on drugs or just don't care about what drugs are doing to our country, then don't do a thing. That is a vote, too.

That's the way it is in Washington. Members of Congress introduce legislation, committees discuss it for months, votes are taken and then when the time comes to work out House-Senate differences, administrations on the fence and under professional lobbyists' pressure use their power to try to mold the legislation to their liking.

That is exactly the time for ordinary Americans around the country to do their own lobbying.

The bill targeting drug lords extends throughout their vicious world the economic

sanctions already directed at Colombian drug lords, by President Clinton's executive order. It will prohibit any U.S. commerce by specifically named drug operators, seize all their assets in the U.S., and ban trading with them by American companies.

The bill specifies that every year the U.S. Government list the major drug lords of the world, by name and nation. The lists are certain to include top drug traders from countries such as Afghanistan, Jamaica, the Dominican Republic, Thailand and Mexico.

In the Senate it was introduced by Paul Coverdell, a Georgia Republican, and Dianne Feinstein, Democrat from California, and passed with bipartisan support. In the House it also has support in both parties, including Porter Goss of Florida, a Republican and chairman of the House Intelligence Committee, and Charles Rangel, the New York Democrat. It waits the final September House-Senate Joint Intelligence Committee vote.

For awhile I heard from within the Administration the kind of mutters that preceded the Clinton certification last year that Mexico was carrying out anti-drug commitments satisfactorily, which was certainly a surprise to Mexican drug lords.

Then, yesterday, the White House told me that it favored some target sanctions.

Its objection to the bill was that the Administration would have to list all major drug lords for the President to choose targets, and that could endanger investigations. The White House said it would be better for the President to select targets without having to choose from a list.

Bit of a puzzle. The bill already gives him the right to decide which of the drug lords to target from the Administration's unpublished list. But some members of Congress think the motive is to avoid a list that might include just a little too many from a "sensitive country."

No one bill will end the drug war. Only the determination of Americans to use every sort of resource will do that—parental teaching, law enforcement with some compassion toward first offenders and none for career drug criminals, enough money for therapy in and out of jails, targeting drug lords—and passionate leadership.

That would preclude Presidential candidates who mince around about whether they used drugs when they were younger—unless they grow up publicly and quickly.

Dr. Mitchell S. Rosenthal, head of the Phoenix House therapeutic communities, says that the bill "reflects the kind of values that we don't hear enough these days." So vote—one way or the other.

Mr. COVERDELL. Mr. President, I yield back my time in accordance to the pressure of the moment here.

Mr. LEVIN. Mr. President, the conference report to H.R. 1555, the Fiscal Year 2000 Intelligence Authorization Act, include legislation under Title VIII of the bill entitled the "Foreign Narcotics Kingpin Designation Act." Title VIII is intended to strengthen U.S. Government efforts to identify the assets, financial networks and business associates of major foreign narcotics trafficking groups in an effort to disrupt these criminal organizations and bankrupt their leadership. No doubt all Senators would agree with this laudable goal of combating the insidious effects of drug trafficking. In fact, an earlier version of this legislation was

seen as being so without controversy that it was added by the Senate to the Intelligence Authorization bill in July of this year with little debate and on a voice vote.

Senators should be aware, however, that Title VIII as it is now written has significant national security, law enforcement, judicial, and drug trafficking implications that belie the legislation's simple design. Yet, I am not aware of any committee of jurisdiction in either the Senate or the House having held a single hearing on the provisions contained in Title VIII. The Senate Intelligence Committee has not held a hearing. The Senate Judiciary Committee has not held a hearing. Not a single legal or national security expert, inside or outside government, has testified before a congressional hearing as to whether Title VIII should or should not become law, and, if it does, how would the legal rights of Americans be changed as a result.

Except for recent and perfunctory House of Representatives debate on the provision, the only public debate on the complexities of Title VIII has occurred in the press. The way that the issue has been characterized in press reports erroneously suggests that if you are ready to sign up to Title VIII as set forth in H.R. 1555, you are tough on foreign drug traffickers. If, however, you are troubled by the effect that the Title VIII language would have on currently existing due process protections afforded innocent Americans, you are described as doing the bidding of "narco-lobbyists."

This simplistic characterization is not only false and an insult to the Members of this body, it obscures a vitally important civil liberties issue at the core of Title VIII: the rights of innocent American citizens to challenge in our Courts the taking of their property.

As a member of the Senate Intelligence Committee, I was a conferee to H.R. 1555. However, I did not sign the conference report accompanying the bill because of the contradiction existing between the stated legislative intent of Title VIII and the actual language contained in the bill, a contradiction I attempted but failed in conference to correct by amendment.

Specifically, my objection is that Title VIII, as presently written, would undermine the due process protections now afforded to a U.S. citizen or business who has interest in assets blocked under Title VIII to challenge the legality of the blocking under the Administrative Procedure Act.

This is what the conference report accompanying H.R. 1555 says about Title VIII:

"There is no intention that this legislation affect Americans who are not knowingly and willfully engaged in international narcotics trafficking. Nor is it intended in any way to derogate from existing constitutional and

statutory due process protections for those whose assets are blocked or seized pursuant to law." That's the stated intent. But what do the words of this CR do?

According to the Department of Treasury, which is tasked in Title VIII with developing the list of significant foreign narcotics traffickers, due process protections exist today for those U.S. citizens to challenge the legality of the blocking of assets in court.

On November 8th, I wrote a letter to Secretary of the Treasury Lawrence Summers requesting an opinion on two legal questions concerning Title VIII.

The first question was: "What existing constitutional and statutory due process protections would allow an American citizen who has an interest blocked by Executive Branch action to challenge the blocking?"

The second question was: "If H.R. 1555 is enacted into law, how would these existing constitutional and statutory due process protections be changed?"

In his November 10, 1999 reply to me, Mr. Richard Newcomb, Director of the Treasury's Office of Foreign Assets Control (or "OFAC"), stated the following with regard to currently existing judicial review of the blocking of American assets:

"... the Administrative Procedure Act (the "APA") provides for judicial review of final agency action. 5 U.S.C. 702. In existing sanctions programs administered by the Office of Foreign Assets Control ("OFAC"), the final agency actions related to blocking are subject to challenge by affected parties through judicial review afforded by the APA. Because of normal rules of standing and other jurisdictional principles, a U.S. citizen may in many cases not be able directly to challenge the blocking of a foreign person's assets pursuant to APA. However, as discussed below, agency review by OFAC, followed by judicial review under APA of any resulting final agency action as to that citizen, may still be available. In addition to any statutory review available under the APA, a U.S. also may seek judicial review of constitutional claims or challenges related to blockings under existing OFAC sanctions programs."

Under the process currently in place, OFAC determines who is a foreign drug kingpin after an internal Department of Treasury review of the evidence, an evidentiary review that is coordinated with the Department of Justice. Executive Order 12978, issued in 1995, requires that the State and Justice Departments be consulted by Treasury prior to this designation and blocking of assets. After designation is made and assets are blocked, OFAC regulations allow for a named party to petition OFAC to have its designation removed through an administrative appeal. Most petitioners initiate this adminis-

trative review process simply by writing OFAC. Exchanges of correspondence, additional fact-finding, and, often, meetings occur before OFAC decides whether there is a basis for removing the designation and unblocking assets. Once the named party has exhausted this administrative remedies process, OFAC's final decision can be challenged in federal court under the Administrative Procedure Act.

To repeat, the Administrative Procedure Act, or APA, provides some due process protection under current law for an American to challenge the blocking of his or her assets pursuant to a Department of Treasury OFAC agency decision.

However, a straightforward reading of section 805 of Title VIII makes clear that these existing statutory due process protections, referenced in the conference report as being unaffected by the bill, could well be, in fact, foreclosed if H.R. 1555 becomes law in its present form.

More specifically, section 805(a) of the bill states, in part: "A significant foreign narcotics trafficker publicly identified . . . shall be subject to any and all sanctions as authorized."

Section 805(b) of the bill provides that "all property and interests in property within the United States, or within the possession or control of any United States person" are blocked effective as of the date of a report designating the significant foreign narcotics traffickers.

And then the critically important language of section 805(f): "The determinations, identifications, finding, and designations made pursuant to section 804 and subsection (b) of this section shall not be subject to judicial review."

In sum, under Title VII, designation in the drug kingpin report automatically results in the blocking of assets, including any assets held by innocent U.S. citizens and businesses unaware of the association the foreign business entity allegedly has with narcotics trafficking. The blocking of assets, in turn, is not subject to judicial review, according to section 805(f) of the bill. Thus, Title VII would limit the statutory opportunity that exists today under the APA for innocent Americans to petition the courts to challenge the blocking of assets.

Could American citizens and businesses with no knowledge of, or participation in, foreign narcotics trafficking find their assets blocked under Title VIII of this bill? Certainly. For example, an American business involved in a joint venture agreement with a foreign shipping firm could find its assets blocked under the provisions of Title VIII. Or, American citizens owning stock in a company found to be owned or operated by drug traffickers and money launderers could have their assets blocked and suffer devastating economic loss as a result, despite being

innocent of any wrongdoing themselves.

Under current law, the scenarios I have described resulting in the blocking of assets under the control of U.S. citizens, if not remedied in the administrative appeals process, could be challenged in federal court. Title VIII will have the effect of taking away this judicial appeal opportunity, thereby enhancing the authority federal bureaucrats have to not only hear but decide all challenges to Department of Treasury designation and asset blocking decisions.

The Department of Treasury confirms this change in statutory due process protections in its November 10th letter to me:

"If H.R. 1555 is enacted, section 805(f) presumably would foreclose U.S. citizens from bringing a claim under the APA to challenge the blocking."

That is what the Department of Treasury, the agency empowered under current law as expanded by Title VIII to block assets, says about how this bill will foreclose currently existing statutory due process protections.

Mr. President, at this point I ask that both my November 8, 1999 letter to Secretary Summers and the November 10, 1999 reply from OFAC be printed in the Record in their entirety.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

A different section of Title VIII provides perhaps the most conclusive evidence that this legislation is being brought to a vote in haste and without the careful consideration it needs. Section 810 of the bill, creates a Judicial Review Commission on Foreign Asset Control.

The conference report includes six judicial review and due process questions the prospective Commission is being asked to examine and report on to Congress in the next year. I am going to read each of the six questions and, as I do so, I ask that my colleagues consider whether we should have the answers to these important legal questions before approving Title VIII of H.R. 1555:

"(1) Whether reasonable protections of innocent U.S. businesses are available under the regime currently in place that is utilized to carry out the provisions of the International Emergency Economic Powers Act ("IEEPA")."

Should not the Senate know the answer to this question before we act on Title VIII?

"(2) Whether advance notice prior to blocking of one's assets is required as a matter of constitutional due process?"

Should not the Senate know the answer to this question before we act on Title VIII?

"(3) whether there are reasonable opportunities under the current IEEPA regulatory regime and the Administrative Procedure Act for an erroneous

blocking of assets of mistaken listing under IEEPA to be remedied”

We know the most important part of the answer already. The Department of Treasury confirms that Americans would no longer be able to use the Administrative Procedure Act and a court appeal from an agency determination under that act to remedy an erroneous blocking of assets or mistaken listing. Should not the Senate have the answer to this question before we act on Title VIII?

“(4) whether the level of proof that is required under the current judicial, regulatory, or administrative scheme is adequate to protect legitimate business interests from irreparable financial harm”

Should not the Senate know the answer to this question before we act on Title VIII?

“(5) whether there is constitutionally adequate accessibility to the courts to challenge agency actions under IEEPA, or the designation of persons or entities under IEEPA”

We know that section 805(f) of Title VIII will foreclose the statutory access to the courts to challenge agency actions, but should not the Senate know the complete answer to this question before we act on Title VIII?

“(6) whether there are remedial measures and legislative amendments that should be enacted to improve the current asset blocking scheme under IEEPA or this title [Title VIII]”

Should not the Senate know the answer to this question before we act on Title VIII?

These are crucially important questions and strike to the very essence of due process protections afforded to U.S. citizens. So important are these questions that I believe the Senate as a body should know the answers to them before approving a law with potentially far-reaching legal consequences. These questions deserve careful consideration through a hearing process in the Judiciary Committee, the Intelligence Committee and other committees of jurisdiction. We should know the answers before we vote on the bill before us.

As it stands today, the Senate is being asked to approve a new law which will foreclose a currently existing statutory right of judicial appeal without the benefit of this hearing record and without a complete understanding of how this change in due process protections could harm innocent Americans.

Senators should be aware that the original drug kingpin amendment to the Intelligence Authorization Act—the Coverdell-Feinstein amendment—approved by the Senate on July 21st on a voice vote, did not eliminate or alter the existing judicial review avenue afforded innocent Americans under the Administrative Procedure Act to challenge the legality of the blocking of assets. The Coverdell-Feinstein amend-

ment was silent on the issue. Only at the insistence of the House conferees during conference on the bill was the language contained in section 805(f) foreclosing statutory review of final agency actions included in the final conference agreement. So Senators should be clear that this significant difference exists between the original Coverdell-Feinstein amendment approved by the Senate in July and what we are being asked to adopt today.

Because the House approved the conference report to H.R. 1555 last week, the rules of the Senate preclude a motion to recommit the bill back to conference with instructions to remove the provision of Title VIII eliminating current review of final agency actions under the Administrative Procedure Act.

Realistically, the conference report to H.R. 1555, even with this offending provision, will pass overwhelmingly given the signatures on the conference report. The only way to minimize the damage it could do to innocent U.S. citizens is to attempt to amend Title VIII after it becomes law. Therefore, I ask unanimous consent to be allowed to speak in morning business for the purpose of introducing a bill to do just that.

Mr. President, I send a bill to the desk on behalf of myself, Senator SHELBY, Senator KERREY of Nebraska, and Senator ROBERTS.

This bill would restore the right that U.S. citizens are about to lose under section 805(f) of H.R. 1555 to challenge in court under the Administrative Procedure Act an illegal blocking of their assets by Executive Branch decision.

Based on my reading of the conference report language accompanying H.R. 1555, the conferees may not have intended or fully understood that Title VIII would foreclose a currently existing avenue of judicial review under the Administrative Procedure Act. It wasn't until after the conference on H.R. 1555 was concluded did any one in either Congress or the Executive Branch state in writing that this would be the bill's effect. I argued this position at the conference called immediately before the conferees voted. Therefore, I am hopeful that this significant flaw in H.R. 1555 can be corrected soon and that the American people will be assured that the United States Congress is not taking away rights of Americans to challenge the wrongful taking of their property by bureaucratic action. Because of this flaw, if there had been a recorded vote on the conference report before us, I would have voted “no”.

Mr. President, I yield the floor.

EXHIBIT 1

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, November 8, 1999.

Hon. LAWRENCE H. SUMMERS,
Secretary of the Treasury,
Department of the Treasury, Washington, DC.

DEAR MR. SECRETARY: On Friday, Senate and House of Representatives conferees completed work on H.R. 1555, the Fiscal Year 2000 Intelligence Authorization Act. The conference agreement which has yet to be passed by either body, contains Title VIII, the “Foreign Narcotics Kingpin Designation Act.”

I have a concern that Title VIII, as presently written, would undermine the due process protections now afforded to an innocent U.S. citizen or business who has interest in assets blocked under this Act to challenge the blockage under the Administrative Procedure Act of any other avenue of judicial review.

According to the October 13, 1999 letter from Mr. R. Richard Newcomb, Director of the Department of Treasury's Office of Foreign Assets Control (OFAC) to Senator Paul Coverdell, the Administrative Procedure Act “already provides for judicial review of final agency actions” concerning the blocking of assets. The report accompanying H.R. 1555 adds that Title VIII is not “intended in any way to derogate from existing constitutional and statutory due process protections for those whose assets are blocked or seized pursuant to law.”

However, a straightforward reading of section 805 of H.R. 1555 raises significant concerns that these “existing constitutional and statutory due process protections” may be eroded if the Act becomes law.

More specifically, section 805(a) of the bill states, in part: “A significant foreign narcotics trafficker publicly identified . . . shall be subject to any and all sanctions as authorized.” Section 805(b) goes on to state that “all property and interests in property within the United States, or within the possession or control of any United States person” are blocked effective as of the date of Treasury's report. Finally, section 805(f) states: “The determinations, identifications, findings, and designations made pursuant to section 804 and subsection (b) of this section shall not be subject to judicial review.”

In sum, designation in the Treasury report automatically results in the blocking of assets. The blocking of assets, in turn, is not subject to judicial review, according to section 805(f) of the Act. Thus, H.R. 1555 would seem to limit the opportunity that exists today for innocent American citizens and businesses to petition the courts to challenge the blocking of assets.

Because H.R. 1555 may come before the Senate for consideration in short order, I asked that the Department of Treasury, in consultation with the Department of Justice, provide a written legal opinion to me answering two important questions:

(1) What existing constitutional and statutory due process protections would allow an American citizen who has interest in assets blocked by Executive Branch action to challenge the blocking?

(2) If H.R. 1555 is enacted into law, how would these existing constitutional and statutory due process protections be changed?

Your immediate response to my request is appreciated.

Sincerely,

CARL LEVIN,
Ranking Minority Member.

DEPARTMENT OF THE TREASURY,
Washington, DC, November 10, 1999.

Hon. CARL LEVIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR LEVIN: This letter responds to your letter to Secretary Summers of November 8, 1999, concerning Title VIII of H.R. 1555, the Fiscal Year 2000 Intelligence Authorization Act, entitled the "Foreign Narcotics Kingpin Designation Act" (the "Act"). You requested an opinion concerning two questions arising under sections 804 and 805 of the proposed legislation:

What existing constitutional and statutory due process protections would allow an American citizen who has an interest in assets blocked by Executive Branch action to challenge the blocking?

If H.R. 1555 is enacted into law, how would these existing constitutional and statutory due process protections be changed?

As noted in my October 13, 1999 letter to Senator Coverdell, the Administrative Procedure Act (the "APA") provides for judicial review of final agency action. 5 U.S.C. 702. In existing sanctions programs administered by the Office of Foreign Assets Control ("OFAC"), final agency actions related to blocking are subject to challenge by affected parties through judicial review afforded by the APA. Because of normal rules of standing and other jurisdictional principles, a U.S. citizen may in many cases not be able directly to challenge the blocking of a foreign person's assets pursuant to the APA. However, as discussed below, agency review by OFAC, followed by judicial review under the APA of any resulting final agency action as to that citizen, may still be available. In addition to any statutory review available under the APA, a U.S. citizen also may seek judicial review of constitutional claims or challenges related to blockings under existing OFAC sanctions programs.

If H.R. 1555 is enacted, section 805(f) presumably would foreclose U.S. citizens from bringing a claim under the APA to challenge a blocking. Such statutory preclusion of judicial review under the APA is expressly provided for in the APA itself. 5 U.S.C. 701(a)(1). Despite the limitation on judicial review in section 805(f), however, a U.S. citizen would not be foreclosed from other meaningful avenues of review.

First, even when assets are properly blocked under the law, a U.S. citizen can petition OFAC for a license unblocking the U.S. citizen's interest in blocked assets. OFAC has a long-established practice of utilizing its licensing authority in sanctions programs to minimize the adverse impact on innocent U.S. persons while vigorously implementing the sanctions against targeted foreign persons. OFAC regulations in every major sanctions program contain licensing authority. The Act would provide the Treasury Department with similar authority. The ability of OFAC (or even a reviewing court, if judicial review were available) to grant relief would, of course, depend on the nature of the U.S. citizen's interest in blocked assets.

Second a U.S. citizen would have recourse to agency review of the blocking. If the U.S. citizen believed that its interest in the foreign person's assets is mistakenly or wrongfully blocked, that U.S. citizen could petition OFAC to have the interest unblocked. OFAC has the authority pursuant to section 805(b) of the proposed legislation to unblock assets.

Also, as section 805(f) must be read to avoid any Constitutional problems, a U.S. citizen would not be precluded by that sec-

tion from pursuing any Constitutional claims.

Finally, one point in your November 8 letter requires clarification. Paragraph three refers to my October 13 letter to Senator Coverdell. That letter was written in response to the Senate draft of H.R. 1555 received in this Office on October 13. My reference to judicial review, quoted only in part in your letter, addressed not the current provisions of the Act, but provisions (section 704(f), and in particular, 704(f)(2) of the October 13 draft) that were subsequently deleted. We believe it is important to understand the context of my letter, as well as to examine my statement in its entirety. "The Administrative Procedure Act already provides for judicial review of final agency actions; and, therefore additional judicial review provisions are unnecessary" (emphasis supplied). That statement reflected the Department's position that judicial review did not need to be addressed separately in the proposed legislation.

We hope this information is of assistance.
Sincerely,

R. RICHARD NEWCOMB,
Director, Office of Foreign Assets Control.

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, November 12, 1999.

Hon. LAWRENCE H. SUMMERS,
Secretary of the Treasury,
Department of the Treasury, Washington, DC.

DEAR MR. SECRETARY: Thank you for your November 10, 1999 reply to my letter requesting a legal opinion of Title VIII of H.R. 1555, the Fiscal Year 2000 Intelligence Authorization Act, entitled the "Foreign Narcotics Kingpin Designation Act." Your reply was not only prompt but responsive to the questions I posed.

Paragraph three of your letter contains the following conclusion about how H.R. 1555, if enacted into law, would change existing statutory due process protections:

"If H.R. 1555 is enacted, section 805(f) presumably would foreclose U.S. citizens from bringing a claim under the APA [Administrative Procedure Act] to challenge a blocking."

I do not believe this current existing avenue for judicial review of final agency action should be foreclosed. Therefore, I am requesting that you forward to me a written answer to the following question before the Senate considers the conference report to H.R. 1555 next Tuesday:

Do you support maintaining the present right afforded a United States citizen who has an interest in assets blocked by Executive Branch action of challenge the blocking under the Administrative Procedure Act?

Your immediate response to my request is appreciated.

Sincerely,

CARL LEVIN,
Ranking Minority Member.

DEPARTMENT OF THE TREASURY,
Washington, DC, November 17 1999.

Hon. CARL LEVIN,
U.S. Senate,
Washington, DC

DEAR SENATOR LEVIN: I received your November 12 letter to Secretary Summers requesting our position on the following question:

Do you support maintaining the present right afforded a United States citizen who has an interest in assets blocked by Executive Branch action to challenge the blocking under the Administrative Procedure Act?

In my October 13 letter to Senator Coverdell, the Department has indicated that it would not oppose judicial review of Treasury decision. However, we also can work with the text of Title VIII of H.R. 1555 as finalized by the conference committee. The proposed statute does not eliminate all avenues for seeking relief. I want to emphasize that as the program under the proposed legislation is implemented, the Office of Foreign Assets Control's (OFAC) traditional administrative mechanisms will be employed. Thus, a U.S. citizen whose interests have been blocked will be able, if he chooses, to avail himself of OFAC's licensing authority. In current OFAC-administered programs, this mechanism has served to minimize the adverse impact on innocent U.S. citizens while vigorously implementing sanctions against targeted foreign persons. Additionally, a U.S. citizen will be able to petition OFAC for the unblocking of his interest in blocked property. Similarly, we believe that the proposed law would not deny a U.S. citizen any rights he previously would have had to raise constitutional claims.

We hope that this information is of assistance.

Sincerely,

R. RICHARD NEWCOMB,
Director, Office of Foreign Assets Control.

Mr. DOMENICI. Mr. President, I am pleased that the Senate today will pass S. 1515, an important bill to make some much needed changes to the Radiation Exposure Compensation Act. I am pleased to join my colleagues, including the Chairmen of the Senate Judiciary and Indian Affairs Committees, in support of this legislation.

Mr. President, my home state of New Mexico is the birthplace of the atomic bomb. One of the unfortunate consequences of our country's rapid development of its nuclear arsenal was that many of those who worked in the earliest uranium mines became afflicted with terrible illnesses.

I noticed this problem more than twenty years ago, when I learned that miners had contracted an alarmingly high rate of lung cancer and other diseases commonly related to radiation exposure.

Many of the miners were Native Americans, mostly members of the Navajo Nation, with whom the United States government has had a long-standing trust relationship based on the treaties and agreements between our country and the tribes. Some 1,500 Navajos worked in the uranium mines from 1947 to 1971. Many of them have since died of horrible radiation-related illnesses.

All of the uranium miners, including the Navajos, performed a great service out of patriotic duty to this country. Their work helped us to win the Cold War. Unfortunately, our Nation failed to fulfill its duty to protect the miners' health. After hearing of the problem, I began the effort the miners' health. After hearing of the problem, I began the effort to see that the miners and their families received just compensation for their illnesses.

Mr. President, I want to take a moment to recognize a person who has

been a champion in the hearts of uranium miners and their families throughout the Colorado Plateau. This person, a former uranium miner himself, has worked tirelessly in advocating many of the reforms we have established within this bill.

Mr. President, Paul Hicks of Grants, New Mexico deserves a large amount of credit for bringing attention to this legislation in the United States Senate. Paul is President of the New Mexico Uranium Workers Council and he has spearheaded the grassroots effort that is responsible for several of these much needed reforms.

Paul was a uranium miner for over twelve years in New Mexico. He later worked as a lead miner, a shift boss, and ended his mining career as a mine foreman. But as Paul will tell you, "it takes about ten years to make a good miner, but only ten minutes to make a good foreman." Mr. President, Paul Hicks is and will always be a miner at heart.

Paul has fought this effort for the miners of the Navajo nation, Acoma Pueblo, Grants, New Mexico, and Dove Creek and Grand Junction, Colorado. Paul Hicks is truly a hero in the heart's of the many people along the Colorado Plateau that have been adversely affected by exposure to uranium.

Unfortunately Mr. President, Paul is now facing another battle. That is fight against cancer. Paul was diagnosed last week with bone cancer and now, he must endure massive radiation treatments for the next six weeks. It will be a tough fight, but one I know he'll win. Simply, because I know Paul Hicks.

Way back in 1979, I held the first field hearing on this issue in Mr. Hicks' hometown of Grants, New Mexico to learn about the concerns and the health problems faced on uranium miners. In later years, I traveled to Shiprock, New Mexico and the Navajo Nation Indian Reservation to gather more information about the uranium miners and their families.

Twelve years after I introduced that first bill, President Bush signed RECA into law. At the time, RECA was intended to provide fair and swift compensation for those miners and downwinders who had contracted certain radiation-related illnesses.

Since the RECA trust fund began making awards in 1992, the Department of Justice has approved a total 3,135 claims valued at nearly \$232 million. In my home state of New Mexico, there have been 371 claims approved with a value of nearly \$37 million. For that work, the Department of Justice is to be commended.

The original RECA was a compassionate law which unfortunately has come to be administered in a bureaucratic, dispassionate and often unfair manner. Many claims have languished

at the Department of Justice for far too long.

Miners and their families, particularly Navajos, often have waited many years for their claims to be processed. Many claims were denied because the miners were smokers and could not prove that their diseases were related solely to uranium mining. In other cases, miners faced problems establishing the requisite amount of working level months needed to make a successful claim. Native American claims by spousal survivors often were denied because of difficulties associated with documenting Native American marriages.

This bill makes some important, common-sense changes to the radiation compensation program to address the problems I have outlined. First, it expands the list of compensable diseases to include new cancers, including leukemia, thyroid and brain cancer. It also includes certain non-cancer diseases, including pulmonary fibrosis. Medical science has been able to link these diseases to uranium mining in the 10 years since the enactment of the original RECA. We now know that prolonged radiation exposure can cause many additional diseases. This bill uses the best available science to make sure that those who were injured by radiation exposure are compensated.

The bill also extends eligibility to above-ground and open-pit miners, millers and transport workers. The latest science tells us that the risks of disease associated with radiation exposure were not necessarily limited to those who worked in unventilated mines.

Most importantly, the bill requires the Department of Justice to take Native American law and customs into account when deciding claims. I have heard countless stories about the inequities faced by the spouses of Navajo miners who have been unable to successfully document their traditional tribal marriages to the satisfaction of the Justice Department under current law and regulations. This bill will change that, and make it easier of spousal survivors to make successful claims.

Mr. President, I am pleased to support this important legislation. The Congressional Budget Office estimates that the bill will cost close to \$1 billion over the next 21 years. That is far less than some of the other proposals floated in the House and Senate during the past few years. This is a common-sense approach, which addresses many of the problems with the existing program, without unnecessarily expanding the scope of the Radiation Exposure Compensation Act. The Chairman of the Senate Judiciary Committee has done a fine job crafting this bill and I have been pleased to work with him in that regard. I yield the floor.

Mr. COVERDELL. Mr. President, today marks a major breakthrough in

our War on Drugs. H.R. 1555, the Intelligence Reauthorization bill, contains a provision authored by myself and Senator DIANE FEINSTEIN, which is designed to put drug kingpins out of business. Enactment of our Drug Kingpin legislation represents the most dramatic change in our Nation's drug laws since the drug certification process was established in 1986.

The Drug Kingpin legislation, which Senator FEINSTEIN and I introduced earlier this year as a free-standing bill, targets major drug kingpins by blocking their assets in the U.S. and by preventing their access to U.S. markets. Our objective is to use U.S. economic power to undercut the financial base of the cartels and their kingpins, thereby providing a tool that directly targets a major security threat to this country. Simply stated, we are hitting drug traffickers where it hurts them most—in their wallets.

This legislation codifies and expands an existing Presidential Executive Order which has had remarkable success in financially isolating and weakening Colombian drug cartels. In 1995, President Clinton signed Executive Order 12978, exercising the International Emergency Economic Powers Act (IEEPA) against four major drug kingpins affiliated with Colombia's Cali cartel. The Executive Order blocks any financial, commercial and business dealings with any entity associated with the four named drug traffickers, recognizing that drug traffickers who pump cocaine and heroin into our communities pose a threat to our national security.

The Coverdell-Feinstein initiative expands the President's Executive Order to include all foreign narcotics traffickers deemed as threats to our national security and enhances congressional oversight of this important and effective program. Here's how it works: As under the President's Executive Order, the Treasury Department's Office of Foreign Assets Control (OFAC) would develop a list of Specially Designated Foreign Narcotics Traffickers in consultation with the Department of Justice, the Department of State, and other executive branch agencies. Any foreign entity which appears on the list would be prohibited from conducting any economic activity with the United States. American firms or individuals who violate this prohibition would be subject to significant financial penalties and, potentially, prison terms.

Mr. President, this program's track record in Colombia is impressive. The United States targeted over 150 companies and nearly 300 individuals involved in the ownership and management of the Colombian drug cartels' non-narcotics business empire, which included a variety of companies ranging from drugstores to poultry farms. Once labeled as drug-linked businesses, these

companies found themselves financially isolated. Banks and legitimate companies chose not to do business with the blacklisted firms, choking off key revenue streams to the cartels. Over 40 drug-funded companies, with estimated combined sales of over \$200 million, were liquidated or in the process of liquidation by February 1998. I am submitting for the RECORD a recent Treasury Department Impact Summary on the Colombia program.

The best part of this approach to fighting foreign drug kingpins is that it supports the efforts of foreign governments who need our help to take down the cartels. To that end, it is essential that implementation of this program occurs with the cooperation and participation of the host country. Indeed, in the case of Colombia, the participation and high level of cooperation by the Colombian government and the Colombian Banking Association were crucial to the success of the program. It is our hope and intention that as this program is expanded in legislation, a similar framework of cooperation and participation is developed with other countries.

One of our principle intentions with this legislation is to avoid the country-to-country confrontation that often occurs and to focus instead on the bad actors who are producing and trafficking the illegal drugs and who are causing so much damage to our nation. At the same time, it is designed to be a supplement, not a replacement for the current drug certification process.

The Coverdell-Feinstein provision is not country specific. It is a global initiative which targets foreign drug kingpins and their associates regardless of nationality and location—from Burma to Nigeria to Colombia.

Despite the proven track-record of this program, some raised concerns that this legislation would not adequately protect U.S. business interests. I disagree. So do the vast majority in both Houses of Congress, the Department of Treasury that implemented the successful Colombia program and the National Security Council. This legislation has been thoroughly vetted and painstakingly examined by the experts in Congress and in the Executive Branch. Since its unanimous passage in July 1999 as an amendment to the Intelligence Reauthorization bill, important changes were made which perfected and refined this provision that will be soon signed into law.

It is important to remember that this bill targets foreign drug traffickers and their front companies, not U.S. entities. This program is implemented so as to minimize the possibility of unfairly tarnishing the reputation of an individual or company. If a U.S. company is knowingly or unknowingly conducting business with drug traffickers or their associates, they are warned by the Treasury De-

partment before any further steps are taken. According to Treasury Department practice, alert letters are sent by Treasury to U.S. entities who are potentially conducting business with a designated foreign narcotics trafficker or their associates. Often, a Treasury Department representative will personally warn the U.S. entity. Actions would only be taken if the U.S. entity continues the business relationship with the narcotics trafficker.

The purpose is not to harm unwitting U.S. businesses. Instead, it is to inform U.S. persons of the identities of the prohibited foreign parties. In the case of the Colombia program, U.S. businessmen have termed this program as "a good preventative measure" that helps them steer clear of the cartels' front and agents. If a U.S. entity does happen to be adversely affected, it has recourse to administrative remedies through the Treasury Department, and of course has access to U.S. courts—as would any U.S. citizen under the Constitution. I am submitting for the RECORD a copy of several Treasury Department letters on this issue which should put this matter to rest once and for all. In addition, at the suggestion of Senator RICHARD SHELBY and Senator BOB KERREY, the legislation provides for a commission to examine a range of legal issues that could arise through implementation of the program.

As for the foreign drug kingpins, this legislation treats them for what they really are: a national security threat. Many of these criminals, who peddle their wares on our streets and in our school yards, are already under indictment in the U.S. These are the thugs responsible for thousands of deaths each year. In several cases tried before U.S. district courts since 1995, U.S. federal judges have found the designation process to be appropriate and applicable to the named foreign entities.

The provision unanimously passed the Senate as an amendment to the Intelligence Authorization Bill in July. It then passed the House on November 2 as a free-standing bill by a vote of 385–26. The provision was accepted in the Intelligence Conference on November 5. And then, last week, the House unanimously passed the Intelligence Conference Report, which included this provision. And, today, this provision received final approval in the Senate and will soon be sent to the President for his signature.

This provision is time-tested, has had extraordinary success in Colombia, and will continue to be an effective tool when applied on a global basis. This is a tough but fair measure. It punishes some of the worst criminals alive today, and at the same time protects the rights of innocent U.S. citizens.

Take legitimate U.S. dollars out of drug dealers' pockets is a vital step in destroying their ability to traffic narcotics across our borders. This is a bold

but necessary tool to fight the war on drugs.

Finally, Mr. President, I would like to thank the distinguished Senator from California Senator DIANE FEINSTEIN, for her leadership and dedication to this issue. I would also like to recognize Representative PORTER GOSS and Representative BILL MCCOLLUM for their work on behalf of this bill and their tireless efforts in fighting the war on drugs.

Mrs. FEINSTEIN. Mr. President, I rise in strong support of the Coverdell-Feinstein Drug Kingpin bill, which is contained in modified form within this Intelligence Authorization Conference Report.

That bill, also co-sponsored by Senators LOTT, TORRICELLI, DEWINE, HELMS, CRAIG, GRAHAM and REID, is designed to strengthen the President's hand in combating foreign narcotics traffickers around the world. Senator COVERDELL and I have worked for months to answer questions about the bill, iron out remaining problems, and satisfy the concerns of the Clinton Administration over how the bill will work.

We and our staffs met with representatives from the White House, the Justice Department, the Treasury Department, the Department of State, the National Security Council, other Senate offices and many others during that time. I am gratified to report that we now have the support of this Administration, as well as both Houses of Congress.

Let me speak a bit about this provision and why it is so important. This provision is patterned after an Executive Order issued by President Clinton in 1995, which targeted the assets of the powerful Colombian drug kingpins.

That Order expanded the International Emergency Economics Powers Act to include "Specially Designated Narcotics Traffickers." As issued, the President's Executive Order applies to four drug traffickers affiliated with the Colombian Cali cartel. The goal is to completely isolate the targeted drug traffickers.

The Executive Order blocks any financial, commercial and/or business dealings with any entity associated with the four named drug traffickers—to include criminal associates, associated family members, related businesses and financial accounts.

Under the Coverdell-Feinstein provision now contained in this Conference report—as under the President's Executive Order—the Treasury Department's Office of Foreign Assets Control (OFAC) would develop a list of Specially Designated Narcotics Traffickers in consultation with the Department of Justice, the CIA and the Department of State. Now, this list can contain traffickers throughout the world, and not just in Colombia.

By focusing on the financial relationships between drug cartels and their

associated business relationships, the Executive Order—and now this new provision—is directed toward the entities that are creating the drug problem in our country—the drug cartels.

Now, this provision will codify and expand that Presidential directive to include other foreign narcotics traffickers considered a threat to our national security—Colombia was a good start, and we believe it is time to set our sights elsewhere around the world.

The goal is to isolate targeted drug traffickers and their affiliated businesses by freezing their assets under U.S. jurisdiction and cutting off their ability to do business in the United States.

Under the Executive Order, more than 400 companies and individuals affiliated with drug trafficking have been targeted by the Treasury Department.

These entities are denied access to banking services in the U.S. and Colombia, and existing bank accounts have been shut down.

As a result, more than 400 Colombian accounts have been closed, affecting over 200 companies and individuals engaged in drug trafficking.

By February 1998, over 40 of these companies, with an estimated combined annual sales of over \$200 million, had been forced out of business.

Drug cartels today are more powerful, more violent and have a far greater reach than traditional organized crime organizations ever had been in the past. And, I believe they pose a major threat to our national security.

Indeed, measured in dollar value, at least four-fifths of all illicit drugs consumed in the U.S. are of foreign origin, including virtually all the cocaine and heroin.

With the authority to reach countries beyond Colombia, the President can work to isolate major criminal drug syndicates around the world, and impose upon them and their associates a similar fate as that of the Cali cartel.

It is my hope that with new emphasis on this expanded authority, and with a concerted intelligence effort to develop sufficient data about the cartels and their associates, in this country and abroad, the United States will be able to work with our allies to expose, isolate, and cut off the major drug trafficking syndicates that pose a tremendous threat to our societies.

This crucial mission can only be accomplished together, and we must work together to see that our governments are properly equipped to carry it out successfully.

To that end, this amendment establishes clear procedures through which the various parts of our own government will be able to share information with their counterparts, and make recommendations to the President as to those cartels that represent the greatest risk to our nation.

Coordinated by the Office of Foreign Assets Control in the Department of

Treasury, the expanded program will target new international drug cartels with the same successful financial choke holds that worked so well in Colombia.

And let me also be clear about one thing. Nothing in this provision should in any way be read to say that the United States Government should stop cooperating with other governments in the fight against drugs.

To the utmost extent possible, the United States under this provision should continue and even expand upon its current agreements with other nations in the fight against drugs. While valid concerns over the compromise of national security, sources and methods, or ongoing investigations must be taken into account, we must also make sure that we continue to work cooperatively with those governments also intent on solving this drug crisis.

This will not be an easy process, and the results will not be immediate. But over time, we hope that the flow of drugs across our borders will be diminished.

Before I yield the floor, I want to address one concern that has been raised about due process for American citizens under this bill. Some have expressed a concern that this bill would leave U.S. citizens without redress for blocked assets, in possible violation of their due process rights. Such an outcome is certainly not what we are trying to accomplish with this bill, and I have been assured by the Treasury Department that avenues of redress will remain open to United States Citizens.

According to Richard Newcomb, the Director of Foreign Assets Control (OFAC), the entity responsible for carrying out the provisions of this bill:

Even when assets are properly blocked under U.S. law, a U.S. citizen can petition OFAC for a license unblocking the U.S. Citizens interest in blocked assets. OFAC has a long-established policy of utilizing its licensing authority in sanctions programs to minimize adverse impact on U.S. persons while vigorously implementing the sanctions against targeted foreign persons.

Second, according to Newcomb, OFAC will have the ability under section 805(b) of this Act to completely unblock assets:

If the U.S. citizen believed that its interest in the foreign person's assets is mistakenly or wrongfully blocked, that U.S. citizen could petition OFAC to have the interest unblocked.

Finally, "Also, as section 805(f) must be read to avoid any Constitutional problems, a U.S. citizen would not be precluded from that section from pursuing any Constitutional claims."

In other words, Mr. President, U.S. citizens are now, and will continue to be, offered significant protections against wrongful blocking or seizure of their assets. The Treasury Department has assured us that nothing in this bill will eliminate a U.S. citizen's absolute, Constitutional right to due process,

and nothing in this bill attempts to do so. The clear purpose of the bill is to seek out foreign drug kingpins and cut off their access to the American economy.

I'd like to thank Senator COVERDELL for working so tirelessly with me on this bill, and I thank my colleagues on both sides of the aisle for supporting our efforts. I yield the floor.

Mr. KENNEDY. Mr. President, for the record, I want to ensure that congressional intent on the Secretary of Health and Human Services' organ transplantation rule is clear. The provision in the tax extender bill, which provides for a 90 day delay with a required 60 day comment period, does not reflect the views of the Health, Education, Labor, and Pensions Committee. Rather, congressional intent is expressed by the provision in the Consolidated Appropriations bill, which simply delays the effective date of the regulation by 42 days. This compromise assures that the transplant community and affected patients will have one final chance to discuss this issue, and that the Secretary shall then proceed with the regulation. Therefore, the provision in the Consolidated Appropriations bill should have legal effect, notwithstanding the provision in the tax extender bill.

I ask unanimous consent a statement of Administration Policy be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF ADMINISTRATION POLICY ON
H.R. 1180—TICKET TO WORK AND WORK INCENTIVES IMPROVEMENT ACT

Today, the Senate is expected to vote on the conference report to accompany H.R. 1180, the Ticket to Work and Work Incentives Improvement Act of 1999. The President has a deep and long-standing commitment to empowering and promoting the independence of people with disabilities.

H.R. 1180 would give people with disabilities a new chance to work without fear of losing their Medicare and Medicaid coverage. This bill also would create a demonstration program that provides people who are not yet too disabled to work the opportunity to "buy into" Medicaid to help them keep working. In addition, it would enhance opportunities for Social Security disability beneficiaries to obtain vocational rehabilitation and employment services from their choice of participating providers. The Administration strongly supports these provisions that will enable more people with disabilities to work.

The Administration is deeply troubled that H.R. 1180 includes a provision concerning the organ transplantation rule of the Department of Health and Human Services that would provide for a 90-day delay in the rule, including a required 60-day comment period. This provision is in conflict with the provision in the Consolidated Appropriations bill that would provide for a 42-day delay. The Statement of the Managers for the Consolidated bill makes clear their intent that there be no further delay following the 42-day period. The provision in the Consolidated bill represents the true compromise

that resulted from negotiations involving all parties. The Administration agreed to and supports the compromise provision in the Consolidated bill and believes that the rule should be issued without further delay after the 42-day period expires.

H.R. 1180 contains several time-sensitive provisions that extend expiring tax laws. The Administration supports many of these provisions, including the extension of alternative minimum tax provisions, the research and experimentation tax credit, the qualified zone academy bond authorization, the brownfields provisions, and the District of Columbia homebuyers credit. Although the extension of certain expiring tax laws is essential, the failure to fully offset the revenue losses resulting from these provisions is unfortunate. The Administration also is disappointed that H.R. 1180 includes the special allowance adjustment for student loans because it exposes the Federal Government, rather than lenders, to substantial financial risk due to the difference between Treasury and commercial paper borrowing rates.

TICKET TO WORK AND WORK INCENTIVES IMPROVEMENT ACT OF 1999—CONFERENCE REPORT

The PRESIDING OFFICER. The clerk will report the conference report.

The assistant legislative clerk read as follows:

The committee on conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill, H.R. 1180, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

(The conference report is printed in the House proceedings of the RECORD of November 17, 1999.)

The PRESIDING OFFICER (Mr. ROBERTS). Who yields time?

Mr. KERREY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. KERREY. I ask the Chair, what is the status?

The PRESIDING OFFICER. The time until 5 o'clock is equally divided between the Senator from Delaware and the Senator from New York.

Mr. KERREY. The Senate is currently on the conference report for tax extenders?

The PRESIDING OFFICER. The Senator is correct.

INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2000—CONFERENCE REPORT—Continued

Mr. KERREY. Mr. President, I ask unanimous consent that that conference report be temporarily set aside so we can have a voice vote on the intelligence conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERREY. I urge adoption of the conference report on intelligence.

The PRESIDING OFFICER. The question is on agreeing to the conference report on H.R. 1555.

The conference report was agreed to.

Mr. SHELBY. I move to reconsider the vote.

Mr. KERREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LOTT addressed the Chair.

The PRESIDING OFFICER. The distinguished majority leader is recognized.

Mr. LOTT. I know we have this very important legislation involving work incentives for our disabled citizens that—

Mr. MOYNIHAN. May we have order.

The PRESIDING OFFICER. The Senator from New York is exactly correct. The Senate is not in order. We will be in order. The Senate will be in order. Will Senators to my right please cease all audible conversation.

The majority leader.

Mr. LOTT. Thank you, Mr. President. And I thank the Senator from New York.

DAIRY COMPACTS

Mr. LOTT. We do need to have a colloquy now, before we begin the final debate on this very important work incentives legislation on the matter of dairy and the dairy language in the appropriations bill. There is no use at this point of me going back and recounting all that has gone on in us reaching the point where we are in the language in this bill.

There are a lot of Senators on both sides of the aisle who believe that the Northeast Dairy Compact should have been included. There are Senators who think that portions of the bill H.R. 1402, known as the 1-A, should have been included. There are other Senators who believe equally as strongly that neither of those should have been included in this bill. I must say, I am in that group.

I do not think what we have come up with on dairy is where we should leave it. It was something that was laboriously worked out. I tried my very best to find some way that we could come up with something that was in the best interests of dairy, the consumers, something that was acceptable to Senator GRAMS, Senator JEFFORDS, Senator KOHL, Senator WELLSTONE, and Senator FEINGOLD, but there was no way to find a solution with which all sides could be content. Regardless of how this agreement was reached, we are here, and it will be in law. But I do not think we should leave it on this line.

I do not think compacts are the answer, personally. I believe it very strongly. I do not think that trying to expand it—more compacts—and have the kinds of controls you have now by the Government, or will have in this by the Government, is the answer.

So I find myself philosophically very sympathetic to Senator GRAMS and Senator KOHL and Senator DOMENICI and Senator FITZGERALD, but I also

know of the position of the Senate on this issue, and Senator JEFFORDS and Senator LEAHY were able to produce a majority of the Senate, although neither side could produce a 60-vote margin to break a filibuster.

So all I want to say today is that while this legislation, I believe, is going to pass, we should not stop at this point. We should look for a better way to do this. We should look for a way to get away from compacts and a way to get away from the type of Government controls we now have.

Do I have a magic solution? Can I guarantee by the first week in February this will be resolved? No. I have been wrangling around with this for 20 years, as the Senator in the Chair, who was chairman of the Agriculture Committee, tried mightily and could not find the solution.

But I am committed here today to work with those who believe we should not be doing this to find a way to do it better. I know the Senators on the other side will fight tenaciously against that, but I want the RECORD to reflect my true feelings on this and reflect my commitment that we are not going to leave it on this line.

I yield the floor.

Mr. DASCHLE addressed the Chair.

The PRESIDING OFFICER. The distinguished Democratic leader is recognized.

Mr. DASCHLE. Mr. President, I associate myself with the remarks made by the distinguished majority leader. He noted that this is a matter of great import to many Senators, including those from the Northeast. They have made their position known, and I respect that position.

I have also indicated to them personally, and I have said publicly, that I do not support compacts. I do not support the Northeast Dairy Compact. I do not believe it is good economic policy. I think the process that allowed the Northeast Dairy Compact in H.R. 1402 to be inserted in the budget process was flawed and wrong and unfair. This isn't the way we ought to deal with complex and extraordinarily important economic policy affecting not hundreds or thousands but millions of rural Americans.

I oppose compacts in any form, but I especially oppose them when they are loaded into a bill without the opportunity of a good debate, without the opportunity of votes, without the opportunity of amendment.

We will come back to this issue. We must revisit this question. We must find a way by which to assure that all views are taken into account, and all sections of the country are treated fairly.

In this case, the two Senators from Wisconsin in particular, and the Senators from Minnesota, WELLSTONE and GRAMS, were not treated fairly. I do not fault anybody. These things happen. Senator LOTT and I have to deal

with a lot of different challenges and issues. He and I have admitted that we wished this could have been done differently. Those four Senators were not treated fairly. I applaud them for coming to the floor to express themselves, and to say in as emphatic a way as they can, as eloquently as they have, how important this matter is to them and how determined they are to see it resolved.

My hat is off to them. I thank them. I also thank them for their cooperation in working with us to come up with a way to resolve this. It is one thing to throw things and to stomp up and down and to cause all kinds of havoc. Anyone can do that. But it takes courage, it takes character, it takes class to say, look, in spite of the fact that we were not treated fairly, we are going to work with you to assure that people in other circumstances will be treated more fairly. I thank them for that.

Again, I appreciate the majority leader's comments in acknowledging the unfairness of this and ensuring that we will deal with it appropriately at a later date.

I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I enter this colloquy because I want to give a little bit of historical perspective, as chairman of the Agriculture Committee.

Mr. LOTT. Will the Senator yield briefly.

Mr. LUGAR. Yes.

Mr. LOTT. I ask unanimous consent that this colloquy extend for not to exceed 10 more minutes.

The PRESIDING OFFICER. Is there objection?

Mr. MOYNIHAN. Mr. President, it may take a little longer. We are in an accommodating mode, thanks to our colleagues.

Mr. REID. If I could say to the majority leader, we have a number of people, Senator LUGAR, Senator GRAMM, Senator BYRD, who—

Mr. LOTT. I think it would help if I withdraw that and urge my colleagues, be profound but succinct.

The PRESIDING OFFICER. The distinguished Senator from Indiana has the floor.

Mr. LUGAR. The history of this situation goes back to the farm bill of 1996. At that time, the dairy provisions were the final issue to be compromised. At that time, the House and the Senate agreed upon a New England dairy compact for 2 years. The 2 years were to end September 30, 1998. During that time, the USDA was charged with the need to reform the entire dairy system and reduce the number of the arrangements for pricing from roughly 38 to 13.

USDA acted this year. The Secretary promulgated some reforms that moved toward more of a market system. Likewise, the Secretary did not make fur-

ther comment about the compacts because, under the law, they were supposed to be gone at this point. Obviously, they have not disappeared. A similar legislative predicament last year gave a wedge for the compacts to continue for another year in New England. Obviously, as the leaders have described it, that situation has occurred once again.

Let me say, as chairman of the Agriculture Committee, we would like to reclaim the issue. It is in our jurisdiction. It is not in the jurisdiction of the people who worked this out. They had no right to do this. They have been widely condemned for doing it. There has been no debate on the compacts in our committee or on the floor, except for the ag bill. And they should have been gone by September 30, 1998, under those provisions. Likewise, although the House did decide to disagree with the Secretary of Agriculture, the Senate did not. The Senate did not have debate on this and, the fact is, the leadership of the committee wrote to commend our Secretary of Agriculture in a bipartisan way.

Let me reassure the distinguished Senators from Wisconsin and Minnesota that the Agriculture Committee of the Senate will be eager to take up legislation that deals definitively with this situation. It will require a majority of the committee and a majority of this body and, likewise, some cooperation from the House. But that is the proper way to proceed. A suggestion has been made that we ought to be heard as a Senate. I suggest that that is the way we will follow.

We will entertain legislation with regard to these issues at the earliest possible time and ask for the support of Senators who are here on the floor involved in this colloquy to help us in that quest.

I thank the Chair.

The PRESIDING OFFICER. The distinguished Senator from Nevada is recognized.

Mr. REID. Mr. President, I yield to the Senator from West Virginia.

Mr. BYRD. Mr. President, as ranking member of the Senate Appropriations Committee, let me say a few words. I would like to say more about this man from Wisconsin but time constraints will not allow me to do that.

He is the Stonewall Jackson of Wisconsin. He stands like a stone wall. If I had the voice of Jove, I would shout from the ends of the earth. Yet I would not be able to move this man, HERB KOHL, when he takes a determined stand. He has been talking with me time and time again about this issue that is so important to him and the people of Wisconsin. He has been absolutely indefatigable; he has been unshakable, and I salute him. He has stood up for the people of Wisconsin. That is what I like about him. He stands for principle. He stands for his people.

I have been criticized many times for standing for my people in West Virginia. Who sends me here? They do. The distinguished Senator from Wisconsin feels the same way. He is courteous; he doesn't talk very much or very loud; but he always listens. Always, when I have had a problem affecting my State in particular, he has listened. I sat down in his office with him and talked with him. So I listen to him. I salute him. The people of Wisconsin have a real treasure in HERB KOHL, and I have a real treasure in HERB KOHL as a friend. I want him to know that at any future time when this issue comes up, he knows the number of my office, the number on my telephone. I will be glad to see him, talk with him, and help him in his fight.

The PRESIDING OFFICER. The distinguished Senator from Minnesota is recognized.

Mr. GRAMS. Mr. President, I come to the floor today stunned by the addition of harmful dairy provisions in the final appropriations bill. This omnibus bill contains another extension of the Northeast Dairy Compact for 24 months—which I consider the most brazen attempt in my memory as a member of Congress to steal and move an industry from one region of the country to another. This economic power grab is alternatively characterized as a matter of states' rights, a way to guarantee a fresh supply of milk to local consumers, a means to ensure lower-priced milk to consumers, and a means to help the small family farmer survive. All of these arguments are false—a thinly veiled disguise to cover the truth, which is that this is an unvarnished economic power grab of major proportions.

But first, I would like to explain what dairy compacts are, and explain why they are so destructive to the heart of dairy production in America and the Upper Midwest. The Northeast Dairy Compact raises the price of Class I fluid milk above the prevailing federal milk marketing order price within the participating states, and, I might add, above what the market would pay. Milk processors have to pay the higher price for the raw milk they process, and this higher price is passed along to the consumer at the grocery store. With higher prices, consumption goes down, and children are the biggest losers. I don't argue against a fair price or honest price—for any dairy farmer in Minnesota or Vermont or any other state. But I cannot support price-fixing schemes that legislatively transfer market share.

The Northeast Compact was authorized in 1996 during consideration of the larger Federal Agriculture Improvement and Reform (FAIR) Act. This controversial issue was inserted in the conference committee, avoiding a separate vote, after the measure had been

overwhelmingly defeated on the floor. While most of the FAIR Act was designed to help farmers compete in world markets and reduce government involvement in agriculture, the Northeast Interstate Dairy Compact established a regional price-fixing cartel within our very own country. The Northeast Dairy Compact has harmed dairy farmers in Minnesota, and this kind of unfair subsidy should be terminated. We should not be passing laws that will have such a harmful impact on any American. This compact does.

When this issue came to the fore, compacts were roundly condemned in the major newspapers of the compact region. The New York Times, Boston Herald, the Connecticut Post, and the Hartford Courant all weighed in against the cartel, in addition to publications such as USA Today and the Washington Post.

Again, compacts were hardly consensus legislation to begin with. The House refused to put the provision in its broader farm bill. And I must reiterate, the Senate voted on the floor to strip the Compact language from its bill. Despite these defeats, the compact provision was slipped into the bill in conference and signed by the President. The Compact legislation could not withstand the scrutiny of a fair debate on the floor, and had to be muscled in at the last minute in conference, just as we've seen with this attempted extension today. Knowing that this scheme was a bad idea from the start, Congress limited the life of the compact, and that is why compact proponents asked for an extension and could only achieve an extension sneaked into an omnibus bill as we are about to head out of town for the session.

Retail prices of milk jumped immediately after the higher Compact price was implemented. As predicted, the milk produced in New England increased by four times the national rate of increase in a six-month period following Compact implementation. The surplus milk was converted into milk powder, leading to a 60% increase in milk powder production. That surplus directly harms dairy farmers in Minnesota and Wisconsin, driving down prices and demand in the Midwest.

Soon after implementation, the Northeast Compact had to begin reimbursing school food service programs for the increases in cost caused by the milk price hikes; an admission that prices have gone up and consumers are being affected. However, low-income families that need milk in their diet are not being reimbursed by the Compact for their increased costs. Milk is a food staple, and one of the healthiest foods we have. Are we going to permit the extension of this milk tax that hits low-income citizens hardest? Are we going to continue a food tax on the group of citizens who spend the highest

percentage of their income on food? What's next, a special tax on bread, eggs, ground beef, or potatoes? But that won't happen—Why? Because it would be unfair, just as this compact cartel is unfair. Consider the low-income families with small children and the elderly on fixed incomes in your state and ask if this is the population you want bearing the brunt of this regressive milk tax.

Despite all of the discrediting information about dairy compacts, members continue to contemplate extending for the second time this bad policy that was initially only to be "temporary" assistance to Northeast producers. Everyone who truly understands this issue admits that compacts are harmful for consumers and for American agriculture, but somehow we can't muster the political will to say no to the entrenched interests that support the compact. Thus, we keep hitting the snooze button—preferring to "temporarily" extend bad policy rather than addressing it on a policy basis. What is even more egregious is other regions of the country are promoting compacts for themselves to tap into these goodies at the expense of other regions of the country such as the Upper Midwest. And again would force consumers to pay unfair high prices for milk.

This is really Economics 101. If you artificially raise the price received for a commodity, you can count on more being produced. Where does the excess go? It goes into areas where there isn't a floor price, and that excess production depresses the price that producers in my state receive. It's really not that hard to understand, despite the sentimental arguments that compact supporters use to cloud the real issues at play in this debate. Again, we are trying to knock down or reduce trade barriers around the world to open markets and give our farmers a level playing field to compete, but would erect these same barriers to trade inside our own borders that will not allow dairy farmers in the Midwest to fairly compete.

As I said earlier, I must address some of these urban myths about the benefits of compacts, myths that are so often repeated around here by colleagues that they have become difficult to distinguish from the truth. One of these claims is that compacts are somehow a matter of "states' rights," and that compacts make an important contribution toward devolving power back to the states.

The fact is that regulation of interstate commerce is a power specifically delegated to Congress in Article I, Section 8 of the Constitution, which states that Congress shall have power "to regulate commerce with foreign nations, and among the several states, and with the Indian tribes."

Regulation of interstate commerce was one of the chief reasons our country's founders abandoned the Articles

of Confederation and moved to adopt the Constitution. I consider it one of the great ironies of this debate when I hear colleagues claim that the dairy compact issue boils down to "states' rights."

Professor Burt Neuborne, a constitutional law professor at the New York University School of Law, in testimony before a subcommittee of the House Judiciary Committee, noted that the chief motive for the Founding Fathers' decision to abandon the Articles of Confederation in favor of the Constitution was to foster a free market of trade within the United States. Under the weaker Articles of Confederation that entrusted commerce powers in the states, states enacted price controls to protect high-cost producers from competition from other regions of the country. The Constitution corrected this problem by empowering Congress to regulate interstate commerce. According to Professor Neuborne,

At the close of the Revolution, the thirteen original states experimented with a loose confederation that delegated power over foreign affairs to a national government, but retained power over virtually everything else at the state and local level. The lack of a national power to regulate interstate Commerce led to the eruption of a series of trade wars, pitting states and regions against one another in a mutually destructive spiral . . .

United States Supreme Court Justice Robert H. Jackson, reviewing the history of the Commerce Clause in a 1949 opinion, stated that:

The sole purpose for which Virginia initiated the movement which ultimately produced the Constitution was 'to take into consideration the trade of the United States; to examine the relative situations of trade of said States; to consider how far a uniform system in their commercial regulations may be necessary to their common interest and their permanent harmony' and for that purpose the General Assembly of Virginia in January of 1786 named commissioners and proposed their meeting with those from other states. The desire of the Forefathers to federalize regulation of foreign and interstate commerce stands in sharp contrast to their jealous preservation of the state's power over its internal affairs. No other federal power was so universally assumed to be necessary, no other state power was so readily relinquished. [As Madison] indicated, "want of a general power over Commerce led to an exercise of this power separately, by the states, (which) not only proved abortive, but engendered rival, conflicting, and angry regulations."

Continuing to quote again from Professor Neuborne,

James Madison noted that the single most important achievement of the Constitutional Convention was to rescue the nation from a continuation of the parochial trade wars that had marred the first ten years of its existence and threatened its future permanent harmony. . . . Congress should reflect on the fact that Madison's understanding of the relationship between economic protectionism and the erosion of political unity was brilliantly prescient. One of the Founders' enduring insights was that regional economic

protectionism is ultimately corrosive of national political unity. To prevent economic regionalism, the Founders imposed a constitutional prohibition on state and regional efforts to discriminate against goods and services produced elsewhere in the nation. To tamper with that constitutional prohibition is to tamper with the mainspring of the nation's political and economic fabric.

Professor Neuborne's research on the topic of interstate compacts, which originate under Congress' grant of power in Article I, Section 10, revealed that prior to the Northeast Regional Dairy Compact, Congress had never granted the compact power to enable states to engage in economic protectionism. Two hundred ninety-nine times before, the compact power had been used for a constitutionally legitimate purpose. Only now, with the advent of the dairy compact, has Congress ever contorted the meaning of Article I, Section 10 as an opportunity to set up a protectionist, multi-state cartel, in direct conflict with the Commerce Clause of the Constitution.

The Supreme Court has repeatedly ruled that by granting to Congress the power to regulate interstate commerce via Article I, Section 8, the Constitution carries with it a negative implication precluding the states from engaging in protectionist schemes that favor local economic interests at the expense of national competitors.

Mr. President, are we not in fact returning to the very types of behavior that the Constitution was in large part designed to remedy? Are we really willing to pit region against region, and create protectionist regimes, under the guise of dairy compacts, even within our own country?

The next pro-compact argument I would like to address is the claim that the compact is necessary to guarantee an "adequate supply of fresh, locally produced milk" to consumers. As I have said before, I believe the constant refrain that compact supporters are merely trying to guarantee an "adequate supply of fresh, locally produced milk" is a calculated deception designed to mislead consumers into believing that without this legislation, there may not be a consistent supply of milk in the grocer's dairy case. This is simply false: our nation produces three times more milk than it consumes as a beverage. And I should note that Minnesota farmers have not come to the federal government asking for pricing advantages so they can grow oranges or lemons and guarantee Minnesota consumers a quote "adequate supply of fresh, locally produced citrus." Minnesota farmers want to produce what they produce best, which are dairy products, and they can deliver them to the consumer much cheaper, too.

In fact, some compact supporters have the audacity to claim that without a compact, the region would pay more for milk as high shipping costs for imported milk was factored into

the price. This is also false. If local producers can sell a product for less than their competitors, then they would have no need of a compact. They could keep their markets by beating the price of the competition. But the truth is, high quality milk can be trucked into New England at the peak of freshness and at less cost than it can be produced in most New England states.

Compact supporters also claim that the compacts are necessary to save the small, family dairy farm. Interestingly enough, according to USDA figures, the average dairy herd size is 85 head in Vermont, while in Minnesota it's 57 head. This means that herd sizes in Vermont are almost 50% larger than those in Minnesota. So much for the idea that the compact is protecting dairy producers from competing against large, Midwestern dairy farmers. This is just one of the distortions that I have had to deal with in this dairy debate, and I'm tired of the hard-working dairy farmers in Minnesota being labeled as, quote, "corporate dairy farmers." The average Minnesota dairy farmer grazes a 57-head herd on 160 acres. I know Minnesota dairy farmers don't want to consolidate into larger and larger operations; they just want a level playing field where they can earn enough to support their families and continue to do something they love to do. I would ask my opponents to please not cloak the dairy cartels with the mantle of supposedly helping the little guy against encroaching agribusiness conglomerates. The hard evidence shows that on average, the wealthy, large producers are not, I repeat, not, in the Midwest, and the rich will only get richer if a compact extension gets rammed through the Senate.

Mr. President, not only are certain members of this Congress trying to impose expensive dairy compacts on the American consumer, but they are also trying to strong-arm through milk marketing order changes that adversely impact both Upper Midwest producers in the dairy heartland of America and low-income consumers. I also want to review how we have arrived at this point today where Congress is trying not only through compacts but through the milk marketing order system, to blatantly seize market share from dairy producers in one area of the country and give it to producers in another. This bill not only hits Midwest producers once, but twice.

The current milk marketing system requires processors to pay higher minimum prices for fluid milk the further the region is located from Eau Claire, Wisconsin. To reform this antiquated, Depression-era method for supplying milk to consumers, which basically picks winners and losers in the dairy industry, Congress, through the 1996 FAIR Act, required USDA to significantly reduce the number of milk mar-

keting orders, and transition to a more market-oriented system of milk distribution. After many months of study and having received comments from hundreds of market participants, USDA proposed Options 1-A and 1-B. The Option 1-A proposal made minimal changes to the old marketing order pricing system, while Option 1-B contained some basic free market reforms and modernizations of the system. The Upper Midwest did not like what it saw in 1-B, actually, and liked the compromise even less, but it was a small step in the right direction, and we supported it as a compromise.

The compromise came after the USDA received testimony concerning the two alternatives, and, as I said previously, the final rule takes steps toward simplifying and modernizing the milk marketing order system. As an Option 1-B supporter, I hoped for a proposal closer to 1-B, but accepted the need for compromise and, again, supported it. Implementation of the new compromise orders has unfortunately been postponed by a lawsuit in federal court.

Option 1-A is basically no reform, and would ignore the direction of Congress in the FAIR Act. It would increase prices for consumers, affecting most the low-income consumers that spend a high percentage of their wages on food. Option 1-A also keeps in place a regionally discriminatory milk pricing system that benefits producers in some parts of the country at the expense of dairy farmers in other regions, much like compacts. Again, it's a government program that picks winners and losers, not allowing the market to set the prices. It is opposed by free market taxpayer advocacy groups, consumer groups, regional producer groups, and processor groups, and it does nothing to protect the nation's supply of fresh fluid milk. Our nation produces an abundance of milk that is sufficient to supply consumers' needs.

Secretary Glickman, writing about the final rule, said that:

USDA's own analysis shows that nationally, dairy farmers will realize virtually the same cash receipts under the new, fairer plan as they do now, and when aggregated, the all-milk price will remain essentially unchanged from that under the existing program, which virtually all sides agree sorely needs changing[.]

Moreover, Agriculture Committee Chairman LUGAR said that the final compromise rule "is a good first step toward a policy that places the nation's dairy industry in a position to better meet the challenges of the global markets of the new century[.]"

What we also need to ask ourselves is why are we considering these controversial issues without going through the committee process, with full hearings and testimony? The Agriculture Committee has jurisdiction over milk marketing orders; nonetheless, we are here today trying to circumvent that jurisdiction.

Again, the final rule is a compromise, not the best for either 1A or 1B advocates but a middle ground. We should not rush to reverse a process that took months to complete in order to replace it with 1A. Adoption of 1A would in effect maintain the status quo that, again, heavily favors some dairy farms at the expense of others. And please don't look at this debate as a mere balance sheet of who wins and who loses, or count votes that way. Remember that the Upper Midwest has been at a price disadvantage for more than sixty years, and this reform was only a modest, and, in fact, inadequate, attempt to correct the unfairness. Compacts are bad enough, but retaining these failed dairy policies of the past on top of that is incomprehensible.

Currently 85% of the milk produced in the Midwest goes into manufacturing. When other regions of the country receive higher Class I differentials, the excess production spills into Midwestern markets and lowers the prices that our producers receive. Artificially inflated prices will always, always, always increase production. You can count on it like the sun rising in the morning. And by artificially inflating milk prices in areas of the country that are not particularly suitable to dairy production, Congress is literally trying to micro-manage where America's milk will be produced, and to take away dairy markets from the Upper Midwest.

No other product receives the same kind of discriminatory pricing treatment that milk does in our country. The Upper Midwest can produce milk for a third less than some regions of the country. Why should the family farmers in the Upper Midwest not be allowed to benefit from the comparative advantage they have in milk production?

Some will claim that the compromise reform will cost the dairy farmers across the country \$200 million. This is not true. Actually, according to a USDA study, net farm income will be higher under the compromise rule in comparison to the status quo. And the Food and Agricultural Policy Research Institute at Iowa State, an agricultural policy research group, concluded that 60% of the nation's dairy farmers would receive more income under the USDA plan.

Some supporters of H.R. 1402 (the legislation upon which these provisions now before us are based) also make the same argument as dairy compact proponents that if we do not implement H.R. 1402 then milk will be produced by agribusiness, or that further farm consolidations will occur. Going back to the USDA figures, North Carolina, whose congressional delegation has argued strenuously for the reversion to Option 1A, has an almost 20% larger per head average dairy farm size than my home state of Minnesota. Of course,

Minnesota is part of one of the regions of the country that the opposition tries to demonize as the center of corporate dairy farming. Proof that this is not a battle between, quote, "small family dairy farms" and large Midwestern dairy farms only gets more striking. New York, a state that has also seen significant political support for H.R. 1402, has an average herd size per dairy farm that is 37% larger than Minnesota's. Georgia's average herd size is 72% larger than Minnesota's, and Florida's average herd size is four times larger than my home state's. Like the dairy compact argument, so much for the idea that we are saving the family farmer through passage of H.R. 1402.

As an aside, because of the blatant unfairness of the system, and because the efforts of Upper Midwesterners to compromise in good faith have been ignored, forcing us to fight these last minute riders and strong-arm tactics, I have recently introduced legislation to totally deregulate the milk marketing order system, effective upon the date of enactment. This milk marketing order system is a relic from the past. It's a byzantine arrangement of complicated pricing formulas that looks like something conceived in 1980s Eastern Europe. It's time to tear this entire decaying, outdated infrastructure down, and start anew with an even playing field on which all producers can compete. That's what my legislation does, and I ask my colleagues who believe in fair trade and a fair shake for hard working farmers to sign on as cosponsors.

Mr. President, the dairy compact and the other dairy provisions attached to this legislation are anti-competitive, anti-consumer, unprincipled, and an affront to the family dairy farmers in my state. To be candid, I'm thoroughly disgusted by this entire turn of events. We have sacrificed any basic sense of fairness during this process. These provisions have been added at the last minute, behind closed doors because they won't survive the scrutiny of public debate. Because of the blatant injustice that is being done to Minnesota farmers, I am committed to joining my Upper Midwest colleagues in doing all I can do to ensure that this legislation does not reach the President's desk.

Mr. President, I would now like to read several newspaper editorials that have been written across the country in opposition to dairy compacts and H.R. 1402.

To begin, from the March 15, 1997 edition of *The New York Times*:

Agriculture Secretary Dan Glickman blundered last year when he approved a dairy cartel in the Northeast that would jack up consumer prices by perhaps 25 percent. . . . The Dairy cartel, also called a compact, would control the production and distribution of milk in New England, raising its price by between 13 and 35 cents a gallon. That would pump money into the bank accounts of the region's 3,600 dairy farmers by

pushing prices back up to last year's sky-high levels. But it would hit 13 million consumers in Maine, Vermont, New Hampshire, Connecticut and Rhode Island with an added cost of up to \$100 million. Poor parents, who spend about twice as much of their income on food as do non-poor families, would suffer the most. Food stamps would buy less milk and other dairy products. High milk prices would also raise the cost of national, state and local nutrition programs. With Washington cutting money for welfare, food stamps and other poverty programs, this is no time to impose needless costs on the poor. It will be hard for Mr. Glickman to admit he erred when he approved the cartel. But it would be even harder on parents to pay more for their children's milk.

From the March 2, 1998 *USA Today*:

Imagine being a widget maker in Georgia or New Hampshire with a federal guarantee that assures you a higher price for your product than widget makers in Wisconsin or Iowa. Sounds incredible, huh?

Imagine being a cattle raiser in Florida or Oregon with a guaranteed price for your beef that's better than what ranchers in Texas or Nebraska can get. Impossible? Yes—but only because you're producing widgets or hamburger. If you're in the milk industry, it's business as usual.

Pressured by the dairy industry, the government maintains a Depression-era formula that makes some cows (and their owners) more equal than others, depending on where they live. Millions of consumers and taxpayers pay the price; higher milk costs for themselves, higher taxes for government-bought milk for schools and other programs. . . .

Apologists for government control claim the program is necessary to keep farmers in business and assure a supply of milk. The number of dairy cows plunged from 23.6 million in 1940 to 9.4 million in 1996; farms with dairy cows dropped from 4.7 million in 1940 to 155,300 in 1992. But the milk produced per cow has nearly quadrupled. U.S. milk production is up from 109 billion pounds in 1940 to a projected 162 billion pounds in 2000, despite a 60% reduction in the number of cows. And while sales of cheese, cream and specialty products like eggnog and yogurt are up, U.S. demand for liquid milk has been essentially flat for more than 20 years.

Yet dairy farmers continue to get special privileges, eluding even the 1996 "Freedom to Farm" law that committed the government to phasing out price supports and market manipulation for corn, soybeans, wheat and other commodities. . . . Aggressive dairy lobbies in state capitals from Louisiana to New York are pressing to form or enlarge new regional compacts that permit even more manipulation of milk prices at the consumer's expense—adding up to 15 or 20 cents a gallon. That's on top of the indefensible marketing orders, which inflate retail milk prices by at least \$1.5 billion a year for a program that isn't needed. Congress abolished "welfare as we know it" for mothers and children. Welfare for cows and dairy farmers should end as well.

The next editorial shows that though the compacts are ostensibly put in place to help small dairy farms, they have failed to do so, and exist as subsidies to large New England operations. Following are excerpts from a July 19, 1999 *Boston Globe* editorial:

Dairy farming in New England, especially in Massachusetts has been a chancy proposition for small, family-run operation. . . . Congress, which must soon decide

whether to extend the system's enabling legislation, should modify it to focus more closely on smaller farms rather than lavishing money on larger operations that are fully capable of competing in a tough economic environment. Congress should also resist the temptation to expand the system to other parts of the country. . . .

The rescue effort now in place is a federally sanctioned system of mandated price supports, which amount to about 14 cents a gallon. In Massachusetts this generates \$40 million annually, but only \$2 million goes to Massachusetts farmers, with most of the balance going to Vermont farms, many of which are larger and have lower costs. Massachusetts's agriculture commissioner, Jay Healy, has proposed limiting the subsidy to a fixed level of production, about 1.5 million gallons of milk annually, which is typical for smaller farms.

Concluding with an excerpt from the editorial, it says:

Even the New England system provides more subsidies than are needed to achieve its objective. The funds that now go to larger farms would be more effective if they were used to increase small-farmer subsidies, typically \$3,000 to \$4,000 per farm.

Now, I must disagree with the editorialist's assessment that the subsidies should be continued, but I find it very significant that even in New England they recognize that since the subsidy does not specifically target the smaller farms, it disproportionately helps the larger operations because the subsidy is based upon the volume produced. It should not be surprising that efforts to cap the subsidy to a fixed level of production have been successfully resisted by the large dairy farms in New England.

The next editorial I will read is from the April 27, 1999 edition of the *Houston Chronicle*:

The Texas House of Representatives recently approved a bill that seeks to raise milk prices and deprive Texans of the benefits of competition. The Senate need not reflect long before rejecting it. House Bill 2000 would require Texas to join the Southern Dairy Compact, which sets the minimum price for milk paid to producers in its member states. The minimum price inevitably would be higher than the price Texans pay in a competitive market.

I should note at this point that Congress has not in fact authorized the Southern Dairy Compact, and if common sense, prevails, it won't. Congress has arbitrarily chosen New England consumers to pay the milk tax, and New England producers to receive it.

Again continuing with the *Houston Chronicle* article:

Texas dairy farmers are producing all the milk that Texas families and dairy product manufacturers need and more. There is no reason why state government should make families pay more for the milk, ice cream and other dairy products they buy. The state purpose of House Bill 2000 is to preserve family dairy farms and ensure a supply of fresh milk. But history shows that milk price controls heighten the financial advantage enjoyed by the largest producers without sustaining uneconomical small farms.

Furthermore, anyone who thinks Texas needs added government regulation to pro-

vide a reliable milk supply has not seen the dairy cases at the supermarket that are filled to overflowing with milk and dairy products of every description. Why change a system that provides ample supply and variety at the lowest possible price? Adding Texas to the Southern Dairy Compact would do little to help Texas milk producers, but it would deprive Texas dairy product manufacturers of an advantage they enjoy over competitors in state where the price of milk is controlled.

This bill is bad for consumers, bad for manufacturers and bad for the taxpayers who pay for or subsidize milk consumed by schoolchildren, prisoners, patients in public hospitals and food stamp recipients. Few bills could provide more reason to reject them than the authors of House Bill 2000 have provided.

The next editorial is from the June 15, 1999 edition of the *Philadelphia Inquirer*:

In 1996, Congress revamped federal farm laws, intending to ratchet down government's intrusion in agriculture. But a bill now pending would use that law to create regional cartels that would set artificially high prices for milk. Pennsylvania consumers should be lobbying lawmakers against this move. Despite the fact that the state's outdated milk-board system already sets minimum milk prices—but no maximum—the legislature last week allowed Pennsylvania to join the cartel known as the Northeast Interstate Dairy Compact.

Consumers here who consistently pay more for milk than in neighboring states should wince at the prospect of a regional price-fixing body imposing still higher prices. Here's how it works: Congress established the Northeast compact under the 1996 act, an agreement among six New England states to prop up milk prices in an effort to save small dairy farms. When milk prices on the open market fall below a certain target price, the compact states tack a surcharge onto milk. The extra revenue is passed back to farmers; the higher milk price gets passed along to consumers.

The compact is set to expire October 1, but a bill introduced in April would make it permanent and expand it to include six more states, including Pennsylvania. What's worse, the bill also would establish a Southern Dairy Compact, which could include up to 15 more states. Already the Northeast compact has raised milk prices by almost 20 cents a gallon since its inception. By federal and state law, the compact could raise milk prices in Pennsylvania by about 70 cents a gallon, consumer groups warn. The logic behind the original legislation, to save small dairy farms, had some appeal. Dairy farms nationwide have been going out of business, usually because they are acquired by larger producers, at an average rate of 5.1% a year in the 1990s, experts say.

But that doesn't prove the compact would protect small farmers; it may hurt them. Larger dairy farms which produce the most milk reap the most benefit in subsidies from the compact. Alarmed by the potential harm both to middle-class consumers and low-income families, various groups are protesting the new bill. Nutrition and consumer groups, government-spending watchdogs and milk processors and retailers all have lined up against the concept. Congress should reject this attempt to extend the counterproductive intrusion on the workings of the free market. Let the milk cartel die.

The following editorial is from the January 5, 1999 issue of *Newsday*:

Despite a few new consumer protections that made the deal acceptable to the Democratic Assembly, the state should not have allowed New York's dairy farmers to join a regional milk cartel. This sour stuff will keep the wholesale price of milk artificially high, forcing processors and retailers to pass the cost on to consumers. The hit will fall hardest on the poorest parents who buy milk for their children. And it's not clear now much it will help the small farm owners most in need.

Besides, there are other ways to help dairy farmers that wouldn't necessarily push up milk prices in markets. The state, for instance, could cut or subsidize a variety of taxes about which farmers have complained. Meanwhile, wholesale milk prices are at a record high, easing some pressure on farmers. Entrance into the Northeast Interstate Dairy Compact would tie New York's farmers into a New England cartel designed to keep prices higher when they otherwise would collapse. Rather than benefit from lower prices, consumers would pay the higher ones when wholesale prices soar. And the law's cap on retail prices is so high that, barring severe inflation, it won't ever be reached. Schools are protected but not other nonprofits. Now, there's only one way to stop this deal. Congress has to approve it. It shouldn't."

This next editorial is from the April 4, 1999 edition of the *Atlanta Journal-Constitution*:

Since the federal Freedom to Farm Act was passed in 1996, the U.S. government has been trying to wean the nation's farmers, including the dairy industry, from government price supports and other subsidies that interfere with the workings of the free market. Unfortunately, the dairy industry is trying to undo that progress by pressuring Congress and states such as Georgia to approve interstate dairy compacts. If the industry succeeds in that lobbying campaign, consumers will have to pay higher prices for a basic food commodity essential for good health.

The compacts, if approved would essentially establish legal cartels for dairy farmers and allow the cartels to set milk prices higher than the market would otherwise allow. In Georgia, dairy farmers have rammed through the recent session of the General Assembly a bill allowing them to join the Southern Dairy Compact. The same bill was passed a year ago by the General Assembly but was vetoed by Gov. Zell Miller, who noted that it might be unconstitutional and would certainly raise costs for consumers. The decision whether to sign the latest bill rests with Miller's successor, Roy Barnes.

Barnes was elected last year in part by portraying himself as a consumers' advocate. If he honors the philosophy, he too should recognize the dairy compact as nothing more than a back-door tax increase and veto it accordingly. Government should not use its power to guarantee any business or industry a profit.

A dairy compact already exists in New England. After it was enacted in 1997, the price of milk rose from \$2.54 and fluctuated to a high of \$3.21 a gallon. Milk prices there initially jumped about 20 cents a gallon, enough to generate an additional \$46.7 million for dairy farmers in less than two years. Not surprisingly, New England dairy farmers see the compact as a safety net designed to prevent their profits from dropping too dramatically.

Those who actually pay higher prices, however, see it as little more than a special-interest tax increase that will only hurt consumers, particularly the poor, the elderly and those on fixed incomes. Milk prices go up and down monthly all over the country, but when prices drop significantly in the spring and fall, they only drop slightly in dairy compact states. The savings to the consumer is lost so the dairy farmer can keep a high return on the product.

"It socialism. It's a controlled economy," said John Schnittker, an economist with Public Voice for Food and Health Policy. "Compacts are a really bad deal for consumers. They add about 22 cents a gallon to today's milk price. And they keep paying high prices when prices all over drop." Nine southern states besides Georgia have already approved creation of a Southern Dairy Compact to mimic the protectionism found in New England. However, that and other proposed compacts must still be approved by Congress, which also has to decide whether to renew the New England Dairy Compact."

Congress should reject both these proposals as unnecessary, counterproductive intrusions on the workings of the free market. However, if Barnes signs the Georgia law and Congress approves the Southern compact, Georgia consumers are stuck. The state can withdraw from the compact only through passage of another law by Congress and then only after a one-year waiting period. Approval of dairy compacts in the South would not suspend the law of supply and demand. It would only distort it. Some economists predict that as a result of higher prices, dairy compacts would reduce milk consumption by 8 percent nationwide. Those most vulnerable would be families with young children, who in many cases are already struggling to make ends meet.

Georgia's dairy industry is going through a painful consolidation. The state lost 117 dairy farms over the past four years, and farmers warn that without government protection, more and more milk will have to be imported from other states. However, dairy farms in neighboring states have also been disappearing; the trend toward consolidation is nationwide. Furthermore, milk from Alabama or Tennessee tastes the same as Georgia milk, and today's technology allows quick transport to prevent milk products from spoiling.

Free enterprise, competition and the open market have been the economic pillars of the United States' economy for more than 200 years. Every experiment at subsidizing an industry has proven to be a failure, particularly in agriculture. Gov. Roy Barnes should protect Georgia consumers and families by vetoing that state's entry into the Southern Dairy Compact. And Congress should dismiss the entire concept as an unnecessary infringement on free enterprise.

I also want to share with my colleagues some editorials concerning the milk marketing order system.

This editorial is from the Dallas Morning News, dated September 14, 1999. It says:

Minnesota Gov. Jesse Ventura wants Beaumont, Texas to be the center of the dairy universe instead of Eau Claire, Wisconsin. Mr. Ventura knows that there are no dairy cows in Beaumont. Nevertheless, his logic is faultless. That's because federal farm policy dictates that the farther a dairy farmer lives from Eau Claire, the more milk processors must pay him for his milk. Minnesota profits little from the arrangement because it bor-

ders Wisconsin. But it is 1,200 miles from Beaumont. So making Beaumont the new Eau Claire makes sense for Minnesota's hard-pressed dairy farmers.

In truth, Mr. Ventura favors a free market in agriculture. His facetious advocacy for Beaumont is designed to focus public attention on absurd federal dairy policies, which punish efficient producers and gouge consumers. The United States needs to abandon the Depression-era thinking that led it to calculate milk prices based largely on dairy farms' proximity to Eau Claire. Times have changed; U.S. agricultural policy remains mired in the 1930s.

Unfortunately, Congress seems poised to revoke the few tentative reforms that it passed in 1996 and to expand and give extended life to a program that would create consumer-antagonistic milk cartels in sections of the country. A simplified milk-pricing system is supposed to go into effect on October 1. And federal price supports are supposed to end on Dec. 31. But a key congressional committee has approved a bill that would stifle both of these reforms. Another congressional committee is expected to vote soon on a bill that would expand a milk cartel of six northeastern states to as many as 27 states; if Congress does nothing, the cartel would disappear on October 1.

Congress should leave the reforms in place and let the milk cartel ride into the sunset. Monkeying with the free market has raised prices for consumers and hasn't kept marginal dairy farms from going bankrupt.

This next editorial is from the July 29, 1999 Chicago Tribune:

The U.S. justifiably accuses Europe of protectionism when it comes to beef and bananas. But when lamb and milk are on the menu, the accuser stands accused. The Clinton administration just slapped tariffs on lamb imports from Australia and New Zealand to protect U.S. sheep producers. That's outrageous and makes a mockery of the case the U.S. is trying to build that phasing out agricultural subsidies must be a priority when the next round of World Trade Organization negotiations is launched in Seattle this November.

But as outrageous as the lamb tariffs are, they pale in comparison to the mischief currently afoot in Congress to extend and expand what can only be called domestic protectionism in milk pricing. Who needs the rest of the world for a trade war? If some in Congress have their way, we'll soon have our very own All-American trade war, pitting the Midwest against the Northeast and the South while needlessly raising milk prices for consumers.

The facts are these: As part of the 1996 Federal Agriculture Improvement and Reform (FAIR) Act, the decades-old milk price support program was to be phased out over three years and the Department of Agriculture was ordered by Congress to reform its unfathomable pricing system. The farm bill also created a "temporary" milk cartel among six New England states—which account for all of 3 percent of U.S. milk production—to keep less expensive milk out of that region. The rationale was that small family-owned dairy farms in those states needed an adjustment period to prepare them for free-market competition come October 1999 when the cartel would expire.

Now there is an effort in Congress to roll back the USDA pricing reforms, to extend the life of the New England cartel beyond October and expand it to include six other states, including New York and Pennsylvania. And 15 southern states say that, in

order to compete with their brethren to the north, well, they're going to need a cartel of their own. Follow the map west to see where this is headed. There are about 9,000 dairy farmers in America—40,000 of them are in the upper Midwest and, at some point, why shouldn't they have a cartel too? And, of course, the West will need one to compete with all the others. Don't do it, Congress. The FAIR Act properly and at long last got Washington out of the milk business. Let the market work."

This editorial is from the April 3, 1999 edition of the Boston Herald:

The federal government is reorganizing its milk cartels, and that made news this week. Every bit of attention that can be focused on this absurd system of price controls ought to be considered help, no matter how small, toward eventual abolition. The Agriculture Department has a new set of price-setting formulas, which it estimates will reduce the national average price by 2 cent a gallon, and is consolidating regional cartels to make 11 cover the country instead of the previous 31.

Nothing fundamental will change. The "marketing order" regions are protected markets for farmers—all dairies in one must pay the same government-dictated price to farmers. It is illegal to ship milk from one region to another. Nothing else in the economy is sold like this—not even essentials like gasoline or shoes. The effect is to keep prices higher than they would be otherwise and transfer wealth from families with children to dairy farmers. The farmers, the productivity of whose cows just keeps increasing, argue in essence they ought not to be driven out of business by economic forces.

If we accepted that as a principle, we'd be subsidizing manufacturers of gas lamps and buggy whips.

This editorial is from the July 17, 1999 edition of the Kansas City Star:

In 1996, Congress ordered the administration to simplify the pricing of milk. That's easy enough: Stop regulating it. But this is the farm sector, and a free market in milk is somehow inconceivable. Instead, milk prices are calculated from rules and equations filling several volumes of the Code of Federal Regulations.

The administration's proposed reform would reduce the number of regions for which the price of wholesale milk is regulated from 33 to 11. Fine, but it would also perpetuate the loopy, Depression-era notion that the price of milk should be based in part on its distance from Eau Claire, Wisconsin. Under current policy, producers farther away from this supposed heart of the dairy region generally receives higher premiums, or "differentials."

The administration called for slightly lower differentials for beverage milk in many regions, but in Congress even this minuscule step toward rationality is being swept aside. The House Agriculture committee has substituted a measure that essentially maintains the status quo. Similar moves are afoot in the Senate.

Worse, some dairy supporters are working to reauthorize and expand the Northeast Interstate Dairy Compact, a regional milk cartel, and allow a similar grouping for Southern states. Missouri's legislature, by the way, has already voted to join a Southern compact, even though it would result in higher prices for consumers. The Consumer Federation of America reports that the Northeast Compact raised retail milk prices an average of 15 cents a gallon over two years.

Kansas lawmakers gave tentative approval to participation in a compact but would have to act again to make the decision final. Dairy producers concerned about the long view should be worried. Critics point out that the higher milk differentials endorsed by the House Agriculture Committee may well lead to lower revenue for many producers. This is because the higher prices will encourage more production, driving down the "base" milk prices and negating the higher differential.

The worse idea in this developing stew is the prospect of dairy-compact proliferation. A compact works like an internal tariff. Because the cartel prohibits sales above an agreed-upon floor price, producers within the region are protected from would-be-outside competitors. Opponents point out that more regional compacts—and the higher prices they support—will breed excessive production, creating surplus dairy products that will be dumped in the markets of other regions. This will prompt other states to demand similar protection, promoting the spread of dairy compacts.

Ultimately, as in the 1980s, political pressure will build to liquidate the dairy surplus in a huge, multibillion-dollar buyout of cheese, milk powder and even entire herds . . . Congress should permit the Northeast Compact to "sunset," or expire, which will occur if the lawmakers simply do nothing. In fact, doing nothing to the administration's proposal seems the best choice in this case, or more properly, the least bad. Perhaps some day Washington will debate real price simplification, as in ditching dairy socialism and letting prices fluctuate according to supply and demand.

This editorial is from the September 14, 1999 edition of the *San Antonio Express-News*:

During the Depression, when it was impractical to truck milk long distances from dairy farms to processing plants, Congress devised a system of price supports that flattened the price farmers—and consumers—paid for milk. That system, still in place, pays dairy farmers more for milk the farther they are from Eau Claire, Wisconsin, the "center," said Congress in the 1930s, of the dairy industry.

While refrigerated trucks and modern dairy farms make the system arcane, Congress preserved it until 1996, when it ordered the Agriculture Department to phase it out. Price supports are scheduled to end December 31. However, Congress is toying with keeping them and adding to the mess by creating a new dairy compact.

There already is a Northeast compact, designed to help family farms. However, it helps large dairy farms more than small ones and adds from 50 cents to \$1 to the price of a gallon of milk. This not only negatively impacts families, but also child nutrition programs. The Northeast dairy compact also was supposed to die December 31, but some members of Congress now want to create a Southern compact . . . Let the dairy price supports expire and don't create a new Southern dairy compact.

This editorial is from the September 20th edition of the *Florida Time-Union*:

There is a good lesson to learn as reformers in Congress continue efforts to end milk subsidies. The lesson is that a government handout, once in place, is as close to having eternal life as anything on earth. Millions of consumers would benefit from the end of dairy price supports and milk marketing orders, but hundreds of wellheeled milk mag-

nates would have a little taken off the bottom line, perhaps.

Every product that contains any milk costs more because of them. Like most subsidies, it involves a double cost: higher taxes and higher prices. Even those who are lactose intolerant are injured by the subsidies. For example, taxpayers get hit hard when they buy milk for the Women, Infants and Children program and school lunches.

People with food stamps get hurt because they pay more for milk and therefore have less for other staples. The industry's lobbyists stalk the halls of Congress carrying tales of woe about the diminishing number of dairy cows. Yet, they rarely talk about the nearly four-fold increase in milk from each cow that occurred between 1940 and 1996.

The federal government got into the dairy business in 1933. Citizens Against Government Waste notes that the excuse was to relieve the existing national economic emergency by increasing agricultural purchasing power.

Call Washington: The Great Depression has ended.

Price supports and marketing orders are part of a . . . system rivaling anything devised in the old Kremlin's central planning office. They cut off the dairy farmer from the realities of the market, causing overproduction and waste, with the government trying to clean up its mess by buying huge stockpiles of cheese or even entire dairy herds. Price supports are winding down because of the 1996 Farm Bill, but marketing orders remain.

Clinging to the days when long-distance refrigeration was a potential problem, the order include differential pricing based on how far manufacturing plants are from Eau Claire, Wisconsin, which makes that hamlet the center of the dairy universe for no logical reason. That translates into 35 cents more per gallon of milk for Florida residents, Citizens Against Government Waste says. Parents can do the math.

Lobbyists succeeded in muddying the 1996 bill. Congress should now revisit the law and improve on the improvements. There simply is no rational reason for the federal government to set the price of milk. End the milk tax.

This one is from the September 24, 1999 of the *Christian Science Monitor*:

No one can dispute the difficulties many family farms face today, problems farmers have struggled with this entire century. For many, farming is more than just earning a living, it's a way of life and a connection with the land. The nation, too, has a stake in preserving farms. But at what price? It's mistake to argue that agriculture can be insulated from shifting market forces forever. Government can help farmers adjust but not always survive.

This week saw Congress swing backward in its own mandate to update a federal system of setting milk prices that currently props up many dairy farms. It's not a minor issue: Dairy sales make up roughly 10 percent of American farm income. The House voted Wednesday to block the Agriculture Department (USDA) from modernizing the 1937 pricing system in which dairy farmers get higher prices for raw milk the farther they live from Eau Claire, Wisconsin. (Then considered the "center" of dairy farming.) The idea back then was to ensure fresh milk supplies nationwide. But with modern refrigeration and transportation, it's obsolete.

A 1996 law handed USDA the job of devising and implementing a new system since Congress, representing competing interests,

couldn't get it done. The 1937 system expires October 1. While the USDA plan is more market-friendly, it's only a first step. It simplifies pricing and narrows disparities between efficient Midwestern farmers and less-efficient ones elsewhere that can get up to \$3 more per 100 pounds of milk. But in doing so, it would remove a \$200 million, consumer-paid subsidy, potentially driving many Northeastern and Southern dairy farmers out of business.

The House scrapped the Eau Claire system, but left in place pricing that hurts consumers, who pay artificially high prices for milk. The Senate shouldn't follow suit; if it does, the President should veto the bill. Meanwhile, Vermont's senators are spearheading an effort to renew the federally authorized Northeast Dairy Compact, which is expiring. Separate from the USDA pricing system, the compact allows regional officials to set higher prices for milk. Some Southern senators want a similar cartel.

Yet all this price-fixing has failed to halt the decline of inefficient dairy farms. Between 1992 and 1998, the number of dairy farms fell about 5 percent a year to 91,508. Price-fixing only drags out the difficult process at consumer expense.

This editorial is from the April 29, 1999 of the *Cincinnati Enquirer*:

Three years ago, Congress busted its bib-overall buttons with pride after it planted a few seeds of agricultural reform in the Freedom to Farm Act. Problem is, nobody's remembered to water them since. That neglect is placing a huge economic burden on farmers, says Representative John Boehner.

The bill, co-written by Mr. Boehner, began to phase out some farm subsidies over seven years to create a free-market structure for agriculture that reflected America's economic reality. So far, so good. But the other part of the deal, Mr. Boehner points out, was the federal government was supposed to help farmers through the transition by opening new markets for their goods, cutting estate taxes and easing the regulatory burden on farmers.

What's happened? Nothing, of course. President Clinton has made some occasional noises about the need to "tear down barriers, open markets and expand trade," but administration officials conveniently forgot that part—and Congress hasn't been exactly diligent in reminding them. In fact, the White House only made matters worse—notably with a new set of costly federal environmental mandates on farmers announced last month. . . .

On Tuesday, Mr. Boehner sounded the alarm on legislative efforts to renew one interstate price-fixing dairy compact and to create a new one. Such deals "are bad for consumers, bad for farmers and bad for the future of American agriculture," he said. It would be another step backward from free-market reform—a troubling turn of events. And so the Freedom to Farm Act itself has been left to take the rap for farmers' woes—low prices resulting from a record harvest, coupled with overseas financial crises. The news is terrible: Kansas farm income plunged 72 percent last year, the Kansas Farm Management Association announced Tuesday.

"Farmers today are having a tough time, and Washington's inaction on this forgotten side of Freedom to Farm is making it even tougher," says Mr. Boehner, who's virtually alone in criticizing this federal foul-up. "It is fundamentally wrong for the Clinton administration to make Freedom to Farm the scapegoat for its own failure to deliver on its promises to farmers."

He says Mr. Clinton ought to help Congress with trade, estate-tax and regulatory relief legislation instead of throwing up roadblocks and imposing new sets of rules on farmers. Mr. Boehner is right, and his colleagues should join him in putting the pressure on the White House. As reforms go, Freedom to Farm was pretty tame, a watered-down compromise that left a lot of pet projects intact.

But it did manage to break federal precedent, by starting to reverse 60 years of Depression-era subsidies and controls that made little sense once America recovered from economic devastation. Now, those modest gains are in danger from a rule-happy, control-freak administration, enabled by a complacent Congress. . . .

Finally, the last editorial I'm going to read is from Wednesday's edition of the Washington Post. It says:

This is a Congress that began with lofty discussions of saving Social Security, modernizing Medicare, etc. But all legislatures come back to the fundamentals in the end. Among the few issues that remained as the two chambers were completing their work—right up there with U.N. dues and Third World debt relief—was milk price supports.

Somewhere in the final mega-bills will be provisions allowing New England to maintain a dairy compact that keeps milk prices artificially high, and abandoning a modest reform that Congress itself virtuously ordered a few years ago reducing such supports elsewhere in the country. These provisions are brought to you by people who in other contexts present themselves as foes of government regulation. But they like it well enough when it produces what they want—extorting higher prices for milk, for example.

In the Freedom to Farm Act of 1996, while reducing supports for other crops, Congress called for a study of the milk marketing order system, which props up prices at the checkout counter. The study produced a recommendation that the system be preserved but eased. Even that seems too much for the milk folks in Congress. Though the issue was still in play, it appeared last night they would succeed in keeping the old system intact. It's just like the emergency aid they've doled out to producers of other crops in the past two years, repealing by another name the reduced supports in Freedom to Farm. Meanwhile, the New England compact, which was due to expire, will be allowed to remain in effect for two more years.

The result will be to transfer hundreds of millions of dollars from consumers to inefficient producers who couldn't otherwise compete. By definition, most of the benefit will go to larger producers. The impact will be disproportionately felt by lower-income consumers. It will be evident inside government feeding programs as well, including that for low-income women, infants and children; the available dollars will buy less. It's a fitting testament to the instincts of a Congress that, from the standpoint of the public interest, can't go home soon enough.

Mr. President, the editorial boards have got it right this time, and now is the time to end these distortions and fundamental unfairness in dairy markets before it gets worse.

Mr. President, I wanted to take a moment to thank the majority leader and the Democratic leader for taking the time to work with us. I appreciated all their help and support in working with my colleagues, Senators KOHL,

WELLSTONE, and FEINGOLD. We don't see eye to eye on every issue, but on something as important to our States as this, I appreciated the opportunity to work with them.

I want to say that any Senator who has one ounce of support for the capital market, the free market system, they could not support this part of the dairy provisions. The Northeast Dairy Compact and the bill, H.R. 1402, is unacceptable. I am not happy with this bill, but I am glad the majority leader has recognized the problem and has offered to work with us in the months ahead. I appreciate that. When we look at Freedom to Farm—the bill that passed—it says we should compete in the open marketplace, go head to head. The best person and the best farmer who can be competitive is going to win.

Now, we should not be pitting our dairy farmers one against the other through an unfair, archaic Government program. Let our dairy farmers compete head to head in the marketplace, but let's not have Government pick winners and losers. I have worked closely with Senator JEFFORDS from Vermont. I told him, after we had a vote on the floor dealing with the Northeast Dairy Compact, I wasn't satisfied with that, as well, and we needed to get together and work out something where our dairy farmers are not put at a disadvantage, one against the other.

Again, I appreciate all the efforts that have been put into this. I look forward to working with all our colleagues next year to try to bring some kind of fairness to this dairy program, as we have done with other farmers. We should not leave dairy unanswered. I thank everybody for their help, and I look forward to working with colleagues to make sure we can work out a fair bill that will satisfy everybody when it comes to dairy.

I yield the floor.

The PRESIDING OFFICER. The distinguished Senator from Texas is recognized.

Mr. GRAMM. Mr. President, what we have before us is not the answer to our prayers, but it is what we call in politics "consensus."

Margaret Thatcher said of consensus:

To me, consensus seems to be the process of abandoning all beliefs, principles, values, and policies in search of something in which no one believes.

Well, I would like to say to our dear colleagues, Senator KOHL and Senator GRAMS, that I do not support dairy compacts. There are two sides to every issue, and I know we have people on both sides. In this case, however, at least in my mind, there is a right side and a wrong side. Dairy compacts would make a Soviet commissar blush. The idea of allowing a regional group of producers to conspire, with Government support, and set prices is an absolute outrage. We ought to be ashamed

of it, especially having passed Freedom to Farm.

I share the outrage of my two colleagues. I just want to say to Rod GRAMS and Herb KOHL, on this issue, not only did they fight for their States but for every consumer across this country. Senator BYRD, if the great general had been from Wisconsin it would have been a much shorter war, from a historians point of view, and that would have meant a much better outcome from a humanitarian's point of view. In any case, we have had people here who stood up and fought for what they believed in, what was right for their States. In this body we still honor those people. I commend both Senator KOHL and Senator GRAMS.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I have had the good fortune, in the past several days, to work to resolve many issues. We have made some progress. I want to say that what we have seen in the last few days could not be a better illustration of what politics and Government is all about. I say that in a positive fashion. We have had people from the State of Wisconsin and the State of Minnesota fighting for what they believe is right. The Constitution was developed to protect the minority, not the majority. The majority can always protect themselves.

The Constitution is set up, especially through the Senate, to always protect the minority. That is what they were doing, protecting themselves. They, in effect, didn't get a fair deal in this omnibus bill.

About the Senator from Wisconsin, there have been a number of things said, especially by the Senator from West Virginia. I underscore and applaud that. We have to make sure the other Senator from Wisconsin is also recognized. They have both been stalwarts in this battle.

I direct everybody's attention to yesterday's CONGRESSIONAL RECORD. On page S14794, there was a statement made by Senator KOHL. If anyone is ever concerned about what the free enterprise system is all about, read what Senator KOHL said yesterday on the Senate floor. That is what this debate has been all about—about the free enterprise system in this great country of ours.

In effect, what the Senators from Wisconsin have been fighting about is whether or not the free enterprise system is going to be circumvented by a cartel, a deal that has been, in effect, condoned, underlined, and set forth by the Federal Government. It should not be. So I direct everyone's attention to this. I appreciate very much the cooperation of the Senators from Wisconsin and especially the Senator from Minnesota, Mr. WELLSTONE. He has fought long and hard, and he has been on this floor for the last several days.

To my friends from Minnesota and Wisconsin, I appreciate their recognizing that they have rights. They have done everything they could to protect their rights under the Constitution.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. WELLSTONE. Mr. President, I am going to defer to Senator KOHL, and I will follow him and Senator FEINGOLD. I have literally 30 seconds.

I yield to Senator KOHL.

Mr. KOHL. Mr. President, I sincerely thank all of my colleagues who have spoken up this afternoon. It has been remarkable to hear Senators from both sides of the aisle express themselves in such a heartwarming way, and I think in such a fair and clear way with respect to this country of ours and how our economy works and how it is intended to work.

It is remarkable to me that all these leaders have made clear that while we are passing dairy legislation this afternoon, it is of necessity, and not because they and we believe in the specifics of that legislation. It is heartwarming for me to know that when we come back next year, we apparently have common agreement on both sides of the aisle that we are going to work together to come up with dairy legislation that more clearly and fairly represents the interests not only of the different parts of our country in terms of our States and regions but more clearly represents the real intentions of our Constitution with respect to how this economy is supposed to work and how the free enterprise system is supposed to work.

It has been a long, hard fight for myself, Senator FEINGOLD, Senator WELLSTONE, Senator GRAMS, and others. Certainly, what happened here this afternoon, in my opinion, justifies that fight and leaves me feeling very good about my colleagues on both sides of the aisle and feeling very optimistic about the things we can look forward to next year.

I yield the floor.

The PRESIDING OFFICER. The distinguished Senator from Wisconsin is recognized.

Mr. FEINGOLD. Mr. President, I thank all the people that have participated in the colloquy for their kind words about our effort and for coming to the floor to say it. My primary purpose in rising at this point is to praise my senior colleague, Senator KOHL.

The words that have been said about many in this effort are true. But I want everyone to know that this was not an effort that he initiated a week ago, or 2 weeks ago, or 2 years ago. Every single day since I have been in the Senate I have found working with Senator KOHL on this critical issue to be one of the best opportunities to work with another Senator together for our State. This has been certainly the most dramatic example. But it is an example

also of the tenaciousness that Senator KOHL has on behalf of our dairy farmers.

Both he and I spent our entire youth in Wisconsin. He and I both know that in 1950 there were 150,000 dairy farms in this Wisconsin. Now there are less than 23,000. Over that time you begin to realize that some of the old dairy policies maybe once worked but now, frankly, are absurd. The notion of having this difference between the class I milk across the country based on issues that refrigeration and transportation that stopped existing decades ago makes no sense. The idea of a dairy cartel in one part of the country and a system that is supposed to be based on national economy and free enterprise is also ridiculous.

We know this Congress asked that the Department of Agriculture take a look at these issues, and said: What do you think we ought to do? They came back with a conclusion to narrow those differentials and get rid of the compact. Over 90 percent of the producers in the country said that is the right idea. That is why Senator KOHL and I fought so hard, because it wasn't just our idea. It wasn't just Wisconsin. It was a national consensus.

Unfortunately, I think this Congress has very inappropriately overturned that. And Senator KOHL and I will not give up until we have had the opportunity to reverse this unfortunate decision.

But I want to join with my senior colleague in thanking everyone for their courtesies on this. We obviously could have taken this to an even greater extent, and we realize the issues that are involved in that. This is a very important issue to not only Wisconsin, but to Minnesota, and to other States. We certainly will be back early next year to continue the battle.

I yield the floor.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. WELLSTONE. Mr. President, first of all, I also would like to thank all of my colleagues. I appreciate their comments.

I think the only thing I say that might be a little different is I remain pretty skeptical, to be honest. I am glad to hear what my colleagues have said. I think that is real progress. We are talking about working together. I think we are very committed—I say this to Senator KOHL, to Senator FEINGOLD, and to Senator GRAMS—to making sure that working together leads to a product. We have to change what we have right now because the compact blocking the milk marketing order reform has a disastrous impact on our dairy farms.

I come from a State where we lose about three dairy farms a day. I appreciate the comments that have been made. I know the Senators who have made them have made them in good

faith. That gives me confidence. On the other hand, given what has happened, permit me to be skeptical until we see the product. The proof is in the pudding.

Finally, since my colleague from Texas mentioned the Freedom to Farm bill—what some of us call the “freedom to fail” bill—I think dairy is part, just part of it. We have to write a new farm bill. We have a failed farm policy. We have to change this. We are going to press hard to do so.

Thank you very much. I yield the floor.

Mr. JEFFORDS. Mr. President, I must set the record straight with regard to the Northeast Interstate Dairy Compact. Rarely in all my years in Congress have I witnessed such ill-considered comment and media hysteria as has occurred over the Dairy Compact in these last few days.

I recognize that my Senate colleagues from the Midwest are, very understandably, raising the dairy issue to a new level of concern and I welcome the opportunity to respond to their call for productive changes in our dairy policy. As for my media friends, I appreciate the heightened scrutiny of our dairy policy, because we in the northeast share a common concern with our Midwestern Senate colleagues over the current state of our nation's dairy policy.

To my Senate colleagues from the Midwest: I have worked on the dairy issue for all of my twenty-four years in the Congress. More than most, I appreciate the complexity and difficulty of this issue. There is nothing I would like more than to join with you in common cause to improve our nation's dairy policy.

But let us be frank with each other. The key issue that has divided us in all my time here, and which continues to divide us, is your insistence that the Midwest should somehow be seen as the source of our nation's supply of fluid, or beverage, milk.

This insistence has been and still remains simply contrary to the overwhelming will of this Congress. And this is not just an issue that divides the northeast and the Midwest; this is an issue that divides the Midwest from the rest of the country.

The universal constituencies of every member of Congress, from every region including your own, demand a local supply of fluid milk. This is not a free market issue, not merely an issue of the best interests of dairy farmers.

The real issue is the very nature of our basic food supply and so extends way beyond the mere interest of a single constituent group. Regionally and on behalf of the nation as a whole, the Congress simply will not yield to the destruction of our local supplies of fresh, wholesome drinking milk, and the inevitable result of the consumption of reconstituted milk.

For now and for the foreseeable future, our nation's dairy policy will be based on the maintenance of local, regional supplies of fluid milk. You must recognize that we cannot compromise on this issue.

This fact must and will define our national policy. The Midwest will never be called upon to provide the supply of fluid milk for the rest of the country.

And so I call upon my Senate colleagues from the Midwest to look elsewhere than to reformation of the fluid marketplace for a solution to the problems your dairy industry faces. I make this call in the spirit of cooperation and with a positive spirit.

To my media friends: I welcome this opportunity to respond to the specifics of the various misstatements and misinformation contained in the most recent descriptions of the Dairy Compact. Before doing so, I would like first to highlight for you a simple and incontrovertible fact about the Dairy Compact:

Twenty-five of our fifty states have now passed dairy compact legislation patterned after the original compact language first adopted by the Vermont legislature in 1987. This means that twenty-five legislatures and twenty-five governors (more, if you count the number of governors who have supported the bill over the years) have committed their active support to this unique legislation.

With this important fact in the background, I would like to respond to the charges and assertions that have recently been raised against the Dairy Compact.

For purposes of this discussion, I will address directly the substance of the editorial that appeared yesterday in the Wall Street Journal. To summarize the editorial, the Dairy Compact is a "price fixing cartel" which benefits "inefficient" Vermont dairy farmers unfairly at the expense of their more efficient Upper Midwest counterparts.

To compound this misery, the Compact unduly burdens milk consumers in the northeast, particularly the most vulnerable "poor children", "to the tune of 20 cents a gallon."

Now I would like first generally to ask this body: Who in their right mind would support such a clearly wrong-headed policy as so characterized by the Wall Street Journal? Who could support any measure which pits a relatively small number of farmers against a vastly greater constituency of consumers, and which disadvantages our most vulnerable citizens?

Certainly not the twenty-five state legislatures and governors which have adopted Compact legislation. And certainly not the 40 Senators and over 160 House Members who co-sponsored legislation to approve Compact legislation here in the Congress.

Certainly not the Compact's bipartisan supporters in the Congress and

around the country, who represent the country's most rural and most urban constituencies. And such an initiative could never have been embraced simultaneously by our nation's most divergent regions—the northeast and the deep south.

Just look at the list of co-sponsors here in the Senate. Senator JESSE HELMS joins Senator TED KENNEDY. Senator SCHUMER from New York is a co-sponsor along with Senator THURMOND from South Carolina. Need I say more about the diversity of support for the Compact?

And so I call upon the media to look at the Compact with a fresh gaze. If you will do so, I think you will find that the reason for this unusual if not truly unique support for the Compact is really quite simple: The Compact manages to respond simultaneously to all of the divergent interests at play in today's dairy marketplace.

The Compact does not just respond to the needs of dairy farmers. Consumers, processors, retailers, as well as farmers, all find their place in the regulatory process created by the Compact.

Because the consumer ultimately pays, the consumer controls the decision as to whether the price should be raised. Perhaps most importantly, because the Compact is made up of individual sovereign states, the sovereign right of each state to control its own regulatory fate is ultimately protected by the Compact.

In short, the Compact truly promotes the public interest. Let me see if I can further advance the discussion by clearing up at least some of the cloud of confusion which the Journal and others have cast around the Compact.

Let's begin with the claim that the Compact is a "price-fixing cartel". Along with the Journal, the Washington Post also yesterday referred to the Compact as a "cartel" in an editorial. And our supposed "newspaper of record", The New York Times, has repeatedly described the Compact as a cartel in its coverage of the Compact.

For the benefit of all these erudite commentators whose stock in trade is the precise use of the English language, let's consider the dictionary definition of a cartel. Webster's dictionary defines "cartel" as follows

(1) a written agreement between belligerent nations; (2) a combination of independent commercial enterprises designed to limit competition; (3) a combination of political groups for common action.

The definition contained in the Random House dictionary similarly describes a "cartel" as:

(1) an international syndicate, combine, or trust generally formed to regulate prices and output in some field of business; (2) a written agreement between belligerents, esp. for the exchange of prisoners; (3) (in French or Belgian politics) a group acting as a unit toward a common goal; (4) a written challenge to a duel.

Notwithstanding use of this term by our most respected media commenta-

tors, it becomes quickly obvious that the Compact in no way shape or form resembles such a "cartel."

Indeed, were I to challenge these commentators to a duel in writing, that absurd challenge would actually be a more accurate use of the term cartel than is their use of the term to describe the Compact.

I guess our political commentators have now tilted so far away in their zeal to embrace the so-called free market that they recognize no role for the government in regulating the marketplace. Or, I guess, they simply no longer trust the government.

Even so, is their distrust of government so great that they cannot give even simple recognition to the simple distinction between businesses price-fixing for private gain and states regulating in the public interest?

Such regulation in the public interest, which provides the basis for the Compact, is central to our system of government. Even the most ardent free-marketeers recognize the need for the government to play at least some role in the policing of the marketplace in the public interest.

The basic function of the Compact is this: To determine whether the price received by dairy farmers must be adjusted in the public interest. Not solely in the interest of farmers, but in the public interest of all those who participate in the fluid milk marketplace—processors, wholesalers, retailers and consumers, including low-income consumers.

Adjustment may mean an increase in price, or simply stability in price. Presently, the Compact provides for both some increase in price as well as price stability.

I will address the various concerns raised by the increase in price in a minute, but first I would like to address the issue of price stability, because it brings home the fact that the Compact serves the larger public interest, of which farmers comprise only one part.

Various stories have alluded to the problem of erratic wholesale prices and their adverse impact on consumers.

Indeed, nobody really benefits, other than retailers, from an increasingly market-driven farm price for milk. This is an issue addressed by the Compact. The Compact, in the public interest, provides for price stability, to the benefit of all market participants. (Even retailers.)

Now about the increase in price resulting from operation of the Compact in New England. Here are some simple numbers. Over the last two years, the Compact has raised the price of farm milk by no more than ten cents per gallon. No more than ten cents. Not twenty cents, as we have heard over and over and over and over. As they say, you could look it up, so let me repeat: Ten cents. Period.

And that is just the impact on the farm price. What of the impact on consumer prices. You can look this up, as well. If you do so, you will find that prices in New England are actually lower than in the corresponding New York City market, where the Compact is not in place.

And what of the impact on "poor children"? Under current operation of the Compact, the WIC program and the School Lunch Program are both exempt. There is no impact on participants in these programs. Let me repeat: No impact on participants in the WIC and School Lunch programs. Period.

In conclusion, let me again speak directly to my troubled colleagues from the Upper Midwest.

As we look to the new millennium and our future, I wish my Midwestern colleagues again to understand that I will strive to work with them in common purpose. Our farmers from the northeast and Midwest are so similar. They are among the yeoman farmers who built this country so proud. We must be responsive to their common plight. Surely we should be able to reason together based on those issues we share in common rather than continue to dispute over issues which divide us.

In all the recent discussion about the Dairy Compact, one key fact seems to have gotten overlooked. Twenty-five of our fifty states have now passed dairy compact legislation. One-half of the states have embraced the Compact idea.

This means that twenty-five state legislatures and twenty-five governors (more, if you count the number of governors who have supported the bill over the years) have adopted the Compact approach as the best way to solve the dairy issue we all find so vexing.

I call upon my colleagues, especially those Members on my side of the aisle, to give due deference to the rights of the states to assist the Congress in defining policy. The states have spoken and are telling us that the free marketplace does not work with dairy pricing. We should listen to their wise counsel.

These Interstate Compacts are not all about dairy policy, but about the rights of states to work together under the compact clause of the constitution. It's a states right issue that deserves to be heard and understood. I hope my colleagues will take the time to understand the law and the purpose of this important state initiative.

I fully believe that those Members who have today spoken against them may see Dairy Compacts in a new light if they will view them from the perspective of the states which have adopted them. Instead of seeing cartels, they will see a regulatory framework that operates in the public interest. Instead of seeing a system of price supports that works only for dairy farmers, they will see a regulatory

mechanism that benefits all the citizens of the states—consumers, processors and farmers, alike.

This is the way our federalist system is supposed to work—the states talk and we listen. As an issue of states rights, I urge the Judiciary Committee to take this issue up when next we consider it.

TICKET TO WORK AND WORK INCENTIVES IMPROVEMENT ACT OF 1999—CONFERENCE REPORT—Continued

Mr. ROTH. Mr. President, I am pleased with the progress we have made in two very important areas on issues that will affect the lives of Americans everywhere. This legislation—the Ticket to Work and Work Incentives Improvement Act of 1999—will go a long way toward improving the quality of life for millions of Americans with disabilities. At the same time, important provisions within this legislation—provisions that extend important tax and trade relief provisions—will bring meaningful relief and increased opportunities to individuals and families. The Ticket to Work and Work Incentives Improvement Act will help Americans with disabilities live richer, more productive lives. Its core purpose is to assist disabled individuals in returning to work. It removes the real risk many people with disabilities face of losing their health insurance, and it provides new ways of helping them find and keep meaningful employment.

Is there any question how important this is?

Millions of Americans with disabilities are waiting for the vote. They are waiting to be freed from a disability system that stifles initiative and thwarts productivity rather than rewarding them—a system that tells individuals with disabilities that if they leave their homes and try to find productive employment they will lose their access to health insurance. The current system isn't right, Mr. President. It isn't productive. And it certainly is not ennobling.

Under current law, if a person with a disability wants to return to work—even taking a job with modest earnings—he or she will jeopardize access to insurance coverage through the Medicaid and Medicare programs. And as many individuals with disabilities have difficulties securing private sector insurance coverage, losing access to Medicaid or Medicare is not an option. In fact, it's a tragic consequence for many people with medical conditions that demand ongoing treatment. As a result, the only recourse these individuals have is to forego the opportunity to work—to build and grow professionally and personally—and to stay at home.

No one, Mr. President, should be forced to choose between health care

and employment. Robbing an individual of the opportunity to work becomes a double tragedy in the life of someone who is living with a disability. It's been said that work is the process by which dreams become realities. It is the process by which idle visions become dynamic achievements. Work spells the difference in the life of a man or woman. It stretches minds, utilizes skills and lifts us from mediocrity.

No one should have to choose between health care and work, and passage of the Work Incentives Improvement Act will make that choice unnecessary. By acting on this legislation today, the Senate will offer new promise to millions of Americans with disabilities. This legislation will help promote their independence and personal growth. It will help restore confidence and meaning in their lives—and greater security in the lives of their families.

But this legislation is not about big government. We do not tell the states what they must do. There are no mandates. And we do not tell individuals with disabilities what they must do. We create options. We create choices. And choice is the essence of independence, isn't it?

The unemployment rate among working-age adults with severe disabilities is nearly 75 percent. What a tragic consequence of errant public policy that discourages those who can and want to work from attaining their desires. It's my firm belief that this number will come down—it will come down dramatically as we pass this law allowing them to return to the workplace. My belief is based in part on the fact that over 300 groups of disability advocates, health care providers, and insurers endorse this change and are anxiously waiting for us to act.

These groups and individuals are not the only Americans watching what we do here today. Along with them, are countless other who are looking to this legislation to extend important tax and trade relief provisions that are included in the work incentives bill.

These provisions are "must do" business. Like appropriations, extenders are provisions that we have an obligation to address before we conclude this session. They are necessary fixes to our Tax Code, and will go a long way toward helping families and creating greater economic opportunity in our communities.

Among the important provisions contained in these extenders is one that excludes nonrefundable tax credits from the alternative minimum tax ("AMT"). This change alone will insure that middle-income families receive the benefits of the \$500 per child tax credit, the HOPE Scholarship credit, the Lifetime Learning credit, the adoption credit, and the dependent care tax credit. In this legislation, such relief is extended through December 31, 2002.

Another important provision in this legislation extends and expands the tax credit for production of energy from wind and closed loop biomass. This important alternative energy provision expired on June 30, 1999. In this legislation, the tax credit is expanded to cover poultry litter-based biomass, and it is extended through December 31, 2001. For my home State of Delaware and many other poultry producing regions, this provision provides an important option for the disposition of poultry litter in a way that will be beneficial and productive.

Other important expiring tax provisions included in this legislation are a 5-year extension and enhancement of the research and development tax credit and the tax-free treatment of employer-provided educational assistance. I can't overstate how important the R&D credit is to the high-tech community and many other important leading American economic sectors. The extension offered in this legislation will give businesses the certainty they need and will result in more and higher paid jobs for American workers. And as far as employer-provided educational assistance, I've made it clear that my goal is to make this provision permanent and expand it to graduate education. I know this is an important goal for Senator MOYNIHAN as well. Over one million workers will benefit from this extension, and under this legislation, the provision is extended through the end of 2001 for undergraduate education.

But, Mr. President, important extenders do not stop here. This legislation will also extend incentives designed to help Americans move from welfare to work through the end of 2001. These incentives include the work opportunity tax credit and the welfare to work tax credit.

Other extenders include the active finance exception to Subpart F—a provision that puts our banks, insurance, and securities firms on equal footing with their foreign competitors in overseas markets—and five other important tax provisions that are scheduled to expire. These provisions, which are extended through the end of 2001, include the "brownfields" expanding treatment of environmental cleanup costs. In addition, the school repair and renovation costs of some school districts are met by an extension of the qualified zone academy bond program.

But the provisions included in this legislation are not limited to tax relief. We also include some important trade issues. For example, we extend the Generalized System of Preferences, as well as Trade Adjustment Assistance programs. Both of these trade provisions are extended through the end of 2001. Beyond these, there are several revenue raising provisions that we've included. Most of these, I am pleased to report, close loopholes in the Tax Code raising some \$3 billion in return.

When all is said and done with this legislation, Mr. President, I am pleased that the tax relief in this bill amounts to a net tax of \$15.8 billion over 5 years and \$18.4 billion over 10.

There's no question that what have before us is a dynamic piece of legislation. From providing hope and opportunity to Americans with disabilities to extending and expanding important tax provisions for individuals and families, this is a comprehensive package. It has been carefully constructed, debated, and addressed in conference. It include that efforts of many of our colleagues and countless hours of staff work.

I want to thank several Senators who have worked closely with me over the past year to bring the work incentives bill to the floor—Senators MOYNIHAN, JEFFORDS, KENNEDY, and BUNNING. Passage of the Work Incentives Improvement Act has been one of my top health care priorities during this Congress. It would have been impossible without close, productive, bipartisan cooperation. Likewise, the effort we've made to address the important tax and trade extenders. Without the work and cooperation of my distinguished friend and the Finance Committee's Ranking Democratic Member, Senator MOYNIHAN, we wouldn't be here today with a conference agreement.

In closing, let me also mention that there are two provisions in this bill outside the Finance Committee's jurisdiction, one dealing with the organ donor and the other dealing with a NOAA procurement matter. I ask my colleagues to join us in seeing that all of these important provisions are passed into law.

The PRESIDING OFFICER. The distinguished Senator from New York is recognized.

Mr. MOYNIHAN. Mr. President, I do wish there were more Members present that we might rise in a general applause to the Senator from Delaware, chairman of the Finance Committee. I refer to him as our revered colleague. This legislation could not be here, most of it would not have been conceived, without him. It is a triumph against what has become our procedures that it is here today and will shortly be approved.

Millions of Americans who will not know that he has done this will benefit from what he has done, and that, for him, will be sufficient knowledge and reward. I want to say that.

I don't want to speak at length because other Senators wish to join in this matter. I simply make two points. One is how very much I appreciate the chairman's mention of the importance of providing employer education assistance for graduate students. Go to any major metropolis in this country, any area where there is a college, and find night schools where young America and not so young come to acquire fur-

ther skills and greater economic capacity.

Nothing could be more clearly in our national interests. It will go on whether we have a tax credit or not, but on the margins, it is important, first, recognizing the need for new skills, recognizing the need for developing new areas. Send our own employees to graduate school. Let them get this further degree while they are on the job, come back, be promoted, earn more, and be more valuable.

I spoke with our friend, the House majority leader, Mr. ARMEY. Of course he is a distinguished economist. He noted the last 5 years he was teaching, he was teaching at night school and teaching people who wanted to be there. They didn't have to be there to play soccer—put it that way.

I would secondly like to note, and I know the chairman would agree, absent from our measure today are two matters reported from the Committee on Finance: The Africa Growth and Opportunity Act of 1999 and the Caribbean Basin Initiative. They came out of the Finance Committee as near matter unanimous as can be—under our chairman, things come out of our committee unanimous. We did not succeed given the complexities of these negotiations this time. We will be back. I hope these matters will be addressed. I know on our side of the aisle, if you will, in the House, Representative Rangel, the ranking member in Ways and Means, my counterpart, very much hopes this will happen, and so do I.

Mr. President, I would briefly note, for the RECORD, some important provision in this legislation.

With regard to tax extenders, this bill extends the research and experimentation credit for five years and it extends all other provisions through December 31, 2001. Extending these provisions as long as possible was simply the right thing to do—providing certainty to employers and workers.

Might I add that some of these provisions are vitally important to working families. If we do not, for instance, pass the alternative minimum tax provision, approximately 1.1 million Americans will lose part or all of the \$500 child credit, the HOPE scholarship credit, or other non-refundable credits. We also, rightfully so, extend the Welfare-to-work and the Work opportunity credits.

I would also like to clarify two matters with respect to a provision based on S. 213, which I introduced on January 19, 1999—and which is known as the rum cover-over provision. I am very pleased that we were able to increase from \$10.50 to \$13.25 the amount of excise taxes on rum that is transferred to Puerto Rico and the Virgin Islands. Unfortunately, procedural obstacles required a delay in most of the transfer from fiscal year 2000 to fiscal year 2001.

Instead, up to \$20 million will be transferred 15 days after enactment. The remainder of the amount will not, however, be transferred until after September 30, 2000. However, our distinguished Finance Committee Chairman, Senator ROTH, and Chairman ARCHER from the House Ways and Means Committee have made a commitment that, to the extent possible, the delayed payments will be accelerated, or interest on the delayed amounts will be provided for in the Africa and CBI legislation next year.

With respect to the second matter, the rum cover-over provision, as passed by this body on October 29, 1999, included an additional transfer of 50 cents from the government of Puerto Rico to the National Historic Conservation Trust of Puerto Rico—the purpose of which is the protection and enhancement of the natural resources of Puerto Rico. Unfortunately, the 50 cent transfer is not included in the legislation before us today. However, it is my understanding that the Governor of Puerto Rico, the Honorable Pedro Rossello, has made the commitment to transfer one-sixth (45 cents), of the increase provided by this legislation, to the Trust. I applaud the Governor for his commitment.

I am also very pleased that this legislation would remedy some of the barriers and disincentives that individuals enrolled in Federal disability programs face in returning to work. Many disabled Americans do not return to work because they must lose their health care coverage and because they have inadequate access to employment and rehabilitation services.

In 1986, we took our first step to remove obstacles facing disabled Americans who want to work. Our former Finance Committee Chairman and Majority Leader—Senator DOLE—introduced the Employment Opportunities for Disabled Americans Act to make permanent a demonstration project that enabled Supplemental Security Income—or “SSI” recipients to maintain Medicaid benefits during a transition to work. I was an original co-sponsor of the bill which was enacted on November 11, 1986. Building on that first step and other subsequent initiatives, Senators JEFFORDS, KENNEDY, ROTH and I introduced this work incentives bill in the Senate on January 28th of this year. The legislation has enjoyed overwhelming bipartisan support, passing the Senate 99–0 on June 16th and the House 412–9 on October 19.

The bill addresses an issue of paramount concern: how to encourage disabled individuals to return to work. Currently, less than one-half of one percent of individuals receiving disability benefits now leave the rolls and return to work. A survey by the National Organization on Disability found that only 29 percent of all disabled adults are employed full-time or part-

time, compared to 79 percent of the non-disabled adult population. The disabled find it difficult to work because if they earn income above a certain level, they lose their disability benefits and their health care coverage. In fact, witnesses testifying before the Finance Committee cited the potential loss of health care coverage as the primary obstacle between the disabled and their ability to work.

This legislation tries to remove this barrier by guaranteeing that working individuals with disabilities can maintain their Medicare and Medicaid coverage for a longer period of time. Under current law, Social Security disability beneficiaries, who go back to work and earn a modest income, may only continue their Medicare coverage for four years. This legislation would permit disabled workers to retain their Medicare coverage for an additional four and a half years.

Two important Medicaid provisions are included in this bill. The first would permit more lower-income disabled workers to pay premiums and buy into the Medicaid program. The second establishes a demonstration project that would provide Medicaid coverage to persons likely to become disabled without medical treatment. This is good common-sense policy: providing preventive health coverage to working individuals with serious medical conditions before such conditions worsen to a disabling level.

This legislation does more than just extend greater health care coverage to the disabled. Through a program called “Ticket to Work,” it would make it easier for disabled workers to access coordinated vocational rehabilitation and employment assistance services. It provides grants to States to develop the program infrastructure and to perform the outreach necessary to help disabled individuals to work. The legislation would also ensure that a mere return to work does not automatically trigger eligibility reviews that could result in being removed from the disability rolls. In addition, it would streamline the process for individuals to be reinstated for disability benefits, if they are unable to continue working.

Lastly, the bill funds Social Security demonstration projects on how best to encourage disabled individuals to return to work. For example, one innovative project will determine whether a sliding-scale reduction of disability benefits by \$1 for every \$2 earned would make it easier to go back to work. Such a result seems far more reasonable than the current situation where workers who earn income above a statutory limit lose their disability benefits entirely.

The overwhelming support for his legislation is not surprising given its simple and universal goal: providing disabled Americans the opportunity they deserve to work and contribute to

the fullest of their ability. For Americans with disabilities, enacting this legislation would take a great step forward in removing the many barriers they face in returning to work.

Before I conclude, Mr. President, I did want to mention that regrettably, this bill includes an extraneous provision delaying implementation of a new regulation to improve the Nation's system of allocating human organs for transplant.

Mr. President, I thank the Chairman for his commitment to this tax extenders and work incentive legislation. I would also like to thank the staffs of the Joint Committee on Taxation, the Senate Finance Committee and the House Way and Means and Commerce Committees. Now, let's go home.

Mr. ROTH. I yield 5 minutes to the distinguished Senator from Vermont.

The PRESIDING OFFICER. May the Chair ascertain how many minutes?

Mr. ROTH. I yield 5 minutes.

The PRESIDING OFFICER. The distinguished Senator from Vermont is recognized for 5 minutes.

PRIVILEGE OF THE FLOOR

Mr. JEFFORDS. Mr. President, first I ask unanimous consent Lu Zeph and Tom Valuck, fellows on my staff, be granted the privilege of the floor during consideration of the conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEFFORDS. Mr. President, I see the Senator from Iowa, with whom I have worked all these years, was here just a moment ago. I would like to wish him a happy 60th birthday. I am sure all of us would like to join in that, and I will move on now and get to the purpose of being here today.

Mr. President, I am thrilled that the Senate will soon send to the President the Work Incentives Improvement Act of 1999. This landmark legislation will open doors to jobs across the country for disabled Americans.

As we all know, the Federal Government often sets policies with the best of intentions, and the least of common sense. There are lots of examples, but today's policy for disability benefits takes the prize.

If you are disabled and don't work, you have access to federally funded health care. If you are disabled and you do work, you lose access to federally funded health care. Does it make any sense to you? No, it does not to me, either.

Access to health care is important to everyone, of course, but to severely disabled people it is absolutely vital for the everyday needs of life. And the price tag for this care can be astronomical.

Three years ago, this paradox was brought to my attention, and I began the process of trying to figure out how we could solve it.

I realized that, unless and until we gave individuals with disabilities access to health care, they would not,

could not work to their full potential. That is why I am so proud that we are on the verge of changing the law that will, at last, change the lives of 9.5 million individuals with disabilities who have been waiting, pleading that we take this step.

These millions of Americans want and will use the job training and job placement assistance that this legislation authorizes. They will benefit from the advice and guidance that will be available on the complicated work incentives options in Federal law. They will go to work, work longer hours, work more hours, and seek advancement knowing that their health care will be there when they need it.

For those who look beyond what this legislation means in human terms, to its monetary applications, I say, you will see results. The taxpayer rolls will expand. Use of Federal and State public assistance programs will decrease. Data on the health care needs and costs of working individuals with severe disabilities will be collected. Private employers and their insurers will have data from which they may calculate risks and craft health care insurance options for employees with disabilities.

This conference report represents sound federal policy. Last night our colleagues in the House, on a vote of 418 to 2, endorsed this policy. We must do the same. Let us celebrate and confirm the consensus we have achieved. Individuals with disabilities are waiting to show us how they are ready, willing, and able to join the workforce, support their families, and contribute to their communities and our national economy.

The action we are taking is the next logical step in our efforts to ensure that disabled Americans can fully participate in our society. In 1975 we guaranteed each child with a disability a free appropriate education through the precursor to the Individuals with Disabilities Education Act. In 1978, we prohibited discrimination based on disability in all services, programs, and employment offered by or through the federal government. In 1988, for the first time, we recognized and addressed the need to provide assistive technology to individuals with disabilities.

And in 1990, we enacted the most comprehensive civil rights law for individuals with disabilities, the Americans with Disabilities Act.

Each of these actions was a building block toward true independence for individuals with disabilities.

But the promise of employment rights under the ADA was an empty one for millions of Americans who couldn't afford to take advantage of their rights. Today, we are making good on that promise.

I want to again commend the principal cosponsors of this legislation, Senators KENNEDY, ROTH, and MOY-

NIHAN for their incredible contributions. Five months ago, the four of us joined President Clinton in a room just off the Senate floor to call for enactment of this legislation.

I was confident then that the day would soon come, and I am elated that it finally has. It is the end of the session, we are all tired, and some tempers are frayed. But Mr. President, as we conclude our work for the year and return to our states, this is one accomplishment of which we can all be proud.

The PRESIDING OFFICER. Who yields time?

The distinguished Senator from New York.

Mr. MOYNIHAN. Mr. President, I have the pleasure to yield up to 15 minutes to my good and old friend, the senior Senator from Massachusetts, who has been so instrumental in this matter.

The PRESIDING OFFICER. The distinguished Senator from Massachusetts is recognized for up to 15 minutes.

Mr. KENNEDY. Mr. President, I join with Senator MOYNIHAN and Senator ROTH in commending our colleagues on the Finance Committee for their strong work in helping bring us to where we are today. I thank them for their leadership.

I would especially like to acknowledge Senator JEFFORDS, who has been instrumental in the development of the legislation. And I, all of us on this side and throughout the Senate and across the country always recognize the real leader on all of the disability issues, our friend from Iowa, Senator HARKIN, who has had a lifetime of commitment on the issues of promoting the interests of disabled Americans. The Senate will welcome his comments this afternoon.

Today, Congress will complete action on the Ticket to Work and the Work Incentives Improvement Act, and this important legislation will go at long last to the White House. When President Clinton signs this bill into law, he will truly be signing a modern Declaration of Independence for millions of men and women with disabilities in communities across the country who will have a priceless new opportunity to fulfill their hopes and dreams of living independent and productive lives.

We know how far we have come in the ongoing battle over many decades to ensure that people with disabilities have the independence they need to be participating members of their communities.

Mr. President, 67 years ago this month we elected a disabled American to the highest office in the land. He became one of the greatest Presidents, but Franklin Roosevelt was compelled by the prevailing attitudes of his time to conceal his disability as much as possible. The World War II Generation began to change all that. The 1950s showed the Nation a new class of peo-

ple—people with disabilities—as veterans returned from the war to an inaccessible society. Each decade since then has brought significant progress.

In the 1960s, Congress responded with new architectural standards so we could build a society of which everyone could be a part.

The 1970s convinced us that full participation in society was needed, not only for disabled veterans but for disabled children and family members and for those injured in everyday accidents. Congress responded with a range of federally funded programs which improved the lives of people with mental retardation, supported the rights of children with disabilities to go to school, ensured the right of people with disabilities to vote, and gave people with disabilities greater access to health care.

The 1980s brought a new realization that when we are talking about assisting people with disabilities, we must not look only to Federal programs, but to the private sector as well. Congress again responded by guaranteeing fair housing opportunities for people with disabilities, by ensuring access to air travel, and making telecommunication advances available for people who are hard of hearing or deaf.

The 1990s brought us the Americans with Disabilities Act, which promised every disabled citizen a new and better life, in which disability would no longer put an end to the American dream.

But too often, for too many Americans, the promise of the ADA has been unfulfilled. Now, with this legislation, we will finally link civil rights clearly with health care. It isn't civil and it isn't right to send a person to work without the health care they need and deserve.

As Bob Dole stated in his eloquent testimony to the Finance Committee earlier this year, this issue is about people going to work—"it is about dignity and opportunity and all the things we talk about, when we talk about being an American."

Millions of disabled men and women in this country want to work and are able to work. But they have been denied the opportunity to work because they lack access to needed health care. As result, the Nation has been denied their talents and their contributions to our communities.

Current laws are an anachronism. Modern medicine and modern technology make it easier than ever before for disabled persons to have productive lives and careers. Current laws are often a greater obstacle to that goal than their disability itself. It's ridiculous that we punish disabled persons who dare to take a job by penalizing them financially, by taking away their health insurance lifeline, and by placing other unfair obstacles in their path.

Currently, there are approximately 9 million working-age adults who receive

disability benefits, many of whom could take jobs if they could keep their governmentally financed health benefits. A national survey earlier this year showed that, while 76 percent of people with disabilities wanted to work, nearly 75 percent are unemployed. Of those receiving benefits, only 1/2 of 1% leave the disability roles to return to work.

Disability groups have estimated that about 2 million of the 8 million would consider forgoing disability payments and take jobs as a result of this legislation.

The estimated cost of this new program would be recouped if only 70,000 people leave the disability benefit roles. If 210,000 of them take jobs, the government would actually save \$1 billion annually in disability payments.

That 210,000 constitutes only 10% of the number of people who the disability community believe will avail themselves of this program. If their estimates are even close to accurate, the savings to the Federal Government could eventually approach \$10 billion per year. Far more important than the savings is the impact on people's lives. It is about dignity. It is about opportunity that is by far the most important charge.

Today is a new beginning for persons with disabilities in their pursuit of the American dream. This bill corrects the injustice they have unfairly suffered.

The Work Incentives Improvement Act removes these unfair barriers to work that face so many Americans with disabilities:

It makes health insurance available and affordable when a disabled person goes to work, or develops a significant disability while working.

It gives people with disabilities greater access to the services they need to become successfully employed.

It phases out the loss of cash benefits as income rises, instead of the unfair sudden cut-off that workers with disabilities face today.

It places work incentive planners in communities, rather than in bureaucracies, to help workers with disabilities learn how to obtain the employment services and support they need.

Many leaders in communities throughout the country have worked long and hard and well to help us reach this milestone. They are consumers, family members, citizens, and advocates. They showed us how current job programs for people with disabilities are failing them and forcing them into poverty.

In all the time I have been in the Senate, I doubt if there has really been a single piece of legislation that has so coherently reflected the common concerns of a constituency and all of that constituency worked so effectively on recommendations to the Congress of the United States.

We have worked together for many months to develop effective ways to

right these wrongs. And to all of them I say, thank you for helping us to achieve this needed legislation. It truly represents legislation of the people, by the people and for the people. It is all of you who have been the fearless, tireless warriors for justice.

When we think of citizens with disabilities, we tend to think of men and women and children who are disabled from birth. But fewer than 15% of all people with disabilities are born with their disabilities. A bicycle accident or a serious fall or a serious illness can suddenly disable the healthiest and most physically able person.

In the long run, this legislation may be more important than any other action we have taken in this Congress.

I say that very sincerely. In the long run, this legislation may be the most important piece of legislation we have passed in this Congress. Its offers a new and better life to large numbers of our fellow citizens. Disability need no longer end the American dream. That was the promise of the Americans with Disabilities Act a decade ago, and this legislation dramatically strengthens our fulfillment of that promise.

This bill has a human face. It is for Alice in Oklahoma, who was disabled because of multiple sclerosis and receives SSDI benefits. She will now be able to get personal assistance to work and live in here community. No longer will she have to use all of her savings and half of her wages to pay for personal assistance and prescription drugs. No longer will she be left in poverty.

This bill is for Tammy in Indiana, who has cerebral palsy and uses a wheelchair and works part-time at Wal-Mart. No longer will she be forced to restrict her hours of work. Her goals of becoming a productive citizen will no longer be denied—because now she will have access to the health care she needs.

This bill is for Abby in Massachusetts, who is six years old and has mental retardation. Her parents are very concerned about her future. Already, she has been denied coverage by two health insurance firms because of the diagnosis is of mental retardation. Without Medicaid, her parents would be bankrupted by her current medical bills. Now when Abby enters the work force, she will not have to live in poverty or lose her Medicaid coverage. All that will change, and she will have a fair opportunity to work and prosper.

This bill is for many other citizens whose stories are told in this diary, called "A Day in the Life of a Person with a Disability."

Disabled people are not unable. Our goal in this legislation is to banish the stereotypes, to reform and improve existing disability programs, so that they genuinely encourage and support every disabled person's dream to work and live independently, and be a productive

and contributing member of their community. That goal should be the birthright of all Americans—and with this legislation, we are taking a giant step toward that goal.

A story from the debate on the Americans with Disabilities Act illustrates the point. A postmaster in a town was told that he must make his post office accessible. The building had 20 steep steps leading up to a revolving door at the only entrance. The postmaster questioned the need to make such costly repairs. He said, "I've been here for thirty-five years, and in all that time, I've yet to see a single customer come in here in a wheelchair." As the Americans with Disabilities Act has proved so well, if you build the ramp, they will come, and they will find their field of dreams. This bill builds new ramps, and vast numbers of the disabled will now come—to work.

The road to economic prosperity and the right to a decent wage must be more accessible to all Americans—no matter how many steps stand in the way. That is our goal in this legislation. It is the right thing to do, and it is the cost effective thing to do. And now we are finally doing it.

Eliminating these barriers to work will help disabled Americans to achieve self-sufficiency. We are a better and stronger and fairer country when we open the door of opportunity to all Americans, and enable them to be equal partners in the American dream. For millions of Americans with disabilities, this bill is a declaration of independence that can make the American dream come true. Now, when we say "equal opportunity for all," it will be clear that we mean all.

No one in America should lose their medical coverage—which can mean the difference between life and death—if they go to work. No one in this country should have to choose between buying a decent meal and buying the medication they need.

Nearly a year ago, President Clinton signed an executive order to increase employment and health care coverage for people with disabilities. Today, with strong bipartisan support, Congress is demonstrating its commitment to our fellow disabled citizens. But our work is far from done.

This bill is only the first step in the major reform of the Social Security disability programs that will enable individuals with disabilities to have the rights and privileges that all other Americans enjoy; 54 million Americans with disabilities are waiting for our action. We will not stop today, we will not stop tomorrow, we will not ever stop until America works for all Americans.

Mr. President, in these final moments, I especially commend President Clinton, Vice President Gore, and Secretary Shalala. President Clinton made this one of his top priorities over this

year and during these final negotiations. He understands the importance of this legislation, and this was a matter of central importance to him and his Presidency.

I also thank John Podesta and Chris Jennings who saw this through to the very end.

I commend the many Senate staff members whose skilled assistance contributed so much to the achievement: Jennifer Baxendale, Alec Vachon, and Frank Polk of Senator ROTH's staff; Kristin Testa, John Resnick, Edwin Park, and David Podoff of Senator MOYNIHAN's staff; Pat Morrissey, Lu Zeph, Chris Crowley, Jim Downing, and Mark Powden of Senator JEFFORDS' staff; Connie Garner—a special thanks to Connie Garner—Jim Manley, Jonathan Press, Jeffrey Teitz, and Michael Myers of my own staff; and the many other staff members of the Health Committee and the Finance Committee.

No longer will disabled Americans be left out and left behind. The Ticket to Work and the Work Incentives Improvement Act of 1999 is an act of courage, an act of community, and, above all, an act of hope for the future. I urge its passage, and I reserve the remainder of the time of the Senator from New York.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER (Mr. GRAMS). The Senator from Delaware.

Mr. ROTH. Mr. President, I yield 10 minutes to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico is recognized for 10 minutes.

Mr. DOMENICI. Thank you very much, I say to Senator ROTH.

I might say, on the bill that we are speaking to, the Ticket to Work and Work Incentives Improvement Act, I do not know how many Senators have ever had a disabled person who is holding a job and getting a paycheck. Come and see them. A disabled person who is holding a job and just got a paycheck—and you get to visit with them—they are glowing. They are filled with pride that they are able to work. Actually, it is the best therapy in the world for a disabled person to have a job.

I happen to know that from personal experience in my own family. But I have seen it in scores of faces of people who come and tell me as disabled people that they are working and they are getting a paycheck.

The U.S. Government, probably because it did not understand what it was doing, decided that we would help disabled people who were not working with health insurance, either under Medicare or Medicaid. Then what a cruel hoax, as soon as they started working and making sufficient money, as low as \$700 a month, they started losing their health care coverage, and they began to wonder and their parents

began to wonder, why did they ever take a job?

For some, they did not even make any net profit out of getting a job. Because if they are cut off from health care, some of them have to pay their entire paycheck to take care of their illness. That is just not right. Frankly, it was a hard issue in terms of drafting something that could work, and I compliment everybody that worked on this bill. I think it is a very important day today.

In fact, I am sorry it is getting passed along with a great deal of other legislation because the importance of it might very well get lost. Sometimes a long debate on a bill is meritorious, for the country finds out what we are doing. They are not necessarily going to find out about this bill because we did not use a lot of time today. But I asked the distinguished chairman if I could use a few moments and he gave it to me. Now, if the Senate would bear with me, I just want to take the remaining time I have, and how much is that?

The PRESIDING OFFICER. The Senator has 7 minutes remaining.

THE BUDGET

Mr. DOMENICI. I am going to take a few moments to thank a few people and summarize the budget bill that we are going to pass this evening, hopefully.

I want to thank the White House for their cooperation in coming to an agreement with reference to the appropriations bill and all of those things that are in the so-called omnibus package.

In particular, I want to thank the director of the Office of Management and Budget, Mr. Lew. The last evening when we were about to depart and part company and say we will go our own ways, they asked me if I would meet with Mr. Lew, and if we could see if we could work something out. We are here today with a bipartisan bill because we did work something out.

I thought it was the very best thing we could do. Frankly, I am proud of it. I wish it could have been done sooner. I am hoping that next year we will get the appropriations bills done perhaps 6 to 7 or 8 weeks sooner than we did this year. But I want to start by quoting from the New York Times, not necessarily a newspaper that thinks what Republicans do is necessarily good, as I do, but they said in their editorial, on their editorial page, the following thing about this budget bill that we are going to have before us:

There are modest spending increases in some of the President's priority areas like education but over all the Republican approach of spending restraint has shaped this budget."

I am very proud of that. I think that is true because what we have done is we have kept the faith with those who

want a balanced budget. This budget proposal ensures a balanced budget without using Social Security trust fund money.

I ask parenthetically for those who still doubt that because they do not have a Congressional Budget Office letter that says it, if the President of the United States would be asking Democrats to vote for this measure if he and his OMB Director thought it was using Social Security trust fund money? I think the answer is no. They know it does not. I know it does not. And I can promise the Senate, come February or March, when you reestimate everything, it will not be using the Social Security trust fund money.

I think that is the new discipline that has been imposed on our economy and our fiscal policy. It is a brand new event to say we are not going to spend Social Security money, and it is the best thing we can do for the American economy because, Senator MOYNIHAN, to the extent we do not spend it, we reduce the public debt. So for those who are wondering about the public debt, the public debt is reduced dollar for dollar when you leave Social Security surpluses alone year by year as they accumulate and do not spend them.

Now, let me tell you a dramatic statement about our current fiscal policy. Who would think a budget chairman could stand on the floor and say to the Senators who are listening, we will pay down the publicly-held debt by \$130 billion? Think of that—\$130 billion. If that does not mean that as soon as we saw surplus we did not run out and spend it, then I do not know what it means.

Frankly, I think my good friend, Senator GRAMM from Texas, is correct; in about 30 or 40 years, when they look back on this period in time, they are going to say: Incredible. With the kind of surpluses that existed, not a single new entitlement program of major proportion was started, and not a single new American spending program was started because the accumulations went into the Social Security trust fund instead of being used to pay for more Government.

I am proud of that. I think it is the best medicine for growth and prosperity in the future.

It holds Government spending, as we calculate it overall, to about 3.3 percent this year over last year—that includes entitlements and appropriations—a very interesting number.

In the 1970's, it was 11 percent growth.

In the 1980's, it was 8 percent growth.

For those who in editorial comments across this land call this a bloated budget, let me suggest, the fiscal policy of the United States which has the Government growing less than the economy is growing is not bad fiscal policy. That is about where we are now under the culmination of this budget process for this year.

In the meantime, when we passed the budget resolution in April of this past year, we said we wanted to do some very important things.

First, we wanted to increase the flexibility in education programs. It does not matter how much the President or others claim that the President won the education battle. The truth of the matter is, Republicans put more money in education than the President asked for.

For the first time we have flexibility. Twenty percent of the money that was going to go to teachers directly, and targeted and for nothing else, can be flexibly used by school districts. And the philosophical battle of the future will be flexibility of education funds with accountability versus the targeting and direct aid in very numerous and numbers of targeted mandates that Government says one size fits all. You all use it this way, or you cannot use it at all.

We suggested in our budget resolution that we should put more money into research on the dread diseases that affect our people and mankind. We increased NIH \$2.3 billion, which is \$2 billion more than the President asked for, for dreaded diseases like cancer, Alzheimer's, and the whole list.

Mr. MOYNIHAN. Food allergies.

Mr. DOMENICI. Allergies—all kinds of things.

We believe the breakthroughs will come in the next the millennium from this kind of investment. We are proud of it. We increased national defense—if you take out emergencies—by \$13.5 billion, and increased the pay for the military at a very significant rate, which was long overdue and much needed.

In addition, also in this bill, we have taken care of the shortcomings in Medicare that came from the Balanced Budget Act. And \$16 billion goes into that in the next 5 years, including \$2.1 billion to replenish skilled nursing home payments. Also, the therapy caps have changed. There are slower reductions in payments for teaching hospitals, and a long list of changes.

I ask unanimous consent that the list be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEDICARE AND MEDICAID PROVISIONS SUMMARY

(Nov. 18, 1999, CBO estimates, in billions of dollars)

	2000	2000–2004	2000–2009
Increase Skilled Nursing Facilities Payments	0.3	2.1	2.1
2 Year Moratorium on Therapy Caps	0.2	0.6	0.6
Slow Reductions for Teaching Hospitals	0.2	0.6	0.6
Hospital Outpatient Department Payments	0.3	5.3	11.1
Rural Hospital Provisions	0.0	0.8	1.7
Delay 15% Home Health Reduction	0.0	1.3	1.3
Medicare+Choice Payments	0.0	1.9	2.5
Miscellaneous Medicaid and S-CHIP	0.1	0.9	1.6
Other	0.1	2.5	5.5
Total	1.2	16.0	27.0

1. Nursing homes

Increases payment rates for medically complex cases by 20% from April 2000 to September 2000.

Increases all payments by 4% in 2001 and 2002.

Allows use of higher of federal or current rate at each facility.

2. Therapy caps

Provides a 2 year moratorium on further implementation of the \$1,500 therapy caps.

3. Teaching hospitals

Freezes the indirect medical education (IME) add-on rate at 6.5% in 2000 (same as 1999).

Phases-in further reductions more slowly than the Balanced Budget Act schedule.

4. Hospital outpatient departments

Clarifies that the outpatient department prospective payment system should not include an initial 5.7% cut.

Provides temporary protection to hospitals so that payment rates can fall no more than defined percentages from their 1996 levels.

5. Rural hospitals

Provides a five year extension of the Medicare dependent hospital program, and several miscellaneous expansions to the critical access hospital program.

6. Home health

Delays implementation of the 15% cut until October 1, 2001.

7. Medicare+Choice

Phases-in risk adjustment slowly over the period 2000 to 2003 and increases the update by 0.2 percentage point in 2002.

8. Medicaid Disproportionate Share Hospitals (DSH)

Permanently increases the allotment for New Mexico by \$4 million per year beginning in 2000.

Many people in the Senate deserve to be thanked for putting this entire appropriations package and budget together. To name a few, I thank the distinguished senior Senator from Alaska, Mr. TED STEVENS, who chairs the overall Appropriations Committee. What a job he had, and what a job he did. And Senator ROBERT BYRD, ranking member, what a difficult job he had. We are here with a bipartisan budget agreement this afternoon because he and other Democrats worked with Republicans to get it done.

Last but not least, I thank the majority leader, who tried very hard to understand what we were doing, and worked with us. He now is a budget expert. That is good. From time to time, I am very glad we can take matters into his office and he understands it thoroughly.

With that, I yield the floor.

TICKET TO WORK AND WORK INCENTIVES IMPROVEMENT ACT OF 1999—CONFERENCE REPORT—Continued

PRIVILEGE OF THE FLOOR

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Kyle Kinner, a presidential management intern with the Finance Committee minority staff, be granted the privilege of the floor

during the consideration of this conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. I have the great pleasure to yield 5 minutes to my friend from Illinois, Senator DURBIN.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 5 minutes.

Mr. DURBIN. I salute Senator ROTH, Senator MOYNIHAN, Senator KENNEDY, Senator JEFFORDS, Senator HARKIN, and others who worked so hard on this Work Incentives Improvement Act.

A close friend of my family had a son who was mentally ill. This young man wanted more than anything to go to work. He knew if he did so, he would lose the protection of health insurance. So he was held back from that opportunity. I don't believe he was better for that. I don't believe America was better for that.

This bill addresses that challenge and says that as the disabled go to work, they will still be able to use Medicaid and Medicare to protect themselves with health insurance even as they earn some income. That is only just. It opens up an opportunity that currently is not there. I am happy to be a supporter of this legislation. I look forward to voting for it when it comes to the floor.

There is some reservation in my mind about the bill that is before us, not because of the provision I just mentioned, nor because of the extension of certain tax credits and benefits, but, rather, because of the language in this bill relating to organ donation.

This is the challenge we face in America. If you are an American grievously ill, in need of an organ transplant, your chances of survival depend more than anything on your address and how much money you have. You could be the most seriously ill person in some State in this Union and be overlooked and bypassed in favor of another patient in another State who is not as seriously ill and might be able to wait. That needs to change. That is certainly not a fair or American way.

The rules we are trying to promulgate to make that change have been the source of great controversy on Capitol Hill. It is sad when it comes to a point where Members of the House and Senate are deeply involved in a debate over the availability of organs for donation to those who need a transplant to live.

In my State of Illinois, over the last 3 years, 97 people have died waiting for organ transplants at the University of Chicago. I see my colleague from the State of Pennsylvania, Senator SANTORUM, where 187 people died waiting at the University of Pittsburgh. My colleagues, Senator MOYNIHAN and Senator SCHUMER, know that 99 people died waiting at Mount Sinai in New York. In the last week alone, two people have

died at one of the Chicago transplant centers because an organ did not become available.

If you are an American who needs a liver transplant to survive and you live in the following States, you have much less chance of receiving the transplant: Arizona, California, Colorado, Connecticut, Illinois, Massachusetts, Maryland, Michigan, New York, or Pennsylvania.

This is not a fair system. It is a system which cries out for justice and one that cries out for the politicians to step aside. Let the medical community find the best and most efficient way organs can move to the people who need them to live, instead of getting caught up in some special interest tangle here or political dogfight. It is sad that we are now in a situation on this bill where we have not resolved this contentious issue. I sincerely hope all parties will come together, and soon, to make certain that changes are made to make the system fairer. We know, by the people we represent, that this is literally a life-or-death argument.

Kathryn Krivy lives in Chicago. She runs the wellness clinic at the Northwestern Memorial Hospital. She is desperately in need of a new liver. She has developed primary biliary cirrhosis, a very rare autoimmune disease that is incurable. She has been on the transplant list in Chicago for over 2 years, but currently, because of the delay, she has decided to sign up at the Mayo Clinic in Minnesota because it is much more likely she can receive a transplant in a shorter period of time. She has the knowledge and the resources to make that decision, but many of the poorer people in America waiting for an organ transplant do not have that luxury.

We should not reach the point in America where something as basic as the gift of life, an organ donation, depends on your home address. That is exactly what has occurred. An estimated 66,000 potential organ recipients are waiting their turn. Only 20,000 will see an organ transplant this year. Nearly, 5,000 Americans will die each year, at least 13 every day, while awaiting organ transplants. Of those, it is estimated that 300 to 1,000 Americans, maybe up to 3 a day, might be spared if this system were fairer and were revised. Unfortunately, that is not the case.

Though this is an excellent bill which I support, I believe it is a sad commentary that we have reached this state of affairs. I hope in the next session of Congress we can bring justice to organ donation.

I yield the floor.

Mr. ASHCROFT. Mr. President, today the United States Senate completes its business for calendar year 1999 by passing two important bills: H.R. 3194—the final spending bill, and H.R. 1180—the Work Incentives Act,

which provides new opportunities for disabled individuals to enter the work force and includes \$18 billion dollars in tax cuts. I am pleased to announce my support for both these bills.

The Chairman of the Senate Budget Committee has eloquently explained how this budget agreement keeps faith with the Republican pledge that no Social Security trust fund monies be used to pay for other government programs.

Last year, for the first since 1960—during the Eisenhower Administration—we balanced the budget without counting the Social Security surplus. Mr. President, for the first time in 39 years the government did not divert money from the Social Security Trust Fund to pay for other programs.

As a result of the spending plan pursued by this Republican Congress, which called for protection of Social Security, increased spending on education and defense, and reduction of the national debt, we have begun to put our fiscal House in order.

When I was elected to this body in 1994, the incoming 104th Congress inherited a projected four-year budget deficit of \$906 billion. Now, through the hard work and discipline of this Congress, the tables have turned. That actual four-year period produced a net budget surplus of \$63 billion—a turnaround of \$969 billion, just a shade under a trillion dollars. With the passage of the final FY 2000 appropriations bill, we will continue on that path, reducing our national debt by \$140 billion dollars in the current fiscal year.

Unlike last year's omnibus appropriations package that increased spending by almost \$14 billion, this Congress successfully obtained offsets for all of the President's new spending, including an across-the-board cut that will help eliminate government waste and excess. In addition, despite President Clinton's best efforts, the offsets do not include a tax increase.

At the beginning of this year, I said that the Congress' primary responsibility was to protect the Social Security surplus. With the passage of this budget, we have accomplished that goal. In addition, not only have we avoided a tax hike, but we have also given the American people an \$18 billion tax cut through the provisions contained in H.R. 1180—the Work Incentives Act.

I am pleased that the final bill includes over \$2 billion in additional education spending over last year and gives local school districts more flexibility in how they spend that federal assistance. The appropriations bill also contains an increase of \$1.7 billion for veterans spending above President Clinton's request, as well as an increase in funding for national defense that includes a boost in pay and benefits for our soldiers, sailors, and airmen.

But this bill does not just fund these important priorities, it also provides

real cuts in government waste and abuse. The legislation includes a 0.38% across the board reduction that is essential to maintaining our fiscal discipline and protecting Social Security.

Included in this package are provisions to address some unintended consequences of the Balanced Budget Act of 1997 to protect Medicare recipients and providers. This bill includes \$16 billion over 5 years to ensure that senior citizens can continue to receive quality health care.

These Medicare changes will help Medicare patients in hospitals—particularly rural, teaching, and cancer hospitals—skilled nursing facility residents, home health care recipients, and seniors who wish to receive their health care through the innovative Medicare+Choice program rather than through the conventional fee-for-service mechanism. I have traveled around Missouri and heard from countless doctors, patients, nurses, and other health care providers about the necessity of these changes. These provisions are good for the seniors in Missouri and across the Nation.

The package also provides for State Department Reauthorization, including language I authored that requires the State Department to publish a report documenting American victims of terrorist attacks in Israel, Gaza, and the West Bank.

In addition, the almost 400,000 Missouri households that are satellite television viewers will be pleased that this bill includes language that will allow them to continue receiving local programming. The Satellite Home Viewer Act will give real price competition and choice in video programming to all Missourians.

Finally, Mr. President, I am pleased that unlike last year, when we lumped all the bills together, allowing \$14 billion in extra spending into one package, this year we finished our work on each of the bills, and negotiated each bill on its individual merits. While this bill is an omnibus package for procedural reasons, it was not negotiated as an omnibus package. Every provision was negotiated according to regular order, and as a result, we were able to succeed in our goal of protecting Social Security.

Mr. WELLSTONE. Mr. President, I rise to support this conference report and I say, Mr. President, that I am very happy to have been an original cosponsor of the Work Incentives Improvement Act of 1999.

People all across Minnesota who have contacted my office know the importance of the Work Incentives Improvement Act and how it will further expand the possibilities opened up by the Americans with Disabilities Act which was enacted in 1990. Thanks to the ADA, many people with disabilities in Minnesota and around the country are working, but others still cannot accept

jobs because they would lose their health care coverage. This Act will allow them to fulfill their dreams for employment and to be productive citizens.

This legislation has enjoyed overwhelming bipartisan support—with 79 Senate cosponsors. It would make it easier for those receiving disability benefits through Social Security programs to go to work without losing their Medicare or Medicaid health benefits. The legislation also encourages the disabled to seek paid employment by gradually reducing their cash benefits as income increases, rather than cutting them off completely.

Let's look at the current situation for disabled individuals who seek employment and require health insurance coverage. For some of these people, employer-based coverage is unavailable because they are self-employed or because their disabilities prevent them from working full-time. For others, coverage is unaffordable because of copays and co-insurance for repeated, ongoing treatments. For those offered affordable employer insurance, these plans generally cover only primary and acute care, not the specialized medications, equipment, supplies and other long term care needs that individuals with disabilities unfortunately require.

Last year, in the Spring of 1998, the Minnesota Consortium for Citizens with Disabilities surveyed 1200 Minnesotans who have disabilities and found the vast majority were ready to go to work if their current health care benefits remained intact.

Here are two examples from Minnesota:

Let me tell my colleagues about Steve. Steve is a middle-aged adult with advanced Limb Girdle Muscular Dystrophy. He is married, has two grown children, and owns his own home in rural Minnesota. As the manifestations of his condition progressively worsen, Steve has struggled to remain self-sufficient as long as possible using all of his personal resources. Steve's desire to remain an independent contributing member of society is evident in his efforts to develop the skills that enable him to work from home in a computer-based business. Steve is on SSDI making him eligible for Medical Assistance that pays for his health care needs. He is growing weaker and cannot afford to lose his medical assistance eligibility. Steve has a fledgling publishing business; ghost-writing and copy-writing. He crafts sales ads and creates direct mail advertising packages. Steve uses the Internet to market his services. He uses his website as a forum for other authors to advertise their books. He sells space as one would a classified ad. Steve is becoming involved with e-bay auctioning focusing on books—first editions and autographed copies. Steve says the Work Incentives Improvement Act is

his only opportunity to become financially independent. "If a person in my position is at risk for all of the medical expenses that one could incur, that is a big incentive not to try to get ahead. I still have my pride, my ego, the desire to rise above."

Another Minnesotan whose story I would like to tell is Jean. Jean is in her mid-forties and has had Charcot-Marie-Tooth Disease since early childhood. Her muscles have wasted away from her elbows to her finger tips and from her thighs to her toes. She has trunk weakness and uses a power wheelchair for mobility. Jean works in an office as a clerk-typist using a pencil held between her two hands to strike the computer keys and a trackball to navigate her computer. Jean's career is limited by not being able to accept raises, declining wage rewards for the continuing education and skills she has gained, because if she accepted these well deserved raises, she would exceed Supplemental Security Income's (SSI) earnings threshold of just \$500/month and lose her eligibility for medical assistance. "It just seems unfair that people with disabilities don't have the same opportunities to advance in their careers. Why can't we earn enough money to live in a house? To purchase a van with a lift? To travel?"

These are but two of the thousands of disabled Americans who, with guaranteed continued health care coverage—coverage they already have—would be able to lead more productive lives, productive for themselves, for their families and for their communities. In my state there are not enough workers to meet the needs of Minnesota employers, and I know it is also the case in many communities around the country. According to the Disability Institute, in 7 years Minnesota will need 1 million new workers. The Work Incentives Improvement Act will help match the needs of Minnesota's disabled community with Minnesota employers. That is what I call a real win-win situation.

When President Bush signed the Americans with Disability Act in 1990, he noted that when you add together all the state, federal, local and private funds, it costs almost \$200 billion annually to support people with disabilities—to keep them dependent. The ADA was the first giant step forward to allow Americans with disabilities to be independent. The Work Incentives Improvement Act of 1999 which we have before us today is another giant step along the same path, and today I am happy to say that we will be taking that step.

Mr. FRIST. Mr. President, yesterday, the House and Senate Conference Committee reached agreement on the Ticket to Work and Work Incentives Improvement Act of 1999, which addresses a fundamental inequity for individuals with disabilities.

As a heart and lung transplant surgeon, I witnessed unfair discrimination against patients with disabilities. After a successful transplant, several of my patients were faced with a serious dilemma. They had to choose between keeping their health insurance coverage or returning to work. Under current law, if these patients choose to return to work and earn more than \$500 per month, they lose their disability payments and health care coverage provided through Medicare and Medicaid as part of their Social Security Disability Insurance (SSDI). This is health care coverage that they simply cannot get in the private sector, as it is extremely difficult for individuals with severe disabilities to obtain coverage due to their medical history.

Let me illustrate the profound impact this dilemma has had on our disabled Americans. Today, the unemployment rate among working-age adults with disabilities is nearly 75 percent. Only 7% of disabled Americans—318,728 of the 4.2 million non-blind individuals with disabilities—were working in 1997, according the General Accounting Office. Many persons with disabilities who currently receive federal disability benefits, such as SSDI and Supplemental Security Income (SSI), want to work; however, less than one-half of one percent of these beneficiaries successfully forego disability benefits and become self-sufficient. If disabled individuals try to work and increase their income, they lose their disability cash benefits and their health care coverage. The loss of these benefits is simply too powerful of a disincentive to return to work.

In addition, more than 7.5 million disabled Americans receive cash benefits from SSI and SSDI. Disability benefit spending for SSI and SSDI totals \$73 billion a year, making these disability programs the fourth largest entitlement expenditure in the federal government. If only one percent—or 75,000—of the 7.5 million disabled adults were to become employed, federal savings in disability benefits would total \$3.5 billion over the lifetime of the beneficiaries. Removing barriers to work is not only a major benefit to disabled Americans in their pursuit of self-sufficiency, but it also contributes to preserving the Social Security Trust Fund.

This legislation is critical to the health and well-being of our disabled Americans. It will create new opportunities for individuals with disabilities to return to work while allowing them to maintain their health insurance coverage and disability benefits. In particular, this bill expands new options to states under the Medicaid program for workers with disabilities; continues Medicare coverage for working individuals with disabilities; and establishes a ticket to work and self-sufficiency program.

I would like to thank Senator JEFFORDS for his leadership on this critical issue. I would also like to thank Senators LOTT, ROTH, MOYINHAN and KENNEDY and their House colleagues for their dedication toward reaching consensus on this important legislation.

Mr. KOHL. Mr. President, I rise today in support of the Work Incentives Conference Report. As my colleagues know, this conference report contains a number of items that have been joined together in order to accommodate the end of session schedule, and I would like to offer brief comments on several of those items.

With regard to the tax portion of the conference report, I am in support of the compromise that was reached to extend the expired tax credits. Earlier this year, I supported an ambitious tax relief package which extended the credits and contained my child care tax credit and farmer income averaging relief provisions, as well as targeted tax measures to help Americans pay for education and health care and to expand the low-income housing tax credit. Hardworking American taxpayers created the budget surplus, and a significant portion of that surplus should be returned to them, allowing them to keep more of their own paychecks and helping them plan for their future. It is my hope that when we return in the spring, we will rise above partisan concerns and achieve bipartisan progress towards comprehensive tax relief, as well as the challenge of reforming both Medicare and Social Security. And we must do so while continuing our vigilance in protecting the balanced budget gains of recent years.

But for today we will content ourselves with the limited extenders package before us. The research and development tax credit promotes innovation and enhances the competitiveness of American business. The work opportunity and welfare-to-work tax credits continue the partnership between the public and private sector to move those in need of a helping hand off of public assistance and into the workforce. I am also pleased that this tax package preserves eligibility to important tax benefits, such as the child tax credit, by protecting against the encroachment of the alternative minimum tax. While I am concerned that the conferees did not offset fully the costs of these provisions and would have preferred a final version along the lines of the bipartisan, and fully offset, Senate bill, this package is modest and urgently needed. It deserves our endorsement.

I am extremely pleased that we are finally taking the final step to enact the Work Incentives Improvement Act into law. I cosponsored this legislation because I believe strongly that it will have a tremendous impact on the lives of people with disabilities.

Currently, over 9 million people receive disability benefits through the

SSDI and SSI programs. Only 1/2 of 1 percent of SSDI beneficiaries, and only 1 percent of SSI beneficiaries ever return to work. Yet we know that many—in fact, the vast majority—of people with disabilities want to work. In study after study, people with disabilities report that the single biggest obstacle to returning to work is the loss of health care benefits that often comes along with their decision to work. Many do not have access to employer-based health insurance and find policies in the individual insurance market prohibitively expensive. Therefore, disabled beneficiaries who want to work are faced with the choice of returning to work while risking their health benefits or forgoing work to maintain health coverage.

This is simply unacceptable. People with disabilities deserve every opportunity to live healthy, productive lives, and we should encourage and support their efforts to work by ensuring that they continue to have access to the health care services they need. I am pleased that the Work Incentives Improvement Act accomplishes that goal. This bill will ensure that millions of people with disabilities have the opportunity to work if they are able—without the fear of losing the health insurance coverage they need in order to live healthier lives and to succeed in their work. I want to commend the bipartisan efforts of Chairman ROTH, Senator MOYINHAN, Chairman JEFFORDS, and Senator KENNEDY, in making this bill a reality.

Again, I regret that end-of-year pressure has forced us to combine so many unrelated provisions into a single bill. However, I support the conference report for the reasons I have just stated, and I urge my colleagues to vote for its adoption.

Mr. ALLARD. Mr. President, it is with great reluctance that I vote for the Work Incentives Act Conference Report.

A particular provision, Section 408, has been added to this important piece of legislation at a date too late to make further changes. Section 408 was introduced in the House, included in the Conference Report, but never debated in the Senate. I am a cosponsor of the Senate version of this bill.

In an effort to finish the first session of the 106th Congress we have had no time to sound our concerns and make due changes. Section 408 extends the authority of state medicaid fraud units. Not only would this provision mandate more federal control over what has been historically governed by the states, it also calls for investigation and prosecution of resident abuse in non-Medicaid board and care facilities. This provision allows the federal government unprecedented control over the quality of care in private institutions. This is yet another example of government authority exceeding its'

boundaries. I have always been a supporter of state's rights and less government control and I feel these regulations are best promulgated by the states. Certainly they should not be promulgated in the final days of the session.

It is my opinion that we must reduce the amount of federal government regulation and not further impede the rights of care providers and state officials to monitor private industry. I make an effort to examine all pieces of legislation to ensure that the end results is objective and does not further burden individuals with undue regulation.

Again it is with great reluctance that I vote for this act. The changes made in the Conference Report at this late date are onerous and threaten the sanctity of private health care providers.

Mr. LIEBERMAN. Mr. President, I rise to express my support for the tax extenders package included in the Work Incentives Act conference report. In the context of our current budget situation of a small projected on-budget surplus for FY 2000, I believe this tax package strikes an important balance between fiscal responsibility and tax relief.

Although I would have preferred a fully offset tax package, I am pleased that the bill is fully offset for FY2000 and partially offset for FY2001, the two years for which most of the tax provisions are extended by law. If two years from now when we reconsider most of these provisions a on-budget surplus does not exist, I will push for an extenders package that is fully offset to ensure that we do not go into deficit as a result of tax relief measures.

The package includes several important provisions that I strongly support. The Research and Experimentation Tax Credit is important for our future international competitiveness. This tax credit provides an important incentive for our companies to research and innovate. I hope that in the near future we will update this credit to reflect current business conditions and to make it a permanent part of the tax code.

The AMT modification, the Worker Opportunity Tax Credit, and the Welfare-to-Work Tax Credit are all important provisions to help low to moderate income earners create more opportunities and to improve their living standards. I am pleased that the Finance Committee decided to include renewal of the Generalized System of Preferences in this tax package. This is a critical program for promoting growth in developing economies and for increasing international trade integration.

I strongly support the provision to extend and modify the tax credit for

electricity produced by wind and biomass materials. In order to ensure energy security and address national environmental priorities such as clean air and mitigation of global climate change, it is essential that renewable energy options become more competitive. These tax provisions will ensure that renewable energy technologies will be able to compete more equitably with fossil sources such as coal and oil. However, while this package includes modest extensions and modifications, I am disappointed that the bill does not go further by extending the credit to include landfill methane and other cellulosic feedstocks.

I would like to thank Chairman ROTH and Senator MOYNIHAN for their hard work in getting this package together. It is a fiscally responsible and an appropriate package under our current fiscal situation. I urge my colleagues to support this bill.

Mr. JEFFORDS. Mr. President I am delighted to stand before you today, to speak about an extremely important piece of legislation. The bill we are sending to the President today, a bill I know he is eager to sign into law, will have a tremendous impact on people with disabilities. In fact, this legislation is the most important piece of legislation for the disability community since the Americans with disabilities Act.

My reason for sponsoring this particular piece of legislation is quite simple. The Work Incentives Improvement Act of 1999 addresses a fundamental flaw in current law. Today, individuals with disabilities are forced to make a choice . . . an absurd choice. They must choose between working and receiving health care. Under current federal law, if people with disabilities work and earn over \$700 per month, they will lose cash payments and health care coverage under Medicaid or Medicare. This is health care coverage that they need. This is health care coverage that they cannot get in the private sector. This is not right.

Once enacted, the Work Incentives Improvement Act of 1999 will allow individuals with disabilities, in states that elect to participate, continuing access to health care when they return to work or remain working. In addition, those individuals who seek it, will have access to job training and job placement assistance from a wider range of providers than is available at this time. Currently, there are 9.5 million individuals with disabilities across the country who receive cash payments and health care coverage from the federal government. Approximately 24,000 of these individuals live in my home state, Vermont. Once enacted, the Work Incentives Improvement Act will actually save the federal government money. For example, let's assume that 200 Social Security disability beneficiaries in each state return to work

and forgo cash payments. That would be 10,000 individuals out of the 9.5 million individuals with disabilities across the country. The annual savings to the Federal Treasury in cash payments for just these 10,000 people would be \$133,550,000! Imagine the savings to the Federal Treasury if this number were higher. Clearly, the Work Incentives Improvement Act of 1999 is fiscally responsible legislation.

I began work on this bill 1996. Though it was a long and sometimes difficult task, many hands made light work. Senator KENNEDY, Ranking member on the HELP Committee, joined me in March 1997. Senators ROTH and MOYNIHAN, Chairman and Ranking Member on the Finance Committee signed on as committed partners in December of 1998. Last January, 35 of our colleagues, from both sides of the aisle, joined us in introducing S. 331, the Senate version of this legislation. One week later, in a Finance Committee hearing, we heard compelling testimony from our friend, former Senator Dole, a strong supporter of this legislation. A month later, we marked this legislation out of the Finance Committee with an overwhelming majority in favor of the bill. Finally, on June 15th, with a total of 80 cosponsors, we passed this legislation on the floor of the United States Senate, with a unanimous vote of 99-0.

Four months later, over 35 of our colleagues in the House of Representatives, took to the floor of their chamber, and spoke eloquently for their version of this legislation. Later that day, the bill passed the floor of the House with a vote of 412-9. Since then, the Senate and House Conferees have been working diligently in effort to reach common ground. I am very pleased today, that the differences in policy in the two different bills have been resolved and consensus has been reached on a conference agreement. This agreement does not compromise the original intent of the legislation, retaining key provisions from S. 331.

From my perspective, the Work Incentives Improvement Act of 1999 represents a natural and important progression in federal policy for individuals with disabilities. That is, federal policy increasingly reflects the premise that individuals with disabilities are cherished by their families, valued and respected in their communities, and are an asset and resource to our national economy. Today, most federal policy promotes opportunities for these individuals, regardless of the severity of their disabilities, to contribute to their maximum potential—at home, in school, at work, and in the community.

I have been committed to improving the lives of individuals with disabilities throughout my Congressional career. Providing a solid elementary and secondary education for children with disabilities, so that they will be

equipped, along with their peers, to benefit from post-secondary and employment opportunities is crucial. When I came to Congress in 1975, Public Law 94-142, the Education for all Handicapped Children Act, now the Individuals with Disabilities Education Act (IDEA), was enacted into law. IDEA assures each child with a disability, a free and appropriate public education. I am proud to be one of the original drafters of this legislation which has reshaped what we offer to and expect of children with disabilities in our nation's schools.

In addition, I have been committed to providing job training opportunities for individuals with disabilities. In 1978, I played a central role in ensuring access to programs and services offered by the federal government for individuals with disabilities through an amendment to the Rehabilitation Act. I believe that this amendment alone laid the foundation for significant legislation that followed, including the Technology-Related Assistance for Individuals with Disabilities Act of 1988, now the Assistive Technology Act of 1998, both of which I drafted. Most importantly, this legislation opened the doors for the most comprehensive piece of legislation of all, the Americans with Disabilities Act of 1990. This legislation prohibits discrimination on the basis of disability in employment, public services, public accommodations, transportation, and telephone service.

These laws have forever changed the social landscape of America. They serve as models for other countries who recognize that their citizens with disabilities are an untapped resource. In our country, individuals with disabilities are seen everywhere, doing everything. Just this past weekend, thousands of physically disabled individuals participated in the New York City Marathon, as they have been doing for years. The expectations that these people set for themselves and the standards we apply to them have increasingly been raised, and now in many circumstances equal those set and applied to other individuals.

Unfortunately, one major inequity remains. That is, the loss of health care coverage if an individual on the Social Security disability rolls chooses to work. Individuals with disabilities want to work. They have told me this. In fact, a Harris survey found that 72 percent of Americans with disabilities want to work, but only one-third of them do work. With today's enactment of the Work Incentives Improvement Act of 1999, individuals with disabilities will no longer need to worry about losing their health care if they choose to work a forty-hour week, to put in overtime, or to pursue career advancement. Individuals with disabilities are sitting at home right now, waiting for this legislation to become law. Having a job will provide them with a sense of

self-worth. Having a job will allow them to contribute to our economy. Having a job will provide them with a living wage, which is not what one has through Social Security.

In addition to continuing health care coverage and providing job training opportunities for individuals with disabilities, this legislation offers many other substantial long-term benefits. The Work Incentives Improvement Act of 1999 will give us access to data regarding the numbers, the health care needs, and the characteristics of individuals with disabilities who work. Furthermore, this legislation will provide the federal government as well as private employers and insurers, the facts upon which to craft appropriate future health care options for working individuals with disabilities. It will allow employers and insurers to factor in the effects of changing health care needs over time for this population. Hopefully, it will even improve the way in which employers operate return-to-work programs. Through increased tracking of data, we will learn the benefits of intervening with appropriate health care, when an individual initially acquires a disability. We will also learn the value of continuing health care to a working individual with a disability. If an individual, even with a severe disability, knows that he or she has access to uninterrupted, appropriate health care, the individual will be a healthier, happier and thus more productive worker.

I would like to take the time now to briefly outline the major provisions which have remained as part of this legislation. The conference agreement retains the two state options of establishing Medicaid buy-ins for individuals on Social Security disability rolls, who choose to work and exceed income limits in current law, as well as for those who show medical improvement, but still have an underlying disability. For working individuals with disabilities, the conference agreement extends access, beyond what is allowed in current law, to Medicare. In addition, the legislation before us today retains several key provisions from S. 331, including, the authority to fund Medicaid demonstration projects to provide access to health care to working individuals with a potentially severe disability; the State Infrastructure Grant Program, to assist states in reaching and helping individuals with disabilities who work; work incentive planners and protection and advocacy provisions; and finally, most of the provisions in the Ticket to Work Program.

In order to control the cost of this legislation, compromises were made. Although the purpose of the State Infrastructure Grant Program and the Medicaid Demonstration Grant Program remain the same, the terms and conditions of these grants were altered in conference. As a result, states are

not required to offer a Medicaid buy-in option to individuals with disabilities on Social Security, who work and exceed income limits in current law, prior to receiving an Infrastructure or a Medicaid Demonstration Grant.

Also in Conference, the extended period of eligibility for Medicare for working individuals with disabilities has been changed from 24 to 78 months. During this extended period, the federal government is to cover the cost of the Part A premium of Medicare for a working individual with a disability, who is eligible for Medicare. S. 331 would have extended such coverage for an individual's working life, if he or she became eligible during a 6-year time period.

I would like to note two changes to the Ticket to Work program made during Conference. The new legislation shifts the appointment authority for the members of the Work Incentives Advisory Panel from the Commissioner of Social Security to the President and Congress. In addition, language regarding the reimbursements between employment networks and state vocational rehabilitation agencies was deleted in Conference. The new legislation gives the Commissioner of Social Security the authority to address these matters through regulation.

Although several changes have been made from the original Work Incentives bill, I am still very pleased with what we are adopting today. This is legislation that makes sense, and it will contribute to the well-being of millions of Americans, including those with disabilities and their friends, their families, and their co-workers. Today's vote provides us the opportunity to bring responsible change to federal policy and to eliminate a misguided result of the current system—if you don't work, you get health care; if you do work, you don't get health care. The Work Incentives Improvement Act of 1999 makes living the American dream a reality for millions of individuals with disabilities, who will no longer be forced to choose between the health care coverage they so strongly need and the economic independence they so dearly desire.

In closing, I would like to thank the many people who contributed to reaching this day. I especially thank the conferees, Majority Leader LOTT, Senators ROTH and MOYNIHAN, and in the House, Majority Leader ARMEY, and Congressmen ARCHER, BLILEY, RANGEL, and DINGELL. I also thank their staff who worked so closely in effort to reach this day. From my staff, I thank Pat Morrissey, Lu Zeph, Leah Menzies, Chris Crowley, and Kim Monk. I want to recognize and extend my appreciation to the staff members of my three fellow sponsors of this bill; Connie Garner in Senator KENNEDY's office, Jennifer Baxendell and Alexander Vachon with Senator ROTH, and Kristen Testa,

John Resnick, and Edwin Park from Senator MOYNIHAN's staff. Finally, I wish to thank Ruth Ernst with the Senate Legislative Counsel for her drafting skill and substantive expertise, her willingness to meet time tables, and most of all, her patience. In addition to staff, we received countless hours of assistance and advice from the Work Incentives Task Force of the Consortium for Citizens with Disabilities. These individuals worked tirelessly to educate Members of Congress about the need for and the effects of this legislation.

Finally, I would like to urge my colleagues in both chambers to set aside any concerns about peripheral matters and to focus on the central provisions of this legislation. Let's focus on what today's vote will mean to the 9.5 million individuals with disabilities across the nation. At last, these individuals will be able to work, to preserve their health, to support their families, to become independent, and most importantly, to contribute to their communities, the economy, and the nation. We are making a statement, a noble statement and we must do the right thing. Let's send this bill to the President.

Mr. REED. Mr. President, I rise today in strong support of the Ticket to Work and Work Incentives Improvement Act.

I want to pay tribute to my colleagues, Senators KENNEDY and JEFFORDS, who began working on this legislation in the last Congress—effectively building support for this bill from a handful of senators to 79 cosponsors.

I also want to commend Senators MOYNIHAN and ROTH, who have dedicated their time and effort to this important cause. They have kept the debate on this bill focused on the substance, and have prevented it from degenerating into grandstanding or partisan bickering.

But the lion's share of credit should go to the members of the disability community, who have been tireless advocates for work incentives legislation. Without their hard work, we would not be here today. This bill is the product of their grassroots activism—making a common sense idea into a national policy.

As my colleagues know, the major provisions of the Ticket to Work and Work Incentives Improvement Act are infinitely sensible. They would remove the most significant barrier that individuals with disabilities face when they try to return to work—continued access to adequate health care.

Currently, individuals with disabilities face the dilemma of choosing between the Medicare and Medicaid health benefits they need and the job they desire. Mr. President, this is not a choice at all, and it is regrettable.

According to surveys, about three quarters of individuals with disabilities

who are receiving Supplemental Security Income (SSI) and Social Security Disability Insurance (SSDI) benefits want to work. Sadly, less than one percent are actually able to make a successful transition into the workforce. A major barrier seems to be the lack of sufficient health care coverage.

By passing this legislation, we will extend eligibility for Medicare and Medicaid and provide a helping hand to individuals with disabilities who aspire to work.

Mr. President, this legislation also takes a step to help workers who are stricken with progressive, degenerative diseases, such as Multiple Sclerosis, HIV/AIDS, and Parkinson's Disease, which can be slowed with proper treatment. With the health coverage buy-in offered under this bill, these workers can continue to hold a job instead of leaving the workforce in hopes of meeting the need requirements for Medicaid coverage.

These citizens can continue to make substantial contributions to the workplace and to society while benefitting intellectually and emotionally.

With the Americans with Disabilities Act, Congress adopted legislation to combat discrimination and remove physical barriers from the workplace. Now, we have the chance to lift yet another barrier to work, the loss of health care coverage.

In my home state of Rhode Island, more than 40,000 individuals with disabilities could benefit from the work incentives bill. Across the country, more than 9.5 million people could be positively affected by this legislation.

Our booming economy has created millions of new jobs, and has brought thousands of Americans into the workforce for the first time. By passing this legislation, we can take another step to help a significant group of Americans participate in our national economic prosperity.

Mr. President, before I yield, I would like to briefly mention my concern about some offsets attached to this measure. As colleagues who have followed this bill know, it seemed as if there was a revolving door when it came to the consideration of offsets during the Conference. Provisions came and went and returned again.

I was pleased that a controversial offset regarding the refund of FHA up-front mortgage insurance premiums was withdrawn. This offset was essentially a \$1,200 tax on approximately 900,000 low- and middle-income families and first-time home-buyers, and the conferees were right to omit it from this bill.

Regrettably, the bill retains two other controversial offsets, which I oppose. The first is an assessment on attorneys representing clients with Social Security disability benefits claims. Although the Administration supports this offset, I believe that it will dis-

courage qualified attorneys from taking on these complicated, labor-intensive claims cases—which already offer little remuneration to attorneys. Ultimately, this assessment will hurt those individuals trying to secure their rightful benefits, not the attorneys. I commend the conferees for taking steps to blunt the impact of this provision by capping the fee at 6.3% and requiring GAO to study the cost and efficiency of this and alternative assessment structures. Nonetheless, I still believe that this is an inappropriate offset.

The other offset changes the index for student loan interest rates from the 91-day Treasury bill to the three-month rate for commercial paper. This provision saves a modest amount of money in the short-term. Unfortunately, those savings will not be transferred to students, and the offset will actually put taxpayers on the hook if the markets turn sour. Let me add that this provision flies in the face of an agreement reached in last year's Higher Education Act Amendments. Under that legislation, we were to study the impact of this type of conversion. We are still awaiting the findings of that study, and in the absence of an authoritative conclusion, I believe it is premature to entertain this change in policy. Mr. President, setting these important concerns aside, I believe that the Ticket to Work and Work Incentives Improvement Act is a major victory for all Americans, and we should all support it. I want to again commend the leading Senate sponsors, Senators KENNEDY, JEFFORDS, MOYNIHAN, and ROTH for their tremendous work in bringing this legislation to this point, and I urge all of my colleagues to vote for it.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Mr. President, I yield 8 minutes to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized for 8 minutes.

Mr. SANTORUM. Mr. President, I want to pick up where the Senator from Illinois left off. I think he hit the nail on the head with respect to our concern with a provision in this bill which will create an additional moratorium for the organ allocation regulations to go into effect.

There will be a 90-day moratorium. Senator DURBIN, Senator SCHUMER, Senator MOYNIHAN, Senator SPECTER, and I, and many others have some grave concerns about its impact on thousands of people who are on transplant lists across this country and their ability to get organs in what may be the last few days of their lives. That is, unfortunately, what is going to occur. We are going to delay a system being put into place which would put a priority on the health status of the person on the transplant list as op-

posed to the residency status of where that person happens to be in the hospital.

It is a battle. It is an economic battle in many respects. And certainly, from some perspectives, I have transplant centers in my State that support these regulations; I have transplant centers in my State that oppose them. I look at it from the unbiased position of, what is in the best interest of the patient? For me, as Senator DURBIN just said, when 3 of the 11 people who will die today because organs are not available, when 3 of them needlessly die because we are transplanting organs that would otherwise go to them into people who are healthier and would not die but for the transplant, then we have something seriously wrong in this country. We have something seriously wrong when geography trumps patient need. That is what the current organ allocation system has.

Why has that occurred? This was a system that was put in place well over 10 years ago, when there were fewer transplant centers and when organs could not survive as long after being harvested. So geography did play an important role because the organ that was harvested had to be quickly transported to a hospital and implanted into the donee. That has changed. Now organs survive for around 4 hours, according to our transplant surgeon, Dr. FRIST, who lectured us on this a little while ago. Now we have the ability to more broadly spread these organs out so we can reach sicker people. Yet the organ allocation system developed well over 10 years ago still focuses on geography. It may have been applicable at one time. It doesn't work anymore. People are dying as a result of it.

We have 4,000 people on transplant lists; 1,000 will die. And it is incredible to me that those will die unnecessarily—4,000 will die and 1,000 will die unnecessarily—because of our regulations.

We have gone through a moratorium on these regs. I know this is a very controversial issue. It is a controversial issue because of economics. There is no controversy anymore as to what is in the best interest of patients. Last year, when Bob Livingston was able to get a year delay as chairman of the Appropriations Committee, we said, well, the medical evidence will sustain their position that geography is the best way to do this. So we asked for a study—the study of the Institute of Medicine—to determine the findings of a non-partisan, nonbiased organization. Let me tell you what they came back with:

On the basis of the analysis of this report, it seems apparent that patients on liver transplant—

That is what they specifically looked at—

waiting lists will be better served by an allocation system that facilitates broader sharing within broader populations.

The Institute of Medicine says "broader sharing," with geography being a lower priority factor in the decision.

This question was also put forward: Will more people die if we continue this system?

Again, the Institute of Medicine was very clear:

Increased sharing of organs would result in increasing transplantation rates for status 1 patients, the sickest patients, decreasing pre-transplantation mortality for sicker patients, which is status 2(b), and decreasing transplantation rates for status 3 patients, without increasing mortality.

That is the key. Yes, status 3, the healthier patients, will get fewer organs, but they won't die as a result of that. Yes, status 1 and 2(b) patients will get more transplantations and will live as a result of that, where they otherwise would die.

So it is clear, again, from the medical evidence the Institute of Medicine has put forward that a broader geographic sharing is the way to go. That is what these regulations dictate—that the sicker patients should get these before they die, not healthy patients who would otherwise live or would live for a long period of time without transplants.

The other issue you will hear brought up is that we need geography to be a big factor because it increases the availability of organs, that people want to donate organs in their community. The Institute of Medicine looked at this and found no convincing evidence to support the claim that broader sharing would adversely affect donation rates, or potential donors would decline to donate because an organ might be used outside the immediate geographic area.

I have an organ donor card. I am someone who, upon my demise, wants to be able to give organs to someone else so they might live. I don't care whether it goes to somebody in Pittsburgh, or in Chicago, or in Alabama, as long as it goes to the person who needs it the most.

That brings me to my final point, on which I think we can all agree. This debate is contentious, and the reason for that is, we don't have enough organs. So I just say that we can all agree that we need to do more to encourage organ donation. People are needlessly dying because people and families have trouble at that moment of death—I know how difficult that can be—making the decision to donate the organs of somebody who is brain dead to someone else who can live as a result of that donation. Hopefully, through this discussion, we can also work on how we can broaden the availability of organs so this contentious issue of regional transplant centers will be minimized in the future.

Mr. President, with that, I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. MOYNIHAN. Mr. President, I have the great honor and pleasure to yield 5 minutes to the Senator from Iowa, who is so active in the Ticket to Work legislation.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 5 minutes.

Mr. HARKIN. Mr. President, I thank the ranking member on the committee. I rise in strong support of the Work Incentives Improvement Act. I really want to commend my two colleagues, Senator JEFFORDS of Vermont and Senator KENNEDY from Massachusetts, for their excellent work in getting this very important piece of legislation through. I want to also thank the members of the Finance Committee—in particular, Senator ROTH and Senator MOYNIHAN—for their hard work on this legislation.

For people with disabilities all over this country, this is truly an incredible day. Congress is continuing to fulfill the promise we made to people with disabilities 9 years ago when we passed the Americans With Disabilities Act in 1990. When we passed the ADA, they told Americans with disabilities that the door to equal opportunity was finally open. And the ADA has opened doors of opportunity—plenty of them. Americans with disabilities now expect to be treated as full citizens, with all the rights and responsibilities that entails.

But our work is not finished. Far too many people with disabilities who want to work are unemployed. One of the main reasons they are unemployed is, under the current system, people have to choose between a job and health care. I could not put it any better than a constituent of mine, a young woman by the name of Phoebe Ball. Phoebe just graduated from the University of Iowa. She was shocked when they found that if she took an entry-level job paying \$18,000 a year, she would suffer a huge loss—her health insurance.

So Phoebe wrote an article for the newspaper. I will read part of it:

I want off SSI desperately . . . I want to work. I want to know that I have earned the money I have . . .

My parents and my society made a promise to me. They promised me that I can live with this disability, and I can . . . What is limiting me right now is not this wheelchair, and it's not this limb that's missing. It's a system that says if I can work at all, then I'm undeserving of any assistance. I'm undeserving of the basic medical care that I need to stay alive.

. . . What is needed is a government that understands its responsibility to its citizens . . . then we'll see what we are capable of, then we'll be working and proving the worth of the Americans With Disabilities Act.

I could not say it any better than Phoebe just did. The Work Incentives Improvement Act is a comprehensive bill that will be the answer to Phoebe Ball's dilemma. If only 1 percent—or

75,000—of the 7.5 million people with disabilities, such as Phoebe, who are now on benefits were to become employed, Federal savings would total \$3.5 billion over the work life of these beneficiaries. That not only makes economic sense, it contributes to preserving the Social Security trust fund.

The disability community across this country and Members from both sides of the aisle have wholeheartedly endorsed this bill. Rarely do we see such broad bipartisan support. But that is because on this particular issue it is easy to agree—people with disabilities should continue to move toward greater and greater independence.

In that spirit, Senator SPECTER and I introduced the Medicaid Community Attendant Services and Supports Act earlier this week. Its shorthand name is MCASSA. This bill will build on what we are doing today with the Work Incentives Improvement Act. Ten years after the passage of the Americans With Disabilities Act, next year, we are still facing the situation where our current long-term care program favors putting people into institutions.

A person has a right to the most expensive form of care—a nursing home bed—because nursing home care is an entitlement. But if that same person with a disability wants to live in the community, he or she is going to have to face a lack of available services because community services are optional under Medicaid. Nursing home is a mandatory entitlement, but if you want to live in the community, that is optional. Well, the purpose of our bill is to level the playing field and give people with disabilities a real choice.

Our bill would allow any person entitled to medical assistance who would go to a nursing facility to use the money for community attendant services and support. In shorthand, what our bill says is: Let the Federal money follow the person and not the program. If that person wants to use that money for community-based services and attendant services, that person with a disability ought to be able to use the money that way. If they want to use the money for a nursing home, leave it up to the individual; we should not be dictating where they ought to live and how they ought to live. As is the work incentives bill, MCASSA is rooted in the promise of ADA—equality of opportunity, full participation, independent living, and economic self-sufficiency for all.

I thank the Chair.

I thank the President.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Mr. President, I yield 4 minutes to the Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama is recognized for 4 minutes.

Mr. SESSIONS. Mr. President, I thank the Senator from Delaware, and

I thank him particularly for his interest on this issue and so many other issues that have been before this Senate, including all of the major tax cuts in our country in the last number of years. He has been a key player in that.

The issue before us today involves many different aspects. I believe very strongly that the organ transplant issue is critical for our Nation. We have made such magnificent progress in enhancing the availability of organs, helping people who receive those organs, and increasing the success rate of organ transplants. It has been a continual series of advancements—whether it is medication to avoid rejection, or the skill of a surgeon, and so forth. The key to that has been the magnificent services rendered by organ transplant centers all over the country.

The plan that has been directed and proposed by Secretary Shalala of HHS, which gives her, in fact, the total ability to void and dictate the regulations, that plan has been opposed and is not supported by the overwhelming number of organ transplant centers in this country. They do not believe it will save lives. They do not believe it will help the system to have Washington decide who gets organ transplants.

We have a system that is working and getting better on a daily basis, which is something of which we can be extraordinarily proud.

In Alabama, the University of Alabama at Birmingham is No. 1 in the world in kidney transplants. They are exceptionally skilled at that procedure, and is one of the great organ transplant centers in the world. Others are similar around the country. They are very uneasy about and object to this consolidation of power in the Secretary's office—a person who is not elected by the people, and yet is about to impose regulations on the dispersment of organs in America.

This is a matter that ought to be and by law and right should be done in the U.S. Congress. The House passed a bill quite different from the Secretary's proposal. The committee met in the appropriations, and several Senators who had a view on this came up with a bill giving a 42-day window to change any rule she might pass. We will hardly be in session. We will not be in session in 42 days. Ninety days is the minimum time we can have so that this Congress can fulfill its responsibility to the health and safety of this country by having hearings and passing legitimate legislation on organ transplantation.

I would point out that the chairman of that subcommittee of the committee of which I am a member, Senator FRIST, Dr. FRIST, is one of the great organ transplant surgeons in America. He did the first organ-lung transplant in the history of the State of Tennessee. He will chair that committee. He is going to be fair on this issue.

But there is a congressional responsibility, and the minimum time we can accept is the 90 days that has been proposed.

I thank the Chair.

I hope and I am confident that will be part of this legislation.

Mr. MOYNIHAN. Mr. President, I am happy to yield 3 minutes to my colleague and friend from New York.

The PRESIDING OFFICER. The Senator from New York is recognized for 3 minutes.

Mr. SCHUMER. Mr. President, I thank the Senator for yielding time.

I rise, along with my colleagues from Pennsylvania and Illinois, very much against my colleague from Alabama on this important issue.

When somebody donates a liver or lungs or a kidney or a heart, they do not donate it in a particular area. They don't donate it and say: I want the person who lives in the State of Alabama or the State of New Jersey to have it. They donate it to do the most good.

Finally, we have come up with a solution with provisions that are fair—that say it doesn't matter where you live but rather what your need is in terms of getting an organ.

All of a sudden, to my disappointment, in the dark of night a ruling of that position was put into the legislation.

I think this is wrong. When somebody needs a liver in New York, and they need it, and their life depends on the liver, that liver should not go to someone in another State who has at least 3 years to live on their existing organs.

It is so wrong to create geographic divisions. We have learned that. The Secretary of HHS has promulgated regulations which, if I had my way, would be promulgated immediately.

My friend and colleague, who I know is very sincere in this, the Senator from Alabama, and others, put in a provision to delay this for 90 days.

I thank the Senator from Pennsylvania, Senator LOTT, and the Secretary of HHS for trying to compromise this issue so it can be fair to all.

We must and we will continue to fight, those of us who believe that organ donations should go to those who need it the most, and not those who live in a certain geographical area be given those organs.

The system has been supported by the National Academy of Sciences Institute of Medicine. It was developed by medical people and scientists. That is the way it ought to be.

We ought not hold organs hostage to political, geographic, and other divisive considerations.

Again, when somebody donates an organ, a beautiful and selfless act, it ought not be marred by politics. It ought to go to the person of greatest need, no matter where that person lives.

Mr. President, I yield the remainder of my time.

Mr. MOYNIHAN. Mr. President, I am happy to yield 3 minutes to my friend, Senator WELLSTONE.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for 3 minutes.

Mr. WELLSTONE. Mr. President, I want to actually start out on a positive note by raising one question.

This Work Incentives Improvement Act is a very important piece of legislation for all the reasons my colleagues have explained. I will go through that in a moment.

I don't understand why there is in this piece of legislation a \$1.7 billion subsidy for higher education lenders. I don't understand what that is doing in this piece of legislation. We are talking about whether or not people with disabilities are going to be able to work and maintain their health care coverage. That is what is so important about this legislation. It is incredibly important to the disabilities community in my State and across the country.

I thank Senators KENNEDY, JEFFORDS, ROTH, and MOYNIHAN. But I have to raise this question just for the record.

What are we doing putting a \$1.7 billion subsidy in here for higher education lenders? Students could use this money by way of expanding the Pell grant. Students could use the money by way of low interest loans. Students could use the money to make higher education more affordable. But why is this provision being linked to another piece of legislation?

I must say again that when we get back to how we conduct our business, I hope next time we will not put these kinds of provisions together. This is not the way to legislate.

I think it is a great piece of legislation. I am going to support it. But I certainly don't think we should have this \$1.7 billion subsidy for the lenders as a part of this bill.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. LOTT. Mr. President, I ask unanimous consent that the voting schedule occur no later than 5 p.m. this evening, and that it be reversed so that the first vote will now occur on the adoption of the Work Incentives conference report, to be followed by the cloture vote, and finally adoption of the appropriations conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, in the spirit of the hour, the Democratic side yields the remainder of its time to the distinguished and ebulliently happy majority leader.

Mr. LOTT. Thank you, Mr. President. It is always a great pleasure to work with the Senator from New York. It is

even more fun to hear him speak. I am not sure what he said, but it sounded beautiful. I take it as a high compliment as I always do.

For the sake of a colloquy to clarify a section in the work incentives bill, I yield to Senator SANTORUM. We will have a colloquy with Senator SANTORUM, Senator SCHUMER, and myself.

Mr. SANTORUM. Mr. President, there is an issue over the language contained in section 413 of H.R. 1180 and the intent thereof that I ask the majority leader to clarify.

Mr. LOTT. Mr. President, I thank the Senator from Pennsylvania, and the Senator from New York, Mr. SCHUMER, for working with me on this and for their devotion to this important public health issue.

It is one which is important to our country and to the people that need the organ transplants. We have to try to find the best and the fairest way to deal with this issue. I am happy to clarify this issue contained in the legislative measure.

Mr. SANTORUM. I wish to clarify the language in section 413 of H.R. 1180 pertaining to the implementation of the Secretary of Health and Human Service's final rule on organ procurement and the transplantation printed in the Federal Register on October 20, 1999, specifically to ensure that this language allows, but does not require, the Secretary of HHS to revise this rule after the 90-day period beginning on the date of enactment of this act.

Mr. LOTT. Mr. President, the language will delay the rule for 90 days. That is what is required and that was my intent, from the date of enactment of H.R. 1180, in order to facilitate additional public review. It is not the intent of the legislation to cause any unreasonable delay in the formulation of necessary improvements in national organ transplant policies, but rather to permit constructive review of the information that will be available and for the Congress to review it.

Furthermore, I make clear section 413 provides that the rule is not effective until the expiration of the 90-day rule beginning on the date of enactment of this act. During that 90-day period, the Secretary shall publish a notice eliciting public comments on the rule and shall conduct a full review of the comments. At the end of the period, section 413 allows, but does not require, the Secretary to make any revisions in the rule that she deems appropriate.

Mr. SANTORUM. I thank the majority leader for the clarification.

The PRESIDING OFFICER. The Senator from New York.

Mr. SCHUMER. Mr. President, will the Senator from Pennsylvania yield for a brief statement?

Mr. LOTT. I believe I have the time and I will yield.

Mr. SCHUMER. Mr. Leader and Senator SANTORUM, I have spoken with the Secretary of HHS and she has assured me this clarification has the support of the administration and it is something she, and it, intend to stand by.

Mr. LOTT. I thank the Senator.

Does the Senator from Alabama wish to speak?

Mr. SESSIONS. Mr. President, is it your expectation following the 90-day period during which the Secretary reviews the public comments that as of today we have not had a formal comment period, as I understand it; that the Secretary should inform the Congress of her reasons behind any final decision she would make?

Mr. LOTT. Yes, absolutely. I expect that and I believe she will do that.

Mr. SESSIONS. I wish to say that I know a lot of hard work has gone into this very contentious issue. Some said this had happened in the dead of night. What happened in the dead of night—I serve on the health committee that should be dealing with this—this 42-day rule went in. Our committee never voted on that or had hearings on it.

This at least gives our committee a narrow window of opportunity to try to deal with it. It won't be a full 90 days because we will be out half of that. It will be a narrow opportunity with Senator BILL FRIST chairing it and maybe we can work out some things that make sense. Right now I am very troubled. The overwhelming majority of the transplant centers are not happy with these rules as they are being developed. I think the Congress must speak.

I yield the floor.

Mr. LOTT. Mr. President, if I have time remaining, I yield the floor. I believe we are prepared to begin our series of votes, unless the chairman or ranking member would desire to wrap up.

The PRESIDING OFFICER. All time has expired.

Mr. ROTH. Mr. President, I would also like to quickly thank several staff members who have been working long and hard to make this bill possible.

Let me thank several members of Senator MOYNIHAN's staff—as always, they are skilled professionals who have been our partners working on this bill every step of the way.

In particular, let me thank Jon Resnick, Edwin Park, and David Podoff. And I would like to thank a former member of the Moynihan staff, Kristen Testa, who was there at the very beginning of this bill's legislative life and without whom there would not have been a Work Incentives Improvement Act.

I would also like to thank Pat Morrissey, Leah Menzies, and Lu Zeph of Senator JEFFORDS' office, and Connie Garner on Senator KENNEDY's staff. They have been tireless in their efforts on behalf of this legislation.

Jennifer Baxendell and Alec Vachon from my staff worked tirelessly on this legislation and deserve special commendation.

Since this bill's inception, our staffs have worked together closely and well. I would like to thank you all for your dedication and hard work throughout all the many ups and downs this bill has faced.

Mr. President, I would also like to thank the dedicated professionals who worked so diligently to complete this year's tax legislation. First of all, I would like to thank my Finance team—Frank Polk, Joan Woodward, Mark Prater, Brig Pari, Tom Roeser, Bill Sweetnam, Jeff Kupfer, Ed McClellan, Ginny Flynn, Tara Bradshaw, Connie Foster and Myrtle Agent. I would also like to thank John Duncan and Bill Nixon from my personal staff for their commitment to seeing this process through to its successful completion.

I would also like to thank the members of Senator MOYNIHAN's Finance staff who have helped make this a bipartisan effort—David Podoff, Russ Sullivan, Stan Fendley, Anita Horn, and Mitchell Kent.

It is also important to recognize the professionals of the Joint Committee on Taxation. In particular, I would like to thank Lindy Paull, Bernie Schmitt, Rick Grafmeyer, Carolyn Smith, Cecily Rock, Mary Schmitt, Greg Bailey, Tom Barthold, Ben Hartley, David Hering, Harold Hirsch, Laurie Matthews, Sam Olchyk, Oren Penn, Todd Simmens, Paul Schmidt, Mel Schwarz, and Barry Wold.

I would also like to thank Jim Fransen and Mark Mathiesen of the Senate's Legislative Counsel office who have the thankless job of turning tax policy into statute.

Finally, I would like to thank the Treasury's Office of Tax Policy. In particular, Linda Robertson, Jon Talisman and Joe Mikrut deserve special recognition for their help in this important legislation.

On this occasion I would also like to thank the staff who worked so hard on the Medicare, Medicaid, and SCHIP reform provisions included in the Omnibus Appropriations Act. They have worked incredibly long hours, with real dedication, to develop the strong, consensus product before the Senate today. In particular, let me thank Kathy Means, Teresa Houser, Mike O'Grady, Jennifer Baxendell, and Alec Phillips on the Majority staff.

I would also like to thank Senator MOYNIHAN's staff for their cooperation and input. Let me thank Chuck Konigsberg, Liz Fowler, Edwin Park, Jon Resnick, Faye Drummond, Kyle Kinner, Dustin May, Julianne Fisher, Jewel Harper, and Doug Steiger.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered.

The clerk will call the roll.

The legislative assistant called the roll.

Mr. NICKLES. I announce that the Senator from Arizona (Mr. MCCAIN), the Senator from Washington (Mr. GORTON), and the Senator from Oregon (Mr. SMITH) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. SMITH) would vote yea.

Mr. REID. I announce that the Senator from Washington (Mrs. MURRAY), is absent attending a funeral.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 95, nays 1, as follows:

[Rollcall Vote No. 372 Leg.]

YEAS—95

Abraham	Edwards	Lincoln
Akaka	Enzi	Lott
Allard	Feingold	Lugar
Ashcroft	Feinstein	Mack
Baucus	Fitzgerald	McConnell

Durbin	Lieberman	

NAYS—1

Voinovich

NOT VOTING—4

Gorton	Murray
McCain	Smith (OR)

The conference report was agreed to. Mr. GORTON. Mr. President, had I been present for the vote on the conference report on H.R. 1180, I would have voted "no." I would have done so in spite of my high approval of most of the tax extenders and of many of the work initiative provisions. Nevertheless, the bill included an unwise and ill-considered new tax credit for the use of chicken waste for power production. That provision could never have survived standing alone. It is another unjustified complication in our tax code never considered by either House of Congress. It poisons the entire bill.

Mr. MOYNIHAN. I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LOTT addressed the Chair. The PRESIDING OFFICER (Mr. SANTORUM). The majority leader.

ORDER OF PROCEDURE

Mr. LOTT. Mr. President, I ask unanimous consent that the next two votes in this series be limited to 10 minutes in length.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEASONS GREETINGS

Mr. LOTT. Mr. President, once again, I thank Senators on both sides for their cooperation and for their good work this year and wish you all a Happy Thanksgiving and a Merry Christmas.

I yield the floor.

DISTRICT OF COLUMBIA APPROPRIATIONS ACT, 2000—CONFERENCE REPORT—Resumed

CLOTURE MOTION

The PRESIDING OFFICER. Under the previous order, pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will state.

The legislative assistant read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the conference report to accompany the District of Columbia appropriations bill.

Trent Lott, Ted Stevens, Larry E. Craig, Judd Gregg, Tim Hutchinson, Don Nickles, Mike Crapo, Connie Mack, Slade Gorton, Ben Nighthorse Campbell, Arlen Specter, Pat Roberts, Chuck Hagel, Richard Shelby, Thad Cochran, and John Warner.

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that the conference report accompanying H.R. 3194, an act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against revenues of said District for the fiscal year ending September 30, 2000, shall be brought to a close?

The yeas and nays are required under the rule. The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Oregon (Mr. SMITH), the Senator from Arizona (Mr. MCCAIN), and the Senator from Washington (Mr. GORTON) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. SMITH) would vote yea.

Mr. REID. I announce that the Senator from Washington (Mrs. MURRAY) is absent attending a funeral.

The yeas and nays resulted—yeas 87, nays 9, as follows:

[Rollcall Vote No. 373 Leg.]

YEAS—87

Abraham	Edwards	Lugar
Akaka	Enzi	Mack
Allard	Feinstein	McConnell
Ashcroft	Frist	Mikulski

NOT VOTING—4

Gorton	Murray
McCain	Smith (OR)

The PRESIDING OFFICER. On this vote, the yeas are 87, the nays are 9. Three-fifths of the Senators duly chosen and sworn having he voted in the affirmative, the motion is agreed to.

FISHERIES RESEARCH VESSEL

Mr. LOTT. Mr. President, the NOAA budget includes \$51.56 million in funds to procure the first of four state-of-the-art fishery research vessels to conduct critical research on our Nation's fishery resources. This is an important step in providing for sustainable fisheries for our fishermen, U.S. trade, and U.S. consumers. It is my understanding that these ships will be some of the most technically complex research vessels in the world. It is critical that the procurement of these ships reflect this complexity, and that all U.S. shipbuilders with technical expertise in oceanographic research ships will have the opportunity to offer their expertise to the Government. Is it the Senator's understanding that this solicitation will be open to all U.S. shipbuilders, without set-asides that limit competition?

Mr. STEVENS. The Majority Leader is correct. In providing for the first of these ships to be built, we understood that the public will benefit from free and unrestricted competition on this vessel. The demands placed on our fishery management system dictate that we procure the most technically sophisticated ship possible from our U.S. shipbuilding industry. The only way to guarantee this result is to conduct a free and open competition among all

U.S. shipbuilders and meet with Dr. Baker, the Director of NOAA, who has agreed to homeport this vessel in Kodiak. By locating it mid way between the Gulf of Alaska and the Bering Sea, it will have ready access to the Nation's two largest fisheries.

Mr. CRAIG. Mr. President, my friends from Alaska, Senator MURKOWSKI, and Nevada, Senator REID, have worked hard to protect the mining jobs in their States and in mine, and I extend my thanks to them for working with me to keep the Department of Interior from mindlessly destroying jobs and lives by trying to rewrite the Mining Law. We want to make sure the intent of the provision on mill sites included in the Department of Interior portion of the appropriations bill is clear, and would like to ask your clarification on a few points.

Mr. REID. I thank my friend from Idaho for his hard work. I want to confirm my understanding of one absolutely critical thing with respect to the language in Section 337 protecting plans of operations submitted prior to November 7, 1997. It is my understanding that the language covers revisions, modifications, and amendments to such plans that are made before such plans are fully approved by the BLM or Forest Service. If an as yet unapproved plan of operations was submitted prior to November 7, 1997 and revised earlier this year, for instance, then the proposed operation, as revised, would be protected. It is the operation, not a specific property position—whether mining claims or mill sites—that is protected. This is very important to my State and I ask the chairman to specifically confirm my understanding.

Mr. STEVENS. I can say unequivocally that your understanding is correct. We all know that plans and operations are often revised by the applicant before being finally approved. Indeed, some revisions are required by the BLM or Forest Service during the plan review process. It is the clear intent of the language to protect revisions made prior to the plan's final approval. It is the operation, not a specific property position (whether mining claims or mill sites), that is protected. Anything less would be grossly inequitable and directly contrary to the clear intent of the conference.

Mr. MURKOWSKI. I thank my friends from Alaska and Nevada for that clarification. It is also my understanding that the provision is intended to protect large investments made in mining operations approved by the Department of Interior under its old interpretation of the law. Frankly, it would be shameful for us to endorse the actions of a Federal agency that approves a project, allows the proponent to spend millions of dollars to develop it, and then changes its mind about what the law says and on that basis

shuts the operation down. I understand that the provision would protect these enormous investments and the jobs they create from such arbitrary action by the Department of Interior.

Mr. STEVENS. My friend is right. In compromising the House and Senate versions, our intention was to avoid the retroactive application of the Solicitor's opinion of November 7, 1997 and the resulting destruction of existing jobs and investments.

Mr. MURKOWSKI. I thank the chairman for that clarification. Finally, as my friend knows, mining operations are large, complex undertakings, and circumstances change all the time, requiring changes in the plan of operations. Miners must ask the BLM and Forest Service to approve amendments to their plans all the time in order to keep operating. In fact, the BLM and Forest Service often require these miners to amend their plans. I'm concerned that unless these types of amendments to existing plans are protected, the provision we are adopting would be of very little value. The BLM or the Forest Service could simply require an operator of a large existing mine to amend its plan of operations, and then deny the plan amendment and shut down the operation on the basis of the Solicitor's opinion. I would like clarification that amendments to existing plans are protected by the provision.

Mr. STEVENS. I assure my colleague that it was never our intent to shut down existing operations under any circumstances. Applying the opinion to these existing operations through the back door of a plan amendment would undermine the entire provision and make it meaningless. Anybody who knows the mining industry knows that plan amendments are routine. We want operators to be able to amend their plans when necessary to make them better. The provision covers such amendments, and protects them from the legal interpretation contained in the Solicitor's opinion.

Mr. REID. I thank my friends from Alaska, the committee chairmen, for these important clarifications.

Mr. LOTT. Mr. President, for many years I have been working with the Minority Leader, Senator DASCHLE, to develop and enact legislation to provide liability relief for recyclers of scrap metal and other material, under the Superfund program. I am pleased that we have been able to work together to reach a successful resolution on this issue, and that the legislation incorporates the agreement of a broad spectrum of parties.

Mr. DASCHLE. I have appreciated the hard work of the Majority Leader on this issue, and I am pleased that this legislation has been included as part of the omnibus appropriations bill. I hope that this provision will serve to achieve our goal of encouraging recycling.

It is also my understanding that the language of the bill is not intended to exempt from liability parties who had reason to believe that the recyclable material originated from the portion of a DOD, DOE, NRC or Agreement State-licensed facility where source, byproduct or special nuclear material, as defined in the Atomic Energy Act, was processed, utilized or managed. Is it your understanding that the agreement does not cover these materials?

Mr. LOTT. Yes, that is correct.

Mr. DASCHLE. Mr. President, this issue is of great significance to many of my colleagues and to members of the public. In particular, it is of great interest to the Senator from Arkansas, and I deeply appreciate her leadership on this issue.

Mrs. LINCOLN. Mr. President, for the last six years I have worked in Congress to provide relief from liability to legitimate recyclers. Congress never intended to create a disincentive to recycle when it created the Superfund program, and for that reason, I am delighted that this legislation was included in the omnibus appropriations bill.

In addition, I agree with Senator DASCHLE's clarification of the intent of this bill. I am very concerned about the possibility that this legislation could be misinterpreted to relieve from Superfund liability persons who release radioactive material to recyclers, such as those in the steel industry in my home state of Arkansas, who may be unaware of the danger of the products they are receiving, and who could in turn pass it on to consumers. I believe it is critical that we further clarify that this was not intended, and I am hopeful that the Majority Leader and the Minority Leader will work with me to do so.

Mr. DASCHLE. I agree completely with the Senator from Arkansas. Since an explicit provision to this effect was inadvertently omitted, would the Majority Leader agree to address this issue through a technical correction to be enacted at the earliest possible opportunity next session?

Mr. LOTT. Yes. I would be happy to work with the Minority Leader and the Senator from Arkansas early next year to pass a technical correction to this legislation to achieve this goal.

Mr. MURKOWSKI. Mr. President, on November 1 of this year, the Committee on Energy and Natural Resources reported S. 623, the Dakota Water Resources Act of 1999, to the Senate. The legislation amends existing law in an effort to address the water needs of North Dakota. The legislation, as is true of most water related legislation in the arid West, is not without controversy.

Proposals to divert water from the Missouri River to meet agricultural, municipal and industrial, and other needs in North Dakota have a long history. The Missouri, like the Colorado

and the Columbia, serves many States and a multitude of interests, including navigation. The Missouri is also important to the management and operation of the Mississippi. Although there are sufficient resources in each of those Basins to meet all the water related needs if the resources were developed using on-stream and off-stream storage, that development has not occurred and for various reasons, including what I believe are short sighted concerns by national organizations, are not likely to occur in the near term. That being the case, it is not surprising that whenever any Basin State manages to corral all the competing interests in its State and even obtains support from the Administration that other States that could be potentially affected want to examine the agreement and reassure themselves that this particular solution does not come at their expense.

The best way to accomplish that is to bring all the parties together to allow them to review their concerns and work out whatever arrangement will best address their needs. Our Committee did just that several years ago as part of the legislation to settle the water claims of the Colorado Ute Tribes. Once we had revised the agreement in a fashion that was acceptable to the Tribes, the State of Colorado, and the other affected water users, we then had several weeks in intense discussions with the other Colorado River Basin States. I want to point to that process, because it did result in the passage of legislation that was supported by all the parties and provided for the completion of the Dolores and Animas projects.

I rise today to speak and offer reassurance to the North Dakota delegation and the Missouri delegation that the Energy and Natural Resources Committee is committed to assisting these two delegations in working out their difficulties regarding S. 623, the Dakota Water Resources Act of 1999.

I appreciate the hard work and good will expressed by both delegations over the past several weeks, but we have just run out of time in this session of Congress to address the concerns of all affected states. To continue these discussions, I have proposed to my colleagues that when Congress returns next year, the Energy Committee will hold a workshop or other forum so that the Senate can fully identify, discuss, and attempt to resolve the issues that have prevented this legislation from moving this year.

With the assistance of my colleagues, I propose that the Energy Committee staff work with their staffs during the recess and that we convene a meeting during the first week in February to bring all the parties together. Hopefully, if we use the time well during the recess, we can identify who the technical people are who need to be involved so that the delegations will be

able to have a constructive meeting. I want to note that Senator SMITH, the Chairman of the Subcommittee on Water and Power, who held the hearings earlier this year on the legislation has indicated that he is also willing to assist in this process.

Mr. DORGAN. I appreciate the Chairman's cooperation and assistance on this bill and his willingness to work with me in the Energy Committee to bring this legislation to the floor. His commitment to convene a workshop to resolve outstanding issues provides the basis for moving forward with this legislation, which would meet the outstanding Federal commitment to our state.

As the Senator from Alaska knows, North Dakota has significant water quality and water quantity needs that must be addressed. In many parts of my state, well water in rural communities resembles weak coffee or strong tea; it is unfit for drinking and other domestic uses. Several parts of my state, including the Red River Valley, do not have access to reliable sources of water. This bill is designed to address those needs and help provide clean, reliable water to families and businesses across North Dakota. When the Senate attempted to consider this legislation in recent days, objections were registered by other Senators who had concerns about the bill. In response, Senator CONRAD and I have worked with those Senators to address their concerns.

I am certain that with the Chairman's assistance and that of Senator SMITH we will be able to resolve these concerns expeditiously.

Mr. BOND. I too, extend my thanks to the Chairman of the Energy Committee for his willingness to help us on this very complex and difficult issue. Missouri, and other States in the Missouri River Basin are dependent on the flow of the Missouri River. Any legislation that affects this flow must be thoroughly vetted by the people in our state who have the knowledge and the expertise. Since this legislation came up at the end of the session with no time for debate on the Senate floor, we appreciate the opportunity the Chairman is providing us to bring together those people from our States who know this issue well. A forum with the free exchange of ideas is an excellent way to air very serious concerns as well as explore possible solutions that can make this a win-win situation for everyone. Representatives of the Missouri Basin States are currently in deep negotiations to discuss water flow. This forum should be held in the context of those negotiations.

Mr. ASHCROFT. I would like to associate myself with the remarks of my colleague from Missouri. We in Missouri are just as protective of our water as any other State in the Missouri River Basin, or for that matter,

the rest of the United States. Before either of us can agree to any legislation that has the potential to affect our State, we must have the opportunity for our state experts to go over this legislation with a fine-tooth comb. I welcome the chance that the Senator from Alaska has offered and I know our state water experts will be happy to participate. As I have repeatedly stated, I am willing to work with my colleagues to try to resolve any concerns in a manner that will fully protect the interests of Missouri.

Mr. CONRAD. I also appreciate the Senator's continued willingness to work with us. We will continue to work in good faith to develop a bill that can be passed by the Congress.

I want to be absolutely clear that it is not our intent or that of anyone in North Dakota to harm any of our neighbors. This legislation significantly reduces the amount of irrigated acreage from that authorized by current law and completely eliminates any irrigated acreage from this project in the Hudson River drainage. We have significantly increased the levels of review by both the State Department to ensure compliance with the Boundary Water Treaty and by EPA to ensure compliance with the Clean Water Act on any trans-basin diversion that might occur. There is no guarantee that such a diversion will actually occur. I also want to make it clear that we are willing to discuss the timing, amount, and source of any diversions to ensure that the legitimate needs of our neighboring Basin States are met. The Chairman's offer is helpful and I hope that with a full and frank discussion we will be able to fully resolve all concerns.

Mr. BINGAMAN. I agree with this proposal. I want to assure my colleagues that I will work with the Chairman to provide a forum to allow the North Dakota and Missouri delegations, along with adjacent states, to resolve their concerns.

C-BAND INDUSTRY

Mr. STEVENS. Mr. President, I would like to engage the Senator from Utah, the chairman of the Judiciary Committee, in a colloquy.

As the Senator knows, the C-Band industry is declining and the conferees correctly exempted existing C-Band consumers from numerous provisions in this bill at my request. It is my understanding the conferees sought to exempt the C-Band industry from the program exclusivity rules that we are applying in the satellite bill. Complying with the program exclusivity rules would be technically and economically unreasonable for the C-Band industry and would only deprive C-Band consumers with some of their favorite programming.

Mr. HATCH. Yes, the Senator from Alaska is correct; that was the intent of the conferees. And, I appreciate the

Senators concerns and pledge to work with him to ensure that when the FCC promulgates these rules, the C-Band industry is exempt and C-Band consumers are protected.

Mr. STEVENS. I thank the Senator.

Mr. GRASSLEY. I would like to ask the distinguished Chairman of the Committee on Finance a question regarding a tax provision which Congress adopted this summer as part of the vetoed Taxpayer Refund and Relief Act of 1999.

Mr. Chairman, section 1005 of that Act would have provided that the principles of section 482 should be used to determine whether transactions between tax-exempt organizations and related non-exempt entities give rise to unrelated business income tax. This provision was needed to insure that legitimate arms length transactions between these entities are not penalized.

Unfortunately, it appears that this session will end without our having another opportunity to once again enact this vitally needed protection for the tax exempt community. As a result, I would like to ask the distinguished Chairman whether he would agree that this provision should be included as a high priority in the first tax vehicle that we adopt in the second session.

Mr. ROTH. I can assure the distinguished Senator that the enactment of this provision, which has already been agreed to by both the House and Senate, is a high priority for our next tax bill.

Mr. NICKLES. I want to join my distinguished colleague from Iowa in his remarks, and also thank our distinguished Chairman for his commitment to enact this provision next year. Tax exempt organizations provide critical services to our communities, and this provision will make it far easier for them to continue to perform these important functions.

Mr. ROTH. I look forward to working with both the Senators from Iowa and Oklahoma next year to provide the relief that this provision would give to the many fine exempt organizations that are awaiting its enactment.

NURSE ANESTHETISTS

Mr. HARKIN. In 1994, the Health Care Financing Administration issued a draft regulation deferring to State law on the issue of physician supervision of certified registered nurse anesthetists (CRNA's). This action was followed—in 1997 by a proposed HCFA rule deferring to State law on this issue. HCFA's rule has been subject to great scrutiny and numerous studies. Nevertheless, HCFA has to date failed to issue its final rule on the matter, and defer this issue to State law. Would the distinguished Chairman of the Senate Labor, Health and Human Services, and Education Appropriations Subcommittee agree with this assessment?

Mr. SPECTER. I agree with my distinguished colleague, the ranking sub-

committee member. States should have the authority to regulate CRNA's in the same manner as States regulate other health care providers. There is a wealth of information already in existence that supports the view that the issue of supervision should be left to the States, just as HCFA has proposed.

Mr. HARKIN. Therefore, we agree that HCFA's proposed rule has been extensively researched and that HCFA should move forward expeditiously.

Mr. GORTON. I join with my distinguished colleagues to agree that HCFA should move forward expeditiously to resolve this issue.

Mr. SPECTER. Absolutely, HCFA should do what it has initially proposed several years ago and defer to State law on this issue.

Mr. GORTON. I thank the Senators. I look forward to working with them both to resolve this matter.

Mr. HOLLINGS. As you know, I initially objected to the movement of this legislation because of my concerns about the manner in which it preempted state law. As introduced, this bill would have nullified any ability of state legislatures to adopt the Uniform Electronic Transactions Act, (UETA), in a manner that varied from the provisions of the bill, or in a manner that reserved the right of states to adopt UETA in conformance with their consumer protection laws. When the bill was reported by the Commerce Committee, provisions were included to provide states this flexibility. Since the reporting of the bill, the preemption language has been amended to provide that to avoid adherence to the federal law, a state must adopt UETA "in the form, or any substantially similar variation" as provided to the states by the National Conference on Uniform State Law.

Do you agree that notwithstanding this change, the purpose and intent of the preemption provisions, either pursuant to the definitions in the bill or otherwise, have not changed? And that the legislation, in its current form, is intended to permit states the flexibility of adopting and enacting UETA in a manner and form that ensures its conformance with state consumer protection laws?

Mr. ABRAHAM. Yes, Senator Hollings, that is certainly the intent of the legislation in its current form, but I would note that there must be a modicum of common sense involved in this approach. It is expected that states will pass consumer protection provisions in conjunction with the Electronic Transactions Act. It is important, however, that states not use the heading of "consumer protection" to enact changes which are inconsistent with the spirit of UETA and which threaten to undermine the uniformity which UETA is intended to convey. I believe the current language realizes these important goals.

Mr. HOLLINGS. I would like to address another change to the bill since its reporting by the Committee. As you know, the legislation has been amended to incorporate language providing that the bill applies to the business of insurance. This language has the effect of permitting the validation of insurance contracts pursuant to electronic commerce. As you know, state insurance commissioners have expressed reservations about this provision. There is concern that the provision could potentially adversely affect the ability of states to maintain their full regulatory authority over these transactions. Do you agree that insurance companies that enter into agreements via electronic commerce are still required to meet all other state insurance regulatory requirements?

Mr. ABRAHAM. I agree wholeheartedly. The purpose of this section is to permit insurance companies to use electronic signatures in the same manner and extent as other market participants. Under no circumstances is the legislation intended to allow insurance companies to evade state insurance regulations.

Mr. BURNS. As the sponsor of the low power television provisions contained in the Intellectual Property and Communications Omnibus Reform Act of 1999, I would like to take this opportunity to clarify one of the provisions. Specifically, I want to ensure that a qualified low power television (LPTV) station in New York City serving the Korean-American community on Channel 17 (WEHR/LP), formerly W17BM) is not prohibited from obtaining Class A licensing as a result of Sec. 5008(f)(7)(C)(ii) of the Act.

As drafted, Section 5008(7)(C)(ii) requires a qualified LPTV station to demonstrate that it will not interfere with land mobile radio services operating on Channel 16 in New York City in order to obtain the Class A license. However, in 1995, the Commission authorized public safety agencies to use Channel 16 in New York City on a conditional basis pursuant to a waiver of the Commission's rules. The Order granting that waiver specifically stated that the low power television station on Channel 17 would not have any responsibility to protect land mobile televisions on adjacent Channel 16. Do you agree with my understanding of Section 5008(f)(C)(ii), namely that this section is not intended to prevent that low power station's qualification for the Class A license?

Mr. HATCH. Yes, it is also my understanding that the low power station on Channel 17 in New York City should not be precluded from the Class A license due to Section 5008(f)(7)(ii). The interference that is currently permitted by the Commission is intended to continue. Is this also your understanding Senator Moynihan?

Mr. MOYNIHAN. Yes, it is. Otherwise, the Channel 17 LPTV station in

New York City will be permanently deprived of a Class A license, notwithstanding the fact that it exemplifies exactly the type of low power station that should have the opportunity to achieve Class A status. WEBR(LP) has a demonstrated strong commitment to the local Korean community in New York, providing locally originated programming 24 hours a day, 7 days a week. This station's worthwhile service to the community has been a benefit to the public good, and this legislation should not thwart such service from continuing.

THE SCOPE OF COMPULSORY LICENSES FOR
TELEVISION BROADCAST SIGNALS

Mr. HATCH. Mr. President, the measure before us contains some technical amendments to various provisions of the Copyright Act, including sections 111 and 119, which deal with the cable and satellite compulsory licenses, respectively. It is important to emphasize that these technical amendments make no change whatsoever in the key definitional provisions of these two compulsory licenses. Section 111(f) defines "cable systems," and section 119(d)(6) defines "satellite carrier." Neither of these definitions is changed by the measure before us.

Mr. LEAHY. Will the Senator from Utah yield for a question?

Mr. HATCH. I am glad to yield to my friend from Vermont.

Mr. LEAHY. I thank the Senator with whom I worked on this important legislation. Does he agree that these definitions should be interpreted in exactly the same way after enactment of this legislation as they were interpreted before its enactment?

Mr. HATCH. The Senator is correct. In other words, if a facility qualified as a "cable system" under section 111(f) prior to the enactment of this measure, it should also qualify after enactment. Conversely, if a facility did not meet the definition of "cable system" before this measure was enacted, it still would not meet that definition after enactment, and therefore the operations of that facility could not rely upon the cable compulsory license established by section 111. And an entity which was not entitled to claim the section 119 compulsory license because it did not meet the definition of a "satellite carrier" prior to enactment of the measure before us would be in exactly the same position after enactment, that is, it could not claim the satellite compulsory license under section 119.

Mr. LEAHY. I appreciate that response.

Mr. HATCH. I would point out that none of this is affected by the fact that in any earlier version of this legislation, there were technical amendments that would have affected these definitions. Those particular amendments do not appear in this legislation, and neither their inclusion in the earlier

version nor their omission here has any legal significance. Would the Senate from Vermont agree with that statement?

Mr. LEAHY. I would, and I would hope that both the Copyright Office and the courts would take the same approach. In that regard, I would ask my friend from Utah, the chairman of the Judiciary Committee, for his understanding of the current state of the law concerning the availability of these compulsory licenses to digital online communications services?

Mr. HATCH. In reply to that question, I would say that certainly under current law, Internet and similar digital online communications services are not, and have never been, eligible to claim the cable or satellite compulsory licenses created by sections 111 or 119 of the Copyright Act. To my knowledge, no court, administrative agency, or authoritative commentator has ever held or even intimated to the contrary.

Mr. LEAHY. Is the distinguished chairman aware of the views of the Copyright Office on this question? After all, since the Copyright Office administers these compulsory licenses, their views are of particular importance.

Mr. HATCH. The Copyright Office studied this issue exhaustively in 1997 and came to the same conclusion which I have just stated. In fact, in undertaking the study, the Copyright Office asked the fundamental question whether a statutory license should be created for the Internet. The underlying assumption of the question was that there was not, and never was, a statutory license applicable to the Internet. In response, there was little or no comment challenging that assumption. And I would point out that valid exercises of the Office's statutory authority to interpret the provisions of these compulsory licensing schemes are binding on the courts.

Mr. LEAHY. I recall the Copyright Office's 1997 study, entitled "A Review of the Copyright Licensing Regimes Covering Retransmission of Broadcast Signals," which concluded that no existing statutory license authorizes retransmission of television broadcast signals via the Internet or any online service. We held a hearing on that report. I recently received a letter from the Register of Copyrights reaffirming this interpretation. Indeed, in that letter, dated November 10, 1999, the Register stated that "the compulsory license for secondary transmissions of television broadcast signals by cable systems does not apply to digital online communication services," and specifically that "the section 111 license does not and should not apply to Internet transmissions."

Mr. HATCH. I also received such a letter from the Register. And along the same lines, I have received a letter on this issue from one of America's most

distinguished copyright scholars, Professor Arthur Miller of Harvard Law School. Professor Miller's interpretation of the scope of eligibility for these compulsory licenses under current law appears to be very similar to the Register's, and his letter also underscores the point I was making earlier, that there is no legal significance to the fact that this legislation omits certain technical amendments to the definition of "cable system" and "satellite carrier" that appeared in earlier versions of this legislation. I ask unanimous consent that these letters be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE REGISTER OF COPYRIGHTS
OF THE UNITED STATES OF AMERICA,

Washington, DC, November 10, 1999.

Hon. ORRIN G. HATCH,
Chairman, Committee on the Judiciary,
U.S. Senate, Washington, DC.

DEAR SENATOR HATCH: I am writing to you today concerning pending proposals regarding the Satellite Home Viewer Act, and particularly the compulsory copyright licenses addressed by that Act. As the director of the Copyright Office, the agency responsible for implementing the compulsory licenses, I have followed the actions of the Congress with great interest.

Let me begin by thanking you for all your hard work and dedication on these issues, and by congratulating you on your success in achieving a balanced compromise. Taken as a whole, the Conference Report on H.R. 1554, the Intellectual Property and Communications Omnibus Reform Act of 1999, represents a clear step forward for the protection of intellectual property. I particularly appreciate your support for provisions that improve the ability of the Copyright Office to administer its duties and protect copyrights and related rights.

I was greatly concerned when I heard the statements of Members on the floor of the House suggesting that in the final few legislative days of this session, subsection 1011(c) of the Conference Report should be amended or removed. Section 1011(c) makes unmistakable what is already true, that the compulsory license for secondary transmissions of television broadcast signals by cable systems does not apply to digital on-line communication services.

It is my understanding that some services that wish to retransmit television programming over the Internet have asserted that they are entitled to do so pursuant to the compulsory license of section 111 of Title 17. I find this assertion to be without merit. The section 111 license, created 23 years ago in the Copyright Act of 1976, was tailored to a heavily-regulated industry subject to requirements such as must-carry, programming exclusivity and signal quota rules—issues that have also arisen in the context of the satellite compulsory license. Congress has properly concluded that the Internet should be largely free of regulation, but the lack of such regulation makes the Internet a poor candidate for a compulsory license that depends so heavily on such restrictions. I believe that the section 111 license does not and should not apply to Internet transmissions.

I also question the desirability of permitting any existing or future compulsory license for Internet retransmission of primary

television broadcast signals. In my comprehensive August 1, 1997 report to Congress, *A Review of the Copyright Licensing Regimes Covering Retransmission of Broadcast Signals*, Internet transmissions were addressed in Chapter VIII, entitled "Should the Cable Compulsory License Be Extended to the Internet?" the report concluded that it was inappropriate to "bestow" the benefits of compulsory licensing on an industry so vastly different from the other retransmission industries now eligible for compulsory licensing under the Copyright Act."

The report observed that "Copyright owners, broadcasters, and cable interests alike strongly oppose . . . arguments for the Internet retransmitters' eligibility for any compulsory license. These commenters uniformly decry that the instantaneous worldwide dissemination of broadcast signals via Internet poses major issues regarding the United States and international licensing of the signals, and that it would be premature for Congress to legislate a copyright compulsory license to benefit Internet retransmitters at this time." The Copyright Office believes that there would be serious international implications if the United States were to permit statutory licensing of Internet transmissions of television broadcasts.

Therefore I urge that no action be taken to remove or alter section 1011(c) of the Conference Report. At this point, to do so could be construed as a statement that digital online communication services are eligible for the section 111 license. Such a conclusion would be reinforced in light of section 1011(a)(1), which replaces the term "cable system" in section 111 of Title 17 with the term "terrestrial system." In the absence of section 1011(c), section 1011(a)(1) might incorrectly be construed as implying a broadening of the section 111 license to include Internet transmissions.

The Internet is unlike any other medium of communication the world has ever known. The application of copyright law to that medium is of utmost importance, and I know that you have personally invested a great deal of time and energy in recent years to assure that a balance of interests is reached. Permitting Internet retransmission of television broadcasts pursuant to the section 111 compulsory license would pose a serious threat to that balance.

Please feel free to contact me if I can be of any assistance in this matter. Thank you.

Sincerely,

MARYBETH PETERS,
Register of Copyrights.

HARVARD LAW SCHOOL,
Cambridge, MA, November 15, 1999.

Hon. ORRIN G. HATCH,
Chairman, Judiciary Committee,
U.S. Senate, Washington, DC.
Hon. HENRY J. HYDE,
Chairman, Judiciary Committee,
House of Representatives, Washington, DC.

DEAR CHAIRMEN HATCH AND HYDE: I am writing to you to express my views on a proposal to amend the cable and satellite compulsory licenses in Sections 111 and 119 of the Copyright Act. I have taught Copyright Law at Harvard Law School, as well as Michigan and Minnesota, for over thirty-five years and have written extensively and lectured throughout the world on this area of the law. In addition, I was very active in the legislative process that led to the Copyright Act of 1976 and was appointed by President Ford and served as a Commissioner on the Commission for New Technological Uses of Copyright Works (CONTU).

The Conference Report on H.R. 1554, the Intellectual Property and Communications Omnibus Reform Act of 1999, included amendments to Sections 111 and 119 to state explicitly that digital online communication services do not fall within the definitions of "satellite carrier" and "terrestrial system" (currently "cable system") and, therefore, are not eligible for either compulsory license. I understand that Congress is currently considering deleting these amendments or enacting legislation that would not include them. I believe that the amendments were wholly unnecessary and that the deletion or exclusion of them will have no effect on the law, which is absolutely clear: digital online communication services are not entitled to the statutory license under either Section 111 or Section 119 of the Copyright Act.

A compulsory license is an extraordinary departure from the basic principles underlying copyright law and a substantial and significant encroachment on a copyright owner's rights. Therefore, any ambiguity in the applicability of a compulsory license should be resolved against those seeking to take advantage of what was intended to be a very narrow exception to the copyright proprietor's exclusive rights. As the Fifth Circuit Court of Appeals has noted in a case involving another compulsory license: the compulsory license provision is a limited exception to the copyright holder's exclusive right to decide who shall make use of his (work). As such, it must be construed narrowly, lest the exception destroy, rather than prove, the rule.

Fame Publishing Co. v. Alabama Custom Tape, Inc., 507 F.2d 667, 670 (5th Cir. 1975).

In this situation, however, there is absolutely no ambiguity as to the correct construction of the cable and satellite compulsory licenses. Neither the language of the Copyright Act, nor any statement of Congressional intent at the time of their enactment, nor any judicial interpretation of Section 111 or Section 119 in any way suggests that these compulsory licenses could apply to digital online communication services. And, as far as I know, the representatives of these services have not offered any substantive argument to the contrary—with good reason. No reasonable person—or court—could interpret these statutory licenses to embrace these services.

And if there was any doubt left in anyone's mind, the federal agency charged with interpreting and implementing these statutory licenses, the United States Copyright Office, has addressed this issue directly: retransmitting broadcast signals by way of the Internet is clearly outside the scope of the current compulsory licenses. In fact, the Copyright Office recommended in 1997 that Congress not even create a new compulsory license, concluding that it would be "inappropriate for Congress to grant Internet retransmitters the benefits of compulsory licensing." See U.S. Copyright Office, *A Review of the Copyright Licensing Regimes Covering Retransmission of Broadcast Signals* (August 1, 1997), at 99 and Executive Summary at xiii.

My work in the field of copyright over the past decades, especially my extensive activities in connection with the development of the legislation that became the Copyright Act of 1976, leads me to agree with the Office's conclusions that it would be far too premature to extend a compulsory license to the Internet. That conclusion seems sound given the enormous differences between the Internet and the industries embraced by the existing licensing provisions and the need to

engage in extensive research and analysis regarding the potentially enormous implications of digital communications. We simply do not know enough to legislate effectively at this point. Doing so at this time—especially without hearing from numerous affected interests—would create a risk of upsetting the delicate balance between the rights of copyright proprietors and the interests of others.

Thus, in any judicial action that might materialize by or against the providers of digital online communication services, the court would be bound by the Copyright Office's interpretation of the statutory licenses. See *Cablevision Systems Development Co. v. Motion Picture Association of America, Inc.*, 836 F.2d 599, 609-610 (D.C. Cir. 1988) (deferring to the Copyright Office's interpretation of Section 111, noting Congress' grant of statutory authority to the Copyright Office to interpret the Copyrights Act, and the Supreme Court's indication that it also would defer to the Copyright Office's interpretation of the Copyright Act), *Satellite Broadcasting and Communications Assoc. v. Oman*, 17 F.3d 344, 345 (11th Cir. 1994) (holding that valid exercises of the Copyright Office's statutory authority to interpret the provisions of the compulsory licensing scheme are binding on the court).

In summary, based on the unmistakable fact that digital online communication services are ineligible for the cable and satellite compulsory licenses and the identical, unequivocal interpretation by the Copyright Office, amendments to the existing statute reiterating this legal truth are unnecessary. Consequently, the status quo with respect to who is eligible for the statutory licenses will remain undisturbed whether Congress deletes these amendments from the pending legislation or excludes them from subsequent legislation.

Respectfully yours,

ARTHUR R. MILLER,
Bruce Bromley Professor of Law.

Mr. LEAHY. I thank my colleague from Utah for his responses. I believe this colloquy should help to clarify that this legislation leaves these crucial definitions unchanged, and also to clarify what is the current state of the law, which this legislation does not disturb.

Mr. HATCH. I think the Senator from Vermont. And I would clarify one other point relating to a minor modification we made to the definition of "unserved household" in the distant signal satellite statutory license found in section 119 of Title 17 of the United States Code. The conferees decided to add the word "stationary" to the phrase "conventional outdoor rooftop receiving antenna" in Section 119(d)(10) of the Copyright Act. As the Chairman of the Conference Committee and of the Senate Judiciary Committee, and of which has jurisdiction over copyright matters, I should make clear that this change should not require any alteration in the methods used by the courts to enforce the "unserved household" limitation of Section 119. The new language states only that the antenna is to be "stationary"; it does not state that the antenna is to be misoriented (*i.e.*, pointed away from the station in question). Any interpretation that assumed misorientation

would be inconsistent with the basic premise of the definition of "unserved household," which defines that term in relation to an individual TV station rather than to all network affiliates in a market—and speaks to whether a household "cannot" receive a Grade B intensity signal from a particular station. If a household can receive a signal of Grade B intensity with a properly oriented stationary conventional antenna, it is not "unserved" within the meaning of Section 119. In addition, if station towers are located in different directions, conventional over-the-air antennas can be designed so as to point towards the different towers without requiring the antenna to be moved. And reading the definition of "unserved household" to assume misoriented antennas would mean that the "unserved household" limitation had no fixed meaning, since there are countless different ways in which an antenna can be misoriented, but only one way to be correctly oriented, as the Commission's rules make clear.

With that clarification, I yield the floor.

PATENT REFORM LEGISLATION

Mrs. FEINSTEIN. I want to thank the Chairman and the Ranking Member for their tireless efforts on patent reform. I strongly support passage of S. 1798, which is included in this omnibus measure, because so many companies in California and across the nation depend on a strong and well-functioning patent system.

While S. 1798 will provide important protection for inventors and innovators and help reduce needless patent litigation, I do have some concerns regarding the compromise reached regarding the reexamination procedure set forth in Title VI. As I understand it, this section will reduce the burden of patent cases in our federal courts. However, we need to be sure that the procedure fully and fairly protects the rights of all parties, and some concerns about this process have been brought to my attention over the last few weeks.

Out of deference to the Chairman and the Ranking Member of the Judiciary Committee, and being sensitive to the compromise that the House reached, I did not seek amendments to this title of the bill. Furthermore, I feel strongly that the bill should move forward without further delay, so I support its final passage. This does not mean, however, that I believe we should cease to be concerned about how the new system will function. Accordingly, I would like to receive assurances from Chairman HATCH that we will keep a close eye on how well this new reexamination system works. In particular, I would like to request that the Committee obtain an interim report from the Patent and Trademark Office under the authority specified in section 606 of S. 1798 not later than 18 months after this bill becomes effective. I would also invite

Chairman HATCH to hold a hearing to consider this information, and to obtain views from people who both supported and opposed this compromise system.

Mr. HATCH. I thank the Senator from California for her remarks and appreciate her support for this important legislation. I agree that Congress must closely monitor the effectiveness and fairness of the new reexamination procedure. I also believe it would be very useful to obtain the interim report she mentioned in a timely fashion and look forward to continuing to work with her on this issue.

CPB LIST SHARING PROVISION

Mr. McCONNELL. Mr. Chairman, I would like to engage with you in a colloquy concerning the Corporation for Public Broadcasting (CPB) list-sharing prohibition in the Intellectual Property and Communications Reform Act.

Mr. HATCH. I would be happy to.

Mr. McCONNELL. The bill amends Section 396(h) of the Communications Act to prevent public broadcasting entities that receive federal funds from renting or exchanging lists with political candidates, parties or committees.

Mr. Chairman, am I correct in reading this language as providing that the list-sharing restriction only applies to the CPB and not any other organizations?

Mr. HATCH. That is correct.

Mr. McCONNELL. Mr. Chairman, in my view, CPB is a unique entity and its unique nature may be used by supporters of this provision to justify the restrictions on list sharing. CPB is unique because it is created, controlled and funded by the government with a legal obligation to be balanced and objective.

Many non-profit organizations rely upon exchanges of lists with political organizations as a way to attract new members to their organizations to support their charitable works. A number of mainstream non-profit organizations, such as the Disabled Veterans of America, have expressed concern that this CPB provision may set a precedent for future restrictions on list sharing by other non-profit organizations. It is my understanding, however, that this list sharing restriction is not a precedent for similar restrictions on other non-profits that are not: (1) created by the federal government; (2) controlled by the federal government; (3) funded by the federal government; and (4) legally required to be balanced and objective. Thus, I do not think this provision relating to CPB is a precedent for imposing such restrictions on other non-profits. Does the Chairman agree with my assessment?

Mr. HATCH. Yes, the Senator's assessment is correct. The conferees included the CPB list-sharing language in the bill because of concerns related to CPB's unique status. This provision should in no way be interpreted as

precedent for restrictions on list sharing by other non-profit organizations that may receive federal funds.

Mr. MURKOWSKI. Mr. President, I would like to ask a question of the senior Senator from Alaska, Mr. Stevens, in his capacity as chair of the full Committee on Appropriations, and the senior senator from Washington, Mr. GORTON, who is chair of the Interior Subcommittee, regarding clarification of a vital issue facing the State of Alaska.

The Year 2000 will be the 20th anniversary of the passage of the Alaska National Interest Lands Conservation Act of 1980. ANILCA is the most far-reaching piece of legislation ever passed—in the history of the United States—in terms of creating massive set-asides for conservation purposes.

Last year, in the appropriations conference report, Congress passed specific language requiring that the federal managers chosen from around the United States to oversee the implementation of ANILCA's Conservation Units receive adequate, in-depth training on its many components and ramifications. The language read as follows:

The Committees agree that the Secretary of the Interior and the Secretary of Agriculture should provide comprehensive training to land managers on the history and provisions of statutes affecting land and natural resource management in Alaska, including but not limited to Revised Statute 2477, the Act of May 17, 1906 (34 Stat. 197), the Alaska Statehood Act, the Mineral Leasing Act of 1920, the White Act, the Alaska National Interest Lands Conservation Act, the Alaska Native Claims Settlement Act, and the Magnuson-Stevens Fishery Conservation and Management Act.

When this language passed it was our hope that this training would also be provided to those employees who manage programs in Alaska and to employees whose jobs entail knowledge of one or more of the laws described above.

I want to further clarify that it is our hope that the Secretary of the Interior and the Secretary of Agriculture would enter into an agreement with, and provide funding to, Alaska Pacific University, in conjunction with University of Washington School of Law and Northwestern School of Law, Lewis and Clark College, to develop and conduct training.

I feel training in these laws very specific to Alaska is badly needed, as most federal employees arriving in the state know little about Arctic and sub-Arctic environments. Many people coming to Alaska imagine incorrectly that the statute governing Alaska's federal Parks and Refuges is identical to those they have worked with in the South 49. This, of course, is far from the truth.

Because of the dimensions of ANILCA's reclassification of Alaska's lands, encompassing more than 104 million acres, an area larger than the State of California, the Congress rightfully tailored the law with a series of Alaska-specific provisions, unfamiliar

to other states. The purpose of these provisions was clearly intended to ensure that these land designations protect the natural glories of Alaska's most beautiful regions but neither destroy the way of life of Alaska's Native people nor violate the promises made to all Alaskans in the Compact made between our people and the U.S. Government in the Alaska Statehood Bill.

During the August recess, I held hearings in Alaska to discover how the federal managers of the federal Conservation Units in Alaska are doing in carrying out and living by the provisions required in the law. Sadly, I must report a long litany of abuses being suffered by Alaskans as individuals, as outdoor sports participants, as business owners, and as a community due to ignorance by federal managers. Much of this ignorance is through honest misunderstanding of the Statute. I, therefore, ask my honorable colleagues to respond to my query about the status of the language passed last year that would fill this void.

I also want to call to your attention that Alaska Pacific University's Institute of the North has followed up on that language, and is inaugurating a semester course this coming semester addressing all of these issues on the 20th anniversary of ANILCA. All stakeholders—from conservationists to Native peoples to resource harvesters—will be part of the discussions and learning process. The University is working with Lewis and Clark's Northwestern School of Law to develop the needed legal research in this area. And while the University was invited to participate at its own expense in the one-day ANILCA training held here in Washington this spring, I believe the Interior Department and the Department of Agriculture have done no more than that to fulfill Congressional intent.

I believe a good curriculum can be developed at a cost of some \$300,000, a small investment for an issue this important. The existing course can be reformatted in a thorough but intensive week-long seminar and delivered specifically for the federal employees who constantly are rotated into Alaska to serve on the front line of this pioneering experiment in conservation and sustainable development.

Mr. STEVENS. Mr. President, I agree with my colleague, the Chairman of the Committee on Energy and Natural Resources. The Senator from Alaska and the Senator from Washington will remember that I asked that the language in the conference report be inserted last year. I, too, am concerned that no action has taken place. It is my intent, as chairman of this committee, that the training called for in last year's conference report take place, and that the program led by Alaska Pacific University, in conjunction with two of the closest law schools

in Washington and Oregon, take place. There are sufficient funds in the training budgets of the several Interior agencies to make this happen, and I believe it should happen in conjunction with the outside resources who are developing this curriculum. While I participated in the program held in Washington, DC, on this issue, I would hope that a greater effort is put forth in the future.

Mr. GORTON. Mr. President, I concur with the Alaska Senator's intent, and I believe the Interior and Agriculture budgets are sufficient to allow the Department to contract with these schools to provide the training we called for. Each of these Alaska laws referred to in the report language last year is important, is unique, and needs appropriate training for our managers to ensure that Congressional intent is followed.

Mr. MURKOWSKI. Thank you, Mr. President, and through the chair, thank you to my colleagues. We have considered making this a legal requirement in an amendment to law, but I believe this year—in the 20th anniversary of ANILCA—we should see that the training gets started. We will be following it closely in the year to come, and we appreciate the comments provided by the committee chairman and the manager of the bill.

BLM CLOSURE OF TWIN FALLS AIRTANKER RELOAD BASE

Mr. CRAIG. Mr. President, I would like to discuss with the Chairman of the Interior Appropriations Subcommittee a problem that has come up in Twin Falls in my State of Idaho. In July 1998, the Bureau of Land Management's state office closed the tanker resupply base at the Twin Falls airport, after an internal inspection indicated unsafe conditions. At the time of that closing, the BLM Shoshone and state BLM offices expressed their interest in re-opening the facility as soon as possible. Over the following months, discussions between BLM and local officials included mention of re-opening as early as during fiscal year 2000.

Then, approval and timing of the project appeared to enter a twilight zone somewhere between south Idaho and Washington, DC. In February of this year, a project data sheet was produced showing a request for FY 2001. Local officials in Twin Falls were told that this delay was the result of no prioritization decision being made at the national level, and that FY 2001 was going to be the earliest year for which the request could be made. Subsequently, local officials were told both, that no final decisions had been made, and that the project had slipped to a lower priority and would be delayed at least until FY 2002.

Prompt replacement of this airtanker reload base is important for several reasons. It is the only such base within 100 miles of most of the Idaho-

Nevada border and is therefore situated to provide the fastest possible response in the area during the fire season. Because of the location of the airport and its clear departure paths, it offers fast, safe turnaround times. Many customers in addition to BLM need a base in this area. If the base is not re-opened soon, it will hurt airport operations and hurt the local economy.

I am not suggesting to the Chairman that anyone is acting inappropriately. But I do think it is important for us to look into the matter, find out more about the decisionmaking process and what it is producing, consider what the fairest, most prompt outcome should be, and engage with BLM to arrive at that solution.

Mr. GORTON. I appreciate the gentleman bringing this to the Subcommittee's attention. I certainly can understand the Senator's concern with the closure of this base and his constituents' frustration with seemingly inexplicable delays in making progress toward a re-opening. I look forward to working with the Senator and with BLM, to look into this matter and arrive at the best, earliest possible resolution.

DESULFURIZATION (BDS) GRANT

Mr. STEVENS. The FY 2000 Interior Appropriations conference report provides a grant to a refinery in Alaska for a pilot project to demonstrate the effectiveness of diesel biocatalytic desulfurization technology, or BDS for short. This technology holds great promise for helping our petroleum refining industry reduce the sulfur content of diesel fuel in order to meet new EPA regulations. Would the Chairman of the Subcommittee clarify a couple of points about this grant?

Mr. GORTON. Certainly.

Mr. STEVENS. It is my understanding that the Chairman intends for this grant to be made available only to a refinery owned by a small business in Alaska. Is that correct?

Mr. GORTON. The Senator is correct. I understand that the BDS technology is ideally suited to small refineries. Therefore, I believe that the grant should be made available only to a refinery that meets the Small Business Administration's definition of small; that is, less than 75,000 barrels per day capacity of petroleum-based inputs and less than 1,500 employees.

Mr. STEVENS. Why is the BDS technology better suited to small refineries?

Mr. GORTON. It has to do with the nature of the technology itself. As the Senator may know, diesel engine manufacturers currently are in the process of developing new technologies with the potential to radically reduce harmful diesel emissions, but which will require fuel with very low sulfur content in order to work effectively. To reduce the environmental impact of diesel emissions, the EPA is considering new

regulations which would require significant reductions in the sulfur content of diesel fuel.

Large-scale, fully-integrated refineries are capable of cost-effectively producing low-sulfur diesel fuel using the traditional technology for removing sulfur from gasoline and diesel fuel, called hydrodesulfurization, or HDS. However, small refineries do not have that capability. HDS is a highly complex, energy intensive, and expensive process. As a result, it is not well-suited to small refineries, which generally are much more simply configured and produce a smaller variety and quantity of refined products than large refineries, and therefore cannot justify the expense of building and operating HDS units.

BDS, on the other hand, is a simple, efficient, and low cost technology which uses much less energy than the traditional HDS technology. A BDS unit is likely to cost 50% less to construct and operate than a traditional HDS unit. For these reasons, BDS technology is particularly well-suited to small refineries and holds great promise as a cost-effective alternative for producing low-sulfur diesel fuel. Because small refineries will be the principal users of the BDS technology if it works like we hope it will, it makes sense to first try it out at a small refinery. Therefore, we believe that the grant for a demonstration project should be directed to a small refinery.

Mr. STEVENS. Thank you.

Mr. CRAIG. Senator GORTON, I have in my hand a copy of an August 27 order from Judge William Dwyer instructing the parties in a lawsuit over timber sales in the Pacific Northwest to negotiate a settlement regarding a requirement to survey for 77 species of mollusks, lichens, bryophytes, salamanders and slugs prior to conducting ground disturbing activities. This lawsuit has held up over one quarter of a billion board feet of federal timber sales.

Let me read a single sentence from the Judge's order:

Negotiations should now be resumed, should include the defendant-interveners, and should explore short-term solutions that would reduce the impact of injunctive relief on logging contractors and their employees while complying with the Northwest Forest Plan.

I have been advised by media accounts that the settlement announced, with great fanfare, by Under Secretary Jim Lyons yesterday did not involve the "defendant-interveners." Indeed, in his public comments Mr. Lyons indicates that, the defendant-interveners were excluded from discussions. Defendant-interveners have been unsuccessful in even securing basic information that the government currently has available about affected sales. Furthermore, the settlement did not "reduce the impact of injunctive relief on log-

ging contractors and their employees" at all. Instead, it actually expanded the injunction by adding four more sales to the dozens that are already either enjoined by the Court, or not awarded by a decision of the Administration. Mr. Lyons gave the environmental plaintiffs more than what Judge Dwyer ordered in his original decision simply to settle the case and claim that his Northwest Forest Plan was "back on track." This seems more like a capitulation, rather than a settlement.

Mr. GORTON. The Senator is correct. Additionally, I also understand that the day before this "deal" was announced, Judge Dwyer held a status conference with all the parties, including the defendant-interveners. The government attorneys told him that no agreement had been reached, and that the next mediation session was to occur on December 2. The Judge then set December 3 for the next status conference. Apparently, this Administration has as much trouble speaking with any probity to the Judicial Branch as they have recently with the Congress. It appears that the Judge's admonition to include the "defendant-interveners" in the discussions was ignored.

Mr. CRAIG. Senator, I also understand that Section 334 of the Interior Appropriations Bill was dropped, in part, because of concerns by the Administration that the measure would disrupt the negotiations that were underway, and could prevent the release of any of the enjoined timber sales. But, the settlement announced yesterday will not release any of the enjoined sales.

To add insult to injury, Mr. Lyons is nevertheless claiming that the settlement he announced yesterday will, indeed, allow the sales to go forward. I understand that nothing could be further from the truth. These sales are still on hold while the Forest Service tries to figure out how to search for slugs, slime and salamanders. Most importantly, the Administration is not willing to commit to a time-frame to complete these surveys. I believe this is a wrong that must be corrected.

Mr. GORTON. I concur with the observations of my colleague from Idaho. The sales in question have not been made available to operate. They are still subject to the impossible survey requirements that caused the injunction to begin with. That is why I would urge the Administration in the strongest terms to return to the negotiating table with the defendant-interveners and address their concerns.

Specifically, there should be an agreed-upon time-frame and a date certain for the completion of the agreed-upon survey requirements. Failure to conduct a good-faith effort to complete the settlement process in the fashion ordered by the Judge should be grounds for withholding final approval of the agreement.

Mr. CRAIG. I agree. It seems to me that, based upon the Administration's performance, Congress should reinstate Section 334 or some similar measure in the FY2000 Supplemental Appropriations bill and direct the Administration to release these sales immediately. The Administration's present course will keep this conflict alive interminably, and expose the taxpayers to the liability of damage claims from contract holders. Moreover, this consistent record of deceit and chicanery from the Administration must stop. We made a good faith effort to respond to the Administration's concerns over Section 334 based, in part, on its promise to negotiate a fair settlement of this legal dispute. Not only did they not do that, they now have the audacity to claim publicly that they did, and spin their announcement in the most shameful of ways. If truth is the coin of the realm, Mr. Lyons and his cohorts are hopelessly bankrupt.

Mr. SMITH of New Hampshire. I would like to ask the Chairman of the Interior Appropriations subcommittee to clarify some matters concerning the President's American Heritage Rivers initiative that concerns the Interior and related agencies portion of the appropriations act. Senator GORTON, is it your understanding that there is nothing in this bill that authorizes the American Heritage Rivers initiative?

Mr. GORTON. Yes, I would like to clarify that matter. There is no language whatsoever in the Interior portion that provides an authorization for the American Heritage Rivers Initiative.

Mr. SMITH of New Hampshire. Thank you Mr. Chairman. In addition, is it true that there is no separate appropriation for the American Heritage Rivers initiative in the Interior portion of the bill?

Mr. GORTON. Yes, it is true that there is no appropriation for the American Heritage Rivers initiative in the appropriations act. In fact, the bill includes in Title three a provision that clearly prohibits the transfer of any funds from this act to the Council on Environmental Quality (CEQ) for purposes related to the American Heritage Rivers initiative.

Mr. SMITH of New Hampshire. Thank you Mr. Chairman. In addition, can you comment on some guidance that you have given the Forest Service in your statement to the managers?

Mr. GORTON. Yes, certainly. The statement of the managers provides a limitation on spending for the Forest Service for purposes related to designated American Heritage Rivers. This is not an appropriation, but it provides a maximum that may be spent from funds appropriated for other purposes on any efforts that are consistent with existing authorized programs. I would also like to point out that the Interior subcommittee has questioned

this initiative previously. The Committee reports accompanying the FY 1999 bill clearly stated that efforts on this initiative by agencies covered by the Interior bill must complete with, or be normal part of, the authorized program of work of the agency.

INTELLECTUAL PROPERTY AND
COMMUNICATIONS

Mr. SCHUMER. Mr. President, I rise today in support of the revised "Intellectual Property and Communications Omnibus Reform Act of 1999" (H.R. 1554). As a Member of the Judiciary Committee, I am particularly pleased that this legislation includes as Title IV, the "American Inventors Protection Act of 1999." This important patent reform measure includes a series of initiatives intended to protect rights of inventors, enhance patent protections and reduce patent litigation.

Perhaps most importantly, subtitle C of title IV contains the so-called "First Inventor Defense." This defense provides a first inventor (or "prior user") with a defense in patent infringement lawsuits, whenever an inventor of a business method (i.e., a practice process or system) uses the invention but does not patent it. Currently, patent law does not provide original inventors with any protections when a subsequent user, who patents the method at a later date, files a lawsuit for infringement against the real creator of the invention.

The first inventor defense will provide the financial services industry with important, needed protections in the face of the uncertainty presented by the Federal Circuit's decision in the *State Street* case. *State Street Bank and Trust Company v. Signature Financial Group, Inc.* 149 F.3d 1368 (Fed. Cir. 1998). In *State Street*, the Court did away with the so-called "business methods" exception to statutory patentable subject matter. Consequently, this decision has raised questions about what types of business methods may now be eligible for patent protection. In the financial services sector, this has prompted serious legal and practical concerns. It has created doubt regarding whether or not particular business methods used by this industry—including processes, practices, and systems—might now suddenly become subject to new claims under the patent law. In terms of every day business practice, these types of activities were considered to be protected as trade secrets and were not viewed as patentable material.

Mr. President, the first inventor defense strikes a fair balance between patent law and trade secret law. Specifically, this provision creates a defense for inventors who (1) acting in good faith have reduced the subject matter to practice in the United States at least one year prior to the patent filing date ("effective filing date") of another (typically later) inventor; and (2) commercially used the subject mat-

ter in the United States before the filing date of the patent. Commercial use does not require that the particular invention be made known to the public or be used in the public marketplace—it includes wholly internal commercial uses as well.

As used in this legislation, the term "method" is intended to be construed broadly. The term "method" is defined as meaning "a method of doing or conducting business." thus, "method" includes any internal method of doing business, a method used in the course of doing or conducting business, or a method for conducting business in the public marketplace. It includes a practice, process, activity, or system that is used in the design, formulation, testing, or manufacture of any product or service. The defense will be applicable against method claims, as well as the claims involving machines or articles the manufacturer used to practice such methods (i.e., apparatus claims). New technologies are being developed every day, which include technology that employs both methods of doing business and physical apparatus designed to carry out a method of doing business. The first inventor defense is intended to protect both method claims and apparatus claims.

When viewed specifically from the standpoint of the financial services industry, the term "method" includes financial instruments, financial products, financial transactions, the ordering of financial information, and any system or process that transmits or transforms information with respect to investments or other types of financial transactions. In this context, it is important to point out the beneficial effects that such methods have brought to our society. These include the encouragement of home ownership, the broadened availability of capital for small businesses, and the development of a variety of pension and investment opportunities for millions of Americans.

As the joint explanatory statement of the Conference Committee on H.R. 1554 notes, the provision "focuses on methods for doing and conducting business, including methods used in connection with internal commercial operations as well as those used in connection with the sale or transfer of useful end results—whether in the form of physical products, or in the form of services, or in the form of some other useful results; for example, results produced through the manipulation of data or other inputs to produce a useful result." H. Rept. 106-464 p. 122.

The language of the provision states that the defense is not available if the person has actually abandoned commercial use of the subject matter. As used in the legislation, abandonment refers to the cessation of use with no intent to resume. Intervals of non-use between such periodic or cyclical ac-

tivities such as seasonable factors or reasonable intervals between contracts, however, should not be considered to be abandonment.

As noted earlier, Mr. President, in the wake of *State Street*, thousands of methods and processes that have been and are used internally are now subject to the possibility of being claimed as patented inventions. Previously, the businesses that developed and used such methods and processes thought that secrecy was the only protection available. As the conference report on H.R. 1554 states: "(U)nder established law, any of these inventions which have been in commercial use—public or secret—for more than one year cannot now be the subject of a valid U.S. patent." H. Rept. 106-464, p. 122.

Mr. President, patent law should encourage innovation, not create barriers to the development of innovative financial products, credit vehicles, and e-commerce generally. The patent law was never intended to prevent people from doing what they are already doing. While I am very pleased that the first inventors defense is included in H.R. 1554, it should be viewed as just the first step in defining the appropriate limits and boundaries of the *State Street* decision. This legal defense will provide important protections for companies against unfair and unjustified patent infringement actions. But, at the same time, I believe that it is time for Congress to take a closer look at the potentially broad and, perhaps, adverse consequences of the *State Street* decision. I would hope that beginning early next year that the Judiciary Committee will hold hearings on the *State Street* issue, so that Senators can carefully evaluate its economic and competitive consequences.

Mr. TORRICELLI. My college is correct. The *State Street* decision may have unintended consequences for the financial services community. By explicitly holding that business methods are patentable, financial service companies are finding that the techniques and ideas, that were in wide use, are being patented by others.

The Prior Inventor Defense of H.R. 1554 is an important step toward protecting the financial services industry. By protecting early developers and users of a business method, the defense allows U.S. companies to commit resources to the commercialization of their inventions with confidence that a subsequent patent holder will prevail in a patent-infringement suit. Without this defense, financial services companies face unfair patent-infringement suits over the use of techniques and ideas (methods) they developed and have used for years.

While I support the Prior Inventor Defense, as a member of the Judiciary Committee, I hope that we will revisit this issue next year. More must be done to address the boundaries of the

State Street decision with the realities of the constantly changing and developing financial services industry.

I look forward to working with Senator SCHUMER and my colleagues on the committee on this important issue.

Mr. JEFFORDS. Mr. President, I rise today to support an extremely important provision in the budget agreement. A provision which will mean the difference for many dairy farmers around the country on whether they will stay in business or not.

The dairy compromise that is included in the budget agreement will help bring stability to the price dairy farmers around the country receive for their product—as well as protect consumers and processors by helping to maintain a fresh local supply of milk.

The agreement extends the very successful Northeast Dairy Compact and overturns Secretary Glickman's flawed pricing rule, saving dairy farmers around the country millions of dollars in lost income.

Take one look at this chart and you will know why the dairy compromise in the budget agreement is so important to the survival of this country's dairy farmers.

Why, because every farmer in every state in the red would lose money out of their pockets if Secretary Glickman's flawed pricing rule known as option 1-B were to be put in place. The dairy compromise corrects this and creates a pricing formula that is fair for both farmers and consumers.

For three years the farmers in New England have had a program that works. It's called the Northeast Dairy Compact. Because the Dairy Compact pilot program has worked so well—no less than twenty-five states have approved Compacts and are now asking Congress for approval.

Today, I am so pleased two of the people responsible for creating the idea of the dairy compact are here in Washington today. Bobby Starr and Dan Smith are two Vermonters that over 10 years ago put their heads together in an effort to help protect the Vermont way of life.

It was my hope and the hope of the majority of the Senate that we could have expanded the compacts into other regions so other states could benefit from having a means of stabilizing prices for both their farmers and consumers.

Unfortunately, this time we were not able to expand the dairy compact into other regions. However, a great deal of progress has been made as more and more states are seeing the benefits of protecting their dairy farmers and rural economies through the use of Interstate Compacts.

Given the broad support for compacts among the states, we all know that the issue of regional pricing is one that will continue to be debated. I am pleased with the tremendous progress

the Southern states and other Northeastern states have made to move their compacts forward.

While the debate continues, this reasonable compromise allows the Northeast Compact to continue as the pilot project for the concept of regional pricing.

The Northeast Dairy Compact has given farmers and consumers hope. The Compact, which was authorized by the 1996 farm bill as a three-year pilot program, has been extremely successful.

The Compact has been studied, audited, and sued but has always come through with a clean bill of health. Because of the success of the Compact it has served as a model for the entire country.

Mr. President, I am of course aware that some of my colleagues oppose our efforts to bring fairness to our states and farmers by continuation of the Dairy Compact pilot project.

Also, unfortunately, Congress has been bombarded with misinformation from an army of lobbyists representing the national milk processors, led by the International Dairy Foods Association (IDFA) and the Milk Industry Foundation. These two groups, backed by the likes of Philip Morris, have funded several front groups to lobby against this compromise.

Their handy work has been seen recently in misinformed newspaper editorials, deceiving advertisements and uninformed television ads. Yesterday Senator LEAHY and I came to the floor to correct the misinformation contained in the Wall Street Journal Editorial.

Mr. President, I would like to take this opportunity to set the record straight about the operation of the Northeast Compact. It is crucial that Congress understand the issues presented by dairy compacts on the merits, rather than based on misinformation.

When properly armed with the facts, I believe you will conclude that the Northeast Dairy Compact has already proven to be a successful experiment and that the other states which have now adopted dairy compacts should in the future be given the opportunity to determine whether dairy compacts will in fact work for them as well.

Contrary to the claims of the opposition, regional compact regulation remain open to the interstate commerce of all producer milk and processor milk products, from whatever source. Compacts establish neither "cartels", "tariffs" nor "barriers to trade" and are not "economic protectionism."

According to the opponents characterizations, dairy compacts somehow establish a "wall" around the regions subject to compact regulation, and thereby prohibit competition from milk produced and processed from outside the regions.

These are entirely misleading characterizations.

It is really quite simple and straightforward: All fluid, or beverage milk sold in a compact region is subject to uniform regulation, regardless of its source within or outside the compact region.

This means that all farmers, including farmers from the Upper Midwest, providing milk for beverage sale in the region, receive the same pay prices without discrimination. It can thus be seen that there is no economic protectionism or the erection of barriers to trade.

Except for uniform regulation, the market remains open to all, and the benefits of the regulations are provided without discrimination to all participating in the market, including those who participate in the market from beyond the territorial boundaries of the region.

Next, I would like to address the actual and potential impact of dairy compacts on consumer prices. In short, opposition claims about the actual and possible impact of dairy compacts on consumers, including low income consumers, are unfounded and grossly distorted.

Over the years, while farm milk prices have fluctuated wildly, remaining constant overall during the last ten years, consumers prices have risen sharply.

The explanation for this is apparently that variations in store prices do not mirror the wild fluctuations in farm prices.

In other words, when farm prices go up, the store prices go up, but when the farm prices recede, the store prices do not come back down as quickly or at the same rate. Hence, and quite logically, if you take away the fluctuations in farm prices, you take away the catalyst for unwarranted increases in store prices.

When the 1996 Farm Bill granted consent to the Northeast Dairy Compact as a pilot program, Congress gave the six New England states the right under the compact clause of the Constitution to join together to help regulate the price paid to farmers for fluid milk in the New England region.

The six New England states realized that in order to maintain a viable agriculture infrastructure and an adequate supply of milk for the consumers they needed to work together.

When the compact passed as part of the 1996 Farm Bill, the opponents were so sure the compact would not operate as its supporters had promised, they asked the Office of Management of Budget to conduct a study on the economic effects of the Northeast Dairy Compact.

The opponents of the dairy compact intended for the OMB study to discredit the dairy compact. The study did just the opposite. Instead, the OMB study proved just what we had thought—that the dairy compact works and it works well.

The OMB studied the economic effects of the Northeast Dairy Compact and especially its effects on the federal food and nutrition programs. The study also examined the impacts of milk prices at various levels on utilization and shipment of milk, and on farm income both within and outside the Compact region.

Here's what the study concluded:

The New England retail milk prices were \$.05 cents per gallon lower on average than retail milk prices nationally following the first six months of operation of the Northeast Dairy Compact.

The compact over-order payments made in New England through the Compact Commission have had little impact on the price consumers pay as a result of the compact. Consumers, who are well represented on the Compact Commission, are very pleased with how the Dairy Compact has operated.

The Northeast Dairy Compact has not added any costs to federal nutrition programs, such as the Women, Infants and Children (WIC) and the school lunch and breakfast program, due to compensation procedures implemented by the New England Compact Commission. A program that helps protect farmers and consumers with no cost to the federal government.

The OMB study found that the Dairy Compact was economically beneficial to dairy producers. It increased their income from the milk sales about six percent.

The study concluded that the retail prices in New England were lower than the national average and it increased the income of dairy producers. No wonder twenty-five states are interested in having compacts in their states. And it's no wonder why governors, state legislatures, consumers and farmers alike support the continuation of the Northeast dairy compact.

Also, the OMB study concluded that there were no adverse affects for dairy farmers outside the Compact region and the study noted that some dairy producers outside the region actually received increased financial benefits through the sale of their milk into New England.

The OMB study helped Congress understand just how well the compact works. The opponents of the compact did not get what they had hoped for—instead we all have benefitted, both opponents and proponents of the compact, with the facts.

Despite what some of my colleagues have said, the Northeast Dairy Compact is working as it was intended to.

Instead of trying to destroy an initiative that works to help dairy farmers with no cost to the federal government, I urge my colleagues from the Upper Midwest to respect the states' interest and initiative to help protect their farmers and encourage other regions of the country to explore the possibility

of forming their own interstate dairy compact in the future.

Mr. President, the Northeast Dairy Compact has worked well. Just think if other commodities and other important resources around the country developed a program that had no cost to the federal government and benefitted both those who produce, sell, and purchase the product.

Mr. FEINGOLD. Mr. President, I rise today in strong opposition to this legislation, which would revive an arcane and unjust federal dairy policy that has destroyed thousands of family dairy farms.

Once again, the Senate is faced with dairy riders that fly in the face of recommendations from the Secretary of Agriculture, our nation's dairy farmers, and numerous taxpayer and consumer groups. It seems that political favors are more important to some in this Congress than policy decisions that help our nation's dairy farmers.

During the last four years neither of these two harmful provisions—Option 1A or the Northeast dairy compact—has won Senate approval. I ask my colleagues on the other side of the aisle: why must Senate and House leaders continue to play political games at the expense of our nation's dairy farmers?

Mr. President, these backdoor deals must stop. America's dairy farmers deserve a national dairy policy that ensures that all dairy farmers receive a fair price for their milk.

Unfortunately, the House and Senate leadership went into a back room, and snuck in these two riders that step up the attack on our dairy industry.

These decisions were separate even from the eyes and ears of members, and most members of the Senate Agriculture committee. With the proliferation of these backroom deals, it is no wonder that the general public is frustrated with Congress.

The simple fact is that neither of these two dairy riders has been approved by both chambers of Congress, or the President.

I would like to make my colleagues aware of the history behind these two provisions. During the last four years, the only Senate vote explicitly on the Northeast dairy compact resulted in a resounding rejection.

This year, the Senate again voted on a package containing the Northeast dairy compact, and it again failed to gain enough support to invoke cloture.

Mr. President, the House has yet to take a single vote specifically on the Northeast dairy compact. Compared to the record of the House, these two votes make the Senate look like experts on the Northeast dairy compact.

Furthermore, Mr. President, the 1996 farm bill required that the Northeast dairy compact expire upon implementation of USDA's reforms. Unfortunately these dairy riders seek to defy the will of Congress, and give the back

of their hand to America's dairy farmers.

After tens of thousands of comments, USDA came up with a modest plan to reform our 30-year-old milk marketing order structure.

More than 59,000 dairy farmers from all over the United States participated in a USDA national referendum and 96% voted in favor of the United States Department of Agriculture's final rule to consolidate the current 31 federal milk marketing orders into 11, and to reform the price of Class I milk.

USDA's proposal garnered nearly uniform support in each of the 11 regions, including the Southeast, Midwest, and Northeast.

The second of these harmful dairy riders, would overturn these reforms.

Well, Mr. President, I take the floor today to deliver a simple message: Congress should not renew a milk marketing order system that devastates family farmers, and imposes higher costs on consumers and taxpayers.

There has been a great deal of confusion over the effects of these harmful dairy provisions. Some say that mandating Option 1A and a two year extension of the Northeast dairy compact simply preserves the status quo.

This legislation does much more than simply extend the 60-year milk marketing system.

A new forward contracting provision in this dairy rider enables processors to pay farmers much less than the federal blend price for their milk.

This forward contracting provision will also make the market less competitive for all other producers by reducing demand on the open market. Since it is likely that forward contracts would be offered to only the largest producers, this provision will result in losses to small and medium-sized producers, who will become residual suppliers.

Mr. President, these dairy provisions shift the attack on our nation's dairy farmers into overdrive. This harmful legislation will continue to push our nation's dairy farmers out of business, and off their land.

For sixty years, dairy farmers across America have been steadily driven out of business, and disadvantaged by the very Federal dairy policy this legislation seeks to revive.

In 1950, Wisconsin had over 143 thousand dairy farms. After nearly 50 years of the current dairy policy, Wisconsin is left with only 23 thousand farms. Let me repeat: 23 thousand farms.

Why would anyone seek to revive a dairy policy that has destroyed over 110 thousand dairy farms in a single state? That's more than five out of six farms in the last half-century.

This devastation has not been limited to Wisconsin. Since 1950, America has lost over three million dairy farms. And this trend is accelerating, since 1985, America has lost over half of its dairy producers.

Day after day, season after season, we are losing small farmers at an alarming rate. While these operations disappear, we are seeing the emergence of larger dairy farms.

The trend toward a few large dairy operations is mirrored in States throughout the nation. The economic losses associated with the reduction of small farms goes well beyond the impact on the individual farm families that have been forced off their land.

The loss of these farms has devastated rural communities where small family-owned dairy farms are the key to economic stability.

Option 1A also hurts these communities in other ways: through higher costs passed on to both consumers and taxpayers.

Option 1A would increase prices for milk and cheese in virtually every state in the country. Low income families and federal nutrition programs, which rely heavily on milk and cheese, will be seriously hurt by the price increases mandated by this legislation.

The poor and elderly will be especially burdened by higher costs. Under Option 1A and the Compact food stamp recipients would lose \$40 million a year due to increases in beverage milk prices and another \$18 million a year due to increased cheese prices.

This legislation also soaks taxpayers with a milk tax by imposing higher costs on every taxpayer because we all pay for nutrition programs such as food stamps and the national school lunch program.

According to USDA, Option 1A alone would increase the average beverage milk price by nearly five cents a gallon and the cost of milk used for cheese by about two cents a gallon.

If we add up these costs to all of the federal nutrition programs, the costs mount up quickly.

Option 1A would cost the school lunch and school breakfast programs \$19 million a year in higher beverage milk prices and cheese prices.

The WIC program would face over \$16 million in higher cheese and milk prices.

Mr. President, the loss caused by Option 1A to the three major nutrition programs is \$93 million. These regressive taxes unfairly burden children and the elderly. These hidden penalties on America's children and elderly must not be allowed to continue.

The fact is, we need a new national dairy policy that stops devastating small farmers, and imposing higher costs on taxpayers and consumers.

During my six years in the United States Senate, and twelve years in the Wisconsin State Senate, the overwhelming message I hear from dairy farmers in Wisconsin, Minnesota and throughout the Midwest, is that we need milk marketing order reform.

Congress recognized the need for a new national dairy policy, and in 1996,

mandated that USDA reform the Federal milk marketing order system.

Well, let's take a look at why farmers across the U.S. support USDA's reforms. This chart compares Class I milk prices under the final rule and the current pricing system.

Under USDA's final rule dairy farmers in New England would receive 19.29 per hundredweight, a \$.26 increase over the current system. Farmers in eastern New York and Northern New Jersey would receive \$19.04 per hundredweight, an \$.11 per hundredweight increase. In Northern Florida, farmers would receive \$20.34, a \$.97 increase over the current system.

These statistics underscore the importance of USDA's reforms for dairy farmers across the nation.

As this chart makes clear, USDA's reforms provide relief to America's dairy farmers, and begin to re-institute fairness into our dairy pricing structure.

Perhaps even more compelling is this simple bar graph that illustrates the national average Class I milk price that farmers receive under the final rule and the current pricing system.

As you can see farmers would have received 58 cents more per hundredweight under USDA's final rule.

Farmers, consumer advocates, and taxpayer groups support USDA's reforms, and oppose these harmful dairy riders.

Mr. President, America's farmers demanded USDA's reforms. We should heed their call and support USDA's final rule.

Unfortunately, supporters of this legislation feel that they know better than America's dairy farmers, and wish to prevent USDA's moderate reforms. Ironically, one of the few changes to Federal dairy policy over the last 60 years has accelerated the attack on small farmers.

Despite the discrimination against Wisconsin dairy farmers under the Eau Claire rule, backdoor politicking during the eleventh hour of the conference committee for the 1996 farm bill, stuck America's dairy farmers with the devastatingly harmful Northeast Dairy Compact. This provision further aggravated the inequities of the Federal milk marketing order system by establishing the Northeast Interstate Dairy Compact. While the Compact may sound benign, it establishes a price fixing entity for six Northeastern States—Vermont, Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut.

The Northeast Interstate Dairy Compact Commission is empowered to set minimum prices for fluid milk higher than those established under Federal milk marketing orders. Never mind that farmers in the Northeast already receive higher minimum prices under the antiquated, 60 year old Eau Claire rule.

The compact not only allows these six States to set artificially high prices for their producers, it permits them to block entry of lower-priced milk from producers in competing States. Further distorting the markets are subsidies given to processors in these six States to export their higher-priced milk to non-compact States.

Who can defend this system with a straight face? This compact amounts to nothing short of government-sponsored price fixing. It is outrageously unfair, and also bad policy.

The compact interferes with interstate commerce and wildly distorts the marketplace by erecting artificial barriers around one specially protected region of the nation.

The compact arbitrarily provides preferential price treatment for farmers in the Northeast at the expense of farmers in other regions who work just as hard, who love their homes just as much and whose products are just as good or better.

It also irresponsibly encourages excess milk production in one region without establishing effective supply control. This practice flaunts basic economic principles and ignores the obvious risk that it will drive down milk prices for producers outside the compact region.

Despite what some have argued, the Northeast Dairy Compact hasn't even helped small Northeast farmers.

Since the Northeast first implemented its compact in 1997, small dairy farms in the Northeast, where this is supposed to help, have gone out of business at a rate of 41 percent higher than they had in the previous 2 years—41 percent higher.

In fact, compacts often amount to a transfer of wealth to large farms by affording large farms a per-farm subsidy that is actually 20 times greater than the meager subsidy given to small farmers.

We need to support USDA's moderate reforms, reject these harmful dairy riders and let our dairy farmers get a fair price for their milk.

Mr. President, I yield the floor.

Mr. KYL. Mr. President, today we are considering the District of Columbia appropriations bill, which includes not only funding for the nation's capital, but also regular appropriations for seven cabinet-level departments—the Departments of Labor, Health and Human Services, Education, State, Justice, Commerce, and Interior.

The package also includes four major authorization bills covering Medicare, foreign operations, satellite television, dairy programs, and scrap-metal recycling.

Mr. President, under ordinary circumstances, legislation should not be packaged this way. If I were to base my vote merely upon the process that led us to combine these measures into one huge bill, I would vote no, as I have on

the other omnibus bills that have come before the Senate during the last few years. However, I think there are some important distinctions between the package before us this year and what we have seen in the past.

Unlike last year, for example, when free-for-all negotiations resulted in an orgy of new spending and wholesale concessions to the White House, this year the individual parts of the bill were negotiated separately, in a largely orderly process. Unlike last year, any additional spending won by the White House was required to be offset so that net spending would not increase.

With the exception of the dairy provisions, which I oppose, I have concluded that I would vote for each of the measures included here if we had the opportunity to vote on them separately. For this reason and, because on balance, I believe the good in the rest of the package outweighs the bad, I will vote aye.

Mr. President, when we look back on this legislation five or 10 years from now, I think we will see one aspect of it as truly historic.

The legislation, despite its shortcomings, establishes a historic new precedent against ever again raiding the Social Security trust fund for other purposes—a precedent that future Presidents and Congresses will deviate from only at their own peril.

The package has been designed to avoid intentionally spending a dime of the Social Security surplus. And if our estimates turn out to be right, it will be the first time since 1960—the first time in nearly 40 years—that Congress did not tap the Social Security surplus to pay for other programs. It also means that we will be able to pay down publicly held debt by another \$130 billion or so this year.

Mr. President, I think everyone needs to recognize that estimates of spending and revenues can be affected by even the slightest changes in the economy, and so we will need to be prepared to adjust spending levels early next year if it appears that that is necessary to take further action to safeguard the Social Security surplus. We should even consider putting an automatic mechanism in place, as proposed in legislation I cosponsored with Senator ROD GRAMS, to make sure Social Security is never again tapped.

In any event, it is important to recognize just how far we have come since 1995. That was the year Bill Clinton sent Congress a budget that would have spent every penny of the Social Security surplus every year for the foreseeable future, and still run \$200 billion annual deficits on top of that. The President's FY96 budget submission would have resulted in actual deficits rising from about \$259 billion in 1995 to roughly \$289 billion this year.

We did not follow the President's recommendations. We charted an entirely

different course. The result: We now have a budget that sets aside the entire Social Security surplus and even runs an estimated \$1 billion surplus in the government's operating budget. That is progress.

Because we do not raid Social Security, we had to do a better job of setting priorities so that we could take care of those things the American people care most about, and to a large degree, I think we succeeded. This bill provides a substantial increase in funds for medical research at the National Institutes of Health. We provide even more resources for education than the President asked for, and we take a modest first step in the direction of public school choice and providing local school districts with increased flexibility in how they will use federal funds to meet the particular needs of their students. We restore funding for hospitals and nursing homes that care for Medicare patients.

We also include additional resources for law enforcement, including funding for 1,000 new Border Patrol agents, and funds to combat the scourge of methamphetamine in our communities. We are able to provide more money than the President sought for the Violence Against Women Act. And we provide money to make sure federal agencies can be better stewards of our national parks, forests, and wildlife refuges.

We require that international family-planning money be used for just that—family planning, not abortion or lobbying to liberalize the abortion laws of other countries. Although the compromise provisions would allow the President to waive the limitations and provide about \$15 million to groups that engage in such activity, about 96 percent of the dollars would still remain subject to the restrictions.

Of course, funding these various priorities means we had to limit spending in other areas in order to keep our promise not to raid Social Security. For example, the National Endowment for the Arts does not get the increase it sought. There will not be as much foreign aid as President Clinton wanted. We cut the President's Advanced Technology Program. To make doubly sure we keep our pledge to stay out of Social Security, we include a small across-the-board spending cut to force agencies to ferret out waste and abuse.

It is hard for me to conceal my disappointment in several regards. First, I regret that Congress did not protect the projected surplus in the non-Social Security part of the budget. This bill, combined with the other appropriations bills that have already been signed into law, will spend the entire \$14 billion surplus that was projected in the government's operating budget—excluding Social Security—and it will bust the spending caps Congress and the President agreed to only two years ago.

Second, there is still far too much wasteful spending in the budget.

And third, there is so much advance funding in the bill for FY2001 that it will be difficult for us to stay within our spending targets for next year.

On balance, though, it strikes me that the short-term cost of exceeding the caps and spending the relatively small non-Social Security surplus for this year is more than outweighed by the long-term discipline that will be imposed by the precedent we have set with regard to protecting Social Security.

Mr. President, with that in mind, I intend to vote for this bill.

A BAD DEAL FOR WORKING AMERICANS

Mr. GRAMS. Mr. President, a year ago I was here in this chamber speaking on the 1998 Omnibus Appropriations legislation. I criticized the abusive process that made the entire negotiations exclusive, arbitrary, and conducted behind closed doors by only a few congressional leaders and White House staff, and few Members of the Congress had any idea what was in the bill but were asked to approve it without adequate review and amendments. I also urged the Congress not to repeat the mistake that we need to reform the process and start the process early in the year to avoid appropriations pressure.

Many of my colleagues shared my views at the time and agreed that the federal budget process had become a reckless game, and it not only weakened the nation's fiscal discipline but also undermined the system of checks and balances established by the Constitution.

At the beginning of the 106th Congress, I argued repeatedly in this chamber that the key to a successful budget process was to pursue comprehensive budget process reforms. I have introduced legislation to achieve these goals which includes legislation that would force us to pass a legally-binding federal budget, allow an automatic continuing resolution to kick-in to prevent government shutdown, set aside funds each year in the budget for true emergencies; strengthen the enforcement of budgetary controls; enhance accountability for Federal spending; mitigate the bias toward higher spending; modify Pay-As-You-Go (PAYGO) procedures to accommodate budget surpluses; and establish a look-back sequester mechanism to ensure the Social Security surplus will be protected. We also need to pursue biennial budgeting and getting rid of the so-called "baseline budgeting."

We were assured by Senate leaders that we were going to pursue real budget process reform early this year and that we would never have another omnibus spending bill in the future.

Mr. President, I believe what we have before us today is a repeat of what was promised to never occur again. Once

more, with inadequate time to review. The Houses passed this omnibus bill with absolutely no knowledge of what was in it. This is nearly a play-by-play of 1998 because we have not reformed our budget process. As a result, after seven Continuing Resolutions, we have before us an omnibus spending bill that is full of creative financing and earmarked pork programs.

Mr. President, when will we ever learn our lessons?

Mr. President, it is entirely irresponsible and reckless that Congress has over-used advanced appropriations, used directed scoring, emergency spending and many other budgetary smoke and mirrors to dodge fiscal discipline and significantly increase government spending. Like last year's omnibus bill, this legislation is heavily loaded with irresponsible and inappropriate provisions. It is severely flawed by new spending, no CBO scoring, gimmick offsets and billions of pork-barrel programs. Many last-minute spending needs were loaded into this omnibus bill just in the last few days. I still cannot even tell you what they are, since we haven't been given enough time to review it. The double whammy delivered to Minnesota dairy farmers by adding a two-year extension of the Northeast dairy compact and 1 A order reform is my main reason for opposing this bill. These outrageous last-minute additions seriously hurt Mid-West dairy farmers and are the reason why we are still here today.

This omnibus bill has again proven that big government is well and alive in Washington. The bill provides a total \$385 billion for just five spending bills, a significant increase over last year's levels. Congress is recklessly and irresponsibly throwing more and more taxpayers' money to help the President enlarge the government. Billions of dollars were added to the spending legislation avoiding the normal committee process, without any amendments and full debate. If hiring more police officers and more elementary school teachers is the solution to stop crime and improve education, let us have an open debate on the merits of the policy through the usual democratic process. Let's not cut deals behind the closed door in meetings by just a few.

Since we established statutory spending limits, Washington has repeatedly broken them because of lack of fiscal discipline. We have done so again this year.

In my judgment, this omnibus spending bill and the other appropriation bills have been enacted have spent billions of dollars more than the spending caps if we would use honest numbers to score them. To date, the Congressional Budget Office has not provided us with its estimates on this bill. Because of the CBO's inability to score the bill, we do not know what the real cost of it, or

whether it stays within the 302(b) allocations.

But we do know many accounting rules have been bent in putting this bill together to avoid the tighter spending caps. Let me explain: This bill relies heavily on the so-called "directed scoring" technique for it increased spending. Traditionally, Congress always uses the Congressional Budget Office estimates for scorekeeping. However, because the Office of Management and Budget (OMB) has more favorable estimates for some government programs than the CBO, the Congress simply directed CBO to use OMB numbers to keep score for this year's spending bills.

One of these OMB estimates the CBO was directed to use is the \$2.4 billion spectrum sales revenue expected to be collected next year. We all know that level of sales will not be reached. In fact, we criticized the President for using this overoptimistic number in his past budgets.

Just by using the OMB's rosy estimates, without making any hard choices, Congress has increased this year's 302(b) allocations by over \$17.4 billion. But the real danger is, by the end of the year, the CBO will use its own estimates to score our budget surplus or deficit. If OMB's numbers prove to be unrealistic and wrong, we end up spending the Social Security surplus we have vowed to protect and it will be too late to adjust the budget accordingly. This is the last thing we want to do. That is why I was disappointed my bill to provide an automatic sequester triggered by spending of the Social Security surplus was not passed. This procedure is absolutely essential to ensure we keep our commitment to protect Social Security.

Again and again, Washington lowers the fiscal bar and then jumps over it, or finds ways around it, at the expense of the American taxpayers, so all the spenders and those special interests who benefit at other expenses go home happy.

Mr. President, abusive use of emergency spending is another gimmick applied in this omnibus spending bill, as well as in the other appropriation bills we've passed. Last year alone, Congress appropriated \$35 billion for so-called emergencies. This year again, over \$24 billion of emergency spending was appropriated. Since 1991, emergency spending has totaled over \$145 billion. Most of these "emergencies" were used to fund regular government programs, not unanticipated true emergencies. Emergency spending is sought as a vehicle to add on even more spending priorities and thus to dodge fiscal discipline because emergency spending is not counted against the spending caps. This has gone too far. We need a better way to budget for emergencies. Most of this spending can be planned within our budget limits. Even natural disas-

ters happen regularly—why not budget for them, as I proposed in my budget process legislation.

Mr. President, while I agree "advance appropriations," "advance funding" and "forward funding" are not uncommon practice here, it does not mean they are the right thing to do, particularly when these budget techniques are used to dodge much-needed fiscal discipline.

In the past five years, "advance appropriations" have increased dramatically, jumping from \$1.9 billion in FY 1996 to \$11.6 billion in FY 2000, an increase of \$9.7 billion over five years. This year, at least \$19 billion was advanced into FY 2001 and outyears which will create even worse problems for us next year and in the future.

I understand the upward spending pressure the Congress is facing this year and in the outyears. But I believe we should, and can, meet this challenge by prioritizing and streamlining government programs while maintaining fiscal discipline. We can reduce wasteful, unnecessary, duplicated, low-priority government programs to fund the necessary and responsible function of government. But we need a Biennial Budget, as Senator DOMENICI recommends, to give us time to do this.

Instead of streamlining federal spending, we have thrown in more money to please big spenders without the needed analysis to ensure the spending will help us solve problems. Like last year's bill, this bill looks like a Christmas tree full of pork projects. Many are added in the last minute negotiation. But we don't know exactly what they are and how much they cost, because again we have not been given enough time to review this bill. Here are a few examples as identified by Senator MCCAIN:

An entirely new title is included in the legislation during last minute negotiations, the "Mississippi National Forest Improvement Act of 1999," which had not previously been considered in the previous Senate or House bills. A half million dollars is added for the Salt Lake City Olympic tree program. It earmarked \$2 million for the University of Mississippi Center for Sustainable Health Outreach and \$3 million for the Center for Environmental Medicine and Toxicology at the University of Mississippi Medical Center at Jackson. An earmark of \$3 million is added for the Wheeling National Heritage Area and \$3 million for the Lincoln Library. It earmarked \$2 million for Tupelo School District in Mississippi for technology innovation. It includes an earmark of \$3 million for the Southwest Pennsylvania Heritage Area. It also earmarked \$1 million for the completion of the Easter Seal Society's Early Childhood Development Project for the Mississippi River Delta Region and \$1 million for the Center for Literacy and Assessment at the

University of Southern Mississippi. It also includes an increase of \$3.6 million for Washington State Hatchery Improvement.

As the result, we've ended up spending much more money than we should have. My biggest fear, Mr. President, is this omnibus spending legislation may allow Congress and the President to spend some of the Social Security surplus by not imposing an adequate across-the-board spending reduction.

Even counting all the "directed scoring," "advanced appropriations," every penny of the \$14 billion on-budget surplus and other budgetary gimmicks, it is estimated that Congress could still dip into the Social Security surplus by nearly \$5 billion. To fill that gap we need to reduce government spending by 0.97 percent across-the-board. But the agreement reached between congressional leaders and the White House allows only a 0.38 percent reduction which would result in \$1.3 billion savings. Clearly, this is done just for face-saving reason, and will not ensure that the Social Security surplus is protected.

The proponents of this omnibus bill may quickly point out that there are offsets to fund the new spending. But we all know most of the offsets are simply gimmicks. The best example is a \$3.5 billion transfer from the Federal Reserve surplus to the Treasury.

As you know, there is nothing new about this proposal and it has been around for quite a while. In the past, Chairman Greenspan called this transfer of the Fed's surplus to the Treasury "a gimmick that has no real economic impact on the deficit." Because it is just an intra-governmental transfer that would not change the government's true economic and financial position.

Other offsets such as a one-day delay in pay for our military and civilians will cause enormous financial hardship for millions of American families who depend on the regular paychecks to pay their mortgage, daycare for their kids, and other priorities. Many small businesses and contractors can be adversely affected by this offset as well. Again, this has proven that the victims of Washington's spending spree are the American taxpayers.

Mr. President, there are many provisions in the omnibus appropriations bill I support, such as the BBA Medicare fix which includes reinstatement of Minnesota's DSH allotment, the State Department Authorization which includes payment of the U.N. arrears and my embassy security proposal, Home Satellite TV access and others. In fact I have worked hard on many of these proposals. However, I believe the dairy provisions and the general lack of fiscal discipline in the bill have far overshadowed the good provisions. Overall, it is a bad deal for working Americans in general and it is a bad

deal for my fellow Minnesotans in particular. I therefore cannot in good conscience vote for this fiscally irresponsible legislation.

Mr. GRASSLEY. Mr. President, I rise to express my deep disappointment at the language affecting Federal dairy policy included in the Omnibus appropriations bill before us. As the Members know, the Omnibus measure includes an extension of the Northeast Dairy Compact and language on reforming our Nation's Federal dairy policy which has been in place since the Depression.

It may seem unusual to some Members that a Senator from Iowa would have an interest in this matter. While Iowa's reputation as an agriculture powerhouse is well-established and well-deserved, I think when many people think of agriculture in Iowa, they think of commodities such as soybeans or pork. However, the dairy industry is very important to Iowa as well. The total economic contribution of the dairy industry to the Iowa economy is over \$1.5 billion annually. Nearly 10,000 Iowans are employed through dairy farming and processing. Furthermore, Iowa ranks 12th in the Nation in Dairy Production. So the State of Iowa has good reason to be concerned about Federal dairy policy.

I have long been concerned about the impact of the Northeast Dairy Compact, which was authorized by the 1996 farm bill and which was due to sunset in October of this year, has had, and how it will affect producers in the future. I voted in 1996 to strip the language from the farm bill which allowed for the formation of the Northeast Dairy Compact. The only reason the language was included in the farm bill was political trading at the last minute. Since the inception of the Northwest Compact, it is clear that its consequences have not been good.

According to the International Dairy Foods Association, the Northeast Compact has cost New England milk consumers nearly \$65 million in higher milk prices, at the same time costing child nutrition programs \$9 million more. Consumers have paid a price that is too high for the Northeast Compact. We should not make more consumers suffer the same consequences. I also believe that compacts are an abuse of the Constitution. While the Constitution does allow for the formation of compacts, it is usually invoked for transportation or public works project.

The Northeast Dairy Compact is the first time that compacts have been used for the purpose of price fixing for regional interests. For the most effective functioning of the U.S. economy, it must be unified. Preventing economic protectionism is at the heart of our Constitution. Renewing or expanding compacts flies in the face of that basic tenet. Furthermore, neither the Judiciary Committee or the Agri-

culture Committee, which have jurisdiction over such matters, has had the opportunity to review this measure. Such a committee examination is warranted and necessary.

One of the things that worries me about dairy compacts is their potential effect on other commodities. Higher prices mean more milk and less demand. The key to increasing dairy producers' income is expanding demand for milk and dairy products. If we take steps to expand dairy compacts, we will be going in the opposite direction. It is also my view that compacts are contradictory to the philosophy of freedom to farm, which my friend, the senior Senator from Vermont, supported. The whole philosophy behind freedom to farm was moving away from the old "command and control", government-run AG policies of the past. We need more free markets and free trade, not less, which brings me to my final point on compacts. As Chairman of the Finance Committee's Subcommittee on Trade, maintaining a strong trade position for the United States is my top priority. One of the reasons why the United States is the only true superpower left in the world and why our Nation remains economically strong while others have faltered is because we function as one economically. Our economic prosperity is undeniable proof of the superiority of free and open markets. If we were to allow the perpetuation of dairy compacts, it would send a very damaging signal to the rest of the world.

It would send the message that we do not have the confidence that a free and open economy will ensure that producers who come to the market with a quality product will be able to support themselves. Not only is the compact language in this bill unacceptable for dairy producers in the Midwest, but the Omnibus bill also includes language on the Nation's milk marketing orders that is detrimental to Iowa's dairy producers. Members know that milk marketing orders are a system put in place over 60 years ago to regulate milk handlers in a particular order region to promote orderly marketing conditions.

The 1996 farm bill required USDA to cut the number of marketing orders by over half and implement an up-to-date market oriented system of milk distribution. After a great deal of study and comment, USDA came up with two proposals, Option 1-A, and Option 1-B. Option 1-A is close to the status quo and Option 1-B is geared toward the free market and modernizing the system. While neither proposal was perfect, Option 1-B was definitely a better choice. However, given the concerns expressed by the public about both proposals, USDA issued a compromise initiative, which was still preferable to Option 1-A. Unfortunately, Option 1-A proponents have succeeded in getting Option 1-A language included in the Omnibus appropriations bill.

Those who favor 1-A sometimes make the argument that the compromise devised by USDA would cost dairy farmers nationwide \$200 million. However, according to the USDA, net farm income would be higher under the compromise than under the status quo which is what 1-A is in many ways. The Food and Agricultural Policy Research Institute, which is located in my State at Iowa State University, has concluded that 60 percent of the Nation's dairy farmers would receive more income under the USDA compromise plan.

The unequal treatment of the old system, which is maintained by 1-A, artificially raises prices for milk in other parts of the country, encouraging excess production which spills into Midwestern markets. This simply lowers the price that Midwestern producers receive.

The Federal Milk Marketing order System is out of date and out of touch with modern production and economics. It is long overdue for reform and this language in the Omnibus bill just puts that off. My producers and others in other Midwestern States have endured the inequities of the Milk Marketing Order System long enough. I am very disappointed that the unfairness of the old system would be perpetuated by the language in this bill. We could still correct the mistakes made by this bill which would have a tremendously detrimental effect on dairy producers within Iowa and the rest of Midwest.

I urge the leadership on both sides of the aisle to work with Midwestern Senators to help put an end to the unfair treatment of the Midwestern dairy farmers. Thank you.

Ms. SNOWE. Mr. President, I reiterate my support for the two year extension of the very successful Northeast Interstate Dairy Compact. And after all I have read recently—not that one should believe everything they read—I feel compelled to set the record straight on this issue one more time.

The Northeast Dairy Compact has addressed the needs of states in New England who compacted together within their region to determine fair prices for locally produced supplies of fresh milk. All six legislatures and all six governors in New England approved the Compact.

In fact, in 1989-1990, the Vermont House passed it unanimously and the Senate passed it 29 to 1. The Maine House passed it 114 to 1 and it was unanimously adopted by the Senate. The legislatures in Connecticut, Massachusetts, New Hampshire and Rhode Island adopted it overwhelmingly in 1993.

I would also note that despite the varying views, party affiliations and economic philosophies, this is one issue where the entire New England Congressional Delegation is united. And that, in and of itself, is quite a feat.

Let me tell you why New England is united behind the Dairy Compact. We

want our family farmers. This way of life is threatened for a number of reasons including the encroachment of development which leads to the increased cost of land.

I think one Mainer summed it up quite nicely in a letter to the editor. In this letter she noted that it was okay to be against the Compact “. . . if you think we will be better off having subdivisions where our farms once stood, if you believe it's to our advantage to say good-bye to the last family farms and hello to big business controlling the production, distribution and pricing”

In my own state of Maine we have lost 31 percent of our dairy farms in the last 10 years. We have 485 dairy farms left and they average 80 milking cows and provide 2100 related jobs. They allow the continuation of a rural way of life that is fast disappearing not only in New England but throughout the country. And it is a way of life that we will not give up without a fight.

The men and women who own our dairy farms are doing it because it is in their blood—their parents did it, their grandparents did it and in many cases their great grandparents did it. You don't go into dairy farming to make money—you go into it because it is in your blood, it is what you know and what you love. And the Compact is the only thing standing between many of these families and the loss of not only their farm but their way of life.

In Maine we have a saying that you are “from away” if you are not from Maine. Let me assure you that if you told a Maine dairy farmer that he was part of a price fixing cartel, as several newspapers have claimed, he would immediately know that you were from away . . . far, far away.

The beauty of the Compact is that it reflects the New England way of life—self-reliance—we don't ask the federal government for one penny. Instead, New Englanders pay a few cents more for milk to support the Compact—a very small price to pay to protect our rural way of life.

Let me repeat that—we are not asking the federal taxpayer in Wisconsin or Texas or Minnesota to subsidize our farmers—although I might add that New England's taxpayers have historically subsidized farmers in other parts of the country.

The Compact has proven to be an effective approach to address farm insecurity. The Compact has protected New England against the loss of their small family dairy farms and the consumers against a decrease in the fresh local supply of milk. The Compact has stabilized the dairy industry in this entire region and protected farmers and consumers against volatile price swings.

Over ninety-seven percent of the fluid milk market in New England is self-contained within the area, and fluid milk markets are local due to the

demand for freshness and because of high transportation costs, so any complaints raised in other areas about unfair competition are quite disingenuous.

All we are asking, Mr. President, is the continuation of the Northeast Dairy Compact, the existence of which does not threaten or financially harm any other dairy farmer in the country.

Let there be no mistake, the Northeast Dairy Compact does not stand alone in the Omnibus bill. Additional dairy language is included in the bill that restores the existing federal program, the Milk Marketing Order system, which fixes the price of milk in different regions across the country, and is initiated and approved by producers in specific areas.

The USDA adopted a final Rule on Milk Marketing Orders in March, a rule I might add that favors dairy farmers in the Upper Midwest at the expense of the rest of the country. On September 22, the House expressed its opposition to this rule when they voted 285-140 to restore the current system by placing a moratorium on the Final Rule. So, this is not one region of the country speaking—although some apparently believe that New England's family farmers make a good scapegoat—as 65 percent of the House of Representatives voted to pass the moratorium language.

The New England Compact adds about two cents a gallon to the consumer—not 20 cents as the Wall Street Journal would have you believe. They seem to be under the impression that the farmers set the price for the milk you buy at the store—the fact is that the prices, as we all know, are set by the retailer. Under the Compact, New England retail milk prices have been among the lowest and the most stable in the country.

The opposition has tried to make the argument that interstate dairy compacts increase milk prices. This is just not so as milk prices around the U.S. have shown time and again that prices elsewhere are much higher and experience much wider price shifts than in the Northeast Compact states. Just take a look at dairy prices around the country for a gallon of milk.

The price in Bangor and Augusta, Maine ranged from \$2.89 to \$2.99 per gallon from February to April of 1999 and has remained stable at \$2.89 for the last several months.

In the Boston, Massachusetts market, the price stayed perfectly stable—at \$2.89—from February to April of 1999.

The price in Seattle ranged from \$3.39 to \$3.56 over the same time period. Washington State is not in a compact, yet their milk was approximately 50 cents higher per gallon than in Maine. The range in Los Angeles was from \$3.19 to \$3.29. In San Diego, the range was from \$3.10 to \$3.62. California is not in a compact.

Las Vegas prices were \$2.99 all the way up to \$3.62. Not much price stability there, but then, Nevada is not in a compact. In Philadelphia, the range was \$2.78 to \$3.01 per gallon—not as wide a shift as Nevada but a much wider price shift than the Northeast Compact states. It's no wonder Pennsylvania dairy farmers want to join us.

How about Denver—Colorado is not in a compact. A gallon of milk in Denver has cost consumers anywhere from \$3.45 to \$3.59 over the past few months, over one half of a dollar more than in New England. So, the Northeast Dairy Compact has not resulted in higher milk prices in New England, but the milk prices are among the lowest in the country—and are among the most stable.

Only the consumers and the processors in the New England region pay a few cents extra for milk that already costs less than just about anywhere else in the country—to provide for a fairer return to the area's family dairy farmers and to protect a way of life important to the people of the Northeast.

Also, where is the consumer outrage from the Compact states for spending a few extra pennies for fresh fluid milk so as to ensure a safety net for dairy farmers so that they can continue an important way of life? I have not heard any swell of outrage of consumer complaints over the last three years. Why, because the consumers also realize this initial pilot project, whose costs are borne entirely by the New England consumers and processors, has been a huge success.

So, I ask my colleagues to look at the facts, not the fables being spread by those who have simply chosen not to let the facts get in their way.

Mr. KENNEDY. Mr. President, I welcome this opportunity to express my strong support for the Northeast Dairy Compact. Since taking effect in October 1997, the Compact has stabilized milk prices for both farmers and consumers in New England.

Farmers across the country are unable to make ends meet. The number of farmers in New England has declined significantly in recent years. In 1992, Massachusetts had 365 dairy farms. Today, that number has declined to 290 dairy farms. Farmers in New England are losing a priceless heritage, that their families have owned for generations—some since the 1600s. The Northeast Dairy Compact helps ensure that in the face of these difficult times for their industry, our farmers will have a consistent income to preserve their way of life.

There are many misconceptions about the Dairy Compact. One of the most serious misconceptions is that taxpayers pick up the cost of the Compact. Taxpayers do not pay for this program—it is run at no cost to the federal government.

In addition, with respect to competition a Congressional condition im-

posed on the Compact specifically provides that: "The Northeast Interstate Dairy Compact Commission shall not prohibit or in any way limit the marketing in the compact region of any milk or milk product produced in any other production area in the United States."

Another misconception is that the Dairy Compact hurts the poor. This program does not hurt poor people. WIC and the school lunch program are exempt. In fact, in New England, the Compact overpaid these programs for two years in a row.

When approved in 1996, the purpose of the Dairy Compact was to ensure the viability of dairy farming in the Northeast and to ensure an adequate supply of local milk to consumers. The Compact is a price support, and was never intended to make anyone rich. It was intended to preserve small family farms and provide safeguards against excessive production.

The Compact has been a great success. The price of milk has actually dropped by an average of 5 cents a gallon across New England, and for many months at a time, prices have remained so stable that no compact money has been paid to farmers.

The Dairy Compact is good for our farmers, preserving their way of life. It is good for the environment, preserving farms and green space that Western Massachusetts is known for. And it is good for consumers, stabilizing prices and ensuring a fresh and local supply of milk.

We stand for free competition, but we also stand for fair competition. In many areas of current law, there are long-standing provisions designed to produce competition that is both free and fair. The New England Dairy Compact deserves the support it has received from the Senate in recent years, and I hope that it will continue to receive that support.

Mr. HARKIN. Mr. President, this is a great day for the critically important search for medical breakthroughs. I am very pleased to say that the omnibus appropriations act contains a record \$2.3 billion increase in support for medical research through the National Institutes of Health. We are now well on our way towards our goal of doubling our nation's investment in the search for medical breakthroughs.

This increase will directly benefit the health of the American people. It will speed up the day when we have a cure for cancer and other deadly diseases.

On top of that, the Senate has passed S. 1268, the Twenty-First Century Research Laboratories Act of 1999. This bill cosponsored by Senators FRIST, KENNEDY, CHAFFEE, REED of Rhode Island, MACK, MIKULSKI, MURRAY, CLELAND, HELMS, WARNER, SARBANES, SCHUMER, COCHRAN, DURBIN, MOYNIHAN, BOXER, ROBERTS, REID of Nevada, SPEC-

TER, FEINSTEIN, COLLINS, INOUE and HAGEL. I want to thank my colleagues for cosponsoring this legislation, and for their support in getting it passed.

This bill addresses a critical shortfall in our nation's medical research enterprise. I was pleased to work with Senator SPECTER this year to achieve a \$2.3 billion increase for the National Institutes of Health. The Conference Agreement of the Fiscal Year 2000 Labor, Health and Human Services, Education and Related Agencies Appropriations Subcommittee, provides \$17.9 billion for the NIH. This puts us well on track to double funding for the NIH over the next five years, a target that was agreed to by the Senate, 98-0, in 1997.

However, as Congress embarks on this important investment in improved health, we must strengthen the totality of the biomedical research enterprise. While it is critical to focus on high quality, cutting edge basic and clinical research, we must also consider the quality of the laboratories and buildings where that research is being conducted.

In fact, Mr. President, the infrastructure of research institutions, including the need for new physical facilities, is central to our nation's leadership in medical research. Despite the significant scientific advances produced by Federally-funded research, most of that research is currently being done in medical facilities built in the 1950's and 1960's, a time when the Federal government obligated from \$30 million to \$100 million a year for facility and equipment modernization. Since then, however, annual appropriations for modernization of our biomedical research infrastructure have dramatically declined, ranging from zero to \$20 million annually over the past decade.

I am pleased to report that this year we were able to increase that amount to \$75 million in our appropriations bill. While this is an important improvement, much more is needed. As a result, many of our research facilities and laboratories are outdated and inadequate to meet the challenge of the next millennium.

In order to realize major medical breakthroughs in Alzheimer's, diabetes, Parkinson's, cancer and other major illnesses, our nation's top researchers must have top quality, state-of-the-art laboratories and equipment. Unfortunately, the status of our research infrastructure is woefully inadequate.

A recent study by the National Science Foundation finds that academic institutions have deferred, due to lack of funds nearly \$11.4 billion in repair, renovation, and construction projects. Almost one quarter of all research space requires either major renovation or replacement and 70% of medical schools report having inadequate space in which to perform biomedical research.

A separate study by the National Science Foundation documents the laboratory equipment needs for researchers and found that 67 percent of research institutions reported an increased need for laboratory instruments. At the same time, the report found that spending for such instruments at colleges and universities actually declined in the early 1990s.

Several other prominent organizations have documented the need for increased funding for research infrastructure. A March 1998 report by the Association of American Medical Colleges stated that "The government should reestablish and fund a National Institutes of Health construction authority. . . ." A June 1998 report by the Federation of American Societies of Experimental Biology stated that "Laboratories must be built and equipped for the science of the 21st century . . . Infrastructure investments should include renovation of existing space as well as new construction, where appropriate."

As we work to double funding for medical research over the next few years, the already serious shortfall in the modernization of our nation's aging research facilities and labs will continue to worsen unless we take specific action. Future increases in NIH must be matched with increased funding for repair, renovation and construction of research facilities, as well as the purchase of modern laboratory equipment.

Mr. President, the bill that passed the Senate today expands federal funding for facilities construction and state-of-the-art laboratory equipment through the NIH by increasing the authorization for this account within the National Center for Research Resources to \$250 million in FY 2000 and \$500 million in FY 2001.

In addition, the bill authorizes a "Shared Instrumentation Grant Program" at NIH, to be administered by the Center. The program will provide grants for the purchase of shared-use, state-of-the-art laboratory equipment costing over \$100,000. All grants awarded under these two programs will be peer-reviewed, as is the practice with all NIH grants and projects.

We are entering a time of great promise in the field of biomedical research. We are on the verge of major breakthroughs which could end the ravages of cancer, heart disease, Parkinson's and the scores of illnesses and conditions which take the lives and health of millions of Americans. But to realize these breakthroughs, we must devote the necessary resources to our nation's research enterprise.

I want to thank the Association of American Universities, the Association of American Medical Colleagues and the Federation of American Societies of Experimental Biology for their support for this legislation.

I thank my colleagues for their support of this important health care legislation, and I look forward to working with our colleagues in the House of Representatives next year to ensure this legislation is signed into law. Thank you.

Mr. FRIST. Mr. President, I am pleased that the Senate passed today, S. 1243, the Prostate Cancer Research and Prevention Act, which I introduced on June 18, 1999 to address the serious issue of prostate cancer.

This year 37,000 American men will die, and 179,300 will be diagnosed with prostate cancer, the second leading cause of cancer-related deaths in American men. Cancer of the prostate grows slowly, without symptoms, and thus is often undetected until in its most advanced and incurable stage. It is critical that men are aware of the risk of prostate cancer and take steps to ensure early detection.

While the average age of a man diagnosed with prostate cancer is 66, the chance of developing prostate cancer rises dramatically with age—which makes it important for men to be screened or consult their health care professional. The American Cancer Society and the American Urological Association recommend that men over 50 receive both an annual physical exam and a PSA (prostate-specific antigen) blood test. African-American men, who are at higher risk, and men with a family history of prostate cancer should begin yearly screening at age 40.

Even if the blood test is positive, however, it does not mean that a man definitely has prostate cancer. In fact, only 25 percent of men with positive PSAs actually have prostate cancer. Further testing is needed to determine if cancer is actually present. Once the cancer is diagnosed, treatment options vary according to the individual. In elderly men, for example, the cancer may be especially slow growing and may not spread to other parts of the body. In those cases, treatment of the prostate may not be necessary, and physicians often monitor the cancer with follow-up examinations.

Unfortunately, preventive risk factors for prostate cancer are currently unknown and the effective measures to prevent this disease have not been determined. In addition, scientific evidence is insufficient to determine if screening for prostate cancer reduces deaths or if treatment of disease at an early stage is more effective than no treatment in prolonging a person's life. Currently, health practitioners cannot accurately determine which cancer will progress to become clinically significant and which will not. Thus, screening and testing for early detection of prostate cancer should be discussed between a man and his health care practitioners.

In an effort to help address the serious issues of prostate cancer screening,

to increase awareness and surveillance of prostate cancer, and to unlock the current mysteries of prostate cancer through research, the "Prostate Cancer Research and Prevention Act" expands the authority of the Centers for Disease Control and Prevention (CDC) to carry-out activities related to prostate cancer screening, overall awareness, and surveillance of the disease. In addition, the bill extends the authority of the National Institutes of Health to conduct basic and clinical research in combating prostate cancer.

The bill directs the CDC to establish grants to States and local health departments in an effort to increase awareness, surveillance, information dissemination regarding prostate cancer, and to examine the scientific evidence regarding screening for prostate cancer. The main focus is to comprehensively evaluate the effectiveness of various screening strategies for prostate cancer and the establishment of a public information and education program about the issues regarding prostate cancer. The CDC will also strengthen and improve surveillance on the incidence and prevalence of prostate cancer with a major force on increasing the understanding of the greater risk of this disease in African-American men.

The bill also reauthorizes the authority of the CDC to conduct a prostate screening program upon consultation with the U.S. Preventive Services Task Force and professional organizations regarding the scientific issues regarding prostate cancer screening. The screening program, when implemented, will provide grants to States and local health departments to screen men for prostate cancer with priority given to low income men and African-American men. In addition the screening program will provide referrals for medical treatment of those screened and ensure appropriate follow up services including case management.

Finally, to continue the investment in medical research, the bill extends the authority of the National Cancer Institute at the National Institutes of Health to conduct and support research to expand the understanding of the cause of, and find a cure for, prostate cancer. Activities authorized include basic research concerning the etiology and causes of prostate cancer, and clinical research concerning the causes, prevention, detection and treatment of prostate cancer.

Mr. President, on the very day I introduced this bill last June, I participated in an event sponsored by the American Cancer Society and Endocrine to award our former colleague Senator Dole for his leadership in raising public awareness for prostate cancer. In 1991, Senator Dole was diagnosed with prostate cancer, and since that diagnosis and successful treatment he has turned this potential tragedy into a triumph

as he has helped untold others by raising public awareness of this devastating disease. I want to take this opportunity to thank Senator Dole and organizations that have worked tirelessly to help promote this and other men's health issues, including The American Cancer Society, The Men's Health Network, and American Urological Association. I also want to thank these organizations for their support and help in drafting this legislation. I am pleased that the Senate has acted to pass this important bill, which will help to further increase awareness, surveillance and research of this deadly disease, and look forward to its ultimate enactment into law.

Mr. CLELAND. Mr. President, I would like to add some additional comments to my statement that appeared in the CONGRESSIONAL RECORD on Tuesday, November 16, 1999.

Just a few days ago, on Tuesday, November 16, several constituents of mine were involved in a disastrous truck-related crash on I-285, a major commuter route around Atlanta. The crash took place during the morning rush hour. Four tractor-trailer trucks were involved in the crash, two of which were tankers hauling flammable materials. Four passenger cars were also involved in the crash, and tragically, one woman was killed when her vehicle was crushed between two tractor-trailer trucks. Four others were rushed to the hospital to be treated for injuries. Thankfully, no further fatalities have been reported and no evacuation was required due to the sensitive material two of the trucks were hauling. This crash underscores the need to guarantee that truck safety is a priority in this country, and hopefully, reduce the occurrence of accidents such as this.

H.R. 3419 is a step in the right direction. It creates a new motor carrier safety administration. In a hearing before the Senate Commerce Committee, of which I am a member, the Department of Transportation (DOT) Inspector General (IG) testified that the current oversight system for the trucking industry within the Federal Highway Administration (FHWA) is not adequate. In fact, one of the main supporters of this legislation is Transportation Secretary Slater, who saw the need to create a separate motor carrier oversight administration focused entirely on safety.

Now that Congressional sentiment has swung toward adoption of H.R. 3419 and the establishment of a new Motor Carrier Safety Administration, my colleagues and I should track the implementation of this statute to ensure that the new agency will not bring with it the problems associated with the former body. Safety and compliance should be the utmost concerns of this office, with the American motorist as the benefactor of their efforts.

Mrs. BOXER. Mr. President, I would like to speak about H.R. 3419, the

Motor Carrier Safety Improvement Act, which the Senate approved today. I commend Senator McCAIN, chairman of the Commerce Committee, for holding hearings on this issue. These hearings, as well as reports from the Department of Transportation's Inspector General, have shown how critical it is for us all to pay closer attention to the safety problems on our highways.

In 1998, 5,374 people were killed in truck-related crashes and over 127,000 were injured. Although trucks account for only 3 percent of registered vehicles, they are involved in 9 percent of fatal crashes, and 12 percent of all highway-related deaths. This is simply unacceptable, and we must do all we can to reduce fatalities and injuries on our highways.

Recently, I met with one of my constituents, Cynthia Cozzolino, who lost her brother, sister-in-law, young nephew, and niece in a horrible truck-related crash last August. This terrible tragedy could have been prevented if we made safety a higher priority, particularly truck inspection. Worn straps may have contributed to a truck spilling its load of concrete piping instantaneously killing this young family riding in their van behind the truck.

Highway truck traffic is an increasing part of our economy. California highway trucks carry 57 billion tons per mile, second only to Texas. In Southern California, the growing goods movement from ports and airports will push the current regional truck volume up by 40 percent over the next 20 years. One section of Interstate 15 is likely to see almost 13,000 truck trips a day. That is why we must do all we can to strengthen our commitment to safety on our highways.

I am encouraged by certain key features of H.R. 3419. By establishing a separate Motor Carrier Safety Administration, at long last we are making safety a priority. The bill directs the Secretary of Transportation to develop a long term strategy for improving commercial motor vehicle, operator and carrier safety. It also directs the Secretary to implement safety improvement recommendations from the Inspector General, and it calls for the development of staffing standards for motor carrier safety inspectors at our international border areas, an important element for California.

In addition, strengthening the Commercial Driver License regulations by explicitly directing the disqualification of any commercial driver found to have caused a death because of negligent or criminal operation of a truck or bus and establishing stern penalties for foreign carriers who operate illegally beyond the current southern border commercial zone, are key improvements. Disqualifying these carriers on the spot will send a strong deterrent measure to any foreign trucking or bus companies who think that they can violate cur-

rent motor carrier laws and regulations with impunity.

However, I am concerned that H.R. 3419 is not stronger in terms of potential conflict of interest in the research conducted for this new administration. According to testimony before the Surface Transportation Subcommittee, in 1996, the Office of Motor Carriers (OMC) awarded more than \$8 million to the trucking industry and its consultants to perform research on various issues, including driver fatigue and graduated licensing. I understand that such research can form the basis for future rulemakings governing the trucking industry.

The new Motor Carrier Safety Administration must maintain a high degree of integrity and independence. I supported a provision that specifically forbids any research for rulemaking and other programs that is conducted by any entity with a vested economic interest in its outcome, and to forbid any individual who serves in a senior position within the new motor carrier agency from maintaining any affiliation with the trucking industry. H.R. 3419 includes a provision that directs the new motor carrier administrator to comply with the current Federal regulations regarding conflict of interest, and it also directs the administrator to conduct a study to determine whether compliance with these regulations is sufficient to avoid conflicts of interest. I look forward to the results of that study as well as any swift action by Congress to correct this problem if the study finds additional protection for conflicts of interest is warranted.

H.R. 3419 would establish a separate administration for Motor Carrier Safety. I would prefer to transfer the OMC from the Federal Highway Administration to the National Highway Traffic Safety Administration (NHTSA) and avoid the creation of a separate modal administration. NHTSA already issues regulations for newly manufactured trucks, and in truck-car crashes 98 percent of the deaths are suffered by the passenger vehicle occupants.

Nevertheless, today we have taken an important step toward building greater confidence in highway safety. The creation of a new administration dedicated to safety is a new direction that I hope will lead to improved safety for the traveling public.

Mr. KERREY. Mr. President, I would like to rectify some information entered into the RECORD during the debate on the Bankruptcy Reform Bill on November 5, 1999.

A comprehensive bankruptcy study was cited during the course of debate. This study was conducted by Professors Marianne Culhane and Michaela White from Creighton University, an impressive institution of higher learning in my home State of Nebraska.

When discussing this study, my colleague from Iowa referred to a GAO Report that reviewed four different bankruptcy studies, including the one written by Professors Culhane and White. It is my understanding some comments were made indicating that GAO challenged the methodology the Creighton professors used in conducting this study. After reviewing the GAO Report, that was not my understanding. In fact, the GAO Report specifically says, "In our review, we found that the Creighton/ABI researchers prepared and analyzed their data in a careful, thorough manner."

In order to clarify the record and any misperceptions about the GAO's findings, I ask unanimous consent the following "Scope and Methodology" section of GAO Report, number 99-103 "Personal Bankruptcy: Analysis of Four Reports on Chapter 7 Debtors' Ability to Pay", be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD.

GAO REPORT #99-103; PAGES 5 AND 6 SCOPE AND METHODOLOGY

To evaluate and compare the four reports' research methodologies, we assessed the strengths and limitations, if any, of each report's assumptions and methodology for determining debtors' ability to pay and the amount of debt that debtors could potentially repay. The comments and observations in this report are based on our review of the March 1998 and March 1999 Ernst & Young reports, the March 1999 Creighton/ABI report, and the January 1999 EOUST report; some additional information we requested from each report's authors; independent analyses using the Creighton/ABI report's database; and our experience in research design and evaluation. We reviewed specific aspects of each report's methodology, including the proposed legislation on which the report was based, how the bankruptcy cases used in the analysis were selected, what types of assumptions were made about debtors' and their debt repayment ability, how debtors' income and allowable living expenses were determined, and whether appropriate data analysis techniques were used. We also assessed the similarities and differences in the methodologies used in the four reports.

In addition to reviewing the reports, we had numerous contacts with the reports' authors. On March 16, 1999, we met with one of the authors of the Creighton/ABI report, and on March 25, 1999, we met with the authors of the two Ernst & Young reports to discuss our questions and observations about each report's methodology and assumptions. Following these discussions, we created a detailed description of each report's methodology (see app.I), which we sent to the authors of each report for review and comment. On the basis of the comments received, we amended our methodological descriptions as appropriate. The authors of the Creighton/ABI report responded to written questions we submitted. Ernst & Young, Creighton/ABI, and EOUST provided additional details on their methodologies and assumptions that were not fully described in their reports. We did not verify the accuracy of the data used in any of these reports back to the original documents filed with the bankruptcy courts.

However, the Creighton/ABI authors provided us with a copy of the database used in their analysis. Ernst & Young declined to provide a copy of their database, citing VISA's proprietary interest in the data. (VISA U.S.A. and MasterCard International sponsored the Ernst & Young reports.) We received the EOUST report in early April and, because of time constraints, did not request the database for the report. We reviewed the Creighton/ABI data and performed some analyses of our own to verify the authors' categorization of data used in their analyses. In our review, we found that the Creighton/ABI researchers prepared and analyzed their data in a careful, thorough manner.

The team that reviewed the reports included specialists in program evaluation, statistical sampling, and statistical analysis from our General Government Division's Design, Methodology, and Technical Assistance group. We did our work between February and May 1999 in Washington, D.C., in accordance with generally accepted government auditing standards. On May 18, 1999, we provided a draft of our report to Ernst & Young, the authors of the Creighton/ABI report, and EOUST for comment. Each provided written comments on the report. In addition, on May 28, 1999, we met with representatives from Ernst & Young to discuss their comments on the draft report. Ernst & Young and Creighton/ABI also separately provided technical comments on the report, which we have incorporated as appropriate. The Ernst & Young, Creighton/ABI, and EOUST written comments are summarized at the end of this letter and contained in appendixes III through V.

Mr. MCCAIN. Mr. President, just like the rest of our health care delivery system, our nation's military health care delivery system cries out for reform. While both systems are plagued with rising costs and barriers to full access, the military health care delivery system is facing some very unique challenges. I intend to submit the "Contract With Our Service Members—Past and Present" first thing next session. A principal objective of this Contract will be military health care reform.

One of the critical challenges is how best to reconfigure the military health care delivery system so that it might continue to meet its military readiness and peace-time obligations at a time of continuous change for our base and force structure.

This is a challenge with which I have been grappling for some time. In the process of deciding how to proceed, I have been meeting with, and hearing from, many military family members, veterans and military retirees from around the country. I was inundated with suggestions for reform. In every meeting and every letter, I encountered retired service men and women who have problems with every aspect of the military medical care system—with long waiting periods, with access to the right kind of care, with access to needed pharmaceutical drugs, and with the broken promise of lifetime health care for military retirees and their spouses. I heard these concerns expressed as I have traveled across the United States over the past several months.

One of the areas of greatest concern among military retirees and their families is the "broken promise" of lifetime medical care, especially for those over age 65.

I believe grappling with these issues presents a great challenge and demands our very best effort. Not lost on me is the urgent need to address the over-age 65 issue since there are reportedly 1,000 World War II and Korean veterans dying every day. It is imperative that as changes are made to our nation's military force and continue to be made in the future with regards to base structure, that Congress not only stay fixated on bringing health care costs under control, but that steps be taken to retain the health care coverage so critical to our nation's active duty personnel, their families, retirees, and survivors. While the world situation necessitates a modified force and base structure transformed for the new millennium, it should not carry with it an abandonment of the responsibility that our nation has to assist those who have served our country to obtain access to the health care services they need.

Make no mistake, retiree health care is a readiness issue, as well. Today's servicemembers are acutely aware of retirees' disenfranchisement from military health coverage, and exit surveys cite this issue with increasing frequency as one of the factors in members' decisions to leave service. In fact, a recent GAO study found that "access to medical and dental care in retirement" was the number five career dissatisfier among active duty officers in retention-critical specialties.

Failure to keep health care commitments is hurting service recruiting efforts as well. Traditionally, retirees have been the services' most effective recruiters, and their children and those of family friends have had a high propensity to serve. Unfortunately, increasing numbers of retirees who have seen the government renege on its "lifetime health care" promises have become reluctant to recommend service careers to their family members and friends. Restoring their confidence in their health care coverage will go a long way toward restoring this invaluable recruiting resource.

One of the reasons that Congress has not implemented meaningful reform in the past is because of the cost of providing quality health care. Although Congress has increased the President's defense budget requests to attempt to meet our future needs, it has squandered billions each year on projects the military did not request and does not need. This year alone, Congress appropriated over \$6 billion for wasteful, unnecessary, and low-priority projects that have absolutely no positive effect on preparing our military for future challenges.

Congress also continues to refuse to close military bases that are not essential to our security, permitting politics

to outweigh military readiness, at a cost to the taxpayer of nearly \$7 billion each year. If Congress would allow the Pentagon to privatize or consolidate depot and base maintenance activities, savings of \$2 billion each year could be achieved. In addition, Congress refuses to eliminate anti-competitive "Buy American" restrictions, which could save almost \$5.5 billion annually on defense contracts.

These common sense reforms alone would free up more than \$20 billion per year, which could be used to begin remedying our readiness shortfalls and provide once-and-for-all a quality health care delivery system for our aged military retirees.

Additionally, most disgraceful is the fact that, while Congress wastes taxpayer money on obsolete infrastructure, unneeded weapons systems, and projects that have no meaningful value to the Armed Forces, it simultaneously refuses to adequately pay the nearly 12,000 enlisted military personnel who are forced to subsist on food stamps.

In October 1999, the Chairman of the Joint Chiefs of Staff and the rest of the Joint Chiefs testified before the Senate Armed Services Committee on the state of the military and universally declared the year 2000 to be the year of health care reform. Although this was a critical step for the senior uniformed military leadership to acknowledge this thinking in their testimony to the Senate, it must not become our military's Y2K problem and fall prey to election year politics.

On October 26, 1999 General Henry Shelton, Chairman of the Joint Chiefs of Staff, testified before the Senate Committee on Armed Services:

Although we have done much over the past year to improve readiness, much more needs to be done to sustain the momentum. This year, for example, we intend to focus on another component that affects personnel readiness, the quality of our military medical system The Joint Chiefs are fully committed to supporting the Department of Defense efforts to improve both the fact and the perception of military health care for all the beneficiaries. Those who serve or have served proudly deserve quality care.

One of the critical pieces of the last several years' laws on military health care was the institution of several limited pilot projects in Medicare subvention and FEHBP. As important as the select locations was the cooperation that was achieved between several agencies who were responsible for implementing the pilot project legislation devised by the Republican Congress. These pilot projects serve as important interim measures for health care reform and as a valuable comparisons of the strengths and weaknesses of the military health care delivery system. Moreover, valuable lessons can be learned from comparing the current state of the military health care program with those available in the private sector system that may have ap-

plicability to the military system, to lay the groundwork for a more comprehensive reform effort.

The rush to implement military health care reform and the evaluation of current health care delivery pilot projects must be balanced with the need to provide critical health care to the over-65 military retirees and their families. Their angst towards losing any minimal health care they had from the time they retired to turning age-65 is multiplied on their 65th birthday. If this is to be the year of military health care, a key part of this effort must entail reassuring these older retirees that the Department of Defense will no longer deny or ignore their legitimate health care needs. By doing so, Congress also will be taking an essential step to reassure today's servicemembers that the government does, in fact, keep its recruiting and retention promises concerning health care and other career service benefits.

The legislation that I am working on in the Senate would be the next step down the road to meaningful reform of our Nation's military health care delivery system. This legislation would offer the military retiree and his family several health care delivery plans to choose from. Having the choice to decide which health care plan works well is important for two reasons. One to be able to control overall health care reform costs and secondly, each retiree's needs are different. Some military retirees may not mind driving 100 miles to a military treatment facility for health care as long as they have access to a viable, quality pharmaceutical plan. Other military retirees and their families may not be able to drive long distances for their primary health care needs and instead require a health care delivery plan that is much closer to their home. Another objective of this health care reform plan, is that in the event of another base closure round, any plan be portable and less dependent on any military hospital system.

Some military retirees live near military installations and would be happy to use military care if they only had access to it. Others who live far from installations may be satisfied with the addition of a relatively low-cost prescription drug benefit. Still others desperately need full-coverage insurance such as FEHBP.

I am working on another key health care bill with cosponsors Representative NORWOOD from Georgia and Representative SHOWS from Mississippi. I have worked closely with my dear friend and Medal of Honor recipient, Colonel Bud Day, over the years and he has helped me to understand how unfair our health care system is to our military retirees and the governments' failure to keep its promise to them. I believe that if we are to restore the credibility in our government we must

begin by keeping our promises to our men and women in uniform, past and present.

The health care reform plan that is enacted must also promote more efficiency in the military health care system. Right now our military health care system which offers limited health care benefits to those over-age 65 retirees is operating \$800 million in the red. There are many efficiency practices that the beneficiaries have brought to my attention that would improve the military health care delivery system through: better billing practices, quality control of electronic forms processing, regular surveys of military health care beneficiaries, and bringing the various health care delivery systems under a single system could save hundreds of millions of dollars.

The federal government must not abandon the health care coverage needs of our nation's military retirees, their families, and survivors. I will continue to work over the next couple of months with The Military Coalition and The Military Veterans Alliance, representing nearly 10 million members, to enact comprehensive reform of the military health care system, which fulfills our obligation to our military retirees, and bolsters retention and readiness among today's servicemembers by assuring them that retention promises will be fulfilled once their active service is over.

Mr. President, next year will be, in the words of the Joint Chiefs, the year of health care reform. I hope that my colleagues will join me in supporting the "Contract With Our Service Members—Past and Present." A key objective of this Contract, legislation to reform our military health care system, must be successful if Congress is to restore the American people's faith in their government.

Thank you and I yield the floor.

Mr. REED. Mr. President, I would like to offer a few comments about H.R. 1693, a bill to amend the Fair Labor Standards Act of 1938 (FLSA) and clarify the overtime exemption for employees engaged in fire protection activities.

This bipartisan bill was passed on the House Suspension Calendar without objection on November 4, 1999, and just passed the Senate under a unanimous consent agreement.

Generally, under the Fair Labor Standards Act, workers are entitled to overtime compensation for hours worked in excess of 40 in a given week. The FLSA contains an exemption for overtime, under Section 7(k), for employees of public agencies who are engaged in fire protection activities. This exemption allows employees engaged in fire protection activities some flexibility in scheduling their work hours. It also recognizes the extended periods of time that firefighters are often on

duty by allowing firefighters to work up to 212 hours within a period of 28 consecutive days before triggering the overtime pay requirement.

H.R. 1693 clarifies this firefighter exemption as it relates to emergency medical personnel. This bill provides that paramedics who are cross-trained/dual role firefighters, and work in a fire department and have the responsibility to perform both fire fighting and emergency medical services, be treated as firefighters for the purpose of Section 7(k) of the Fair Labor Standards Act. H.R. 1693 does not create a new exemption from the FLSA, it merely clarifies the definition of firefighter.

Supported by the International Association of Fire Fighters and the International Association of Fire Chiefs, H.R. 1693 ensures that unreasonable burdens are not placed on fire departments when accounting for hours worked. In effect, it elucidates the original intent of the Section 7(k) provision of the FLSA, the provisions that apply to firefighters who perform normal fire fighting duties, and hopefully the Senate's passage of this clarification addresses the concerns of the interested parties.

Mr. KENNEDY. Mr. President, this legislation, H.R. 1693, amending the Fair Labor Standards Act, is necessary to resolve the confusion in current law over whether firefighters who are also trained as paramedics are covered by the exemption in section 7(k) of the Fair Labor Standards Act.

This bill defines "employee engaged in fire protection activities" to make clear that fire fighters who perform fire fighting duties are covered by the exemption, regardless of the number of hours they spend in responding to Emergency Medical Services calls. This legislation restores the original intent of the 1986 law that created the section exemption.

Significantly, the legislation also states that in order to qualify for the exemption, an employee must have the "legal authority and responsibility to engage in fire suppression." This phrase was added for the express purpose of assuring that single-role emergency medical personnel are not covered by the exemption. Simply sending paramedics to the fire academy will not automatically bring them under the exemption. Fire suppression must be an integral part of the responsibilities for all employees covered by the exemption.

Mr. COCHRAN. Mr. President, I am pleased to be a cosponsor and to support the passage of the Deceptive Mail Prevention and Enforcement Act, S. 335.

I congratulate the distinguished Senator from Maine, Ms. COLLINS, for her successful efforts to get this legislation adopted to curb deceptive mailings. She has provided strong leadership and sound guidance on this important

issue. As Chair of the Permanent Subcommittee on Investigations, Senator COLLINS has worked effectively to examine the problems relating to sweepstakes and promotional mailings and develop this legislation to strengthen our laws. I applaud her work in crafting this bill and her continuing efforts to protect consumers.

The Deceptive Mail Prevention and Enforcement Act includes new safeguards to protect consumers against misleading and dishonest sweepstakes and other promotional mailings, including government look-alike mailings. The bill grants additional investigative and enforcement authority to the United States Postal Service to stop unscrupulous mailings and establishes standards for all sweepstakes mailings by requiring certain disclosures on each mail piece.

This bill is an important step toward the prevention of deception in sweepstakes and other promotional mailings. I compliment Senator COLLINS on her efforts, and I am pleased to support the passage of the Deceptive Mail Prevention and Enforcement Act.

Mr. FITZGERALD. Mr. President, I am pleased that the Senate is prepared to pass the Abraham Lincoln Bicentennial Commission Act of 1999. The year 2009 is the 200th anniversary of President Lincoln's birth, and this measure would establish a commission to study and recommend to the Congress activities that are appropriate to celebrate that anniversary.

It is most fitting that we make these arrangements to honor Abraham Lincoln, one of our nation's wisest and most courageous former Presidents, on the bicentennial of his birth. The son of a Kentucky frontiersman, Abraham Lincoln was born on February 12, 1809 in a log cabin. From these humble beginnings, he went on to become the sixteenth President of the United States. Today, he is perhaps best remembered for leading the Union through a turbulent Civil War and for issuing the Emancipation Proclamation, which freed the nation's slaves.

Few people have a greater appreciation for President Lincoln than the residents of my home state of Illinois. President Lincoln spent about eight years in the Illinois State Legislature, and he also represented Illinois in the U.S. House of Representatives for a term. The only home that Abraham Lincoln owned is located in Springfield, Illinois. Today, people from all parts of the United States travel to Springfield to see Abraham Lincoln's family home, tour the Old State Capital where Mr. Lincoln said "a house divided cannot stand," and visit his final resting place in Springfield's Oak Ridge Cemetery.

The Abraham Lincoln Bicentennial Commission Act, which originated in the House of Representatives, provides for the establishment of a national

commission to recommend "fitting and proper" activities to celebrate the bicentennial of Lincoln's birth. The commission would be composed of fifteen members, including at least one person appointed by the President on the recommendation of the Governor of Illinois.

Congress created a similar commission in anticipation of the centennial of Lincoln's birth in 1909. That year, this country celebrated President Lincoln's birthday in a big way: Lincoln's image appeared on a postage stamp, his birthday became a national holiday, Congress passed legislation which led to the Lincoln Memorial's construction, and the White House approved the minting of a Lincoln penny. It is appropriate that we again prepare for the anniversary of his birth by passing this measure to establish the Abraham Lincoln Bicentennial Commission.

I close by noting that the Abraham Lincoln Bicentennial Commission Act of 1999 has tremendous support in both chambers of Congress. The bill passed the House of Representatives by a vote of 411 to 2 last month. The Senate version is the product of cooperation among Senators HATCH, LEAHY, DURBIN and me. I also commend Judiciary Chairman HATCH, ranking member LEAHY, and their staffs for their efforts to help pass this important bill.

Mr. DODD. Mr. President, there are obviously many issues that one might discuss in the context of the omnibus spending bill that is currently pending before the Senate. I would like to take a few moments to mention two very important issues that have been included in the pending legislation, the IMF debt initiative and payment of U.N. arrears.

I was extremely pleased that the House and Senate leadership were able to reach agreement earlier this week with Secretary of Treasury Larry Summers and other administration officials on legislative language that will permit the IMF's historic debt relief initiative to move forward. Just a few short days ago, it seemed unthinkable that the Congress and the Executive would reach a compromise to permit the United States to support the IMF debt initiative for highly indebted poor nations around the globe before the end of this session of Congress.

The provisions contained in the pending legislation authorize U.S. support for IMF participation in the international debt reduction initiative by permitting the United States to vote for the immediate non-market sale of the amount of gold necessary to generate profits of \$3.1 billion; permit the use of 64% of the interest earned on the invested profits to be used for debt relief; authorize the U.S. share of a special reserve account at the IMF to also be used for debt relief purposes, and appropriate \$123 million for FY 2000 bilateral U.S. debt reduction programs that

will be undertaken in conjunction with the international debt initiative.

With the enactment of this bill into law, the United States will be able to make a major step forward toward achieving the commitments made by President Clinton and other so called G-7 heads of state at this year's Cologne Summit. Among other things, this will enable the IMF, for the first time, to utilize its own resources to participate in international efforts to reduce the mounting debt burden that has been a yoke around the necks of the most impoverished nations of the world—countries which are home to nearly half a billion people. With this debt relief and the economic reforms that will be an integral part of the IMF's multilateral initiative, the poorest countries in Africa and Latin America can now approach the next millennium with prospects for a brighter future. I am extremely pleased that bipartisanship ultimately won the day during negotiations of this important issue.

Another important issue with major international implications has also finally been successfully resolved, namely the authorization and appropriation of \$926 million in long overdue U.S. payments to the United Nations. While I would have preferred to see this issue treated on its own merits, rather than linked to restrictions on bilateral funding for family planning programs of foreign private and international population organizations, at least this issue has been finally resolved, and the United States will not lose its vote at the United Nations.

I believe that extremist elements in the Congress jeopardized United States national security and foreign policy interests by holding up our payments to the UN for more than three years. They held this money hostage to the unrelated issue of international population programs. I am not happy with the compromise that had to be agreed to in order to resolve this issue. It is un-American in my view to legislatively seek to limit the free speech of foreign non-governmental organizations with respect to local family planning laws as a condition for receiving United States funding for their important family planning programs. Were I to have had the opportunity to vote on this language as a free standing amendment I would have certainly voted against it, as would a majority of the Senate. Unfortunately, because it has been included in the omnibus conference report we do not have that option. We must balance our distaste for this provision against the many positive programs that will be funded, including UN arrears, once this bill becomes law. Having done so, I will vote in favor of the pending legislation.

Mr. President, the IMF, the United Nations and its related specialized organizations—UNICEF, the Inter-

national Labor Organization, the World Health Organization, the Commission for Human Rights et al.—have a daily impact on the lives of the world's people—and it is an impact for the better. Without doubt, these international organizations further United States national security and foreign policy interests through their programs and initiatives. Representatives of the United Nations are on the ground in the far corners of the world—in East Timor, Kosovo, Haiti, and Iraq to mention but a few ongoing missions of the United Nations. The United States is able to maximize its interests and advance its foreign policy agenda at much lower cost thanks to our participation in this important international organization.

There are clearly many reasons for voting to support this spending bill, despite its many flaws. The IMF Debt Relief Initiative and payment of UN arrears are two of the more compelling ones in my opinion. I urge my colleagues to support this bill when it comes to a vote later today.

Mr. LOTT. Mr. President, today, the United States Senate unanimously passed much needed legislation to protect some of America's most threatened historic sites, the Vicksburg Campaign Trail and the Corinth battlefield.

S. 710, the Vicksburg Campaign Trail Battlefields Preservation Act of 1999, is a bipartisan measure that authorizes a feasibility study on the preservation of Civil War battlefields and related sites in the four states along the Vicksburg Campaign Trail.

As my colleagues know, Vicksburg served as a gateway to the Mississippi River during the Civil War. The eighteen month campaign for the "Gibraltar of the Confederacy" included over 100,000 soldiers and involved a number of skirmishes and major battles in Mississippi, Arkansas, Louisiana, and Tennessee.

The Mississippi Heritage Trust and the National Trust for Historic Preservation named the Vicksburg Campaign Trail as being among the most threatened sites in the state and the nation.

S. 710 would begin the process of preserving the important landmarks in the four state region that warrant further protection. I appreciate the cosponsorship of Chairman MURKOWSKI, Chairman THOMAS, and Senators LANDRIEU, BREAUX, COCHRAN, HUTCHINSON, and CRAIG on this measure.

Mr. President, the Senate also approved S. 1117, the Corinth Battlefield Preservation Act of 1999, a measure that establishes the Corinth Unit of the Shiloh National Military Park.

The battle of Shiloh was actually part of the Union Army's overall effort to seize Corinth. This small town was important to both the Confederacy and the Union. Corinth's railway was vitally important to both sides as it served as a gateway for moving troops and supplies north and south, east and

west. The overall campaign led to some of the bloodiest battles in the Western Theater. In an effort to protect the city, Southern forces built a series of earthworks and fortifications, many of which remain, at least for now, in pristine condition. Unfortunately, the National Park Service in its Profiles of America's Most Threatened Civil War Battlefields, concluded that many of the sites associated with the siege of Corinth are threatened.

S. 1117 would give Corinth its proper place in American history by formally linking the city's battlefield sites with the Shiloh National Military Park.

Mr. President, I want to thank Senators ROBB, COCHRAN, and JEFFORDS for cosponsoring this measure.

I would also like to express my appreciation to Chairman THOMAS for his ever vigilant efforts on parks legislation, and in particular, for moving both the Vicksburg Campaign Trail and Corinth battlefield bills forward.

I would also like to take this opportunity to recognize Chairman MURKOWSKI for his continued stewardship over the Senate Energy and Natural Resources Committee.

Mr. President, I also want to recognize Ken P'Pool, Deputy State Historic Preservation Officer for Mississippi; Rosemary Williams, Chairman of the Siege and Battle of Corinth Commission; John Sullivan, President of the Friends of the Vicksburg Campaign and Historic Trail; and Terry Winschel and Woody Harrell of the United States Park Service for their support and guidance on these important preservation measures.

Lastly, I would like to recognize several staff members including Randy Turner, Jim O'Toole, and Andrew Lundquist from the Senate Energy Committee, Darcie Tomasallo from Senate Legislative Counsel, and Stan Harris, Angel Campbell, Steven Wall, Jim Sartucci, and Steven Apicella from my office, for their efforts to preserve Mississippi's and America's historic resources.

Mr. President, as a result of the Senate's action today, our children will be better able to understand and appreciate the full historic, social, cultural, and economic impact of the Vicksburg Campaign Trail and the Siege and Battle of Corinth.

Mr. SESSIONS. Mr. President, I rise to ask my colleagues to join Senator JEFFORDS and me in supporting the enactment of the pending bill which clarifies the status of church welfare plans under state insurance law. These plans provide health and other benefits to ministers and lay workers at churches and church-controlled institutions. It is estimated that more than 1 million individuals rely on these programs for their health benefits.

Today, the status of these programs under state insurance laws is uncertain. This legislation merely provides

that church welfare plans are not engaged in the business of insurance for purposes of state insurance laws that relate to licensing, solvency, or insolvency.

In addition, this legislation clarifies that a church plan is single employer plan for purposes of applying state insurance laws. The language in the bill is intended to eliminate concerns by network providers and insurance companies about the legal status of a church plan under state insurance law. By enacting this legislation, networks and insurance companies otherwise doing business in a state will be able to offer to church plans the same services they offer to corporate benefit programs.

Mr. President, I first became aware of the need for this legislation when I heard from Bishop Morris from my own state of Alabama. He explained that too frequently church plans are denied access to network providers that offer discounted rates. He also explained that from time-to-time questions arise about the legal right of church plans to provide coverage under state insurance law. He asked me to look into what I could do help clarify the legal status of health plans maintained by churches and synagogues. It seemed like a reasonable request since Congress has authorized churches to maintain denominational benefit programs. However, this is also a technical area of the law that involves constitutional issues of separation of church and state. It also involves technical issues regarding insurance and benefit laws.

This legislation has been carefully crafted with the help of the church benefits community represented by the Church Alliance, a coalition of more than 30 denominational benefit programs. While they may differ on questions of theology, it is obvious that they are united in their efforts to serve those who serve their respective churches and synagogues. I also want to commend the National Association of Insurance Commissioners for their assistance in helping to work out the language of this bill. It is obvious that State Insurance Commissioners respect the right of churches to maintain benefit programs that serve clergy and lay workers.

Mr. President, churches should be commended for the commitment they have demonstrated, in some cases for more than a hundred years, to offer comprehensive benefit programs to their employees. These programs have many unique design and structural features reflecting the fact that they are maintained by denominations. As we consider health care legislation in Congress, I believe that it is important for all of us to recognize these unique features and to be mindful of the important role these church-maintained programs perform within their respective churches.

In order to give my colleagues and the public a better understanding of this legislation, I ask unanimous consent that a section-by-section of the bill appear immediately after my remarks.

Mr. President, on behalf of ministers, rabbis, and church lay workers across this country who receive benefit coverage from church plans, I urge passage of this legislation.

CLARIFICATION OF CHURCH WELFARE PLAN STATUS UNDER STATE INSURANCE LAW

Section 1 provides a statement of purpose. This section provides that the only purpose of this Act is to clarify the status of church welfare plans under certain specified state insurance law requirements and the status of a church welfare plan as a plan sponsored by a single employer. This Act clarified the status of church plans under state law. It also addresses the problem of health insurance issuers refusing to do business with church plans because of concern that church plans could be classified as unlicensed entities.

Subsection 2(a) provides that a church welfare plan is deemed to be sponsored by a single employer that does not engage in the business of insurance for the purposes of state insurance laws described in subsection (b). This subsection permits network providers and insurance companies to establish the same contractual relationships with a church plan as they are allowed to establish with any single employer plan covered under the Employee Retirement Income Security Act (ERISA) in such state.

Subsection 2(b) describes state insurance laws that (1) would require a church welfare plan or an entity that can administer or fund such a plan (only to the extent that it engages in such activity) to be licensed; or (2) relate to solvency or insolvency (including participation in guaranty funds and associations). For example, state insurance laws that impose reserve requirements or require posting of security would be described in this subsection. Similarly the plan is deemed to satisfy the licensing requirements of state insurance law.

Subsection 2(c)(1) defines the term "church plan."

Subsection 2(c)(2) defines the term "reimburses costs from general church assets." The affect of this definition is to provide that church welfare plans are not engaging in the business of insurance for certain state insurance law provisions otherwise described in this subsection 2(b).

Subsection 2(c)(3) defines the term "welfare plan." This subsection clarifies that the term "welfare plan" only includes church plans and does not include HMOs, health insurance issuers and other entities doing business with church plans or organizations sponsoring or maintaining the plan.

Subsection 2(d) provides that while the Act exempts church welfare plans from state licensing requirements, states preserve authority to enforce state insurance law provisions that remain applicable to church plans. This subsection deems welfare plans to be licensed for purposes of all other insurance laws not specifically excluded in subsection 2(b). This subsection is necessary because under some state insurance laws, only entities that are actually licensed can be subject to enforcement action under any provision of such law.

Subsection 2(e) provides that while subsections (a) and (b) deem that a church plan reimburses costs or provides insurance from general church assets for the purpose of de-

termining its status under certain state insurance laws, the rights of plan participants and beneficiaries, including those who actually make plan contributions, are not otherwise affected by the application of section 2.

Mr. GRAHAM. Mr. President, I ask unanimous consent that the following newspaper article appear in the RECORD following my statement on H.R. 1180, Work Incentives/Tax Extenders Conference Report.

[From the New York Times, Nov. 12, 1999]

A BUDGET TOO FLUSH TO FIGHT ABOUT

(By Alice M. Rivlin)

WASHINGTON—The United States political system, arguably the most effective in the world, has an uncanny penchant for making its successes look like failures. The wrangling now going on in Washington over the federal budget is an ugly, confusing spectacle—long on finger-pointing and gotcha moves, short on conciliation and statesmanship. As the vetoes, gimmickry and accusations of "raiding Social Security" fly up and down Pennsylvania Avenue, it is hard to remember that the battle is over marginal adjustments in an increasingly responsible fiscal policy.

The federal budget is already in substantial surplus—revenues exceeded expenditures by about \$120 billion in the fiscal year 1999, which would have seemed like a miracle only a few years ago—and the public, polls indicate, is pushing politicians to raise the bar. The new goal, harder but entirely appropriate, is an even bigger surplus, sufficient to reduce the debt and help the economy prepare for the rapid aging of the population.

Acrimony over small changes in a successfully balanced budget is a welcome change from the 1980's, when there was so much more to be acrimonious about. The huge deficits of that decade were clear evidence of policy failure.

The stunning success of this decade began when President George Bush and the leaders of Congress hammered out an agreement in 1990 that raised some taxes and set explicit caps on future discretionary spending. The effect was not immediately apparent because the recession the next year cut revenues, but the ground-work for a falling deficit had been laid.

The goal of President Clinton's budget plan in 1993, extended the caps and raised some taxes, was to cut the deficit in half in four years. The deficit for the fiscal year 1992 was \$290 billion—a \$50 billion surplus in Social Security, offset by a \$340 billion deficit in the rest of the budget. No one thought that getting to overall balance was a goal realistic enough to talk about, let alone reaching balance without counting the Social Security surplus.

But now that the overall budget has been balanced for two years, it's time to follow the public's leaning and adopt the more ambitious objective of balancing the budget without counting the Social Security surplus.

Paradoxically, although this raising of the bar is highly desirable, the reasons have little to do with Social Security.

Two or three decades from now, we will have a much higher ratio of retirees to workers, and the standard of living of both groups will depend on making the economy grow faster, so more goods and services are available to be consumed by everyone. Running a larger government surplus would help the economy grow. It would reduce the national debt, put downward pressure on interest rates and encourage new investment.

It doesn't matter much whether the surplus is in the Social Security fund or the rest of the budget; it is the debt reduction that helps the economy grow. Explaining the raising of the bar as "not spending the Social Security surplus" is a convenient way of suggesting a connection between the aging of the population and the need for growth. But the current budget debate does not affect the status of the Social Security fund or the rights of beneficiaries in any way. That's a debate for another (post-election) day.

If political discourse were more civil, Congress and the president would have settled their differences over the fiscal year 2000 budget long before now, probably by enacting modest increases in the spending caps and celebrating the fact that the surplus is larger than anyone expected. Then they would have gone on to explain why an even bigger surplus would be a good thing for future growth.

A growing surplus can only be achieved by restraining spending growth and avoiding a major tax cut. A tax cut would hurt prospects for economic growth by encouraging more consumer spending and forcing the Federal Reserve to raise interest rates to avoid inflation.

With any luck, the new budget will be wrapped up in a few days and Congress will go on to other business. The public will breathe a small sigh of relief but will not realize that it ought to be celebrating.

The good news is that the budget surplus is growing, no significant tax cut is being considered, and politicians are beginning to notice that the public wants them to act responsibly for the long term and reduce the federal debt.

That's a lot of good news. It's a shame the process is so ugly.

NOAA VESSEL "RAINIER"

Mr. STEVENS. Mr. President, during the last month of negotiations on the FY00 Commerce, Justice, State Appropriations conference report, there has been much discussion between the Alaska delegation and Commerce Department officials regarding where to homeport the *Rainier*. The *Rainier* is one of four hydrographic survey vessels currently homeported in Seattle. However, the *Rainier* spends nearly all of its time performing hydrographic surveys in Southeast Alaska, where the need for hydrographic surveys is great. Substantial amounts of time and money are wasted every time the *Rainier* transits the 650 miles between Seattle and Southeast Alaska.

Alaska has more than half of the United States' coastline, and no State is more dependent on marine transportation. Nonetheless, most of southeast Alaska lacks adequate hydrographic surveys. In fact, more than half of NOAA's critical backlog of survey areas is in Alaska. Much of that backlog is in southeast Alaska, where three cruise ships ran aground this summer. These ships ran aground in critical backlog areas and other areas that are literally not on the map. New coastline opens up every time a receding glacier creates a new inlet, giving vessels access to totally uncharted waters.

Chairman YOUNG of the House Resources Committee met personally with Commerce Secretary Daley on

this issue recently. The Secretary agreed that Alaska was an appropriate home for the *Rainier*. The city of Ketchikan has offered to make space available for the *Rainier* and to provide \$300,000 cash to offset the one-time cost of the move. Moving this vessel to Ketchikan makes good fiscal sense and good policy sense. I urge the Secretary to relocate the *Rainier* to Ketchikan at once.

PACIFIC SALMON TREATY

Mr. STEVENS. Mr. President, as Chairman of the Senate Appropriations Committee, I would like to explain the provisions relating to Pacific salmon and the Pacific Salmon Treaty included in the conference report for the fiscal year 2000 Commerce, State, Justice Appropriations bill. The conference report provides funding to implement the 1999 Pacific Salmon Treaty Agreement between the United States and Canada and for Pacific coastal salmon recovery efforts in Alaska, Washington, Oregon, and California. Section 623 of the conference report authorizes this funding and addresses other issues which are critical to the success of the 1999 Pacific Salmon Treaty Agreement.

Section 623(a) establishes the Northern Boundary and Transboundary Rivers Restoration and Enhancement Fund and the Southern Boundary Restoration and Enhancement Fund. The 1999 Agreement requires the United States to capitalize these two funds at \$75,000,000 and \$65,000,000, respectively, over the next 4 years. Interest earned from these funds will be spent each year to develop better information to support resource management, to rehabilitate and restore marine and freshwater habitat, and to enhance wild stock production. This investment will complement a C\$400,000,000 Canadian investment in habitat restoration and license buyback programs.

Each fund will be managed by a bilateral committee of three United States and three Canadian representatives. Appropriately, the three United States representatives on the Northern Fund Committee are Alaskans: Alaska's Commissioner and Deputy Commissioner to the Pacific Salmon Commission and the Regional Administrator of the Alaska Region of the National Marine Fisheries Service. Likewise, the three United States representatives on the Southern Fund Committee are from the Lower 48: one representative of the States of Washington and Oregon; one representative of the treaty Indian tribes; and the Regional Administrator of the Northwest Region of the National Marine Fisheries Service. I expect that the Northern Fund Committee will consult with the Northern Panel of the Pacific Salmon Commission on funding proposals prior to making its decisions. Likewise, the Southern Fund Committee should consult with the Southern Panel.

Section 623(b) implements the 1999 Agreement by addressing several conditions to that agreement. First, it provides that the \$20,000,000 appropriated to capitalize the Northern Fund and the Southern Fund will not be made available until two events occur. First, the parties to the Boldt-related litigation must sign and file stipulations staying that litigation for the duration of the 1999 Agreement. Second, the Secretary of Commerce must determine that the conduct of Alaska's fisheries under the 1999 Agreement, without further clarification or modification of the management regimes contained in the 1999 Agreement, do not cause jeopardy to salmon species listed under the Endangered Species Act. If the Secretary of Commerce requires alterations, modifications, or any other changes to the fishery management regimes contained in the Treaty, this condition is not satisfied.

The 1999 Agreement is expressly conditioned on both of these requirements being met. The document titled "Understanding of United States Negotiators," signed June 22, 1999, by eight United States negotiators, describes the stipulations to be filed, extended, or otherwise addressed for the duration of the 1999 Agreement. Similarly, the transmittal letter which accompanied the 1999 Agreement, signed June 23, 1999 by the Chief Negotiators for the United States and Canada, states that the 1999 agreement is conditioned on whether the conduct of Alaska's fisheries under the Treaty violates the Endangered Species Act. It is important to note that Congress has every reason to believe Alaska's fisheries do not cause jeopardy to listed salmon stocks. Alaska's fisheries operated under a "no jeopardy" finding before our fishermen gave up 25 percent of their Chinook catch in order to get a deal on the 1999 Agreement. To address process concerns, this subsection requires the parties to request that the court enter the stipulations before the end of the year, and that the court enter the stipulations by March 1, 2000.

Sections 623(b)(3) and 623(b)(4) specify conditions under which the Secretary of Commerce may "initiate or reinstate" consultation on Alaska Fisheries under the Endangered Species Act. Subsections (b)(3) and (b)(4) address any consultation on Alaska fisheries which is commenced after the initial consultation required in subsection (b)(1). By using the words "initiate or reinstate," Congress has addressed both those species which are currently listed under the Endangered Species Act as well as any species listed under ESA in the future. Therefore, before the Secretary of Commerce may initiate consultation on any listed species, including any species listed after this Act has passed, and before the Secretary may reinstate a previously conducted consultation, the conditions in

subsections (b)(3) and (b)(4) of section 623 must be met.

Section 623(b)(3) requires the Secretary of Commerce to issue a jeopardy determination on Southern United States fisheries before he may initiate or reinstate consultation on Alaska fisheries. Section 623(b) defines Southern United States fisheries as the directed Pacific salmon fisheries in Washington, Oregon, and the Snake River basin of Idaho that are subject to the Pacific Salmon Treaty. Subsection (b)(3) will also require the Secretary to develop the maximum sustainable yield (MSY) data or other escapement data necessary to make such a determination. The Secretary should work with the Pacific Salmon Commission to develop this information.

Section 623(b)(4) requires the Secretary of Commerce to provide the Pacific Salmon Commission a reasonable opportunity to implement the 1999 Agreement including, if necessary, the weak stock provisions in the 1999 Agreement, and to make a determination that the 1999 Agreement will not meet MSY goals before he may initiate or reinstate consultation on Alaska fisheries under ESA. The phrase "reasonable opportunity" is intended to provide sufficient time for the 1999 Agreement to work. If the Pacific Salmon Commission implements the weak stock provisions, the phrase "reasonable opportunity" is intended to provide sufficient time for the weak stock provisions to work as well. A reasonable opportunity will encompass several life cycles of the salmon under consideration.

Subsection (b)(4) purposefully adopts the recovery standard contained in the Pacific Salmon Treaty. This standard requires that the weak stock provisions return escapements as expeditiously as possible to maximum sustainable yield or other biologically-based escapement objectives agreed to by the Pacific Salmon Commission. This subsection recognizes that conservation is the foremost tenet of the Pacific Salmon Treaty. The Treaty also recognizes the importance of the salmon fisheries to the social, cultural, and economic well-being of the West Coast. Therefore, the Treaty seeks to satisfy its conservation objective with minimum disruption to the commercial, tribal, and sport fisheries. Recognizing these, objectives, the determination of whether escapement objectives have been met as expeditiously as possible must be made over a reasonable period of time, likely encompassing several life cycles of the salmon species under consideration.

The most important feature of this law is that it requires the Secretary to delay the enforcement of the Endangered Species Act until the Pacific Salmon Commission has an opportunity to implement the Treaty and, if necessary, the weak stock provisions of

the Treaty. This later-enacted law relieves the Secretary of his duty to apply the Endangered Species Act during the time the Commission is implementing the Treaty and the weak stock provisions. This is important because the Commission is better able to recover weak stocks using the Treaty than is the Secretary using the Endangered Species Act. The Commission can require harvest restrictions in Canada, where up to half of the coastwide Chinook harvest is caught. Unlike the Pacific Salmon Treaty, the Endangered Species Act does not apply in Canada. Subsection (b)(4) recognizes the important role the Pacific Salmon Commission should play in the recovery of weak stocks by ensuring that the Commission has the opportunity to fully implement the weak stock provisions of the Pacific Salmon Treaty.

Section 623(c) makes needed changes to the voting structure of the Pacific Salmon Commission. The Pacific Salmon Treaty Act of 1985 required the three voting United States Commissioners to reach unanimous agreement before making a decision on behalf of the United States. This requirement was put in place without knowing how disruptive it would prove to subsequent negotiations. In practice, it has allowed Canadian negotiators to leverage northern and southern U.S. interest against each other. Subsection (c) prevents this unintended consequence by providing that the southern U.S. interests represent the United States on southern fisheries and Alaska represents the United States on northern fisheries. In fact, the 1999 Agreement itself did not take shape until Alaska and Canada were able to negotiate northern fisheries issues without interference from southern interests. Chinook salmon, which can migrate through northern and southern jurisdictions, are exempt from this provision.

Section 623(d) authorizes \$20,000,000 total to capitalize the Northern Fund and the Southern Fund. To meet a condition of the 1999 Agreement, these amounts will not be released until stipulations have been signed and court orders requested in certain litigation involving the application of tribal fishing rights. Subsection (d) also authorizes \$58,000,000 for salmon recovery efforts in Alaska, Washington, Oregon, and California. Amounts appropriated to the four States are subject to a 25 percent non-federal match requirement. States may meet this requirement with cash or other in-kind contributions supported by existing state funding.

I understand Washington State and Oregon will use their shares of this funding to address the significant habitat issues they face in those States. Alaska has neither enjoyed the benefits nor suffered the consequence of extensive development inside its borders, although some would say that we have

suffered the consequences of development elsewhere through the harvest restrictions our fishermen have endured over the years. I expect that in addition to habitat restoration, Alaska will participate in other programs consistent with Treaty implementation, such as marketing initiatives. Alaska also has the authority to participate in salmon initiatives in other States and on tribal lands. Many of the tribes will likely use their funding to participate in demonstration projects on supplementation including the use of Mitchell Act hatcheries to increase production of wild stocks. A close analysis of NMFS's artificial propagation policy may lead to different policies which help meet the recovery goals outlined in the Pacific Salmon Treaty. I look forward to the results of the States and tribal efforts.

Mr. DORGAN. Mr. President, one of the bills that will pass today as part of an Energy and Natural Resources Committee package is S. 769, which provides a final settlement on certain debts owed by the city of Dickinson, North Dakota to the Bureau of Reclamation. The legislation, which was introduced by Senator KENT CONRAD and myself, is virtually identical to that introduced during the last Congress.

The Dickinson Dam Bascule Gates Settlement Act (S. 769) will afford long overdue relief to the citizens of Dickinson. Let me briefly explain why the debt liquidation is needed and appropriate. For one thing, the Bureau of Reclamation built a faulty project. The debt was incurred by the city of Dickinson for construction of a dam with gate structures which never worked properly. In addition, the need for the bascule gates as regulating structures to help provide a reliable local water supply was eclipsed by the construction of the Southwest Pipeline. The pipeline is part of the Garrison Diversion Project which is managed by the same Bureau of Reclamation.

Consequently, it makes no sense for the city of Dickinson to have two water supply systems when it needs only one—especially when the first system was a faulty one. The city has already repaid more than \$1.2 million for the bascule gates, even though they now provide virtually no benefit to the city.

The legislation itself is actually quite simple. It would permit the Secretary of the Interior to accept one final payment of \$300,000 from the city of Dickinson in place of a series of payments, totaling about \$1.5 million, required by city's current repayment contract. The final payment may be adjusted for payments made after June 2, 1998.

The bill also clarifies that the city of Dickinson will be responsible for up to \$15,000 in annual operation and maintenance (O&M) costs. This amount represents the average costs for O&M on

the gate structures over the past 15 years. The bill as introduced was not explicit on this point and Senator CONRAD and I have worked with the Energy Committee on an amendment that is part of the reported bill.

I want to thank Chairman FRANK MURKOWSKI, Ranking Member JEFF BINGAMAN, Subcommittee Chairman GORDON SMITH, and their staffs for their cooperation and assistance. I also want to underscore the leadership of Senator CONRAD in developing this legislation and the excellent work of his Deputy Legislative Director, Kirk Johnson. May I also commend Dickinson Mayor Fred Gengler and City Administrator Greg Sund for their help and persistence in seeking a fair resolution to this matter.

TECHNICAL EDIT TO H.R. 486

Mr. BURNS. Mr. President, as the prime sponsor of S. 1547, the Senate companion bill to H.R. 486, I would like to make remarks on a technical edit to H.R. 486. I believe Sec. 3(f)(1) of Sec. 5008 needs some clarification. Subsection (1)(D) states very clearly that the "Commission shall act to preserve the contours of low-power television licenses pending the final resolution of a class A application." The Commission's function to preserve the protected contours is very clear. But creating separate subsections for the certification and application processes may have created some uncertainty regarding the timing of when the Commission should begin to provide this protection. I want to assure my colleagues that I agree with the prime sponsors of H.R. 486 that the front-end certification process is an integral first step in the application process. It is clearly our intent that as soon as the Commission is in receipt of an acceptable certification notice, it should protect the contours of this station until final resolution of that application. Of course, this provision does not exempt licensees from other provision of this act.

Thank you, Mr. President.

Mr. HELMS. Mr. President, for those who may wonder why H.R. 3427, which was deemed enacted as a separate law in H.R. 3194, the D.C. Appropriations bill is called the "Admiral James W. Nance and Meg Donovan Foreign Relations Authorization Act for 2000 and 2001," it is because of our love, affection and respect for Admiral Bud Nance and Meg Donovan.

Bud Nance was Chief of Staff of the Foreign Relations Committee until he passed away on May 11.

Bud served his country his entire adult life—as an ensign aboard the USS *North Carolina* in the Pacific Theater during World War II and later as a test pilot and fighter pilot. Among his many honors, he earned two Distinguished Service Medals and capped off his distinguished 38-year navy career as skipper of the aircraft carrier USS *Forrestal*.

Bud went on to serve as President Ronald Reagan's Deputy National Security Advisor. And at my request in 1991 Bud became minority staff director for the Foreign Relations Committee. From January 1995 until his passing in May, he served as Chief of Staff for the majority. Bud refused to take the job until I agreed that he would not take a paycheck. Bud said that his country had been good to him and this was how he could give something back to his country.

Bud was my lifelong friend. We were born two months apart, two blocks apart in the little town of Monroe, North Carolina. I miss my friend; it was a blessing to know him.

I am pleased that the House and the Senate agreed to recognize Bud and his influence on this bill, which was the last bill on which he had the opportunity to work. In addition, Meg Donovan has been added to the bill's name. I know Bud would have been honored to share this bill with Meg for whom he had a deep affection.

Like Bud, Meg Donovan, who died at age 47 of cancer last October, had spent much of her life in government service and international affairs. She served as the Deputy Assistant Secretary for Legislative Affairs at the State Department at the time of her death, and before that was a longtime House International Relations Committee staff member.

Meg worked closely with the Senate on the confirmation of key foreign affairs nominations, including those of Secretary of State Warren Christopher, and later, Madeleine K. Albright. In the Congress, she worked primarily on issues dealing with political and religious dissidents, minorities and other persecuted groups, including Tibetans, Soviet Jews and women.

Both Bud and Meg are missed by the staffs of the Senate Foreign Relations Committee and the House International Relations Committee, and by me and countless others, all of whom are pleased that this legislation bears the names of these two fine Americans.

Mr. L. CHAFEE. Mr. President, I rise today to express my support for the extension of the Northeast Dairy Compact. I also wish to commend my colleagues from New England for all of their hard work on this issue. Senators JEFFORDS, SPECTER, LEAHY, and others all have worked diligently to protect the dairy farmers in our region. I thank them for their efforts.

As my colleagues know, the Northeast Dairy Compact was approved by Congress in 1996 as a part of the Freedom to Farm bill. It was implemented after the Secretary of Agriculture found that there was a "compelling public interest" for its creation.

A state-generated response to the decline in the New England dairy industry over the last decade, the Dairy Compact has preserved local milk sup-

plies for the Northeast. In 1978, there were 6,439 dairy farms in New England. By 1992, the number of dairy farms fell to 3,974. During this same time, the number of dairy farms in my home state fell from 93 to 41—a 60 percent decrease. As I stand here today, there are only 30 dairy farms remaining. 93 to 30. This certainly is an alarming number.

Why is this alarming? Dairy farms are the essence of New England—independent and hard working—the very symbol of our region. They are not in far away rural areas such as those in other parts of the country. Most are close to fast growing areas which are ripe for development. It would be very easy for any one of our local dairy farmers to sell their land to area developers and settle for an easier lifestyle.

In New England, we value the contributions of our dairy farmers. As areas feel the pressure of population growth, and the resulting stress on the environment, it becomes more and more important to support dairy farming and the benefits we all reap from their existence. We do not want to see them disappear. To have them extinguished from the New England countryside would be the equivalent of the Liberty Bell leaving Pennsylvania, the Statue of Liberty leaving New York, and Mount Rushmore being torn down for townhomes in South Dakota.

The Northeast Dairy Compact works. It is only fitting that we are here today to extend its existence. To do otherwise would jeopardize the progress that has been made to preserve our lands and the farming economy in New England.

Again, I thank my colleagues for their attention, and I yield the floor.

Mr. ROBB. Mr. President, I'd like to commend the efforts of those of my colleagues who joined in the effort to make an important change to the Satellite Home Viewer Improvement Act of 1999. As initially drafted, the conference report on H.R. 1554 caused many of us great concern because it included two provisions which could have discriminated against Internet and broadband service providers by expressly and permanently excluding any "online digital communication service" from retransmitting a television signal or other audiovisual work pursuant to a compulsory or statutory license. Like many of my colleagues, I was deeply concerned that in the race to adjourn, Congress would neglect to fix these potentially damaging provisions.

Under the agreement which has been reached on this bill, these provisions have been deleted. This was the right thing to do: these two provisions had been added to the conference report late in the process, after agreement had been reached on the fundamental parameters of the bill, and without any public debate. Now that the provisions have been removed, the committees of

jurisdiction will have an opportunity to consider the proper application of the compulsory and statutory licensing provisions of the Copyright Act to Internet and broadband service providers.

Given the enormous importance of the Internet for enhancing consumer access to programming, it is essential that Congress give full attention to this issue early next year. I look forward to working with my colleagues to ensure that we take steps to further enhance the range of choices consumers have in the marketplace.

I also wanted to take a moment to commend Senator BAUCUS and others for their efforts in securing an agreement to address the problems that small-market and rural areas now face in obtaining satellite broadcasts of their local television stations. By my estimates, the only market in Virginia that will get local-into-local service with the current bill is the metropolitan D.C. area, leaving over 94% of satellite households in my state without this crucial service. All Virginians, however, and, indeed, all Americans, deserve quality local satellite service, and I intend to make this issue a top priority when Congress returns next year.

Mr. LOTT. Mr. President, today the Senate passed the Intellectual Property and Communications Omnibus Reform Act of 1999. This bill makes many needed and timely reforms to the Satellite Home Viewer Act which originally passed almost 12 years ago. I have said for many months I believed this was a measure that Congress should enact before adjourning this year, and am pleased that we have been able to move forward on this important piece of legislation.

For a number of years, great strides have been made by providers of direct broadcast satellite to compete for customers with cable, the traditional provider of multichannel video services. Congress recognized this marketplace development and the necessity to update the rules of the road to advance such competition.

Satellite television providers have a unique product to offer, and more and more consumers are opting for television via satellite, including my own son Chet. During a visit in his home, I learned firsthand just what this debate is all about. So I disagree with those who say this is just a broadcaster bill or this is just a satellite bill. Clearly, both sides had to compromise, and the end result is one that is fair to the various industry segments.

As always, when dealing with such contentious issues in the legislative process as were confronted in this measure, the competing interests of several parties had to be balanced. A number of compromises were reached, and the bill considered by the full Senate today will be good for consumers and good for competition.

This bill allows, for the first time ever, satellite providers to offer local signals in local markets. Consumers value their local signals. They want to see their local news, their local weather, their local sports. Promoting localism was a goal of the conferees, while at the same time giving the satellite industry the tools it needed to grow its business. This provision will go a long way toward freeing satellite providers to compete head-on with cable for customers who want their local signals, or to provide service in many areas where cable is not even an available option.

This measure will not only boost competition in the multichannel video marketplace, but will also ensure that consumers are not stranded in a catch-22, without service. I know many of my colleagues, myself included, heard from literally hundreds of thousands of constituents across the country. Constituents who had, in good faith, subscribed to satellite television. Constituents who were about to lose, or had already lost, their distant network programming channels, through no fault of their own. S. 1948 includes a reasonable, balanced approach to restore eligibility for many of these subscribers, while preventing further pending shutdowns.

Other consumer friendly provisions were adopted. An improved model to more accurately predict eligibility to receive distant network signals from a satellite provider. Increased certainty in the waiver process when dealing with their local broadcasters.

I feel very strongly that consumers should not be put in a bind again by being sold a service, only to have it taken away.

The revised rules of the road will help level the playing field for the direct broadcast satellite industry as well. Copyright rates are slashed. Existing satellite copyright compulsory licenses are extended for 5 years. A 90-day waiting period to begin serving current cable customers who want to switch to satellite is eliminated. And the FCC will be required to review the distant signal eligibility standard and recommend improvements to Congress. The compromise also allows for a phase-in period for obtaining permission to bring local signals into markets, so that consumers and local stations benefit from local-into-local as soon as possible.

Mr. President, the offering of local-into-local is an expensive undertaking. Many of my colleagues in Congress, particularly those who represent rural states, recognize that economics will drive local-into-local into larger, urban markets first. They wonder whether rural and small markets will receive this service.

While debating the merits of the overall bill, this legitimate concern was raised. A concern that I share as well. I want my constituents to be able

to choose a satellite provider for television without having to sacrifice watching their local broadcast stations. The largest designated market area in my home state of Mississippi is Jackson, which ranks number 89 out of more than 200 designated market areas. Satellite providers have clearly indicated they are likely to offer this new service in the top 60 to 70 markets. This translates into a lack of comparable choices for my constituents, and for millions of other Americans across the country. So this is an important issue that deserves the attention of Congress.

From the beginning, Senator BURNS has been the champion of the idea of a loan guarantee program to foster the development of systems to deliver local-into-local in rural and small market areas. Although a number of Senators have stood up to talk about how important this program is for their respective states, it has been Senator BURNS who has stood firm and fought for this program.

It is Senator BURNS who is responsible for establishing the process for the full Senate to consider the loan guarantee proposal early next year.

I also want to thank Senator GRAMM, the distinguished Chairman of the Senate's Banking Committee, for his cooperation in moving this legislation forward.

Based on my conversations with him and other Members, I was pleased that a unanimous consent agreement was reached. This agreement requires that a loan guarantee bill be reported to the Senate by March 30, 2000. It is my intention to get this provision enacted into law soon thereafter.

Mr. President, I want to be clear. This unanimous consent agreement does not delay the implementation of the loan guarantee program. In fact, Senator BURNS' proposal, if passed today, would still be subject to Fiscal Year 2001 appropriations anyway. So the earliest this program could take effect under any scenario is in Fiscal Year 2001. The agreed upon schedule for consideration of the loan guarantee authorization is consistent with the appropriations timetable.

So, I believe the right incentives are in place to timely act on this matter when the Senate reconvenes next year. And I hope we can all work together, from both sides of the aisle. Without this kind of incentive, millions of Americans could be left behind.

Mr. President, the participation of Members was integral in bringing this bill to fruition. I want to commend Senator HATCH, Chairman of the Senate Judiciary Committee, for his leadership and determination to complete the Senate and House negotiations on this legislation. He worked diligently for weeks, dealing with major competing interests to achieve a balanced policy. Senator HATCH, Senator

MCCAIN, Chairman of the Senate Commerce, Science, and Transportation Committee, Congressman BLILEY, Chairman of the House Commerce Committee, and Congressman HYDE, Chairman of the House Judiciary Committee, along with all of the other Members of the conference, contributed greatly to the process, and I am grateful to them for their service.

This bill would not have been completed without the dedicated efforts and countless long hours of negotiation among staff. Their hard work is very much appreciated, and I want to take a moment to recognize who they are: Monica Azare, Ed Barron, Pete Belvin, Renee Bennett, Shawn Bentley, Benjamin Cline, Tony Coe, Manus Cooney, Colin Crowell, Troy Dow, Jon Dudas, Julian Epstein, Paula Ford, Doug Farry, Bob Foster, Mitch Glazier, Jim Hippe, Tim Kurth, Jon Leibowitz, Peter Levitas, Andy Levin, Justin Lilley, Garry Malphrus, Maureen McLaughlin, Mark Monson, Ann Morton, Al Mottur, Mitch Rose, Jim Sartucci, Jonathan Schwantes, and Alison Vinson.

Mr. President, this bill is an improvement over the current state of play in today's multichannel video marketplace. It is not perfect, but it is a positive step forward in advancing competition among industries and choice for consumers.

Mr. GORTON. Mr. President, I would like briefly to address Section 2002 of the Intellectual Property and Communications Omnibus Reform Act of 1999, which is an amendment to the Omnibus package, to clarify its meaning with my colleague who drafted the provision.

There are a number of United States companies that have applied to the FCC for licenses to operate non-geostationary satellite systems in the so-called "Ku-band." These firms are spending substantial amounts of private capital to develop satellite systems that will provide a host of telecommunications services to benefit the public. The satellite systems that have applied for licenses in the Ku-band are designed to operate globally on a primary basis, and already are treated as primary users of the Ku-band in the International Table of Frequency Allocations.

Mr. President, I bring this up because section 2002(a) directs the FCC to consider issuing licenses, possibly in the same bands, for new terrestrial communications services that provide local television to rural areas. Section 2002(b)(2) provides that the FCC must ensure that any new licensees for local television in rural areas do not cause harmful interference to primary users of the spectrum, presumably the Ku-band spectrum.

I want to clarify that Section 2002(b)(2) requires the FCC to prevent harmful interference not only with

those who have been designated as primary users on the date of enactment of this Act, but also with prospective primary users of the Ku-band. If the FCC were to misinterpret this section, that is, if the FCC prevented only harmful interference with those who are primary users on the date of enactment, the public could be denied the substantial benefits of emerging satellite technologies.

Mr. MCCAIN. I agree with my colleague that the authors of this bill did not mean to interfere with the expert technical and regulatory judgment of the FCC with respect to licensing applicants in the Ku-band. The term "primary user" in Section 2002 is intended to include primary users, regardless of whether these users are primary on the date of enactment or are later designated as primary. The provision in no way seeks to grant preferential regulatory treatment to terrestrial license applicants over satellite system applicants. While there appears to be an error in the report accompanying this legislation, which incorrectly states that the statute says that "existing" primary users must be protected, clearly the statute does not contain this qualifier, and it is our intent that the FCC protect primary users, whether designated now, or later.

Mr. CLELAND. Mr. President, on November 9, 1999, the House of Representatives overwhelmingly passed (411-8) the conference report on H.R. 1554, the Intellectual Property and Communications Omnibus Reform Act of 1999. Arriving at a conference report compromise was a long process. For months, conferees have been negotiating over these provisions. The bill the Committee produced was a good bill, and that is underscored by the overwhelming, bipartisan support the final version received.

However, the Senate will not act on this bill prior to adjourning for the year. Instead, Congress will recess without passing the complete Conference Committee version of H.R. 1554. In an attempt to achieve some of the gains from this bill, a modified version of the Satellite Home Viewers Act will be attached to the final omnibus appropriations bill and passed by Congress. However, it will be absent one important provision that would help ensure that rural citizens are not overlooked as they often are in other sectors.

The two major direct broadcast satellite (DBS) companies have stated to Congress that they will only serve the most popular markets with local broadcast channels once the statutory restriction prohibiting this action is removed. An incentive needs to be there for businesses to develop this same service for households in second tier markets and rural areas as well. The conference report to H.R. 1554 would have provided \$1.25 billion in loan guarantees for satellite companies

that seek to serve these often overlooked markets. It was an idea I strongly supported because it would have encouraged development of this service in second tier and rural markets in Georgia and elsewhere in the country.

Instead, a single Senator demanded the removal of this provision because of procedural issues and because, at the end of a legislative session it generally takes unanimous consent to expedite consideration of each measure, the bill presented to the Senate as part of the final appropriations bill reflects an acquiescence to this demand. To respond to those of us who supported the loan guarantee, the Chairman of the Banking Committee has promised to take up this provision and pass appropriate legislation by April 1, 2000. In the meantime, millions of satellite viewers who live in middle and rural America will not have the opportunity to view their local channels nor will they have the solace in knowing such service will be coming soon. This is very disappointing, and it is my sincere hope that the promise to act swiftly on the loan guarantees will be kept in an environment where promises and compacts are too often ignored.

As a member of the Commerce Committee, I have been closely following this bill throughout the entire process. At the heart of this debate is viewers' access to local broadcast television. I say to my colleagues that rural Americans deserve the same access to their local broadcast stations that urban and suburban DBS customers will soon enjoy. I will work next year to ensure that this loan guarantee program is acted upon swiftly.

Mr. HOLLINGS. Mr. President, this conference report represents a first step in promoting satellite as a competitor to cable. The conference was presented with two bills which approached a number of the major issues in very different ways. In order to reach an agreement, compromises were made. As a result, I believe consumers are better off with the passage of this bill, and satellite companies are now in a better position to compete with cable companies.

A number of provisions in particular will improve and expand satellite service to consumers. This conference report establishes a framework for satellite companies to deliver local network signals into local markets. This allows satellite consumers to receive their local network stations by satellite. The satellite companies have indicated that it is crucial that they are able to deliver local broadcast signals to satellite consumers if they are to compete with cable. I hope going forward, satellite companies embrace this provision and provide local signals to as many markets as possible, including those in rural areas.

In addition to these provisions, the conference report directs the FCC to

establish a waiver process to allow satellite consumers who cannot receive their broadcast signals over an outdoor antenna, to obtain a waiver and be allowed to get distant network signals. This provision establishes a uniform waiver process and ensures that a consumer's request for a waiver will be addressed within 30 days. The conference report also requires the FCC to improve the accuracy of the methodology used to predict which consumers cannot receive their broadcast signals over the air, and therefore, can obtain distant network signals by satellite. Language also has been placed in the bill to improve the negotiating position of the satellite companies in their negotiations with broadcasters to obtain programming. Hopefully, this provision will help satellite providers to obtain programming from broadcasters on fair and reasonable terms, and ultimately, provide consumers with service at a competitive price.

As noted previously, compromises were made. As the bill advanced through committee, I opposed the grandfathering of satellite customers who had been illegally provided distant network signals. At that time, I stated that illegal activities should not be rewarded. Satellite companies should not benefit from a grandfather of illegally provided distant broadcast signals to consumers. Nonetheless, the conference decided to allow satellite consumers who can receive their local network signals of Grade B intensity over an antenna, to continue to receive distant network signals by satellite. It also allowed satellite consumers who receive distant broadcast signals through big (C-band) dishes to continue receiving such service regardless of whether their distant broadcast signals have been cut-off or have been scheduled to be cut-off. In this bill, we have taken a number of steps to provide a better framework for the provision of satellite service. Therefore, I hope satellite companies will comply with the law going forward.

I expect the passage of this conference report will result in the delivery of better satellite service to consumers, and ensure that satellite companies can provide consumers with a competitively priced option to cable service.

Mr. BOND. Mr. President, as many of my colleagues know, the so-called "patent reform" act was placed in the Satellite Home Viewer Act in the waning hours of the conference. Even though this bill did not clear the Senate floor in regular order and never had a vote on the floor of the Senate and was highly controversial for three years the proponents had to resort to these tactics to secure passage. The Satellite Act was very important and many Americans were relying on its passage so it provided the leverage. This is an unfortunate development in

this legislative battle. Over the strenuous objections of several members, the bill stayed in the conference report. The inventors never even got a debate on the floor of the Senate. I think the entrepreneurs of America deserve far better than this sort of treatment.

Special recognition should be given to the staff of the Alliance for American Innovation for their hard work on behalf of American Inventors, particularly Steven Shore and Beverly Selby. Also, Congresswoman Helen Bentley labored tirelessly on behalf of America's inventors, they deserve a great deal of recognition for their fight. As does Jim Morrison of the National Association of the Self Employed. They won many victories in this battle and the proponents had to resort to these sorts of tactics to defeat them. It is unfortunate how this bill was handled, the American inventors deserved a debate and a vote—for all that they do for America, they deserve better. We are going to be watching carefully the impact of this bill on innovation in America.

Mr. DEWINE. Mr. President, for the past several months I have served as a member of the House-Senate conference on H.R. 1554, the Satellite Home Viewer Improvement Act of 1999, which has been reported as a part of H.R. 3194, the District of Columbia Appropriations Act. The Satellite Home Viewer Improvement Act is a complicated and technical bill, but at its heart lies a simple premise—to protect interests of consumers by allowing more choices in the market for television providers. The conference agreement does this by allowing satellite companies the same opportunity to provide local signals that cable providers currently enjoy—and this increased competition should lead to better prices and better services for consumers. I hope my colleagues will join me in supporting the act.

As is to be expected in any complex piece of legislation, there were a number of difficult issues, and many public policy goals to be considered. The most important of these public policy goals is to protect the interests of consumers, and we needed to consider two factors in that regard—enhancing consumer choice in television service, and protecting the local television stations that so many rely on for their news, traffic, weather and sports. Accordingly, the conference agreement features a number of compromises that aim to protect both of these consumer interests.

Perhaps the best example of this is the so-called "must carry" provision. This provision requires that if a multichannel video provider (for example cable, or satellite) is carrying any broadcast signals in a given market, that provider must carry all broadcast signals in a given market. This require-

ment protects local television stations by assuring that their signals will be carried, whether consumers are purchasing satellite service or cable service. At first this may limit the number of markets that satellite providers can reach, but as technology and satellite capacity increase we are confident that satellite service, and the benefits of local signal competition, will reach more and more markets. This provision does not go into effect until January 1, 2002, in order to give the satellite companies time to further develop their technology and improve their product for consumers.

In the meantime, this act offers a number of other benefits to consumers. It sets the copyright rate for local signals at zero, and cuts the copyright rate for the so-called "distant local signals" by as much as 45 percent. It provides a "grandfather" clause for a large group of consumers already receiving satellite service, who might otherwise be cut off by a federal court ruling. And it makes it easier for consumers to determine what type of satellite service they are eligible for, a process which in the past has been somewhat difficult.

As many of my colleagues have noted, this act may not completely cure the competitive problems faced by consumers in the marketplace for video services. Certain provisions will require further action by the Federal Communications Commission and by Congress. But it is a good step in the right direction. I believe the Satellite Home Viewer Improvement Act of 1999 will increase competition in these markets, and it will increase consumer choice. In the short run, and in the long run, this act is good for competition, and good for consumers.

COMPULSORY LICENSING AND ONLINE SERVICE PROVIDERS

Mr. WARNER. Mr. President, I rise to explain to my colleagues an important change made to the Satellite Home Viewer Improvement Act of 1999, which was reintroduced as S. 1948 and included in the measure before us today. As my colleagues may know, I and other Senators had been very concerned that two sections of the legislation would unfairly have discriminated against Internet service providers. Many of my constituents were concerned that sections 1005(e) and 1011(c) of the legislation would be interpreted by the courts or the Copyright Office to expressly and permanently exclude any "online digital communication service" from retransmitting a transmission of a television program or other audiovisual work pursuant to a compulsory or statutory license under the Copyright Act.

I am pleased to report that these potentially damaging provisions were deleted from the bill before us. As my colleagues may know, these provisions originally were inserted in conference,

even though the committees of jurisdiction had never held hearings on them, had never received any record evidence as to their need, and had never considered them in open debate. The committees of jurisdiction in the House and the Senate will now have an opportunity to carefully consider the application of the Copyright Act to the Internet and broadband service providers.

As someone proud to represent most of the major Internet service providers in the world, I have little doubt about the importance of the Internet and other online communications technologies for enhancing consumer access to information and programming. Online technology has transformed the way consumers receive information, including audiovisual works. It undoubtedly will bring other benefits, but only if Congress makes certain that it does not place unreasonable barriers in the way.

Because rapid technological changes are having an ever more significant impact on our economy, it is essential that the Congress give full attention to this issue early next year.

THE INTELLECTUAL PROPERTY AND
COMMUNICATIONS ACT

Mr. KERRY. Mr. President, I am pleased that Sec. 2002 of S. 1948 directs the Federal Communications Commission to expedite its review of license applications to deliver local television signals into all local markets. It's my understanding that the FCC has had applications pending before it since January, which, if approved, would clear the way for nationwide deployment of an innovative digital terrestrial wireless system for multi-channel video programming. This new technology will benefit all Americans by providing robust competition to incumbent cable systems in Massachusetts and across the entire nation. Equally important, it will provide rural Americans with the same access to local signals as their urban and suburban counterparts. Under Sec. 2002(b)(2), the FCC shall ensure that licensees will not cause harmful interference to existing primary users of the spectrum. Moreover, the FCC, consistent with its mission to manage the spectrum in the public interest, will address, any coordination related to new users of a particular band.

Mr. DEWINE. Mr. President, I rise today in support of the American Inventors Protection Act of 1999, which is incorporated into the Satellite Home Viewers Act Conference Committee Report. I am a Member of that Conference Committee. Ultimately, the Satellite Home Viewers Act Conference Committee Report will be included in this year's omnibus appropriations bill, the District of Columbia Appropriations Act of 2000.

With regard to the American Inventors Protection Act, I am particularly

pleased with the Act's inclusion of the first inventor or "prior user" defense, created by Subtitle C. Unfortunately, the fact that this Act is being considered by the Senate in the closing days of the legislative session has limited the Judiciary Committee's ability to include a complete legislative history on the Act. As a Member of the Judiciary Committee, my intent is that this statement supplement the Senate's legislative history with regard to Subtitle C of the American Inventors Protection Act.

The prior user defense to patent infringement is of great importance to the financial services industry. For years, the financial services industry developed "back office" methods and processes that are fundamental to the delivery of many financial services. The House Judiciary Committee Report refers to the breadth of the types of methods and processes used by the financial services industry: "These financial services may embody methods or processes incorporated into any number of systems including, but not limited to, trading, investment and liquidity management, securities custody and reporting, balance reporting, funds transfer, ACH, ATM processing, on-line banking, check processing and compliance and risk management. In each of these systems, multiple processing and method steps are acting upon a customer's data without its knowledge." Minor changes in the bill since it was reported by the House Judiciary Committee do not affect the scope of methods to be considered under this Title.

Virtually no one in the industry believed that these methods or processes were patentable. Instead, the only legal protections believed to be available were those granted under trade secret laws. Last year, in *State Street Bank & Trust Company v. Signature Financial Group, Inc.*, the financial services industry was dealt a blow when the Court of Appeals for the Federal Circuit held that business methods can be patented. Early this year, the Supreme Court denied certiorari in that case, making it official. After *State Street*, methods and processes that were developed by the financial services industry years ago are subject to patent. Some of these methods and processes are transparent to the end user of the services and can be "reverse engineered" and then easily copied. A later user of the method can now patent a method or process that another inventor had developed and put into use first. The actual inventor would then be prohibited from using his own invention, or be required to pay royalties to the subsequent inventor.

This situation is clearly unfair. Fortunately, Subtitle C of the American Inventors Protection Act partially corrects the unfortunate consequences of the *State Street* decision by adding a

new section to the patent code establishing the "prior user" defense. Specifically, this provides a defense to a claim of patent infringement where a person has commercially used or made serious preparations to commercially use a process that later becomes the subject matter of a patent issued to another. Under this subtitle, an "internal commercial use or arm's length commercial transfer of a useful end result" includes a method or process, the subject matter of which may be directed to an information or data processing system providing a financial service, whether in the form of physical products, or in the form of services, or in the form of some useful results.

The term "method" should be interpreted broadly so that it includes any "method of doing or conducting business," including a process. The method that is the subject matter of the defense may be an internal method of doing business, a method used in the course of doing or conducting business, or a method for conducting business in the public marketplace. It can be a method used in the design, formulation, preparation, application, testing, or manufacture of a product or service. A method is any systematic way of accomplishing a particular business goal. The defense should be applicable against patent infringement claims regarding methods, and to claims involving machines or articles of manufacture used to practice such methods (if such apparatus claims are included in the asserted patent). In the context of the financial services industry, methods would include financial instruments (e.g., stocks, bonds, mutual funds), financial products (e.g., futures, derivatives, asset-backed securities), financial transactions, the ordering of financial information, any system or process that transmits or transforms information with respect to eventual investments or financial transactions, and any method or process listed as examples by the House Judiciary Committee in its report.

Of course, the defense is not a general license; it extends only to the specific subject matter claimed in the patent. A person asserting the defense under this new section has the burden of establishing it by clear and convincing evidence. As used in this title "person" includes each parent, subsidiary, affiliate, division, or other entity related to the holder of the defense when they are accused of infringement of the relevant patent. If the defense is asserted by a person who is ultimately found to infringe a patent, and subsequently fails to demonstrate a reasonable basis for asserting the defense, then the court must award attorneys fees under section 285 of Title 35.

The first inventors defense is not available if a person has abandoned commercial use of the subject matter. In the context of this Act, abandonment means cessation of use with no

intent to resume. In the financial services industry, certain activities are naturally periodic or cyclical. Intervals of non-use because of factors such as seasonal needs, or reasonable intervals between contracts, should not be considered abandonment.

Mr. President, subtitle C strikes a balance between the rights of the later inventor who obtains patent protection to enjoy his exclusive rights in the claimed subject matter, and the inherent fairness to the earlier user to continue to use its methods and processes to conduct and, even expand, its business. Thus, by creating a personal, prior user defense, subtitle C would give the patent owner its statutory patent rights enforceable against all except the earlier inventor and commercial user of common subject matter.

Mr. KOHL. Mr. President, I rise in support of the Satellite Home Viewer Improvement Act of 1999 which is now included as part of this year's Omnibus Appropriations Bill. Simply put, these changes in the law are long overdue.

It should come as no surprise that the final version of this legislation is the product of compromise. Certainly, no one received everything they wanted. However, at the end of the day, everyone can walk away and say they got something. That holds true for broadcasters, satellite companies and, most importantly and to the greatest degree, consumers.

The single most important thing that this bill will do is "level the playing field" so that satellite companies can better compete with cable. It does so by changing the anomaly in the law that prohibits satellite companies from broadcasting local signals to local people, lowering the royalty rates paid by satellite companies and, among other things, removing the unconscionable 90 day waiting period that a consumer must endure before switching from cable to satellite service. We also grant a six month "grace period" for "local-into-local" retransmission consent agreements. I am not so sure that this is quite the "Holy Grail" for consumers that some believe it is; however, I doubt the sky is going to fall down for the networks either.

To ensure that all local stations are carried and to keep the playing field as level as possible, this legislation imposes full "must carry" obligations by 2002 upon satellite providers, just as current law does on cable. That is, if a satellite company carries one local station in a market, then it must carry all the local stations. Now, reasonable people can disagree about "must carry"—the Supreme Court upheld its constitutionality by a slim 5-4 vote—but it is only fair to apply it evenly to both cable and satellite companies.

This Conference Report also lays to rest many of the thorny disputes that have served only to hurt consumers.

Both the Senate and the House have agreed to "grandfather" those consumers in the Grade B service area who currently receive "distant network" signals. To be sure, some satellite companies have been bad actors in this debate and so have some subscribers. Nonetheless, short of deposing each and every consumer, it's best to put these problems behind us and start off on a clean slate. We expect that going forward the letter of the law will be adhered to and respected—heavy penalties await those who would do otherwise, and rightfully so.

The matter of "if and when" a consumer should receive a waiver from a local broadcaster currently resembles a Sherlock Holmes mystery. So we order the FCC to draft "consumer-friendly" regulations to govern the waiver process. Our bill tells local broadcasters that if they fail to act on waiver requests within 30 days, the request will be "deemed" approved. We trust the FCC will improve and simplify this process even further.

Just as importantly, we ask the FCC to take a hard look at whether the Grade B standard is sufficient to determine what a good picture is in today's world. The truth is that if there's a fairer standard out there, then we should apply it. Rest assured, the Congress will get the last bite at the apple by requiring the FCC to report back to Congress with its findings, rather than allowing the Commission to "self-execute" its new study.

Let me make one final point regarding one of the most difficult matters in Conference: retransmission consent. The original House language was predicated on the belief that there exists unequal bargaining positions between the broadcasters and the satellite companies. Our Senate bill took precisely the opposite approach. But our law comes out somewhere in the middle: it will prohibit exclusive deals, ensure that parties negotiate in "good faith" when making these agreements, and put some teeth into "good faith" by adding the "competitive marketplace considerations" language.

That said, there may be some disagreement as to what exactly this new provision means. At the very least, "competitive marketplace considerations" may simply be interpreted as the normal, everyday jostling that takes place in the business world. At the very most, a "competitive marketplace" would tolerate differences based upon legitimate cost justifications, but not anti-competitive practices such as illegal tying and bundling. The answer probably lies somewhere between these two interpretations and we trust the sometimes confused FCC, as we often do, to properly divine the real intent of a somewhat confused Congress.

Again, this isn't a perfect bill. Far from it. But we can't let the perfect be the enemy of the good. This measure

will allow satellite companies to compete more aggressively with cable; it will provide more choice for consumers; with luck, it may even discipline rising cable rates. So I urge my colleagues to support this bipartisan, fair, and comprehensive legislation that was the product of a great deal of hard work and negotiation. We owe consumers no less than that.

Mr. President, one final note: I ask unanimous consent to have printed in the RECORD the names of the Conference Committee staff to show my appreciation for their hard work. They are to be commended for putting in the long hours it took to get this bill done.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

SATELLITE HOME VIEWER IMPROVEMENT ACT
OF 1999 CONFERENCE STAFF

Shawn Bentley, Senate Judiciary Committee—Senator Hatch
Troy Dow, Senate Judiciary Committee—Senator Hatch
Pete Belvin, Senate Commerce Committee—Senator McCain
Mitch Rose, Senator Stevens
Paula Ford, Senate Commerce Committee—Senator Hollings

Doug Farry, Office of the Majority Leader
Tony Coe, Senate Legislative Counsel
Steven Cope, House Legislative Counsel

Mr. HATCH. Mr. President, the Appropriations conference report before us contains most of the text of the Conference Report accompanying H.R. 1554, a reform of the Satellite Home

Viewers Act. In addition to Satellite Home Viewers Improvement Act, this legislation contains two other major intellectual property bills, a major reform of the patent system and a bill to protect against the growing problem of "cybersquatting," whereby the valuable names of businesses and individuals are registered by others in bad faith to either trade on those names or damage their value. These three pieces of legislation are major reforms that help American consumers and American businesses. I will briefly discuss these reforms in turn.

As the Chairman of the Conference Committee and sponsor of the original Senate copyright legislation underlying the Satellite Home Viewer Improvements Act, I am delighted that the conferees have been able to put together a comprehensive package of consumer-friendly reforms for satellite viewers. The bill reflects an enormous effort on the part of members and their staffs on both sides of Congress from both parties, and represents a major advance in copyright and communications law.

The world of video communication has changed enormously since television began some 70 years ago in the small home workshop of inventor and Utah native Philo T. Farnsworth, who, together with his wife and colleagues, viewed the first television transmission: a single black line that rotated from vertical to horizontal. At the risk of offending those who may disagree, I think TV programming has greatly improved since the Farnsworths' rotating black line. Since that day in the Farnsworths' workshop, television viewers have benefited from steady advances in technology that have brought increased access to an ever more diversified range of programming choices. The television industry has progressed from one or two over-the-air broadcast stations, to a full range of broadcast networks delivering local and syndicated national programming, to cable television delivering both broadcast and made-for-cable programming. And in the past decade, satellite carriers, delivering to customers with both large and, increasingly, small dishes are emerging as new and potent competitors in the television delivery business.

The legislation before us today will—for the first time—allow satellite carriers to provide local subscribers with their local television signals. This means every television viewer in Utah can have access to Utah news, weather, sports, and other locally-relevant programming, as well as national network programming. Emerging technology now makes this possible, and our bill will make it legal. The bill also reduces the copyright fees that are passed along to subscribers. As a result, eligible viewers in parts of Utah unserved by over-the-air television will enjoy ac-

cess to network stations at lower prices.

Let me illustrate some of the benefits of this legislation for Utah and for Utahns. Similar benefits can accrue across the country if this legislation is fully utilized. Many areas of Utah are unserved by over-the-air television or even by cable systems. Satellite service has been the only television option for many Utahns. Up until the passage of this conference report, these Utahns were able to get network stations, but usually from cities outside of Utah, such as New York or Los Angeles. And, those Utahns who had satellite dishes but lived in areas which did receive local television over-the-air could not legally get any network television programming using their satellite dishes, but had to get them with an off-air antenna or by cable. Under the provisions of this conference report, every Utahn will be able to get local network programming, which includes both national network shows like "ER" and "The X-Files" and local news, weather, sports, and public affairs programming. And those people who live in the so-called "white areas" that are unserved by local television can get local programming from Salt Lake City, as well as keep their distant signals if they wish to. Making Utah information and entertainment available to all Utahns is a great benefit to us as a state, and helps bind us together as a community. And in 2002, the satellite carriers will be required to carry all the local television stations, just like cable. This means that viewers will have the same range of local programming as they have come to expect from cable, and that the viewers, rather than satellite carriers, will be able to choose which local stations to watch.

Making local television signals available to all Utahns, and citizens of similar communities across the country, is the most important reason for this legislation. But there are many other benefits to consumers: copyright rates for satellite signals are cut almost in half, and the local signals are free. The Federal Communications Commission will work to ensure that eligibility decisions for distant network signals are clearer and prompt. Some satellite subscribers have expressed frustration that they do not get prompt responses from local television stations to distant signal eligibility waiver requests, although the situation is better in Utah than in some other places. To remedy the problem, we included a provision that says if a subscriber asks a local station for a waiver to allow them to get distant network signals, this conference report requires a response in 30 days or the waiver is deemed approved. There was a provision in the previous law that required cable subscribers to wait 90 days after unhooking their cable before they could get satellite service. We removed

that waiting period so that Utahns who want to switch from cable can do so immediately.

We heard from the owners of recreational vehicles that they wanted to be able to put satellite dishes on their RV's when they go camping or traveling. In this bill, we allow RV owners who comply with certain documentation requirements to get satellite service. So Utahns do not need to leave their satellite service behind when they travel. The same rules would apply to long-haul truckers.

Recent lawsuits enforcing the distant signal eligibility rules under the copyright act have put many satellite subscribers in danger of losing their distant network signal service. Let me be clear that I do not condone or support what appears to have been law-breaking by the satellite carriers. But I am concerned about subscribers being caught in the middle, especially those who are not clearly served by over-the-air television from their local broadcasters. So, in this legislation, we protect the eligibility for satellite service received by current subscribers who do not get a city-grade or Grade A signal. In this way, we can protect those subscribers who may have been misled about their eligibility and who may be in an area that is not clearly served, so that they will not be out their investment. With regard to the signal intensity rules that make up the eligibility standard for distant signals, we have asked the FCC to give us their best judgment about how we should reform the law, so that we can have their best input before we consider any further major reforms on this issue.

I have talked about the benefits that will accrue to satellite subscribers if the satellite carriers take full advantage of these copyright license reforms. But the benefits are not just limited to satellite subscribers. There will be benefits to cable subscribers, too, that will come from a satellite industry equipped to compete with cable head on in the market. Satellite service consistently ranks high on consumer surveys for service satisfaction. It has a vast array of channels for viewers to choose from. As I mentioned earlier, the growth of the satellite television business has been phenomenal, even without the ability to deliver local television stations. Recent consumer surveys indicate that 85 percent of respondents said that the lack of local signals is the reason why consumers who considered buying satellite service decided not to. Imagine the growth in this industry now that they will be able to compete with cable with the offering of local programming. What does this all mean for cable subscribers? One of the reasons why many believe cable is rated low on customer satisfaction is that it usually does not have a real competitor. Many local cable systems know its customers have nowhere else

to go, so they do not exert themselves as much to please the customer as they might with a competitor. Armed with local signals, as well as the rest of the benefits satellite offers, there should be a new spark of competition in those areas where local satellite service is available. That will lead to lower prices, increased choices, and happy customers for both satellite and cable, and all television viewers.

Today we are also considering a patent reform package which contains the most significant reforms to our nation's patent code in half a century. This bill, which Senator LEAHY and I introduced as the "American Inventors Protection Act," is one of the most important high-tech reform measures to come before this body. It is widely supported by an overwhelming majority of members on both sides of the aisle, by the Administration, and by a broad coalition of industry, small businesses, and American inventors. Its consideration here today is imminently appropriate on the eve of a new millennium in which America's ability to compete and the strength of our economy will depend on the strength of the patent system and the protections it affords.

Intellectual property, and patents in particular, are among our nation's greatest assets. From semiconductor chip technology, to computer software, to biotechnology, to Internet and telecommunications technology, the United States remains the undisputed world-leader in technological innovation. In fact, according to *Newsweek Magazine*, the United States is home to seven of the world's top ten technology centers, which includes my own state of Utah. Moreover, American creative industries now surpass all other export sectors in foreign sales and exports. As the Internet, electronic commerce, and new innovative technologies increasingly drive the growth of our economy, the strength of our patent system and its ability to respond to the challenges of new technology and global competition will be more important than ever. This bill will enable our patent system to meet these challenges and to protect American inventors and American competitiveness into the next century.

As many of my colleagues know, this bill is a compromise bill that reflects years of discussion and extensive efforts to reach agreement on all sides. Since first introducing this bill as an omnibus measure in the 104th Congress, we have literally engaged in countless hours of discussions and adopted over 100 amendments to this bill in order to forge a consensus on a package of responsible patent reforms. The Senate made significant progress toward consensus in the last Congress when the Judiciary Committee reached several key compromises to strengthen the bill's protections for small businesses and independent inventors. I was pleased to see those efforts contin-

ued in the House this year, where the supporters and former opponents of the bill agreed to sit down and work through their differences in an effort to produce a constructive patent reform bill. As a result of these cooperative efforts in the House and Senate, the bill before us now enjoys overwhelming bipartisan, bicameral support, and it is now endorsed by the most vocal opponents of earlier reform measures.

This broad support is reflected in the several votes that have already occurred on this measure this year. The House has passed this bill three times this year, including by a 376-43 vote on the bill as stand alone measure in August and by a 411-8 vote on the bill as part of the conference report on the "Intellectual Property and Communications Omnibus Reform Act." The Senate Judiciary Committee also passed the bill by an 18-0 roll call vote earlier this month.

Having touched upon some of the compromises that have brought people together on this bill, let me take just a minute to highlight what this bill will do for American inventors.

1. The bill protects against fraudulent invention promoters which prey upon novice inventors.

2. It reduces patent fees for only the second time in history, saving American inventors an estimated \$30 million each year. The bill will also ensure that patent fees are not used to subsidize trademark operations and will require the PTO to study alternative fee structures to encourage maximum participation by small inventors.

3. It protects American companies and their workers from patent infringement suits as a result of recent policy changes that have allowed patents to begin to issue on internal business methods that were previously thought to be unpatentable and which have been used under trade secret protection.

4. It guarantees that every diligent inventor with a patentable invention will receive at least 17 years of patent protection (which is what they would have received pre-GATT); most will receive a great deal more.

5. It allows American inventors and innovators to see foreign technology at least 12 months earlier than today, while allowing American inventors to maintain protections of existing law that allow them to keep their inventions secret during patent pendency. It also gives American inventors new protections by given them provisional rights during the pendency of internationally published applications.

6. It creates a new optional administrative procedure in the Patent and Trademark Office to reduce litigation costs for patent owners and to allow members of the public to participate in testing the validity of patents, all while fully protecting patent holders against repetitive challenges.

7. It restructures the Patent and Trademark Office to eliminate red tape and provide greater oversight by the American inventing community, especially by small businesses and independent inventors.

8. It protects our national security by requiring the PTO to maintain a program with the Office of Personnel Management to identify national security positions at the PTO and by protecting strategic information from disclosure.

9. Finally, it restricts the ability of the PTO Commissioner to exchange U.S. patent data with certain foreign nations.

In short, this is one of the most important technology-related bills to come before Congress in recent memory. It has been years in the making and reflects the input of many, many people from all sides. The time to act on this package of reforms has clearly come, and I am pleased that the Senate is finally taking this measure up.

I am also pleased that the Senate will complete action on the "Anticybersquatting Consumer Protection Act" and send that legislation to the President. In short, this is another key high-tech bill that will curb the harmful practice of "cybersquatting"—a term used to refer to the deliberate and bad-faith registration of Internet domain names in violation of the rights of trademark owners. Cybersquatting is a very serious threat to consumers and the future growth of electronic commerce. For example, we heard testimony in the Judiciary Committee of consumer fraud being perpetrated by the registrant of the "attphonecard.com" and "attcallingcard.com" domain names, who set up Internet sites purporting to sell calling cards and soliciting personally identifying information, including credit card numbers. Sammy Sosa had his name cybersquatted and used for a website that implied his endorsement of the products being sold. There are countless other similar examples of so-called "dot-con" artists who prey on consumer confusion and trade on the goodwill of others.

The fact is that if consumers cannot rely on brand-names online as they do in the world of bricks and mortar store-fronts, few will be willing to engage in e-commerce. Those who do will bear substantial risks of being confused or even deceived. Few Internet users would buy a car, fill a prescription, or even shop for books online if you they cannot be sure who they are dealing with.

This legislation will go a long way to ensure this sort of online brand-name protection for consumers. At the same time, the bill carefully balances these interests of consumers and trademark owners with the interests of Internet users and others who would make fair or otherwise lawful uses of trademarked names in cyberspace.

As with trademark cybersquatting, cybersquatting of personal names poses similar threats to consumers and e-commerce in that it causes confusion as to the source or sponsorship of goods or services, including confusion as to the sponsorship or affiliation of websites bearing individuals' names. In addition, more and more people are being harmed by people who register other peoples names and hold them out for sale for huge sums or money or use them for various nefarious purposes. I am particularly troubled at the prospect of what someone might do with websites bearing the name of such people as Mother Teresa, which I understand are currently being offered for \$7 million by a cybersquatter.

For this reason, I was pleased that the House amendments to the Senate bill clarified that famous names that enjoy service mark status, such as celebrity actors and very likely Mother Teresa, are included. As I have said, however, this bill should not be just about protecting celebrities. I am thus pleased that the legislation in this conference report goes further to protect those whose names don't meet the relatively high threshold of a famous mark, but who are nonetheless targeted by cybersquatters. For example, ESPN has reported that a number of cybersquatters have targeted the names of high-school athletes in anticipation that they may some day become famous. Earlier versions of the House and Senate bills would not have protected these individuals, but this legislation will. Furthermore, this bill directs the Commerce Department to report to Congress on ways to better protect personal names against cybersquatting and to work in conjunction with the Internet Corporation for Assigned Names and Numbers (ICANN) to include personal name disputes in the ICANN dispute resolution policy.

This is a key measure to promote electronic commerce and to protect consumers and individuals online. While I recognize the global nature of the cybersquatting problem, I believe this legislation is an important start to a worldwide solution—as evidenced by the fact that the latest ICANN dispute resolution policy reflects a number of the policies embodied in the Senate bill. I appreciate Senator ABRAHAM's effort to move this bill through Congress, and I am pleased we will pass it today.

These are important intellectual property reforms that are helpful to American consumers and American businesses. They are the product of the hard work of many people. Mr. President, I would like to thank many people who have worked hard to get this conference report agreed to and passed. First, let me thank and personally congratulate each of my colleagues on the Conference Committee for their diligent work in achieving this goal, espe-

cially my distinguished Ranking Member and original co-sponsor Senator LEAHY, as well as Chairman MCCAIN, and Senators THURMOND, STEVENS, DEWINE, HOLLINGS, and KOHL, all of whom made important contributions. On the House side, I extend my gratitude and congratulations to Chairman HYDE and Chairman BLILEY and to Representatives COBLE, TAUZIN, GOODLATTE, OXLEY, DINGELL, CONYERS, MARKEY, BERMAN, and BOUCHER. Of course, this successful result is also the product of tireless efforts by our capable staffs, who have worked through many late nights and weekends, to make this successful resolution possible. Among the many Senate staff members who have made critical contributions are Manus Cooney, Shawn Bentley, and Troy Dow of my staff; Bruce Cohen, Ed Barron, Beryl Howell of Senator LEAHY's staff; and from the other Senate conferees, Mitch Rose, Pete Belvin, Maureen McLaughlin, Paula Ford, Al Mottur, Gary Malphrus, Jim Hippe, Pete Levitas, Jon Leibowitz, John Schwantes, and many others on the Senate side. Let me congratulate each of them on their work. Tony Coe of Senate Legislative Counsel and Bill Roberts of the Copyright Office both put in many long hours to provide technical assistance. I know I speak for all of the Senate conferees in expressing my gratitude to all these first-rate staff members, as well as to the fine staff on the House side. The leadership staff from both houses, particularly Jim Sartucci and Renee Bennett from Senator LOTT's staff and Doug Farry from Representative ARMEY's office were key liaisons in this process.

On patent reform, let me note my very sincere appreciation to the Ranking Member on the Judiciary Committee, Senator LEAHY, with whom I have worked for the better part of three Congresses to bring about these important reforms. His leadership on the Democratic side has been a key part to getting this bill done. I want to also recognize the extraordinary efforts of our House colleagues on this bill. Chairman COBLE, who is the bill's primary sponsor in the House, along with the Ranking Member on the Subcommittee on Courts and Intellectual Property, Congressman BERMAN, as well as Chairman HYDE and Ranking Member CONYERS, have all dedicated tremendous time and effort over the last four years to moving this legislation forward. Their able leadership is reflected in the support this bill received in the House. But I want to mention in particular Congressman ROHRBACHER and Congressman CAMPBELL who in years past had led the opposition in the House to this bill. It is because of their efforts to work cooperatively with the proponents of this legislation in the House to craft a package of truly responsible reforms on behalf of American inventors that we

have a bill before us today. I want to recognize them for their leadership, and for their good faith both in the House and in the Senate this year.

Finally, with respect to cybersquatting legislation, I want to again commend the Senator from Michigan, Senator ABRAHAM, for his sponsorship of this legislation, as well as the Ranking Member, Senator LEAHY, with whom I have again worked hand in hand to bring this bill to final passage.

All of these people and others were instrumental in the success of this legislation, but let me express an especially warm thanks to Senator LEAHY, with whom I have worked closely on these and so many other intellectual property matters, and to the Chairman of the Appropriations Committee, Senator STEVENS. We worked particularly closely in the satellite reform conference, and he played a unique and crucial role in the ultimate passage of this package of important intellectual property legislation. I thank him for his leadership and his steadfast support. And let me single out the efforts of Mitch Rose of Senator STEVENS' staff who worked along with my staff and Steve Cortese of Senator STEVENS' Appropriations Committee staff, under Senator STEVENS' leadership, to ensure that these important intellectual property matters were ultimately enacted into law despite the difficulties encountered in the process. They are superb public servants and they work for one of the finest members of this August body with whom I have had the pleasure of working. Finally, let me mention Bruce Cohen, Ed Barron, and Beryl Howell of Senator LEAHY's staff, who, along with Senator LEAHY, work with me and my staff with exceptional cooperation on intellectual property matters. We have had a particularly productive relationship on these important matters, and I look forward to continuing that relationship. On my own staff, I express my appreciation for the work of Shawn Bentley and Troy Dow, who have labored long and hard to successfully enact this legislation, and I thank their families for their support of their efforts on behalf of American innovators, creators, and consumers. Finally, let me thank my Chief Counsel, Manus Cooney, for overseeing all of this fine work, and putting in countless hours of strenuous effort to ensure its completion. He is a consummate leader, and I thank him for his stellar service.

I ask unanimous consent that the statements of Senators LEAHY, DEWINE, and KOHL, followed by a number of colloquies between myself and a number of different senators on diverse matters included in the satellite conference report, be included in the RECORD at this point as though read, together with supporting documents, and I yield the floor.

Mr. LEAHY. Mr. President, the Judiciary Committee is about to achieve an

end-of-the-session high technology sweep that comes on the heels of landmark Internet and intellectual property reforms that our committee achieved in the 105th Congress.

Others are observing that this is the most productive and forward-looking two years of achievement in updating intellectual property laws of this or any previous era. I believe they are right.

We may never have another such set of opportunities where we are able to provide so many benefits to consumers, innovators and to the high technology innovators in the business community in such a short span of time.

In one fell swoop we are providing consumers with local-into-local television, protecting patent terms, spurring innovation and enhancing electronic commerce and protecting trademarks.

One of the challenges we face at this early stage of the Information Age is to bring the order of intellectual property law to the Wild West of the Internet and to other burgeoning information technologies. That challenge is at the heart of these three bills.

I want to make just a couple points about each of them. The patent bill is long overdue. It will put American innovations on a more equal footing with European and Japanese inventors. It also helps protect inventors against invention promotion scams and against needless PTO delay in approving patents.

The anti-cybersquatting bill protects merchants who want to be able to control where their names and brands are being displayed and protect them from abuse. More than 200 years ago Ben Franklin said that a person's honor and good name is like fine china—easily broken but impossible to mend. This is still the case today and the bill protects the rights of trademark holders against malicious abuse. It arms online merchants and consumers with new tools to derail these "squatters" who try to create bad waves for honest cybersurfers.

And then there is the satellite bill, which is a charter for a new era of television service competition that will benefit consumers in several tangible ways. It sets the stage for the first real head-to-head competition between cable and satellite TV that will be a brand new experience for hundreds of communities.

It will contribute a new unifying influence and greater sense of community in states like Vermont, where citizens in most of the state for the first time will have access to all Vermont stations. It will avert further waves of programming cutoffs to satellite TV customers, including what would have been the largest cutoff of all, in December.

The satellite bill will, over time, mean that some families will be able to

get local network television for the first time ever. I believe that making local television signals available throughout much of a state will be a unifying force and enhance public participation in state and community issues. It will remove the artificial isolation caused by mountain ridges or distance from broadcast towers. It will also prevent these infuriating and seemingly mindless cutoffs and promote direct head-to-head competition with cable.

We have had some major bumps in the road in getting here with these three bills.

I want to mention the rural satellite TV provisions. I know that we had preliminary discussions about this six months ago and that Department of Agriculture attorneys and program experts met with our staffs to go over the details months ago.

I proposed that USDA handle this loan guarantee program because they have 50 years of experience with financing rural telephone and rural electric cooperatives. Vast areas of this nation were able to get electric and telephone service solely because of these programs.

It is hard to believe in this day and age, but thousands of Americans still remember when these USDA loan programs gave them electricity for the first time.

I am disappointed that the final bill does not include this provision that we worked on—but I am pleased that the Senate leaders have worked out an arrangement with us so that this matter will be resolved early next year.

Without this loan guarantee program I am convinced that rural areas—75 percent of the U.S. landmass—might not receive local-into-local satellite TV until 10 or 20 years after urban areas do.

Another major hurdle concerned a request by AOL and YAHOO for changes to the bill. This concerned whether or not they should receive a compulsory license to show regular TV programming over the Internet. Chairman HATCH and I resolved this by agreeing to have hearings on this important matter of convergence of technology and the protection of copyrighted material—converging TV, data, telephone, messages and other transmissions through broadband technologies while protecting ownership rights to copyrighted material.

A third bump in the road was over the GAO study Senator HATCH and I proposed of current practices regarding the patent protection for business methods resulting from the State Street case. In the end, we took out that language but agreed that we would ask the GAO to look into this for us. This issue will test the limits of what is proper subject matter to be patented and what is not. I can easily see Senator HATCH and I having more than one hearing on this issue.

So here we are in the death throes of this session of Congress. It is satisfying to know that some of the farthest-reaching achievements of this session are the products of the work of the Judiciary Committee, and of my partnership with Chairman HATCH.

I am delighted that as Conferees on the satellite bill that we have been able to put this complex and important legislation, which originated with the Hatch-Leahy Satellite Home Viewers Improvements Act in the Senate, into final form.

We worked closely with a number of Senators and members of the other body on this important legislation. Any time that you work with four Committees in a Conference there are a lot of members and staff who do very creative and important work late into the night, night after night after night.

I want to single out just a few staff even though I know I am leaving out many who deserve equal praise. Shawn Bentley with Chairman HATCH displayed enormous poise and breath of knowledge regarding satellite TV issues. He balanced, as did his Chairman, a variety of complex issues very carefully and very well.

Troy Dow similarly was extremely helpful regarding patent and cybersquatting issues and deserves a great deal of credit.

I want to also thank Ed Barron of my staff regarding the satellite TV and patent bills and Beryl Howell on cybersquatting. They both worked very diligently on these and other issues and did a great job.

Subcommittee Chairman DEWINE and ranking Member KOHL were also Conferees, along with Senator THURMOND, and played a major role regarding satellite TV issues.

This bill will provide viewers with more choices and will greatly increase competition in the delivery of television programming, while ensuring minimal interference with the free market copyright system that serves our country so well.

For years I have raised concerns about the lack of competition with cable TV and escalating cable rates. This bill will allow satellite TV providers to compete directly with cable in offering local stations and will give consumers a wider range of choice. It also protects local TV affiliates while postponing certain cutoffs of satellite TV service.

Most promisingly, the bill will permit local TV signals, as opposed to distant out-of-state network signals, to be offered to viewers via satellite. Vermont is a state in which satellite dishes play a very important role, and I know that Vermont viewers eagerly await the day when their local stations will be available by satellite.

It is absurd for home dish owners—whether they live in Vermont, Utah, or California—to have to watch network

stations imported from distant states instead of local stations. They should have a choice. I expect the satellite industry to do everything in its power to extend local-to-local coverage beyond the biggest cities and into important smaller markets such as those in Vermont, and the satellite industry should not expect further Congressional largesse if it fails to do so.

One satellite company called Capitol Broadcasting has already committed to serve Vermont once its spot beam technology satellites have been launched and other technological requirements have been put in place. I am counting on that happening over the next two or three years.

I was very pleased to have met with the moving force behind Capitol Broadcasting—Jim Goodmon. This company was formed by his grandfather, A. J. Fletcher, in 1937. Under Jim Goodmon's management, Capitol Broadcasting has expanded into satellite communications, the Internet and high definition television. In April, Jim received the Digital Television Pioneer Award from Broadcasting and Cable magazine. One of their stations, CBC, was the first broadcaster to transmit a high definition television digital signal. I look forward to helping inaugurate their local-into-local service into Vermont.

I expect that others will compete in Vermont. I understand the EchoStar, under its CEO, Charlie Ergen, and DirecTV, are also looking at providing service to Vermont.

Providing local TV stations to Vermont dish owners will lead to head-to-head competition between cable and satellite TV providers which should lead to more services for Vermonters at lower prices. Also, the bill will allow households who want to subscribe to this new satellite TV service to receive all local Vermont TV stations over the satellite.

The goal is to offer Vermonters with more choices, more TV selections, but at lower rates. In areas of the country where there is this full competition with cable providers, rates to customers are considerably lower.

Over time this initiative will permit satellite TV providers to offer a full selection of all local TV channels to viewers throughout most of Vermont, as well as the typical complement of superstations, weather and sports channels, PBS, movies and a variety of other channels.

This means that local Vermont TV stations will be available over satellite to many areas of Vermont currently unserved by satellite or by cable.

I have gotten lots of letters from Vermonters who complained about the current situation where local TV stations challenged their right to receive that signal.

Under current law, it is illegal for satellite TV providers to offer local TV channels over a satellite dish when you

live in an area where you are likely to get a clear TV signal with a regular rooftop antenna at least half of the time.

This means that thousands of Vermonters living in or near Burlington cannot receive local signals over their satellite dishes.

Under current law, those families must get their local TV signals over an antenna which often does not provide a clear picture. This bill will remove that legal limitation and allow satellite carriers to offer local TV signals to viewers no matter where they live in Vermont.

Presently, Vermonters receive satellite signals with programming from stations in other states—in other words they would get a CBS station from another state but not WCAX, the Burlington CBS affiliate.

By allowing satellite providers to offer a larger variety of programming, including local stations, the satellite industry would be able to compete with cable, and the cable industry will be competing with satellite carriers. Cable will continue to be a very effective competitor with its ability to offer extremely high-speed Internet connections to homes and businesses.

As mentioned earlier, the second major improvement in this initiative is that satellite carriers that offer local Vermont channels in their mix of programming will be able to reach Vermonters throughout Vermont. The system will be based on regions called Designated Market Areas, or DMAs. Vermont has one large DMA covering most of the state and part of the Adirondacks in New York—the Burlington-Plattsburg DMA—and parts of two smaller ones in Bennington County (the Albany-Schenectady-Troy DMA) and in Windham county (the Boston DMA).

This new satellite system is not available yet, and may not be available in Vermont until two to three years from now. Companies such as Capitol Broadcasting are preparing to launch spot-beam satellites to take advantage of this bill. Using current technology, signals would be provided by spot-beam satellites using regional uplink sites throughout the nation to beam local signals up to one or two satellites. Those satellites could use 60 spot beams to send those local signals, received from the regional uplinks, back to satellite dish owners. High definition TV would be offered under this system at a later date.

Under this bill, Vermonters will have more choices. I want to point out that those who want to keep their current satellite service can do just that.

In addition, we have protected the C-Band dish owners who have invested a lot of money in this now out-dated, but still used, technology. I did not think it was fair to pull the plug on them.

Those who want to stick with cable, or with regular broadcast TV, are wel-

come to continue to participate that way.

Since technology advances so quickly, other systems could be developed before this bill is fully implemented that would provide similar service but using a different technology.

The bill will also extend the distant signal compulsory license in Section 119. In almost all respects, the distant signal license will apply in the same way in the future as it applies today. The most important exception is that the bill will allow continued delivery of distant network stations to thousands of Vermonters and residents of other states who would otherwise have distant network satellite service terminated at the end of the year (or who have had such service terminated by court order since July 1998).

The purpose of this temporary "grandfathering" is not to reward satellite carriers that have broken the law. Rather, the purpose of the grandfathering is to assist certain subscribers in Vermont and elsewhere who might have been misled by satellite companies into believing that they were eligible to receive distant network programming by satellite. The purpose is also to aid in achieving a smooth transition to local-into-local programming which avoids many of these issues.

The subscribers who will be grandfathered are those who are not predicted to receive a signal of Grade A intensity from any station affiliated with the relevant network, along with certain additional C-band subscribers.

I want to make clear that I do not condone lawbreaking by satellite companies or anyone else, and nothing that Congress is doing today should be read in that light. Satellite companies remain liable for every other remedy provided by the Copyright Act or other law for any infringements they have committed. Satellite carriers should not be heard to argue for any grandfathering beyond what Congress has expressly approved, or to contend that they should be relieved of any other available remedy because of Congress' actions.

The second change to Section 119 is that there will no longer be a 90-day waiting period for cable subscribers that is currently part of the definition of "unserved household." This change will help to make the satellite industry more competitive with cable, an objective I know every member of this body shares. Third, the bill will limit to two the number of distant signals that a satellite carrier may deliver to unserved households.

Except with respect to these specific changes in Section 119, nothing in the law we are passing today will take away any of the rights and remedies available to the parties to copyright infringement litigation against satellite carriers. Nor does anything in

this bill suggest any criticism of the courts for enforcing the Copyright Act. It is their job to apply the law to the facts.

It is crucial to our system that all players in the marketplace, including satellite carriers, be required to obey the law and held accountable in the courts for the consequences of their own lawbreaking. Indeed, if a particular satellite carrier has engaged in a willful or repeated pattern or practice of infringements, it should be held to the statutory consequences of that misconduct.

The addition of the word "stationary" to the phrase "conventional outdoor rooftop receiving antenna" in Section 119(d)(10) of the Copyright Act merits a word of discussion. As the Ranking Member of the Senate Judiciary Committee, which has jurisdiction over copyright matters, and one of the original sponsors of this legislation, I want to emphasize that use of this word should not be misunderstood.

The new language says only that the antenna is to be "stationary"; it does not say that the antenna is to be improperly oriented, that is pointed in way that does not obtain the strongest signal. The word "stationary" means, for example, that testing should be done using a stationary antenna, as the FCC has directed.

Satellite companies must not be encouraged to urge consumers to point antennas in the wrong direction to qualify for different treatment.

As to antenna orientation, the relevant guidance is provided in Section 119(a)(2)(B)(ii)(II) of the bill, which specifies that the FCC's procedures (requiring correct orientation) be followed. Since satellite dishes must be properly oriented to receive a picture at all, it would make no sense to specify misorientation of over-the-air antennas.

Permitting misorientation would also be inconsistent with the entire structure of the definition of "unserved household," which looks to whether a household is capable of receiving a signal of Grade B intensity from a particular type of affiliate, that is an ABC station or a Fox station, not whether it is capable of receiving all of the stations in the market.

As I mentioned before, the Copyright Act amendments direct courts to continue to use the accurate, consumer-friendly prediction and measurement tools developed by the FCC for determining whether particular households are served or unserved. If the Commission is able to refine its so-called "ILLR" predictive model to make it even more accurate—as I hope it will—the courts should apply those further refinements as well.

In fact, the Copyright Act amendments in the bill specifically address the possibility that the FCC may be able to modify its ILLR model to make

it even more accurate. Specifically, the Act provides in new Section 119(a)(2)(B)(ii)(I) of the Copyright Act that if the FCC should later modify the ILLR model to make it still more accurate, courts should, under Section 119(a)(2)(B)(ii)(I), use the even more accurate version in the future for predictive purposes.

Whether a proposed modification to the ILLR model makes it more accurate is an empirical question that the Commission should address by comparing the predictions made by any proposed model against actual measurements of signal intensity. The Commission's analysis should reflect our policy objective: to determine whether a household is—or is not—capable of receiving a signal of Grade B intensity from at least one station affiliated with the relevant network.

The FCC has properly recognized that reducing one type of errors, underprediction, while increasing another type of errors, overprediction, does not increase accuracy, but simply puts a thumb on the scale in favor of one side or the other. The issue under Section 119(a)(2)(B)(ii) is the overall accuracy of the model, as tested against available measurement data, with regard to whether a household is, or is not, capable of receiving a Grade B intensity signal from at least one affiliate of the network in question.

The conferees and many other members of this body have worked hard to achieve the carefully balanced bill now before the Senate. I urge my colleagues to give it their full support. Most of all, I thank and congratulate my distinguished colleague and good friend, Chairman HATCH, for his outstanding work over many months on this important bill, which will provide lasting benefits for my constituents in Vermont and for citizens in every other state.

I'm also pleased that the Conference Report directs the Federal Communications Commission to take expedited action on getting new technologies deployed that can deliver local television signals to viewers in smaller television markets. We've known all along, if we pass legislation authorizing local-into-local, the DBS carriers would readily deliver local channels to those subscribers who are fortunate enough to live in the largest markets. There are 210 local television Designated Market Areas in our country, and most Vermonters live in the 91st-ranked DMA. That is why it is so important for the FCC to expedite review of alternative technologies, such as the digital terrestrial wireless system developed by Northpoint Technology, which are capable of delivering local signals into all markets on a must carry basis.

I want to briefly mention the patent bill.

This patent bill is important to America's future. I have heard from in-

ventors, from businesses large and small, from hi-tech to low-tech firms—this bill will give American inventors and businesses an improved competitive edge now enjoyed by many European countries.

We should be on a level playing field with them.

This bill reduces patent fees for only the second time in history. The first time that was done was in a Hatch-Leahy bill passed by the Senate in the 105th Congress.

All the concepts in this bill—such as patent term guarantees, domestic publication of patent applications filed abroad, first inventor defense—have been thoroughly examined. Indeed, they have been included in several bills that the Congress has carefully studied.

I wish to point out that the Senate Judiciary Committee last year also developed a strong bill—S. 507—which contained many of the same concepts and approaches found in H.R. 1907 and S. 1798.

American business needs this patent bill, American technology companies need this patent bill, American inventors and innovators need this patent bill.

The Administration says that we must have the reforms in this bill. It will: reduce legal fees that are paid by inventors and companies; eliminate duplication of research efforts and accelerate research into new areas; increase the value of patents to inventors and companies; and facilitate U.S. inventors and companies' research, development, and commercialization of inventions.

In Vermont, we have a number of independent inventors and small companies. It is, therefore, especially important to me that this bill be one that helps them as well as the larger companies in Vermont like IBM.

Over the past several years, Congress has held eight Congressional hearings with over 80 witnesses testifying about the various proposals incorporated in the bill. Republican and Democratic Administrations alike, reaching back to the Johnson Administration, have supported these similar reforms.

I also want to thank Secretary Daley and the Administration for their unflinching support of effective patent reform.

The "American Inventors Protection Act" was designed to make targeted improvements to the patent code in order to enable the American patent system to meet the challenges of new technology and new markets as we approach the next millennium.

The bill builds upon compromises forged in the Senate Judiciary Committee in the 105th Congress, as well as additional compromises in the House of Representatives in the 106th Congress, to achieve these goals while protecting and promoting the interest of American inventors at home and abroad.

I also want to discuss the comments of Senators SCHUMER and TORRICELLI regarding the patent bill and the State Street decision. I look forward to working with both of those Senators on the issues they raise. I expect that the Committee will have hearings on this matter next year. Also, the Conference Report on the bill contains a detailed analysis of these important issues which was accepted by all Conferees.

The FY 2000 Omnibus Appropriations bill also includes provisions that Senator HATCH and I and others have crafted to address cybersquatting on domain names. We have worked hard to craft this legislation in a balanced fashion to protect trademark owners and consumers doing business online, and Internet users who want to participate in what the Supreme Court has described as "a unique and wholly new medium of worldwide human communication." *Reno v. ACLU*, 521 U.S. 844.

Trademarks are important tools of commerce. The exclusive right to the use of a unique mark helps companies compete in the marketplace by distinguishing their goods and services from those of their competitors, and helps consumers identify the source of a product by linking it with a particular company. The use of trademarks by companies, and reliance on trademarks by consumers, will only become more important as the global marketplace grows larger and more accessible with electronic commerce. The reason is simple: when a trademarked name is used as a company's address in cyberspace, customers know where to go online to conduct business with that company.

The growth of electronic commerce is having a positive effect on the economies of small rural states like mine. A Vermont Internet Commerce report I commissioned earlier this year found that Vermont gained more than 1,000 new jobs as a result of Internet commerce, with the potential that Vermont could add more than 24,000 jobs over the next two years. For a small state like ours, this is very good news.

Along with the good news, this report identified a number of obstacles that stand in the way of Vermont reaching the full potential promised by Internet commerce. One obstacle is that "merchants are anxious about not being able to control where their names and brands are being displayed." Another is the need to bolster consumers' confidence in online shopping.

Cybersquatters hurt electronic commerce. Both merchant and consumer confidence in conducting business online are undermined by so-called "cybersquatters" or "cyberpirates," who abuse the rights of trademark holders by purposely and maliciously registering as a domain name the trademarked name of another company to divert and confuse customers or to

deny the company the ability to establish an easy-to-find online location. A recent report by the World Intellectual Property Organization (WIPO) on the Internet domain name process has characterized cybersquatting as "predatory and parasitical practices by a minority of domain registrants acting in bad faith" to register famous or well-known marks of others—which can lead to consumer confusion or downright fraud.

Enforcing trademarks in cyberspace will promote global electronic commerce. Enforcing trademark law in cyberspace can help bring consumer confidence to this new frontier. That is why I have long been concerned with protecting registered trademarks online. Indeed, when the Congress passed the Federal Trademark Dilution Act of 1995, I noted that:

Although no one else has yet considered this application, it is my hope that this antidilution statute can help stem the use of deceptive Internet addresses taken by those who are choosing marks that are associated with the products and reputations of others.

The Federal Trademark Dilution Act of 1995 has been used as I predicted to help stop misleading uses of trademarks as domain names. One court has described this exercise by saying that "attempting to apply established trademark law in the fast-developing world of the Internet is somewhat like trying to board a moving bus . . ." *Bensusan Restaurant Corp. v. King*, 126 F.3d 25. Nevertheless, the courts appear to be handling "cybersquatting" cases well. As University of Miami Law Professor Michael Froomkin noted in testimony submitted at the Judiciary Committee's hearing on this issue on July 22, 1999, "in every case involving a person who registered large numbers of domains for resale, the cybersquatter has lost."

For example, courts have had little trouble dealing with a notorious cybersquatter, Dennis Toeppen from Illinois, who registered more than 100 trademarks—including "yankeestadium.com," "deltaairlines.com," and "neiman-marcus.com"—as domain names for the purpose of eventually selling the names back to the companies owning the trademarks. The various courts reviewing his activities have unanimously determined that he violated the Federal Trademark Dilution Act.

Similarly, Wayne State University Law Professor Jessica Litman noted in testimony submitted at the Judiciary Committee's hearing that those businesses that "have registered domain names that are confusingly similar to trademarks or personal names in order to use them for pornographic web sites . . . have without exception lost suits brought against them."

Even as we consider this legislation, we must acknowledge that enforcing or even modifying our trademark laws

will be only part of the solution to cybersquatting. Up to now, people have been able to register any number of domain names in the popular ".com" domain with no money down and no money due for 60 days. Network Solutions Inc., the dominant Internet registrar, recently announced that it was changing this policy, and requiring payment of the registration fee up front. In doing so, NSI admitted that it was making this change to curb cybersquatting.

In addition, we need to encourage the development of alternative dispute resolution procedures that can provide a forum for global users of the Internet to resolve domain name disputes. For this reason, I authored an amendment that was enacted last year as part of the Next Generation Internet Research Act authorizing the National Research Council of the National Academy of Sciences to study the effects on trademark holders of adding new top-level domain names and requesting recommendations on inexpensive and expeditious procedures for resolving trademark disputes over the assignment of domain names. Both the Internet Corporation for Assigned Names and Numbers and WIPO are also making recommendations on these procedures. Adoption of a uniform trademark domain name dispute resolution policy should be of enormous benefit to American trademark owners.

We should encourage the sensible development of case law in this area, the ongoing efforts within WIPO and ICANN to build a consensus global mechanism for resolving online trademark disputes, and the implementation of domain name registration practices designed to discourage cybersquatting. The legislation we pass today as part of the Omnibus Appropriations bill for the upcoming fiscal year is intended to build upon this progress and provide constructive guidance to trademark holders, domain name registrars and registries and Internet users registering domain names alike.

This legislation has been significantly improved since it was first introduced. As originally introduced by Senator ABRAHAM and others, S. 1255, the "Trademark Cyberpiracy Prevention Act", proposed to make it illegal to register or use any "Internet domain name or identifier of an online location" that could be confused with the trademark of another person or cause dilution of a "famous trademark." Violations were punishable by both civil and criminal penalties.

I voiced concerns at a hearing before the Judiciary Committee that, in its original form, S. 1255 would have a number of unintended consequences that would have hurt rather than promoted electronic commerce, including the following specific problems:

The definition was overbroad. As introduced, S. 1255 covered the use or

registration of any "identifier," which could cover not just second level domain names, but also e-mail addresses, screen names used in chat rooms, and even files accessible and readable on the Internet. As one witness pointed out, "the definitions will make every fan a criminal." How? A file document about Batman, for example, that uses the trademark "Batman" in its name, which also identifies its online location, could land the writer in court under that bill. Cybersquatting is not about file names.

The original bill threatened hypertext linking. The Web operates on hypertext linking, to facilitate jumping from one site to another. The original bill could have disrupted this practice by imposing liability on operators of sites with links to other sites with trademark names in the address. One could imagine a trademark owner not wanting to be associated with or linked with certain sites, and threatening suit under this proposal unless the link were eliminated or payments were made for allowing the linking.

The original bill would have criminalized dissent and protest sites. A number of Web sites collect complaints about trademarked products or services, and use the trademarked names to identify themselves. For example, there are protest sites named "boycott-cbs.com" and "www.PepsiBloodbath.com." While the speech contained on those sites is clearly constitutionally protected, as originally introduced, S. 1255 would have criminalized the use of the trademarked name to reach the site and made them difficult to search for and find online.

The original bill would have stifled legitimate warehousing of domain names. The bill, as introduced, would have changed current law and made liable persons who merely register domain names similar to other trademarked names, whether or not they actually set up a site and used the name. The courts have recognized that companies may have legitimate reasons for registering domain names without using them and have declined to find trademark violations for mere registration of a trademarked name. For example, a company planning to acquire another company might register a domain name containing the target company's name in anticipation of the deal. The original bill would have made that company liable for trademark infringement.

For these and other reasons, Professor Litman concluded that, "as introduced, S. 1255 would in many ways be bad for electronic commerce, by making it hazardous to do business on the Internet without first retaining trademark counsel." Faced with the risk of criminal penalties, she stated that "many start-up businesses may choose to abandon their goodwill and

move to another Internet location, or even to fold, rather than risk liability."

Domain name cybersquatting is a real problem. For example, whitehouse.com has probably gotten more traffic from people trying to find copies of the President's speeches than those interested in adult material.

While the problem is clear, narrowly defining the solution is trickier. The mere presence of a trademark is not enough. Legitimate conflicts may arise between companies offering different services or products under the same trademarked name, such as Juno Lighting Inc. and Juno online services over the juno.com domain name, or between companies and individuals who register a name or nickname as a domain name, such as the young boy nicknamed "Pokey" whose domain name "pokey.org" was challenged by the toy manufacturer who owns the rights to the Gumby and Pokey toys. A site may also use a trademarked name to protest a group, company or issue, such as pepsibloodbath.com, or even to defend one's reputation, such as www.civil-action.com, which belongs not to a motion picture studio, but to W.R. Grace to rebut the unflattering portrait of the company as a polluter and child poisoner created by the movie.

There is a world of difference between these sorts of sites and those which use deceptive naming practices to draw attention to their site for example, whitehouse.com, or those who use domain names to misrepresent the goods or services they offer, for instance, dellmemory.com, which may be confused with the Dell computer company.

We must also recognize certain technological realities. For example, merely mentioning a trademark is not a problem. Posting a speech that mentions AOL on my web page and calling the page aol.html, confuses no one between my page and America Online's site. Likewise, we must recognize that while the Web is a key part of the Internet, it is not the only part. We simply do not want to pass legislation that may impose liability on Internet users with e-mail addresses, which may contain a trademarked name. Nor do we want to crack down on newsgroups that use trademarks descriptively, such as alt.comics.batman.

In short, it is important that we distinguish between the legitimate and illegitimate use of domain names, and the cybersquatting legislation that we pass today does just that.

Due to the significant flaws in S. 1255, the Senate Judiciary Committee reported and the Senate passed a complete substitute to that bill. On July 29, 1999, Senator HATCH and I, along with several other Senators, introduced S. 1461, the "Domain Name Piracy Prevention Act of 1999." This bill

then provided the text of the Hatch-Leahy substitute amendment that the Senate Judiciary Committee reported unanimously to S. 1255 the same day. This substitute amendment, with three additional refinements contained in a Hatch-Leahy clarifying amendment, was passed by the Senate on August 5, 1999.

This Hatch-Leahy substitute provided a better solution than the original, S. 1255, in addressing the cybersquatting problem without jeopardizing other important online rights and interests.

Following Senate passage of the bill, the House passed a version of the legislation, H.R. 3208, the "Trademark Cyberprivacy Prevention Act", which has been modified for inclusion in the FY 2000 Omnibus Appropriations bill.

This legislation, now called the "Anti-Cybersquatting Consumer Protection Act", would amend section 43 of the Trademark Act by adding a new section to make liable for actual or statutory damages any domain name registrant, who with bad-faith intent to profit from the goodwill of another's trademark, without regard to the goods or services of the parties, registers, traffics in or uses a domain name that is identical or confusingly similar to a distinctive trademark or dilutive of a famous trademark. The fact that the domain name registrant did not compete with the trademark owner would not be a bar to recovery. This legislation also makes clear that personal names that are protected as marks would also be covered by new section 1125.

Furthermore, this legislation should not in any way frustrate the global efforts already underway to develop inexpensive and expeditious procedures for resolving domain name disputes that avoid costly and time-consuming litigation in the court systems either here or abroad. In fact, the legislation expressly provides liability limitations for domain name registrars, registries or other domain name registration authorities when they take actions pursuant to a reasonable policy prohibiting the registration of domain names that are identical or confusingly similar to another's trademark or dilutive of a famous trademark. The ICANN and WIPO consideration of these issues will inform the development by domain name registrars and registries of such reasonable policies.

Uses of infringing domain names that support liability under the legislation are expressly limited to uses by the domain name registrant or the registrant's authorized licensee. This limitation makes clear that "uses" of domain names by persons other than the domain name registrant for purposes such as hypertext linking, directory publishing, or for search engines, are not covered by the prohibition.

Other significant sections of this legislation are discussed below:

Domain names are narrowly defined to mean alphanumeric designations registered with or assigned by domain name registrars or registries, or other domain name registration authority as part of an electronic address on the Internet. Since registrars only register second level domain names, this definition effectively excludes file names, screen names, and e-mail addresses and, under current registration practice, applies only to second level domain names.

The terms "domain name registrar, domain name registry, or other domain name authority that registered or assigned the domain name" in Section 3002(a) of the Act, amending 15 U.S.C. 1125(d)(2)(a), is intended to refer only to those entities that actually place the name in a registry, or that operate the registry, and would not extend to other entities, such as the ICANN or any of its constituent units, that have some oversight or contractual relationship with such registrars and registries. Only these entities that actually offer the challenged name, placed it in a registry, or operate the relevant registry are intended to be covered by those terms.

Liability for registering a trademark name as a domain name requires "bad faith intent to profit from that mark". The following non-exclusive list of nine factors are enumerated for courts to consider in determining whether such bad faith intent to profit is proven:

(i) the trademark or the intellectual property rights of the domain name registrant in the domain name;

(ii) whether the domain name is the legal name or the nickname of the registrant;

(iii) the prior use by the registrant of the domain name in connection with the bona fide offering of any goods or services;

(iv) the registrant's legitimate non-commercial or fair use of the mark at the site accessible under the domain name;

(v) the registrant's intent to divert consumers from the mark owner's on-line location in a manner that could harm the mark's goodwill, either for commercial gain or with the intent to tarnish or disparage the mark, by creating a likelihood of confusion as to the source, sponsorship, affiliation or endorsement of the site;

(vi) the registrant's offer to sell the domain name for financial gain without having used, or having an intent to use, the domain name in the bona fide offering of goods or services or the registrant's prior conduct indicating a pattern of such conduct;

(vii) the registrant's intentional provision of material, false and misleading contact information when applying for the registration of the domain name, intentions, failure to maintain accurate information, or prior conduct indicating a pattern of such conduct;

(viii) the registrant's registration of multiple domain names that are identical or similar to or dilutive of another's trademark; and

(ix) the extent to which the mark is or is not distinctive.

Significantly, the legislation expressly states that bad faith shall not be found "in any case in which the court determines that the person believed and had reasonable grounds to believe that the case of the domain name was a false use or otherwise lawful." In other words, good faith, innocent or negligent uses of a domain name that is identical or confusingly similar to another's mark or dilutive of a famous mark are not covered by the legislation's prohibition.

In short, registering a domain name while unaware that the name is another's trademark would not be actionable. Nor would the use of a domain name that contains a trademark for purposes of protest, complaint, parody or commentary satisfy the requisite scienter requirement.

Bad-faith intent to profit is required for a violation to occur. This requirement of bad-faith intent to profit is critical since, as Professor Litman pointed out in her testimony, our trademark laws permit multiple businesses to register the same trademark for different classes of products. Thus, she explains:

Although courts have been quick to impose liability for bad faith registration, they have been far more cautious in disputes involving a domain name registrant who has a legitimate claim to use a domain name and registered it in good faith. In a number of cases, courts have refused to impose liability where there is no significant likelihood that anyone will be misled, even if there is a significant possibility of trademark dilution.

In civil actions against cybersquatters, the plaintiff is authorized to recover actual damages and profits, or may elect before final judgment to an award of statutory damages of not less than \$1,000 and not more than \$100,000 per domain name, as the court considers just. In addition, the court is authorized to forfeit, cancel, or transfer the domain name to the plaintiff. To reduce frivolous litigation and the risk of reverse domain name hijacking, the court is authorized to award courts and attorneys' fees to the prevailing party.

In Rem Actions. The bill would also permit an in rem civil action to be filed by a trademark owner in the judicial district in which the registrar, registry or other domain name authority that actually registered or assigned the domain name is located. Such an action may be filed only in circumstances where the domain name violates the owner's rights in the trademark and where the court finds that (1) the trademark owner was not able to obtain in personam jurisdiction over the domain name registrant; or (2) the owner through due diligence was not able to find the domain name hold-

er to bring an in personam civil action by sending notice to the registrant at the postal and email address provided to the registrar and publishing notice as the court may direct promptly after filing the action.

The remedies of an in rem action are limited to a court order for forfeiture or cancellation of the domain name or the transfer of the domain name to the trademark owner. To protect the domain name registrant, the registrar or registry shall not transfer, suspend, or modify the domain name during the pendency of the action except as the court may order. By contrast to the House-passed version of this legislation, under the legislation passed today, a trademark holder would be permitted to file an in rem action only when in personam jurisdiction cannot be exercised.

In *Porsche Cars North American Inc. v. Porsche.com*, 51 F. Supp. 2d 707, the court dismissed an in rem action against a domain name, even though Network Solutions Inc. had surrendered the underlying domain name registration documents to the court to give it control over the "res." The court held that in rem actions against allegedly diluting marks are not constitutionally permitted without regard to whether in personam jurisdiction may be exercised. The court explained:

Porsche correctly observes that some of the domain names at issue have registrants whose identities and addresses are unknown and against whom in personam proceedings might be fruitless. But most of the domain names in this case have registrants whose identities and addresses are known, and who rightly would object to having their interests adjudicated in absentia. The Due Process Clause requires at least some appreciation for the difference between these two groups, and Porsche's pursuit of an in rem remedy that fails to differentiate between them at all is fatal to its Complaint.

This legislation does differentiate between those two different categories of domain name registrants and limits in rem actions to those circumstances where in personam jurisdiction cannot be obtained.

Liability Limitations. The bill would limit the liability for monetary damages and, in certain circumstances, for injunctive relief of domain name registrars, registries or other domain name registration authorities for any action they take to refuse to register, remove from registration, transfer, temporarily disable or permanently cancel a domain name, where the action is taken pursuant to a court order or in the implementation of reasonable policies prohibiting the registration of domain names that are identical or confusingly similar to another's trademark, or dilutive of a famous trademark.

Prevention of Reverse Domain Name Hijacking. Reverse domain name hijacking is an effort by a trademark owner to take a domain name from a

domain name registrant who registered the domain name legitimately and in good faith. There have been some well-publicized cases of trademark owners demanding the take-down of certain web sites set up by parents who have registered their children's names in the .org domain, such as two-year-old Veronica Sam's "Little Veronica" website and 12-year-old Chris "Pokey" Van Allen's web page.

In order to protect the rights of domain name registrants in their domain names, the legislation provides that registrants may recover damages, including costs and attorney's fees, incurred as a result of a knowing and material misrepresentation by a person that a domain name is identical or similar to, or dilutive of, a trademark. Moreover, should the domain name registrant prevail in a suit for cybersquatting, the registrant as the prevailing party is authorized to award costs and attorneys' fees.

In addition, a domain name registrant, whose domain name has been suspended, disabled or transferred, may sue upon notice to the mark owner, to establish that the registration or use of the domain name by the registrant is lawful. The court in such a suit is authorized to grant injunctive relief, including the reactivation of a domain name or the transfer or return of a domain name to the domain name registrant.

Personal Names. Commercial sites are not the only ones suffering at the hands of domain name pirates. This issue has struck home for many in this body. The Congress is not immune; while *cspan.org* provides detailed coverage of the Senate and House, *cspan.net* is a pornographic site. Moreover, Senators and presidential hopefuls are finding that domain names like *bush2000.org* and *hatch2000.org* are being snatched up by cyber poachers intent on reselling these domain names for a tidy profit.

This legislation addresses this problem by making liable a domain name registrant in a civil action for injunctive relief, including forfeiture, cancellation, or transfer of a domain name for registering the name of another living person with the specific intent to profit by selling the domain name for financial gain to that person or any third party. This provision applies only prospectively.

In addition, the legislation directs the Commerce Department in consultation with PTO and the Federal Election Commission to study and report to Congress on procedures for resolving disputes over personal names registered as domain names and to collaborate with ICANN on these procedures.

Cybersquatting is an important issue both for trademark holders and for the future of electronic commerce on the Internet. Any legislative solution to

cybersquatting must tread carefully to ensure that authorized remedies do not impede or stifle the free flow of information on the Internet. In many ways, the United States has been the incubator of the World Wide Web, and the world closely watches whenever we venture into laws, customs or standards that affect the Internet. We must only do so with great care and caution. Fair use principles are just as critical in cyberspace as in any other intellectual property arena. In my view, this legislation respects these considerations.

Mr. HATCH. Mr. President, I am pleased to rise today as the Senate finishes its consideration of the last in a package of four very important intellectual property related "high-tech" bills that Senate LEAHY and I introduced earlier this year. Three of those bills—the "Trademark Amendments Act of 1999," the "Patent Fee Integrity and Innovation Protection Act of 1999," and a Copyright Act technical corrections bill—were passed by the House and Senate and signed into law in August of this year. The fourth of those bills—the "Digital Theft Deterrence and Copyright Damages Improvement Act" (S. 1257)—was passed by the House with an amendment and returned to the Senate. Each of these bills is designed to promote the continued growth of vital sectors of the American economy and to protect the interests and investment of the entrepreneurs, authors, and innovators who fuel their growth.

Technology continues to be the driving force in the American economy today, and American technology is setting new standards for the global economy, from semiconductor chip technology, to computer software, Internet and telecommunications technology, to leading pharmaceutical and genetic research. In my own state of Utah, these information technology industries contribute in excess of \$7 billion each year to the State's economy and pay wages that average 66 percent higher than the state average. Their performance has placed Utah among the world's top ten technology centers according to *Newsweek Magazine*. Similar success is seen in areas across the country, with the U.S. being home to seven of the world's top ten technology centers and with American creative industries now surpassing all other export sectors in foreign sales and exports.

Underlying all of these technologies are the intellectual property rights that serve to promote creativity and innovation by safeguarding the investment, effort, and goodwill of those who venture into these fast-paced and volatile fields. Strong intellectual property protections are particularly critical in the global high-tech environment where electronic piracy is so easy, so cheap, and yet so potentially dev-

astating to intellectual property owners—many of which are small entrepreneurial enterprises. In Utah, 65 percent of these companies have fewer than 25 employees, and a majority have annual revenues of less than \$1 million. Intellectual property is the lifeblood of these companies, and even a single instance of piracy could drive them out of business. What's more, without adequate international protection, these companies would simply be unable to compete in the global marketplace.

That is why we enacted a number of measures last year to provide enhanced protection for intellectual property in the new global, high-tech environment. For example, the Digital Millennium Copyright Act (DMCA) implemented two new World Intellectual Property Organization Treaties setting new global standards for copyright protection in the digital environment. We also paved the way for new growth in online commerce by providing a copyright framework in which the Internet and other new technologies can flourish.

The "Digital Theft Deterrence and Copyright Damages Improvement Act" builds upon those protections by raising the Copyright Act's limit on statutory damages to make it more costly to engage in cyber-piracy and copyright theft. Section 504(c) of the Copyright Act provides for the award of statutory damages at the plaintiff's election in order to provide greater security for owners, who often find it difficult to prove actual damages in infringement cases—particularly in the electronic environment—and to provide greater deterrence for would-be infringers. The current provision caps statutory damages at \$20,000 (\$100,000 in cases of willful infringement), which reflects figures set in statute in 1988 when the United States joined the Berne Convention. The combination of more than a decade of inflation and revolutionary changes in technology have rendered those figures largely inadequate to achieve their aims. The bill before us updates these statutory damage provisions to account for both these factors.

Under the bill, the cap on statutory damages is increased by 50 percent, from \$20,000 to \$30,000, and the minimum is similarly increased from \$500 to \$750. For cases of willful infringement, the cap is raised to \$150,000. This will not mean that a court must impose the full amount of damages in any given case, or even that it will be more likely to do so. In most cases, courts attempt to do justice by fixing the statutory damages at a level that approximates actual damages and defendant's profits. What this bill does is give courts wider discretion to award damages that are commensurate with the harm caused and the gravity of the offense. At the same time, the bill preserves provisions of the current law allowing the court to reduce the award of

statutory damages to as little as \$200 in cases of innocent infringement and requiring the court to remit damages in certain cases involving nonprofit educational institutions, libraries, archives, or public broadcasting entities.

The House of Representatives amend the bill to include an amendment to the "No Electronic Theft (NET) Act." The NET Act—enacted to curb digital piracy by expanding criminal copyright infringement to include certain electronic infringements done without an intent to profit—directed the U.S. Sentencing Commission to revise the sentencing guidelines for crimes against intellectual property to ensure that the applicable guideline range is sufficiently stringent to deter such crimes and to provide for consideration of the retail value and quantity of the infringed upon items with respect to which the crime against intellectual property was committed. This directive, and its specificity, reflected the concern on the part of Congress that the existing guidelines' reliance on the value of the infringing items (i.e., the street value of a bootlegged video) both underestimates the true economic harm inflicted on copyright owners and results in penalties that are so disproportionately low that U.S. attorneys are simply unwilling to prosecute such cases. Despite Congress' directive, the old guidelines remain in place unamended. The result is that today, nearly two years later, there has been only one case brought under the NET Act, and electronic piracy continues as a significant and growing concern.

The House amendment to S. 1257 would revise the outstanding NET Act directive to require the Sentencing Commission to amend the sentencing guidelines to provide an enhancement based upon the retail price of the legitimate items that are infringed upon and the quantity of the infringing items, as well as to require the Commission to act within a set time. While the proposed revision is consistent with Congress' intent to strengthen the sentencing guidelines applicable to intellectual property-related crimes and to better reflect the economic harm in cases of electronic piracy, there was some concern that the amended guidelines would overstate economic harm or have other unintended consequences with respect to infringements not involving digital reproductions.

The amendment Senator LEAHY and I are offering today—which is the result of many hours of discussions and the subject of widespread agreement—will leave the existing NET Act directive unchanged, but will require the Commission to act on that directive within the later of 120 days from the bill's enactment or 120 days from the first date on which there are sufficient voting members of the Sentencing Commission to constitute a quorum. I expect that the Sentencing Commission will

move expeditiously once its commissioners are in place to complete revision of the applicable sentencing guidelines as directed by the NET ACT, and that it will do so in a manner that is consistent with Congress' intent to provide improved deterrence in this area.

In sum, this bill is an important high-tech measure that will spur creativity and enhance protection for American copyrighted works at home and abroad. I want to thank Senator LEAHY for his assistance, cooperation, and leadership in this process, and I look forward to the Senate swiftly passing this bill with the Hatch-Leahy Amendment.

Mr. BAYH. Mr. President, For years the American people have become increasingly cynical about our federal government and apathetic about political participation. There are many reasons for this unfortunate state of affairs. This year's budget exemplifies several.

One reason is our inability to do what every family and business must do, balance our budget. After years of large, chronic deficits, last year we finally, if barely, balanced the federal budget. If great care is not taken, the budget will not be balanced for long.

Another reason is Washington's unwillingness to be honest with the American people. This budget is only the latest example. Proponents claim it is balanced. It is not. They say it does not raid social security, but it does. It purports to meet certain "emergencies", when no reasonable person could possibly consider them such. It's time we ended this "business as usual" in Washington and began to regain the trust of the American people.

I oppose this bill because it spends too much and uses gimmicks that will make future budgets even more difficult. It ignores the greatest financial challenge facing our nation, entitlement reform, and makes matters even worse by taking money from the Social Security Trust Fund to pay for spending today. It foreshadows a return of chronic deficits. If we must resort to such foolishness when times are good, what will happen when times are tough? It makes the prospect of meaningful tax cuts much more remote because it spends the surplus and then some.

There are circumstances that could justify my support for this budget and some of the items that I object to. But none exist now. If meaningful entitlement reform had been included. If the economy were weak and the gimmicks were only temporary expedients, not the permanent fixtures they promise to be. If we had a few more years, not just one, of balanced budgets under our belt. There are several good things in this budget, things I strongly support: funding for 100,000 additional teachers

in our classrooms, putting 50,000 additional police officers on our streets, relief for hospitals and other providers from excessive Medicare cuts, enhanced Land and Water Conservation funds, expanded biomedical research through NIH, expanded Head Start and increased After School Care.

All of these have merit. All should be done. But we must have the honesty and integrity to pay for them, or the restraint to wait until we can, and not just perpetuate the cynicism created by annual budget charades.

I look forward to voting for a future budget. One that preserves and strengthens the foundation of financial security so important to our nation's well-being. Even more, I look forward to that day when this Congress enjoys the respect and admiration of our fellow citizens. This budget will not hasten that day.

Mrs. LINCOLN. Mr. President, today is a historic day in the United States Senate. With the inclusion of the Superfund Recycling Equity Act in the 1999 Omnibus Appropriations Bill, we have righted a wrong to the recycling industry of this Nation. We have removed the Superfund bias against recycled materials and set this country back on a path to promoting reuse of all recyclable materials. The Superfund Recycling Equity Act of 1999 will finally place traditional recyclable materials which are used as feedstocks in the manufacturing process on an equal footing with their virgin, or primary feedstock, counterparts. Traditional recyclables are made from paper, glass, plastic, metals, batteries, textiles, and rubber.

Mr. President, we have been working to right this wrong for over six years. During the 103d Congress, I first introduced a bill to relieve legitimate recyclers of scrap metal from unintended Superfund liability. The bill was developed in conjunction with the recycling industry, the environmental community, and the Administration. We worked closely together and consistently agreed that liability relief for recyclers is necessary and right. The language in this bill is the culmination of a process that we have been working on since 1993.

As I'm sure you can see, Mr. President, the push to relieve these legitimate recyclers of this unintended liability has received broad, bipartisan support. This bill has received 67 cosponsors in the Senate this year and thanks to the strong leadership of Senators LOTT, DASCHLE, CHAFEE, and WARNER, we have successfully brought this important piece of legislation to the floor.

Mr. President, as the sponsoring member of this legislation when I was a member of the House of Representatives, I would like to make a couple of important points. First, this Superfund

Recycling Equity Act is both retroactive and prospective. Slightly different standards must be met for recyclers to be relieved of Superfund liability for recycling transactions that occurred prior to the date of enactment than for those that occur after the date of enactment. But in either scenario, legitimate recyclers of paper, glass, plastic, metals, textiles, and rubber will no longer be treated as if they were "arranging for the disposal" of materials containing hazardous substances each time they sell their materials as manufacturing feedstocks. Rather, they will be treated as if they were selling a product, which is the same standard to which suppliers of virgin materials are held. Virgin materials are in direct competition with recyclables and this legislation will help to increase recycling in our nation.

Recognizing that this issue has been the focus of much litigation, the Congress intended that the recycling situation be clarified through the Superfund Recycling Equity Act. That is why we have written this legislation in such a fashion that virtually all lawsuits that deal with recycling transactions of paper, glass, plastic, metals, textiles, and rubber are extinguished by this legislation. Only those lawsuits brought prior to enactment of this legislation directly by the United States government against a person will remain viable. All other lawsuits brought by private parties, or against third party defendants in lawsuits originally brought by the U.S. Government will no longer proceed under this legislation. This will resolve the inequities suffered by recyclers in a quick, fair, and equitable manner.

It should also be reiterated that this bill addresses the product of recyclers, that is the recyclables they sell which are utilized to make new products. This does not affect liability for contamination that is created at a facility owned or operated by a recycler. Neither does it affect liability related to any process wastes sent by a recycler for treatment or disposal. In order to assure that only bonafide recycling facilities benefit from this bill, a number of tests have been established within the bill by which liability relief will be denied to sham recyclers.

With the passage of this important legislation, we have taken a bold step in the right direction for America. We have taken a step to promote legitimate recycling and to put recycled materials on an equal footing with new materials.

Thank you, Mr. President.

Mr. DEWINE. Mr. President, as original co-sponsors of the Safe Senior Assurance Study Act of 1999 (S. 818), Senator REID and I wish to express, for the record, our gratification for the language contained in the conference report on H.R. 3194 concerning physician

supervision of anesthesia services under Medicare's Conditions of Participation.

We read the report as calling upon the Secretary of Health and Human Services to base her determination as to appropriate supervision standards on sound scientific outcome data—a principle which is at the core of S. 818, which was to assure that Medicare beneficiaries will continue to receive the highest quality medical care—one which I am sure is shared by every member of this body—and the Senator from Nevada and I think adoption of the report will help us attain this objective.

Preliminary data from recent outcome research has suggested that supervision of anesthesia care by physicians trained in that discipline represents an important factor in anesthesia safety, and we want to be certain that the Secretary takes the final results of this research into account. Medicare beneficiaries have resoundingly said, in response to recent national surveys, that they favor retention of the current supervision rule, and in our view, any change in that rule must be supported by scientific data showing that anesthesia safety for our nation's seniors would not be impaired. We congratulate the committees with jurisdiction over Medicare in the House and Senate for their clear commitment to this view.

Mrs. MURRAY. Mr. President, as the Senate finally concludes its work for the legislative year, I want to outline my position on a few of the final issues. Unfortunately, I needed to travel back to Washington state to attend the funeral of my good friend and mentor, Pat McMullen, and missed three votes.

Before leaving, I voted in favor of the "motion to proceed" to the omnibus appropriations bill, which also included fixes to the Balanced Budget Act of 1997 and the tax extenders package. With that vote, I registered my support for this important funding and corrections bill. I also would have voted in favor of the Work Incentives Act.

First, I would like to address just some important provisions in the omnibus appropriations bill. There are many things that we do here that have little direct impact on the lives of real people and real families. However, this legislation is one of those times when we act to provide real help and real hope to working families, children and our senior citizens.

The package that we are about to enact, provides an additional \$2 billion investment in the National Institutes of Health (NIH). There are few people in this country who are not touched in some way by the research supported by NIH. An additional \$2 billion keeps us on track to doubling our investment in medical research. Research that saves lives and prevents human suffering. Our investment has already brought us

closer to finding a cure for devastating diseases like Parkinson's, leukemia, heart disease, and breast cancer. We must continue this commitment as this investment is about saving dollars and lives. The impact on Washington state is also significant. I am proud of the fact that Washington state is one of the top recipients of NIH grants. The outstanding research being conducted at research institutions like the University of Washington and the Fred Hutchinson Cancer Research Center are known throughout the world. We are truly a world leader in medical research.

This appropriations package will also provide additional resources to improve access to quality health care for the uninsured and the most vulnerable. The additional funding for the Centers for Disease Control (CDC) and the additional \$100 million provided for Community Health and Migrant Health Care Centers provide a critical health care safety net for those working families who simply cannot afford insurance. There are more than 80 clinics in Washington state providing quality, affordable health care services who will be able to expand and meet the growing needs of the uninsured populations.

I am pleased we have been successful in providing, for the first time, a direct appropriation to support poison control efforts and education and training for Children's Hospitals. I have been a long time proponent of these efforts and recognize the importance of this investment in our children.

Overall, this appropriations package includes a \$34.5 billion investment in health care programs. This investment will strengthen the public health infrastructure, provide essential prevention and treatment services to individuals with mental illness and ensure that our senior citizens are not forgotten. The additional \$45 million provided to support Older Americans Act programs ensures that we can honor our commitment to our nation's elderly by providing important services like nutritional assistance, employment training, respite care, in-home care, and abuse prevention.

In addition, as part of this appropriations bill, we have succeeded in saving quality health care for millions of Medicare beneficiaries. The corrections to the Balanced Budget Act address the unintended consequences of the reductions called for in 1997. Then, we anticipated a total of \$100 billion over five years to ensure Medicare's solvency. Unfortunately, our estimates have proven incorrect and we were facing well over \$200 billion in reductions which are impacting quality care for millions of seniors and the disabled. The BBA97 corrections provide additional resources for home health care, skilled nursing facilities, nursing homes, hospitals, cancer treatment centers, teaching hospitals like the

University of Washington, community health care centers, rehabilitation services, and health maintenance organizations. This one time correction will prevent the closing of facilities or home health care agencies and does not jeopardize our goal of solvency for the Medicare Trust Fund. I know from my own health care providers and my own hospitals what this fix means. I also know that without it, rural health care was in real jeopardy. I told my constituents that I would not leave for the year until we acted to address the looming crisis. This has been accomplished in a bipartisan and comprehensive manner.

I would also like to address the tax extenders package included in this bill. I generally support the tax extenders package. It includes the expansion of some tax credits that I have strongly supported over the years. First, the research and experimentation tax credit represents a critical investment for our nation. If we are to continue creating more and higher-paying jobs for American workers, we must encourage the business community to invest in research and development. This bill does just that. I have cosponsored two bills to make the R&E tax credit permanent, so I look forward to working with my colleagues to make that happen.

I am also pleased this legislation includes extensions of the Welfare-to-Work Tax Credit and the Work Opportunity Tax Credit, which help us move toward our goal of ensuring that all Americans benefit from the new economy.

This extenders package also includes an extension of employer provided educational assistance. I am disappointed the package does not include compensation for graduate school assistance. I believe this commission is short-sighted. At a time when the American economy is so rapidly changing, we need to ensure that our workforce is able to meet the demands of the new economy.

Our tax code should also reflect our commitment to cleaner energy. While this package extends the wind and biomass tax credit, it does not expand the definition of biomass to include open loop biomass. Meanwhile, it expands the code to include incentives for the production of energy from chicken waste. I have no doubt that some of my colleagues are trying to address legitimate animal waste issues in their states. However, if the code is to be expanded, it should be expanded to include open loop biomass. If Congress considers major tax legislation next year, this should be a top priority.

While the efforts I have mentioned above help businesses and the poor, the bill also helps middle class Americans. In 1997, we passed important non-refundable tax credits, like the child tax credit, that have greatly benefitted the middle class. This legislation will en-

sure families can continue to use these credits without being affected by the alternative minimum tax.

Finally, the Senate passed another piece of important legislation today: the Work Incentives Act. The WIA bill rewards those disabled individuals who want to go back to work but face the prospect of falling off the so called "health care cliff." We have been successful in treating many illnesses and injuries that once permanently disabled workers. They may not be cured but can be productive. Unfortunately, if they do try and return to work they lose their link to life, their health insurance. This legislation, of which I am proud to have been an original cosponsor, will allow workers to return to work and continue to receive Medicare. It will also allow many to buy-in to Medicaid. This legislation is not just about giving people the chance to return to some kind of productive life. It is about saving precious dollars as well. Workers who give up their Social Security disability payments to go back to work will be paying taxes and contributing to the Social Security and Medicare Trust Fund. This is a win-win for all of us. It is also the kind of policy that simply makes sense. People should not be penalized for trying to go back to work.

Mr. President, I have voted in support of the motion to proceed to this omnibus appropriations, B.B.A. of '97, and tax extenders package. I am particularly pleased we have been able to secure yet another year of commitment to our children by helping reduce class sizes in the early grades. I will be working hard to ensure this important program is authorized in the Elementary and Secondary Education Act next year. I must also note extreme disappointment in the decision to pit United Nations dues against women's reproductive health care. I remain committed to family planning throughout the world and will be working with the administration to ensure the United States continues to lead the way in protecting women's health, including our reproductive health.

Mr. ABRAHAM. Mr. President, I rise today to voice my strong support for this final Appropriations package. This is a good package that protects the Social Security surplus from being raided to pay for non-Social Security spending, that provides sufficient funds for important national programs, and which addresses critical issues specifically for Michigan. I trust that the President will be able to sign this quickly and get these Fiscal Year 2000 funds to the programs that will disburse them to Michiganiens as soon as possible.

Mr. President, I am confident that this package will not raid the Social Security surplus as has been the norm for almost 30 years. The Congressional Leadership and the Administration

have crafted a package of appropriations and offsets that will not touch the Social Security surplus. The precise bookkeeping agreed upon by the Administration and Congress used in this bill will help regulate how these funds are actually spent by the government, so that we don't spend the Social Security surplus. These aren't gimmicks, but finely crafted tools necessary for the Office of Management and Budget to ensure that bureaucrats don't spend their funds faster than Congress intended, so as to protect the Social Security surplus.

However, for those that are concerned that such tools could potentially be insufficient to control the rate of spending, and may in fact lead to the government dipping into the Social Security surplus, I will carefully track the revenue and outlay totals for the Federal Government over the next few months. And if it appears that we are falling behind in maintaining a sufficient buffer to protect the Social Security surplus, then I will immediately introduce and push for as large of a rescission package as necessary to prevent that from occurring. But that, in my opinion, will not be necessary. Already for the first month of Fiscal Year 2000, the Congressional Budget Office is reporting that we are running \$6.4 billion ahead of last year, or almost \$77 billion more in net revenue than last year. Considering the CBO estimated that net revenues would actually drop by \$1 billion between Fiscal Years 1999 and 2000, I believe we will have more than enough of a non-Social Security surplus buffer to accommodate even the worst case assumptions that CBO may put forward.

As a specific note, Mr. President, one of the tools used to control spending in this package is an across-the-board 0.38 percent cut in discretionary spending. Although I would rather see specific cuts to achieve the \$1.3 billion in fiscal discipline provided by this cut, such as cutting in half the funding for the Space Station, this is a modest enough cut to be palatable, especially considering the significant latitude given the executive agencies in finding these cuts. However, because of the vagaries of the budget process, the pay of Congressional Members has been exempted from this cut. I cannot support such unequal treatment, and declare that I will return an equal proportion of my Senatorial pay to the Department of Treasury. Nothing else would be fair.

But this package is not just about what it does not do. Mr. President, this appropriations package does a great deal of good as well. It increases funding for Head Start by over 10%, while providing over \$35 billion for education in general, including funds for 100,000 new teachers while also significantly expanding the discretion local school districts will have to use that money for teacher testing and quality training. It will put 50,000 more police on

our streets as well as providing over \$2.1 billion for assistance programs to local law enforcement agencies. The National Institute of Health will see its funding increased by 15% to almost \$18 billion, while important high-tech legislation that I sponsored to stop the poaching of corporate and identifiable World Wide Web address names by unscrupulous profiteers and carpet-baggers does not continue unimpeded.

And maybe most significantly, the unintended effects upon Medicare and Medicaid of the Balanced Budget Act of 1997, as well as the onerous additional regulations levied by the Health Care Financing Agency in implementing that Act, will be softened through the provision of over \$27 billion in additional health care funds over the next 10 years. This will provide specific relief for Michigan's hospitals by easing the reductions in the reimbursements they receiving for treating our Medicare beneficiaries in Michigan, and thereby expanding the access for quality medical care. It will also increase the unrealistically low reimbursement rates set for Skilled Nursing Facility care, while also ensuring that the arbitrary \$1,500 per patient cap on physical and rehabilitative therapy set by the Administration is not allowed to deny our seniors the help they need to recover from such debilitating conditions as strokes and severe heart conditions. It improves the ability of women to receive pap smear tests, provides greater access to renal dialysis treatment, while also making immunosuppressive drugs more readily available. And it provides very much needed protection for Rural Health Clinics and Federally Qualified Health Centers from capricious reductions in their reimbursements, thereby allowing them to protect the uninsured and Medicare dependent population that they overwhelmingly serve.

But, Mr. President, this package is good for Michigan as well as our nation. A number of issues that significantly affect my constituents are addressed in this package. Our unique Great Lakes environment is protected through the continued funding of the Great Lakes Environmental Research Laboratory, increased funding for the Great Lakes Fishery Commission, Sea Lamprey control, and Sea Grant Research funds, as well as funding for a new simulator at the Great Lakes Maritime Academy in Traverse City to ensure our commercial shipping maintains its peerless safety record. This appropriations package funds worthy projects such as Detroit's Focus:HOPE information technology training program for the city's poorest residents, Central Michigan's charter school and education performance institute, Northern Michigan's Olympics Training Facility, and almost \$2.5 million in funding to protect and preserve Isle Royale National Park and Keweenaw National Histor-

ical Park. This bill brings new Tribal funding for a new band of the Pottawatomi Indians and \$15 million more in PILT (Payment in Lieu of Taxes) funds which are desperately needed by Michigan's more rural counties. And on the international front, this package provides almost \$2 million to support the Middle East Peace Process through the Wye River Accord agreement, as well as a number of policy and funding initiatives overseas such as continued support for Armenia in its dispute over Nagorno-Karabakh and the further development of education and infrastructure in Lebanon.

Mr. President, many will try to make political hay out of opposing this bill for this or that various reason. But on the whole, this final appropriations package achieves three very important goals: it stops the 30-year raid by big Washington spenders on the Social Security Trust Fund, it adequately funds important national priorities, and it addresses several specific programs in Michigan important to my constituents. We were sent to Washington to govern, Mr. President, and at this point in the session, I asked myself if I was going to be an effective legislator, or simply a politician. I'm glad I chose the former in supporting this bill.

Mr. President, I yield the floor.

Mr. BINGAMAN. Mr. President, the appropriation for the Department of Education includes an additional \$134 million, added during final negotiations over the bill, to promote school accountability and improvement under Title I of the Elementary and Secondary Education Act of 1965, which funds educational services to educationally disadvantaged children. These funds will provide critical resources to schools most in need—those in need of improvement and identified for corrective action under Title I.

Dedicated funds are necessary to develop improvement strategies and to hold schools accountable for continuous student improvement. The federal government directs over \$8 billion dollars of federal funding to provide critical support programs for disadvantaged students under Title I, but the accountability provisions in Title I have not been adequately implemented due to insufficient resources. Title I authorizes state school support teams to provide support for schoolwide programs and to provide assistance to schools in need of improvement through activities such as professional development or identifying resources for changing instruction and organization. In 1998, only eight states reported that school support teams have been able to serve the majority of schools identified as in need of improvement. Less than half of the schools identified as being in need of improvement in 1997-98 reported that this designation led to additional professional development or assistance. Schools and school

districts need additional support and resources to address weaknesses soon after they are identified, promote a progressively intensive range of interventions and continuously assess the results of interventions.

The money provided in this appropriations bill can be used to ensure that school districts have necessary resources available to implement the corrective action provisions of Title I, by providing immediate, intensive interventions to turn around low-performing schools. The types of intervention that the school district could provide using these funds include:

(1) Purchasing necessary materials such as up-to-date textbooks, curriculum, technology;

(2) Providing intensive, ongoing teacher training.

(3) Providing access to distance learning;

(4) Extending learning time for students—after school, Saturday or summer school—to help students catch up;

(5) Providing rewards to low-performing schools that show significant progress; and

(6) Intensive technical assistance from teams of experts outside the school to help develop and implement school improvement plans in failing schools. The terms would determine the causes of low-performance—for example, low expectations and an outdated curriculum, poorly trained teachers, unsafe conditions) and assist in implementing research-based models for improvement.

The portion of the bill relating to these additional funds also requires that school districts give students in Title I schools the option of transferring to another public school if the schools they attend have been identified as in need of improvement. This requirement applies only to districts that receive a portion of this additional money, and not to districts that do not accept these additional funds. While I have a bill that is supportive of right to transfer at the corrective action stage of the Title I accountability system, it is my understanding that the language in this appropriation bill applies only to schools accepting funding from this new funding source of \$134 million.

Mr. BAUCUS. Mr. President, it is very unfortunate that the Senate finds itself in virtually the same position as we did last year with appropriations matters. As my colleagues will recall, we voted on a giant omnibus appropriations bill which contained eight appropriations bills, plus numerous other authorizing legislation. It ran on for nearly 4,000 pages and weighed in at some 40 pounds. It was called a "gargantuan monstrosity" by the distinguished Senator from West Virginia, Senator BYRD.

But it was a monstrosity not just because of its length. It was also in the

size of its insult to the democratic process, to individual Senators, and to the people they represent.

It was bad enough that no Senator was able to read the bill before they were required to vote on it. Worse still was the fact the bill was presented to the Senate in a "take it or leave it" form. No amendments were permitted. Every Senator was effectively muzzled.

I voted against that bill. Not because it didn't contain good provisions, good for the country, and good for my State of Montana. It did. I opposed that bill because writing such an important piece of legislation should not be done behind closed doors among a small group of people with no recourse for the others. I said at the time that the process dangerously disenfranchised most Senators, House Members, and the American people.

Many of my colleagues agreed with my sentiments then. And there were statements that this would not happen again. But it has.

True, this bill is somewhat shorter. It covers only five appropriations bills, not eight. It has fewer authorizing bills attached to it.

However, it still was written largely by a relatively few people, members of the majority, representatives from the Administration, a few members of the minority. And all behind closed doors, again.

But the bigger danger this year is that we are passing major bills by reference. The text of four appropriations bills and four authorizing bills appears nowhere in this bill. Instead, this bill provides for their enactment by referring to them by number and date of introduction, which just so happens to be less than 48 hours ago.

Members of the Senate do not have this language before them. Even if we could offer amendments, how would we do it? How can you amend a bill that is included only by reference? Even more fundamentally, will bills that are enacted into law "by reference" withstand a Constitutional challenge that they violate the presentment clause?

The courts will have to decide the Constitutional issues. But it is one more reason why I believe this is a very dangerous process. It further erodes the rights of the minority, indeed the rights of all Senators. Coming, as I do, from a state with a small population, we depend greatly on the Senate to protect our states' interest, something that cannot always be done in the House of Representatives, where population determines voting power.

Mr. President, we already face a population that is increasingly cynical of government and those who serve it. People believe more and more that government does not look after their interests, but only after special interests. And the more we operate behind closed doors, without an open, public process, the more we feed that cyni-

cism. And the more we encourage mistrust.

That is not healthy for our democracy or our people. One of the best things Montanans did when we rewrote our State constitution in 1972 was to require open government, at all levels. It has helped keep government officials honest and helped the people have faith in that government. I wish this process were as open.

Someday, I hope that the Congress will return to the open process on appropriations bills and authorizing bills we had not so long ago. We could debate issues, offer amendments, make compromises, win, lose. But all in front of the people.

But this bill goes too far in the other direction and therefore, I cannot support it.

Mr. ROBB. Mr. President, as we near the end of this session of Congress, there are some accomplishments we should celebrate and some disappointments we should work to remedy in the next session of the 106th Congress. While there are many items in the appropriations and tax bills that benefit our nation, there are a few I'd like to highlight. This year's final budget package will continue to provide more crime reduction and school safety funding so our children are safer in their neighborhoods and in their schools. It will continue our efforts to reduce class size so our children get more individualized attention from a top-quality teacher. And it will provide what I hope will be the first installment of school modernization funding so that our children's schools are safe and equipped for the future.

With the passage of the appropriations and tax measures this session, Congress will uphold its commitment to continue reducing crime on our streets and in our schools. We've come a long way from the original Senate committee bill that would have killed the COPS initiative, which has placed 100,000 new police officers in our communities since 1994. This year's appropriations bill provides enough funding to hire another 50,000 officers over the next few years, and it sets aside \$225 million in Department of Justice funding for school safety initiatives. The first obligation of government is to provide for the safety of every man, woman, and child, and I believe our funding levels for COPS and school safety programs live up to that obligation.

We will also be living up to the commitment we made last year to hire 100,000 new teachers so our children's class sizes are smaller and their individual time with their teachers is greater. We made a down payment last year and hired 29,000 teachers. This year, we will provide \$1.3 billion to states so we can keep those teachers in the classroom and hire even more. But as we all know, school systems can't

hire new teachers if they don't have the extra classrooms. So, I'm especially pleased that we have finally recognized the school infrastructure crisis in America.

The tax package we will pass today will provide an additional \$800 million in zero interest bonds under the Qualified Zone Academy Bond Initiative. These bonds will help our neediest schools renovate buildings that are relics of the past and turn them into schools of the future. It will help them purchase new equipment—from classroom computers to new, safe school buses. It will help them train teachers and develop challenging curricula to raise expectations and achievement scores of our nation's students.

The continuation of this school renovation initiative is just one component of the school modernization bill I introduced with many others in July, and I am grateful to so many education, labor, and professional organizations for their unwavering support. I thank my colleagues who co-sponsored the legislation, Rep. Charlie Rangel for his work on similar legislation, and the administration's commitment to ensuring that our schools are safe and modern havens for learning. We're sending the right message to our nation's school boards, teachers, parents, and students: that we see the leaky roofs, that we see the cracked walls, that we see all the trailers—and that we're willing to help.

But there remains much unfinished business. Over 14 million children attend schools in need of extensive repair or complete replacement. Twelve million children attend schools with leaky roofs, and 7 million children attend schools with safety code violations. Our schools are on average over forty years old. They're overcrowded, they're under-equipped with technology, and many are unsafe. In Virginia alone, there are over 3,000 trailers being used to hold classes. In short, our national renovation needs total \$112 billion and our new construction needs total \$73 billion. Given these tremendous needs, I view the \$800 million in the this year's tax package as the first installment of the nationwide renovation and modernization of our children's schools.

Mr. President, the other major disappointment of this session concerns one of our nation's most important transportation arteries. I am quite dismayed that this Congress has not lived up to its responsibility to fund the replacement of the Woodrow Wilson Bridge. This is the only federally owned bridge in the entire country. It is a major gateway in the Washington metropolitan area, and a critical route for commerce along the entire east coast. We have an obligation to support its replacement.

I worked closely with the administration to advance this project, and I was

gratified by the fact that funding was among the administration's top priorities during the budget negotiations. Unfortunately, however, Congress declined to provide funding, so we will revisit the issue next year, when construction is scheduled to begin. We have become all too familiar with the devastating effects of traffic jams in this area—on our economy, on our environment, and most importantly, on our quality of life. The unresolved matter of funding for the Woodrow Wilson Memorial Bridge project continues to threaten the region, and I intend to continue the fight next session to be fiscally responsible and responsive to our region's biggest transportation need.

Mrs. BOXER. Mr. President, the two bills we passed today—the tax extenders bill and the Omnibus Appropriations Act—like this entire session of Congress, can be summarized by four words: the good, the bad, the missing, and the undone.

Let me begin with the good, because we have achieved victories on several important Democratic priorities. Funding for after-school programs was more than doubled. As a result, there will be spaces for 675,000 young people.

In another priority of mine, the days of the sweet deal for the big oil companies will be over next March 15. At that time, the Interior Department will finally be allowed to issue a regulation to ensure that oil companies pay their fair share of oil royalties to the federal government when they drill on federal land, ending the \$66 million annual loss to the taxpayers.

I was also pleased to see a 42 percent increase in funding for the lands program, known as the Lands Legacy Initiative. Most of this money will be used to acquire lands and historical sites so that they can be preserved for future generations.

There are other good things as part of the budget agreement: funding to reduce elementary school class sizes; putting 6600 cops on the streets and in the schools; paying the arrears the United States owes to the United Nations; debt relief for developing countries; full funding for the Middle East Peace Agreement; a \$2.3 billion increase in funding for the National Institutes of Health; correcting problems with Medicare funding that were part of the Balanced Budget Act of 1997, so that we ensure seniors continue to have access to health care, particularly home health care and nursing home care; a \$108 million increase in funding for nutrition assistance for pregnant women and infants; extension of some important tax credits, including the Research and Experimentation Tax Credit, employer-provided educational assistance, and trade adjustment assistance; and most of the anti-environmental riders were stripped out of the bill or were significantly weakened.

But, Mr. President, despite these good things, I am voting against the bill because of the bad things as well as the things that are missing.

First, let me comment on the process. If the Republican controlled Congress had done its work and passed the appropriations bills by October 1, which is what is supposed to happen, we would not have needed these protracted and secretive negotiations that gave undue power to just a handful of people. As my colleague from Nebraska said, this whole process turned government “of the people, by the people, and for the people” into “government of and by four people”.

I want to mention three specific provisions of this bill that I oppose. First, the funding for international family planning is inadequate. We have had level funding for this program for four years now. And on top of that, the omnibus appropriations bill reinstates the so-called Mexico City policy that prevents organizations from using their own, privately-raised money to provide abortion services or to lobby against draconian abortion laws. Under the provisions of this bill, the President could waive this restriction, but if he does, the funding would be cut \$12.5 billion, which could deny contraception to over 40,000 women for an entire year.

I was also extremely dismayed to find in this bill a provision that would allow pharmacists to deny women in federal health plans prescriptions for contraceptive drugs, if they claim a sort of “conscientious objector” status. This is an outrageous assault on the right of women to receive the full range of health benefits.

Also, this bill contains an absolutely unnecessary—and potentially dangerous—across the board spending cut. This cut will affect funding for education and health care and medical research and veterans. It is a silly way to do business, and it is unnecessary. Congress should have done its job and made the decisions about what is important and what is not.

There are also a lot of holes in this legislation, a lot of things missing. These are things that were in there at one point or on the table for discussion, but for some reason were taken out. I am talking about the lack of hate crimes legislation, which passed the Senate. I am talking about my amendment, which also passed the Senate unanimously, to ban the sale of guns to people who are intoxicated. There is once again no long-term, large-scale commitment to repair America's schools. There is no prescription drug benefit under Medicare, so that millions of senior citizens will not have to make a choice between medicine and food. There is not enough money for after-school programs. And the rural loan guarantee program for satellite TV—something that is crucial to rural communities around the coun-

try—was taken out of the bill at the request of one senator.

In the category of the undone, this Congress will go home for the year without having acted on several issues of enormous importance to all Americans—things that the people have said over and over again they want us to do. This includes: a real patients bill of rights, common sense gun control, campaign finance reform, and an increase in the minimum wage.

Some will say that we could not do these things because we did not have the money. Let me point out that if this Republican-controlled Congress had not insisted on increasing the defense budget by about \$8 billion more than the President said we needed, then we would have had plenty of money to pay for both the well-deserved pay raise for our servicemen and women and the priorities I have just talked about.

So, Mr. President, I regret that this bill was not all it could have been and that this Congress did not accomplish all that it should have. But, I look forward to the next session in the hope that we finally address the priorities of the American people.

Mr. GRAHAM. Mr. President, to quote Yogi Berra, it's *deja vu* all over again. A little less than a year ago Congress passed an Omnibus Appropriations bill for fiscal year 1999. That legislation combined eight separate appropriations bills and included \$200 billion in discretionary spending. Last year's Omnibus spending bill also included \$21 billion in emergency spending—\$13 billion of which directly reduced the surplus for Fiscal Year 1999 and \$5 billion of which reduced the surplus for Fiscal Year 2000. Members decried the process that led to last year's bill, threw themselves on the mercy of the American public asking forgiveness, and vowed that it would never happen again.

One senior Republican, speaking on condition of anonymity about the level of frustration with last year's budget process, said earlier this year: “We are looking for ways to avoid what happened last year. We are determined not to go through that again this year.” Unfortunately, Mr. President, here we are again—only worse. This year's bill clearly demonstrates that Congress has not learned from its past mistakes.

What makes this bill even more insidious is that we not only repeat last year's mistakes, but in fact, build upon them with even more creative ways to flaunt fiscal discipline. For that reason, I will oppose it.

Mr. President, I am not alone. I ask unanimous consent immediately after my remarks an editorial which appeared in today's Washington Post titled “. . . And Brought Forth a Mouse” be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

I fully understand, Mr. President, that we work with budget projections that are subject to revision as economic factors change. We must base our decisions, however, using reasonable assumptions of what will occur, not rosy expectations of what the future might bring. The beginning of this congressional session was filled with opportunity—opportunity brought about by 5 years of fiscal discipline. That discipline helped to fuel a strong economy and produce the first budget surplus in more than a generation. Indeed, budget surpluses are projected far into the future.

Instead of seizing this opportunity to use those resources in improving our long-term fiscal future, Congress seems content to fritter them away on short-term political giveaways. A strong economy and favorable budget outlook give Congress a wonderful opportunity to make important investments for our future. What are some of those investments?

Early in 1999, Democrats and Republicans stated that saving Social Security and strengthening Medicare were the first items of business on this year's legislative agenda. The President made this statement during his State of the Union Address earlier this year:

"Now, last year we wisely reserved all of the surplus until we knew what it would take to save Social Security. Again, I say, we shouldn't spend any of it—not any of it—until after Social Security is truly saved. First things first."

My colleagues may remember that we followed the President's statement with a considerable amount of applause. Both commitments—extending the solvency of Social Security and strengthening Medicare—have been ignored. Both American political parties are identified co-conspirators in this unsavory result. There will be no structural changes to extend the solvency of the Social Security program. In fact, the most positive Social Security achievement we can cite underscores our failure to solve this important problem.

The only meaningful step Congress has taken to improve Social Security is an agreement not to spend the Social Security surplus—an agreement, I might add, that we have violated to the tune of \$17 billion. The culmination of these negotiations will result in a budget that reduces the federal debt by \$130 billion. That debt reduction, however, would have been \$168 billion had we remained true to our commitment to save Social Security first. We could have reduced the Federal debt by an additional \$38 billion had we not spent the full \$21 billion on-budget surplus and \$17 billion of the Social Security surplus. But even had we kept this promise, it would have done nothing to extend the program's insolvency date

of 2034. Accomplishing that goal will require additional resources—resources that could come from the on-budget surpluses as long as they can be preserved.

Mr. President, we must hold true to our commitment to ensure Social Security's solvency until 2075. Our actions on Medicare are even more deplorable. We started this year with the goal of extending the solvency of the Medicare Trust fund and possibly expanding the benefits for beneficiaries, such as providing a prescription drug benefit. Instead, however, we've gone backwards. The Medicare benefit package has not been modernized. Efforts to rationalize the program have been rejected.

Finally, and perhaps most disappointingly, the solvency of the Hospital Insurance Trust Fund has been reduced by 1 year. Estimates at the beginning of this year placed the date of insolvency for the Hospital Insurance Trust Fund in Fiscal Year 2015. As a result of the unfunded additional Medicare spending included in this bill, the insolvency date has moved forward to Fiscal Year 2014.

Not only were we unfaithful to the commitments we made regarding Social Security and Medicare, we missed other opportunities to make constructive use of the on-budget surplus.

Mr. President, we could have further strengthened the economy by pursuing tax reform. We could have made critical investments to protect our national treasures such as the National Park system. Or we could have reduced the disgraceful number of Americans, particularly children, who don't have access to health care. These proposals have one thing in common—a bold, coherent vision. This final appropriations bill and its blizzard of special interest handouts reflects no such vision. It contains no bold initiatives worthy of the 21st century. Instead it fritters away a substantial portion of the surplus—squandering resources that could instead be used to build a better future.

Mr. President, how did we get here? At the beginning of the year, CBO projected the FY 2000 on-budget surplus to be \$21 billion. In May Congress passed a supplemental appropriations bill providing \$15 billion for reconstruction aid for Central America and the Caribbean, assistance to Jordan pursuant to the Wye River accords, farm loan assistance, and funding for our operations in Kosovo. Much of the May supplemental bill was designated as an emergency and thus was not offset with corresponding spending reductions or revenue increases.

The consequence of that legislation was a \$15 billion reduction in the non-Social Security surplus—\$7 billion of which reduced the FY 2000 on-budget surplus. Passage of the May Supplemental transformed a \$21 billion surplus into a \$14 billion surplus. In Au-

gust, Congress passed the fiscal year 2000 Agriculture appropriations bill that included more than \$8 billion of "emergency" spending. Like the Supplemental before it, these "emergency" funds were not offset with corresponding spending reductions or revenue increases.

Therefore, this spending directly reduced the FY 2000 surplus. A \$14 billion on-budget surplus quickly shrunk to \$6 billion.

In October, Congress considered the appropriations bill covering the Defense Department. Incredibly, that legislation designated funding for routine operations and maintenance as an emergency. That designation, as with those proceeding it, means that the no offsets were required. No offsets, however, does not mean that the spending does not have a real economic effect. The emergency spending included in the Defense Appropriations bill further reduced the Fiscal Year 2000 on-budget surplus by \$5 billion, which the next column in my chart illustrates.

Mr. President, by the end of October Congress' voracious spending reduced the on-budget surplus from \$21 billion to \$1 billion. With passage of this Omnibus appropriations bill, Congress will not only complete its assault on the on-budget surplus but also begin its raid on the Social Security surplus. The \$21 billion on-budget surplus projected for FY 2000 has vanished. In addition, this Omnibus bill spends \$17 billion of the FY 2000 Social Security surplus.

Mr. President, no amount of budget trickery or accounting slight of hand can hide these facts. Those attempting to obscure this reality will soon be exposed. At the end of the year the Congressional Budget Office will total up the cost of our actions and tell us how they affected the national debt. The debt will no doubt be reduced in Fiscal Year 2000. Because of these budgetary tricks and shenanigans, however, we will miss the opportunity to make an even more substantial reduction in the national debt and the burden it imposes on our Nation. Worse yet, we have already staked claims against the on-budget surpluses projected beyond next year.

For example, at the beginning of the fiscal year the discretionary spending limit was \$572 billion. With this bill, actual spending will be closer to \$610 billion. If we assume that Congress maintains this level of spending—\$610 billion—for each of the next ten years, CBO's projected on-budget surplus of \$996 billion shrinks by \$145 billion. These are the on-budget surpluses CBO projected in July assuming we would adhere to the discretionary spending caps.

The orange bars show the surpluses we can expect if we hold freeze spending at the levels established for Fiscal Year 2000 for each of the next four years.

As my colleagues can see, it is increasingly unlikely that the large on-budget surpluses over which we salivated throughout the summer will materialize.

In addition, this budget agreement contains other items—Medicare spending and tax breaks—which are not offset by either spending reductions or additional revenues.

The Omnibus appropriations bill includes changes to the Medicare reimbursement rules which increase Medicare spending by \$1 billion in Fiscal Year 2000 and \$27 billion over the next ten years.

That increased spending will come directly out of the Social Security surplus in Fiscal Year 2000 and from the on-budget surplus in later years.

This afternoon we will consider a bill to extend certain expired provisions of the Internal Revenue Code.

Earlier this month, the Senate passed legislation that extended these provisions on a fiscally responsible basis.

That bill was fully offset, and as such, would not have jeopardized the on-budget surplus.

I regret that the product coming out of the Conference is not as responsible.

The “extenders” bill before us today will reduce the on-budget surplus over the next ten years by \$18 billion.

These spending commitments—a higher discretionary spending baseline as a result of the Fiscal Year 2000 appropriations bills, the extenders bill and the BBA addbacks—will spend almost 20 percent of the \$996 billion on-budget surplus projected for the next ten years.

In fact, Mr. President, the additional spending as a result of the BBA addbacks and the lost revenue from the extenders bill are likely to completely wipe out the Fiscal Year 2001 surplus.

CBO projects that Medicare spending will increase by \$6 billion in Fiscal Year 2001 as a result of this bill.

The Joint Committee on Taxation estimates that the “extenders” legislation will reduce revenues in Fiscal Year 2001 by \$3 billion.

That \$9 billion cost is greater than the \$3 billion on-budget surplus that will remain in Fiscal Year 2001 assuming spending for that year is frozen at this year's levels.

Mr. President, what did we buy with this torrent of spending?

Certainly some positive things are included in this legislation.

I am deeply concerned, however, with many of the provisions in this gargantuan bill and their implications for our future.

Let me give you two examples.

YELLOWSTONE

Many of the decisions reflected in this agreement were made in isolation and will have unexpected negative consequences.

The individual operating budgets for the national parks have not been ad-

justed to accommodate the full 4.8 percent federal employee pay raise.

Instead, their budgets reflect only a pay raise of 4.4 percent.

The additional 0.4 percent must be absorbed through reductions in the remainder of their budgets—principally operations and maintenance.

The parks must absorb an additional 0.4% reduction as a result of the across-the-board cut included in this bill.

Yellowstone National Park's budget is \$24 million—90 percent of which goes to pay salaries.

The combination of the pay raise shortfall and the across-the-board cut will force a reduction of \$200,000 from the operations and maintenance accounts.

Why is this important?

Yellowstone National Park was included as one of this year's ten most endangered parks by the National Parks and Conservation Association.

It has been referred to as “the poster child for the neglect that has marred our national parks.”

The policies established in this bill, combined with the previously adopted pay raise, raise serious concerns that the quality of our national parks will continue to decline.

I do not allege that anyone started out with this goal, but the consequences of this budget agreement may have that result.

I suspect this example of Yellowstone National Park will be repeated throughout the federal government.

BBA ADDBACKS

This bill also represents a triumph of special interests.

Having previously beaten back the Patient's Bill of Rights legislation, the managed care industry uses this bill to further advance its financial position.

\$8.7 billion of the \$27 billion of additional Medicare spending in this bill will go to the HMO industry.

Mr. President, what this means is nearly one-third of the Medicare money in this bill will go to the managed-care industry even though they only cover one-sixth of the beneficiaries.

This comes at a time when the General Accounting Office and Medpac say that HMOs are being overpaid, not underpaid, by Medicare.

I find it strange, Mr. President, that lobbyists for the managed care industry came to Capitol Hill crying for help when they tell their shareholders a very different story.

Let me read excerpts from a few HMOs' recent press releases.

For example, Pacificare said this in its press release announcing its third quarter earnings: “We posted strong revenue growth . . . due to membership growth and favorable premium pricing. Our confidence in and outlook on the future is very positive.” (Oct. 27, 1999)

Aetna had this to say: “This is the seventh consecutive quarter of growth

in operating earnings per share for Aetna . . . Aetna U.S. Healthcare continued to post solid commercial HMO membership increases.” (Oct. 28, 1999)

United Health Group made the following bold proclamation: “Our strong results continue to be driven by a balanced combination of growth, operating margin expansion, and capital structure enhancement. We look for ongoing progression in these key areas as we move into and through the year 2000.” (Nov. 3, 1999)

These are surprisingly upbeat statements coming from an industry that came to Congress crying the blues.

The Medicare section of this bill has other deficiencies.

An opportunity for reform through competitive-bidding of the HMO industry was cut off at the knees in a midnight assault.

This bill includes language prohibiting the Secretary of HHS to negotiate with durable medical equipment providers to secure better prices for the Medicare program and Medicare beneficiaries.

By putting off the implementation of these provisions, possibly for years, we are taking millions of potential savings out of the pockets of Medicare beneficiaries.

The question members of Congress must ponder over the coming holidays is how to avoid a repeat of this awful process next year.

I hope that the FY 2001 budget will be one that I can support.

In order for that to occur, next year's budget must start with a bipartisan process.

This first 10 months of this year were spent with the President and Congress ignoring each other's existence.

Only during the past ten days—fully 40 days after the fiscal year end—did the two sides begin negotiating a conclusion to this year's budget clash.

We must break the cycle of end-of-the-year budget showdowns that produce nothing but partisan rancor.

We must also press for budget reforms that will ensure the bad habits of the past two years do not become institutionalized.

While there are many targets for reform, at the top of the list is the need to change the manner in which we designate certain spending as an “emergency”.

Two-thirds of the reduction of this year's surplus—more than \$25 billion—happened because Congress overrode fiscal discipline by using “emergency” designations.

Senator SNOWE of Maine and I have introduced legislation that would establish permanent safeguards to protect the surplus from questionable “emergency” uses.

Specifically, that legislation would do the following:

1. Create a 60-vote point of order that prevents non-emergency items from

being included in emergency spending bills.

2. Create a 60-vote point of order that allows members to challenge the validity of items that are designated as "emergencies."

3. Require a 60-vote supermajority in the Senate for the passage of any bill that contains "emergency" spending.

Given that next year is a Presidential election year, it is unlikely that much will be accomplished.

An issue that will receive a great deal of attention in next year's election will be how best to use the on-budget surplus.

Several Presidential candidates have already outlined proposals that envision using the on-budget surplus for larger goals.

Vice President GORE supports the President's proposal for using some of the on-budget surplus to extend the solvency of the Social Security program.

He has also outlined a series of steps to expand health care coverage to the uninsured.

Senator BRADLEY has championed a plan to extend health care coverage to 95 percent of the nearly 45 million uninsured adults and children.

Governor Bush supports cuts in marginal tax rates, reductions in the so-called marriage penalty, and the elimination of the estate tax.

Senator MCCAIN would dedicate a portion of the surplus to tax cuts and transitioning the Social Security program to one that incorporates individual accounts.

Incidentally, Senator MCCAIN characterized this deal as "a scathing, unconscionable depiction of the way we do business in Washington."

Other candidates have proposals—transitioning to a flat tax, education reform—most of which look to the on-budget surplus as a means of financing.

These are all significant ideas, but if Congress continues this year's pattern in Fiscal Year 2001, they will be ideas starved for the resources to make them a reality, whomever the people elect.

Ultimately, the American people will provide their input on this matter through the decision they make next November.

Next year's budget should not short-circuit those ideas.

Instead, the goal for next year's budget should be to protect the surplus and therefore preserve the options available to the next President.

We must avoid a last minute, unfunded spending spree like that contained in the bill before us today.

Mr. President, it is a major disappointment that we didn't exercise this kind of fiscal discipline in 1999.

But when we return to inaugurate the second session of the 106th Congress, we will have the benefit of a new century, a new millennium, and a fresh start.

I hope that we can use that opportunity to seize the future rather than repeating the mistakes of the past.

This session began with great opportunities. We had a budget surplus. We had a strong economy. We had an opportunity to make decisions that have long-ranging positive effects on our economy. We have largely frittered away all of those opportunities.

The President and the congressional leadership began the year by joint commitment that our first priority was going to be to save Social Security and to strengthen Medicare. What happened after we finished the applause at the State of the Union? What has happened is we have ignored both of those commitments.

Social Security: No structural change. We have not extended by a second the solvency of the Social Security program. Yes, as the Senator from New Mexico said, we have reduced the national debt by \$130 billion as a result of funds from the Social Security trust fund. That is the good news. The bad news is we should have reduced it by \$168 billion, which is what we would have done had we preserved all of the surplus for strengthening Social Security and Medicare. His statement admits the fact that \$17 billion of Social Security surplus has, in fact, been spent for purposes other than reducing the national debt and saving Social Security.

Medicare: We have made no structural changes in Medicare. Medicare, in fact, has 1 year less solvency as a result of what we are doing than it did when we started this process in January.

How did we get here? We got here because we have frittered away \$168 million surplus down to \$130 billion by a series of, first, emergency spending, and then an avalanche of budget gimmicks at the end of the session, much of which is in the bill we are about to vote on which has chewed up all of the non-Social Security surplus and \$17 billion of the Social Security surplus.

What is the long-term consequence? The long-term consequence is we have already spent \$190 billion of our 10-year non-Social Security surplus of \$996 billion. One out of every \$5 that we had in January for the non-Social Security surplus we have either spent or committed in the fiscal year. In fiscal year 2001, we have already spent all but \$3 billion of the over \$40 billion of the non-Social Security surplus. And with the actions we are about to take, we are going to be into Social Security for the next fiscal year by over \$6 billion. That is what we have done with all the opportunities that were available.

I hope we will have learned from these lessons that we will apply some basic principles for next year, that we will try to be more bipartisan, that we will try to adopt some processes that will constrain us against the kinds of

actions that have led to this sorry state of affairs this year, that we will commit we will exercise real fiscal discipline so the American people, based on who they elect as President in November of next year, will have an opportunity to make some fundamental decision.

Do they want our surplus to be used for Social Security? Do they want it to be used for Medicare? Do they want it to be used for tax cuts? Do they want it to be used to reduce the number of Americans who do not have health care coverage? What are their priorities? We are spending the money like drunken sailors and the American people are being denied the opportunity to state their opinions as to what we should be doing with their money.

It is with regret, as we have repeated against what we did last year, I must vote no on the legislation that will soon come before the Senate as the concluding fiscal act of 1999 and hope we will do better next year.

EXHIBIT 1

[From the Washington Post, Nov. 19, 1999]

... AND BROUGHT FORTH A MOUSE

It is fitting that this legislative year should end with an almost imperceptible across-the-board spending cut that will not be across the board. It is hard to think of a single aspect of the budget that has not been seriously misrepresented in the past nine months of debate. There is always a certain amount of straying from the truth in regard to budgets. This year it has reached Orwellian proportions.

The final agreement on which the House was to vote last night and the Senate thereafter was touted yesterday by both sides as a major achievement. The major achievement consisted of no more than passage six weeks into the fiscal year of the last five of the 13 regular appropriations bills on which the operation of the government depends. Those 13 ordinary bills are the only fiscal accomplishment of a Congress that began with lofty talk on the part of the president as well as the leadership of both parties of solving long-range fiscal problems. They solved none. The only consolation is that, by virtue of incompetence, they managed not to make any seriously worse, either.

The Republicans crow that they came through the year without using the Social Security surplus to help finance the rest of government. But (a) that's a non-accomplishment, in the sense that the same IOUs are put in the trust fund whether the surplus is used to finance other programs or pay down debt. And (b) it didn't happen. They achieved the result on paper only, by use of gimmicks. In some cases, they simply denied that spending for which they voted—and which they busily called to the voters' attention as evidence of why they should be re-elected—would actually occur. They disappeared it. In other cases, they simply kicked it over into next year. It will hugely compound their problems then. There has been much talk that a new fiscal standard has been obliquely adopted, whereby the rest of government, meaning all but Social Security, will hereafter have to live within its own means. That would be fine with us, but what this year's record suggests is not a new standard to be adhered to so much as a new one to be systematically lied about.

Meanwhile, they did what they always do in writing end-of-session bills. They stuffed it full of goodies, using public funds or power to curry favor with the folks back home. There is fine print in the legislation meant to benefit Sallie Mae, the giant and decidedly non-needy Student Loan Marketing Association; dairy farmers; the recycling industry; transplant surgeons; and who knows who else. Most of these are provisions that, for good reason, could not pass on their own. The president called the agreement a "hard-won victory for the American people." In fact, it's a shabby, showy end to perhaps the least productive, nastiest and most duplicitous session of Congress in modern memory. They should hang their heads as they scurry home.

Mr. FEINGOLD Mr. President, I don't know if many of my colleagues have actually taken the time to read the bill before us.

If they have, they would have found some interesting provisions.

For example, Section 1001, titled "PAYGO Adjustments."

It appears at the very end of the printed text of H.R. 3194.

There are three subsections to this provision, and from what I can tell, this is what they do.

The first subsection declares that the mandatory spending that was folded into this bill—I believe mostly the provisions that restore Medicare funding—are not to be scored against the discretionary spending caps.

The second subsection then declares that the Medicare funding shall not be scored on the PAYGO ledger.

In other words, Mr. President, the roughly \$16 billion in mandatory spending provided in the Medicare portions of this bill over the next 5 years will be completely excluded from the statutory budget rules that require such spending to be offset.

The last subsection, Mr. President, then zeroes out the PAYGO ledger entirely.

This means that no spending in this bill and none of the net cost of the tax expenditures in the tax extenders bill—none of it—will be counted on the PAYGO ledger.

It won't have to be offset this year, next year, or ever.

Mr. President, what is going on here? Why is this language needed?

It is needed, Mr. President, if you don't want to pay for the mandatory spending done in this bill or the net revenue losses in the tax extenders bill.

The proponents of this language may wish to argue that they are using the budget surplus to pay for all of this.

Mr. President, let me ask them: "What surplus is that?"

We did not have a surplus this past fiscal year.

And given the track record of this Congress, when September 30, 2000 rolls around, there is an excellent chance we won't have a surplus then, either—at least not without counting the Social Security Trust Fund revenues.

Mr. President, yesterday I was pleased to add my name to a measure

the senior Senator from Texas was circulating honoring among others the Nobel Prize winning economist Milton Friedman.

As many know, Professor Friedman made famous the phrase: "There is no free lunch."

Well, Mr. President, I must tell my colleagues that passing a law declaring a free lunch will not make it so.

Congress can declare that the Medicare provisions of this bill will not cost anything, but that doesn't make it true.

Congress can declare that the tax extenders bill will not result in any lost revenue, but again, that will not make it true.

Mr. President, the PAYGO Adjustments section isn't the only one that tries to declare a free lunch.

We see it in the indefensible use of the so-called emergency designation.

I'll take just one example, the decennial census.

Mr. President, we have known for many years that there would be a census taken next year.

In fact, it's provided for in our Constitution.

In a very real sense, we have known for over 200 years that there would be a census next year.

It comes as no surprise.

But you wouldn't know that if you read this bill, Mr. President.

This measure provides that nearly \$4.5 billion in funding for the census is to be declared an emergency.

An emergency, Mr. President.

Who are we kidding?

Next year's census is an emergency?

This is nothing more than a budget gimmick to avoid having to make tough choices.

Mr. President, I have no doubt there are other examples of the misuse of the emergency designation in this bill.

Over the next few weeks we will probably see news stories about just what Congress views as an emergency.

Mr. President, as must be painfully obvious to my colleagues by now, the dairy provisions alone in this bill make it completely unacceptable to me, and I will be voting against the bill for that reason.

However, even if those provisions were not included in the legislation, I would still oppose it, and I would oppose it in part for the budget gimmicks that are strewn throughout it.

Mr. President, I yield the floor.

Mr. MCCAIN. Mr. President, I cannot support this budget deal because it spends the budget surplus, breaks our pledge to reduce the size and intrusiveness of the government, fails to deliver the tax relief American families deserve, and further imperils the Social Security system upon which so many Americans depend for their retirement security.

The "budget crisis" has become an annual, end-of-the-year ritual in which

closed-door deals produce even more fodder for public cynicism about their government. This budget deal short-changes American taxpayers and benefits special interests, illustrating once again that the President and a majority of the Congress would rather spend the budget surplus on big government, special interest giveaways, and pork-barrel spending.

This deal makes a mockery of our obligation to responsibly exercise the "power of the purse" conferred on the Congress by the Constitution.

It busts the budget caps set just two years ago by more than \$20 billion.

It obscures the true cost of the deal by using \$36 billion in budget gimmickry.

It contains nearly \$14 billion in everyday, garden-variety pork-barrel spending.

It spends every dime of the non-Social Security surplus, instead of setting that money aside to provide tax relief to American families, and shore up Social Security and Medicare.

It resorts to an across-the-board budget cut to avoid dipping into the Social Security surplus, rather than making the hard choices among spending priorities.

Some people have said this year's deal is not as bad as last year's deal. Looking at some statistics, that could be true to a certain extent:

Last year, the omnibus appropriations bill was 4,000 pages long and weighed over 40 pounds; this year's stack of bills is only about 1,500 pages long but it's almost a foot high.

Last year's deal was done 21 days late and covered 8 of the regular appropriations bill that funded 10 federal agencies; this year's deal covers only 5 of the regular spending bills for 7 agencies, but it's 50 days overdue—more than twice as late as last year.

Last year, the negotiators added more than \$20 billion in extra spending; this year, they only added a little more than \$6 billion.

And last year, the whole deal was wrapped up in a single bill that included the text of 7 spending bills and a host of other legislation; this year, we are casting one vote, but it will count as a vote on each of 10 separate bills.

I guess one could legitimately claim, based on those statistics, that this year's deal is not as bad as last year's deal. But like last year, this year's budget-busting behemoth is not amendable by any Member of Congress not involved in the negotiations over the past several weeks. Like last year, the process was deliberately designed to prevent any Member of Congress from changing any aspect of this back-room deal. What a farce.

Mr. President, like last year, this non-amendable budget deal is loaded down with pork, its true cost is obscured by budget gimmickry, and it is

weighed down by policy "riders" that have no place in budget bills.

Before this deal was cut, the Senate had already passed spending bills containing over \$13 billion in wasteful, unnecessary, and low-priority spending that was added without benefit of consideration in the normal, merit-based review process. That's more than the \$11 billion added by Congress for Fiscal Year 1999, and almost twice the \$7 billion wasted in Fiscal Year 1998. On my website, I have published 264 pages of pork-barrel spending projects in the appropriations bills that passed the Senate earlier this year.

The bill before the Senate today contains even more everyday, garden-variety pork-barrel spending—almost half a billion dollars more than in the original bills. Some items which agencies were "encouraged" or "urged" to fund in earlier versions of these appropriations bills have now been earmarked for funding. Other projects that were earmarked in report language are now included in the bill language. Presumably, these further clarifications of Congressional intent were included to improve upon the already near certainty that these pork-barrel projects will be funded ahead of other projects of possibly higher priority or more deserving of the taxpayers' support.

Just a few examples of new earmarks and special interest items in this bill include:

\$2 million for the University of Mississippi for a phytomedicine project.

\$1 million for the Noble Army Hospital of Alabama bio-terrorism program.

\$300,000 for the Vasona Center Youth Science Institute.

\$5 million for the International Law Enforcement Center for the Western Hemisphere in Roswell, New Mexico

\$160,000 for a Mason City, Iowa, bus facility

\$250,000 for the New York Hall of Science in Queens, New York

\$100,000 for the Philadelphia Orchestra's Philly Pops to run a jazz-in-the-schools program in Philadelphia

\$2.5 million for the Dante-Fascell North-South Center

\$1,840,000 for Kansas buses and bus facilities (in addition to the \$1.5 million already provided).

Mr. President, as my colleagues know, over \$7.4 billion of the pork-barrel spending in this year's budget is in the defense budget, including almost \$1 billion in low-priority military construction projects. This waste is disgraceful at a time when the Army's most recent assessments of its forces show none of the Army's divisions is rated at the highest state of readiness, or C-1. Not one of our Army divisions has the resources and training to undertake the wartime missions for which they are ordered to be ready. Shortfalls in personnel, parts, and funding, combined with extended de-

ployments on peacekeeping and other contingency operations, have contributed to a serious decline that puts our soldiers at greater risk if a conflict were to erupt, and threatens the ability of our forces to prevail. This is a disgrace and an abomination that the American people will not tolerate.

Mr. President, for those who wonder how these projects are paid for, let's look at the clever budget gimmicks that are included in this deal.

First, there is the "emergency" spending designation, which most reasonable people assume should be used only for disasters, emergencies, and other unforeseeable happenings. Well, in this deal, the Congress has expanded somewhat the definition of "emergency" to include: the 2000 census, which we've known about since the Constitution was written, routine military training and base operations, and even the Head Start program.

So-called emergencies in this year's spending bills add up to \$24 billion. Some of the uses of these funds are truly emergencies, such as alleviating severe economic hardship on small farmers or assisting those devastated by hurricanes. But over half of the emergency funds are designated as such in a blatant effort to avoid the discipline of the budget caps. The reality, however, is that "emergency" spending must still be paid for by tax revenues. And the tax revenues that will pay for most of these emergencies are those generated by Social Security taxes, that are supposed to be reserved to pay benefits for retirees.

Another gimmick is the use of "forward-funding", whereby money is appropriated for projects or programs, but it cannot be spent until the first day of the next fiscal year. This money is not counted against this year's budget caps, but again, it is real spending that must be paid for next year, within even more stringent budget caps.

Using the "forward funding" gimmick, a staggering \$10 billion for job training, medical research, and education grants is pushed into next year, potentially impairing the management and effectiveness of these programs. In addition, the Department of Defense is directed to delay timely payments on its contracts to save \$2 billion. This gimmick will result in higher costs for the Pentagon because of late payment fees and disruption in programs under contract.

Mr. President, most disgraceful, however, is a new gimmick that will delay paychecks for all military personnel and federal civilian employees for three days from September 29 to October 2, 2000. For the sake of a few billion dollars worth of pork, the Congress is withholding hard-earned pay from those who volunteer to serve their nation in the military or as a civil servant.

The potential impact on these men and women and their families is im-

measurable. Many may have to pay late fees on rent or other bills and penalties and higher interest on credit cards. Some families, especially those who already are forced to subsist on food stamps, will have to struggle doubly hard to put food on the table while they wait for the Congress to pay them for their service.

Mr. President, I find it absolutely outrageous that the Congress would attempt to balance this pork-laden budget deal on the backs of our men and women in uniform. Is this the way we show our respect and appreciation for those who are willing to put their lives at risk for all of our freedoms? Is this the way we repay the families of our service men and women who spend many months and years separated from their loved ones during wars and overseas assignments? This is disgraceful, and I am ashamed that the Congress would take this action against those whose duty and sacrifice we should honor, not abuse.

Mr. President, I think it is important that the American public know that this paycheck slip gimmick—a gimmick that denies our proud men and women in the military, and hard-working people who work for the government the pay they have worked for and deserve—this gimmick does not affect the Congress. No one who works on Capitol Hill will get their paychecks even a day late. No one who was involved in negotiating this abominable deal—not Senators or Congressmen or their staffs—will get their paychecks late. Clearly, this demonstrates to the American people the Congress' opinion of its own importance.

Several other gimmicks abound in this deal—transferring surplus funds from the Federal Reserve into general revenues, improved collection of student loans, and more rescissions of funding from various programs, totaling several billion dollars in claimed savings.

And finally, in order to get closer to balancing the books on this budget deal, the negotiators picked and chose among the cost estimates provided by the competing budget scorekeepers for the Congress and the Administration, taking the lowest estimate they could find for each program so that they could squeeze more pork into the deal. The negotiators claim that their deal costs about \$17 billion less the Congressional Budget Office estimates. What this means is that, despite vehement claims to the contrary, \$17 billion of the Social Security surplus will be used to pay for the waste and largesse in this budget deal. Taking another \$17 billion from an already financially unstable Social Security system will only exacerbate the fears of many Americans about their retirement security.

Ironically, Mr. President, none of these specific gimmicks yielded enough "savings" to bring the budget deal

back under control and keep our hands out of the Social Security cookie jar. And since no one was willing to volunteer cuts in any of their special interest programs, the negotiators took the easy way out. Rather than setting budget priorities, like any American family must do to make ends meet, the negotiators resorted to an across-the-board cut of about \$2 billion.

At first glance, one would think that the President, who so stridently objected to this indiscriminate cut when he vetoed an earlier bill, would have objected to its inclusion in this deal. But it seems that the negotiators decided to give the President a whole lot of flexibility in choosing the programs that will be cut. For example:

If the President doesn't want to cut the White House travel budget by four-tenths of a percent, he can instead cut funding for the National Security Council staff.

If he doesn't want to cut the staff budget of the Attorney General, he can instead cut the funding for the Waco investigation or take a million dollars out of programs to prevent violence against women.

If he doesn't want to cut the administrative accounts of the Secretary of Education, he can cut Head Start by another couple million dollars.

If he doesn't want to cut the drug czar's office expenses account, he can cut \$200,000 or more of the funding for the anti-heroin strategy.

If the President doesn't want to cut four-tenths of a percent of the funding for any one program, he can instead cut up to 15 percent of any line item approved by the Congress in any appropriations bill this year to get the savings.

Even though I clearly don't think Congress has done a very good job of allocating resources among our nation's priorities, why in the world would the Congress cede to the President the ability to decide where to take almost \$2 billion from programs that have been approved by Congress through the appropriations process? Frankly, I recommend that the President take that money out of the \$13 billion in pork that the Congress added to the budget.

Finally, Mr. President, let me take a moment to talk about the policy "riders" that have found their way into the appropriations process this year. As my colleagues know, the Senate has a rule—Rule 16—that is supposed to prevent the inclusion of legislative or authorizing provisions in spending bills. In fact, the Senate voted earlier this year to reinstate that rule. Unfortunately, when a process moves behind closed doors, these "riders" seem to proliferate.

There were over 65 legislative riders on the appropriations bills that passed the Senate earlier this year, but it seems that every time I turn around, I

hear about another issue that will be rolled into this non-amendable budget package.

Perhaps that is a result of the fact that these end-of-the-year budget deals are usually negotiated by Members of the Appropriations Committee, rather than the authorizers. Or it may be driven by the need to garner support for the deal from Members who may have a special interest in an issue. Whatever the reason, the inclusion of legislative matters thwarts the very process that is needed to ensure that our laws address the concerns and interests of all Americans, not just a few who seek special protection or advantage.

Some of these riders are not necessarily objectionable to me, but the circumvention of the authorization process that took place makes me unable to benefit from the advice and recommendations of the committees of jurisdiction and their members. I should note, however, that many of the reported efforts to add riders to the bill were unsuccessful, for which I applaud the negotiators. However, most of the 32 new riders in this bill are highly objectionable because of their content as well as the process that led to their inclusion in this budget deal.

For example, one of the last-minute riders in this legislation would grant a new lease on life to the milk cartel known as the Northeast Dairy Compact, which milks consumers in New England by providing an above-market price to the region's dairy farmers. The compact is set to expire under a bill this Congress passed in 1996, but the pending legislation would reverse this "Freedom to Farm" reform. The legislation before us would also overturn milk pricing reforms mandated by Congress in 1996, supported by our Department of Agriculture, and ratified by the nation's dairy farmers in a referendum last summer. These reforms were developed by USDA over a three-year period and reflect a consensus-based approach worked out with America's dairy farmers and producers. Consumer groups estimate that blocking milk pricing reform in favor of the current system, as this legislation does, will cost consumers across America between \$185 million and \$1 billion a year—a sharp blow to low-income individuals, who spend more on dairy products as a portion of household income. I cannot in good conscience support the repeal of market-oriented reforms passed by a Republican Congress in 1996 to benefit American consumers. I fear that, yet again, a narrow core of special interests has trumped the people's interest in consumer-oriented milk pricing and marketing reforms.

Another last-minute rider will carve out liability exemptions for certain recycling businesses under the Superfund law. Although these same provisions are under consideration in a separate

bill as well as part of a broader Superfund reform effort, this rider affords special treatment to a small group of affected industries with a last-minute add-on that is another of a targeted special interest deal. Superfund reform is important to our nation, yet such piece-meal measures can thwart the intentions and progress of those who have made good-faith efforts to work through a legislative process.

Regarding the inclusion in this deal of the restoration of certain Medicare benefits, in 1997, Congress made some difficult, but necessary changes in the financial structure of the Medicare system as a part of the Balanced Budget Act. These changes were needed to strengthen the system and delay its impending bankruptcy from 2001 until 2015. These reforms allowed us to preserve and protect the Medicare program while increasing choice and expanding benefits for beneficiaries.

However, at the end of last year, many of us began hearing from health care providers and seniors about the unintended negative consequences which certain provisions may be having on current beneficiaries and providers in the Medicare system. There has been increasing concern that certain reimbursement reductions and caps contained in the Balanced Budget Act could result in access problems for our nation's seniors if they were not adjusted this year. Personally, I have grown increasingly concerned about this problem, particularly about the negative impact on health care delivery which it may pose for our nation's most frail or rural elderly.

While I support the overall intentions of these provisions, I am concerned about provisions which have been slipped in to benefit only a select area or specific companies, rather than addressing the national problem of access to safe, quality and affordable health care for Medicare recipients. For example, hospitals in Iredell County, North Carolina; Orange County, New York; Lake County, Indiana; Lee County, Illinois; Hamilton-Middletown, Ohio; Brazoria County, Texas; and Chittenden County, Vermont are given special consideration for reimbursement under the Medicare program. Wesley Medical Center in Mississippi as well as Lehigh Valley Hospital are given special reimbursement consideration under this bill. Meanwhile, the District of Columbia, Minnesota, Wyoming and New Mexico are provided increases for their hospitals. Sadly, Congress has once again taken a well intentioned piece of legislation and inserted provisions directly benefitting only a select few at the expense of all taxpayers.

Finally, Mr. President, nothing would please me more than being able to endorse all the satellite television provisions included in this appropriations bill. Some of them are good news

for satellite TV consumers, who would gain the ability to receive local TV signals as part of their satellite TV service package, have discontinued distant network TV station signal service restored, and be relieved of unfair limitations on their ability to subscribe to distant network signals when their local network stations are unwatchable off-air. Cable TV subscribers would also be indirect beneficiaries, because anything that makes satellite TV a more attractive alternative to cable TV increases the cable operators' incentive to keep monthly rates in check. Considering the fact that cable TV rates have increased more than 20 percent since the passage of the 1996 Telecom Act, cable subscribers more than deserve this kind of break.

Despite all this, and despite the fact that I have worked for over a year and a half to bring procompetitive relief to satellite TV and cable TV subscribers, I find myself having to speak out against some of the other satellite TV provisions that also appear in this bill.

Why? Because these other provisions substantially undercut the bill's promised consumer benefits. Why, then, were they included? To protect special interests—in this case, the TV broadcasters, the TV program producers, and the professional sports leagues.

The primary special interest benefitted by these new provisions is the TV broadcasters. Under the law they're considered to be "public trustees," and as such they have enjoyed considerable protection against competition, thanks to the Congress (which fears the power of the local network stations) and to the FCC (which fears the Congress).

Nevertheless, neither Congress nor the FCC can hold back technology, and local broadcasters have increasingly found themselves subjected to competition from new multichannel video technologies—first cable TV, and now, satellite TV. So the last thing the broadcast TV industry is receptive to is the prospect that satellite TV might be able to increase its competitive power and thereby lure more of the local broadcast audience—and revenue base—away.

That was one of the reasons why local broadcasters finally sued satellite TV companies that were offering distant network TV stations to subscribers who technically weren't entitled to receive them—even though many of these subscribers had, in fact, been receiving them for years without causing any apparent harm to local stations. The lawsuit was successful, and as a result many existing satellite TV subscribers found their distant network stations suddenly dropped, even when they couldn't get satisfactory off-air service from their local stations.

Not surprisingly, this led to widespread consumer protest. The House and the Senate Commerce Committees passed legislation that, taken together,

would have solved satellite TV consumers' problems without inflicting material harm on broadcasters. But the legislation before us today contains a number of new provisions that will hurt satellite TV consumers and serve no purpose other than protecting the congruent interests of the well-heeled TV broadcasters, program producers, and professional sports leagues. These new provisions will adversely impact the very competition Congress claims it's trying to enhance, and the very satellite TV consumers Congress claims it's trying to help.

The first of these objectionable new provisions directly affects the ability of satellite TV companies to offer their subscribers local TV stations. Specifically, it governs the process whereby satellite TV companies negotiate with the TV networks for the rights to carry their local affiliates.

This issue has always been one of considerable concern because the TV networks have the stronger bargaining position, and the incentives, to extract unfair prices and conditions from satellite TV companies in return for giving them the right to carry local affiliates. Satellite TV companies' inability to offer local network stations has been cited repeatedly as the principal competitive disadvantage satellite TV companies face. The TV networks, therefore, begin with a strong bargaining advantage. Added to this is the fact that the networks also hold substantial cable TV programming interests, which increases the possibility that they could seek to extract further competition-dampening conditions that would serve the interests of their cable-channel partners. And, of course, the fact that the networks' local affiliates have been in litigation with the satellite TV industry adds to the concerns about the networks' incentives to withhold consent to carry their local affiliates unless, and until, the satellite TV carriers agree to whatever onerous and unfair terms and prices the networks might choose to dictate.

Now let's see how this legislation deals with this critical issue. Not only does this legislation omit fair-dealing requirements that had been included in the House bill; it adds a new provision, dictated by the broadcast industry, that makes a mockery of any notion of fair dealing.

This new provision gives satellite TV companies a six-month "shot-clock" to negotiate and obtain a signed retransmission consent agreement from a TV network for carriage of its local affiliate. During this time the satellite TV company could begin offering the station to its subscribers.

But there's a catch if, at the end of six months, the satellite TV company doesn't get the consent. First of all, the broadcaster, and only the broadcaster, is allowed to file a complaint and request a cease-and-desist order

from the FCC. Moreover, the legislation doesn't simply deprive an aggrieved satellite TV company of the ability to file a complaint against an unreasonably recalcitrant broadcaster; it goes further, and specifically denies the satellite TV company any right to claim that the broadcaster didn't negotiate in good faith. These patently unfair provisions are complemented by penalties so stringent that no satellite TV company in its right mind would knowingly risk them.

Let's examine exactly what this is will mean in real terms. The big benefit that satellite TV consumers are supposed to get from this legislation is local signals, and their ability to get local signals depends on their satellite TV company's ability to close a deal with the networks, which have strong bargaining power and palpable disincentives to deal dispassionately. So what does this new provision do? It deletes the substantive provision that would have provided a statutory guarantee of fair dealing, adds a complaint process front-loaded to benefit the party that has the stronger bargaining position and the incentive to deal unfairly, deprives the party that's in the weaker bargaining position from raising unfair treatment as a defense, and imposes huge penalties on the party with the weaker bargaining position if it fails to enter into an agreement before the six-month deadline expires.

In practical terms, this presents any underdog satellite TV companies that don't already have retransmission consent agreements with a set of Hobson's Choices when it comes to offering local stations. They can, of course, simply not begin carrying local stations unless and until they have the required retransmission consents. That's the safest thing to do. But if they don't start carrying local signals right away, they certainly won't be offering their customers the "local stations by Christmas" promised by those who back this legislation. In addition, they'll not only be perpetuating the competitive disadvantage they already face when it comes to competing with cable TV; they'll be incurring a completely new competitive disadvantage when it comes to competing with other satellite TV companies that already have agreements. If, on the other hand, a satellite TV company begins offering local signals before obtaining the necessary agreements, it entails the risk that if the six month negotiation period runs out without mutually-acceptable terms having been reached, the satellite TV company will have to either drop the local signals or agree to whatever terms the network wants.

Pretty clearly, the effect of this new provision is pro-broadcaster, not pro-consumer or pro-competitive. But it's not the only new provision that protects special interests at the expense of the public's interest. This legislation

also protects local network TV stations from any action by the FCC to change an outdated 50-year-old law whose effect is to prevent many satellite TV subscribers from receiving additional distant network stations.

The legislation's new program blackout provisions are another Congressional valentine to special interests. These provisions could result in blackouts of scheduled network programming, non-network programming, and especially sports programming, on the distant stations satellite TV consumers get. This will make the broadcasters and TV program producers happy, at the expense of making millions of satellite TV consumers unhappy when uninterrupted reception of distant station programming becomes a thing of the past. The sports programming that so many satellite TV consumers enjoy is at the greatest risk. In a special favor to the NFL and the other professional sports leagues, the legislation will require satellite TV carriers to black out sports programming on distant network stations unless the FCC finds it's "economically prohibitive" for the satellite TV company to do so—a standard that virtually guarantees blackouts. And when these blackouts are imposed, no existing satellite TV subscriber—not even those who have their distant network signal service restored, or the big backyard dish owners who were the very first satellite TV subscribers—would be exempt, no matter how long they have received multiple distant stations without blackouts and without inflicting any detectable harm on any of the special interests at whose behest these new provisions were added.

Rather than prolonging this discussion further, let me sum up. Before you now is the latest example of how special interests can, and do, make Congress shape legislation to suit what they want, rather than what average Americans need and deserve. At some point, the American people will get fed up, and the ability of special interests to exercise unwarranted influence like this will be constrained. Unfortunately, that's not going to happen today, and therefore I will close—but not without some promises that, I assure you, I intend to keep.

I will continue to do everything I can to make sure that satellite TV consumers are helped, and multichannel competition improves, after this legislation is enacted. I will convene the Commerce Committee early next year to examine how competition and consumers are being affected by this legislation. I will introduce and I will move new legislation to correct any problems we see.

I will also make sure that the FCC does all it can to help Congress serve the interests of satellite TV consumers and multichannel video competition. To begin this process I will send a let-

ter tomorrow to FCC Chairman William Kennard, requesting that the Commission establish, as quickly as possible, the minimum requirements for bargaining in "good faith" for retransmission consent agreements, and submit recommendations to Congress, as quickly as possible, on further legislation that will redefine what constitutes a "viewable" local TV signal. This will remove the problem that keeps satellite TV subscribers from getting as many distant TV stations from their satellite TV companies as they otherwise could.

All these measures will enable us to cure the problems these particular special-interest provisions will cause. In the meantime, it's helpful to recall that in the final analysis they won't affect our everyday lives as profoundly as other special interests do when it comes to other legislation. The provisions before us today won't determine how much we must pay in taxes, how we are permitted to educate our children, how we obtain health care, or how our seniors will be protected. But in spite of that, they will serve to remind us—when we watch satellite TV or open our monthly cable TV bills—that, when it comes to legislation pending before Congress, no corporate issue is too small, and no consumer issue is too big, to avoid the pervasive grasp of entrenched special interests.

Mr. President, I cannot support this budget deal.

I wonder, Mr. President, when will we begin to listen to the American people? When will we take heed of the absolute cynicism about the ways of Washington? When will we reform the way we do business so that we might reclaim the faith and confidence of the people we are sworn to serve?

Sadly, we seem never to learn. The last-minute, end-of-year budget agreement has become a yearly ritual and a tired cliché.

Mr. President, we have all year to complete our business in a responsible manner like grownups. But every day, at great expense to the taxpayers, we whirl about in our self-importance, never to be diverted from playing at our pathetic partisan political games.

After all the hearings, paper-shuffling, and speech-making, the taxpayers' hard-earned money is spent according to the whims of a massive, hastily compiled budget deal that contains lots of goodies for Members of Congress and special interests, but very little for the American people—an annual monument to our arrogance that is chock full of pork-barrel spending, special-interest riders, and clever budget gimmicks, but not one morsel of family tax relief.

Mr. President, in just a few short weeks, we will usher in a new century and a new millennium. This is a time of renewal and reform. Just as individual Americans take stock of them-

selves and resolve to do and be better, perhaps we elected officials might resolve to set a better example in the way we conduct the people's business. Perhaps in the year 2000, we might address ourselves not to partisan gridlock and political games, but to restoring the people's faith in their elected leaders. Perhaps next year we can spare the American people the grim faces and high drama of the last-minute budget summit, and simply do our work responsibly, in the open, and on time.

Maybe then we can restore the confidence in our public institutions that is so badly flagging, but is so essential to making the new century worthy of the highest dreams and aspirations of the people we are privileged to serve.

Mr. LUGAR. Mr. President, I will vote for this final appropriations package, because I believe that, on balance, it is a good product. However, the situation we are in today is hauntingly familiar to that of a year ago, and my disappointment in the appropriations process continues. Last minute budgeting makes sound decisions increasingly difficult. We should reform the appropriations process to safeguard the interests of taxpayers and achieve a more balanced use of our time and resources.

We all know that the appropriations process has grown to an inordinate length. We spend months holding hearings and negotiations, crafting sound public policy, only to scrap it in a hasty year-end scramble when we cobble together a bill negotiated by the White House budget chiefs and a few members of Congress. A 1996 CRS study revealed that budget matters eat up 73% of the Senate's time. I can't imagine we spent much less time on budget matters this year.

As I have been recommending since 1993, along with our distinguished Budget Committee Chairman and many other Senators, Congress should adopt a two-year budget cycle, and do the budgeting in non-election years. This would double the time available for non-budget policy issues and for carrying out often neglected oversight duties. Our goal must be to engage in lawmaking in the deliberative manner the Founders intended.

Mr. LEVIN. Mr. President, once again the Senate is considering a massive appropriations bill in the final hours of a session of Congress. This one spends more than \$385 billion, contains legislation which rightly belongs in five separate appropriations bills, and other important legislation which doesn't belong in an appropriations bill at all. This is a process which reflects poorly on the Congress both because it represents a failure to get the nation's work done on time, and because the final rush precludes the kind of careful consideration and debate which wise decisionmaking demands. The combination of its enormous size and the

swiftness with which it was thrown together makes certain that Senators will only after the fact learn full details about many provisions which have been added.

Democrats have won critical victories in this bill providing funds for new teachers to reduce class size in our schools, a first installment toward 50,000 new police officers by 2005, the necessary funding to implement the Wye River peace agreement and more than \$514 million for the Lands Legacy Initiative to preserve and safeguard our most precious public lands, as well as funds for after-school programs to benefit 675,000 students. Other needed legislation is included to reverse some of the unintended consequences of the 1997 Balanced Budget Act on hospitals, nursing homes and other health care facilities and legislation to benefit consumers by increasing competition between cable and satellite companies and permitting satellite companies to provide local network signals in local markets. However, like last year, even as I acknowledge some important budget victories, I do not support this process and, on balance, cannot vote for this bill.

Mr. FEINGOLD. Mr. President, as some of my colleagues know, I have been posted, here on the Senate floor, day after day this week because of my concerns about the dairy provisions that are included in the budget package, and I know other Senators support those provisions because of the States they represent. For now, I just want to comment more broadly on the budget package and how we got here.

Mr. President, we have before us a measure that we are told will direct something like \$400 billion in spending in such areas as the Justice Department including the FBI, Education including funding for local school districts, increased security for our foreign embassies, the Interior Department including our national parks system, Health and Human Services including critical funding for aging programs like the congregate and home delivered meals programs, and much more.

But, Mr. President, you would not know that by reading this bill. That roughly \$400 billion in spending is distributed in a few pages of text. With the exception of District of Columbia funding, it's all on one page—the last page.

I have not been here as long as some of my colleagues, but I cannot recall ever seeing anything like this. Last year's omnibus appropriations bill was bad enough. It, too, lumped several appropriations bills together into one giant omnibus appropriations measure. It, too, was loaded with special interest measures that were slipped in, never having been debated, and unlikely to pass on their own. But at least, Mr. President, the spending done in that

bill was explicitly a part of the document formally placed before the Senate. If you took the time to read the several thousand page appropriations bill, you would have found those items last year.

Mr. President, the bill before us is another matter entirely. It legislates by reference. Other than the DC Appropriations bill, there are no details provided in this document that indicate how those hundreds of billions of dollars are to be spent, only references to other bills.

Mr. President, when this bill goes to the President for his approval, what will he be signing into law? Essentially, he will be signing into law little more than a glorified table of contents.

Mr. President, this is a horrible precedent. This kind of gimmick may have been used before, but never on anything so momentous as an omnibus appropriations bill. And it is perhaps fitting that this piece of legislation should be structured the way it is.

This bill is the "poster child" of the 106th Congress. Unable to meet the budget deadline, we are once again presented with an omnibus appropriations bill, laden with the kind of special interest provisions that undermine our budget as well as the confidence of the public. And unwilling to bring any but a handful of authorizing bills to the floor for open debate, the leadership has now crammed this perverse bill full of legislation that has no business in an appropriations measure.

Mr. President, earlier this year this body voted to restore some order to the appropriations process by re-establishing the point of order against legislating on appropriations. This bill renders that exercise utterly meaningless. Worse, it means that while the Senate is precluded from adding authorizing language after thorough debate on the floor, a few people in a backroom are free to add anything they wish, with no debate and out of public view.

Mr. President, the 106th Congress is not yet half over a but it has already earned itself a sorry reputation. This is the Congress of Convenience. The 106th Congress found it inconvenient to finish the simple job of passing appropriations bills before the end of the fiscal year, so it cuts a few backroom deals and lumps five appropriations bills together. The 106th Congress found it inconvenient to debate authorizing bills fully and openly, so it bundled several together and shoved them into this omnibus appropriations bill. And now, the 106th Congress finds it inconvenient to provide even the details of this \$400 billion compost heap, so it engages in some drafting gymnastics, and gives the public little more than a glorified table of contents.

Mr. President, I realize there are some strong feelings about the provisions of this bill. I know that some of my colleagues support some of the pro-

visions in this measure. Chances are there are provisions in this measure that I, too, would support, but how would I know? But I hope that a few weeks from now, after this thing is enacted, my colleagues will consider just what has been wrought this week and this past year. The normal procedures of the Senate and the other body have been run over by a steamroller in the name of political expediency and convenience, and that cannot be good, even for those who may have gained a temporary victory.

In the play *A Man for All Seasons*, there is an exchange between Sir Thomas More and his son-in-law, Roper. More asks Roper—"What would you do? Cut a great road through the law to get after the devil?" Roger responds—"I'd cut down every law in England to do that!" More then replies—"Oh? And when the last law was down, and the devil turned round on you—where would you hide, Roper, the laws all being flat? . . . This country's planted thick with laws from coast to coast—man's laws, not God's—and if you cut them down—and you're just the man to do it—d'you really think you could just stand upright in the winds that would blow then?"

Mr. President, the 106th Congress has done more than its share of flattening our rules and procedures. Those of us in the minority on the issue before us today perhaps feel it most keenly, but let me suggest that many more may come to regret the precedents set by the Congress of Convenience.

Mr. KOHL. Mr. President, before I begin my remarks, I want to express my appreciation for all of the hard work that Senators STEVENS and BYRD, SPECTER and HARKIN have put into the Labor, Health and Human Services, Education Appropriations bill in the face of enormous budgetary challenges. I also appreciate all they have done to accommodate my priorities during this process.

The 20th Century is coming to a close during a time of unprecedented economic growth and budget surpluses. However, as we celebrate our nation's prosperity, we must make sure we don't leave any of our most vulnerable citizens behind. In my opinion, that's what this bill, which funds vital health and education programs in the year 2000, should be about: making a strong commitment to our aging parents and grandparents—who made this country what it is today, as well as to our children—who will determine its future.

I am pleased that this bill takes several important steps in that direction. First, this bill continues to make early childhood education and child care a top priority. I am very pleased that the bill includes a \$608 million increase to the Head Start program. This program gives young children from lower-income families a real chance to succeed by providing educational, health, and other child care services.

Second, I am glad to see that this bill includes a nearly \$30 million increase for States to inspect nursing homes and ensure they are safe. As a member of the Senate Aging Committee, I have had the unfortunate opportunity to hear firsthand about cases of abuse and neglect in many of our nation's nursing homes. Our seniors and disabled deserve the best possible care, and this funding will help make sure they get it. In addition, the bill includes a \$1 million increase for the Long-term Care Ombudsman program. Ombudsmen serve as advocates for long-term care residents and help them to resolve complaints of neglect and abuse. They are a critical component of ensuring the safety of our seniors in nursing homes and other long-term care settings.

I am also extremely pleased that the bill includes another \$100 million increase for Community Health Centers. The number of uninsured in our country continues to grow. Health centers provide treatment to large numbers of uninsured and should be commended for the incredible work they do. This increase will help them meet the increased demand for care, and ensure that patients get the quality health care services they need.

This bill also fully funds the LIHEAP program. This program is vital to low-income families in Wisconsin who need assistance with heating costs during the cold winter months. I am pleased that this bill continues to make this program a top priority.

I am also pleased that in addition to the \$2 billion increase for the National Institutes of Health, report language was included in the bill that targets many of the diseases that are devastating families across our nation. The bill includes report language I requested to increase research into epilepsy, particularly intractable epilepsy, which primarily starts in childhood and affects nearly 75,000 of the 3 million individuals with epilepsy.

In addition, at my urging, the bill also includes \$90 million for the National Institute of Nursing Research within NIH. Nursing research is different from biomedical research but just as necessary. This research focuses on reducing the burden and suffering of illness, improving the quality of life by preventing and delaying the onset of disease, and by looking for better ways to promote health and prevent disease.

I am pleased that the bill also includes report language that strongly urges more research into Alzheimer's Disease. This devastating disease affects nearly 4 million people in the United States, including 100,000 in Wisconsin. The total annual cost of Alzheimer care is over \$100 billion. Searching for new treatments—and ultimately a cure—must be one of our top priorities in biomedical research, to alleviate both the suffering and the costs associated with this awful disease.

I also want to thank Senators SPECTER and HARKIN for their willingness to work with me on some of my other priorities. At my request, language was included in the Senate report to start a demonstration program within HRSA to increase the number of mental health professionals in underserved areas—particularly those suffering from recent farm crises. I am hopeful that HRSA will allocate at least \$1 million toward this initiative.

Funds have also been provided to CDC to expand their efforts to prevent birth defects through the promotion of folic acid among women of childbearing age. I have sponsored, along with Senators ABRAHAM and BOND, a bill that would authorize \$20 million to CDC for this purpose, and I am pleased that this appropriations bill gets this initiative underway. In addition, I am pleased that the Ryan White Comprehensive Care program received an increase of \$86 million to expand services for people living with HIV and AIDS.

I'd now like to talk a bit about funding for education. While I am concerned about the use of advance funding for many of our education programs, I am pleased that this bill provides necessary increases for education. Title I—which provides assistance to disadvantaged youth, received a \$209 million increase, although we must do much better than that in the future in order to serve all Title I-eligible children. I am also pleased that Special Education received a large increase in funding, although we still have a great deal of work to do to live up to our commitment to fund 40% of the costs of the program. We still need to do more in both these areas, but this is a good start.

In addition, I strongly support the \$253 million increase for 21st Century Community Learning Centers, for a total of \$453 million for FY 2000. I have visited several of these afterschool programs in my State and I have seen firsthand how successful and critically important they are. These programs give kids a safe place to go after school, keep them off the streets, and out of trouble. It is supported on a bipartisan basis, by parents, teachers, and police chiefs. Last year, thousands of applications were submitted for only 184 grants. However, I believe it deserves an even stronger investment than this bill provides, which is why I voted for an amendment during consideration of the Senate version to provide \$600 million for this worthy program. Although that amendment failed, I will continue to fight for more funding for after-school programs next year.

This bill also makes greater strides to give students the tools they need to go to college. First, the bill increases the maximum Pell Grant award to \$3,300, and I am hopeful we can further

increase this amount next year. It also increases the Federal Work-Study program by \$64 million. TRIO programs also received a \$45 million increase, and I am pleased that more students will be able to take advantage of TRIO programs that give lower-income students a better chance to go to college. I also strongly support the \$80 million increase for the GEAR-UP program. This program gives many middle school students their first real opportunity to strive toward going to college. I am hopeful that we will further increase funding for this program in future years.

Finally, I am pleased that the conference report maintains and increases our commitment to hiring 100,000 teachers and reducing class sizes in the early grades. Class size reduction efforts have produced tremendous results in Wisconsin and across the nation. It is essential that we continue to provide the resources States and school districts need to put a qualified teacher in every classroom. Our students deserve nothing less.

I am pleased that these important education programs have received increases. However, I also have several significant concerns about the education section of the bill.

First, I am deeply concerned that the bill level funds the Child Care & Development Block Grant. The Senate bill included an amendment, which I supported, to increase funding for the CCDBG from \$1.2 billion to \$2 billion. This amendment had strong bipartisan support because there is now widespread recognition that child care is critical to the success of working families. Unfortunately, this amendment was dropped during negotiations of the conference report. This is a serious mistake, and one that will have serious repercussions for working families. Programs funded by the CCDBG ensure that parents have a safe, educational place to send their children during the workday. Businesses experience less absenteeism and greater productivity when their employees know their children are well taken care of. When families who need quality, affordable child care are able to find it, everybody wins. It's that simple. I strongly believe that we must renew our commitment to expanding access to child care, and I will continue to make child care funding a top priority and fight hard for future increases.

Second, and even more importantly, I have serious concerns about the bill's substantial use of advance funding for education. I am not convinced that this practice is completely benign, and I believe we must watch carefully how the delayed release of education funds impacts school budgets.

However, I have an even deeper concern about the use of advance funding. The hard truth is this: we would not be forced to use advance funding, nor any

budget gimmicks at all, if this bill received the priority it deserved. This bill, which funds our most basic needs—health care and education—was left for dead last. It was raided repeatedly to fund other programs, leaving it at one point with a more than \$15 billion shortfall. We would not be in the budgetary box we find ourselves in today if this bill had been the top priority it should be. I hope that in the future my colleagues on the other side of the aisle will have the will to pass this bill early and send a strong message that education and health care are our top priorities, not our last.

Besides education, there are several other areas of the bill that I believe must be improved in future budgets. First, while I am pleased that the bill sets aside \$19.1 million in the Child Care & Development Block Grant for Resource and Referral programs, I am concerned this just isn't enough. R&R programs serve as a resource to help parents locate quality, affordable child care in their communities. When parents need child care, they call R&R agencies, who have the tools to direct parents to appropriate child care providers in their area that meet each family's unique needs. With growing numbers of parents entering the workforce, the need for R&R is greater than ever. I would like to continue to work with Senators SPECTER and HARKIN, as well as all of my colleagues, on increasing this set-aside to \$50 million to meet the increasing demand for referral services.

I am also very concerned about the cut in the Social Services Block Grant. The State of Wisconsin and our counties rely on SSBG to fund a variety of social service programs. These include supportive home care and community living services for the elderly and disabled, drug and alcohol abuse treatment, temporary shelter for homeless families, and child abuse prevention and intervention services. States and counties rely on these funds, and it is wrong to renege on our commitment to SSBG funding.

I am also very concerned about programs for senior citizens under the Older Americans Act. I am pleased to see that the bill includes a \$35 million increase for home-delivered meals to seniors. However, we must also find a way to make a stronger investment in the Supportive Services and Senior Centers program. This program provides funds to Area Agencies on Aging, which in turn provide a wide range of assistance to frail elderly. In addition, we must also provide assistance to the growing number of Americans who are taking care of elderly and disabled relatives. I am a cosponsor of the Family Caregiver Support Act, which provides \$125 million in assistance and respite for caregivers. Unfortunately, this bill does not fund this necessary program, but I hope we can enact it into law quickly next year.

The National Senior Service Corps is a program we should all be proud of and support increased funding. These programs utilize the skills and experience of older Americans in our communities. Foster Grandparents, Senior Companions, and RSVP give seniors a chance to work with children, families and other seniors, and we are all the richer for their contributions. I am pleased that the bill includes increases for these programs, and I believe we must provide more in the future lest we waste this priceless resource we have in our seniors.

In addition to the Labor, HHS component, this Omnibus Appropriations bill includes some desperately needed relief for our nation's health care providers. The Balanced Budget Act of 1997 included many provisions that reduced Medicare payments further than Congress intended. Providers have been forced to reduce benefits or worse—many providers in my State and across the nation have closed altogether. I have strongly supported efforts to alleviate those cuts and have worked with many of my colleagues over the past year to fight for a solution. I am pleased that the Conference Report includes provisions to assist hospitals, home health agencies, skilled nursing facilities and other providers. In the end, Medicare beneficiaries are the ones who truly benefit, and this bill will help ensure that seniors in Wisconsin and throughout the nation continue to receive the health care services they need and deserve.

Overall, I believe this is a good bill, and I commend the Chairmen and Ranking Members of the Appropriations Committee and the Labor, HHS Subcommittee, as well as the Finance Committee, for their hard work. Unfortunately, because unrelated dairy provisions that I strongly oppose were included in this conference report, I reluctantly must vote against it. However, I want to make clear that I strongly support the vast majority of the increases in this bill—increases that will go a long way toward ensuring that our children and our elderly receive the important services they need. I want to thank the Chairman and Ranking Member of the Subcommittee for doing such a great job this year under such difficult budgetary circumstances, and for their willingness to work with me on items of concern to me and my State. I look forward to working with them again next year on this vitally important bill.

Mr. ROTH. Mr. President, I intend to support the consolidated appropriations package. This large legislative package—the result of hard work by many on both sides of the aisle—provides funding for a number of programs which are important and affect people in a direct way. This bill includes funding for programs under the D.C. Appropriations bill, the Interior Appropria-

tions bill, the Foreign Operations Appropriations Bill, the Commerce-Justice-State Appropriations bill, and the Labor-Health and Human Services-Education Appropriations bill.

In addition, incorporated in the legislation are other important measures, including the Satellite Competition and Consumer Protection Act, provisions important for dairy farmers in my State, the State Department Authorization bill, and our Medicare refinement plan. As with any product this large and with as many compromises which were necessary to move the process forward, there will be provisions with which one will disagree.

While this is certainly a substantial legislative undertaking, I would point out that nearly all of the matters contained in this package have previously been debated in full by the Senate and passed by wide margins.

Mr. President, I would like to highlight some provisions contained in this legislation for which I have advocated. This legislation will continue the Trade Adjustment Assistance program.

Earlier this month, my distinguished colleague on the Finance Committee, Senator MOYNIHAN, and I, stressed the importance of this program for our American workers during the debate on the Africa Trade bill. The Africa Trade bill passed by the Senate extended the authority for the TAA program which lapsed in June of this year. As time did not permit us to resolve our differences with the House on the trade package, we needed to insure that the benefits to workers displaced from their jobs as a result of trade activity be continued. I am very pleased that this provision is included in this package.

The package also includes the Satellite Copyright, Competition, and Consumer Protection Act. My State has over 30,000 households which depend on satellite dishes for their television programming and I have long advocated a modernization of the laws affecting satellite television programming. I am also pleased that an agreement was reached to have the Senate consider legislation which will facilitate satellite local to local service in small and rural markets, as this will be important to bring local programming to my constituents.

I have joined with my colleague from Delaware, JOE BIDEN, in sponsoring legislation to continue the important programs he has championed—the COPS program and the Violence Against Women Act. This measure provides funding for these programs. Also contained in the package is funding for the State Side program under the Land and Water Conservation Fund. I had joined with our late colleague, Senator Chafee, in sponsoring legislation to provide these funds for the first time in several years to promote open space and recreation opportunities at the discretion of our State governments.

The package maintains the commitment we made with the passage of the Balanced Budget Act in 1997 to prioritize education. Since the passage of the 1997 bill, we have followed through with substantial increases in funding for our important education programs and have done so in a manner which promotes flexibility.

Finally, Mr. President, I would like to discuss the Finance Committee's Medicare, Medicaid, & SCHIP Refinement Act of 1999, H.R. 3426.

A little more than two years ago Congress passed and the President signed into law the historic Balanced Budget Act of 1997. This important legislation has been instrumental in making possible the budget surpluses we are beginning to see materialize.

However, not all of the consequences of the Balanced Budget Act have been positive, and many of them were unintended. Two years of implementation allowed us to identify some areas, particularly related to Medicare provider reimbursement, that needed to be revisited.

The Finance Committee carefully monitored the impact of the Balanced Budget Act on various categories of health care providers. In fact, this year the Committee held a number of hearings on Medicare and Medicaid matters.

Throughout the course of these hearings, providers presented us with compelling testimony about significant fiscal and patient care-related problems that have resulted, unintentionally, from decisions the Congress made in the Balanced Budget Act of 1997.

Mr. President, let me be clear that we should be proud of the program improvements and the corresponding savings achieved through the Balanced Budget Act. We had no intention of fundamentally undoing that work.

However, there were problems that needed to be addressed to make sure we pay providers appropriately to meet the real health care needs of Medicare beneficiaries. At passage, the 1997 BBA reduced Medicare and Medicaid spending by nearly \$120 billion. This package restores \$27 billion over 10 years to address unintended consequences of the original law.

New provisions in this bill restore some \$17 billion in funding over 10 years. Accordingly, in October, the Committee marked up and overwhelmingly passed a package of payment adjustments to fine tune the policies enacted through the Balanced Budget Act. This package was developed in a bipartisan manner with the close cooperation of Senator MOYNIHAN and his staff.

For the past several days, we have been working to reconcile this Finance Committee package with a similar bill passed by the House of Representatives last Friday.

The bill before us today represents an excellent compromise between the

House and Senate bills, with input from the Administration.

The payment adjustments included in the House-Senate compromise package will benefit Medicare beneficiaries by improving payment to all sectors of the health care market place—including hospitals, physicians' offices, nursing facilities, community health centers, and home health care agencies, among many others. In addition, the package includes other technical adjustments to Medicaid and the State Children's Health Insurance Program.

The provisions included in the package are consistent with a few basic goals I have tried to work toward from the beginning of this process. First, I felt that the overriding purpose of this package should be to address the most significant problems resulting from BBA policies.

In my view, larger Medicare reform continues to be an important objective. However, even the White House ultimately agreed this was neither the moment nor the legislative vehicle by which to pursue that goal.

The Senate Finance Committee will continue in its efforts to develop a bipartisan consensus on broader Medicare reform when we resume our work in January. That will be the time and place to consider lasting and far-reaching Medicare reforms.

Second, we sought to keep payment adjustments focused on areas in which we face demonstrated problems resulting from the Balanced Budget Act. Furthermore, we tried to make short-term adjustments in payment practices without revisiting the underlying policies set forth in the BBA.

Finally, it was particularly important to me not to let this become a partisan process. These are not partisan issues and I have tried to resist any effort to make them so. I am hopeful that this compromise can be supported by all Senators.

The provisions included in the package reflect the priorities of Senators on and off the Finance Committee. In addition, like all of you I have consulted extensively with my own constituents in Delaware, as well as with national health care and beneficiary organizations. They are strongly supportive.

Mr. President, the provisions included in this conference agreement make some significant contributions to protecting the care provided to seniors in nursing homes. We provide increased funding for medically complex patients and for rehabilitation services in nursing homes, and we help these facilities' transition to the new payment systems required under the Balanced Budget Act. The Agreement also includes something I consider to be of vital importance to Medicare beneficiaries; we put a moratorium on the arbitrary annual dollar cap on the amount of rehabilitation therapy services a beneficiary could access. In addition,

we mitigate the impact of scheduled reductions for home health agencies, increase funding and regional payment equity for teaching hospitals, and enhance programs for rural health care facilities.

The Conference Agreement also includes important protections for hospitals as the new outpatient prospective payment system goes into effect next year. I am especially pleased at the steps we have taken to stabilize the Medicare+Choice program, so that beneficiaries can count on Medicare health plan choices in the future.

Mr. President, today we have an opportunity to solve the problems that have been interfering with the ability of the provider community to make sure our constituents receive the high quality health care they deserve, without retreating from the important policy reforms enacted in the Balanced Budget Act. I ask all of you to join me in supporting this important legislation.

Mr. GRAHAM. Mr. President, today, the Senate is considering a multi-billion package focused on adjusting certain Medicare provisions in the Balanced Budget Act of 1997.

That historic legislation made changes in payment structures for programs and providers within Medicare and Medicaid.

Many in the Medicare provider community are concerned that these changes have negatively affected their ability to provide adequate access and quality care to their patients.

Mr. President, I commend the Administration and my colleagues for completing the difficult task of designing a bill that addresses many of these concerns.

I have heard from hospitals, physicians, community health centers and a variety of other Medicare providers, all of whom are very concerned that the quality of care provided to Medicare beneficiaries may decline significantly if cuts to provider payments are not softened.

There are many provisions in this bill that I would like to see enacted. These include a moratorium on the \$1500 therapy cap, support for the skilled nursing facilities, cancer centers and disproportionate share hospitals, and enhancements to Medicaid and the Children's Health Insurance Program.

But while there is some clear evidence that Congress may have erred in designing some of the Medicare provisions in the Balanced Budget Act, that fact does not relieve us of our fiduciary responsibilities to the American public.

Our commitment to revisiting Medicare provider adjustments must be accompanied by a commitment to pay for these actions.

By refusing to pay for this bill, we are funding changes to a balanced

budget agreement in a way that steals from future generations.

This is an irony we cannot afford.

Mr. President, allow me to explain.

To date, we have spent all of our anticipated revenue for Fiscal Year 2000. Any further government spending comes straight from the Social Security surplus.

It is easy to spend money when it is not your own.

Didn't we prove that during the last thirty years of "borrow and spend" budgeting—a period in which our national debt rose from \$366 million in 1969 to \$5.6 billion today?

Let's not start down that slope again.

Mr. President, I clearly remember the day we passed the Balanced Budget Act in 1997. We all congratulated each other on a job well done.

We slapped each other on the back and took full and deserved credit for balancing the budget for the first time in a generation.

Now we are facing up to some of the realities of that great achievement.

Just as we took responsibility for our accomplishments in 1997, we must now take responsibility for fixing some of our mistakes.

If Congress believes that provider relief is necessary, then it must exercise fiscal responsibility and pay for it with true offsets—not surplus funds.

Congress has clearly stated that ensuring retirement security for the American public is its top priority.

Democrats and Republicans have made clear that saving Social Security and Medicare must be the first items of business on any legislative agenda.

But future generations are depending on our deeds—not our words.

Mr. President, we must hold true to our commitment to ensure Social Security's solvency until 2075 and to strengthen and modernize Medicare before we look to the surplus for any other purpose.

During his State of the Union Address, President Clinton made a commitment to bolster Social Security and Medicare. Congress has joined him in that commitment.

A test of our commitment to protecting Social Security surplus is being played out on the Senate floor today.

Since the beginning of this debate I have offered proposals to restore payments to providers without stealing from Social Security and Medicare.

When the Finance Committee marked up its bill, I offered an amendment that would have fully offset the cost of this package through a series of modest, non-Medicare-related revenue increases.

It was my hope that the Committee would have shown the same enthusiasm for fiscal responsibility as it did two years ago.

However, it thwarted our commitment to save Social Security and Medicare by a vote of 14 to 6.

I also offered an amendment that would have put a down payment on true Medicare reform, while saving the Medicare system \$4 billion over 10 years—nearly one third of the overall cost of the bill.

This focused on five proven and tested proposals, including a competitive bidding for part B services provision that was passed unanimously by the Finance Committee in 1997.

By fulfilling our obligation to help the Medicare system provide quality care while promoting cost efficiency, this amendment embraced the same principles that helped us achieve a balanced budget in 1997.

But our dedication to these principles now appears to have vanished.

The audacity of paying for this bill with the Social Security surplus is exacerbated by the fact that it includes provisions that actually do away with cost saving programs enacted in the Balanced Budget Act of 1997.

Allow me to direct your attention to two of the less heralded provisions in this package.

First, the postponement of the enactment of the "inherent reasonableness" provision in the Balanced Budget Act of 1997 until final regulations are published. This provision prevents beneficiaries from realizing millions of dollars in savings by blocking the government's ability to negotiate rates with home oxygen and durable medical equipment suppliers.

By reimbursing providers on a market basis, the competitive bidding process will save the system money by setting a true price for medical goods and services, while ensuring that beneficiaries continue to receive comprehensive coverage.

By putting off the implementation of this provision, potentially for years, we are essentially taking \$500 million of potential savings out of the pockets of Medicare beneficiaries.

Second, is the inclusion of the following language in the conference report concerning the risk adjuster for Medicare+Choice plans:

"The parties to the agreement note that in 1997, when Congress required the Secretary to develop a risk adjuster for Medicare+Choice plans, it was concerned that those plans that treated the most severely ill enrollees were not adequately paid. The Congress envisioned a risk adjuster that would be more clinically based than the old method of adjusting payments. The Congress did not instruct HCFA to implement the provision in a manner that would reduce aggregate Medicare+Choice payments. In addition, the Congressional Budget Office did not estimate that the provision would reduce aggregate Medicare+Choice payments. Consequently, the parties to the agreement urge the Secretary to revise the regulations implementing the risk adjuster

so as to provide for more accurate payments, without reducing overall Medicare+Choice payments."

Mr. President, the Health Financing Administration (HCFA) currently estimates that risk adjustment will decrease plan payments by approximately \$10 billion over ten years. This estimate is based on the additional money that plans are paid relative to fee-for-service Medicare after adjusting for health status. Plans that serve a higher proportion of sicker beneficiaries would not see a decrease in payments. Plans that skim the healthiest patients from the Medicare population would see the biggest decrease in payments.

Since first learning that HCFA was planning to decrease plan payments under risk adjustment, lobbyists for the managed care industry have been claiming that congressional intent was for risk adjustment to be budget neutral, and they have been lobbying this issue on the Hill. They tried to get it into the Senate Finance Committee report but were unsuccessful. The language was included in the House Ways and Means committee report, however. The House-Senate agreement language comes straight from the House report.

It's telling that the statute does not explicitly state that risk adjustment should be budget neutral. In addition, it's telling that lobbyists for the managed care industry have not publicly stated that congressional intent was to make risk adjustment budget neutral.

In terms of what congressional intent actually was in BBA 97—I think the story is not entirely clear. It could be that no one thought much about the issue. But regardless of whether you are sympathetic to managed care plans or not, it is disingenuous to claim definitively that congressional intent was not to reduce plan payments in BBA.

This is an outrage Mr. President.

I believe that we should correct mistakes that were made in the BBA and pay for those mistakes. Equally, it is my feeling that we should seize the opportunity to make fundamental reforms to the Medicare program in order to modernize and improve services for Medicare beneficiaries.

In passing this legislation, we are trading fiscal responsibility for fiscal recklessness. We are ignoring innovation in favor of the status quo.

Mr. President, I am committed to working to find a solution to the difficult problem of bringing Medicare into the 21st Century and keeping it solvent.

It was my hope that we would have the opportunity to vote today on a package that represented good public policy and included an offset that upheld our commitment to fiscal responsibility.

I regret that this is not the case.

But most of all, I regret the overt lack of concern that this body has

shown for the future generations whose Medicare and Social Security benefits hang in the balance.

Thank you, Mr. President.

Mr. BIDEN. Mr. President, I am pleased that the Conference Report before the Senate contains the State Department authorization bill.

With enactment of this legislation, we will finally—after three years of effort—approve critical legislation to authorize the payment of nearly \$1 billion in back dues to the United Nations. Enactment of this legislation will serve, I believe, three important purposes. It should finally end the long-festering feud between the U.N. and Washington about our unpaid back dues; it should bring much-needed reforms to the world body so that it can more effectively perform its missions; and it should, I hope, end the debate about the utility of the U.N., and restore bipartisan support in Congress for the U.N. system.

The agreement before us will allow us to pay \$926 million in arrears to the United Nations contingent upon the U.N. achieving specific reform conditions, or “benchmarks,” to borrow the Chairman’s expression.

The first set of these conditions can be readily certified—thereby releasing \$100 million immediately. The second and third set of conditions will be difficult to achieve. But I have great confidence in our ambassador to the United Nations, Richard Holbrooke. And I believe that with the money on the table—that is, with the assurance that the U.S. payment will be available—the reforms will be easier to obtain than they might otherwise be.

The State Department authorization bill contains several other important provisions which I would like to highlight briefly.

First, the bill authorizes \$4.5 billion in funding over the next five years for construction of secure embassies overseas. The tragic embassy bombings in East Africa in August 1998 underscored the current vulnerability of our embassies to terrorist attack. Simply stated, the large majority of our embassies around the world do not meet current security standards. Thousands of U.S. government employees—both Americans and foreign nationals—are at risk, and we must do all that we can to protect them. In addition to authorizing funding, this bill codifies many important security standards, including the requirement of that embassies be set back 100 feet from the street, and the requirement that all agencies be co-located in the embassy compound.

All this is important. But what is essential is that we provide the actual funding. So far, aside from last fall’s emergency appropriations bill, funding for embassy security has fallen far short of need. The President requested \$3 billion in advance appropriations in his budget request, which was rejected

by the Appropriations Committees. We must give our attention to funding this priority matter next year.

Second, the bill provides for the establishment of a Bureau of Verification and Compliance in the Department of State to monitor arms control and non-proliferation agreements. In his plan for the integration of the Arms Control and Disarmament Agency into the State Department, the President proposed that the functions of verification and compliance be handled by a “Special Adviser” to the Undersecretary of State for Arms Control and International Security.

We think the Administration’s proposal is ill-advised. Given the way the State Department operates—where key policy battles are waged among bureaus at the Assistant Secretary level—this “adviser” would be a weak bureaucratic actor, and the function of assuring compliance with arms control treaties and non-proliferation regimes would thereby be unacceptably diminished. Therefore, the conference report includes a provision which requires that this important duty be handled by an Assistant Secretary of State for Verification and Compliance.

Third, the bill reauthorizes Radio Free Asia (RFA) for another ten years. RFA, which was established in 1994 pursuant to legislation I introduced, broadcasts news and information to the People’s Republic of China and other non-democratic states in East Asia. I am pleased that Congress has given its further stamp of approval to this important instrument of American foreign policy.

It is fitting that this bill is named for two devoted public servants who were deeply involved in the development of foreign policy legislation for the last two decades—James Nance and Meg Donovan.

Admiral James W. Nance, known to everyone as “Bud”, served as staff director of the Committee on Foreign Relations for most of the 1990s, working with his long-time friend, the Chairman of the Committee, Senator HELMS. Admiral Nance was a steady hand in guiding the Committee staff for so many years, and was integral to the initial development of the “Helms-Biden” legislation in 1997.

Meg Donovan was long-time staffer for our House counterpart committee, serving under Chairman Dante Fascell. After Chairman Fascell retired, Meg worked closely with the Foreign Relations Committee on behalf of Secretary Christopher, and then Secretary Albright, as a senior deputy in the Bureau of Legislative Affairs. Meg’s advice and counsel was important on dozens of occasions—not only to senior State Department officials but also to our committee.

Bud Nance and Meg Donovan were both deeply committed to a bipartisan foreign policy. They were both taken

from us too soon. It is therefore in tribute to them that we have named this bill—which represents an important act of bipartisanship—in their honor.

THE NEED FOR SMALL BUSINESS SUPERFUND RELIEF

Mr. LOTT. Mr. President, as we end this session of the 106th Congress, it is appropriate to reflect on what we have accomplished and what remains to be done. In particular, Mr. President, I would like to focus on our efforts to enact Superfund reform.

As my colleagues know, I have fought for many Congresses to free our nation’s recyclers from needless Superfund liability. I could not be more pleased to finally accomplish this goal by including the text of mine and Senator DASCHLE’s bill, S. 1528, in this year’s final appropriations package. I know many of you, on both sides of the aisle, join me in celebrating this long-awaited reform of an unfair system.

However, our work is not done, Mr. President. Like the recyclers, thousands of small businesses are needlessly dragged into the Superfund web each year. Although Superfund is intended to clean up the nation’s hazardous waste sites, small businesses are being sued for simply throwing out their trash. Certainly we can all agree that potato peels and cardboard boxes are far from toxic waste.

Yet, another year has gone by without reform for small business. In that year, 165 small businesses in Quincy, Illinois were forced to pay over \$3 million for legally sending trash to the local landfill. In that year, Administrator Browner again publicly stated her desire to get small businesses out of Superfund. In that year, reform efforts were again stymied by those who want to hold incremental reforms hostage to comprehensive fixes.

Mr. President, we had the opportunity this year to enact targeted Superfund reform for small businesses, but we did not do so. Senators and Congressmen on both sides of the aisle, as well as the EPA, agree that we should provide the relief so desperately needed by the small business community. For nearly a decade, inaction has left thousands of small business owners with no choice but to mortgage their businesses, their employees and their future to pay for damage they did not do. Small businesses struggle to survive under the threat of thousands of dollars in penalties and lawsuits—all for legally disposing of their garbage.

That’s why, Mr. President, I will continue to work to free innocent small businesses from Superfund liability. I hope my colleagues on both sides of the aisle will join me in the continued fight for fair treatment of the small businesses that keep our nation’s economy strong.

Mr. STEVENS. Mr. President, I have some comments on issues raised by the conference report to the Interior appropriations bill.

On the matter of contract support costs for Bureau of Indian Affairs and Indian Health Service programs operated by native organizations under the provisions of P.L. 93-638, I am pleased that we have been able to add \$10 million to BIA funding and \$25 million to IHS funding over fiscal year 1999 levels to support additional payments of contract support costs for these programs. This new funding will allow BIA and IHS to bring existing programs' contract support cost payments closer to the full amount of negotiated support and will allow a limited number of new and expanded programs in both agencies to go forward.

However, I am concerned that the tribes have been operating, in the distribution of contract support costs, under the assumption that contract support costs are an entitlement under the law. The House and Senate committees on appropriations have taken exception to that interpretation and have tried to persuade the IHS to change its allocation methodology and to set reasonable limits on the number and size of new and expanded contracts it executes consonant with resources made available by Congress for the payment of contract support costs. The Federal circuit's court of appeals in its October 27, 1999 decision in *Babbitt v. Oglala Sioux Tribal Public Safety Department* (1999 WL 974155 (Fed. Cir.)) has now affirmed that contract support costs are not an entitlement, but rather are subject to appropriations. Contract support cases raising similar legal issues are pending in the 10th circuit court of appeals and in various Federal district courts around the country. The Federal circuit's decision was correct both in its holding and in its reasoning and should serve as precedent for other pending cases. To assume that Congress would create a system in which tribes receive the majority of their contract support costs through funds appropriated to the Indian Health Service or Bureau of Indian Affairs and which requires tribes to seek the balance in court through the claims and judgment fund turns logic on its ear. "Subject to appropriations" means what it says.

The Indian Health Service has made improvements to its distribution methodology in fiscal year 1999 but continues to distribute funds at varying rates for different contracts, compacts and annual funding agreements. More disturbing, the current IHS system pays contractors with high overhead costs (relative to program costs) at the same percentage rate as it pays contractors with low overhead rates, rewarding inefficient operators and creating an incentive to maximize overhead costs.

The bill allows the funding in FY 2000 of a limited number of new and expanded contracts through the Indian Self Determination (ISD) Fund of \$10

million. It is expected that, once the contract support cost total (paid at an average rate not to fall above or below the average rate of payment of contract support costs to existing contractors in FY 2000) for new and expanded programs has reached \$10 million, IHS will not execute any further new or expanded contracts until Congress has provided funds specifically earmarked for that purpose. Existing IHS policy does not permit reduction of existing service providers' funding in order to fund new entrants into the system. This bill does not modify that policy. If funds remain in the ISD fund after all new entrants have been accommodated, those funds should be distributed equitably across existing programs, with particular emphasis on the most underfunded.

The Indian Health Service should include as part of its FY 2001 budget request a detailed cost estimate for new and expanded contracts so that Congress will be aware of anticipated need when it establishes a funding level for an ISD account in FY 2001. Congress and the courts have made it plain that IHS can no longer enter into new and expanded contracts without regard to the level of funding provided for that purpose by Congress. Congress will be aided in its efforts to establish a reasonable level of support for new and expanded contracts if the IHS provides accurate estimates of anticipated need as part of the budget process.

The authorizing committees in the Senate and House are encouraged, in consultation with the Indian Health Service, the Bureau of Indian Affairs and tribal organizations, to develop timely proposals to address the longer term issues surrounding contract support costs, including the apparent contradiction between the self-determination principles laid out in P.L. 93-638 and the legal requirement that contract support costs are "subject to appropriations."

Our committees encourage the transition of employees from Federal to tribal employment as part of self-determination contracts and self-governance compacts and strongly believe that the IHS should not provide disincentives for such transfers. We have noted that each year start-up costs from new and expanded contracts for the previous year are returned to the base for distribution to other contracts. These funds, currently estimated at \$4.5 million, will be available in FY 2000. With my support, the House and Senate Committees on Appropriations will soon be sending a letter to the IHS requesting that it set aside a portion of base contract support funds associated with prior year start up costs for use as a transition fund for costs associated with employees who elect to transfer from Federal employment to tribal employment during the period after which contract support

costs for individual contracts have been determined for that year. To the extent set aside funds are not needed for employee transition, they should be distributed equitably among existing contractors, with emphasis on the most underfunded contracts.

In the last fiscal year and the one we are funding now, we will have added a total of \$60 million in new contract support cost funding to the IHS budget. We know that these funds are critical to the success of Indian-operated health programs and that shortfalls still remain. However, in the current environment of caps on discretionary spending, we must develop policies that support the self-determination principles embodied in P.L. 93-638 while taking into account the fiscal realities of limits on funding for these programs. I look forward to receiving recommendations from the authorizing committees, the IHS and BIA, and tribal organizations which will address these issues in time for the committees' consideration during the FY 2001 appropriations cycle.

The conference report also includes a provision to authorize the investment of Exxon Valdez oil spill—or EVOS—settlement funds outside of the Treasury. This section is the exact language of legislation, S. 711, reported by the Senate Energy and Natural Resources Committee earlier this year, and represents an accord struck among many interests. The details of this accord are discussed more fully in the committee report (Senate Rpt. 106-124) accompanying S. 711. These interests include Koniag, a native regional corporation with a great interests in seeing that their native lands are valued at the level they feel appropriate given their prominence in the oil spill zone.

The continuing availability of EVOS funds for habitat conservation raises another important issue I hope can be resolved in the coming months. It regards revenue sharing payments arising from oil spill area acquisitions. New additions to refuge lands, such as those from EVOS settlement land acquisitions, qualify adjacent communities to increased federal payments in lieu of taxes under the Revenue Sharing Act of 1935.

In 1995, the U.S. Fish and Wildlife Service agreed to purchase from Old Harbor, Akiok-Kaguyak and Koniag Native Corporations over 160,000 acres of land within the Kodiak National Wildlife Refuge. These lands were acquired using funds derived from the consent decree in settling the United States' and State of Alaska's civil claims against Exxon, Inc. for damages caused by the *Exxon Valdez* oil spill in 1989.

The Exxon Valdez Trustee Council, which was formed to implement the consent decree, adopted its restoration plan in 1994 with habitat protection as a key component of the plan to recover

the damages caused by the oil spill. The trustee council subsequently solicited interest from land owners throughout the spill zone and ranked the habitat based on its restoration value for the species and services injured by the spill. The council, working through State and Federal land managing agencies, commissioned land appraisals and authorized negotiations with land owners.

Negotiated agreements with land owners, resulting in significant habitat acquisitions, exceeded the appraisals approved by Federal and State appraisers. The trustee council in its resolutions authorizing these acquisitions with settlement funds made several findings. I'm advised that these findings included the following:

"Biologists, scientists and other resource specialists agree that, in their best professional judgment, protection of habitat in the spill area to levels above and beyond that provided by existing laws and regulations will likely have a beneficial effect on recovery of injured resources and lost or diminished services provided by these resources."

"There has been widespread public support for the acquisition of these lands, locally, within the spill zone and nationally."

"It is ordinarily the Federal Government's practice to pay fair market value for the lands it acquires. However, due to the unique circumstances of this proposed acquisition, including the land's exceptional habitat for purposes of promoting recovery of natural resources injured by EVOS and the need to acquire it promptly to prevent degradation of the habitat, the trustee council believes it is appropriate in this case to pay more than fair market value for these particular parcels."

"This offer is a reasonable price given the significant natural resource and service values protected; the scope and pervasiveness of the EVOS environmental disaster and the need for protection of ecosystems . . ."

The trustee council-commissioned appraisals—which were performed in accordance with Federal regulations—for the three large parcels acquired within Kodiak National Wildlife Refuge are estimates of fair market value. However, they varied substantially from the landowners' appraisals and what they believed to be their fair market value. The landowners rejected the initial offers made by the U.S. Fish and Wildlife Service to purchase the lands based on the trustee council's commissioned appraisals.

The estimates of fair market value based on the Federal appraisals are below the prices actually paid for the various parcels of land, and they do not consider the purchase price paid in these and other governmental acquisitions in Alaska. The trustee council, through its public process, difficult ne-

gotiations and subsequent findings determined that the price paid for the lands was a "reasonable price" for a variety of reasons including past Federal large scale acquisitions.

The acquisition in fee of these three large parcels within Kodiak NWR now requires the U.S. Fish and Wildlife Service to make payments in lieu of taxes to the Kodiak Island borough in accordance with the Revenue Sharing Act of 1935. The act directs the agency to make such payments based on the fair market value of acquired lands.

The service is currently using the federally approved appraisals estimating fair market value of these three large parcels as the basis for computing the revenue sharing payment to the borough. The borough has rightly challenged the service's determination of fair market value based on the unique circumstances of these acquisitions and the findings made by the trustee council in approving funds for these acquisitions.

A plain reading of the Revenue Sharing Act (which authorizes the Secretary of the Interior to make refuge revenue sharing payments) requires that the determinations of fair market value be made in a manner that "the Secretary considers to be equitable and in the public interest." Clearly, the public interest associated with these unique acquisitions has been well documented in the findings of the trustee council.

The Revenue Sharing Act imposes no legal impediment for the Secretary to make a determination of fair market value that incorporates the unique circumstances of these acquisitions and the specific findings and actions taken by the trustee council. Thus, I urge the Secretary to review the Kodiak Island borough's appeal to the service's determinations for making revenue sharing payments and do what is fair and equitable as called for by the act.

These are unique circumstances that exist nowhere else in the United States and are limited in Alaska to lands acquired in the Exxon Valdez spill zone with settlement funds. Thus, there should be no consequences for how revenue sharing payments are computed for service acquired lands in other parts of Alaska or throughout the rest of the country.

At this opportunity, upon the passage of another year's funding for the Federal and Indian lands management agencies, I must call to the attention of my colleagues and to the attention of the President of the United States, an issue that troubles me deeply. Over the years, our Government has made commitments to native Americans which it has not kept. Many Americans thought that practice ended with the new, more enlightened self-determination approach to Indian policy. But as one of Alaska's representatives in the Senate, members of the President's

staff made personal promises to me just last fall on behalf of the native people of the Chugach region which have not been kept.

In 1971 Congress passed the Alaska Native Claims Settlement Act (ANCSA). The act cleared the way for Alaska native people, including the Chugach natives, to receive title to a small portion of their traditional lands as settlement of their aboriginal land claims. The act also cleared the way for the additional millions of acres to our national parks, wildlife refuges, forests, and wilderness areas. Allowing native people to develop their lands freed them from economic bondage to the Federal Government. No longer would they have to depend exclusively on the benevolence of the Federal Government for hand-outs. They could create their own jobs, generate their own income, and determine their own destiny. But only if they had access to their lands.

Both the administration and the Congress recognized the lands would be virtually valueless if there was no way to get to them. The Claims Act recognized that native lands were to be used for both traditional and economic development purposes. Alaska natives were guaranteed a right of access, under law, to their lands across the vast new parks, refuges, and forests that would be created.

In 1971 and again in 1982, under the terms of the Chugach Native Inc. settlement agreement, the Federal Government made a solemn vow to ensure the Chugach people had access to their aboriginal lands. Now, a quarter of a century later, that commitment has not been fulfilled. Many of the native leaders who worked with me to achieve the landmark Native Land Claims Settlement Act have died after waiting for decades without seeing that promise honored. Last year, Congressman DON YOUNG, chairman of the House Resources Committee, added a provision to the House Interior appropriations bill that required, by a date certain, the Federal Government to live up to the access promises it made to the Chugach natives decades ago. In the conference last fall on the omnibus appropriations bill, the administration spoke passionately and repeatedly against the provision.

Why? They fully admitted the obligation to grant an access easement exists. They acknowledged further that access delayed is access denied and that further delays were harmful to the Chugach people. They opposed the provision on the grounds that it was not necessary since they were going to move with all due haste to finalize the easement before the end of 1998. Katie McGinty, then head of the President's Council on Environmental Quality sat across from me, looked me in the eye, and promised me they would fulfill this long overdue promise before the end of the year.

She even offered to issue a "Presidential proclamation" promising once again to do what had already been promised and promised and promised. My staff worked with OMB on the content of such a proclamation, but I told them it would not be necessary. I would take her at her word and believed the administration would live up to the personal commitment she made to me.

Here we are a year later. Chugach still has not received its easement. Ms. McGinty is gone, but her commitment on behalf of this administration remains. It is now the responsibility of others to ensure the promises she made to me and to Alaska's native people are kept.

Congressman YOUNG's House resources Committee has reported a bill, H.R. 2547, to address this issue legislatively, in the hope of forcing the administration to do what it has promised to do. Senator MURKOWSKI has been tireless in his efforts to get the Federal Government to live up to the promises made to Alaskans concerning access to our State and native lands. I support those efforts.

But I take the time today to say clearly to this administration that the promises made by our Government to the Chugach people for access to their lands—and to me personally as their representative—must be honored. Make no mistake, if the promises made to me by officials in this administration last fall are not lived up to soon, if they oppose the efforts of Congressman YOUNG and Senator MURKOWSKI on this issue, if they continue to obfuscate and "slow roll" this commitment, it will be clear to all that his administration does not perceive the true meaning of Robert Service's memorable phrase: "A promise made is a debt unpaid!"

Mr. LOTT. Mr. President. On behalf of myself and my cosponsor, Minority Leader DASCHLE, I would like to insert in the RECORD a legislative history which describes the purpose of each section of S. 1528, the Superfund Recycling Equity Act of 1999. Throughout the negotiations of this language there has been quite a bit of misrepresentation of the purpose of this bill. I hope this will be useful in clearing the confusion.

Mr. President, I ask unanimous consent that the legislative history be inserted in the RECORD at this point.

LEGISLATIVE HISTORY FOR S. 1528
SECTION 127—RECYCLING TRANSACTIONS
Summary

The Superfund Recycling Equity Act of 1999 (the language of S. 1528) seeks to correct the unintended consequence of CERCLA that actually discourages legitimate recycling. The Act recognizes that recycling is an activity distinct from disposal or treatment, thus sending material for recycling is not the same as arranging for disposal or treatment, and recyclable materials are not a waste. Removing the threat of CERCLA liability for recyclers will encourage more recycling at all levels.

The Act has three major elements. First, it creates a new CERCLA §127 which clarifies liability for recycling transactions. Second, it defines those recycling transactions for which there is no liability by providing that only those persons who can demonstrate that they "arranged for the recycling of recyclable material" as defined by the criteria in sections 127(c) through (e) are not liable under section 107(a)(3) or (a)(4). The specific definition of "arranged for recycling" varies depending upon the recyclable material involved. Third, a series of exclusions from the liability clarification are specified such that persons who arranged for recycling as defined above may still be liable under CERCLA sections 107(a)(3) or (4) if the party bringing an action against such person can prove one of a number of criteria specified in §127(f). Lastly, new CERCLA §127(g) through 127(l) clarify several miscellaneous issues regarding the proper application of the liability clarification.

Discussion

§127(a)(1) is intended to make it clear that anyone who, subject to the requirements of §127(b), (c), (d) and (e) arranged for the recycling of recyclable materials is not held liable under §§107(a)(3) or (4) of CERCLA. §127 provides for relief from liability for both retroactive and prospective transactions.

§127(a)(2) is intended to preserve the legal defenses that were available to a party prior to enactment of this Act for those materials not covered by either the definition of a recyclable material in §127(b) or the definition of a recycling transaction within the bill. It is not Congress' intent that the absence of a material or transaction from coverage under this Act create a stigma subjecting such material or transaction to Superfund liability.

§127(b)(1) is meant to include the broad spectrum of materials that are recycled and used in place of virgin material feedstocks. Whole scrap tires have been excluded from eligibility under this provision because of concerns about the environmental and health hazards associated with stockpiles of whole scrap tires. Processed tires including material from tires that have been cut or granulated, are eligible for the benefits of this provision.

The term "recyclable materials" is defined to include "minor amounts of material incident to or adhering to the scrap material . . ." This is because in the normal course of scrap processing various recovered materials may be commingled. An appliance may, for example, be run through a shredder that also shreds automobiles. As a result, the metal recovered from the appliance may come into contact with oil that entered the shredded incident to an automobile. Numerous other examples exist.

§127(b)(1)(A) is intended to exclude from the definition of recyclable material shipping containers between 30 and 3000 liters capacity which have hazardous substances other than metal bits and pieces in them. The terms "contained in" or "adhering to" do not include any metal alloy, including hazardous substances such as chromium or nickel, that are metallurgically or chemically bonded in the steel to meet appropriate container specifications.

§127(b)(1)(B) means that any item of material which contained PCBs at a concentration of more than 50 parts per million ("ppm") at the time of the transaction does not qualify as recyclable material. Material, which previously held a concentration of PCBs in excess of 50 ppm, but has been cleaned to levels below 50 ppm, would still qualify for exempt treatment. Item, in this

context, is meant to apply only to a distinct unit of material, not an entire shipment.

This legislation builds a test to determine what are recycling transaction that should be encouraged under the legislation and what are recycling transactions that are really treatment or disposal arrangements cloaked in the mantle of recycling. The test specified in 127(c) applies to transactions involving scrap paper, plastic, glass, textiles, or rubber. Transactions can be a sale to a consuming facility; a return for recycling, whether or not accompanied by a fee; or other similar agreement.

§127(c), (d) and (e), the term "or otherwise arranging for the recycling of recyclable material" recognizes that while recyclables have intrinsic value they may not always be sold for a net positive amount. Thus a transaction in which one who arranges for recycling does not receive any remuneration for the material but rather pays an amount, less than the cost of disposal, still qualifies for the protection afforded by this §127.

A commercial specification grade as referred to in §127(c)(91), can include specifications as those published by industry trade associations, or other historically or widely utilized specifications are acceptable. It is also recognized that specifications will continue to evolve as market conditions and technologies change.

For purposes of Sec. 127(c)(3), evidence of a market can include, but is not limited to: a third-party published price (including a negative price), a market with more than one buyer or one seller for which there is a documentable price, and a history of trade in the recyclable material.

§127(c)(3) means that for a transaction to be deemed arranging for recycling, a substantial portion, but not all, of the recyclable material must have been sold with the intention that the material would be used as a raw material, in place of a virgin material, in the manufacture of a new product. The fact that the recyclable material was not, for some reason beyond the control of the person who arranged for recycling, actually used in the manufacture of a new product should not be evidence that the requirements of this §127 were not met.

Additionally, no single benchmark or recovery rate is appropriate given variable market conditions, changes in technology, and differences between commodities. Instead, a common sense evaluation of how much of the material is recovered is appropriate. For example, in order to be economically viable as a recycling transaction a relatively high volume of the inbound material is expected to be recovered for feedstocks of relatively low per unit economic value (such as paper or plastic), while a dramatically lower volume of material is expected to be recovered to justify the recycling of a feedstock of very high economic value (such as gold or silver).

It is not necessary that the person who arranged for recycling document that a substantial portion of the recyclable material was actually used to make a new product. Instead, the person need only be prepared to demonstrate that it is common practice for recyclable materials that he handles to be made available for use in the manufacture of a new saleable product. For example, if recyclable stainless steel is sold to a stainless steel smelter, it is presumptive that recycling will occur.

The first part of §127(c)(4) acknowledges the fact that modern technology has developed to the point where some consuming facilities exclusively utilize recyclable materials as their raw material feedstock and

manufacture a product that, had it been made at another facility, may have been manufactured using virgin materials. Thus, the fact that the recyclable material did not directly displace a virgin material as the raw material feedstock should not be evidence that the requirements of §127 were not met.

Secondary feedstocks may compete both directly and indirectly with virgin or primary feedstocks. In some cases a secondary feedstock can directly substitute for a virgin material in the same manufacturing process. In other cases, however, a secondary feedstock used at a particular manufacturing plant may not be a direct substitute for a virgin feedstock, but the product of that plant completes with a product made elsewhere from virgin material. For example aluminum may be utilized at a given facility using either virgin or secondary feedstocks meeting certain specifications. In this case, the virgin and secondary feedstock materials compete directly. A particular steel mill, however, may only utilize scrap iron and steel as a feedstock because of the design restrictions of the facility. If that mill makes a steel product that competes with the steel product of another mill, which utilizes a virgin feedstock, the conditions of this paragraph have been met. In this example, the two streams of feedstock materials do not directly compete, but the product made from them do. It is the intent of this paragraph that the person be able to demonstrate the general use for which the feedstock material was utilized. It is not the intent that the person show that a specific unit was incorporated into a new product.

Section 127 provides for relief from liability for both retroactive and prospective transactions. However, an additional requirement is placed on prospective transactions in this paragraph such that persons arranging for such transactions take reasonable care to determine the environmental compliance status of the facility to which the recyclable material is being sent. Reasonable care is determined using a variety of factors, of which no one factor is determinative. The clause "not procedural or administrative" is included to protect one who arranges for recycling from losing the protection afforded by §127 due to a record keeping error, missed deadline or similar infraction by the consuming facility which is out of control of the person arranging for recycling. For transactions occurring prior to, or during the 90 days after, enactment of §127 the requirements of §127(c)(5) shall not be considered in determining whether §127 shall apply.

The person arranging for the transaction must exercise reasonable care at the time of the transaction (i.e., at the time when the buyer and seller reach a meeting of the minds). Should a consuming facility's compliance record indicate past non-compliance with the environmental laws, but at the time the person arranged for the transaction the person exercised reasonable care to determine that the consuming facility was in compliance with all applicable laws, the transaction would qualify for relief under §127.

In addition, the person must only determine the status of the consuming facility's compliance with laws, regulations, or orders, which directly apply to the handling, processing, reclamation, storage, or other management activity associated with the recyclable materials sent by the person. Thus, for example, a person who arranges for the recycling of scrap metal to a consuming facility would not be responsible for deter-

mining the consuming facility's compliance with regulations governing the consuming facilities production of its product, just the consuming facility's compliance with management of the scrap metal as an in-feed material.

It is common practice in the industry for scrap processors to otherwise arrange for the recycling of a secondary material through a broker. The broker chooses to which consuming facility the secondary material will be sold. In such cases, it is the responsibility of the broker, not the original person who entered into the transaction with the broker, to take reasonable care to determine the compliance status of the consuming facility. Likewise, a scrap processor may sell material to a consuming facility which in turn arranges for recycling of all or part of that material to another consuming facility. It is only the responsibility of the scrap processor to inquire into the compliance status of the party he arranged the transaction with, not subsequent parties.

In determining whether a person exercised reasonable care, the criteria to be applied should be considered in the context of the time of the transaction. Thus, when looking at "the price paid in the recycling transaction" in §127(c)(6)(A) one should look not only at whether the price bore a reasonable relationship to other transactions for similar materials at the time of the transaction in question but should also take into account the circumstances surrounding the individual transaction such as whether it was part of a long term deal involving significant quantities. In addition, market conditions vary considerably over any given time period for any given commodity. Thus, when determining whether the price paid was reasonable, general market conditions, and variations should be considered.

Congress recognizes that small businesses often have less resources available to them than large businesses. Thus, §127(c)(6)(B) acknowledges the fact that a small company may be able to determine less information about the consuming facility's operations than a large company. The size of an individual facility may be an important factor in the facility's ability to detect the nature of the consuming facility's operations.

§127(c)(6)(c) requires a responsible person who arranges for the recycling of a recyclable material to inquire of the appropriate environmental agencies as to the compliance status of the consuming facility. Federal, State, and local agencies may not respond quickly (or respond at all) to inquiries made regarding a specific facility's compliance record. §127(c)(5) only requires a person to make reasonable inquiries; inquiries need not be made before every transaction. Inquiries need only be made to those agencies having primary responsibilities over environmental matters related to the handling, processing, etc. of the secondary materials involved in the recycling transaction.

§127(d)(1)(B) provides that a person who arranges for the recycling of scrap metal must meet all of the criteria set forth in §127(c) as they relate to scrap metal and be in compliance with federal regulations or standards associated with scrap metal recycling that were in effect at the time of the transaction in question (not regulations promulgated or standards issued subsequent to the time of the transaction). In addition, compliance must only be shown with Solid Waste Disposal Act regulations, which were promulgated and came into effect subsequent to enactment of §127.

Section 127(d)(1)(C) as modified by §127(d)(2) is not intended to exclude from li-

ability relief such activities as welding, cutting metals with a torch, "sweating" iron from aluminum or other similar activities.

Section 127(d)(3) defines scrap metal using the regulatory definition found at 40 CFR 261.1 The Administrator is given the authority to exclude, by regulation, scrap metals that are determined not to warrant the exclusion from liability. Because §127 grants relief from liability both prospectively and retroactively, any exclusion by the Administrator would only apply to transactions occurring after notice, comment and the final promulgation of a rule to such effect.

Persons who arrange for the recycling of spent batteries must meet the criteria specified in §127(e), in addition to the criteria already discussed above and laid out in §127(c) for transactions involving scrap paper, plastic, glass, textiles, or rubber.

The act of recovering the valuable components of a battery refers to the breaking (or smelting) of the battery itself in order to reclaim the valuable components of such battery. The generation, transportation, and collection of such batteries by persons who arrange for their recycling is an activity distinct from recovery. Thus, a person who generates, transports, and/or collects a spent battery, but does not themselves break or smelt such battery, is not liable under §§107(a)(3) and (4) provided all other requirements set out in this Section are met.

Section 127(e)(2)(A) provides that for spent lead-acid batteries, the party seeking the exemption must show that it met the federal environmental regulations or standards in effect at the time of the transaction in question (not regulations or standards issued subsequent to the time of the transaction).

Persons who arrange for recycling as defined by the criteria specified in sections 127(a)-(e) and discussed above may be liable under CERCLA §§107(a)(3) or (4) if the party bringing an action against such a person can demonstrate that one of the exclusions provided for in section 127(f) apply. Thus, the burden is on the government or other complaining party to demonstrate the criteria specified in section 127(f).

§127(f)(1)(A) is intended to mean that an "objectively reasonable basis for belief" is not equivalent to the reasonable care standard. The objectively reasonable basis for belief standard is meant to be a more rigorous standard than the reasonable care standard.

§127(f)(1)(A)(i) means that in order for the government to show that a recycling transaction should not receive the benefit of §127, it would have to prove that a person knew that the material would not be recycled. Moreover, it is not necessary that every component of the recyclable material be recycled and actually find its way into a new product in order to meet this requirement.

For the purposes of §127(f)(1)(A)(ii), smelting, refining, sweating, melting, and other operations which are conducted by a consuming facility for purposes of materials recovery are not considered incineration, nor would they be categorized as burning as fuel or for energy recovery. However, nothing in this bill shall be construed to limit the definition of recycling so as to restrict, inhibit, or otherwise discourage the recovery of energy through pyroprocessing from scrap rubber and other recyclable materials by boilers and industrial furnaces (such as cement kilns).

§127(f)(1)(A)(iii) sets forth certain obligations upon one who arranges for a recycling transaction which occurs within the first 90 days after enactment and had an objectively

reasonable basis to believe that the consuming facility was not in substantive compliance with environmental laws and regulations. This is the corollary to §127(c)(5). The clause "not procedural or administrative" is included to protect one who arranges for recycling from losing the protection afforded by §127 due to record keeping error, missed deadline or similar infraction by the consuming facility which is out of control of the person arranging for recycling. There is no expectation that the person who arranged for recycling would necessarily have carried out any type of records search or made any extensive inquiries of administrative agencies.

The provision in §127(f)(1)(B) is intended to apply to persons who intentionally add hazardous substances to the recyclable material in order to dispose or otherwise rid themselves of the substance.

§127(f)(1)(C) is intended to mean that reasonable care is to be judged based on industry practices and standards at the time of the transaction. Thus, in order to determine if a person failed to exercise reasonable care with respect to the management and handling of the recyclable material, one should look to the usual and customary management and handling practices in the industry at the time of the transaction.

In enacting §127(i) Congress clearly intends that the exemptions from liability granted by §127 shall not affect any concluded judicial or administrative action. Concluded action means any lawsuit in which a final judgment has been entered or any administrative action, which has been resolved by consent decree, which has been filed in a court of law and approved by such court. Furthermore, §127 shall not affect any pending judicial action brought by the United States prior to enactment of this section. Any pending judicial action, whether it was brought in a trial or appellate court, by a private party shall be subject to the grant of relief from liability. For purposes of this section, Congress intends that any third party action or joinder of defendants brought by a private party shall be considered a private party action, regardless of whether or not the original lawsuit was brought by the United States. Additionally, any administrative action brought by any governmental agency but not yet concluded as set forth above, shall be subject to the grant of relief from liability set forth in this §127.

§127(l)(1) preserves the rights of a person to whom §127(a)(1) does not apply to raise any defenses that might otherwise be raised under CERCLA. This is consistent with the explanation for §127(a)(2).

By adding §127(l)(2) Congress intended to make certain that no presumption of liability is created against a person solely because that person is not afforded the relief granted by §127(a)(1).

Mr. DASCHLE. This past Wednesday—the day we finally produced a fragile budget agreement—marked the 199th anniversary of the first time Congress ever met in Washington, DC. They met that day in what was then an unfinished Capitol. Several times during the negotiations, the thought occurred to me that, if the same people who are running this Congress were in charge back then, the Capitol might still be unfinished.

These negotiations took longer, and were more difficult, than they needed to be. The good news is: We finally have a budget that will keep America

moving in the right direction. Many longtime members and observers of Congress say this has been perhaps the most confusing, convoluted budget process they can remember.

There have been a lot of technical questions these last few weeks about accounting methods, economic growth projections, and CBO versus OMB scoring. But the big question—the fundamental question that was at the heart of this budget debate—is quite simple: Are we going to move forward—or backward?

We have chosen, thank goodness, to move forward. This budget continues the progress we've made over the last seven years. It maintains our hard-won fiscal discipline. It invests in America's future. And it honors our values.

This budget will put more teachers in our children's classrooms, and more police on our streets. It will enable us to honor our commitments to our parents, and fulfill America's obligations as a world leader. And, it will enable us to protect our environment and preserve precious wilderness areas for generations not yet born.

I want to thank the Majority Leader, my Democratic colleagues, especially Senator HARRY REID, our whip, and Senator ROBERT BYRD, ranking member of the Appropriations Committee. I also want to thank some of my colleagues on the other side of the aisle, particularly Senator STEVENS, chairman of the Appropriations Committee.

In addition, I want to acknowledge and thank President Clinton and Vice President GORE, as well as the incredibly skillful, patient White House negotiating team, especially Chief of Staff John Podesta, Deputy Chief of Staff Sylvia Matthews, OMB Director Jack Lew; Larry Stein and Chris Jennings.

I also want to thank my own staff, and the staff of Appropriations Committee, who have worked many weekends, many late nights, to turn our ideas and debate into a workable budget document.

Finally, I want to acknowledge our dear friend, the late Senator John Chafee. Losing Senator Chafee so suddenly was one of the saddest moments in this difficult year. He embodied what is best about the Senate. He was a reasonable, honorable man who cared deeply about people. Completing the budget process was a major challenge. But in the end, I believe we have produced a budget John Chafee would have approved of.

This budget invests in our children's education - the best investment any nation can make. It maintains our commitment to reduce class size by hiring 100,000 teachers. It contains money to help communities repair old schools and build new ones. It will enable more children to get a Head Start in school, and in life. And it will allow more young people to attend after-school programs where they will be

safe, and where they will have responsible adult supervision.

This budget protects Medicare beneficiaries by providing fair payments to the hospitals, clinics, home health care providers and nursing homes they rely on.

This budget will make our communities safer by putting 50,000 more police officers on the street—in addition to the 100,000 who have already been hired—and by investing in youth crime prevention.

This budget will help keep Americans healthy . . . by reducing hunger and malnutrition among pregnant women, infants and young children . . . and by increasing funding for the National Institute of Health and the national Centers for Disease Control.

This budget protects our environment. We took out riders that would have harmed our environment, and put in money to fund the President's Lands Legacy program.

This budget will help working families find affordable housing.

It will help farm and ranch families weather these hard times.

This budget protects our national security . . . by increasing military pay and readiness . . . and by reducing the nuclear threat at home and around the world.

This budget will help us fulfill our responsibilities as the world's only superpower. It provides money to pay our UN arrears and fund the Wye Accord to promote peace to the Middle East. It will also enable us to ease the crushing burden of debt on some of the world's poorest countries, so those nations can begin to invest in their own futures.

At the beginning of the year, our Republican colleagues proposed an \$800 billion tax cut. For months, we all heard a lot of debate about what such a huge tax cut would mean. This budget makes it clear. There is no way we could have paid for an \$800 billion tax cut without exploding the deficit again, or raiding Medicare, education, and other programs working families depend on.

Instead of moving backwards on taxes, we're moving forward. We're cutting taxes the right way. We're widening the circle of opportunity . . . by extending the R&D tax credit, and other tax credits that stimulate the economy . . . and by empowering people with disabilities by allowing them to maintain their Medicare and Medicaid coverage when they return to work.

There is one other point I want to make about the budget: For every dollar Democrats succeeded in restoring these last few weeks . . . for teachers, and police officers and other critical priorities . . . we have provided a dollar in offsets. Dollar for dollar, every one of our priorities is paid for. If CBO determines that this budget exceeds the caps, the overspending is in the

basic budget our Republican colleagues drafted—on their own.

THE UNFINISHED AGENDA

As I said, Mr. President, this budget does move the country in the right direction—but only incrementally. My great regret and frustration with this Congress, is that we have achieved so little beyond this budget.

Look what we are leaving undone! In a year in which gun violence horrified America . . . a year in which gun violence invaded our schools and even a day care center . . . the far right has prevented this Congress from passing even the most modest gun safety measures—measures that would make it harder for children and criminals to get guns.

The far right has prevented this Congress—so far—from passing a Patients' Bill of Rights. More than 90 percent of Americans—Democrats and Republicans—support a real Patients' Bill of Rights that holds HMOs accountable. So does the AMA, the American Nurses Association—and 200 other health care and consumer organizations. And so does a bipartisan majority in both the House and Senate. Yet the Republican leaders in this Congress continue to use parliamentary tricks to deny patients their rights. As we leave here for the year, HMO reform, like gun safety, has been stuck for months in the black hole of conference committees.

The Republican leadership clearly is hoping that we will forget about all the shootings . . . forget about the families who have been injured because some HMO accountant overruled their doctor and denied needed medical treatment. I am here to tell them: The American people will not forget. And neither will Senate Democrats.

We will fight to close the gun show loophole. And we will fight to pass a real Patients' Bill of Rights next year. We will continue the fight for meaningful campaign finance reform. We will continue the fight to preserve and strengthen Medicare—including adding a prescription drug benefit. We will resume the fight for a decent minimum wage increase. We will fight for a fair resolution of the dairy-pricing issue. And, we will restore the rural loan guarantee program for satellite TV service, so rural Americans aren't left with second-class service.

It's taken a long time, but we finally have a budget that keeps America moving in the right direction. That is a relief, and a victory for the American people. But we still have a long way to go. We are leaving here with too many urgent needs unmet. We must do better next year.

Mr. LOTT. Mr. President, today the Superfund Recycling Equity Act, S. 1528, is being sent to the President as part of H.R. 3194. This is a great day for environmental law—this is the day that the public policy restores recycling as a rewarded, rather than punished activity.

This is a great day because partisan feuding was set aside so that the Congress could find a realistic, incremental, and common sense environmental fix. The freestanding Superfund Recycling Equity Act has strong bipartisan support with 68 cosponsors—68 Senators who have worked together to advance a fix to a small piece of the Superfund debate.

In this controversial world of environmental legislation it is rare that the leaders of the two parties in either Congressional body would agree on a piece of legislation. Well, here in the Senate we do. I wish to thank Minority Leader DASCHLE who understood the merits of recycling and twice joined with me to sponsor this legislation. Without his leadership, this legislation would not have been possible.

Mr. President, I would also like to commend the Senators who originally joined Senator DASCHLE and me in introducing this legislation. Senators WARNER and LINCOLN, who sponsored this measure in a previous Congress, have long exhibited their enthusiasm for fixing recycling rules. They are true leaders—leaders who have fostered this reasonable, workable, environmental proposal. Senator BAUCUS, the Ranking Minority Member of the Environment and Public Works Committee, has also been an avid supporter of recycling by including a version of the Superfund Recycling Equity Act in his comprehensive Superfund reform bill in the 103rd Congress. His six years of leadership in trying to fix public policy for recyclers is appreciated.

Mr. President, this bill would not be where it is at today, on the cusp of becoming law, had it not been for the active support of the late Senator John Chafee—a dear friend to me and many of our colleagues. John Chafee was a respected leader of the Environment and Public Works Committee. His advice and counsel helped shape my bill and he was an original cosponsor. I am proud to have been associated with him on this bill and its legislative process. I consider it a tribute that this bipartisan bill, negotiated with the Administration, representatives of the national environmental community, and the recycling industry, was supported by John Chafee, a man for whom consensus was so important. I believe this is not a footnote to John Chafee's legacy; rather I believe that he made this kind of cooperation possible.

The former mayor of Warwick, Rhode Island, is now the newly appointed Senator from Rhode Island. I have already had an opportunity to hear our newest senator—Senator LINCOLN CHAFEE—tell me about what Warwick has done with regards to recycling. It is a proud record—a record that would be extended and enhanced by this bill. I find it a credit to John Chafee's legacy that his son would be working with me on this legislation. Less than a month in

the Senate and already LINCOLN's voice is being heard in ways that will directly help Rhode Island.

Mr. President, I also must recognize the vision of trade associations like American Petroleum Institute and National Federation of Independent Businesses for supporting an incremental solution. It would have been easier for these groups to oppose the bill because it did not address all the fixes for which they have been advocating. However, AFI and NFIB recognized that this increment would not jeopardize their efforts; rather it exemplifies the efforts of various stakeholders to accomplish something positive for the environment albeit it incremental.

And finally, I must thank the various staff members who have diligently worked toward the passage of this legislation: Eric Washburn and Peter Hanson of Senator DASCHLE's staff, Tom Gibson and Barbara Rogers of the Environment and Public Works committee staff, Charles Barnett of Senator LINCOLN's staff, Ann Loomis of Senator WARNER's staff, and my former staffer, Kristy Simms, who set the stage for this years success.

While too often Senators have seen various interest groups tell Congress why we cannot achieve some worthy environmental goal, the history of the Superfund Recycling Equity Act is replete with evidence of people coming together to correct a problem. Everyone, including myself, realizes that comprehensive reform is necessary to fix the vast array of problems in many different sectors of the environmental community. Unfortunately, we do not live in a perfect world, so Congress must do what is achievable whenever it is possible. This is good public policy—increments will show all parties there is a bridge for bipartisan environmental fixes. Recycling is the first of many necessary fixes, and I would bet my colleagues that it will not be the last fix.

This is a great day for many environmental groups who saw a change that they supported, not be taken hostage by the debate that has for so many years paralyzed reforms to Superfund. The original negotiation that resulted in the basis of the bill was tough and long—but it was fair. Each of the negotiating partners left items on the table that they would have wanted in an otherwise perfect world. Their collective approach was always bipartisan—they never pitted one party against another by pledging one group of interests against another. They remained loyal to their agreement for an unheard of five years—an eternity in Washington. Though this legislation was a long time in coming, I am grateful for its passage.

Mr. President, this is a great day for my good friend and fellow Mississippian, Phillip Morris. It is also a great day for the thousands of mom-and-pop

recycling firms across America, like the one owned by Phillip Morris. This legislation protects the legacy of these firms which in most cases have been handed down through generations—often started by new immigrants to America nearly a hundred years ago. This ends the long Superfund nightmare that our nation's recyclers have suffered. Each time they sold their recyclable products they were, unintentionally, exposing themselves to costly Superfund liability. Removing Superfund as an impediment to recycling is a predicate to higher recycling rates throughout the nation.

The Superfund Equity Act is not about special interests getting a fix. No, this bill is about representing constituent interests throughout America and promoting the public interest. That is why Senator DASCHLE and I have 68 cosponsors—cosponsors that range completely across the liberal and conservative political spectrum, and range across all regions of America.

Mr. President, let me be clear, the Superfund Recycling Equity Act corrects a mistake nobody intended to make. When the Comprehensive Emergency Response, Compensation and Liability Act (CERCLA) was enacted in 1980, there was no suggestion that traditional recyclables—paper, plastic, glass, metal, textiles, and rubber were ever intended to be subject to Superfund liability. As a result of court interpretations, however, the sale of recyclables as manufacturing feedstock was considered to be arranging for the disposal of the material and, therefore, subject to Superfund's liability scheme. However, as we have all come to know as a matter of public policy, recycling is not disposal; it is the exact opposite of disposal.

Mr. President, let me say that again—recycling is not disposal, and a law is needed to remove this confusion. Sad, but true.

Enactment of this legislation clarifies this point and corrects the misinterpretations that have cost recyclers—primarily small family-owned businesses—millions and millions of dollars for problems they did not cause. With passage of the Superfund Recycling Equity Act, the costs of cleanup at sites that utilize recyclable materials as feedstock will be borne, rightfully, by those persons who actually cause or contribute to the pollution. As a result, those facilities will be less likely to cause contamination because they will no longer have recyclers to help them pay for Superfund cleanup. That's a powerful market incentive and will cause the consuming facility to become more environmentally conscientious.

Let me be clear, this legislation will not alter the basic tenants of environmental law—polluters will still pay. This legislation does not relieve recyclers of Superfund liability where they

have polluted their own facilities. It also does not protect these businesses when they have sent materials destined for disposal to landfills or other facilities where those materials contributed, in whole or in part, to the pollution of those facilities. Furthermore, the public can expect recyclers to continue to be environmentally vigilant because they must operate their businesses in an environmentally sound manner, in order to be relieved of Superfund liability.

Today is a victory for coalition building that avoids the attack strategies that are so often employed by trade associations in DC. I hope they see the wisdom in building coalitions around achievable increments. This is how Congress can move forward. This is how Congress shows that it not only hears from its constituents but it acts successfully. Hostage taking, distortion, and scorch the earth approaches are not productive legislative strategies or lobbying tactics. Trade associations need to seek achievable solutions, develop responsible legislative goals, and avoid Beltway attack politics. I am extremely pleased that Congress has been able to take this tiny but very important step forward in reforming the Superfund law. I hope this accomplishment will inspire others to work for sensible, incremental solutions that help both our environment and our nation's economy.

I am proud that today Congress leveled the playing field and created equity in the statutory treatment of recycled material and virgin materials. I am proud to have removed the disincentives to recycling without loosening any existing liability laws for polluters. I am proud to have represented the mom and pop recyclers across America. I'm especially proud of the fact that this was all done in a bipartisan manner.

Mr. MOYNIHAN. Mr. President, 2 years ago, as part of the effort to balance the Federal budget, Congress enacted the Balanced Budget Act of 1997—which we have come to know as the “BBA.” Among other provisions, the BBA enacted major changes in the way Medicare pays for medical services. As implementation of these changes proceeds, concerns have been raised that some of them are having unintended consequences that threaten the viability of health care providers—and consequently the overall availability of health care to our constituents.

In order to alleviate some of these unintended consequences of the BBA, the appropriations conference report before the Senate today incorporates by reference H.R. 3426, the “Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999.” This legislation will restore some \$17 billion over 10 years to hospitals, skilled nursing facilities, home health agencies, and

other Medicare and Medicaid providers. The bill will also facilitate administrative actions that will provide an additional \$10 billion of relief to hospital outpatient departments.

H.R. 3426 has many important provisions; here are some of the highlights:

Teaching hospitals will receive \$600 million in additional Indirect Medical Education (IME) payments over fiscal years 2000 and 2001. They will also benefit from other provisions that add money back to hospital outpatient departments, and which scale back cuts in Medicare disproportionate share payments to hospitals serving low-income patients. I will have more to say about teaching hospitals in a moment.

Rural hospitals will be assisted by: an exemption from the new payment system for hospital outpatient departments; improvements in the Critical Access Hospital (CAH) program; a 5-year extension of the Medicare Dependent Hospital program; and an update in payments for Sole Community Hospitals (SCHs).

Skilled Nursing Facilities—usually referred to as SNFs—would receive \$2.1 billion of assistance over 10 years by: increasing payments for certain medically complex patients; permitting SNFs to switch immediately to a more favorable payment system; and excluding certain high cost items from consolidated billing.

The caps on payments for rehabilitation therapy would be suspended for two years pending development of a better payment system; and hospice facilities, which are covered under Medicare part A, would receive temporary payment increases in fiscal years 2001 and 2002.

Other provisions of the bill would: stabilize the formula used to calculate payment for physician services; lift time limits for state use of a fund for delinking of welfare and Medicaid eligibility; slow the phase-down of a Medicaid cost reimbursement to community health centers and rural health clinics; and provide adjustments to the State Children's Health Insurance Program—known as CHIP—which was enacted by the BBA of 1997

GRADUATE MEDICAL EDUCATION

I would like to focus the remainder of my remarks on one particular aspect of this legislation—funding for graduate medical education. My State of New York is the home to 117 teaching hospitals—almost 10 percent of our Nation's academic medical centers.

The cumulative effect of several provisions in the Balanced Budget Act of 1997 has produced an unintended financial burden on teaching hospitals. First, the BBA enacted a multi-year reduction in payments for the indirect costs associated with medical education, known as IME payments. Second, many teaching hospitals serve a large share of low-income inpatients and have therefore been burdened by

the BBA's cuts in disproportionate share hospital (DSH) payments. Finally, many teaching hospitals are also subject to the BBA's reductions in hospital outpatient department reimbursements.

I am pleased that the legislation we are voting on today, mitigates the fiscal pressures on teaching hospitals by adding back Indirect Medical Education (IME) funds in fiscal years 2000 and 2001. Teaching hospitals in New York will receive more than \$150 million in additional IME payments over these 2 fiscal years.

In addition, the bill's relief to disproportionate share hospitals—those serving low-income patients—will assist the many teaching hospitals serving those populations. Finally, teaching hospitals across the Nation will benefit from the nearly \$10 billion over 10 years in additional payments to hospital outpatient departments.

I am concerned, however, about a change made in this bill to Direct Graduate Medical Education (DGME) payments. Medicare DGME payments compensate teaching hospitals for the costs directly related to the graduate training of physicians. Such DGME costs include residents' salaries and fringe benefits, the salaries and benefits of the faculty who supervise the residents, as well as other direct and overhead costs.

The current payment methodology for DGME was developed in the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). Under COBRA, a hospital-specific per-resident amount was determined based on each individual hospital's 1984 Medicare allowable costs. This per-resident amount took into account the extent to which teaching hospitals already had alternative sponsorship—such as from a university, medical school, or faculty practice plan—and locked payments at that level, so as not to replace outside funding sources. In determining current DGME payments, 1984 costs are updated for inflation and subjected to a formula based on each hospital's number of current residents (which is capped under BBA), and each hospital's proportion of inpatient Medicare beds.

Consequently, there is wide variation in DGME payments from hospital to hospital. On average, New York has a higher average per-resident amount (\$85,000/per resident) than the rest of the country (\$67,000/per resident). However, DGME payments are hospital specific, not region specific; even within New York great variation exists. In New York DGME payments range from \$156,000 per-resident to \$38,000 per-resident. There are a number of factors which account for the variation in the hospital specific payments: the level of outside support from non-hospital sources; the relationship to the medical school; and state or local govern-

ment appropriations. In addition, residents' salaries, which are determined by geographic cost of living factors, further explains the variation.

The version of this legislation that passed the House of Representatives included DGME language that would change the hospital specific per-resident formula to a payment based on a wage-adjusted national average. I am pleased to say that during negotiations on these provisions, I and the distinguished ranking Democrat on the Ways & Means Committee, Representative Rangel, with Chairman Roth's support were able to significantly narrow the scope of the House provision, thereby protecting many teaching hospitals in New York and elsewhere from abrupt changes in DGME payments. The scaling back of the House provision will provide time to address the complicated DGME system in a comprehensive and fair manner.

The negotiations necessary to reach agreement on both the IME and DGME adjustments in this legislation clearly demonstrate the need for fundamental change in the way that medical education is financed in this country. What is needed is not year-to-year adjustments in Medicare funding but an explicit and dedicated source of funding for these institutions—a Medical Education Trust Fund as I have proposed this year and in the past.

The legislation that I introduced would require that the public sector, through the Medicare and Medicaid programs, and the private sector, through an assessment on health insurance premiums, contribute broad-based and fair financial support. Changing the funding source for graduate medical education from primarily Medicare funds to multiple payers would protect graduate medical education for the long term. Teaching hospitals are national treasures; they are the very best in the world. Yet today they find themselves in a precarious financial situation as market forces reshape the health care delivery system in the United States. The all-payer trust fund I have proposed would ensure that America continues to lead the world in the quality of its health care system.

Mr. THURMOND. Mr. President, I rise in support of the Conference Report to H.R. 1554, the Satellite Home Viewer Improvement Act. This is pro-consumer legislation which will promote much needed competition among television providers.

This legislation allows satellite carriers to carry local television stations for the first time. Consumers now will have a choice between cable companies and satellite companies that offer similar programming. This competition should help lower costs and increase quality service for all consumers.

In addition, this legislation contains many other pro-consumer provisions. For example, it protects consumers

who are about to lose their distant signals and establishes a new consumer-friendly process to determine distant signal eligibility.

This legislation also protects local broadcasters who provide a valuable service to our communities. Most importantly, local broadcasters should benefit from the legislation's must carry requirements. The members of the conference also agreed on a provision which would encourage satellite carriers and other entities to provide local into local network service in small and rural markets. However, this provision was taken out at the last minute. I strongly support fiscally sound ways of encouraging satellite carriers and other entities to provide local network television in small and rural markets.

This legislation is a good step in promoting competition among satellite and cable providers. I urge support of this legislation, and I look forward to working early next year with other Senators regarding local into local network service for small and rural markets.

Mr. LIEBERMAN. Mr. President, I rise today with renewed hope for the safety of our public roads. In 1998, 5,374 people were killed in truck-related crashes. In my State there is a strong public sense of alarm about this safety problem. And as trucks get bigger and heavier and the volume of trucks on our roads increases, the General Accounting Office (GAO) predicts that by the year 2000, over 6,000 people will be killed every year as a result of truck-related crashes. This prediction comes at a time when the Office of Motor Carriers (OMC)—the federal agency charged with overseeing truck safety—has failed in its duties to protect the American public. The Department of Transportation Inspector General, the National Transportation Safety Board, the GAO and members of this Congress have all brought to light and documented the many inadequacies of this broken agency.

I commend the leaders of the Senate Commerce Committee for pursuing this very important issue. H.R. 3419, The Motor Carrier Safety Improvement Act of 1999, addresses the numerous failings of the Office of Motor Carriers by strengthening federal motor carrier safety programs, and by creating a new Federal Motor Carrier Safety Administration. Although H.R. 3419 takes a large step in the right direction, federal truck safety oversight needs a new look, with a focus dedicated to reducing truck-related fatalities and injuries, and not simply a new agency with new letterhead.

The Inspector General in his April 1999 report showed that the OMC has not maintained an "arm's length" relationship between itself and the industry it regulates. In fact, the report suggests OMC has developed too close a relationship with the industry it must

regulate. This has limited OMC in taking the tough regulatory and enforcement actions that the accident data suggests are needed to protect public safety. One example of this problem is that the OMC has consistently awarded research contracts to the regulated industry to perform some of the most critical, and highly sensitive research on future rulemakings governing the industry. This practice appears questionable. In order to protect the American public, an independent relationship should be established by the new Federal Motor Carrier Administration.

H.R. 3419 provides us with an opportunity for real progress in improving truck safety, but only if the new Federal Motor Carrier Safety Administration and its leaders commit to a new culture which truly holds safety as the highest priority. This Congress and the Department of Transportation must restore the American public's trust in federal motor carrier safety programs, and take action that produces safer results.

Mrs. FEINSTEIN. Mr. President, today I am pleased the Senate is considering the Balanced Budget Refinement Act of 1999, to restore some of the unanticipated cuts in Medicare and Medicaid made in 1997 and I commend the Senate leadership, the Finance Committee, Senators ROTH and MOYNIHAN, and the Administration for their hard work in developing this bill. The bill includes several important provisions.

The Balanced Budget Act of 1997 has been one of several factors threatening the overall stability of the health care system in California, which many believe to be on the verge of collapse. Today I will focus on eight provisions of the bill which are particularly important to California.

CALIFORNIA'S HEALTH CARE SYSTEM ERODING

During the past few months, I have met with many California health care leaders who have convinced me that the Medicare and Medicaid cuts contained in the Balanced Budget Act of 1997 have undermined the financial stability of California's health care system. In the past 6 months, I have urged President Clinton, Secretary Shalala, and Senators ROTH and MOYNIHAN to join me in addressing the impact the Balanced Budget Act of 1997 is having on our nation's health care system.

California's health care system, in the words of a November 15th Wall Street Journal article, is a "chaotic and discombobulated environment." It is stretched to the limit:

Thirty-seven California hospitals have closed since 1996, and up to 15 percent more may close by 2005.

By 2002, the Balanced Budget Act of 1997 will result in cuts of \$5.2 billion for California hospitals. For California's two largest Catholic health systems, Catholic Healthcare West and St. Joseph's Health System, the loss amounts to over \$842 million.

Over half of my state's hospitals lose money on hospital operations annually.

Hospitals have laid off staff.

California physician groups are failing at the rate of one a week, with 115 bankruptcies or closures since 1996.

Academic medical centers, which incur added costs unique to their mission, are facing margins reduced to zero and below.

The University of California's five medical centers will lose \$225 million.

California hospitals are contending with the impact of BBA while facing a projected margin of negative 7.58 percent by 2002, compared to the national rate of negative 4 percent.

For rural California hospitals, because 40 percent of patients receive Medicare and 20 percent receive Medicaid, 69 percent lost money in 1998, according to the California Health Care Association.

In short, restoring Medicare cuts is crucial to stabilizing California's health delivery system.

HOSPITALS

This bill contains several provisions that will help stabilize California's hospitals by restoring \$400 million, according to preliminary estimates of the California Health Care Association. This bill clarifies that Congress' intent was not to impose a 5.7 percent cut in outpatient services, which restores \$137 million to California, according to preliminary estimates by the California Health Care Association. Cancer hospitals are held harmless permanently. Since Medicare is a major payer for hospital care, improving payment rates and methods is a significant way to stop further closures and stabilize the system.

SAFETY NET HOSPITALS

I want to thank the Finance Committee and the Administration for including a provision maintaining adequate Medicaid payments to disproportionate share hospitals. California has a disproportionate burden of uncompensated care. We have one of the highest uninsured rates in the country at 24 percent, while the national rate is 17 percent. California has the fourth highest uninsured rate in the country, a rate that has risen over the last 5 years and now totals over seven million people. As a result of Medicaid reductions in the Balanced Budget Act of 1997, California's Medicaid disproportionate share hospital program could lose more than \$200 million by 2002, representing a 20 percent reduction in the program, if what is known as the "transition rule" for California's public hospitals is not extended. At my urging, this bill continues for California only the "transition rule" allowing California DSH hospitals to calculate Medicaid payments at 175 percent of unreimbursed costs. Under this provision, tens of millions of dollars will be restored to California hospitals.

Public hospitals carry a disproportionate share of caring for the poor and uninsured. The uninsured often choose public hospitals and frequently wait until their illnesses are exacerbated when they come to the emergency room, making their care even more costly. Without this transition rule, for example, Kern Medical Center, in Bakersfield, would lose \$8 million. Alameda County, would lose \$14 million.

Forty percent of all California uninsured hospital patients were treated at public hospitals in 1998, up from 32 percent in 1993. The uninsured as a share of all discharges for public hospitals grew from 22 percent in 1993 to 29 percent in 1998. While overall public hospital discharges declined from 1993 to 1999 by 15 percent, discharges for uninsured patients increased by 11 percent. Large numbers of uninsured add huge uncompensated costs to our public hospitals.

MEDICAID COMMUNITY CLINICS

Another important provision is the Medicaid payment method for community health clinics. Extending the phase out of cost-based reimbursement for community health clinics over four years will help alleviate the financial burden associated with the more expedited phase-out proposed under the Balanced Budget Act of 1997.

BBA 1997 allowed state Medicaid programs to phase-out the previous requirement that clinics be paid on the basis of cost. The phase-out was to occur over 5 years. Under the phase-out, health centers could lose as much as \$1.1 billion in Medicaid revenues. California health clinics' could have lost \$969 million annually. To halt further decreases in payments to community health, an extended phase-out of cost-based reimbursement has been included in the bill which allows clinics in fiscal year 2000 to be reimbursed at 95 percent and by 2003 at 90 percent of costs.

California has over 7 million uninsured, and 306 federally qualified health centers and 218 rural health clinics that rely on federal funding so that they can provide vital health services to some of the state's sickest and poorest. Over 80 of California's clinics are located in underserved areas and provide primary and preventive services to 10 percent of the uninsured people in the state. According to the federal Bureau of Primary Health Care's Uniform Data System, 42 percent of California community health center patients are children, 52 percent are adults ages 21-64, and 6 percent are the elderly.

HOME HEALTH

I am also pleased that the bill addresses home health care in this bill. For example, the provision which delays the 15 percent reduction in payment for one year will enable home health providers to transition more smoothly and better maintain continuity of services to patients. California will gain \$162 million over 5

years as a result of all the home health provisions included in the bill, according to preliminary estimates by the California Association of Health Services at Home.

While the intent of the BBA 1997 law was to restrain the growth of Medicare home health expenditures, it is now anticipated that home health expenditures in fiscal year 2000 will be lower than they were projected in 1997. CBO estimated that BBA 1997 would cut \$16 billion over 5 years. Recent estimates show cuts of \$48 billion over 5 years, which is three times more than originally expected. HCFA's 1998 data shows that total Medicare payments to home health agencies declined between 1997 and 1998 by 33 percent; reimbursements dropped from \$1.1 billion to \$745 million.

California home health providers have suffered immeasurably since passage of the BBA. In California, 230 home health agencies have closed since 1997, which is 25 percent of all state licensed agencies, largely due to the effects of BBA, according to the California Association for Health Services at Home. For example, the home health agency at the San Gabriel Valley Medical Center, which was providing nearly 10,000 patient visits per year, was forced to close this year due in part to the effects of the BBA. Additionally, between 1997–1998 there has been a 12 percent decrease in the number of patients served nationally and a 35 percent decrease in the number of home health visits nationally. As the population ages and families are more dispersed, it is especially important to help people stay in their own homes.

MEDICAL EDUCATION

I support the provisions included in the bill which alleviate reductions in graduate medical education and begin to restore equity in payment levels. Freezing cuts in the indirect medical education (IME) payment at the current level of 6.5 percent for fiscal year 2000, 6.25 percent in 2001, and 5.5 percent in 2002 and thereafter could help stabilize teaching hospitals and prevent a loss of about \$3 billion for teaching hospitals nationwide over five years. For example, freezing indirect medical education payment rates represents \$5 million to UCLA's teaching hospital. California's teaching hospitals as a whole will receive approximately \$52 million because of this freeze, according to preliminary estimates by the California Health Care Association.

The bill also takes a good first step to correct Medicare's direct medical education (DME) formula, a geographic disparity in payments, that has paid California teaching hospitals far less than teaching hospitals in the Northeast so that California's teaching hospitals can begin to receive payments for medical residents closer to those of their counterparts in other states. Cur-

rently, California teaching hospitals receive 40% less in Medicare payments for medical education than similar New York institutions. The DME provision in this bill begins to reform a longstanding inequity in the formula that has unfairly compensated medical education in California. California's teaching hospitals will benefit from this provision by approximately \$52 million over five years, according to the California Health Care Association.

Many of the nation's teaching hospitals, including UCLA in California, are premier research and clinical care facilities and will be forced to close down beds and lower the quality of care they provide if reductions in indirect medical education (IME) payments continues. According to the Association of American Medical Colleges, 30 percent of all teaching hospitals nationwide are now operating in the red, and by 2002, 50 percent of all teaching hospitals will be losing money without this bill.

Academic medical centers deserve protection because they have multiple responsibilities—teaching, research, and patient care—which cause them to incur costs unique to such facilities. There are 400 teaching hospitals across the country. Teaching hospitals only account for 5.5 percent of the nation's 5,000 hospitals but they house 40 percent of all neonatal intensive care units, 53 percent of pediatric intensive care units, and 70 percent of all burn units. Our nation's teaching hospitals are providing care to some of the nation's sickest patients.

Academic medical centers also provide care to a disproportionate share of the uninsured and underinsured. They provide 44 percent of all care for the poor. The University of California's academic medical centers are the second largest safety net for a state that has the fourth highest uninsured rate in the country.

Medicaid disproportionate share payments to hospitals that serve the impoverished were also reduced five percent over five years as a result of the Balanced Budget Act of 1997. Teaching hospitals receive two-thirds of all Medicaid disproportionate share payments, worth \$4.5 billion annually.

In California, graduate medical education (GME) funding helps support 108 hospitals that train more than 6,700 residents over three-to-five year periods. In 1997, the direct medical education funding in California totaled \$95 million. Dr. Gerald Levey, the Medical Provost at the University of California Los Angeles wrote that:

In the 5½ years I have been in my position at UCLA, my colleagues and I have implemented virtually every conceivable cost-cutting measure to keep us financially strong in order to compete in the brutal managed care market and maintain our academic mission of research and teaching. Coming on the heels of these measures, the Balanced Budget Act of 197 has served to literally "break the camel's back."

Teaching hospitals' ability to serve their communities, advance research, and train physicians will be compromised if we do not pass this bill.

ADEQUATELY PAYING DOCTORS

I also thank the Finance Committee and Administration for addressing the issue of the "sustainable growth rate" factor in payments to physicians under Medicare. The Balanced Budget Act of 1997 changed how Medicare physician payment rates are updated every year, including creating the new sustainable growth rate factor. In the first two years of using the sustainable growth rate, it appears that errors in its calculations were made because projections were used to determine the rate rather than actual data. As a result of these errors, physicians are caring for one million more patients than Medicare anticipated, at a cost of \$3 billion according to the American Medical Association.

California's doctors have made a compelling case that errors in its estimates have caused unintended reductions in payments to physicians. The bill would require HCFA to use actual data beginning in 2001 to calculate payments instead of projections in order to stabilize payments to physicians who treat Medicare patients. While it does not go far enough, it is a step in the right direction towards decreasing fluctuations in physician payments from year to year.

RETAINING MEDICAID

Another provision included in this bill that is of great importance to California is removing the December 21, 1999 expiration date for the \$500 million Temporary Assistance to Needy Families (TANF) Fund. The expiration date for these funds must be repealed so that states like California can continue to use TANF funds to enroll low-income children and adults in Medicaid and CHIP. As part of the 1996 welfare reform, Medicaid was "de-linked" from cash assistance, and states were given increased matching federal funds for administering a new Medicaid family coverage category.

Of the \$500 million provided, as of July 1999, states have only spent 10 percent. Unless federal law is changed very soon, 34 states, including California, will lose these funds by the end of this year because under the law, states have to spend the funds within the first 12 calendar quarters that their TANF programs are in effect. Thus, December 31, 1999, California will lose access to the \$78 million remaining of the \$84 million allocated if we do not act. Fifteen other states will lose access to their remaining funds in December as well. On September 30, 1999, sixteen states lost access their funds due to these time limits.

We cannot let these funds lapse in California because we need to enroll more working, low-income people in

Medicaid and children in CHIP and ensure that more Californians have access to health services.

I thank the Committee and Administration for including this provision.

MEDICARE MANAGED CARE REFORM

I am pleased with the five-year moratorium placed on NCFA's use of health status risk adjuster for payments to managed care plans included in the bill. HCFA has been using hospitalizations as a measure of health, which is not only an incomplete measure of health but also unfairly penalizes states like California that historically have had a heavy penetration of managed care, lower hospital admissions rates and shorter hospital lengths of stay. The way Medicare pays managed care plans deserves a thorough review to determine if both the payment methodology and the payment rates are appropriate. This moratorium could give us time to conduct a review as well as give HCFA time to develop a better measure of health. Under this provision, \$130 million over five years will be restored so that managed care plans can pay providers more adequately, according to preliminary estimates by the California Health Care Association.

ENVIRONMENT POST-BALANCED BUDGET ACT OF 1997

Circumstances have changed since 1997 when we passed the Balanced Budget Act. We have eliminated the federal deficit. Because we have a robust economy, lower inflation, higher GDO growth and lower unemployment, we also have lowered Medicare spending growth more than anticipated. This climate provides us an opportunity to revisit the reductions made by the Balanced Budget Act of 1997 and to strengthen the stability of health care services, a system that in my state is on the verge of unraveling.

We should not end this session without passing this bill. Without it, we could have a more severe health care crisis on our hands, especially in my state. I urge my colleagues to join me in passing this bill.

Mr. LOTT. Mr. President, today concludes a grueling debate on the state of the dairy industry. Though the process was long and often times quite confusing, I think the Senate has come to an agreement on a package that will prove to be beneficial to most interested parties at this time.

Mr. President, I must say this process would not have been possible without the diligent work of one of my former staffers, Congressman CHIP PICKERING. I have always said "once a Lott staffer, always a Lott staffer." Although CHIP has moved on to represent the people of the third district of Mississippi, he continues to constantly be of great help to me, and to always keep the best interest of the entire state of Mississippi at heart.

CHIP believes that Option 1A is absolutely essential for allowing most

dairies in Mississippi and outside the upper Midwest to remain in business, and he worked with me to see that this legislation was put into law. He organized House members from across the country to fight in order to see that the crucial dairy language we needed became law this year.

CHIP realizes Option 1A is the only way the interests of Mississippi's dairy farmers can be protected. Having grown up working on his family's dairy farm, meeting with dairy farmers across Mississippi, and working with Mississippi Farm Bureau, CHIP knows the importance of this legislation to the survival of dairy farms and to the continued fresh supply of milk for all Mississippians. I thank Congressman PICKERING for his relentless efforts on behalf of Mississippi dairy farmers.

The PRESIDING OFFICER. Under the previous order, the question is on agreeing to the conference report to accompany H.R. 3194.

The yeas and nays have not been ordered.

Mr. LOTT. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays are ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Oregon (Mr. SMITH) is necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. SMITH) would vote "yea."

Mr. REID. I announce that the Senator from Washington (Mrs. MURRAY) is absent attending a funeral.

The result was announced—yeas 74, nays 24, as follows:

[Rollcall Vote No. 374 Leg.]

YEAS—74

Abraham	Feinstein	Lugar
Akaka	Frist	Mack
Ashcroft	Gorton	McConnell
Bennett	Gramm	Mikulski
Biden	Grassley	Moynihan
Bingaman	Gregg	Murkowski
Bond	Harkin	Nickles
Breaux	Hatch	Reed
Brownback	Helms	Reid
Bryan	Hollings	Robb
Bunning	Hutchinson	Roberts

Byrd	Fitzgerald	Levin
Conrad	Graham	McCain

Sessions	Smith (NH)	Voinovich
Shelby	Thomas	Wellstone

NOT VOTING—2

Murray	Smith (OR)
--------	------------

The conference report was agreed to. Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. GORTON. I move to lay that motion on the table.

The motion to table was agreed to.

COLLOQUY BETWEEN SENATOR WARNER AND SENATOR HELMS

Mr. WARNER. I rise to address a number of aspects of the State Department Authorization Act, which has been included in the final omnibus budget package of legislation. This bill contains a number of provisions that, directly and indirectly, affect the jurisdiction of the Armed Services Committee, and I am very concerned by the fact that this major bill was included with virtually no consultation with our committee. I believe that the process works better when the normal legislative procedures are followed.

I would like to raise a specific issue with the distinguished chairman of the Foreign Relations Committee. Section 1134 of the State Department Authorization Act prohibits Executive Branch agencies from withholding information regarding nonproliferation matters, as set forth in section 602(c) of the Nuclear Non-Proliferation Act of 1978, from the Senate Foreign Relations Committee and the House International Relations Committee, including information in special access programs.

I am aware that problems with the dissemination of nonproliferation information have arisen in the past. DOD has taken steps to correct these problems and has established a policy that special access programs will not include nonproliferation information, as defined in section 602(c) of the Nuclear Non-Proliferation Act of 1978. Based on my review of DOD's special access programs, I believe that the Department of Defense does not now have special access programs which include such nonproliferation information. I have been assured that, in the future, DOD will provide nonproliferation information to the appropriate committees of Congress.

Mr. HELMS. I thank my colleague, the chairman of the Armed Services Committee. I too have been assured by the Department that it will not use special access program status to deny the Foreign Relations Committee access to the nonproliferation information required by section 602(c).

Mr. WARNER. I am concerned that some might interpret section 1134 of the State Department Authorization Act as requiring expanded access to sensitive DOD intelligence sources and methods, as contrasted with nonproliferation information itself. I believe that section 1134 would not require DOD to change its current procedures for protecting such sensitive

sources and methods. Is this also the understanding of the chairman of the Foreign Relations Committee?

Mr. HELMS. I believe that is correct. If the Department's assurances are accurate, then this provision would not modify DOD's current policies regarding the protection of sensitive sources and methods. The Foreign Relations Committee has no intention of seeking expanded access to such sources and methods, or to DOD special access programs, so long as DOD lives up to its reporting obligations under existing law. DOD's policy of not handling non-proliferation information within special access channels certainly provides a significant reassurance in that regard. Our concern is only to ensure that DOD policy regarding special access programs or intelligence sources and methods not be seen as obviating its long-standing legal obligations to inform appropriate committees of Congress.

Mr. WARNER. That is the case now, and I am pleased that DOD has assured both of us that the prerogatives of the Foreign Relations Committee will be protected. I thank my distinguished colleague, the chairman of the Foreign Relations Committee.

Mr. HELMS. I appreciate these assurances and thank my colleague, the chairman of the Armed Services Committee.

Mr. SHELBY. I am concerned with section 1134 which requires the DCI to provide certain information, including information contained in special access programs, to the chairman and ranking member of the Foreign Relations Committees. I note that this language on special access programs was added after the bill was passed by the Senate. I wish to clarify that the legislative intent of this provision does not wish to clarify that the legislative intent of this provision does not include expanded information relating to intelligence operational activities or sensitive sources and methods.

I ask for the chairman of the Foreign Relations Committee's clarification regarding the companion section in the State Department Authorization bill, section 1131. Am I correct in understanding that this provision does not levy the same requirement upon the Director of Central Intelligence that is required of the Secretaries of Defense, State, and Commerce?

Mr. HELMS. That is correct, Mr. Chairman. Unlike the other Secretaries you have mentioned, the Director of Central Intelligence is required only to disclose information covered under subparagraph (B). That information relates to significant proliferation activities of foreign nations. The Director is exempt from reporting information under subparagraph (A) and (B) which relates to the agency's operational activities. The Foreign Relations Committee understands that intelligence

operations fall within the jurisdiction of the Intelligence Committee, and therefore did not include such activities in this reporting requirement.

Mr. SHELBY. I thank the Chairman for that explanation and yield the floor. I look forward to fully reviewing those provisions in the Intelligence Committee next year.

UNANIMOUS-CONSENT AGREEMENT—H. CON. RES. 236

The PRESIDING OFFICER. Under the previous order, H. Con. Res. 236 is agreed to.

The motion to reconsider is laid upon the table.

The concurrent resolution (H. Con. Res. 236) was agreed to.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Mr. President, I am prepared to ask unanimous consent to be recognized for 5 minutes as in morning business, but I would certainly defer to the minority leader or majority leader if either has anything to address at this time.

The PRESIDING OFFICER. Without objection, the Senator from Oklahoma.

RECESS APPOINTMENTS

Mr. INHOFE. Mr. President, first of all I applaud the White House—this is probably the first time I have done that in 7 years—for responding to an issue that is very critical, probably one of the most critical issues we will be facing.

Going back in the history of recess appointments, the Constitution provided for recess appointments to be allowed, thereby avoiding the constitutional prerogative of the Senate of advice and consent in certain conditions. The major condition was that a vacancy would occur during the course of the recess. This goes back to the horse-and-buggy days when we were in session for 2 or 3 months at a time and then we were gone. So if someone such as the Secretary of State would die in office, it would allow the President to replace that person without having to go through the advice and consent.

Throughout the years, both Democrat and Republican Presidents have abused this. They have made recess appointments. In 1985, President Reagan made quite a few of them. The majority at that time, the Democrats, under the majority leadership of Senator BYRD from West Virginia, made the determination that he was making too many recess appointments.

He challenged the President to submit a letter that would outline future recess appointments during the Reagan administration. In 1985, a letter was sent from President Reagan to then-majority leader, Senator BYRD from West Virginia that stated no more recess appointments would take place

unless the names of the individuals who were considered for recess appointment were submitted in writing in sufficient time in advance that the majority or minority leaders could take some type of action.

For example, if they were going to have someone recess appointed for the express purpose of avoiding the advice and consent of the Senate, then they would just not go into recess; they would go into pro forma, where they would have someone in the Chair all the time to make sure that did not happen. Also, it would be an opportunity to make sure they were not doing it for the express purpose of avoiding advice and consent.

Last May, there was an appointment during the recess of James Hormel to be Ambassador to Luxembourg. There were several people who were opposed to his appointment and had holds on his appointment. The major reason was not that he was a gay activist, but he had not submitted the appropriate financial information to the appropriate committee for consideration. The President went ahead and appointed him.

Consequently—that was already done, and there was no attempt to undo it even though it was contrary to the Constitution—I sent a letter to the President asking him if he would agree to the same thing Ronald Reagan agreed to back in 1985. Of course, I did not get a very favorable response. However, I said: In the event I do not do that, I will put a hold on every non-defense or nonmilitary appointment or nominee from the President. And I did so.

The weeks went by, and finally I got a letter from the President that said:

I share your opinion that the understanding reached in 1985 between President Reagan and Senator Byrd cited in your letter remains a fair and constructive framework which my administration will follow.

I have been concerned because this President has a long history of doing things he says he is not going to do and not doing things he says he will do. Consequently, I sent a letter to the President which I submitted for the RECORD last Wednesday. The letter was dated November 10, signed by myself and 16 other Senators, that said: Make sure you comply with the spirit of this agreement, this letter you have sent; we are going to serve notice right now that in the event you have recess appointments that do not comply with the spirit of the letter, we will put holds for the remaining of the term of your Presidency on all of the judicial nominees. A very serious thing. I repeated this several times last Wednesday to make sure there was no misunderstanding.

Since that time, the White House has cooperated and submitted a list of 13 names. I will read these names and the positions for which they have been

nominated: Cliff Stuart, EEOC; Delmond Won, Commissioner of the Federal Maritime Commission; Leonard Page, general counsel for the Labor Relations Board; Luis Laurado, Development Bank; Mark Schneider, Peace Corps; Frank Holleman, Deputy Secretary of Education; Mike Walter, Veterans Administration; Mr. Jeffers, whose first name I do not have, J-E-F-F-E-R-S; Bill Lann Lee, Assistant Attorney General for Civil Rights; Sally Katzen, Deputy Director of OMB; John Holum, Under Secretary for Arms Control and International Security of the Department of State; Carl Spielvogel, Ambassador to the Slovak Republic; and Jay Johnson—not to be confused with the military Jay Johnson—a nominee for the U.S. Mint.

Of this list of 13, there are 5 who either have holds on them or there are intended holds on these individuals. Consequently, I make the statement at this time—and I think it is very important the RECORD reflect this accurately and everyone understands it thoroughly—that anyone other than the names I will read off—Cliff Stuart, Delmond Won, Leonard Page, Luis Laurado, Mark Schneider, Frank Holleman, Mike Walker, Mr. Jeffers—if there are any names that are submitted and are sought to be appointed during this recess, recess appointments, we, who undersigned the letter on the 10th of this month, will put a hold on every judicial nominee who comes before the Senate during the entire remainder of the term of President Clinton.

I am going to repeat that because it is very important. Any name, other than these eight names I just read, who is recess appointed, if anyone other than these eight individuals is recess appointed, we will put a hold on every single judicial nominee of this President for the remainder of his term of office. That means specifically we will not agree to Bill Lann Lee, Sally Katzen, John Holum, Carl Spielvogel, and Jay Johnson.

I will conclude with that. I reemphasize, if there is some other interpretation as to the meaning of the letter, it does not make any difference, we are still going to put the holds on them. I want to make sure there is a very clear understanding, if these nominees come in, if he does violate the intent as we interpret it, then we will have holds on these nominees.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LOTT. Mr. President, what is the pending business?

BANKRUPTCY REFORM ACT OF 1999—Resumed

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 625) to amend title 11, United States Code, and for other purposes.

Pending:

Hatch/Torricelli amendment No. 1729, to provide for domestic support obligations.

Wellstone amendment No. 2537, to disallow claims of certain insured depository institutions.

Wellstone amendment No. 2538, with respect to the disallowance of certain claims and to prohibit certain coercive debt collection practices.

Feinstein amendment No. 1696, no limit the amount of credit extended under an open end consumer credit plan to persons under the age of 21.

Feinstein amendment No. 2755, to discourage indiscriminate extensions of credit and resulting consumer insolvency.

Schumer/Durbin amendment No. 2759, with respect to national standards and homeowner home maintenance costs.

Schumer/Durbin amendment No. 2762, to modify the means test relating to safe harbor provisions.

Schumer amendment No. 2763, to ensure that debts incurred as a result of clinic violence are nondischargeable.

Schumer amendment No. 2765, to include certain dislocated workers' expenses in the debtor's monthly expenses.

Dodd amendment No. 2531, to protect certain education savings.

Dodd amendment No. 2753, to amend the Truth in Lending Act to provide for enhanced information regarding credit card balance payment terms and conditions, and to provide for enhanced reporting of credit card solicitations to the Board of Governors of the Federal Reserve System and to Congress.

Hatch/Dodd/Gregg amendment No. 2536, to protect certain education savings.

Feingold amendment No. 2748, to provide for an exception to a limitation on an automatic stay under section 362(b) of title 11, United States Code, relating to evictions and similar proceedings to provide for the payment of rent that becomes due after the petition of a debtor is filed.

Schumer/Santorum amendment No. 2761, to improve disclosure of the annual percentage rate for purchases applicable to credit card accounts.

Feingold amendment No. 2779 (to Amendment No. 2748), to modify certain provisions providing for an exception to a limitation on an automatic stay under section 362(b) of title 11, United States Code, relating to evictions and similar proceedings to provide for the payment of rent that becomes due after the petition of a debtor is filed.

Mr. LOTT. Mr. President, the Senate has been considering this bankruptcy bill as the main Senate business since November 4, 1999, after a failed cloture vote in September. There have been dozen of votes conducted with respect to this issue, and yet there are still at least a dozen amendments pending to be offered, debated, and voted upon. It is with this in mind that I need to file this cloture motion on the bill in order to ensure we get a final vote, and that will be available when we come back after the first of the year.

A lot of good work has been done on this bill on both sides, by the managers of the legislation and a number of Senators who have worked on it—Senator GRASSLEY, Senator HATCH, Senator SESSIONS, on our side; Senator TORRICELLI, on the other side, has been involved; Senator LEAHY has worked on this. So there is a lot of work that has been done and a lot of relevant amendments that have been voted on.

I want to particularly note the good work of Senator REID because he began with, I don't know, probably over 100 amendments.

Mr. DASCHLE. Three hundred.

Mr. LEAHY. Three hundred.

Mr. LOTT. Three hundred amendments. I do not understand how the fertile minds of the Senate can be so productive to produce 300 amendments on a bill such as this that has been already marked up in committee. Then we got it down to 36, and it continued to be narrowed.

I hope when we come back after the first of the year something can be worked out where it will not be necessary to go forward with this. But I do believe there is a necessity to have this protection so that we will have this option of cloture so we can complete the bill, if there is no other way to do it when we come back after the first of the year.

CLOTURE MOTION

Mr. LOTT. So I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on Calendar No. 109, S. 625, an act to amend title 11 of the United States Code, and for other purposes:

Trent Lott, Chuck Grassley, Paul Coverdell, Mike Crapo, Craig Thomas, Larry E. Craig, Orrin Hatch, Don Nickles, Conrad Burns, Rod Grams, Mitch McConnell, Pat Roberts, Fred Thompson, Slade Gorton, Phil Gramm, and Mike DeWine.

Mr. LOTT. Under rule XXII, this cloture vote will occur on Tuesday, January 25, 2000. I ask unanimous consent that the vote occur at 12 noon on Tuesday and the mandatory quorum under rule XXII be waived.

The PRESIDING OFFICER. Is there objection?

Mr. DASCHLE. Reserving the right to object, and I certainly will not object, let me say the majority leader and I talked about this. I am appreciative of his position. I am disappointed he has filed cloture. I hope it isn't received in the wrong way by all of those who worked so hard to get to this point.

I had told my colleagues that if they continue to work and if they continue

to cooperate, if they continue to allow time agreements, that we would not be in a position where we would have to file cloture and we would get to the final passage. That was my commitment. Senator LOTT did not make that. I made it to my colleagues. In this case, I am going to have to explain to my colleagues why what I said is not what we are going to do.

We are down now to a handful of amendments, with time agreements. So I am as convinced today as I was a couple of days ago, as I was before that, that cloture certainly isn't necessary. I am hopeful, with those tight time agreements, and with the opportunity to dispose of the amendments, we can come to final passage. But I will certainly work with the majority leader to see if we might find a way to make that happen.

I hope he will work with us to assure those who have relevant amendments will have an opportunity to have their votes and we can finish.

I do not object to the request.

Mr. LEAHY. Reserving the right to object, and I will not object, just so we know the numbers, we had 320 amendments and are now down to 14. I compliment Senators on both sides of the aisle. Senator REID deserves enormous credit. Senator GRASSLEY, Senator TORRICELLI, Senator HATCH, and I worked very hard on that. We are working very hard again on both sides of the aisle. I think most Senators want a bankruptcy bill. We know there has to be a change.

Mr. President, I am disappointed that the majority filed cloture on the Bankruptcy Reform Act.

This week we made bipartisan progress on the Bankruptcy Reform Act by disposing of amendments. On Wednesday, we were able to clear 9 more amendments and accepted another one by a roll call vote for a total of 10 amendments that were accepted to improve this bill.

During our debate on the bill, the managers have accepted 37 amendments to improve the Bankruptcy Reform Act, amendments offered by Democrats and Republicans.

Senator TORRICELLI, Senator REID and I worked in good faith with Senator GRASSLEY and Senator HATCH to clear amendments and set roll call votes on amendments that we could not clear.

From a total of 320 amendments that were filed by senators on both sides of the aisle on November 5th, Senator TORRICELLI and I, working with the Assistant Democratic Leader, have narrowed down the remaining Democratic amendments on this bill to a mere handful.

We are ready to debate and vote on these Democratic amendments. The remaining amendments from our list are all relevant to the issues of bankruptcy under our unanimous consent agreement.

It appears the majority is refusing to allow the Senate to consider two amendments. One by Senator LEVIN on firearm-related debts in bankruptcy and one by Senator SCHUMER on debts incurred through the commission of violence at health service clinics.

Both of these amendments are relevant to the issue of bankruptcy.

Senator LEVIN is willing to limit the time on his amendment to 70 minutes and Senator SCHUMER is willing to limit the time on his amendment to only 30 minutes. These are very reasonable time agreement offers.

I am a cosponsor of Senator SCHUMER's amendment, but I am not sure if I will support Senator LEVIN's amendment. But I am sure that both these Senators deserve to debate and vote on their relevant amendments. What is the majority afraid of? Vote on the amendments up or down?

Some of the other remaining amendments focus on adding credit industry reforms to the bill. The millions of credit card solicitations made to American consumers the past few years have caused, in part, the rise in consumer bankruptcy filings. The credit card industry should bear some of this responsibility and reform its lax lending practices. These amendments improve the Truth In Lending Act to provide for better disclosure of credit information so consumers may better manage their debts and avoid bankruptcy altogether.

Last year's Senate bankruptcy reform bill was fair and balanced because it included credit industry reforms. We should remember that last year's fair and balanced bill passed this chamber by a vote of 97-1.

We should strive to follow last year's Senate-passed bill as the model during the remainder of debate on this bill.

Democrats are also ready to offer short time agreements on our remaining amendments if we cannot agree with the majority on them. Many Democratic senators are willing to offer time agreements of a half hour or an hour on their amendments.

Democrats are prepared to debate this bill and vote on amendments. This is how the Senate works and how it should work.

I commend Senators for coming to the floor last week and this week to offer their amendments. Despite hours of debate on four non-germane, nonrelevant amendments and party caucuses and extended morning business hours last week and this week, Senators from both sides of the aisle offered 64 amendments to improve the Bankruptcy Reform Act.

Unfortunately, the Senate did not consider the Bankruptcy Reform Act yesterday or today. I do not understand why the majority is refusing to allow the Senate to debate this bill.

Next year, I hope we can have a full and fair debate on the few remaining amendments to the Bankruptcy Re-

form Act and then proceed to a vote on final passage.

With that, I yield the floor.

Mr. HATCH. Mr. President, enough is enough. Hard-working American people are being denied common-sense legislation that they overwhelmingly support, because some on the Democratic side are insisting on votes relating to the politically charged issues of abortions and guns. At some point, I would hope that this will stop, and we can move ahead with the people's agenda, instead of trying to win political points.

We have been on the bankruptcy bill for two weeks now. The Democrats demanded the ability to have votes on other politically motivated, non-relevant issues. We debated and had a vote on minimum wage. We have agreed to or voted on 31 Democrat amendments. These are amendments in addition to the Grassley-Torricelli package amendment which included numerous other provisions insisted upon by the Democrats.

This is a fair, bipartisan bill, drafted jointly by Senators GRASSLEY, TORRICELLI, BIDEN and SESSIONS. This legislation was developed in a fair and inclusive manner. With the more than 31 amendments, plus additional amendments jointly developed by Republicans and Democrats, such as the Grassley-Torricelli healthcare amendment, the Hatch-Torricelli domestic and child support amendment, the Hatch-Dodd amendment on protecting educational savings accounts, among many others, this is a much improved bill that provides unprecedented consumer protections, while preserving the bankruptcy system for those who truly need it. What also is included in this bill are unprecedented consumer disclosures that are not even bankruptcy related, but are banking law amendments which Senators TORRICELLI and GRASSLEY have taken the leadership to develop, and I commend them for that.

Mr. President, throughout the process of consideration of this bill, at both the drafting stage, at the Committee level, and here on the floor, we have worked hard to address any concerns any member has with the bill. Senators GRASSLEY, LOTT and I have been more than patient and cooperative. It is apparent, however, that efforts were underway to defeat this important legislation this year by insisting on extraneous political agenda items, regardless of all the progress we made.

We are open to further debate. But this bill, which the Minority had said would only take two days to complete, was on the floor for two weeks. They did not agree to a time limit for debate, but it is now clear why that was.

I hope we can get the cooperation of the Minority to drop their remaining politically-motivated items and pass

legislation early next year that provides meaningful and much-needed reform to the bankruptcy system. Rampant bankruptcy filings are a big problem, and last year over 1.4 million Americans filed for bankruptcy. In the same year, about \$45 billion in consumer debt was erased in personal bankruptcies. Under current law, families who do not file for bankruptcy are unfairly having to subsidize those who do. This is our opportunity to do something about it. I would hope that my colleagues would take the time over these next few months and consider the desires of the American public. Let's do what is right and pass this important legislation early next year. Thank you.

Mr. LOTT. Mr. President, let me observe one of the problems we had in not being able to complete it even this week. While the sponsors of some of the amendments had indicated—or maybe all the amendments—indicated a willingness to have limited time agreements, we had, I know, at least a couple of Senators on this side who were not willing to agree to limit the time, therefore possibly tying up half a day or a day one a couple of these amendments.

We may still be able to work out something where we could have a short time agreed to on both sides and get a vote after the first of the year. But you reach a point, in the final days of a session, where motions are such that you just cannot get that kind of agreement.

ORDER OF BUSINESS

Mr. LOTT. Mr. President, the second session of the 106th Congress will convene, then, at 12 noon on Monday, January 24. We do not yet have absolute certainty that there will be a State of the Union Address the next night, although it is preliminary indicated. I believe that is the date we would expect to have a State of the Union Address; that is, Tuesday, the 25th. That could be postponed upon a request from the White House, but we will need to be back and in business in order to be here for that date.

So there will be a need for a live quorum to establish the beginning of the second session on Monday. A period of morning business will commence for the remainder of that day. And this 12 noon cloture vote on Tuesday, January 25, would be the first vote of the second session of the 106th Congress.

Again, I thank my colleagues for their continued cooperation and wish everyone a safe and happy holiday season.

Let me say, too, we have a number of bills that are in conference now. I had an opportunity to discuss the schedule for next year, or some of the bills for next year, with the President. We have a number of bills that are in a position where we could get early agreement out of conference, including the trade

bill on which we worked so hard. We spent 2 weeks getting that out for Africa and CBI. We could have maybe even done it this week but we had so many things we were working on we could not get that completed.

We have the FAA reauthorization bill that good work has been done on, and a series of bills, including the juvenile justice bill, which we hope we can get early in the session next year. So we will continue to work on that.

I understand we are about ready to do a series of energy bills.

I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. LOTT. Mr. President, we have cleared a number of nominations on the Executive Calendar. I ask unanimous consent that the Senate immediately proceed to executive session to consider the following nominations on the Executive Calendar: Nos. 228, 273, 292, 326, 327, 329, 331, 332, 333, 366, 377, 394, 404, 405, 406, and all nominations in the Coast Guard on the Secretary's desk.

I further ask consent that the HELP Committee be discharged from further consideration of the following nominations, and the Senate proceed to their consideration, en bloc: Magdalena Jacobsen, Francis Duggan, Ernest DuBester, and John Truesdale.

I further ask consent that the nominations be confirmed, the motions to reconsider be laid upon the table, any statements relating to the nominations be printed in the RECORD, the President be immediately notified of the Senate's action, and the Senate then return to legislative session, and that the Senator from Vermont be notified that Judge Linn is in this list for confirmation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF ENERGY

Ivan Itkin, of Pennsylvania, to be Director of the Office of Civilian Radioactive Waste Management, Department of Energy.

DEPARTMENT OF THE TREASURY

Neal S. Wolin, of Illinois, to be General Counsel for the Department of the Treasury.

THE JUDICIARY

Richard Linn, of Virginia, to be United States Circuit Judge for the Federal Circuit.

UNITED STATES INSTITUTE OF PEACE

Stephen Hadley, of the District of Columbia, to be a Member of the Board of Directors

of the United States Institute of Peace for a term expiring January 19, 2003.

Zalmay Khalilzad, of Maryland, to be a Member of the Board of Directors of the United States Institute of Peace for a term expiring January 19, 2001.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Paul Steven Miller, of California, to be a Member of the Equal Employment Opportunity Commission for a term expiring July 1, 2004. (Reappointment)

DEPARTMENT OF LABOR

Irasema Garza, of Maryland, to be Director of the Women's Bureau, Department of Labor.

T. Michael Kerr, of the District of Columbia, to be Administrator of the Wage and Hour Division, Department of Labor.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Anthony Musick, of Virginia, to be Chief Financial Officer, Corporation for National and Community Service.

DEPARTMENT OF STATE

Alan Phillip Larson, of Iowa, to be Under Secretary of State (Economic, Business and Agricultural Affairs).

UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT

Joseph R. Crapa, of Virginia, to be an Assistant Administrator of the United States Agency for International Development.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Susan M. Wachter, of Pennsylvania, to be an Assistant Secretary of Housing and Urban Development.

DEPARTMENT OF COMMERCE

Linda J. Bilmes, of California, to be an Assistant Secretary of Commerce.

Linda J. Bilmes, of California, to be Chief Financial Officer, Department of Commerce.

UNITED STATES INTERNATIONAL TRADE COMMISSION

Deanna Tanner Okun, of Idaho, to be a Member of the United States International Trade Commission for a term expiring June 16, 2008.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

IN THE COAST GUARD

Coast Guard nomination of Richard B. Gaines, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 12, 1999.

Coast Guard nominations beginning Peter K. Oittinen, and ending Joseph P. Sargent, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 27, 1999.

NATIONAL LABOR RELATIONS BOARD

John C. Truesdale, of Maryland, to be a Member of the National Labor Relations Board for the term of five years expiring August 27, 2003.

NATIONAL MEDIATION BOARD

Magdalena G. Jacobsen, of Oregon, to be a Member of the National Mediation Board for a term expiring July 1, 2002.

Francis J. Duggan, of Virginia, to be a Member of the National Mediation Board for a term expiring July 1, 2000.

Ernest W. DuBester, of New Jersey, to be a Member of the National Mediation Board for a term expiring July 1, 2002.

Mr. MURKOWSKI. Mr. President, today is a uniquely historic day. One hundred and thirty six years ago, Abraham Lincoln gave the Gettysburg Address; 80 years ago today, the United

States Senate rejected the ill-conceived League of Nations. And 30 years ago, the second manned Apollo capsule landed on the moon and two more Americans walked on the surface of the moon.

But for the family of Deanna Tanner Okun, this is a singular day. For the United States Senate has just confirmed her Presidential nomination to be a Commissioner on the International Trade Commission. (ITC). I would note that it has taken Deanna barely nine days to go from nomination to confirmation. That could be close to a Senate record.

One of the reasons that Deanna's nomination has sped through so quickly is because the Chairman of the Senate Finance Committee, BILL ROTH, and the Ranking Member, PAT MOYNIHAN were willing to put in the work to hold a confirmation hearing barely six days after Deanna was nominated. I greatly appreciate their work in expediting that hearing.

But most importantly, I believe the primary reason Deanna's confirmation has gone so smoothly is because of the universal admiration and respect that Senators and professional staff hold for her. Deanna is simply a consummate professional and I know that the Senate's loss will be offset by the tremendous gain that is being achieved today by the ITC. today. I know the Commission will never be the same once Deanna is sworn in.

Mr. President, I have been privileged to have worked with Deanna for more than five years. I cannot imagine anyone who is more qualified to become a Commissioner on the International Trade Commission. Not only is Deanna remarkably bright, she is one of the most thorough and conscientious individuals I have ever met.

She is fully versed in all aspects of international trade matters and an expert on U.S. foreign policy issues. No one can doubt her intellectual and professional capacity to serve as a Commissioner.

Mr. President, I want to repeat some of my prepared remarks for Deanna's confirmation hearing.

But I want to tell the United States Senate a little about Deanna, the person. she is a remarkably affable and charming individual who, no matter what the pressures—whether negotiating in a markup of a trade bill or working under the time constraints of a hearing on spying at U.S. weapons laboratories—Deanna never loses her professionalism. She always gets the job done.

In the years that she has worked on my staff, she has had to deal with some of the most difficult and tough Senate staffers in the leadership and on many committees. I know that every single one of those staff people have universal respect and admiration for the work Deanna does and the charm she brings

to the job. That is a singular feat that few other Senate staffers can claim.

Finally, Mr. President, I would note that three years ago, Deanna changed her work schedule from five days a week to four days a week. She did this because she wanted to spend more time raising her two beautiful daughters, Kelsi and Rachel. I can unhesitatingly tell you that in those four days at work, she produces what other staffers could maybe produce in five, more likely six days. She is truly remarkable as a mother and as a professional staffer.

She is a stellar person and I know that her husband Bob and her parents take great pride in her confirmation.

It is difficult to lose Deanna after all these years. I will miss her, but I know that the world trade community will greatly benefit from her appointment to the Commission.

Thank you, Mr. President and to Deanna, I wish you the best of success in your new position.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. I did not want to speak until that was done. I thank the distinguished majority leader and the distinguished Democratic leader. Both of them are dear friends of mine with whom I have served for many, many years.

I thank them for their consideration, especially of Calendar No. 292. That is not simply a number on the calendar. It represents a very real person. Richard Linn is an extraordinary man, extraordinary husband, extraordinary father, and wonderful bother. He will do a great job and be an outstanding judge. I thank both leaders for their help and their consideration.

Mr. HATCH. Mr. President, I rise today to report on the success that the Senate has enjoyed this session in performing its constitutional advice and consent duties with respect to judicial nominees. The Judiciary Committee and the Senate have maintained a low vacancy rate in the federal Judiciary, reached an agreement to have votes on certain controversial nominees, and maintained a fair and principled confirmations process.

At the end of the last Congress, the Judiciary Committee and the Senate had reduced the number of vacancies in the federal Judiciary to 50—the lowest vacancy level since the expansion of the Judiciary in 1990. Indeed, in his January 1999 report on the state of the federal Judiciary, Chief Justice Rehnquist applauded the work of the Senate in bringing the vacancy number to such a low level, stating: "I am pleased to report on the progress made in 1998 by the Senate and the President in the appointment and confirmation of judges to the federal bench. . . ."

This session, despite partisan rhetoric, the Senate has maintained a low vacancy rate. The Judiciary Com-

mittee reported 42 judicial nominees, and the full Senate confirmed 34 of these—a number comparable to the average of 39 confirmations for the first sessions of the past 5 Congresses when vacancy rates were generally much higher. In total, the Senate has confirmed 338 of President Clinton's judicial nominees since he took office in 1993.

In addition, the Committee reported 22 Executive Branch nominees to the Senate floor this Session. The Senate has confirmed all of these nominees, bringing the total number of confirmations for President Clinton's non-judicial nominees for which the Committee has jurisdiction to 277 since 1993.

After all of these confirmations, we have reduced the number of judicial vacancies to 56—very close to the lowest number of vacancies since the expansion of the Judiciary in 1990. Indeed, the number of vacancies at the end of this Session of Congress is 7 less than the 63 vacancies that existed when Congress adjourned in 1994 when Bill Clinton was President and the Democrats controlled the Judiciary Committee. Moreover, we were able to create 9 new district court judgeships for a few districts in which the caseloads are very high.

In addition, the Committee reported two controversial nominees—Marsha Berzon and Richard Paez—to the Senate floor this Session. And Senator LOTT worked in a bipartisan manner with Senator DASCHLE to reach an agreement to vote on these controversial nominees and other nominees by March 15, 2000.

A controversial nominee will, of course, move more slowly than other nominees because it takes longer to garner a consensus to support such a nominee. And, depending on the nature of the controversy, the Committee may have to conduct an even more exacting examination of that nominee's credentials and respect for the rule of law. Nonetheless, a controversial nominee will be treated with the utmost respect and fairness. The more controversial a nominee, however, the more crucial the support of the nominee's home state senators and home state grass roots organizations.

It was deeply disturbing that earlier this year some implied or expressly alleged that the Senate's treatment of certain nominees differed based on their race or gender. Indeed, a so-called independent group claimed that the Senate treated female and minorities nominees less favorably than white male nominees.

After a flurry of rhetoric, however, the facts began to surface. First, the so-called independent group—Citizens for Independent Courts—was discovered to have prepared its report with the assistance of the Democratic, but not Republican, Judiciary Committee staff.

Second, a close review of the report revealed that for noncontroversial nominees who were confirmed, there was little if any difference between the timing of confirmation for minority nominees and nonminority nominees in 1997 and 1998. Only when the President appointed a controversial female or minority nominee who was not confirmed did a disparity arise. Third, in 1991 and 1992, when George Bush was President, the Democratically controlled Senate confirmed female and minority nominees at a far slower pace than white male nominees. Fourth, this year, over 50% of the nominees that the Judiciary Committee reported to the full Senate have been women and minorities. Finally, even the Democratic former chairman of the Judiciary Committee, Senator JOE BIDEN, stated publicly that the process by which the committee, under my chairmanship, examines and approve judicial nominees "has not a single thing to do with gender or race."

As chairman of the Judiciary Committee, I take the constitutional duties of advice and consent and the responsibility for maintaining the institutional dignity of the Senate very seriously. Although the President has occasionally nominated controversial candidates, under my tenure as chairman, not one nominee has suffered a public attack on his, or her, character by this committee. Not one nominee has had his, or her, confidential background information leaked to the public by a member of this committee. And not one nominee has been examined for anything other than his, or her, integrity, competence, temperament, and respect for the rule of law.

The Senate has conducted the confirmations process in a fair and principled manner, and the process has worked well. As the first session of the 106th Congress comes to an end, the federal Judiciary is once again sufficiently staffed to perform its function under Article III of the Constitution. Senator LOTT, and the Senate as a whole, are to be commended.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to legislative session.

UNANIMOUS-CONSENT AGREE- MENT—EXECUTIVE CALENDAR

Mr. LOTT. Mr. President, as in executive session, I ask unanimous consent that all nominations received by the Senate during the 106th Congress, first session, remain in status quo, notwithstanding the November 19, 1999 adjournment of the Senate, and the provisions of rule XXXI, paragraph 6 of the standing rules of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. LOTT. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

SHARED APPRECIATION AGREEMENTS

Mr. BURNS. Mr. President, shared appreciation agreements have the potential to cause hundreds of farm foreclosures across the nation, and especially in my home state of Montana. Ten years ago, a large number of farmers signed these agreements. At that time they were under the impression that they would be required to pay these back at the end of ten years, at a reasonable rate of redemption.

However, that has not proved to be the case. The appraisals being conducted by the Farm Service Agency are showing increased values of ridiculous proportions. By all standards, one would expect the value to have decreased. Farm prices are the lowest they have been in years, and there does not seem to be a quick recovery forthcoming. Farmers cannot possibly be expected to pay back a value twice the amount they originally wrote down. Especially in light of the current market situation, I believe something must be done about the way these appraisals are conducted.

USDA is attempting to fix the problem with proposed rules and regulations but farmers need help with these agreements now. The USDA has published several regulations addressing the issue but the comment period will further drag out the process. I am fearful that in the meantime more farmers will be forced into foreclosure.

My bill mandates by legislation these important regulations. It will exclude capital investments from the increase in appreciation and allow farmers to take out a loan at the "Homestead Rate," which is the government's cost of borrowing.

Farmers should not be penalized for attempting to better their operations. Nor can they be expected to delay capital improvements so that they will not be penalized. It will be necessary for most of these agricultural producers to take out an additional loan during these hard times. It is important that the interest rate on that loan will accommodate their needs. The governments current cost of borrowing equals about 6.25 percent, far less than the original 9 percent farmers and ranches were paying.

I look forward to working with members in other states to alleviate the financial burdens imposed by shared appreciation agreements. I hope that we may move this through the legislative

process quickly to provide help as soon as possible to our farmers.

TWENTY-FIRST CENTURY RESEARCH LABORATORIES ACT

Mr. KENNEDY. Mr. President, biomedical research is making great strides in providing new treatments for a wide range of diseases. Thousands of talented scientists across the country are making new discoveries about the fundamental mechanisms of health and disease. Yet the talents of these researchers are often undermined by a lack of adequate facilities and equipment to conduct their crucial work.

Numerous authoritative studies have demonstrated that medical research laboratories are critically in need of reconstruction and repair. The National Science Foundation found that over half the institutions conducting biomedical research in this country suffer from inadequate space for medical research. The Foundation also reported that medical research institutions have had to postpone nearly \$11 billion in renovation and construction projects due to lack of adequate funding. As a result, over a quarter of medical research facilities in the nation are in urgent need of renovation or reconstruction.

The need to revitalize the infrastructure of our research enterprise is recognized throughout the medical community. The Association of American Medical Colleges and the Federation of Societies for Experimental Biology have both issued statements calling on the federal government to provide increased resources for reconstruction and renovation of medical research facilities.

The bill before the Senate today significantly increases our commitment by authorizing a substantial increase in the funds available to the National Institute of Health to provide peer-reviewed grants for laboratory construction and renovation.

Not only have medical research facilities fallen into disrepair, but laboratories frequently lack needed research equipment. Modern medical instruments are increasingly sophisticated. Scientists are gaining new insights into such basic processes as the workings of the brain and the genetic basis of disease. With this increase in sophistication has come an increase in cost. The rising price of medical technology means that scientists must often curtail research programs, because they lack access to sensitive instruments such as MRI scanners or high resolution microscopes.

To address the acute need for sophisticated scientific instruments, the bill before us also provides needed funds for medical researchers to purchase major pieces of scientific equipment. Only by giving medical researchers the equipment they need to use their talents

fully can we achieve the scientific breakthroughs necessary to meet our most pressing health needs.

We should not enter the twenty-first century with medical laboratories that lack adequate space, adequate facilities and adequate equipment. We must provide the funding that is urgently needed to construct modern laboratories and give researchers the equipment necessary for their cutting-edge research. I urge my colleagues to join with me in supporting this legislation that is so vital to the health care needs of our nation and I commend my distinguished colleague from Iowa, Senator HARKIN, for his leadership on this and many other critical health care issues.

CLINICAL RESEARCH ENHANCEMENT ACT OF 1999

Mr. KENNEDY. Mr. President, biomedical research continues to produce great advances in our ability to combat deadly diseases, and its promise for the future is vast. For that promise to be fully realized in improvements in people's health, we need a stronger commitment to bring medical discoveries from the laboratory to the bedside. Increased support for clinical research is vital for developing cures and better treatments for disease. Clinical research brings insight into the most effective ways to care for patients. It offers effective ways to reduce both the human and financial costs of disease.

Despite these clear benefits, clinical research faces a worsening crisis. The Institute of Medicine, the National Academy of Sciences and the National Institutes of Health have all concluded that the nation's ability to conduct clinical research has declined significantly in recent years. Passing the bill currently before the Senate will reverse this dangerous decline, by addressing the major factors that have led to the weakening of our nation's ability to conduct clinical research.

One of these factors is the steep financial barrier than health care professionals encounter when considering a career in clinical research. Burdened with debt from their professional training, clinicians must often forego a research career in order to earn the money necessary to pay back their loans. Our bill will lower the economic barriers to careers in clinical research by providing financial incentives for doctors to conduct patient-research. The bill authorizes the National Institutes of Health to establish a loan repayment program to lessen the debt they must carry if they pursue careers in clinical research. The bill also provides for peer-reviewed grants to support clinical researchers at all stages of their careers.

While the current state of clinical research is cause for great concern, the future of this vital health care field is

even more worrying. Many of today's young clinical investigators have inadequate training in the methods of clinical research. Dr. Harold Varmus, Director of the National Institutes of Health, has emphasized the need for clinicians to have access to specialized training in patient-oriented research. This bill will provide grant support for young medical professionals to receive graduate training in such research.

To meet the nation's need for clinical research, it is not enough to increase the number of doctors conducting such research. Clinical researchers must also have the facilities necessary to conduct their lifesaving work. In these days when hospitals are squeezed more and more tightly by financial pressures, there is little room for them to devote scarce resources to clinical research. To address this problem, the bill provides grants to General Clinical Research Centers, now established in 27 states, where health professionals can have access to the vital hospital resources necessary to conduct high quality patient-oriented research.

This measure is supported by more than 70 biomedical associations. I commend the Chairman of our Health Committee, Senator JEFFORDS, for his effective leadership on this legislation. It is vital to the quality of health care in the nation in years ahead, and I urge the Senate to approve it.

DEBT RELIEF LEGISLATION

Mr. SARBANES. Mr. President, I want to note that Congress is taking the first important step toward providing debt relief for the Heavily Indebted Poor Countries (HIPC) Initiative. As co-sponsor, with Senator MACK, of legislation to authorize U.S. participation in this critically important international initiative, I believe that easing the debt burden of the world's poorest countries is one of the most meaningful things we can do to help these nations eradicate poverty and grow their economies on a sustainable basis.

The final version of the Foreign Operations appropriations bill contained enough money and authorizations to permit the HIPC Initiative to go forward, but there is more we have to do in Congress, beginning early next year, to provide the resources necessary to address the debt burden of the countries that are expected to qualify. As ranking member on the authorizing subcommittee in Foreign Relations, I intend to work hard to achieve the necessary additional authorizations there, including the very important one for U.S. contributions to the HIPC Trust Fund. I would like today to engage Senator GRAMM in a colloquy on the commitment I understand he made to the Administration to act on the necessary remaining IMF authorization in the Banking Committee as well.

Mr. GRAMM. I thank the Senator. As you know, we agreed on language that would permit the U.S. to support mobilization of the amount of IMF gold necessary to provide a stream of interest earnings sufficient for IMF participation in the HIPC initiative. However, we agreed that only $\frac{1}{4}$ of the interest earnings could be used for HIPC debt relief, until such time as Congress authorized the U.S. to vote in favor of using the remaining $\frac{3}{4}$ of the earnings as well. I committed to the Administration that the Banking Committee would act on this remaining IMF authorization no later than May 1, 2000. It is my hope, of course, that the Foreign Relations Committee could act with similar dispatch.

Mr. SARBANES. Thank you, Senator. I will certainly do everything I can to help you meet your May 1 deadline—in fact, I hope and believe we should be able to act sooner.

FINANCIAL SERVICES MODERNIZATION ACT

Mrs. LINCOLN. Mr. President, a week ago today, President Clinton signed S. 900, The Financial Services Modernization Act. Beyond the obvious positive implications that this legislation has for the bankers of my state of Arkansas, there is a provision in the bill that I rise to speak of today that has been a long time in coming and will finally bring fairness to Arkansas' banking market.

Section 731 of the Financial Services Modernization Act is titled "Interest Rates and Other Charges at Interstate Branches." This section was not included in the original version of S. 900 that passed this body, but with the support of the entire Arkansas congressional delegation it was added to the House version, and retained in the conference committee. Because of the importance of this provision to my state, because of the role that both Arkansas Senators played in protecting this provision in the conference committee, and because there was no debate on the provision in the Senate, I will speak briefly on the history that led to this new law, and the reason it was so vitally needed.

With the passage of the Riegle-Neal Interstate Banking and Branching Act several years ago, the question arose as to which state law concerning interest rates on loans would apply to branches of interstate banks operating in a "host state." Would those branches be governed by the interest rate ceiling of the charter location or that of their physical location? The Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation addressed this issue with opinions that basically gave branches of interstate banks the option of being governed by either their home or host state requirements concerning interest rates by

structuring the loan process to meet certain requirements.

In Arkansas this had a profound effect upon the local banking community. Under Article 19, Section 13 of the Arkansas Constitution, the state places the maximum rate that can be charged for many classes of loans at 5% above the Federal Reserve Discount Rate. However, over 40% of the banking locations in Arkansas are non-Arkansas based interstate banks, and were, in effect, not governed by this constitutional provision after Riegle-Neal became the law of the land. The out of state banks were able to price freely, while Arkansas banks were bound by the usury restrictions in the Arkansas Constitution. This placed Arkansas banks at a significant competitive disadvantage.

In light of this clear inequity, and because, if left uncorrected, my state could have lost virtually all of its local community banks, the Arkansas delegation wholly supported the language of Section 731 that provides our local banks with loan pricing parity in all regards with non-Arkansas interstate banks operating branches in Arkansas. Remedying this disparity was our intent, Mr. President, and I am pleased that my colleagues supported its inclusion in the Financial Services Modernization Act.

The local banks in Arkansas play such an important role in the small and rural communities they serve. Not only do they provide the capital that fuels the local economy, but they are always out front in charity and community service. You always see their names in the back of the football program, or leading the drive to buy the new band uniforms. The local bankers in my state are much more than business men and women, they are neighbors and friends, and dedicated to their homes.

In short, Mr. President, Congress put Arkansas banks at a severe competitive disadvantage with the passage of the Riegle-Neal Interstate Banking and Branching Act. The entire Arkansas delegation, therefore, considered it appropriate, if not our duty, to work to rectify this inequity here in Congress where it was created. I am glad we were successful.

RICHARD ALLEN LAUDS THE LATE BUD NANCE

Mr. LOTT. Mr. President, I have at hand the printed text of the beautiful remarks by Richard Allen, National Security Advisor to Ronald Reagan during those eventful years of the Reagan presidency. Mr. Allen spoke last evening, November 18, in Greensboro, N.C.

Mr. Allen's "Tribute to Bud Nance" was an assessment of the remarkable career of Admiral James W. Nance, a distinguished retired Navy officer. All

of us knew and admired Bud Nance, who was a beloved and admired chief of staff of the Senate Committee on Foreign Relations.

Mr. President, I ask unanimous consent that Richard Allen's address be printed in the RECORD at the conclusion of my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

TRIBUTE TO BUD NANCE

Just last Friday I flew from Tokyo to Munich, Germany where I met up with President George Bush, who received an important honor in connection with the celebration of the Fall of the Berlin Wall. In his acceptance speech, he said something that struck me as both important and generous: he remarked, "I am here tonight to accept this award not because of what I did, but because I am standing on the shoulders of giants who made this possible, and in the first instance I refer to my great predecessor in office, Ronald Reagan."

It was an emotional moment for me, for twenty-one years ago this very month my wife, Pat, who is here with me tonight, and I accompanied Ronald Reagan on his very first trip to Germany. We went to Berlin, and stood in front of the monstrous Wall. Reflecting on what it signified, he tensed, turned to Peter Hannaford and to me and said: "We've got to find a way to knock this thing down." Nine years later, as President, he again stood in front of the Wall, and demanded that Mr. Gorbachev come to Berlin to "tear down this Wall."

Ronald Reagan was one of the giants to whom George Bush referred, but my thoughts turned to this Thursday evening event, and the reflection that one more giant who made all this possible, and upon whose sturdy shoulders Ronald Reagan leaned for years, is my friend of many years, Senator Jesse Helms.

So, this evening I have the special honor to pay tribute to two friends with whom I have worked for many years. Both have a special place of honor in my memory and in my heart, and both have given me the great gifts of constant friendship and unfailing loyalty.

You must recognize, ladies and gentlemen, that in the world of politics, policy and public affairs, the essential human qualities undergird all relationships. Trust and the ability to rely on another's word are among the most valuable qualities in any life, and nowhere are they better reflected in the lives of Senator Jesse Helms and Admiral James W. Nance.

For nearly forty years I have lived in and around Washington and have been an eager student of foreign affairs. I began my first active years as an academic, then worked in the 1968 election as Richard Nixon's foreign policy coordinator, later serving twice with him in national security and international economic affairs in the White House.

In the mid-1970s I had the opportunity to meet the freshman Senator from North Carolina, and in 1976 the first real opportunity to work closely with him. In that year, his principled determination made possible a close race between Gerald Ford and Ronald Reagan. Neither side would allow the other to write the foreign policy platform, and so I was asked to take on that task. It was a special opportunity, and I quickly accepted. Determined to write a platform that reflected real American principles, I finished my draft and flew to Kansas City. There, Senator Helms was shaping the work of the

Platform Committee, and the issue of Taiwan was of great importance. With the delegates, Senator Helms and I were able to collaborate in shaping a fair, realistic and helpful plank to support Taiwan against its constant threat, Mainland China. The important point in all this was that every time Jesse Helms gave his word, he delivered, never trimming, never flinching, always sticking to fundamental principles—no matter how strong the opposition.

Ever since, he has exemplified the crusade for what is right. Fred Barnes said it best in 1997, when he wrote, "Next to Ronald Reagan, Jesse Helms is the most important conservative of the last 25 years. No conservative, save Reagan, comes close to matching Helms' influence on American politics and policy—he has led on everything—he has made history. He's an event-making politician, not merely one who's served in eventful times."

So, ladies and gentlemen, this is why I am especially honored to be here to participate in a tribute to a great Senator, a true leader, a man who always keeps his word.

The Jesse Helms Center Foundation at Wingate University has a distinguished board of Directors, one of whom is Mrs. Dorothy Helms (Roger Milliken, that champion of good causes). But another of those distinguished persons is not with us this evening, and it is about him—a very special person—that I am honored to speak some heartfelt words.

I refer, of course, to Admiral James W. Nance, and extraordinary patriot who was laid to rest on May 19th at Arlington National Cemetery. He was perhaps the Senators' closest confidant after Mrs. Helms, and was a man with whom I was privileged to have a close relationship for nearly two decades.

It's just not possible to capture either the depth of sorrow that reigned over Washington when Bud Nance departed this earth, nor is it possible to capture in words the grandeur and beauty of the successive honors and tributes so justly showered upon him as we celebrated his extraordinary career, his lifetime with his loving family and with us.

Bud Nance and Jesse Helms, two distinct persons, friends since they were little boys and friends for life, men who knew and understood each other as stalwart loyalists to God, Family and Country, and who fought side by side for freedom, democracy and just causes. To evoke the name of one is to remind us of the other, and this had a special meaning for me.

I had worked for four years with Ronald Reagan in his approach to the 1980 presidential campaign, serving as his foreign policy advisor. Following his landslide victory and during the transition, the Chairman-designate of the Senate Agriculture Committee called to ask if I would meet with a recently retired admiral. As the Chairman put it, "this is good ole boy I've known for a long time; he's worked in the Pentagon and he knows how to fly planes on and off aircraft carriers. He is tough, smart and loyal." The Senator told me he might be interested in "some kind of junior staff job at the National Security Council," which I had been designated to head.

Bud Nance came aboard that transition team steaming at thirty knots, said he liked tough assignments, could execute them well, and what did I have for him to do. For starters, I asked him to take on the task of "cleaning out" the Carter National Security Council Staff. Bud said: "Oh, I get it, I'm supposed to be just like a vacuum cleaner,

just blow 'em all out of there?" And he did just that. It was not the last time that Bud would be called upon to clean up an organization!

At the honors for Bud in May, Secretary of State Madeleine Albright—who was one of those staffers Bud was assigned to show out the front door—reminded me that Bud had called her for a meeting. Some of the Carter staffers actually thought they should be kept on, and Bud was going to make certain that the delusion was quickly erased. Madeleine Albright, a feisty lady, said to Bud, "Why are you talking to me? I don't want to work with you people anyway!! As it turned out, she was certainly right. But Bud wasn't taking any chances.

Instead of a "junior position" on the National Security Council staff, I asked Bud to become my number one Deputy. I knew he would work well with me, but more important, with President Reagan. I was right about that.

Bud Nance was just about the finest associate and the hardest working man a fellow could ever have. He insisted on doing the heavy lifting, and served the National Security Council and his President faithfully and well. On one occasion, in the summer of 1981, the Navy decided to run a very important operation into the Gulf of Sidra, near Libyan waters, to establish freedom of navigation there. After we approved the operation, I flew to California with the President for continuing budget discussions. Bud insisted on sleeping the night in the Situation Room, in order to supervise the operation. At about midnight on the West Coast, I got a hotline call from Bud, who in a matter-of-fact tone said, "Dick, we sent our carrier in there, and two Libyan fellas came flyin' out at us in Russian Migs. We put up our planes, and now the Libyans ain't flyin' any more because they locked their radars onto our boys, and their planes got all tore up with our missiles, and those Libyan boys are definitely down in the drink. Now, if I was you, I'd be callin' the President, and I'm goin' home to get some sleep."

If I were to recite the extraordinary career and accomplishments of this very special man, I'd merely repeat what more than twenty Senators of both parties related to eloquently in their special tributes on the floor of the Senate—filling fifteen solid pages of the Congressional Record. Or I'd retell what his granddaughter, Catherine, and son Andrew said so movingly at the memorable funeral services for this patriot.

Leaving the White House in 1982, Bud worked for the Grace Commission on Waste and Fraud in Government, and then for Boeing until Senator Helms drafted him to come up to Capitol Hill and take charge of the Foreign Relations Committee in 1991. After the Navy, after the White House, after the Grace Commission, after Boeing, he again accepted the call to duty. Everyone in Washington knew the basis on which he agreed to work again—he declared that he would work free, saying that his pension and Social Security were quite enough, thank you, and that "America has been good to me." He was not permitted to do that, and had to accept the minimum wage of \$2.96 a week, later raised by cost of living increases, and eventually was forced to accept the munificent sum of \$4.53 a week.

Each of us who knew, respected and loved him miss him very much.

On May 19th, the motorcade that left the Lewinsville Presbyterian Church in McLean enroute to Arlington National Cemetery stretched for nearly two miles. The cannon

fired their salute, the rifles cracked, the bugler played Taps, the Honor Guard stood by, and Bud's pastor asked us to stand for the flyover.

North across the Potomac they came, four magnificent F-18 Navy jets, flying in precise formation; as they roared directly over the assembled mourners, three proceeded straight ahead while one ignited his afterburner, peeled off in a long and beautiful arc, flying straight up into the heavens, at once symbolizing Bud's career and the passage to his Maker. It was a profound moment, reminiscent of how much Bud liked that little placard that President Reagan put on his desk on the first morning of his presidency. Its inscription said, "There's no limit to what a man can do or where he can go if he doesn't mind who gets the credit."

That was Ronald Reagan's unspoken message to his staff and to his Cabinet. Some read and heeded it, others did not. Bud Nance did, because he was just the sort of man who did his job well, and never did mind who got the credit.

COY A. SHORT

Mr. THURMOND. Mr. President, everyone recognizes that to field an efficient fighting force, we must have the service of patriotic and selfless individuals who are willing to enter the military and stand ready to defend our nation, its citizens, interests, and ideals. What many do not recognize is the vital importance of building support in the greater community for those brave young men and women who are serving in uniform. We need our citizens who are not in military service to be supportive of those who do, especially of those who serve in the Guard and Reserve. I rise today to pay tribute to a faithful public servant, Mr. Coy A. Short of Atlanta, Georgia, whose hard work and selflessness have contributed greatly to the Reserve and Guard programs of our armed forces.

On December 6th, Coy Short will be honored by the State of Georgia for his nine years of able and visionary leadership as the Chairman of the Georgia Committee for Employer Support of the Guard and Reserve. In that capacity he has been responsible for helping to raise employer awareness about the importance of Guard and Reserve forces to our national defense.

While Coy is going to be saluted for the work he did as Chairman of the Georgia Committee, his commitment to public service goes far deeper and runs far longer than his tenure in that position. Clearly, his contributions have benefitted the State of Georgia and the nation. Coy began his career in public service when as a young 1957 graduate of Emory University, he took the oath of an officer in the United States Army and accepted a commission in the Artillery. He rose to the rank of Captain before leaving military service, and his time on active duty taught him many valuable lessons, not the least of which was the importance of maintaining a strong defense and supporting those who serve.

After leaving the Army, Coy tried his hand at a number of entrepreneurial enterprises and while successful, he like many who serve their country missed the satisfaction that came from doing something for the benefit of others. In 1977, he began a career with the Social Security Administration that has been a tremendous success by any measure, rising to the position of Deputy Regional Commissioner. The most important gauge of success, however, would be the assistance he has rendered to tens of thousands of Americans. Coy's tireless efforts and adept abilities as a manager have earned him repeated recognitions, including the "Commissioner's Citation", the highest award given by the Social Security Administration.

Coy learned at an early age the importance of supporting our men and women in uniform. Nothing does more for the morale of those who serve in the military than to know that they are appreciated by those they protect. Toward that goal, Coy Short has always been more than willing to roll-up his sleeves and lend his support to any effort that makes life for our troops a little easier, or demonstrates to them the high regard in which they are held by their fellow Americans. He is especially well known for his work as Chairman of the Georgia Committee for Employer Support of the Guard and Reserve, where he has sought to involve others in this important endeavor. This work is especially critical in a day and age when we increasingly rely on those who serve in non-active components to support "real world" missions. The recognition that is being bestowed upon him early next month is a testament to the fine job he has done in boosting support in the community for our "citizen-soldiers", his work has made it easier for men and women to get time off from work to meet their obligations to their units and help us meet our national defense goals.

While we can all be proud of what Coy Short has accomplished as Chairman of the Georgia Committee for Employer Support of the Guard and Reserve, his commitment to helping the military is not limited to his service to that body. He also serves as President of the B-29 Superfortress Association, which has restored and put on display at Dobbins Air Reserve Base one of those classic World War II era bombers, named "The Sweet Eloise", and is working on restoring the tenth C-130 Hercules to have been produced in Georgia, which will also be displayed at that facility. Additionally, Coy serves on the Executive Committee of the USO Council of Georgia, as Ambassador for the U.S. Army Reserve, and is a member of the Atlanta Chamber of Commerce's Greater Atlanta Military Affairs Council Executive Committee. In the past, he has served as the President of the Atlanta Chapter of the Association of the United States Army

and as the Chairman of Peach Bowl's Community Events Committee. Not surprisingly, Coy's efforts have won him deservedly high praise and recognition in many forms including winning the prestigious Sam Nunn Award for Outstanding Support of the National Guard; the Oglethorpe Distinguished Service Medal for Outstanding Support of the Georgia Guard; the National Distinguished Service Award from the Association of the United States Army; the National Committee for Employer Support of the Guard and Reserve Award for Outstanding Public Service; the Army Commendation Medal, awarded for public service on behalf of Army Forces Command; the Atlanta Chamber of Commerce Phoenix Award; the Dobbins Air Reserve Base Man of the Year Award; the Eli White Award of the Old Guard of the Gate City Guard; and, twice winning the National Guard Association's Patrick Henry Award.

I am pleased and proud to be able to have this opportunity to commend my good friend, Coy Short, on his many years of public service and the invaluable support he has given to our armed forces, particularly those who serve in the Guard and Reserve. It is my hope that others will be inspired to follow the lead that Coy has set for public service. The qualities of patriotism, selflessness, and duty were obviously instilled in him at an early age, and we have all benefitted from his devotion to service. Certainly Coy's mother, Eloise Strom, as well as Coy's wife Judy, deserve special recognition for the role they played in Coy's success.

Coy, we appreciate all your good work and know you will continue to find ways to make a difference in the lives of those who live in Georgia, Atlanta, and all those who serve in the armed forces of the United States.

THE DEPARTURE OF STEVEN APICELLA, LEGISLATIVE FELLOW

Mr. LOTT. Mr. President, I would like to take a moment to recognize my Legislative Fellow, Steven Apicella, who will be leaving the LOTT staff, my team, at the end of this session.

I must admit, when Steven first joined us, I was not sure who he was or why he was lurking in my meetings. However, I quickly learned that thanks to the wisdom of my Chief of staff and then Legislative Director, the Department of Energy had lent me and Mississippi one of their best.

Over the past twenty months, Steven has become an indispensable part of my legislative shop. He has worked hard on a broad range of issues—each time jumping in feet first, soaking up knowledge, and moving legislation forward in this often complicated process.

Steven began his Capitol Hill experience during the lengthy and grueling TEA-21 negotiations. He quickly real-

ized my transportation priorities for my home state of Mississippi, and was helpful in making sure these issues were not ignored. During these long hours spent hammering out the details of TEA-21, Steven earned the respect of staff, as well as mine.

Steven advised me on a variety of high-tech issues, and was an active participant of the team which formulated a focus for the Republican Technology Task Force. He worked with the staffs of several of my colleagues to reach a consensus—often not an easy task.

Steven has also been very diligent in advancing a meaningful and updated encryption policy—one that balances national security, law enforcement and trade interests. He continually made sure that all parties realized that these are not mutually exclusive priorities. Steven detected this significant issue and was responsible for bringing it to my attention and guiding me as the bill worked its way through the Commerce committee.

Digital signatures is another issue Steven has aggressively pursued. He played an active role in getting the government portion of the legislation enacted into law last Congress, and worked extensively toward today's Senate passage of this needed opportunity for the private sector.

An important service on behalf of the State of Mississippi has been Steven's diligence on national parks legislation. This year Steven was very helpful in preparing two bills that I introduced in this area—one to add the battlefield at Corinth as part of the Shiloh National Park, and another to begin the planning for the designation of the Vicksburg Campaign Trail. On each of these bills, Steven worked effectively with the Senate committee of jurisdiction and was responsible for getting the funds authorized before introduction. I am happy to say that today those bills passed the Senate by unanimous consent.

Finally, with Steven's help I again fought the uphill battle of Title Branding. Steven worked with and strengthened a large, bipartisan effort to draft and support legislation to brand the titles of severely damaged salvaged vehicles, so consumers will be able to identify potentially dangerous used cars before they are purchased. Steven searched for a compromise, and constantly pushed the envelope of consensus. Steven tirelessly championed this pro-consumer bill and his efforts brought it to the threshold of Senate passage.

Although Steven was assigned areas which were outside the realm of his "parent" employer, Department of Energy—he has been an excellent ambassador. He has helped the staff understand the intricacies of the agency and appreciate its problems. As Steven returns to his duties at DOE, I hope his experiences and the skills and contacts

he has developed while serving as a part of my staff will serve him well.

Over the past several years, I have been privileged to have the services of legislative fellows, to provide stellar support for my efforts. Steven has been fantastic. I thank Steven for his dedication and determination, and I thank DOE for their patience—I'm sure they are ready to have him back, working his magic there. I wish Steven, and his son Jarrett, Godspeed in their future endeavors.

REMARKS ON THE DEPARTURE OF IVAN SCHLAGER

Mr. HOLLINGS. Mr. President, I rise today with both pride and sadness as we say goodbye to a long time member of my staff, Ivan Schlager. I have known Ivan for nearly 20 years. One cold afternoon at Northwestern University in 1983, Ivan approached a woman, he thought to be a staffer on the Hollings for President Campaign and offered to volunteer on that effort.

That "staffer" turned out to my wife, Peatsy Hollings, and before Ivan knew what had happened, he was driving and wading through the snow of New Hampshire in support of my effort.

After finishing at Northwestern and law school at Georgetown, Ivan joined the Commerce Committee staff in 1989 and began to assist both Senator ROCKEFELLER and myself at the Subcommittee on Tourism and Foreign Commerce. In this job, he played an important role on many of the international trade agreements concluded over the past decade, including most notably the Uruguay Round agreement which created the WTO and the North American Free Trade Agreement.

I truly believe that Ivan is one of the most knowledgeable and substantive individuals with regard to international trade. He was instrumental in insuring that all voices were heard during these important debates.

More than 3 years ago, Ivan became the Commerce Committee's staff director and he has overseen its operations since that time. He has provided the committee Democrats with a thoughtful and pragmatic approach to a remarkable variety of issues. Moreover, he has developed a fine working relationship with Chairman MCCAIN, his staff and the remainder of the Republicans on the committee.

On many occasions, these relationships have assisted in forging a bipartisan consensus on a variety of issues that have helped advance good public policy in areas such as telecommunications and broadcast policy, aviation, trucking and rail issues, technology development and environmental and oceans concerns.

One particular issue stands out, last year's tobacco debate. Under difficult personal circumstances, Ivan worked closely with both Republicans and

Democrats to help craft a compromise that was reported out of the committee by a 19-1 vote.

On other occasions, such as product liability or international trade we have been unable to reach bipartisan consensus and have been forced to hash out our differences on the Senate floor. In those instances, I have been blessed to have Ivan's energy, quick thinking, political intuition and wise counsel during the debate.

As, I mentioned earlier, I first met Ivan when he was in his early twenties. Both Peatsy and I have seen him grow from a college student to a dedicated and accomplished public servant. We rejoiced when he met and married his lovely wife, Martha Verrill. We celebrated when they had a baby boy, Ethan, and then a second, William. We grieved with him when his father passed away last year. And today we wish him well as he moves onto his next step in joining the internationally recognized law firm of Skadden, Arps.

Ivan, thank you for all that you have done for Peatsy and me, the Commerce Committee, and for our country. We will miss you.

JUDICIAL NOMINATIONS IN THE FIRST SESSION OF THE 106TH CONGRESS

Mr. LEAHY. Mr. President, as the Senate concludes this first session of the 106th Congress, I want to take a moment to thank Senator LOTT, the Majority Leader, and Senator HATCH, the Chairman of the Senate Judiciary Committee, for working with us to confirm some of the judges desperately needed around the country.

Senator HATCH has pressed forward with three confirmation hearings since October 5, in the last five weeks of this session, to bring the total number of hearings to seven for the year. Those hearings allowed for 12 additional judicial nominees to be reported to the Senate calendar and another two being ready for action by the Committee. Senator HATCH supported all but one of the nominees voted upon by the Senate this year and worked hard to clear judicial nominees reported by the Committee for action by the Senate.

I thank the Majority Leader for working with me and Senator DASCHLE, our Democratic leader, to find a way to consider each of the judicial nominations reported to the Senate by the Judiciary Committee. In early October he committed to working with us, and this month he announced that he would press forward for votes on the nominations of Judge Richard Paez and Marsha Berzon by March 15 and on the other nominations left pending on the Senate Executive Calendar, as well. With his assurance, Senator BOXER was willing to proceed immediately to consider a nomination important to the Senator from Mississippi.

I want to commend Senator BOXER and Senator FEINSTEIN for their efforts on behalf of both Judge Paez and Ms. Berzon. With their support these nominees are each now headed toward final confirmation votes.

For the year, the Senate confirmed 34 federal judges to the District Courts and Courts of Appeals around the country and to the Court of International Trade. The Senate has voted to fill only 34 of the 100 vacancies that exist this year. There remain 35 judicial nominees still pending before the Senate. Most regrettably, the Senate rejected the nomination of Justice Ronnie White on an unprecedented part-line vote. Senator HATCH is fond of saying that the Senate could do better. I agree with him and hope that we will continue to do much better next year.

I began this year challenging the Senate to maintain that pace it established last year when the Senate confirmed 65 judges. I urged the Senate to move away from "the destructive politics of [1996 and 1997] in which the Republican Senate confirmed only 17 and 36 judges." We did not achieve much movement in the first nine months of this year. It is my hope that developments over the last few week signal that the Senate is finally moving toward recognition of our constitutional duty regarding judicial nominations and that we will consider them more promptly and fairly in the coming months.

I note that during the last two years of the Bush Administration, a Democratic Senate confirmed 106 federal judges. To reach that total this Congress, the Senate next year will need to confirm 72 additional judges—more than in any year since the Republican Majority took control. That will take commitment and work, but we can achieve it. In 1994, with a Democratic majority in the Senate, we confirmed 101 judges, and in 1992, the last year of the Bush Administration, a Democratic Senate confirmed 64 federal judges.

Meanwhile we end this year with more judicial vacancies than existed when we adjourned at the end of last year. We have again lost ground in our efforts to fill longstanding judicial vacancies that are plaguing the federal courts. In 1983s vacancies numbered only 16. Even after the creation of 85 new judgeships in 1984, the number of vacancies had been reduced to only 33 by the end of the 99th Congress in 1986. At the end of the 100th Congress in 1988, which had a Democratic majority and a Republican President, judicial vacancies numbered only 23. In 1999 the Republican Senate adjourns leaving 65 vacancies with 10 on the horizon.

Moreover, the Republican Congress has refused to consider the authorization of the additional judges needed by the federal judiciary to deal with their ever increasing workload. In 1984 and in 1990, Congress did respond to re-

quests for needed judicial resources by the Judicial Conference. Indeed, in 1990, a Democratic majority in the Congress created judgeships during a Republican presidential administration. Two years ago the Judicial Conference of the United States requested that an additional 53 judgeships be authorized around the country. This year the Judicial Conference renewed its request but increased it to 72 judgeships needing to be authorized around the country. If Congress had passed the Federal Judgeship Act of 1999, S. 1145, as it should have, the federal judiciary would have 128 vacancies today. That is the more accurate measure of the needs of the federal judiciary that have been ignored by the Congress over the past several years.

More and more of the vacancies are judicial emergencies that have been left vacant for longer periods of time. The President has sent the Senate qualified nominees for 15 of the current judicial emergency vacancies, which nominations remain pending as the Senate adjourns for the year.

Most troubling is the circuit emergency that had to be declared three months ago by the Chief Judge of the Court of Appeals for the Fifth Circuit. That is a situation that we should have confronted by expediting consideration of the nominations of Alston Johnson and Enrique Moreno this year. I hope that the Senate will consider them both promptly in the early part of next year. In the meantime, I regret that the Senate is adjourning and leaving the Fifth Circuit to deal with the crisis in the federal administration of justice in Texas, Louisiana and Mississippi as best it can but without the resources that it desperately needs. I look forward to our resolving this difficult situation at the beginning of the coming year.

COMPREHENSIVE TEST BAN TREATY

Mr. DODD. Mr. President, due to the illness of a family member, I was unable to participate in much of the debate on the Comprehensive Test Ban Treaty. I voted in favor of ratification of the treaty, and, now that there is ample time, I want to express my views on the treaty and the debate prior to the Senate's vote against ratification.

In my view, that vote was a sad day for the United States Senate, for our nation and for the world. During the debate, my colleague, Senator CLELAND spoke eloquently of the pride he felt as a young man sitting in this chamber 36 years ago when the Senate voted to ratify the first nuclear test ban treaty which prohibited atmospheric nuclear tests. I doubt that many people can express a similar sense of pride over the outcome of the Senate's consideration of the Test Ban Treaty earlier this fall.

My disappointment rests, firstly, with the manner in which this treaty

was considered. It can only be characterized as hurried, a legislative rush to judgement. For instance, Senator BYRD, one of the most senior members of this chamber and a former majority leader, rose to speak prior to a procedural vote. He dared to ask for fifteen minutes to speak during this chamber's headlong rush to vote against a treaty that would ban nuclear explosions throughout the world. The majority was well aware that there were not 67 votes for this treaty, and they knew what the final outcome would be. Sadly, though, the majority found it necessary to brush aside the most senior member on this side of the aisle. That is not the way we should conduct business in the Senate.

Unfortunately, that episode characterized the entire debate on this treaty. There was a hastiness and a needless sense of urgency about arriving at that ratification vote that we rarely see in this body. The sudden scheduling of the vote, prior to a single hearing, brought one week of frenzied focus that some members characterized as ample consideration. I think that it fell far short. All hearings on this treaty were crammed into one week, and most of the floor debate time was allocated on a Friday, prior to a three day weekend and after the week's final vote.

The brief debate and vote on this treaty were closely watched within this country and around the world. As evidence of that, most, if not all, Senators received a high volume of constituent calls, and no Senator is unaware that foreign leaders made rare appeals to this body.

The process followed with this treaty bore little resemblance to the process the Senate normally follows when it receives a treaty. The normal process includes careful consideration of a treaty's merits, an airing of the arguments from those who have objections, the addition of any safeguards that may be necessary, and, finally, a vote on ratification. In this case, that process was ignored and, some would argue, even maligned.

The Senate could have easily avoided a ratification vote, and, given the haste of its actions and the profound importance of the subject at hand, should have done so. Moreover, some members on the other side of the aisle clearly stated that they needed more time to examine this treaty, study its implications, and propose any appropriate amendments or side agreements. In fact, a majority of this body appeared to want more time to do so. That view is eminently reasonable considering how quickly this treaty was considered. Instead, all Senators were forced to make a fast decision and put their position on record. It is hard to avoid the conclusion that the defeat of this treaty was an end in itself, rather than a byproduct of considered action. Now, by this vote, the United States

Senate has allowed friend and foe to conclude that we want more nuclear testing and we need more nuclear explosions. We ignored Senator LEVIN's injunction to, at the very least, "do no harm." Instead, we have at a minimum muddled this nation's position with respect to containing the threat of nuclear warfare. All we had to do to avoid this outcome was to delay the vote. There were those on the other side of the aisle who endorsed doing just that. Regrettably, they were overruled by their colleagues who are overzealous opponents of this Administration.

I support the Comprehensive Test Ban Treaty, and, as the President stated, I expect that the treaty will be ratified—if not this year, then some year. Nuclear test explosions are becoming anachronisms; the tide of history is quickly sweeping away the last vestiges of their legitimacy. Prior to the vote, I had decided to support the President's request to put off the vote on ratification. It had become clear to the President and me and most other members of this chamber that, despite our strong support of this treaty, the Senate was not yet ready to support ratification. It was with regret that I arrived at that conclusion, because no one enjoys putting off a vote that will benefit the people of this nation, and, in this case, the people of the world. This treaty has been signed by over 150 nations. It is supported by nearly every member of the United Nations. Clearly it merited several days or even weeks of hearings in which experts on both sides of this issue would have a chance to present testimony and answer questions. More than that, though, it deserved to be ratified. Our nation is the world's greatest force for peace and freedom. It is not worthy of that stature for us to be outside the community of civilized nations that have committed themselves to an end to nuclear testing.

We have missed an opportunity to lead these nations, and to provide an example to countries like India and Pakistan, both of whom are on the verge of signing this treaty. Instead, we have, I fear, energized forces in those countries and others around the world that favor further testing or revoking pledges not to test.

This treaty will make the world more safe for our children and our children's children. We have a responsibility, despite the vote, to those future generations to do our part to stop nuclear detonations. If we fail in our responsibility, we will dash the hopes of generations yet to come. They may wonder why, when the world finally seemed ready to halt nuclear testing, the United States refused to go along.

Throughout the Cold War, nuclear tests may have been necessary to modernize this nation's nuclear weapons capability. But at the height of tensions with the Soviet Union, President

Eisenhower said that the failure to achieve a nuclear test ban "would have to be classed as the greatest disappointment of any administration, of any decade, of any time and of any party."

In 1992, President Bush, a former CIA Director and Ambassador to the United Nations, unilaterally halted nuclear weapons tests in the United States. President Clinton subsequently continued the moratorium. This treaty would halt nuclear weapons tests in other nations, as well. It would force other nations to do what this nation has already done and has been doing for these past several years.

Since the first test in 1945, the United States has conducted 1030 nuclear explosions—more than all other nations combined. As a result, we have far more test data and a far more deadly nuclear arsenal than any other nation. This treaty would effectively preserve this nation's position as the pre-eminent nuclear weapons power.

It would limit the ability of nuclear-capable nations from developing more sophisticated and more deadly nuclear weapons. It does not outlaw improvements and advancements to weapons, but without the ability to test the new weapons, nations would be hesitant to deploy them.

For those nations that do not yet possess a nuclear arsenal, this treaty will hinder their ability to develop such an arsenal. Those nations will be barred from conducting and studying a single nuclear explosion. Perhaps they could develop, at some time in the future, a crude nuclear arsenal, but they would face daunting uncertainties without having witnessed a single explosion.

This treaty enhances our national security. It has the support of the Joint Chiefs of Staff and several former military leaders including Gen. Colin Powell. Besides solidifying this nation's vast lead in nuclear technology and nuclear weaponry, it would assist us in monitoring nuclear explosions throughout the world. Regardless of whether this treaty goes into force, this nation must determine whether other nations are conducting nuclear explosions. This treaty mandates a global network of sensors and allows for on-site inspections, so it would greatly assist this nation in meeting its monitoring responsibilities.

Questions have been raised about whether we can maintain the reliability of our nuclear arsenal absent more nuclear tests. Many nuclear experts, however, assert that we can maintain a reliable deterrent, as we have since 1992, without the nuclear explosions. Furthermore, this nation plans to allocate \$45 billion over the next ten years to ensure the reliability of our stockpile. What other nation has greater resources to dedicate to its stockpile? What other nation is better

able, given its experience, to ensure the reliability of nuclear weapons?

Our allies, Britain and France, have conducted far fewer nuclear explosions than we have, yet they have ratified this treaty. Over half of the nuclear-capable nations in the world have ratified this treaty. We have the least to lose and the most to gain if this treaty goes into force. This nation must do its part and help rid the world of these terrible nuclear explosions. I urge my colleagues to support a reexamination of these issues and a reconsideration of the Senate's regrettable course of action.

S CORPORATION ESOPS

Mr. BREAUX. Mr. President, in 1996 and 1997, I supported the creation of S corporation ESOPs, which—while they may sound a bit obscure to some—are an innovative way of giving employees an ownership stake in their companies and providing for their retirement.

The design of these programs was quite deliberate, and intended to accomplish very specific policy objectives. We sought to create not only an administrable structure for these plans, but also a program that encouraged private businesses to give their workers a "piece of the rock" and help them save for their retirement. The law therefore allows some deferral of tax liability on current-year revenues of a participating S corporation, but of course only for that portion of the company's revenues that are put into the ESOP accounts of employees. That is to say, the deferral only exists so long as the monies are not realized by employee-owners; when they withdraw the funds for their retirement benefit, they also pay a tax, and in this case, at a much higher rate than standard capital gains.

Recently, some have questioned whether this incentive should be eliminated. I am delighted that a strong bipartisan majority of the members of the Senate Finance Committee and House Ways and Means Committee have indicated they want to preserve the fundamental attributes of S corporation ESOPs. We have carefully scrutinized this matter in recent months, particularly in the context of the tax extenders legislation. We have determined that Treasury's proposal to eliminate the deferral aspect of S corporation ESOPs is a serious threat to the vitality of S corporation ESOPs. In rejecting this proposal, Congress has affirmed that—at a time when national savings rates are abysmally low, when Americans worry how they will fund their retirement, and when we in Congress worry about the future of Social Security—we cannot afford to undo such important programs.

In response to Treasury's concerns with possible abuse of the system, we included a revenue raising provision in

the extenders package to strengthen the 1996 law. However, the Treasury Department objected to the provision and it was dropped during the last minute negotiations on the bill. Secretary Summers has agreed to work with me over the coming months on a provision to strengthen and preserve broad-based employee ownership of S corporations through ESOPs in the future.

Today, there are 100,000 or more workers in America who are using and benefiting from the S corporation ESOP rules that we designed. We have reason to be proud of this accomplishment, and to point to it as an example of how we are helping Americans build wealth for their futures and their families through private ownership. I believe more workers stand to benefit from this great opportunity, which is working as Congress intended. I believe, along with a strong bipartisan group of my colleagues, that we must do all we can to sustain and promote S corporation ESOPs. I appreciate the strong support of Chairman ROTH and other members of the Finance Committee in particular to achieve this objective, and look forward to working with them on an ongoing basis for this very important cause.

FALL OF THE BERLIN WALL

Mr. GRAMS. At the Brandenburg Gate, West Berlin, on June 12, 1987, President Reagan issued a stunning challenge: "General Secretary Gorbachev, if you seek peace if you seek prosperity for the Soviet Union and Eastern Europe, if you seek liberalization: Come here to this gate! Mr. Gorbachev, open this gate! Mr. Gorbachev, tear down this wall!" And less than three years later, the wall crumbled, along with the threat of communism as a viable, universalist alternative to democracy.

I remember reporting on the fall of the Berlin Wall as a newscaster. I remember those first tentative attempts to climb over it, and the rush of revelers that followed when no shots were fired. Remember, the wall was built to keep people in, and freedom out. The guard posts in the East were facing eastward, not toward West Berlin. It is incredible that the tenth anniversary of this seminal event passed almost without comment. For it marked the end of the Soviet Empire, and foreshadowed the end of the Soviet Union itself. The global correlation of forces, as the Soviets used to say, aligned with freedom, not oppression.

The Wall crumbled because President Reagan was committed to achieving peace through strength. The Reagan Doctrine asserted the need to confront and rollback communism by aiding national liberation movements in Afghanistan, Angola, Grenada, Cambodia, and Nicaragua. He proved that once

countries were in the Soviet camp, they need not remain there forever. He realized that our national prestige is reinforced and enhanced when we operate with a coherent, concise, and understandable foreign policy. And by doing so, he succeeded in inspiring and supporting dissidents behind the Iron Curtain who eroded the mortar of that Wall.

In contrast, the Clinton Administration has reacted to foreign policy crises, but has failed to develop a foreign policy. The Administration has lurched from managing one crisis to another, but never articulated the national interest in accordance with a core philosophy. Instead of consistently safeguarding and promoting our values abroad, it has acted on an ad hoc basis according to the needs of the moment, confusing our allies and emboldening rogue nations. Serbia was emboldened to conduct ethnic cleansing in Kosovo; North Korea was emboldened to develop nuclear weapons; Saddam Hussein was emboldened to strengthen his position in northern Iraq.

What is the Clinton Doctrine? We have been told about a "do-ability doctrine" whereby the United States acts "in the places where our addition of action will, in fact, be the critical difference." However, that alone cannot be the criteria for U.S. intervention. Under that formulation we could be expected to intervene anywhere in the world. And as Secretary Albright stated as our Ambassador to the U.N. "we are not the world's policeman, nor are we running a charity or a fire department."

However, as a practical matter, the combination of a "do-ability doctrine" with so-called "assertive multilateralism"—places the United States in the very position which Secretary Albright derided. It has resulted in both the abdication of our responsibilities and the misguided projection of our power. Instead of applying the Reagan Doctrine by equipping and training the Bosnian forces over our allies' objections, the Administration subcontracted our role of arming the Bosnians to a terrorist regime in Iran, unnecessarily endangering the lives of U.S. troops. Instead of arming the Bosnians, we supported our allies standing by in U.N. blue helmets, watching unarmed civilians be massacred in Srebrenica. In contrast, the attempt at nation building in Somalia, and the refusal to provide equipment requested on the ground because it would send the wrong signal, sacrificed the lives of 18 brave soldiers without regard to whether such action advanced our vital concerns. When this Administration acts according to the exigencies of the moment instead of according to an underlying philosophy, the country lurches from paralysis to "mission creep" without regard to the national interest.

Recently, there has been discussion of the possibility of reworking our entire military force structure—which is presently based on the capacity to fight two simultaneous major regional conflicts—in order to enable us to commit US troops to an ever-growing number of multilateral “peacekeeping” missions. I am concerned that we may sacrifice our vital national security interests in order to be able to participate in peripheral endeavors. We should not be shortsighted. We should not lose sight of what we must do in order to accomplish what we can do. Our military should be used to protect our national security interests, not provide peacekeeping in areas without strategic significance.

That kind of distinction will never happen under the Clinton Administration. President Clinton does not have the clarity of purpose of Ronald Reagan. No walls will be torn down. There is no Clinton Doctrine. There is only a half-hearted attempt to justify random acts under an artificial rubric and a series of slogans. And our country is the worse for it. We should note the fall of the Berlin Wall symbolizes more than just a victory of liberty over totalitarianism. It shows that armed with a core philosophy, a coherent doctrine, and a lot of courage, there is no limit to what we can accomplish.

ROMANIAN CHAIRMANSHIP OF OSCE

Ms. LANDRIEU. Mr. President, as we attempt to conclude our business for this session of Congress, I wanted to mention an important decision that has just occurred in Istanbul. Mr. President, as you know, Turkey is hosting the annual summit of the Organization for Security and Cooperation in Europe (OSCE). Our President was in attendance, and from reports, this summit has been a robust forum for debate.

Given recent history, it is impossible to overstate the importance that the OSCE might play in maintaining Europe's peace and stability. It is the only forum available where all the nations of Europe meet to discuss European concerns. Clearly, the status of European Security is more fluid at this time than at any other in the last 40 years. Therefore, one of the very important decisions that the OSCE must make at the Istanbul Summit, is who will chair the OSCE in 2001.

I am very pleased to announce that the OSCE has chosen the nation of Romania to undertake this important leadership role. The United States and several leading European nations had advanced Romania's candidacy, and I believe that the OSCE has made a very wise choice. Romania's value as OSCE chair derives from a number of factors. First, Romania's geostrategic position places it in the heart of the region

where stability is needed most. Despite lying at the crossroads of the Balkans, the Caucasus, and European Russia, Romania has managed to maintain excellent relations with all the parties. The OSCE desperately needs leadership that understands the problems of this region, while having no vested interest in any particular outcome. That is the sort of leadership that only Romania can bring to the table. Second, Romania is a role model for other Balkan nations. The economic and political reforms that Romania has undertaken, have not come easy—but that is part of her attraction to the other nations of the region. Romania's experience demonstrates that if willing to make the necessary sacrifices, democracy and a liberalized economy are within reach. Finally, Romania has a strong tradition of cooperation with this nation. Our friendship has been formalized through the 1997 Strategic Partnership, as well as Romania's vigorous participation in the Partnership for Peace.

Mr. President, Romanian chairmanship is a very positive harbinger for the future of Europe, and for the future of the Balkan Region. I congratulate the OSCE for their excellent choice. I wish Romania's leadership the very best wishes upon assuming this very weighty responsibility. We look forward to another session of productive dialogue and meaningful diplomacy upon their accession to the chairmanship.

THE 1999 STATE PARKS GOLD MEDAL

Mr. GRAHAM. Mr. President, today, I rise with my colleague Senator MACK to take a moment to recognize our Florida state park system, which recently received the prestigious 1999 National State Parks Gold Medal from the National Sports Foundation, Inc., a part of the 25,000-member National Sporting Goods Association. The State Parks Gold Medal is awarded every other year to the state park system considered America's best. We are proud and honored that Florida's state park system, which includes 151 diverse state parks throughout the state covering more than one-half million acres, received this recognition in October at the National Recreation and Park Association Annual Congress in Nashville, Tennessee.

Congratulations to Governor Jeb Bush, Florida Department of Environmental Protection, Secretary David Struhs, and the Department's Division of Recreation and Parks Director, Fran Mainella, on this achievement.

This nation's state parks play a key role in our society—they provide much needed recreational opportunities to Americans while protecting key resources. These parks create the link between our national parks, dedicated specifically to protection of the re-

sources for which the park was created, and our local parks, dedicated specifically to recreation. Without a strong state park system, the resources in our national parks will become stressed as people seek to fill unmet recreational needs. We are proud that the state of Florida recognizes this connection, and works to maintain a strong state park system.

In honor of “Florida's State Parks—Voted America's Best,” Governor Bush and the Florida Cabinet have designated Saturday, November 20 as a “free day” when admission charges to Florida state parks will be waived for all visitors. We invite all of our colleagues to a free day in one or more of America's best state parks that day.

Thank you, Mr. President, for the opportunity to recognize these outstanding natural areas, preserved forever for the enjoyment of this and future generations.

NOMINATION OF JOSEPH E. BRENNAN

Ms. SNOWE. Mr. President, last Wednesday, the Senate confirmed Governor Joseph E. Brennan as a commissioner on the Federal Maritime Commission, and this week Governor Brennan was sworn in for a term to expire in 2003.

Governor Brennan, who formerly served as a Member of Congress for four years, where he was a member of the House Merchant Marine and Fisheries Committee, and Governor of Maine for eight years prior to that, is eminently qualified to confront the challenges facing the maritime community. With his broad experience at both the state and federal level, Governor Brennan is an outstanding choice to serve as a Commissioner on the FMC.

His service in Congress gave him first-hand knowledge of federal maritime issues as a member of the House Merchant Marine and Fisheries Committee that will be invaluable on the Maritime Commission.

Established in 1961, the Federal Maritime Commission—FMC—is an independent regulatory agency charged with administering laws relating to shipping and the waterborne domestic and offshore commerce of the U.S.

The FMC's jurisdiction encompasses many facets of the maritime industry. The Chairman and four Commissioners of the FMC are responsible for protecting shippers, carriers and others engaged in foreign commerce from restrictive rules and regulations of foreign governments and from the practices of foreign-flag carriers that have an adverse effect on shipping in U.S. trades. The FMC also reviews and monitors agreements under shipping law, reviews and approves or rejects tariff filings, issues licenses for ocean freight

activities, administers passenger indemnity laws, reviews alleged or suspected violations of shipping statutes, and promulgates rules and regulations on shipping laws.

The maritime sector is vitally important to our economy, and the FMC's responsibilities are fundamental to sustaining U.S. competitiveness in this area.

As a Senator from Maine, a state with a rich maritime heritage, I am keenly aware that our nation has always been dependent upon the sea and has thus enjoyed a rich maritime tradition. To this day, our merchant marine remains an integral part of our culture and our economy.

Today, one out of every six jobs in the United States is marine related. America's ports support more than 95 percent of all our overseas foreign trade, and within the U.S., more than one billion tons of commercial cargo is transported by ship each year. We must do all that we can to preserve our maritime legacy for future generations, and the FMC plays a key role in the commercial component of this legacy.

Mr. President, I would also like to recognize Senator MCCAIN, Chairman of the Commerce Committee, for his leadership, and for making it possible to move the nominations of both Governor Brennan and Anthony Merck prior to adjournment. I am grateful to Senator MCCAIN and to Majority Leader LOTT for their efforts to move this nomination expeditiously—and to my colleagues for their support.

Finally, I would like to offer my heartfelt congratulations to Governor Brennan. I am very pleased that the President recognized that he would make a valuable contribution to the FMC. As senior Senator from Maine and a member of the Commerce Committee, I look forward to working with Governor Brennan on maritime issues in the years to come.

Mr. President, once again, I would like to thank Chairman MCCAIN, Majority Leader LOTT, and my colleagues, and I yield the floor.

THE RISING COST OF PRESCRIPTION DRUGS

Mr. JOHNSON. Mr. President, I want to address an issue of critical importance to millions and millions of Americans, an issue I have come to the floor previously to discuss and an issue that has become one of my highest legislative priorities, the lack of affordable prescription drugs.

Today, nearly thirty five percent of Medicare beneficiaries, 14 million people, have absolutely no coverage for prescription drugs. Unfortunately, these are also the same individuals who consume the majority of prescription drugs in our country. Studies indicate that eighty percent of retirees take at least one prescription drug every day

and those over the age of sixty-five take on average, eighteen and a half prescription drugs per year.

Older Americans spend a tremendous amount of money out of pocket on their health care expenses. It is estimated that seniors spend an average of fourteen percent on hospital admission costs, thirty one percent on physician visits, thirty four percent on prescription drugs and twenty one percent on other health care related expenses. Prescription drugs have become the number one health care expense for senior citizens in our country.

I came to the floor a few weeks ago to talk about this very same issue, but I am addressing this issue again because I believe this matter is too critical for Congress to ignore. It appears as though Congress will not reach an agreement before we adjourn for the year, or even have a meaningful discussion, on how we will provide relief to the millions of needy seniors throughout our country and my state of South Dakota who struggle every day to pay for their medications.

While prices for the prescription drugs most often used by older Americans are skyrocketing far beyond inflation, recently the pharmaceutical industry revealed in record breaking stock prices and an announcement of a proposed multi-billion dollar merger between Warner Lambert and American Home Products. This proposed deal would form the biggest merger in the history of the drug industry and create the largest drug maker in the world. The transaction between Warner Lambert and American Home Products is worth nearly seventy three billion dollars, billions more than the federal government spends on most of their thirteen individual appropriation bills.

News of this proposed merger, prompted another drug industry giant, Pfizer, Inc. to announce a counter offer to buy Warner Lambert at a cost of eighty-two and a half billion dollars.

On the heels of the pharmaceutical industry's financial exploits, "Families USA: The Voice for Health Care Consumers" recently released a report indicating that more than two thirds of the fifty most commonly prescribed drugs for seniors increased in price nearly two to three times faster than the rate of inflation. Last year, wholesale prices for fifty prescriptions commonly filled by the elderly rose by six and a half percent even though the overall inflation rate that year was just one and a half percent.

For example, the drug Lorazepam, used to treat Parkinson's disease, increased three hundred and eighty five percent over the last five years. The report also found that while the median profit for all Fortune five hundred companies was four and a half percent, manufacturers of drugs most commonly prescribed to seniors relished in profits at or above twenty percent in 1998.

The findings in the Families USA study reflect similar results that I found in a study that I had requested from the House Government Reform Committee on drug prices paid by South Dakota seniors.

The South Dakota study found that South Dakota's elderly pay more than twice as much for their prescription drugs as does a pharmaceutical company's favored customers, such as HMO's, large insurance companies or the federal government. The study found that price differentials are as high as one thousand four hundred and sixty nine percent for some drugs.

For the last several months, I have been holding meetings in communities across South Dakota on the subject of prescription drug prices. The response from seniors and young people alike on this issue has been overwhelming to say the least.

I have received nearly five thousand postcards and hundreds more letters in response to my request for South Dakotans to contact me with their opinions on this issue. I have asked South Dakotans to become a Citizen Cosponsor of the prescription drug legislation that I introduced with Senator KENNEDY, called the Prescription Drug Fairness For Seniors Act". Our bill would allow Medicare beneficiaries access to the same low prescription drug prices that the drug companies offer their "favored" customers, such as HMO's, large insurance companies and the federal government. This bill ends the price discrimination that now exists against the segment of the society who rely on prescription drugs the most, older Americans. South Dakotans have told me that they support this effort to make prescription drugs affordable.

Mr. President, we are forcing our senior citizens to make the unimaginable choice between "heating and eating" or buying their medication. This is a choice that no human being should have to make.

With the proposed drug industry merger between Warner Lambert and American Home Products, and the recently released Families USA study, today highlights two more examples which reinforces my belief that we need legislation to help lower the high cost of prescription drugs for American consumers.

A 73 billion drug industry merger has the potential to decrease any competition that still exists in the industry. Stock prices for the pharmaceutical industry are at an all time high which adds to their record profits. The losers for all of this are the American consumers who are forced to pay increasingly higher prices for prescription drugs.

By joining forces, these two drug companies expect a total cost savings of over one billion dollars over three years by spreading the cost of developing new drugs, while increasing the

sales force needed to market old and new products. If this merger deal goes through, I wonder if the drug companies will be willing to pass along any of their one billion dollar savings to the thousands of seniors that I have heard from across South Dakota who cannot afford their monthly medication bills?

I ask that a summary of the Families USA study be inserted into the RECORD following my statement.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

HARD TO SWALLOW: RISING DRUG PRICES FOR AMERICA'S SENIORS

INTRODUCTION

For older Americans, the affordability of prescription drugs has long been a pressing concern. Outpatient prescription drug coverage is one of the last major benefits still excluded from Medicare, and the elderly are the last major insured consumer group without access to prescription drugs as a standard benefit. Although many Medicare beneficiaries have access to supplemental prescription drug coverage, too often that coverage is very expensive and very limited in scope. What is more, such coverage is on the decline. As a result, older Americans—who are by far the greatest consumers of prescription drugs—pay a larger share of drug costs out of their own pockets than do those who are under 65. This means the prices of prescription drugs have a greater impact on older Americans than on younger persons.

Four years ago, Families USA found that the prices of prescription drugs commonly used by older Americans were rising faster than the rate of inflation. To determine if this trend of steadily increasing prices for prescription drugs has improved, remained the same, or worsened, Families USA gathered information on the prices of the prescription drugs most heavily used by older Americans over the past five years. Using data from the Pennsylvania Pharmaceutical Assistance Contract for the Elderly (PACE) program, we analyzed the prices of the 50 top-selling prescription drugs most heavily used by older persons.

Our analysis shows that, in each of the past five years, the prices of the 50 prescription drugs most used by older Americans have increased considerably faster than inflation. While senior citizens generally live on fixed incomes that are adjusted to keep up with the rate of inflation, the cost of the prescription drugs they purchase most frequently has risen at approximately two times the rate of inflation over the past five years and more than four times the rate of inflation in the last year.

FINDINGS

The prices of the 50 prescription drugs most frequently used by the elderly rose by more than four times the rate of inflation during calendar year 1998. (The data on average drug price increases used in this report weight drug price increases by sales. This means that the average drug price increases reported take into account the market share of each of the 50 top-selling drugs. This is the methodology often used by industry sources.) On average, the prices of these top 50 drugs increased by 6.6 percent from January 1998 to January 1999, though the general rate of inflation in that period was 1.6 percent.

From January 1998 to January 1999, of the 50 drugs most commonly used by the elderly:

More than two-thirds of these drugs (36 out of 50) rose two or more times faster than the rate of inflation.

Nearly half of these drugs (23 out of 50) rose at more than three times the rate of inflation.

Over one-third of these drugs (17 out of 50) rose at more than four times the rate of inflation.

Among the 50 drugs most frequently used by seniors, the following drugs rose more significantly in price from January 1998 to January 1999:

Lorazepam (manufactured by Mylan and used to treat conditions such as anxiety, convulsions, and Parkinson's), which rose by over 279.4 percent (more than 179 times the rate of inflation);

Furosemide (a diuretic manufactured by Watson that is used to treat conditions such as hypertension and congestive heart failure), which rose by 106.6 percent (more than 68 times the rate of inflation);

Lanoxin (manufactured by Glaxo Wellcome and used to treat congestive heart failure), which rose by 15.4 percent (almost 10 times the rate of inflation);

Xalatan (manufactured by Pharmacia & Upjohn and used to treat glaucoma), which rose by 14.5 percent (more than nine times the rate of inflation); and

Atrovent (manufactured by Boehringer Ingelheim and used as a respiratory agent in the treatment of asthma, bronchitis, and emphysema), which rose by 14.1 percent (more than nine times the rate of inflation.)

Over the five years from January 1994 to January 1999, the prices of the 50 prescription drugs most frequently used by older Americans rose twice as fast as the rate of inflation. On average, the prices of these drugs rose by 25.2 percent—twice the rate of inflation, which was 12.8 percent over that period.

Of the 50 drugs most frequently used by older Americans, 39 have been on the market for the five-year period from January 1994 to January 1999.

The prices of 36 of those 39 drugs increased faster than the rate of inflation over the five-year period.

More than two-thirds of those drugs (28 out of 39) rose at least 1.5 times as fast as the rate of inflation over the five-year period.

Nearly half of those drugs (19 out of 39) rose at more than two times the rate of inflation over the five-year period.

More than one-fourth of those drugs (10 out of 39) rose at least three times the rate of inflation over the five-year period.

Of the 39 drugs that were used most frequently by seniors and that were on the market for the period from January 1994 to January 1999, the drugs that rose most significantly in price are:

Lorazepam, which rose by over 385 percent (more than 30 times the rate of inflation);

Imdur (manufactured by Schering and used to treat angina), which rose by 111 percent (almost nine times the rate of inflation);

Furosemide, which rose by 107 percent (more than eight times the rate of inflation);

Lanoxin, which rose by 88 percent (almost seven times the rate of inflation); and

Klor-Con 10 (manufactured by Upsher-Smith and used as a potassium replacement), which rose by 84 percent (more than six times the rate of inflation).

Of the 39 drugs that were used most frequently by seniors and that were on the market for the period from January 1994 to January 1999, 31 increased in price on at least five occasions during those five years. During those years, the following drugs increased in price at least seven times:

Imdur, which increased 10 times;

Premarin (manufactured by Wyeth-Ayerst and used as an estrogen replacement), which increased eight times;

Atrovent, which increased eight times;

Pravachol (manufactured by Bristol-Myers Squibb and used to reduce cholesterol), which increased seven times;

Synthroid (manufactured by Knoll and used as a synthetic thyroid agent), which increased seven times; and

K-Dur 20 (manufactured by Schering and used as a potassium replacement), which increased seven times.

During the last two years, there has been an acceleration in price increases of the drugs most commonly used by seniors. From 1995 to 1996 to 1997, those drug prices rose 1.3 and 1.2 times faster, respectively, than the rate of inflation. From 1997 to 1998 and 1998 to 1999, those drug prices rose 1.7 and 4.2 times faster, respectively, than the rate of inflation.

The median net profit for manufacturers of the 50 most prescribed drugs for senior citizens was 20.0 percent in 1998—4.5 times larger than the median net profit of 4.4 percent for all Fortune 500 companies.

AMERICA'S ROLE IN THE 21ST CENTURY

Mr. COVERDELL. Mr. President, I rise to day to draw your attention to an informative and thought-provoking foreign policy lecture that our colleague and good friend, MIKE DEWINE, recently gave in Oxford, Ohio, at his alma mater—Miami University. His address was a part of Miami University's distinguished Hammond Lecture Series, which first began nearly 38 years ago in January 1962. Our esteemed former colleague from Arizona, Barry Goldwater, presented the first lecture in the Series, which, incidentally, Senator DEWINE attended during his first visit to the Miami campus.

I draw your attention to Senator DEWINE's address because it focuses on a fundamental question that the American people, the President, and we here in Congress must consider. That question is this: "What role will the United States play in the world, as we enter the 21st Century? In posing this critical question, Senator DEWINE discusses several of the challenges and concerns that our country faces in forming a foreign policy doctrine for the future. I encourage you to take some time to read this reasoned, well-grounded piece, and consider the questions it raises.

Mr. President, I ask unanimous consent that a copy of the 1999 Hammond Lecture, given by Senator MIKE DEWINE, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

"AMERICA'S ROLE IN THE WORLD IN THE 21ST CENTURY

Dr. Shriver, thank you very much. It is always a daunting task to follow Dr. Shriver. And, for that kind introduction, I thank you. President Garland and members of the Hammond Lecture Series Committee—thank you

for inviting me to be with all of you here tonight.

Dr. Shriver, my wife Fran, and I started at Miami University on the same day. Dr. Shriver started as President in the Fall of 1965, and Fran and I started as freshmen that same day. We all entered Miami together—Dr. Shriver just stayed here a little longer!

Fran and I did spend four very productive years here at Miami. We left with two degrees and two children—two children, by the way, who graduated from Miami and have married Miami graduates. Of our eight children, three—so far—also have graduated from Miami.

I am particularly honored to be giving the Dr. W.A. Hammond Lecture this year. As Dr. Shriver said, Dr. Hammond lived in our home county—in Greene County. He was a chemist, an industrialist, a community leader—a person who cared passionately about our history, about government, about politics, and about America.

His legacy is not just this lecture series. I see his legacy every time that I'm back home. I see it in the long stretch of land that lies along the Little Miami River—still undeveloped and still beautiful. That's just one of his legacies. I also see it when I go to Xenia and see the Galloway log cabin. He was instrumental in preserving it with his own efforts, his own money and his own ingenuity. So, he has left a legacy for us in our home county and a legacy for our state.

As a high school freshman, I came on the Miami University Campus to attend the first W.A. Hammond Lecture. The speaker was then United States Senator Barry Goldwater. It was January 1962. It was a rather interesting day for me, because it was actually not only the first time I saw a United States Senator, but it was also the first time I had seen this wonderful campus.

One of the things that I recall from that speech by Senator Goldwater is that I thought the question and answer period was a lot more interesting than the speech. I think it's probably typical of most speeches. The speech was fine, but I thought the questions and answers were particularly interesting. So, I hope tonight to spend a significant period of time with you on comment and questions on whatever topics you want to address.

As we approach a new millennium, as well as the next presidential election, I think it is appropriate for us to discuss where the United States is going as we enter the next century. What kind of a country do we expect our children, our grandchildren, and our great-grandchildren to live in?

When John F. Kennedy was running for President in 1960, he said that the job of a president is to lay before the American people the unfinished business of the country. That's still the job of the President—a job, I think also, of Senators and other leaders.

So, I'd like to talk tonight about that unfinished business of this country and particularly the unfinished business of this generation and of the next generation.

What are the big challenges and other important things that we have to deal with?

We have a crisis in education, particularly in our inner cities, and particularly in Appalachia.

We must solve—especially in Ohio—the school funding disparity problem and question.

We must, as a country, attract the smartest, the best, and the brightest of our students to the profession of education—the profession of teaching.

And, quite candidly, our schools of education must continue to aggressively reex-

amine how they prepare our teachers for the future.

We must do a better job of attracting and encouraging professionals and people with real world experiences to make teaching a second career.

The Congress, the President, and the American people must—within the next several years—deal with the Medicare question and deal with the Social Security question. For all of the talk by both the President and the Congress—Democrats and Republicans—about “saving Social Security” and “saving” this surplus for Social Security, the reality is that Social Security and Medicare cannot be “saved” without fundamental reform. All of the surpluses in the world cannot hold back the demographic tidal wave of the baby boom generation as it approaches retirement. Reform—reform, not budget surpluses, will save Social Security.

There are certainly other issues that this generation must tackle: health care, medical research, and a subject near and dear to my heart—the crisis in our country's foster care system.

However, our topic tonight is foreign affairs and what the U.S. role in the world should be in the 21st Century. So, I will now take a stab at that.

When Senator Goldwater addressed Miami in 1961, our nation was in the midst of the Cold War, and certainly no typical American family could go through any day without being touched by that larger, global struggle. It was a time of bomb shelters and of school children crawling under their desks. Young American men and women were sent to all corners of the globe—to places they barely could pronounce, spell, or even find on a map—all in defense against communist expansion. We raced the Soviets to the Moon—and won. The Olympic games were seen as epic struggles to reaffirm the strength of our system.

Senator Goldwater devoted the first Hammond Lecture to a discussion of the ideological struggle between democracy and communism. And, as he said on that January night nearly thirty-eight years ago: “We are fighting an ideology that is dedicated to destroying us. We can win this fight against Communism without firing a shot or dropping a bomb.”

Perhaps, to his own surprise, Senator Goldwater lived to see the fulfillment of that prophecy. Ten years ago this week, the most dramatic symbol of the Cold War—the Berlin Wall—fell, and most significantly, not because of some advancing army. It fell because its foundation—communism—could no longer sustain itself.

In retrospect, the fall of the Soviet Union was neither a complete defeat for totalitarianism, nor really a complete victory for democracy.

The end of the Cold War also did not end the nuclear threat.

The world remains today a dangerous and very uncertain place. Although we are experiencing a period of peace and prosperity really not seen in our country since the 1920s, this “peace” has not been tranquil. American air and ground forces have been dispatched to places such as Saudi Arabia, Somalia, Haiti, Bosnia, and Serbia. We've engineered military actions against Iraq and strikes against terrorists in the Sudan and the hills of Afghanistan.

We stand on the brink of a nuclear arms and missile race in South and East Asia and the Middle East. And, nationalism has raised the prospect of war in several regions—from Central Europe to the Asian Subcontinent.

And, nations in our own hemisphere face threats that could undermine—if not overwhelm—the progress of our movement toward democracy that we successfully achieved in this hemisphere over a decade ago. In sum, we have moved from a Cold War to a Hot Peace.

The challenges of global stability did not cease with the end of the Cold War. Peace must be protected, enforced, and advanced with the same vigilance and determination we demonstrated to arrive at this point in our history. As Henry Kissinger observed more than ten years ago: “History knows no resting places; what does not advance must sooner or later decline.”

Since the beginning of the so-called American century, when a Canton, Ohio, resident named William McKinley was re-elected to the presidency, our nation's chief executives have faced the challenge of defining America's role in shaping and responding to world events.

The eight Presidents who have led our nation during the Cold War were presented with the opportunity to pronounce, or perhaps characterize, the nature of American foreign policy. During that time, we went from a policy of containment to a policy of detente, and from there to a policy of political containment and military buildup. Now, one may agree or disagree with each of these policies, but there is no dispute that each of these Presidents—from Harry Truman to George Bush—led with a clear vision, or doctrine, if you will, that guided U.S. foreign policy and influenced the shaping of multinational affairs during their terms of office.

Unfortunately, our current Administration never seized the opportunity to articulate a clear, thoughtful doctrine, outlining America's role and place in a post-Cold War world.

Sadly, history will not record nor remember the Clinton doctrine.

Instead of a foreign policy geared toward anticipating and shaping events abroad, we have watched events abroad shape our foreign policy.

The future and security of our nation must be—absolutely must be—the dominant theme of the next presidential election. Each candidate has to answer one fundamental question: What should be America's role in this post-Cold War world?

The next President—working with Congress, with the American people, and with our global partners—must develop a new bipartisan foreign policy doctrine—a McCain Doctrine, or a Bradley Doctrine, or a Gore Doctrine, or a Hatch Doctrine—a doctrine for this country and for our people—a doctrine to define our role as we move into the next century.

To be sure, there is not one right answer to what role we should play. These are very, very difficult questions. The world is a complicated place. There are no easy, simple solutions to any of the conflicts and challenges our world faces. But, one thing is certain: Protecting our national security and promoting our interests abroad will depend on the kind of vision, the kind of leadership, and the kind of foreign policy doctrine that our next President brings to this task.

As we enter the 21st Century, our next President must—in a bi-partisan manner—engage Congress and the American people in how best to define and how best to articulate a principled and practical approach to U.S. engagements abroad. This means including the American people in an open, foreign policy dialogue. It means getting their support of U.S. involvements in global struggles. And, finally, it means creating a foreign policy doctrine that is neither a Republican nor

a Democrat plan, but is rather "the American plan."

In so doing, I believe that there are certain fundamental principles that should serve as the basis for defining America's role in foreign affairs. So, tonight, I'd like to spend a few minutes sharing some of my thoughts about what those principles are and how they can affect our U.S. role in the 21st Century world. I do not mean for this to be an exhaustive list, but I believe that our foreign policy must include, at the very least, these principles.

And so, I offer them in the spirit of discussion and dialogue—in the spirit of what I expect of the next President. That means that I expect the next President to lead this discussion with the American people, with an understanding that the choices are tough, and many times the choices we are faced with are not good ones. And, while it is tough, unless we start the dialogue—unless we start the discussion—unless we frame it with the sense of where do we go as a country in the post-Cold War era, we are never going to end up where we want to be and where we need to be.

PRINCIPLE NO. 1

The first, and perhaps most obvious, principle is that the United States must lead. We have to lead in foreign affairs. Our country must be an active, engaged player in the world, striving for solutions that look beyond the short-term. Our credibility in the world community depends on it.

Without a clear vision and direction for U.S. foreign policy, our nation will continue on an aimless path. After more than forty years of a bipolar-driven foreign policy, the end of the Cold War put this country at a fundamental foreign policy crossroads. Seven years later, tragically, we are still at that crossroads.

A lack of solid U.S. leadership in the area of foreign affairs has not come without cost. Our military has been deployed around the world to its breaking point. Our credibility in the world community certainly has declined. And, the world is even more dangerous and unstable now than during the Cold War.

I've noted already some examples of exactly how dangerous the world is today. What's troubling is how little U.S. involvement has done to reduce the dangers that we face. Despite billions in U.S. assistance, Russia's government and economy teeter on the verge of collapse under the weight of rampant crime and rampant corruption. North Korea has become the single largest recipient of U.S. aid in East Asia, but continues to develop nuclear technology and missiles capable of reaching most of the Western United States, and, I might add, also continues to starve its own people. Despite our stern warnings, China and Russia continue to assist rogue nations like Iran and Iraq in their obsessive quests to acquire weapons of mass destruction. All these issues, together, present challenges that require strategic thinking and bi-partisan U.S. leadership.

We, as a nation, must take a lead in exporting our democratic values to our neighbors in the Western Hemisphere and to other areas of the world. When the world looks for leadership, it can look to only one place—and that place is the United States. History has put us where we are. If the United States does not lead, there is no one else who can lead—and frankly, no one else who will lead.

PRINCIPLE NO. 2

The second key principle that I believe should guide our foreign policy in the next

century is this: The peace and stability of our own hemisphere must be one of our top priorities. You see, the problems of our hemispheric neighbors are our problems, as well. We, as a nation, stand to lose or gain, depending on the economic health and security of our own neighbors. In other words, a strong, and free, and prosperous hemisphere means a strong, and free, and prosperous United States.

Let's look at the example of our neighbors to the south in Latin America. When I was first elected to the U.S. House of Representatives in 1982, Soviet and Cuban influence in Latin America was the dominant issue. Today, the communists have been replaced as a power by the drug dealers. The perverse presence of drug trafficking throughout the region represents a very significant and very real concern—one that puts at risk the stability of our hemisphere.

The disintegrating situation in democratic Colombia really illustrates this.

No democracy in our hemisphere today faces a greater threat to its own survival than does Colombia. That democratically elected government is embroiled in a bloody, complex, three decade-long civil war against two well-financed, heavily-armed guerrilla insurgency groups—the Revolutionary Armed Forces of Colombia (otherwise known as the FARC) and the National Liberation Army (or ELN). Also involved is a competing band of about 5,000 ruthless paramilitary operatives.

The real source of violence and instability in Colombia, though, is the drug traffickers. According to the Colombian Finance Ministry, the Colombian drug trade brings in to Colombia up to \$5 billion a year, making it Colombia's top export. To maintain a profitable industry, a significant sum of these drug revenues goes to hire the guerrillas and, increasingly, the paramilitary groups.

Just to give you an idea about how the lives of people in Cincinnati, Ohio, and Bogota, Colombia, are closely linked, consider this: When a drug user buys cocaine on a street corner in Cincinnati, or Cleveland, or Chicago, that person is funding violent anti-democratic activity that threatens the lives of innocent Colombians. I have walked through the poppy fields in Colombia with the President of Colombia and have seen—first-hand—how the drug trade is fueling the violence and instability in that country and in the region.

The United States has a clear economic interest in the future stability of Colombia. Last year's two-way legal trade between the United States and Colombia was more than \$11 billion. In fact, the United States is Colombia's number-one trading partner, and Colombia is the fifth largest market for U.S. exports in the region.

I have met with Colombian President Pastrana both in Washington and in Bogota to discuss how our two countries can work together to resolve this deteriorating situation. One way is to invest more in Colombia's drug fighting capability and improve economic opportunities. I have introduced legislation to provide that additional investment. But, this legislation also strengthens the capability of the Colombian government to enforce the law—the rule of law—and provides assistance for human rights training and alternative crop and economic development—two things that are absolutely essential. With this bill, we are investing in making Colombia a stronger, more stable democracy, and a stronger, capable partner in building a hemisphere free from the violence and the decaying influence of drug traffickers and human rights abusers.

Stopping the drug trade, though, in Colombia and Latin America is only one way that we can preserve democracy. We must move forward to integrate the entire hemisphere economically. The North American Free Trade Agreement (NAFTA) is the first and most significant step we've taken in that direction. Recently, the Senate took a positive step toward hemispheric trade liberalization by passing legislation that would extend the benefits of NAFTA to the countries in Central American and the Caribbean.

We have to do even more to pursue a hemispheric free trade initiative. Trade integration will occur in this hemisphere, whether or not we are a part of it. It is in our national interest to bring more Latin American countries into bilateral and multilateral trade agreements with the United States. If we fail, others will fill the void. Right now, Europe, Asia, and Canada are consolidating their economic base throughout Latin America. They certainly are not waiting for the United States. They'd prefer us standing on the sidelines. We must not let this happen. The longer we wait, the more we stand to lose.

PRINCIPLE NO. 3

The third principle that I will offer for discussion tonight is this: Our foreign policy must reinforce and promote our own core values of democracy, free markets, human rights, and the rule of law. I am not at all ashamed to say that our most important export to the international community is our ideals and our ideas. In this country, we are committed to democracy and human rights. We cherish open elections, and we cherish our freedom of speech. We strive to promote free trade and fair trade, so that everyone in our nation has a chance to prosper. We fiercely protect our freedoms, as we should.

I believe passionately that every person in the world should have the same opportunity to enjoy these basic democratic values. We have, over the last twenty years, made significant progress in promoting our democratic values abroad. Let's again look at the example of Latin America.

In 1981, 16 of the 33 countries in our hemisphere were ruled by authoritarian regimes—either of the left or of the right. Today, all but one of those nations—Cuba—have democratically elected heads of government. They're not perfect. Maybe they don't comply exactly with how we see democracy, but they're all moving in the right direction.

The hard, day-to-day work of democracy, however, comes after the elections. It is by no means an easy task to create a democratic society that fosters freedom or expression, where votes matter and human rights are respected. Democracy-building is a slow, often cumbersome process that evolves over time.

Key to sustaining democracy and nurturing prosperity in Latin America, or in any developing democracy, requires a commitment to the rule of law. That means providing effective responses to current threats, including corruption, criminal activity, drug trafficking and violence. Police and impartial judiciaries must be in place to fight such threats.

If no one enforces the law, no one will uphold the law. And, if that is the case, there will be no jobs, and there will be no economic growth, because there will be no foreign or domestic investment.

I have traveled to a number of these countries and what you see in country after country is a struggle for democracy, as the people move from the election process to the tough work of democracy. This is the daunting challenge they face.

The daunting challenge, quite candidly, is that, many times, there is not rule of law after election day. People and companies won't invest in these countries. They are afraid to invest—they are afraid to invest, because they don't know if their assets will be protected or if they will be stolen. And, if they are stolen, they don't know if there will be any redress. That kind of uncertainty does not encourage investment.

People need to be able to look to the courts, and to the prosecutors, and to the judicial system. When you help that judicial system, you help investment, and you ultimately help create jobs and help people come out of poverty.

The same thing is true for farmers—campesinos—in Guatemala, or Honduras, or Nicaragua, or throughout this hemisphere. If they do not believe that they own land—that they can control their land—they won't invest in their land. They won't put anything back into the soil, as farmers must, if they are to prosper.

So, again, it goes back to the judicial system—to the rule of law—and to the courts. One of the greatest things our country has the ability to do is send abroad our judicial and rule of law expertise. We've been doing that. And, while I think we have been doing a pretty good job, there is still more we can do.

Economies cannot expand and democracies cannot thrive without law enforcement officers and judges committed to law and order. The challenge we face today is that a number of Latin American countries do not have the kind of judiciaries needed to make the rule of law work.

Citizens should not fear the police. Law enforcement should be trained to protect the people and to provide stability and tranquility. Many of the emerging democracies have a long, long history of police abusing human rights and of the military abusing human rights. That has to change. And, it can change through our assistance and through our expertise.

We already are investing time and money to export our principles of law enforcement to train police in Central America through the International Criminal Investigative Training Assistance Program, known as ICITAP. This is an important program, but it's only half of the law enforcement equation. A well-trained police force means little or nothing if corrupt and incompetent prosecutors and judges cannot prosecute and sentence criminals.

It means nothing if a certain elite class of the population—economic, political, ethnic—is above the rule of law and operates in the country with impunity. That has to change in these countries, as well. And, that we can accomplish.

The U.S. government already has worked to help strengthen some aspects of the judiciary systems in Latin America and in other places in the world such as Bosnia, but we have a great deal farther to go. If we fail to focus on this matter, we will miss a great opportunity to build on the foundation we worked so hard to establish. Even worse, we put the very foundation, itself, at risk of collapse. One of the great wonders of a free society is that all of its core values—democracy, free markets, rule of law, and human rights—really reinforce the others. To strengthen one strengthens them all.

CONCLUSION

As we enter the 21st Century and contemplate our nation's role in the world, we must think about past mistakes, learn from them, and move forward toward a more bal-

anced, principled, bi-partisan foreign policy. In doing so, we should consider these principles, which I have outlined tonight:

1. The United States must lead in foreign affairs;

2. The peace and stability of our own hemisphere must be one of our top priorities; and

3. Our foreign policy must reinforce and promote our own core values of democracy, free markets, human rights, and rule of law.

In the global struggle for peace and stability, there is no substitute for strong, effective U.S. leadership. Leadership means foresight. It means thinking ahead. It also means credibility.

This week, ten years ago, the Berlin Wall fell, marking the beginning of the end of the Cold War. During this time of remembrance for this anniversary and as we pause, as Dr. Shriver so appropriately pointed out, to pay honor to our veterans, the following words. I think, have significance:

"Ladies and gentleman, the United States stands at this time at the pinnacle of world power. It is a solemn moment for the American democracy. For with this primacy in power is also joined an awe-inspiring accountability to the future. As you look around you, you must feel not only the sense of duty done, but also you must feel anxiety lest you fall below the level of achievement."

Now these words, while they would be a fitting tribute to the resilience of our nation during the Cold War, actually were spoken by Winston Churchill more than fifty years ago at Westminster College in Fulton, Missouri. Although known for its reference to "the iron curtain," Mr. Churchill's now famous speech was actually titled, "The Sins of Peace." In his typically less than subtle manner, Mr. Churchill was suggesting that times of peace require the same strength of purpose as times of war. He certainly was right.

Winston Churchill saw, before many did, what lay ahead for the world. He saw a difficult, uncertain, and volatile peace. He did advise his American allies to pursue an overall strategic concept and outline the methods and resources needed to enforce this strategy. He was calling on America to define its role in a post-World War II world. President Harry Truman, fortunately for us, had the vision and the resolve to accept this challenge and to redefine America's role in foreign affairs.

No doubt, Mr. Churchill would offer similar advice today. All of us here do have an "awe-inspiring accountability to the future." The challenges are many, but I believe they can be met. Doing so requires one significant first step: We must develop, as a country, a doctrine that will guide and define our role in the world. If our next President does that—if our next President follows the example of John Kennedy, Dwight Eisenhower, or Harry Truman, we will have a doctrine that will take us into the next century. And, we will have a doctrine that will be consistent with our principles, with our values, and with our vision of the types of world in which we want our children, our grandchildren, and our great-grandchildren to grow up.

FLORIDA'S ANTI-TOBACCO YOUTH MOVEMENT: THE SWAT TEAM

Mr. GRAHAM. Mr. President, I have been to the floor many times in the past to speak about the expense smoking has cost this great country—both

in terms of dollars that the federal and state governments have paid for the care of those afflicted with tobacco-related illnesses and in terms of lives lost from this dreadful addiction.

I have supported state and federal efforts to recoup a portion of these lost dollars from the tobacco industry, as well as their efforts to begin education campaigns that would teach all Americans about tobacco's harmful effects.

And, most importantly, I have worked with my colleagues to ensure that tobacco companies are no longer targeting our youth.

Tobacco companies must stop marketing their wares to our most vulnerable population, be it through magazine ads that depict smoking as the "cool" thing to do or through the strategic placement of billboard advertisements near their schools and play areas.

Mr. President, I am here today to let this distinguished body know that in Florida our message is being heard.

Florida's children are learning about the health hazards that tobacco poses, and they are deciding not to smoke.

This great news is due, in large part, to the successes of our innovative anti-tobacco pilot program—the "Truth" campaign.

Funded with the monies awarded in Florida's 1997 tobacco settlement, the "Truth" campaign has a very simple mission—to counter the misinformation that our youth hear about smoking.

Funded with the monies awarded in Florida's 1997 tobacco settlement, the "Truth" campaign has a very simple mission—to counter the misinformation that our youth hear about smoking.

Much of this truth-telling is done by students working in what are known as SWAT teams.

The Students Working Against Tobacco concept was created in February 1998.

Today, SWAT teams are operating in all 67 counties of Florida, with more than 10,000 members throughout the state.

With a goal of reducing teen smoking through youth empowerment, the SWAT teams have formed partnerships with their communities and developed both marketing and education campaigns to impart the truth about tobacco.

Although SWAT teams have been operational for less than two years, they are already making progress in the war against tobacco.

Statewide studies are showing that over 95 percent of Florida's youth recognize the "Truth" Campaign and know its message to be anti-tobacco.

Additionally, surveys are showing that teenage smoking has decreased since SWAT's 1998 inception.

Tobacco use among high school students has dropped by 8.5 percent, and

middle schools have seen a dramatic 21 percent decline in student tobacco use.

This reduction is particularly significant when compared to national statistics showing that states without an anti-tobacco campaign have seen an approximately eleven percent rise in tobacco use.

Florida's success may be due to SWAT's willingness to employ both education and mass media as means of spreading their message.

Ads that are designed by students are played on local television stations, informing teens of the perils of tobacco use.

Similarly, billboards that the SWAT teams have designed are displayed within the communities.

These are complemented by an education component that is adaptable for all school grades.

Health classes provide an opportunity to discuss the impact smoking has upon the body, from halitosis to lung cancer.

In reading classes, young children learn to read using books that are about how to stay healthy and smoke-free.

Science courses have moved the anti-tobacco campaign into the technology age, employing CD-Rom programs such as "Science, Tobacco and You," an innovative computer program that demonstrates tobacco's effects on the body—from first puff to final drag.

Students scan their photo into the computer, becoming a virtual reality smoker.

As the program progresses, students watch their teeth, skin, bones and lungs begin to deteriorate.

Currently, SWAT teams are strengthening their community outreach and grassroots work.

In their current effort, students are working to get tobacco ads removed from magazines that have either one million youth readers or over ten percent of total readership under age 18.

They are collecting these ads and returning them in bulk to the tobacco companies, with a cover letter stating that Big Tobacco needs to strengthen their commitment to reducing teen smoking.

SWAT teams have offered to meet with industry representatives to share ideas about how this mutual goal might be met.

Once again, the SWAT program has achieved success.

At their next board meeting, they will be joined by representatives from Brown & Williamson Tobacco Company to discuss how to better target tobacco ad campaigns to adults, not youth.

Mr. President, I am very proud of these young people.

I am here today to commend them publicly, and to share their accomplishments with all of you because they are truly making a difference in the battle against teenage smoking.

Florida has encouraged its youth to creatively combat one of the foremost problems facing today's teenagers, entrusting them with the tools and means to successfully meet their goals.

As other areas work towards the development of a youth-based anti-tobacco initiative, SWAT will be the model upon which their programs will be based.

To the over 10,000 members of SWAT, thank you for your efforts to educate Floridians about the dangers of tobacco.

DEATH ON THE HIGH SEAS ACT

Mr. SPECTER. Mr. President, as it appears unlikely the House and Senate conferees will come to agreement this year on a bill to reauthorize the Federal Aviation Administration, I have sought recognition today to introduce legislation which will provide equitable treatment for families of passengers involved in international aviation disasters. This measure is identical to legislation I introduced in the 105th Congress, and similar to provisions contained in both the House and Senate FAA bills.

As my colleagues know, the devastating crash of Trans World Airlines Flight 800 on July 17, 1996 took the lives of 230 individuals. Perhaps the community hardest hit by this tragedy was Montoursville, PA, which lost 16 students and 5 adult chaperones from Montoursville High School who were participating in a long-awaited French Club trip to France.

Last Congress it was brought to my attention by constituents, who include parents of the Montoursville children lost on TWA 800, that their ability to seek redress in court is hampered by a 1920 shipping law known as the Death on the High Seas Act, which was originally intended to cover the widows of seafarers, not the relatives of jumbo-jet passengers embarking on international air travel.

Under the Warsaw Convention of 1929, airlines are limited in the amount they must pay to families of passengers who died on an international flight. However, domestic air crashes are covered by U.S. law, which allow for greater damages if negligent conduct is proven in court.

The Warsaw Convention limit on liability can be waived if the passengers' families show that there was intentional misconduct which led to the crash. This is where the Death on the High Seas Act comes into play. This law states that where the death of a person is caused by wrongful act, neglect, or default occurring on the high seas more than 1 marine league which is 3 miles from U.S. shores, a personal representative of a decedent can sue for pecuniary loss sustained by the decedent's wife, child, husband, parent, or dependent relative. The Act, however,

does not allow families of the victims of TWA 800 or other aviation incidents such as the Swissair Flight 111 crash and the recent EgyptAir 990 tragedy to obtain other types of damages, such as recovery for loss of society or punitive damages, no matter how great the wrongful act or neglect by an airline or airplane manufacturer.

My legislation would amend Federal law to provide that the Death on the High Seas Act shall not affect any remedy existing at common law or under State law with respect to any injury or death arising out of an aviation incident occurring after January 1, 1995. In effect, it would clarify that federal aviation law does not limit remedies in the same manner as maritime law, and permits international flights to be governed by the same laws as domestic flights.

My legislation is not about blaming an airline or airplane manufacturer. It is not about multimillion dollar damage awards. It is about ensuring access to justice and clarifying the rights of families of victims of plane crashes.

The need for this legislation is suggested by the Supreme Court decision *Zicherman v. Korean Airlines*, 116 S. Ct. 629 (1996), in which a unanimous Court held that the Death on the High Seas Act of 1920 applies to determine damages in airline accidents that occur more than 3 miles from shore. By contrast, the Court has ruled that State tort law applies to determine damages in accidents that occur in waters 3 miles or less from our shores. *Yamaha v. Calhoun*, (1996 WL 5518)

I believe it is inequitable to make such a distinction at the 3 mile limit in civil aviation cases where the underlying statute predates international air travel. I would note that the Gore Commission on Aviation Safety and Security noted in its final report that "certain statutes and international treaties, established over 50 years ago, historically have not provided equitable treatment for families of passengers involved in international aviation disasters. Specifically, the Death on the High Seas Act of 1920 and the Warsaw Convention of 1929, although designed to aid families of victims of maritime and aviation disasters, have inhibited the ability of family members of international aviation disasters from obtaining fair compensation."

I would further note that in an October, 1996 brief filed at the Department of Transportation by the Air Transport Association, the trade association of U.S. airlines, there is an acknowledgment that the Supreme Court in *Zicherman* did not apparently consider 49 U.S.C. §40120(a) and (c), which preserve the application of State and common law remedies in tort cases and also prohibit the application of Federal shipping laws to aviation. My legislation amends 49 U.S.C. §40120(c) to clarify that nothing in the Death on the

High Seas Act restricts the availability of remedies in suits arising out of aviation disasters.

In September, 1998, during consideration of the Federal Aviation Administration authorization bill, I offered a compromise amendment with a limit on damages in order to move ahead to obtain some possible compensation for victims' families beyond pecuniary damages. I did so because had an amendment to the Death on the High Seas Act been enacted which would have had unlimited damages, there was the announced intent to filibuster the bill. While my amendment was accepted by a voice vote in the Senate, the underlying FAA bill was not enacted into law.

This year the Senate passed a new FAA reauthorization bill which included the compromise provision agreed to last year. As the bill conferees appear unlikely to reach agreement with the House this year, I am reintroducing the original version of my bill because I fundamentally oppose any cap on damages and am hopeful that this legislation can be enacted independently of the FAA bill to provide the fullest amount of relief to the families of aviation disaster victims.

At a time when so many Americans live, work, and travel abroad, taking part in the global economy or seeing the cultural riches of foreign lands, they and their families should know that the American civil justice system will be accessible to the fullest extent if the unthinkable occurs.

I urge my colleagues to support this legislation and look forward to working with them to ensure its ultimate enactment during the second session of the 106th Congress.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEATH ON THE HIGH SEAS ACT.

Section 40120(c) of title 49, United States Code, is amended to read as follows:

“(c) ADDITIONAL REMEDIES.—

“(1) IN GENERAL.—Nothing in this part or the Act entitled ‘An Act relating to the maintenance of actions for death on the high seas and other navigable waters’ approved March 30, 1920 (46 U.S.C. App. 761 et seq.), popularly known as the ‘Death on the High Seas Act,’ shall, with respect to any injury or death arising out of any covered aviation incident, affect any remedy—

“(A) under common law; or

“(B) under State law.

“(2) ADDITIONAL REMEDIES.—Any remedy provided for under this part or the Act referred to in paragraph (1) for an injury or death arising out of any covered aviation incident shall be in addition to any of the remedies described in subparagraphs (A) and (B) of paragraph (1).

“(3) COVERED AVIATION INCIDENT DEFINED.—In this subsection, the term ‘covered aviation incident’ means an aviation disaster occurring on or after January 1, 1995.”.

75TH ANNIVERSARY OF THE U.S. BORDER PATROL

Mrs. HUTCHISON. Mr. President, on behalf of Senators ABRAHAM, KYL, and GRAMM, I am proud to introduce Senate Concurrent Resolution No. 74, honoring the 75th anniversary of the United States Border Patrol.

Mr. President, the men and women of the Border Patrol are our Nation's first line of defense in the war on drugs and illegal immigration. Since 1924, the Border Patrol has guarded some 8,000 miles of international boundaries, and has maintained a reputation for getting the job done. The Border Patrol story is one of long hours and hard work in defense of our country.

The Department of Labor Appropriations Act of 1924 created a Border Patrol within the Bureau of Immigration, with an initial force of 450 Patrol Inspectors, a yearly budget of \$1 million, and a yearly salary of \$1,300 for each Patrol Inspector, with each patrolman furnishing their own house.

The Border Patrol has grown from that initial force of 450 to more than 8,000 today, located in 146 stations under 21 sectors. The Border Patrol's officers have assisted in controlling civil disturbances, performing National security details, aided in foreign training and assessments, and responded with security and humanitarian assistance in the aftermath of numerous natural disasters. 86 agents and pilots have lost their lives in the line of duty—six in 1998 alone.

By far, the Border Patrol's greatest challenge has come along our nation's Southwest Border, which is a sieve for illegal drugs and aliens. Last year, there were 6,359 drug seizures along the Southwest Border by the Border Patrol. These drugs had an estimated street value of \$2 billion. There were also nearly 5 million illegal crossings.

The Border Patrol and the Congress are responding to this challenge, providing funding to hire 1,000 new agents in fiscal year 2000, just as we have for the past two years. I hope that the Immigration and Naturalization Service will put these funds to good use, hiring these critical agents, and using other resources Congress has provided to improve the equipment and technology available to the Border Patrol.

The United States Border Patrol has the difficult dual mission of protecting our borders and enforcing our immigration laws in a fair and humane manner. They do both very well under difficult conditions.

I want to congratulate all who serve with the U.S. Border Patrol on this 75th anniversary and express to them to thanks of a grateful nation.

• Mrs. FEINSTEIN. Mr. President, I rise today to submit a resolution that commends and remembers events that transpired in Remy, France as its citizens honored the fallen World War II Army Air Corps pilot, Lieutenant Houston Braly. This inspiring story happened over fifty years ago, but its example of compassion and brotherhood remains in our hearts and minds.

On August 2, 1944, Lt. Braly's squadron of P-51 fighters on patrol in northern France encountered a German munitions train. After three unsuccessful attack runs at the camouflaged train, Lt. Braly's fire hit a car carrying explosives, causing a tremendous explosion.

Airplanes circling 13,000 feet over the battle were hit by shrapnel from the train, haystacks in fields some distance away burned, and nearly all buildings in the small French town were demolished. A 13th century church in the town of Remy barely escaped destruction, but its historic stained-glass windows were shattered.

It was this explosion that tragically claimed the life of Lt. Braly at only twenty-two years of age.

Despite the near total destruction of the small town, the residents of Remy regarded that young American as a hero. A young woman pulled Braly's body from the burning wreck of the plane, wrapped him in the nylon of his parachute, and placed him in the town's courtyard. Hundreds of villagers left flowers around his body, stunning German authorities.

The next morning, German authorities discovered that villagers continued to pay tribute to the young pilot despite threats of punishment. The placement of flowers on Lt. Braly's grave continued until American forces liberated Remy to the cheers of the townspeople.

Almost 50 years later, Steven Lea Vell of Danville, California, discovered this story in his research. Mr. Lea Vell was so moved by the story that he visited Remy, France, only to find that the stained glass windows of the magnificent 13th century church which were destroyed in the explosion had never been replaced. He contacted members of the 364th Fighter Group, under which Lt. Braly had served. After hearing how the residents of Remy had honored their fallen friend, veterans joined together to form Windows for Remy, a non-profit organization that would raise \$200,000 to replace the stained glass windows as a gesture of thanks to Remy for its deeds.

On Armistice Day, November 11, 1995, fifty years after the war ended, the town of Remy paid tribute once more to Lt. Braly. On that day they renamed the crossroads where he perished to “Rue de Houston L. Braly, Jr.”

I know that my fellow senators will want to join me in commending the people of Remy for their kindness and

recognize the comrades of Lt. Braly for their good will.

Mr. President, I ask unanimous consent that the text of the resolution be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. CON. RES. —

Whereas on August 2, 1944, a squadron of P-51s from the United States 364th Fighter Group strafed a German munitions train in Remy, France;

Whereas the resulting explosion killed Lieutenant Houston Braly, one of the attacking pilots, and destroyed much of the village of Remy, including 7 stained glass windows in the 13th century church;

Whereas despite threats of reprisals from the occupying German authorities, the citizens of Remy recovered Lieutenant Braly's body from the wreckage, buried his body with dignity and honor in the church's cemetery, and decorated the grave site daily with fresh flowers;

Whereas on Armistice Day, 1995, the village of Remy renamed the crossroads near the site of Lieutenant Braly's death in his honor;

Whereas the surviving members of the 364th Fighter Group desire to express their gratitude to the brave citizens of Remy; and

Whereas to express their gratitude, the surviving members of the 364th Fighter Group have organized a nonprofit corporation to raise funds through its project "Windows for Remy" to restore the church's stained glass windows: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) commends the bravery and honor of the citizens of Remy, France, for their actions with respect to the American fighter pilot Lieutenant Houston Braly, during and after August 1944; and

(2) recognizes the efforts of the surviving members of the United States 364th Fighter Group to raise funds to restore the stained glass windows of Remy's 13th century church.

THE WAKPA SICA RECONCILIATION PLACE ACT

Mr. JOHNSON. Mr. President, I am pleased to join with my colleague from South Dakota, Senate Democratic Leader TOM DASCHLE, as a cosponsor of the Wakpa Sica Reconciliation Place Act, which will establish the Wakpa Sica Reconciliation Place in Ft. Pierre, South Dakota. The Wakpa Sica Reconciliation Place would be an important cultural and interpretive center, in part to compliment the National Lewis and Clark Trail, but with the unique perspective of the Sioux tribes and the impact of the Lewis and Clark encounter on tribal culture and economics.

During the Lewis and Clark expedition, Captains Merriweather Lewis and William Clark anchored their river boats where the Wakpa Sica, or Bad River, flows into the Missouri. After four months of travel from St. Louis, history was made on September 24, 1804. The next day 44 men landed on the west bank of the Missouri and paraded under the United States flag.

These men then joined Chief Black Buffalo and braves from the Teton Sioux for council in the chief's buffalo skin lodge. This was a key and pivotal meeting between representatives of the great Sioux tribes and those of the United States of America. This meeting was less than amicable.

Throughout the rest of South Dakota's history the relationship between native peoples and non-natives has not been a peaceful one. Today we are still facing the challenging experience of working and living together side by side. I am proud of the South Dakotans who set their differences aside and came together and created the Mni Wiconi water project. There is a growing need for a Reconciliation Place.

The Reconciliation Place would occupy the site in which Captains Lewis and Clark, and the members of the tribes came together to meet for the first time—which is a fitting site to bring Indian and non-Indian peoples together. It is my hope that this center will bring people together to learn about the culture and the rich history this area of the United States holds. Through this understanding, it is my hope that we may be able to achieve better relations between Tribal and non-Tribal peoples.

This project is a cultural center which will serve as a home for Sioux law, history, culture and arts for the Lakota, Dakota, and Nakota peoples. It will also serve as a repository for Sioux historical documents, which are currently scattered throughout the West. Many native people do not have access to these documents. With the construction of this facility the native people will be able to house these documents close to home. This will allow interested parties to research their rich past.

The Reconciliation Place will also be the home of the Sioux Nation Supreme Court. This will serve to be a stable legal setting to assist in achieving greater social and economic welfare in Indian Country. Increased legal stability will help promote business investment in the vast human resources that are situated on the reservations in my state. This will bring about more self sufficiency, and less reliance by tribes on the federal government. Similarly, the Native American Economic Development Council will be located in this same facility. This council will assist tribes and tribal members to provide opportunities for economic development. The council will assist in opening the doors to private investment and other resources that are designed to promote development and job creation.

Mr. President, this focal point for Native American culture, law, and economic development assistance is desperately needed. It is apparent that there is a need to strengthen current, and build future understanding be-

tween Indian and non-Indian peoples, as well as promote the government-to-government relationship between the tribes and the United States. I urge my colleagues to join myself and Senator DASCHLE to support this legislation, and recognize the need for such an important center. I ask unanimous consent that I be added as a cosponsor of the Wakpa Sica Reconciliation Place Act, and that my statement be included in the RECORD.

SENATOR BYRD'S 82ND BIRTHDAY

Mr. McCONNELL. Mr. President, I rise today on a personal note. I had planned to make these remarks as we passed the midnight milestone on our way to cloture on the appropriations bill, because, as the clock strikes twelve, and November 20 begins, my Committee colleague, our Ranking Member, ROBERT C. BYRD will celebrate a birthday. I wish my colleague a happy and productive 82nd year.

Senator BYRD has a wonderful and widely quoted sign up on his office wall: "There are four things people in West Virginia believe: God Almighty, Sears Roebuck, Carter's Little Liver Pills, and Robert C. Byrd." I'd like to take a little literary license to suggest that there are four things that ROBERT C. BYRD believes in: God Almighty, his 62 year long love affair with his wife, Erma, his constituents and the Senate.

And, Senator BYRD is not just your run of the mill believer. I have listened many times to the wisdom and intensity of his words, words which flow from a faith that runs as deep as his West Virginia roots, as deep as the coal mines which seam the earth of Appalachia. His words are what have led many to see Senator BYRD as the faithful historian and effective guardian of the precedents and privileges, of the rules and Constitutional role of the United States Senate. But, Senator BYRD is more than an institutional advocate, he is a living history of the Senate and democracy. The Senator from West Virginia gives a clear voice both to our finest traditions and what he sees as his life long purpose, serving what he so nobly refers to as "my people." His reverence and respect for the Senate are surpassed by the deep regard and abiding passion he has for the needs of his constituents.

He speaks of those needs virtually every week. Senator BYRD breathes life into images of each West Virginian he introduces to us in remarks on the floor—even those who have passed from the scene. When he describes a man who dies in a slate fall while mining West Virginia's coal, he speaks softly of a man, alone, who died in the dark. The illuminating power of this image flows from the passion of his commitment.

It is his commitment which crosses partisan lines and has earned Senator

BYRD legendary respect. In the last week, I have been privileged to experience this commitment while working with him to protect our coal miner's from the predatory reach of an overbearing judge.

As Senator BYRD begins another year and the Senate another session, I will look forward to continuing our work together, succeeding in reversing the devastating consequences of a bad decision, and serving well our constituents.

HONORING NOTAH BEGAY III AN INSPIRATION FOR ALL AMERICANS

Mr. BINGAMAN. Mr. President, in celebration of American Indian Heritage Month I rise today to celebrate the accomplishments of one remarkable young man Notah Begay III. You may have heard of Mr. Begay as he was a two-time PGA tour winner this season with victories at the Reno-Tahoe Open and the Michelob Championship. This is a true accomplishment by any standard, but even more significant when you consider that he is only 27. I rise today to honor Mr. Begay because of the fact that he is the first full-blooded Native American to play on the Professional Golf Association Tour.

Notah's path to success is uncommon among his peers in the PGA. He didn't grow up in a privileged environment. While the Begay family was not poor, they did not have the resources to pay for costly private golf lessons for young Notah. In exchange for golf balls and practice time, Notah often woke up at 5:00 AM to move carts, wash range balls and serve as an all-around gopher at the city-owned course in Albuquerque. And when Notah visited his grandparents on the Navajo Reservation, the determined young golfer would hit golf balls off of the hard clay dirt of the reservation. Still today, the Navajo Nation does not have one golf course on its 25,000 square miles.

Despite his uncommon beginnings, Notah has been truly successful at every level of competition. During high school, Notah led his high school basketball team to back-to-back state championships. But more impressive, he was the No. 2 junior golfer in the nation.

After high school, Notah traveled west to Stanford University. Although Notah's teammate, Tiger Woods, is often spotlighted by the media, it was Notah and his Stanford teammates who won the 1994 NCAA Championship trophy, one year before Mr. Woods joined the team. Notah played an integral role by shooting a 62 in the second round of the Championship tournament, a tournament record that remains today. And while many great college athletes do not finish their studies, I am very proud to say that Notah is a fellow graduate of Stanford, earning a degree in economics.

Notah turned pro after college and has been quickly rising in the PGA ranks. At the Nike Dominion Open this year he became only the third player in history to shoot a 59 on a U.S. pro tour. He joins Al Geiberger and Chip Beck as the only players to score such a feat. Because of his outstanding success this year, Notah is a candidate for top rookie honors.

Notah has dedicated himself to providing new opportunities for young Native Americans. By working to raise money to establish golf programs at reservation schools and seeking donations of golf equipment for kids who could never afford the costly clubs, Notah is providing the tools that may lead to more great golfers with Native American roots.

In some ways, Notah Begay's success is not surprising. He is half Navajo and half Pueblo Indian and he follows a tradition of courage and strength, exemplified by his grandfather. Notah's grandfather, Notah Begay I, was one of the famous Code Talkers during World War II. The Code Talkers relayed sensitive information for the United States military through a code based on the Navajo language. They proved to be a critical component of the military intelligence during World War II.

Notah's unprecedented success has shown a generation of young Americans that with hard work and dedication, any dream is achievable. The success Notah has earned is equal only to the inspiration he provides for Native American youth in my home state of New Mexico and across the country. I commend him not only for his golf success, but also for his commitment to the youth of New Mexico.

Mr. President, I yield the floor.

EAST TIMOR

Mr. FEINGOLD. Mr. President, I want to say a few words about a piece of legislation that is not moving this year. I want to speak about it because it deals with an extremely important topic, one that has not received the attention and commitment that it deserves from this body.

That topic is the appropriate state of U.S.-Indonesian relations today.

Mr. President, I introduced S. 1568, the East Timor Self-Determination Act of 1999, on September 8—well over two months ago. That legislation, which passed the Foreign Relations Committee on September 27 by an overwhelming vote of 17-1, was cosponsored by the Chairman of that Committee as well as many other Members of the Senate.

I took that action, in cooperation with my colleagues, because events in East and West Timor demanded it.

On August 30, well over 99% of registered voters in East Timor courageously came to the polls to express their will regarding the political status of that territory.

More than 78% of those voters marked their ballot in favor of independence.

But weeks of violence immediately followed the vote, as the Indonesian military—a military that our country has long supported—colluded with militia groups in waging a scorched earth campaign against the East Timorese people and their democratic aspirations throughout the territory.

Hundreds of thousands of people were forced to flee, and many were killed.

But for the East Timorese run out of their homes in the fray, the nightmare did not end there.

There seems to be a perception out there that all is well in Indonesia today, and that the East Timor crisis is over. Unfortunately, that is simply not true.

Last week, the Associated Press reported on the public comments of the spokesperson for the United Nations High Commissioner for Refugees. The spokesman said that many East Timorese are being forced at gunpoint to remain in camps that lack food, sanitation and medical care. He said, and this is a direct quote, that "the moment an East Timorese expresses a desire to leave the camps and go home their life is in danger." And the UNHCR spokesperson noted, in last week's AP report, that many relief organizations have received reports of refugees being raped and beaten by militiamen.

Mr. President, to this day, militia members harass and intimidate East Timorese in West Timor's refugee camps. Only about 56,000 refugees have returned home to East Timor. Approximately two hundred thousand remain, in many cases against their will, in the refugee camps of West Timor.

To this day, humanitarian organizations do not have the access that they need to all of the refugee camps to which East Timorese fled.

Throughout all of this pain, throughout the destruction of lives and property, throughout this brutal retaliation for courageous acts of democratic expression, this Senate has been silent. We have had no floor debate and no vote. My original bill, despite being voted out of committee with only one dissenting vote, has languished on the calendar for weeks.

In response to that silence, Mr. President, I negotiated an arrangement to introduce an amendment to the bankruptcy bill addressing this issue. Squeezing this important topic into the middle of a debate on an unrelated bill was certainly not the most desirable approach, but I was determined to pursue this legislation.

The amendment I had planned to offer was considerably different from my original bill. I made significant alterations to it in order to respond to changing events and the concerns of other Senators and the Administration.

Mr. President, I wanted to pursue this legislation to encourage democracy and accountability in Indonesia, and to hold out clear incentives for a policy of accountability and cooperation. And I wanted to hold this Administration to its word, ensuring that passing political whims do not soften America's rejection of the kind of methods that the Indonesian military used in East Timor.

The amendment would have reached out to the Indonesian government, celebrating its democratic transition and recognizing its economic needs, while keeping the pressure on elements in Indonesia that are moving in the opposite direction—elements moving away from democracy, reform, and accountability and moving toward repression, violence, and impunity.

With its clear message and incentives, this amendment would have set the stage for a responsible and strong partnership between the U.S. and Indonesia.

Mr. President, it concerns me that the Administration has behaved as though they wish this legislation would just go away, although it is a codification of their own policy.

The Administration has told me that they desire more flexibility—particularly with regard to licensing defense related articles for export to Indonesia—than this amendment would allow.

Despite the fact that I worked closely and carefully with the State Department to develop a reasonable list of conditions that must be met in order to re-establish military and security relations, in the end, the Administration did not want to be pinned down to any standards at all.

Mr. President, I will speak frankly. The Administration's unwillingness to commit to a responsible policy and to a solid series of prerequisites for resuming military and security ties concerns me, and convinces me that vigilance will be necessary in the months ahead.

And so Mr. President, while I foresee no opportunity to move this legislation this year, I want to remind this Senate and this Administration that my amendment will remain in order when we return to the bankruptcy bill, and I am prepared to take up this issue again in January, or at any other time the circumstances warrant it.

I will continue to be certain that this Senate has a voice in the future of U.S.-Indonesian relations. I will continue to push for accountability for the abuses perpetrated by the Indonesian military and militia groups. And I will continue to insist that U.S. engagement with the Indonesian military is contingent upon an end to the harassment and intimidation of East Timorese refugees with impunity.

I pledge to my colleagues and to this Administration that I will monitor this matter, and monitor it closely in the

weeks and months ahead. I will stand by, ready with several versions of my legislation, should the Indonesian military fail to take the steps toward reform and accountability that are absolutely essential prerequisites to a military and security relationship with the United States.

And make no mistake, I will come to the floor again and again should this Administration appear ready to engage with and support an Indonesian military that has not seriously lived up to its own commitment to respect the rights of ordinary East Timorese civilians who seek only to live their lives in peace and security.

Mr. President, I yield the floor.

BIENNIAL BUDGETING

Mr. DOMENICI. Yesterday (November 18), House Rules Committee Chairman DAVID DREIER introduced H. Res. 396, a resolution expressing the sense of the House that biennial budgeting legislation should be enacted in the second session of the 106th Congress.

Notably, this resolution has 245 cosponsors, significantly more than a majority of that body. Those sponsors include the entire House Republican leadership, 25 members of the House Appropriations Committee, including the Chairman, and 45 Democrats.

Critics of biennial budgeting often point to lack of support in the House as a reason why the proposal will never be adopted. That hurdle seems now to have been swept away, as significantly more than a majority of the House has been convinced by the inescapable logic and numerous advantages of a biennial budget process.

This year, we have yet again been faced with a numbing repetition of the all-too-familiar appropriations end game. Annual appropriations have been stalled because of a handful of controversial policy and funding issues.

While the vast bulk of appropriations are routine and are funded from year to year with only incremental change, they nonetheless are held hostage to these controversial and often unrelated budget and policy debates. This is unnecessary and counterproductive.

A biennial budget process would restore the integrity and effectiveness of the appropriations process, would reinvigorate the tradition of separate Congressional authorization and oversight, and would give Federal departments and agencies badly needed time to carry out and evaluate Federal programs more effectively.

Many Senators of both parties have long acknowledged the need for a biennial budget process. A majority of House members now concurs. Both President Clinton and Vice-President GORE support biennial budgeting, and recently Governor George W. Bush voice strong support for the idea.

All sides now agree that biennial budgeting is the right thing to do. Now

is time to go forward. We have studied, talked, and debated enough. Let's now resolve to act on this important bill as soon as possible when we return from the congressional adjournment.

Mr. HATCH. Mr. President, I would like to take just a few minutes in these final hours of the First Session of the 106th Congress to comment on several legislative initiatives I authored this year, and which I am pleased to say have either passed or were substantially incorporated into other bills that were approved and will be sent to the President.

One of the most important issues for my state of Utah is the Radiation Exposure Compensation Act (RECA) Amendments of 1999, S. 1515, which I introduced earlier. I am delighted that the Senate passed this important legislation earlier today.

This bill will guarantee that our government provides fair compensation to the thousands of individuals adversely affected by the mining of uranium and from fallout during the testing of nuclear weapons in the early post-war years.

Senator BEN NIGHTHORSE CAMPBELL; the distinguished Senate Minority Leader, Senator TOM DASCHLE; Senator JEFF BINGAMAN; and Senator PETE DOMENICI all joined me in introducing this legislation, and I appreciate their support.

In 1990, the Radiation Exposure Compensation Act (42 U.S.C. 2210) was enacted in law. RECA, which I was proud to sponsor, required the federal government to compensate those who were harmed by the radioactive fallout from atomic testing. Administered through the Department of Justice, RECA has been responsible for compensating approximately 6,000 individuals for their injuries. Since the passage of the 1990 law, I have been continuously monitoring the implementation of the RECA program.

Quite candidly, I have been disturbed over numerous reports from my Utah constituents about the difficulty they have encountered when they have attempted to file claims with the Department of Justice. I introduced S. 1515 in response to their concerns.

This bill honors our nation's commitment to the thousands of individuals who were victims of radiation exposure while supporting our country's national defense. I believe we have an obligation to care for those who were injured, especially since, at the time, they were not adequately warned about the potential health hazards involved with their work.

Another issue which many of my constituents contacted me about over the past year was the Medicare provisions contained in the 1997 Balanced Budget Act (BBA) and the impact of these provisions on health care providers and Medicare beneficiaries.

I am pleased that the House has given its approval to the Medicare,

Medicaid, and CHIP Adjustment Act of 1999 which is now ready for Senate consideration and passage today.

This important measure will help to ensure that Medicare beneficiaries can continue to receive high-quality, accessible health care.

Overall, the bill increases payments for nursing homes, hospitals, home health agencies, managed care plans, and other Medicare providers. It will also increase payments for rehabilitative therapy services, and longer coverage of immunosuppressive drugs.

Over \$27 billion in legislative restorations are contained in this package for the next 10 years.

Clearly we now know that there were unintended consequences as a result of the reimbursement provisions contained in the BBA. Many of the changes provided for in the BBA resulted in far more severe reductions in spending than we projected in 1997. As a result, skilled nursing facilities, home health agencies and hospitals have been particularly hard hit from these changes in the Medicare law.

In 1997, Medicare was in a serious financial condition and was projected to go bankrupt in the year 2001. The changes we made in 1997 saved Medicare from financial insolvency and have resulted in extending the program's solvency until 2015.

Nevertheless, the reductions we enacted in 1997 created a serious situation for many health care providers who simply are not being adequately reimbursed for the level and quality of care they were providing.

This situation is particularly evident in the nursing home industry. Many skilled nursing facilities, or SNFs, are now facing bankruptcy because the current prospective payment system, which was enacted as part of the BBA, does not adequately compensate for the costs of care to medically complex patients.

As a result, I introduced the Medicare Beneficiary Access to Quality Nursing Home Care Act of 1999, S. 1500, which was designed to provide immediate financial relief to nursing homes who care for medically complex patients.

The Chairman of the Budget Committee, Senator DOMENICI, was the principal cosponsor of this important legislation. And I would like to take this opportunity now to thank him for the extraordinary effort he made in helping to have major provisions of our bill incorporated into the final conference agreement on the BBA Restoration bill.

Moreover, I want to thank the other 44 Senators who cosponsored S. 1500 and who lent their support in helping to move this issue to conference.

This is an important victory for Medicare beneficiaries who depend on nursing home care. As we have seen over the past several years, those bene-

ficiaries with medically complex conditions were having difficulty in gaining access to nursing home facilities, or SNFs, because many SNFs simply did not want to accept these patients due to the low reimbursement levels paid by Medicare.

The current prospective payment system is flawed. It does not accurately account for the costs of these patients with complex conditions. The Health Care Financing Administration (HCFA) has acknowledged that the system needs to be corrected.

Under the provisions of the BBA Restoration bill we are passing today, reimbursement rates are increased by 20% for 15 payment categories, or the Resource Utilization Groups—RUGs—beginning in April 2000. These increases are temporary until HCFA has fine-tuned the PPS and made adjustments to reflect a more accurate cost for these payment categories.

Moreover, after the temporary increases have expired, all payment categories will be increased by 4% in fiscal year 2001 and 2002.

These provisions will provide immediate increases of \$1.4 billion to nursing home facilities to care for these high-cost patients.

In addition, the bill also gives nursing homes the option to elect to be paid at the full federal rate for SNF PPS which will provide an additional \$700 million to the nursing community.

I would also add that I am pleased the conference report includes a provision to provide a two-year moratorium on the physical/speech therapy and occupational therapy caps that were enacted as part of the BBA. As we all well know, these arbitrary caps have resulted in considerable pain and difficulty for thousands of Medicare beneficiaries who have met and exceeded the therapy caps.

I joined my colleague and good friend, Senator GRASSLEY, as a cosponsor of this important legislation, and I want to commend him for his leadership in getting this bill incorporated into the final BBA Restoration conference report.

There are many other important features of this bill that are included in the conference report agreement and, clearly, these provisions will do a great deal to health restore needed Medicare funding to providers. Overall, \$2.7 billion is restored to SNFs under this legislation.

The bottomline is all of this is ensuring that Medicare beneficiaries have access to quality health care. We need to keep that promise and I believe we have done that through the passage of this legislation today.

With respect to other providers, I would briefly add that the bill contains funding for home health agencies as well. The bill will ease the administrative requirements on home health agencies as well as delay the 15 percent

reduction in reimbursement rate for one year. This reduction was to have taken effect on October 2000 but will now be delayed for one year until October 1, 2001.

I have worked very closely with my home health agencies in my state who were extremely concerned over the impact of the 15% reduction next year. I am pleased to tell them that we have addressed their concerns by delaying this reduction for another year. I think this time will give us an opportunity to focus on this provision to determine what other adjustments, if any, may be required in the future.

Overall, the bill adds \$1.3 billion back into the home health care component of Medicare.

So I believe we have taken some significant steps to ensure that home health care agencies will be able to operate without the threat of increased Medicare reductions on their bottomline.

We have also taken steps to help hospitals and teaching hospitals with over \$7 billion in Medicare restorations. These increases will help to smooth the transition to the PPS for outpatient services—an issue that was brought to my attention by practically every hospital administrator in my state.

On the separate, but equally important issue of children's graduate medical education funding, I am especially pleased that the House has passed legislation that will authorize, for the first time, a new program to provide children's hospitals with direct and indirect graduate medical education funding.

Independent children's hospitals, including Primary Children's Hospital in Salt Lake City, receive very little Medicare graduate medical education funding (GME). This is because they treat very few Medicare patients, only children with end stage renal disease, and thus do not benefit from federal GME support through Medicare.

I cosponsored this legislation in the Senate which passed earlier this year. The measure has now cleared the House and will soon be sent to the President who is expected to sign the measure into law very soon.

Moreover, \$40 million is contained in the appropriation's bill that will serve as an excellent foundation on which to provide assistance to children's hospitals.

I am also pleased that provisions from S. 1626, the Medicare Patient Access to Technology Act, were included in the BBA Restoration measure.

These important provisions guarantee senior citizens access to the best medical technology and pharmaceuticals. Currently, Medicare beneficiaries do not always have access to the most innovative treatments because Medicare reimbursement rates are inadequate. And I just don't think that it's fair to older Americans. My

provisions contained in the restoration bill change this by allowing more reasonable Medicare reimbursements for these therapies.

Take, John Rapp, my constituent from Salt Lake City, Utah. Mr. Rapp, who is 71 years old, was diagnosed with prostate cancer last May. He was presented with a series of treatment options and decided to have BRACHY therapy because it was minimally invasive, he could receive it as an outpatient and it had fewer complications than radical surgery.

This new innovative therapy implants radioactive seeds in the prostate gland in order to kill cancer cells. The success rate of this therapy has been overwhelming.

So, what's the problem? Without my legislation, services such as BRACHY therapy would not be available in the hospital outpatient setting to future Medicare patients due to the way the outpatient prospective payment system is being designed. Life saving services such as BRACHY therapy would be reimbursed at significantly lower-reimbursement rates, from approximately about \$10,000 to \$1500, and, therefore, it would not be cost-effective for hospitals to offer this service. Fortunately, the provisions included in the omnibus spending bill change all of that—innovative treatments, such as BRACHY therapy, will now be available to future prostate cancer patients.

We must get the newest technology, to seniors as quickly as possible. Government bureaucracy should not stand in the way of seniors receiving the best care available. We must put Medicare patients first, not government bureaucracy. That is why my legislation is necessary and I am so pleased that it was included in the Medicare package.

Finally, I am pleased that this package also addressed the serious concerns of the community health centers. The community health centers community came to us because there were concerns about the financial hardship that the Balanced Budget Act would have imposed on these health centers and their patients. I worked hard with Finance Committee Chairman ROTH, Senator GRASSLEY, and Senator BAUCUS to resolve this important issue. I believe that the conference committee came up with a good solution, however, I intend to monitor this situation closely over the next couple of years.

Mr. President, there are numerous other provisions in this restoration package that I will not take the time to comment on now, but they are equally important. I want to commend the leadership in the Senate and House for working to put together this important measure that will clearly help millions of Medicare beneficiaries throughout the country.

THE DAKOTA WATER RESOURCES ACT

Mr. CONRAD. Mr. President, I rise today to discuss an important piece of legislation for my State of North Dakota. S. 623, the Dakota Water Resources Act, is legislation I introduced in the last Congress and early in this Congress to re-direct the existing Garrison Diversion project. This bill is designed to meet the contemporary water needs of the State of North Dakota, substantially reduce the cost of the project, and require compliance with environmental laws and our international treaty obligations with Canada.

North Dakota has significant water quality and water quantity needs that must be addressed. In many parts of my state, well water in rural communities resembles weak coffee or strong tea. It turns the laundry gray after the first wash, and in many places is unfit even for cattle to drink. This bill is designed to address those situations and help provide clean, reliable water to families and businesses across North Dakota.

This bill was favorably reported from the Senate Energy Committee earlier this year, after hearings were held in this Congress and in the previous Congress. During consideration in the Energy Committee, several amendments were adopted that reduced the cost of the bill by \$140 million and strengthened environmental protections in the bill. I should also note that this bill reduces the cost of constructing the currently-authorized project by about \$1 billion.

The bill is now pending on the Senate calendar, and was packaged with a group of other bills reported by the Energy Committee to be considered by this body. Unfortunately, when the Senate attempted to consider this legislation in recent days, objections to its consideration were registered by other Senators from another state who had concerns about the bill. In response, Senator Dorgan and I have worked with those Senators to address their concerns. We have engaged in those discussions in good faith, believing that if we continued to work with other states we would be able to address their concerns.

Unfortunately, those discussions have not yielded the results we were hoping for that would have allowed the bill to pass the Senate. Enacting this legislation will help my state overcome the tremendous water needs that are well documented, and I will continue to work in good faith with other Senators to pass this important bill. I am willing to address the concerns of other states, but it must be a two-way street. I look forward to our discussions under the auspices of the Energy Committee in February to resolve those issues.

I thank the Chair and yield the floor.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Thursday, November 18, 1999, the Federal debt stood at \$5,693,813,174,823.97 (Five trillion, six hundred ninety-three billion, eight hundred thirteen million, one hundred seventy-four thousand, eight hundred twenty-three dollars and ninety-seven cents).

One year ago, November 18, 1998, the Federal debt stood at \$5,586,312,000,000 (Five trillion, five hundred eighty-six billion, three hundred twelve million).

Five years ago, November 18, 1994, the Federal debt stood at \$4,752,722,000,000 (Four trillion, seven hundred fifty-two billion, seven hundred twenty-two million).

Twenty-five years ago, November 18, 1974, the Federal debt stood at \$481,413,000,000 (Four hundred eighty-one billion, four hundred thirteen million) which reflects a debt increase of more than \$5 trillion—\$5,212,400,174,823.97 (Five trillion, two hundred twelve billion, four hundred million, one hundred seventy-four thousand, eight hundred twenty-three dollars and ninety-seven cents) during the past 25 years.

VIEQUES ISLAND TRAINING FACILITY

Mr. WARNER. Mr. President, I rise today to speak about a very important issue that threatens to undermine the readiness of our Navy and Marine Corps units that are scheduled to deploy to the Mediterranean Sea and the Persian Gulf in February. That issue is the current situation on the Puerto Rican Island of Vieques where the Navy is being prevented by unrestrained civil disobedience from conducting training critical to its preparations for deploying into a possible combat environment.

Two weeks ago, I and four of my colleagues introduced Senate Resolution 220, that would express the Sense of the Congress that the Secretary of the Navy should initiate the required training for the Eisenhower Battle Group and the 24th Marine Expeditionary Unit on the island of Vieques, and that the President should not deploy these forces unless the President determines that they are free of serious deficiencies in their major warfare areas.

Over the past two weeks there have been discussions between the Federal government and the Government of Puerto Rico to try and reach an accommodation that would resolve the current impasse between the Navy and the people of Vieques. Unfortunately, these discussions have not born fruit and there is no resolution in sight. The simple fact is the President needs to act to resolve this impasse.

Today, the Armed Forces are at risk of reaching unacceptably low levels of

preparedness. Last week we learned that two Army Divisions are not ready to execute the National Military Strategy without unacceptable risk to the personnel in those units.

If the required training for the Eisenhower Battle Group and the 24th Marine Expeditionary Unit is not conducted in December, in February these two units will be unable to deploy without serious deficiencies in their warfighting capabilities. We cannot allow this degradation in the readiness of our Armed Forces to occur if we intend to maintain our position as a world leader, and honor our commitment to our military personnel to reduce the risk they incur when they sail into harm's way. As Vice Admiral Murphy, Commander of the Sixth Fleet of the Navy, recently testified before the Armed Services Committee, the loss of training on Vieques would "cost American lives." Over the past several weeks, the Armed Services Committee has held a series of hearings on the important issue of Vieques. Over the course of these hearings, I have become increasingly convinced that it would be irresponsible to deploy our naval forces without the training that takes place at the Vieques facilities.

On Tuesday, September 22, 1999, the Readiness and Management Support Subcommittee, under the leadership of Senator INHOFE, held a hearing to review the need for Vieques as a training facility and explore alternative sites that might be utilized. At that hearing both Admiral Fallon, commander of the Navy's Second Fleet, and General Pace, commander of all Marine Forces in the Atlantic, testified that the Armed Forces of the United States need Vieques as a training ground to prepare our young men and women for the challenges of deployed military operations.

On October 13th, the Seapower Subcommittee, under the leadership of Senator SNOWE, heard from Admiral Murphy, commander of the Navy's Sixth Fleet and the commander who receives the naval forces trained at Vieques, who stated that a loss of Vieques would "cost American lives."

Earlier this month, after the release of the report prepared by the Special Panel on Military Operations on Vieques, the so-called Rush Panel, I held a hearing of the Senate Armed Services Committee to discuss with Administration and Puerto Rican officials the recommendations of that report, and to search for a compromise solution that addresses the national security requirements and the interests of the people of Vieques. In outlining the need for Vieques at that hearing, Secretary Danzig, the Secretary of the Navy, stated that only by providing the necessary training can we fairly ask our service members to put their lives at risk. Admiral Johnson, Chief of Naval Operations, stated that the Ei-

senhower Battle Group would not be able to deploy in February without a significant increase in the risk to the lives of the men and women of that battle group unless they are allowed to conduct required training on Vieques. Finally, General Jones, Commandant of the Marine Corps, testified that the loss of training provided on Vieques "will result in degraded cohesion on the part of our battalions and our squadrons and our crews, decreased confidence in their ability to do their very dangerous jobs and missions, a decreased level of competence and the ability to fight and win on the battlefield."

At that hearing, I asked Admiral Johnson and General Jones "Is there any training that can be substituted for Vieques live fire training between now and February that will constitute, in your professional judgment, a sufficient level of training to enable you to say to the Chairman of the Joint Chiefs of Staff, the Eisenhower Battle Group and the 24th Marine Expeditionary Unit are ready to go." In response they stated "no, sir, not without—not without greatly increasing the risk to those men and women who we ask to go in harm's way, no, sir."

I remain convinced that the training requirement is real and will continue to directly effect the readiness of our Carrier Battle Groups and Marine Expeditionary Units. As General Shelton recently testified before the Senate Armed Services Committee, the training on Vieques is "critical" to military readiness. He further stated that he "certainly would not want to see our troops sent into an area where there was going to be combat, without having had this type of an experience. We should not deploy them under those conditions."

All of the military officers with whom we have spoken on this issue have informed us that the loss of Vieques would increase the risk to our military personnel deploying to potential combat environments. The Rush Panel, appointed at the request of the Resident Commissioner from Puerto Rico and the direction of the President, recognized the need for Vieques and recommended its continued use for at least five years.

What we have learned in these hearings is that Vieques is a unique training asset, both in terms of its geography with deep open water and unrestricted airspace and its training support infrastructure. The last two East coast carrier battle groups which deployed to the Adriatic and Persian Gulf completed their final integrated live fire training at Vieques. Both battle groups, led by the carriers U.S.S. *Enterprise* and U.S.S. *Theodore Roosevelt*, subsequently saw combat in Operations Desert Fox (Iraq) and Allied Force (Kosovo) within days of arriving in the respective theater of operations. Their

success in these operations, with no loss of American life, was largely attributable to the realistic and integrated live fire training completed at Vieques prior to their deployment.

According to Article II, section 2, of the Constitution of the United States, the President is the Commander-in-Chief of the U.S. Armed Forces. As such, he bears the ultimate responsibility for ensuring that the men and women in uniform he orders into harm's way, receive the training necessary to perform their mission with the least risk to their lives.

I am encouraged that the President has tried to resolve this matter with the Governor of Puerto Rico in such a way that would allow the Navy to conduct the necessary training. However, I am disappointed that the President and the Governor have been unable to achieve such a resolution.

Mr. President, as long as we are committing our nation's youth to military operations throughout the world; and as long as Vieques is necessary to train these individuals so that they can perform their missions safely and successfully; it would be unconscionable to deploy these forces without first allowing them to train at this vital facility.

Mr. President, the Eisenhower Battle Group and the 24th Marine Expeditionary Unit will soon deploy to the Mediterranean Sea and the Persian Gulf. In order to do so safely, they must begin preparations to conduct the necessary pre-deployment training on the island of Vieques in December.

The time has come for the President to make a decision to protect our national security and the safety of our men and women in uniform. He must decide to allow the Navy and the Marine Corps to conduct this training, and to notify the Secretary of the Navy and the Governor of Puerto Rico of his decision.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Williams, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting two withdrawals and sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 4:00 p.m., a message from the House of Representatives, delivered by Ms. Niland one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 34. An act to direct the Secretary of the Interior to make technical corrections to a map relating to the Coastal Barrier Resources System.

H.R. 642. An act to redesignate the Federal building located at 701 South Santa Fe Avenue in Compton, California, and know as the Compton Main Post Office, as the "Mervyn Malcolm Dymally Post Office Building."

H.R. 3456. An act to amend statutory damages provisions of title 17, United States Code.

H.R. 3419. An act to amend title 49, United States Code, to establish the Federal Motor Carrier Safety Administration, and for other purposes.

H.R. 3443. An act to amend part E of title IV of the Social Security Act to provide States with more funding and greater flexibility in carrying out programs designed to help children make the transition from foster care to self-sufficiency, and for other purposes.

The message also announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1769. An act to continue the reporting requirements of section 2519 of title 18, United States Code, beyond December 21, 1999, and for other purposes.

The message further announced that pursuant to House Resolution 395, the Speaker appoints the following named Members of the House of Representatives to the Committee to notify the President: Mr. ARMEY and Mr. GEPHARDT.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 218. Concurrent resolution expressing the sense of the Congress that the Government of the People's Republic of China should stop its persecution of Falun Gong practitioners.

H. Con. Res. 239. Concurrent resolution directing the Clerk of the House of Representatives to make a technical correction in the enrollment of the bill H.R. 3194.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent and referred as indicated:

H.R. 34. An act to direct the Secretary of the Interior to make technical corrections to a map relating to the Coastal Barrier Resources System; to the Committee on Environment and Public Works.

H.R. 642. An act to redesignate the Federal building located at 701 South Santa Fe Avenue in Compton, California, and known as the Compton Main Post Office, as the "Mervyn Malcolm Dymally Post Office Building"; to the Committee on Governmental Affairs.

The following bills, previously received from the House of the Representatives for the concurrence of the Senate, were read the first and second times by unanimous consent and referred as indicated:

H.R. 862. An act to authorize the Secretary of the Interior to implement the provisions of an agreement conveying title to a distribution system from the United States to

the Clear Creek Community Service District; to the Committee on Energy and Natural Resources.

H.R. 916. An act to make technical amendments to section 10 of title 9, United States Code, and for the other purposes; to the Committee on the Judiciary.

H.R. 992. An act, to convey the Sly Park Dam and Reservoir to the El Dorado Irrigation District, and for the other purposes; to the Committee on Energy and Natural Resources.

H.R. 1235. An act to authorize the Secretary of the Interior to enter into contracts with the Solano County Water Agency, California, to use Solano Project facilities for impounding, storage, and carriage of non-project water for domestic, municipal, industrial, and other beneficial purpose; to the Committee on Energy and Natural Resources.

H.R. 1444. An act to authorize the Secretary of the Army to develop and implement projects for fish screens, fish passage devices, and other similar measures to mitigate adverse impacts associated with irrigation system water diversions by local governmental entities in the States of Oregon, Washington, Montana, and Idaho; to the Committee on Energy and Natural Resources.

H.R. 1691. An act to protect religious liberty; to the Committee on the Judiciary.

H.R. 1714. An act to facilitate the use of electronic records and signatures in the interstate or foreign commerce; to the Committee on Commerce Science, and Transportation.

H.R. 1875. An act to amend title 28, United States Code, to allow the applications of the principles of Federal diversity jurisdiction to interstate class actions; to the Committee on the Judiciary.

H.R. 1869. An act to amend title 18, United States Code, to expand the prohibition on stalking, and for other purposes; to the Committee on the Judiciary.

H.R. 1953. An act to authorize leases for terms not to exceed 99 years on land held in trust for the Torres Martinez Desert Cahuilla Indians and the Gudiville Band of Pomo Indians of the Guidiville Indian Rancheria; to the Committee on Indian Affairs.

H.R. 2260. An act to amend the Controlled Substances Act to promote pain management and palliative care without permitting assisted suicide and euthanasia, and for other purposes; to the Committee on the Judiciary.

H.R. 2307. An act to designate the building of the United States Postal Service located at 5 Cedar Street in Hopkinton, Massachusetts, as the "Thomas J. Brown Post Office Building"; to the Committee on Governmental Affairs.

H.R. 2389. An act to restore stability and predictability to the annual payments made to States and counties containing National Forest System lands and public domain lands managed by the Bureau of Land Management for use by the counties for the benefit of public schools, roads, and other purposes; to the Committee on Energy and Natural Resources.

H.R. 2442. An act to provide for the preparation of a Government report detailing injustices suffered by Italian Americans during World War II, and a formal acknowledgment of such injustices by the President; to the Committee on the Judiciary.

H.R. 2513. An act to direct the Administrator of General Services to acquire a building located in Terre Haute, Indiana, and for

other purposes; to the Committee on Governmental Affairs.

H.R. 2541. An act to adjust the boundaries of the Gulf Islands National Seashore to include Cat Island, Mississippi; to the Committee on Energy and Natural Resources.

H.R. 2607. An act to promote the development of the commercial space transportation industry, to authorize appropriations for the Office of the Associate Administrator for Commercial Space Transportation, to authorize appropriations for the Office of Space Commercialization, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 2818. An act to prohibit oil and gas drilling in Mosquito Creek Lake in Cortland, Ohio; to the Committee on Energy and Natural Resources.

H.R. 2862. An act to direct the Secretary of the Interior to release reversionary interests held by the United States in certain parcels of land in Washington County, Utah, to facilitate an anticipated land exchange; to the Committee on Energy and Natural Resources.

H.R. 2863. An act to clarify the legal effect on the United States of the acquisition of a parcel of land in the Red Cliffs Desert Reserve in the State of Utah; to the Committee on Energy and Natural Resources.

H.R. 2879. An act to provide for the placement at the Lincoln Memorial of a plaque commemorating the speech of Martin Luther King, Jr., known as the "I have A Dream" speech; to the Committee on Energy and Natural Resources.

H.R. 3002. An act to provide for continued preparation of certain useful reports concerning public lands, Native Americans, fisheries, wildlife, insular areas, and other natural resources-related matters, and to repeal provisions of law regarding terminated reporting requirements concerning such matters; to the Committee on Energy and Natural Resources.

H.R. 3051. An act to direct the Secretary of the Interior, the Bureau of Reclamation, to conduct a feasibility study on the Jicarilla Apache Reservation in the State of New Mexico, and for other purposes; to the Committee on Indian Affairs.

H.R. 3063. An act to amend the Mineral Leasing Act to increase the maximum acreage of Federal leases for sodium that may be held by an entity in any one State, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 3073. An act to amend part A of title IV of the Social Security Act to provide for grants for projects designed to promote responsible fatherhood, and for other purposes; to the Committee on Finance.

H.R. 3075. An act to amend titles XVIII, XIX, and XXI of the Social Security Act to make corrections and refinements in the Medicare, Medicaid, and State children's health insurance programs, as revised by the Balanced Budget Act of 1997; to the Committee on Finance.

H.R. 3077. An act to amend the Act that authorized construction of the San Luis Unit of the Central Valley Project, California, to facilitate water transfers in the Central Valley Project; to the Committee on Energy and Natural Resources.

H.R. 3090. An Act to amend the Alaska Native Claims Settlement Act to restore certain lands to the Elim Native Corporation, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 3137. An act to amend the Presidential Transition Act of 1963 to provide for training of individuals a President-elect intends to

nominate as department heads or appoint to key positions in the Executive Office of the President; to the Committee on Governmental Affairs.

H.R. 3164. An act to provide for the imposition of economic sanctions on certain foreign persons engaging in, or otherwise involved in, international narcotics trafficking; to the Committee on Foreign Relations.

H.R. 3189. An act to designate the United States post office located at 14071 Peyton Drive in Chino Hills, California, as the "Joseph Iletto Post Office"; to the Committee on Governmental Affairs.

H.R. 3234. An act to exempt certain reports from automatic elimination and sunset pursuant to the Federal Reports and Elimination and Sunset Act of 1995; to the Committee on Governmental Affairs.

The following concurrent resolution was read and referred as indicated:

H. Con. Res. 218. Concurrent resolution expressing the sense of the Congress that the Government of the People's Republic of China should stop its persecution of Falun Gong practitioners; to the Committee on Foreign Relations.

The following concurrent resolutions, previously received from the House of Representatives for the concurrence of the Senate, were read and referred as indicated:

H. Con. Res. 124. Concurrent resolution expressing the sense of the Congress relating to recent allegations of espionage and illegal campaign financing that have brought into question the loyalty and probity of Americans of Asian ancestry; to the Committee on the Judiciary.

H. Con. Res. 165. Concurrent resolution expressing United States policy toward the Slovak Republic; to the Committee on Foreign Relations.

H. Con. Res. 189. Concurrent resolution expressing the sense of the Congress regarding the wasteful and unsportsmanlike practice known as shark finning; to the Committee on Commerce, Science, and Transportation.

H. Con. Res. 193. Concurrent resolution expressing the support of Congress for activities to increase public participation in the decennial census; to the Committee on Governmental Affairs.

H. Con. Res. 199. Concurrent resolution expressing the sense of the Congress that prayers and invocations at public school sporting events contribute to the moral foundation of our Nation and urging the Supreme Court to uphold their constitutionality; to the Committee on the Judiciary.

H. Con. Res. 206. Concurrent resolution expressing grave concern regarding armed conflict in the North Caucasus region of the Russian Federation which has resulted in civilian casualties and internally displaced persons, and urging all sides to pursue dialog for peaceful resolution of the conflict; to the Committee on Foreign Relations.

H. Con. Res. 211. Concurrent resolution expressing the strong support of the Congress for the recently concluded elections in the Republic of India and urging the President to travel to India; to the Committee on Foreign Relations.

H. Con. Res. 213. Concurrent resolution encouraging the Secretary of Education to promote, and State and local educational agencies to incorporate in their education programs, financial literacy training; to the Committee on Health, Education, Labor, and Pensions.

H. Con. Res. 222. Concurrent resolution condemning the assassination of Armenian

Prime Minister Vazgen Sargsian and other officials of the Armenian Government and expressing the sense of the Congress in mourning this tragic loss of the duly elected leadership of Armenia; to the Committee on Foreign Relations.

H. Con. Res. 223. Concurrent resolution expressing the sense of the Congress regarding Freedom Day; to the Committee on the Judiciary.

H. Con. Res. 234. Concurrent resolution tabling the bill (H.R. 2466) entitled "An Act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2000, and for other purposes; to the Committee on Appropriations."

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times and placed on the calendar:

H.R. 170. An act to require certain notices in any mailing using a game of chance for the promotion of a product or service, and for other purposes.

H.R. 1167. An act to amend the Indian Self-Determination and Education Assistance Act to provide for further self-governance by Indian tribes, and for other purposes.

H.R. 1801. An act to make technical corrections to various antitrust laws and to references to such laws.

H.R. 1832. An act to reform unfair and anti-competitive practices in the professional boxing industry.

H.R. 2904. An act to amend the Ethics in Government Act of 1978 to reauthorize funding for the Office of Government Ethics, and to clarify the definition of a "special Government employee" under title 18, United States Code.

The following bill was read twice and ordered placed on the calendar:

S. 1982. A bill to clarify the standing of United States citizens to challenge the blocking of assets by the United States under the Foreign Narcotics Kingpin Designation Act.

ENROLLED JOINT RESOLUTION SIGNED

The following enrolled joint resolution, previously signed by the Speaker of the House, was signed on November 18, 1999, by the President pro tempore (Mr. THURMOND):

H.J. Res. 83. Joint resolution making further continuing appropriations for the fiscal year 2000, and for other purposes.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on November 19, 1999, he had presented to the President of the United States, the following enrolled bills:

S. 278. An act to direct the Secretary of the Interior to convey certain lands to the country of Rio Arriba, New Mexico.

S. 382. An act to establish the Minuteman Missile National Historic Site in the State of South Dakota, and for other purposes.

S. 1235. An act to amend part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 to allow railroad police officers to

attend the Federal Bureau of Investigation National Academy for law enforcement training.

S. 1398. An act to clarify certain boundaries on maps relating to the Coastal Barrier Resources System.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-6269. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 737 Series Airplanes; Docket No. 99-NM-02 {11-2/11-4}" (RIN2120-AA64) (1999-0436), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6270. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 777-200 Series Airplanes; Docket No. 99-NM-03 {11-2/11-4}" (RIN2120-AA64) (1999-0435), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6271. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Saab Model SAAB SF340A and 340B Series Airplanes; Docket No. 99-NM-199 {11-2/11-4}" (RIN2120-AA64) (1999-0433), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6272. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Dornier Model 328-100 Series Airplanes; Docket No. 99-NM-01 {11-2/11-4}" (RIN2120-AA64) (1999-0434), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6273. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Eurocopter France Model SA-365N, SA-365N1, and AS 365N2 Helicopters; Docket No. 98-SW-60 {11-3/11-4}" (RIN2120-AA64) (1999-0431), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6274. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Eurocopter France Model SA330F, G, J, and AS332C, L, and L1 Helicopters; Request for Comments; Docket No. 99-SW-01 {11-5/11-8}" (RIN2120-AA64) (1999-0437), received November 8, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6275. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled

"Airworthiness Directives; Bell Helicopter Textron Canada Model 222, 222B, and 222U Helicopters; Request for Comments; Docket No. 99-SW-51 {11-4/11-4}" (RIN2120-AA64) (1999-0429), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6276. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Bell Helicopter Textron Canada Model 430 Helicopters; Request for Comments; Docket No. 99-SW-50 {11-4/11-4}" (RIN2120-AA64) (1999-0430), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6277. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Robinson Helicopter Company Model R44 Helicopters; Request for Comments; Docket No. 99-SW-12 {11-3/11-4}" (RIN2120-AA64) (1999-0432), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6278. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment to Class E Airspace; Mountain View, MO; Direct Final Rule; Request for Comments; Docket No. 99-CE-46 {11-3/11-4}" (RIN2120-AA66) (1999-0362), received November 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6279. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Change Name of Using Restricted Area R-5203; Oswego, NY; Docket No. 99-AEA-12 {11-5/11-8}" (RIN2120-AA66) (1999-0364), received November 8, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6280. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Modification of the San Juan Low Offshore Airspace Area, PR; Docket No. 99-ASO-1 {11-5/11-8}" (RIN2120-AA66) (1999-0363), received November 8, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6281. A communication from the Assistant Bureau Chief, International Bureau, Satellite Radiocommunications Division, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled "First Order of Reconsideration in the Matter of Amendment of the Commission's Regulatory Policies to Allow Non-U.S. Licensed Space Stations to Provide Domestic and International Satellite Service in the United States" (IB Docket No. 96-111) (FCC 99-325), received November 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6282. A communication from the Deputy Chief, Wireless Telecommunications Commission, Auctions and Industry Analysis Division, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled "Allocation of Spectrum Below 5 GHz Transferred from Federal Government Use; 4660-4685 MHz; ET Docket No. 94-32; 'Fourth Report and Order', FCC 98-213" (ET Docket No. 94-32) (FCC 98-213), re-

ceived November 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6283. A communication from the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Atlantic Highly Migratory Species Fisheries; Atlantic Bluefin Tuna Fishery; Purse Seine Category Allocation Adjustment" (I.D. 061899A), received November 16, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6284. A communication from the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Final Rule to Implement Amendment 1 to the Fishery Management Plan for Corals and Reef Associated Plants and Invertebrates of Puerto Rico and the U.S. Virgin Islands" (RIN0648-AG88), received November 16, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6285. A communication from the Director, Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Termination of the Georges Bank Sea Scallop Exemption Program" (RIN0648-AM24), received November 16, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6286. A communication from the Deputy Assistant Administrator, National Ocean Service, Coastal Services Center, National Oceanic and Atmospheric Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Federal Register Notice/Coastal Services Center Broad Area Announcement: Fiscal Year 2000 Programs" (RIN0648-ZA73), received November 16, 1999; to the Committee on Commerce, Science, and Transportation.

EC-6287. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Avermectin B1 and its delta-8,9-isomer; Extension of Tolerance for Emergency Exemptions" (FRL #6391-8, received November 17, 1999; to the Committee on Agriculture, Nutrition, and Forestry.

EC-6288. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clopyralid; Pesticide Tolerance for Emergency Exemptions" (FRL #6388-5), received November 17, 1999; to the Committee on Agriculture, Nutrition, and Forestry.

EC-6289. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Herbicide Safener HOE-107892; Extension of Tolerance for Emergency Exemptions" (FRL #6385-5), received November 17, 1999; to the Committee on Agriculture, Nutrition, and Forestry.

EC-6290. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Glyphosate; Pesticide Tolerance" (FRL #6390-5), received November 17, 1999; to the Committee on Agriculture, Nutrition, and Forestry.

EC-6291. A communication from the Director, Office of Regulatory Management and

Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "National Emission Standards for Hazardous Air Pollutants: Generic Maximum Achievable Control Technology (Generic MACT); Process Wastewater Provisions" (FRL #6478-6), received November 17, 1999; to the Committee on Environment and Public Works.

EC-6292. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "National Emission Standards for Hazardous Air Pollutants: Generic Maximum Achievable Control Technology (Generic MACT); Process Wastewater Provisions" (FRL #6478-8), received November 17, 1999; to the Committee on Environment and Public Works.

EC-6293. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Iowa Update of Materials Incorporated by Reference" (FRL #6462-3), received November 17, 1999; to the Committee on Environment and Public Works.

EC-6294. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; New Jersey; Approval of Carbon Monoxide State Implementation Plan Revisions; Determination of Carbon Monoxide Attainment; Removal of Oxygenated Gasoline Program" (FRL #6477-3), received November 17, 1999; to the Committee on Environment and Public Works.

EC-6295. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; States of Colorado, Utah, and Wyoming; General Conformity" (FRL #6471-4), received November 17, 1999; to the Committee on Environment and Public Works.

EC-6296. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "NESHAPS: Final Standards for Hazardous Air Pollutants for Hazardous Waste Combustors" (FRL #6477-9), received November 17, 1999; to the Committee on Environment and Public Works.

EC-6297. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, two reports relative to EPA regulatory programs; to the Committee on Environment and Public Works.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCAIN, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 795. A bill to amend the Fastener Quality Act to strengthen the protection against the sale of mismarked, misrepresented, and counterfeit fasteners and eliminate unnecessary requirements, and for other purposes (Rept. No. 106-224).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GRAMM (for himself, Mr. ABRAHAM, Mr. ALLARD, Mr. ASHCROFT, Mr. BAYH, Mr. BENNETT, Mr. BIDEN, Mr. BOND, Mr. BROWNBACK, Mr. BRYAN, Mr. BUNNING, Mr. BURNS, Mr. CAMPBELL, Mr. CHAFEE, Mr. COCHRAN, Ms. COLLINS, Mr. COVERDELL, Mr. CRAIG, Mr. CRAPO, Mr. DASCHLE, Mr. DEWINE, Mr. DODD, Mr. DOMENICI, Mr. DURBIN, Mr. ENZI, Mr. FEINGOLD, Mr. FITZGERALD, Mr. GRAMS, Mr. GRASSLEY, Mr. GREGG, Mr. HAGEL, Mr. HATCH, Mr. HELMS, Mr. HUTCHINSON, Mrs. HUTCHISON, Mr. INHOFE, Mr. JEFFORDS, Mr. KERREY, Mr. KERRY, Mr. KYL, Ms. LANDRIEU, Mr. LEAHY, Mr. LOTT, Mr. LUGAR, Mr. MACK, Mr. MCCONNELL, Mr. MURKOWSKI, Mr. NICKLES, Mr. REED, Mr. REID, Mr. ROBERTS, Mr. ROTH, Mr. SANTORUM, Mr. SCHUMER, Mr. SESSIONS, Mr. SHELBY, Mr. SMITH of New Hampshire, Mr. SMITH of Oregon, Ms. SNOWE, Mr. SPECTER, Mr. STEVENS, Mr. THOMAS, Mr. THOMPSON, Mr. THURMOND, Mr. VOINOVICH, Mr. WARNER, Mr. WELLSTONE, Mr. WYDEN, Mr. FRIST, and Mr. MOYNIHAN):

S. 1971. A bill to authorize the President to award a gold medal on behalf of the Congress to Milton Friedman, in recognition of his outstanding and enduring contributions to individual freedom and opportunity in American society through his exhaustive research and teaching of economics, and his extensive writings on economics and public policy; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. ALLARD:

S. 1972. A bill to direct the Secretary of Agriculture to convey to the town of Dolores, Colorado, the current site of the Joe Rowell Park; to the Committee on Energy and Natural Resources.

By Mr. BINGAMAN:

S. 1973. A bill to simplify Federal oil and gas revenue distributions, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. SCHUMER (for himself, Ms. SNOWE, Mr. BAYH, and Mr. SMITH of Oregon):

S. 1974. A bill to amend the Internal Revenue Code of 1986 to make higher education more affordable by providing a full tax deduction for higher education expenses and a tax credit for student education loans; to the Committee on Finance.

By Mr. MACK (for himself and Mr. BREAU):

S. 1975. A bill to amend the Internal Revenue Code of 1986 to modify the tax on generation-skipping transfers to eliminate certain traps for the unwary and otherwise improve the fairness of such tax; to the Committee on Finance.

By Mr. THOMPSON:

S. 1976. A bill to amend the Internal Revenue Code of 1986 to provide that certain uses

of a facility owned by a tax-exempt organization shall not be treated as private business use for purposes of determining whether bonds issued to provide the facility are tax-exempt bonds; to the Committee on Finance.

By Mr. McCAIN (for himself, Mr. THOMPSON, Mr. LIEBERMAN, and Mr. ABRAHAM):

S. 1977. A bill to review, reform, and terminate unnecessary and inequitable Federal subsidies; to the Committee on Governmental Affairs.

By Mr. DOMENICI:

S. 1978. A bill to direct the Secretary of Veterans Affairs to establish a national cemetery for veterans in the Albuquerque, New Mexico, metropolitan area; to the Committee on Veterans Affairs.

By Mr. CONRAD (for himself and Mr. MOYNIHAN):

S. 1979. A bill to amend the Internal Revenue Code of 1986 and the Employee Retirement Income Security Act of 1974 to provide that restrictions on application of State laws to pension benefits shall not apply to State laws prohibiting individuals from benefitting from crimes involving the death of pension plan participants; to the Committee on Finance.

By Mr. BAUCUS (for himself, Mr. HARKIN, Mr. DASCHLE, Mr. KERREY, Mr. DURBIN, Mr. JOHNSON, Mr. WELLSTONE, Mr. CONRAD, Mr. ROCKEFELLER, Mr. BRYAN, Mr. REID, Mr. LEAHY, Mr. WYDEN, and Mrs. MURRAY):

S. 1980. A bill to amend the Rural Electrification Act of 1936 to ensure improved access to the signals of local television stations by multichannel video providers to all households which desire such service in unserved and underserved rural areas by December 31, 2006; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY:

S. 1981. A bill to amend title XI of the Public Health Service Act to provide for the use of new genetic technologies to meet the health care needs of the public; to the Committee on Health, Education, Labor, and Pensions.

By Mr. LEVIN:

S. 1982. A bill to clarify the standing of United States citizens to challenge the blocking of assets by the United States under the Foreign Narcotics Kingpin Designation Act; read twice; ordered placed on the calendar.

By Mrs. MURRAY (for herself, Mr. CRAIG, Mr. SMITH of Oregon, Mrs. BOXER, and Mrs. FEINSTEIN):

S. 1983. A bill to amend the Agricultural Trade Act of 1978 to increase the amount of funds available for certain agricultural trade programs; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HARKIN (for himself and Mr. LUGAR):

S. 1984. A bill to establish in the Antitrust Division of the Department of Justice a position with responsibility for agricultural antitrust matters; to the Committee on the Judiciary.

By Mr. TORRICELLI:

S. 1985. A bill to amend the Internal Revenue Code of 1986 to lower the adjusted gross income threshold for deductible disaster casualty losses to 5 percent, to make such deduction an above-the-line deduction, and to allow an election to take such deduction for the preceding or succeeding year; to the Committee on Finance.

By Mr. BAUCUS (for himself and Mr. BURNS):

S. 1986. A bill to amend title X of division C of the Omnibus Consolidated and Emergency Supplemental Appropriations Act of 1998, relating to the Canyon Ferry Reservoir, Montana; to the Committee on Energy and Natural Resources.

By Mr. DURBIN (for himself, Ms. COLLINS, Mr. KOHL, Mr. WELLSTONE, Mr. REID, Mr. GRAHAM, Mr. HARKIN, Ms. MIKULSKI, Ms. LANDRIEU, Mr. DODD, Mrs. BOXER, Mr. JOHNSON, and Mr. CLELAND):

S. 1987. A bill to amend the Violence Against Women Act of 1994, the Family Violence Prevention and Services Act, the Older Americans Act of 1965, and the Public Health Service Act to ensure that older women are protected from institutional, community, and domestic violence and sexual assault and to improve outreach efforts and other services available to older women victimized by such violence, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. DASCHLE (for himself, Mr. HATCH, Mr. BROWNBACK, Mr. HARKIN, Mr. JOHNSON, Mr. DORGAN, Mr. BAUCUS, Mr. CONRAD, Mr. BINGAMAN, Mr. VOINOVICH, and Mr. BURNS):

S. 1988. A bill to reform the State inspection of meat and poultry in the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KOHL:

S. 1989. A bill to ensure that employees of traveling sales crews are protected under the Fair Labor Standards Act of 1938 and under other provisions of law; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. BOXER (for herself and Mrs. FEINSTEIN):

S. 1990. A bill to designate the Federal building located at 501 I Street in Sacramento, California, as the "Joe Serna, Jr. United States Courthouse and Federal Building"; to the Committee on Environment and Public Works.

By Mr. THOMPSON (for himself, Mr. LIEBERMAN, Ms. COLLINS, and Mr. LEAHY):

S. 1991. A bill to amend the Federal Election Campaign Act of 1971 to enhance criminal penalties for election law violations, to clarify current provisions of law regarding donations from foreign nationals, and for other purposes; to the Committee on Rules and Administration.

By Ms. SNOWE:

S. 1992. A bill to provide States with loans to enable State entities or local governments within the States to make interest payments on qualified school construction bonds issued by the State entities or local governments, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. THOMPSON (for himself and Mr. LIEBERMAN):

S. 1993. A bill to reform Government information security by strengthening information security practices throughout the Federal Government; to the Committee on Governmental Affairs.

By Mr. KERRY (for himself and Mr. BRYAN):

S. 1994. A bill to amend the Internal Revenue Code of 1986 to provide assistance to first-time homebuyers; to the Committee on Finance.

By Mr. KOHL:

S. 1995. A bill to amend the National School Lunch Act to revise the eligibility of private organizations under the child and

adult care food program; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. JEFFORDS (for himself, Mr. KENNEDY, and Mr. FRIST):

S. 1996. A bill to amend the Public Health Service Act to clarify provisions relation to the content of petitions for compensation under the vaccine injury compensation program; considered and passed.

By Mr. BINGAMAN:

S. 1997. A bill to simplify Federal oil and gas revenue distributions, and for other proposes; to the Committee on Energy and Natural Resources.

By Mr. MCCAIN:

S. 1998. A bill to establish the Yuma Crossing National Heritage Area; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAYH (for himself, Mr. BREAU, Mr. GRASSLEY, Mr. BURNS, Mr. REED, Mr. JEFFORDS, Mr. LUGAR, Mr. WARNER, Mr. ABRAHAM, Mr. DURBIN, Mr. BRYAN, Mr. KENNEDY, Mrs. MURRAY, Mr. SMITH of Oregon, Mr. REID, Mr. EDWARDS, Mr. DORGAN, Mr. COCHRAN, Ms. MIKULSKI, Mr. JOHNSON, Mr. STEVENS, Mr. CLELAND, Mr. AKAKA, Mr. SPEETER, Ms. LANDRIEU, Mr. WELLSTONE, Mr. BAUCUS, Mr. KERRY, Mr. DEWINE, Mr. LIEBERMAN, Mr. WYDEN, Mr. ENZI, Mr. BINGAMAN, Mr. ROBB, Mr. INOUE, Mrs. BOXER, Mrs. LINCOLN, Mr. DODD, Mr. TORRICELLI, Mr. SCHUMER, Mr. GRAHAM, Mr. FEINGOLD, and Mrs. FEINSTEIN):

S. Res. 234. A resolution recognizing the contribution of older persons to their communities and commending the work of organizations that participate in programs assisting older persons and that promote the goals of the International Year of Older Persons; considered and agreed to.

By Mr. MCCONNELL:

S. Res. 235. A resolution to authorize the printing of a revised edition of the Senate Election Law Guidebook; considered and agreed to.

S. Res. 236. A resolution to authorize the printing of a revised edition of the Nomination and Election of the President and Vice President of the United States; considered and agreed to.

By Mrs. BOXER (for herself, Mrs. MURRAY, Mrs. LINCOLN, Ms. MIKULSKI, Mrs. FEINSTEIN, Ms. COLLINS, Ms. LANDRIEU, and Ms. SNOWE):

S. Res. 237. A resolution expressing the sense of the Senate that the United States Senate Committee on Foreign Relations should hold hearings and the Senate should act on the Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW); ordered to lie over under the rule.

By Mr. LOTT (for himself and Mr. DASCHLE):

S. Res. 238. A resolution to authorize representation of Member of the Senate in the case of Brett Kimberlin v. Orrin Hatch, et al; considered and agreed to.

By Mr. ROBB:

S. Res. 239. A resolution expressing the sense of the Senate that Nadia Dabbagh, who was abducted from the United States, should be returned home to her mother, Ms. Maureen Dabbagh; to the Committee on Foreign Relations.

By Mr. LOTT (for himself and Mr. DASCHLE):

S. Res. 240. A resolution commending Stephen G. Bale, Keeper of the Stationery, United States Senate; considered and agreed to.

By Mr. LOTT:

S. Res. 241. A resolution to direct the Senate Commission on Art to recommend to the Senate two outstanding individuals whose paintings shall be placed in two of the remaining unfilled spaces in the Senate reception room; considered and agreed to.

By Mr. LOTT (for himself and Mr. DASCHLE):

S. Con. Res. 77. A concurrent resolution making technical corrections to the enrollment of H.R. 3194; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MACK (for himself and Mr. BREAU):

S. 1975. A bill to amend the Internal Revenue Code of 1986 to modify the tax on generation-skipping transfers to eliminate certain traps for the unwary and otherwise improve the fairness of such tax; to the Committee on Finance.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

THE GENERATION-SKIPPING TRANSFER TAX AMENDMENTS ACT

Mr. MACK: Mr. President, today Senator BREAU and I join in introducing legislation to correct serious problems in the allocation of generation-skipping transfer tax (GST) exemptions. This legislation would provide relief to taxpayers for missed allocations of the GST exemption and would make the exemption allocation automatic, in place of the current law requirement that the taxpayers take an affirmative step to claim the exemption. This proposed change was included in the Taxpayer Refund and Relief Act of 1999, but failed to become law due to the President's veto of that bill.

Under this legislation, the GST exemption is automatically allocated to "indirect skip" transfers made while the donor is alive. An indirect skip is a transfer of property subject to the gift tax that is made to a GST trust. Direct skips (generally, transfers solely for the benefit of grandchildren) are already covered by an automatic allocation rule. An individual may elect not to have the automatic allocation rule apply to an indirect skip. Also, under this legislation, the GST exemption may be allocated retroactively when there is an unnatural order of death. If a lineal descendant of the transferor predeceased the transferor, then the transferor may allocate the unused GST exemption to any previous transfer or transfers to the trust on a chronological basis.

This legislation also provides authorization and direction to the Treasury Secretary to grant extensions of time

to make the election to allocate the GST exemption and to grant exceptions to the time requirement. If such relief is granted, then the value on the date of transfer to the trust would be used for determining GST exemption allocation.

Mr. President, this is important legislation which deserves enactment at the earliest possible date. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1975

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Generation-Skipping Transfer Tax Amendments Act of 1999".

SEC. 2. DEEMED ALLOCATION OF GST EXEMPTION TO LIFETIME TRANSFERS TO TRUSTS; RETROACTIVE ALLOCATIONS.

(a) IN GENERAL.—Section 2632 of the Internal Revenue Code of 1986 (relating to special rules for allocation of GST exemption) is amended by redesignating subsection (c) as subsection (e) and by inserting after subsection (b) the following new subsections:

"(c) DEEMED ALLOCATION TO CERTAIN LIFETIME TRANSFERS TO GST TRUSTS.—

"(1) IN GENERAL.—If any individual makes an indirect skip during such individual's lifetime, any unused portion of such individual's GST exemption shall be allocated to the property transferred to the extent necessary to make the inclusion ratio for such property zero. If the amount of the indirect skip exceeds such unused portion, the entire unused portion shall be allocated to the property transferred.

"(2) UNUSED PORTION.—For purposes of paragraph (1), the unused portion of an individual's GST exemption is that portion of such exemption which has not previously been—

"(A) allocated by such individual,
"(B) treated as allocated under subsection (b) with respect to a direct skip occurring during or before the calendar year in which the indirect skip is made, or

"(C) treated as allocated under paragraph (1) with respect to a prior indirect skip.

"(3) DEFINITIONS.—

"(A) INDIRECT SKIP.—For purposes of this subsection, the term 'indirect skip' means any transfer of property subject to the tax imposed by chapter 12 made to a GST trust.

"(B) GST TRUST.—The term 'GST trust' means a trust that could have a generation-skipping transfer with respect to the transferor unless—

"(i) the trust instrument provides that more than 25 percent of the trust corpus must be distributed to or may be withdrawn by 1 or more individuals who are non-skip persons—

"(I) before the date that the individual attains age 46,

"(II) on or before 1 or more dates specified in the trust instrument that will occur before the date that such individual attains age 46, or

"(III) upon the occurrence of an event that, in accordance with regulations prescribed by the Secretary, may reasonably be expected to occur before the date that such individual attains age 46;

“(ii) the trust instrument provides that more than 25 percent of the trust corpus must be distributed to or may be withdrawn by 1 or more individuals who are non-skip persons and who are living on the date of death of another person identified in the instrument (by name or by class) who is more than 10 years older than such individuals;

“(iii) the trust instrument provides that, if 1 or more individuals who are non-skip persons die on or before a date or event described in clause (i) or (ii), more than 25 percent of the trust corpus either must be distributed to the estate or estates of 1 or more of such individuals or is subject to a general power of appointment exercisable by 1 or more of such individuals;

“(iv) the trust is a trust any portion of which would be included in the gross estate of a non-skip person (other than the transferor) if such person died immediately after the transfer;

“(v) the trust is a charitable lead annuity trust (within the meaning of section 2642(e)(3)(A)) or a charitable remainder annuity trust or a charitable remainder unitrust (within the meaning of section 664(d)); or

“(vi) the trust is a trust with respect to which a deduction was allowed under section 2522 for the amount of an interest in the form of the right to receive annual payments of a fixed percentage of the net fair market value of the trust property (determined yearly) and which is required to pay principal to a non-skip person if such person is alive when the yearly payments for which the deduction was allowed terminate.

For purposes of this subparagraph, the value of transferred property shall not be considered to be includible in the gross estate of a non-skip person or subject to a right of withdrawal by reason of such person holding a right to withdraw so much of such property as does not exceed the amount referred to in section 2503(b) with respect to any transferor, and it shall be assumed that powers of appointment held by non-skip persons will not be exercised.

“(4) AUTOMATIC ALLOCATIONS TO CERTAIN GST TRUSTS.—For purposes of this subsection, an indirect skip to which section 2642(f) applies shall be deemed to have been made only at the close of the estate tax inclusion period. The fair market value of such transfer shall be the fair market value of the trust property at the close of the estate tax inclusion period.

“(5) APPLICABILITY AND EFFECT.—

“(A) IN GENERAL.—An individual—

“(i) may elect to have this subsection not apply to—

“(I) an indirect skip, or

“(II) any or all transfers made by such individual to a particular trust, and

“(ii) may elect to treat any trust as a GST trust for purposes of this subsection with respect to any or all transfers made by such individual to such trust.

“(B) ELECTIONS.—

“(i) ELECTIONS WITH RESPECT TO INDIRECT SKIPS.—An election under subparagraph (A)(i)(I) shall be deemed to be timely if filed on a timely filed gift tax return for the calendar year in which the transfer was made or deemed to have been made pursuant to paragraph (4) or on such later date or dates as may be prescribed by the Secretary.

“(ii) OTHER ELECTIONS.—An election under clause (i)(II) or (ii) of subparagraph (A) may be made on a timely filed gift tax return for the calendar year for which the election is to become effective.

“(d) RETROACTIVE ALLOCATIONS.—

“(1) IN GENERAL.—If—

“(A) a non-skip person has an interest or a future interest in a trust to which any transfer has been made,

“(B) such person—

“(i) is a lineal descendant of a grandparent of the transferor or of a grandparent of the transferor's spouse or former spouse, and

“(ii) is assigned to a generation below the generation assignment of the transferor, and

“(C) such person predeceases the transferor,

then the transferor may make an allocation of any of such transferor's unused GST exemption to any previous transfer or transfers to the trust on a chronological basis.

“(2) SPECIAL RULES.—If the allocation under paragraph (1) by the transferor is made on a gift tax return filed on or before the date prescribed by section 6075(b) for gifts made within the calendar year within which the non-skip person's death occurred—

“(A) the value of such transfer or transfers for purposes of section 2642(a) shall be determined as if such allocation had been made on a timely filed gift tax return for each calendar year within which each transfer was made,

“(B) such allocation shall be effective immediately before such death, and

“(C) the amount of the transferor's unused GST exemption available to be allocated shall be determined immediately before such death.

“(3) FUTURE INTEREST.—For purposes of this subsection, a person has a future interest in a trust if the trust may permit income or corpus to be paid to such person on a date or dates in the future.”.

(b) CONFORMING AMENDMENT.—Paragraph (2) of section 2632(b) of such Code is amended by striking “with respect to a direct skip” and inserting “or subsection (c)(1)”.

(c) EFFECTIVE DATES.—

(1) DEEMED ALLOCATION.—Section 2632(c) of the Internal Revenue Code of 1986 (as added by subsection (a)), and the amendment made by subsection (b), shall apply to transfers subject to chapter 11 or 12 of such Code made after December 31, 1999, and to estate tax inclusion periods ending after December 31, 1999.

(2) RETROACTIVE ALLOCATIONS.—Section 2632(d) of the Internal Revenue Code of 1986 (as added by subsection (a)) shall apply to deaths of non-skip persons occurring after the date of the enactment of this Act.

SEC. 3. SEVERING OF TRUSTS.

(a) IN GENERAL.—Subsection (a) of section 2642 of the Internal Revenue Code of 1986 (relating to inclusion ratio) is amended by adding at the end the following new paragraph:

“(3) SEVERING OF TRUSTS.—

“(A) IN GENERAL.—If a trust is severed in a qualified severance, the trusts resulting from such severance shall be treated as separate trusts thereafter for purposes of this chapter.

“(B) QUALIFIED SEVERANCE.—For purposes of subparagraph (A)—

“(i) IN GENERAL.—The term ‘qualified severance’ means the division of a single trust and the creation (by any means available under the governing instrument or under local law) of 2 or more trusts if—

“(I) the single trust was divided on a fractional basis, and

“(II) the terms of the new trusts, in the aggregate, provide for the same succession of interests of beneficiaries as are provided in the original trust.

“(ii) TRUSTS WITH INCLUSION RATIO GREATER THAN ZERO.—If a trust has an inclusion ratio of greater than zero and less than 1, a severance is a qualified severance only if the sin-

gle trust is divided into 2 trusts, one of which receives a fractional share of the total value of all trust assets equal to the applicable fraction of the single trust immediately before the severance. In such case, the trust receiving such fractional share shall have an inclusion ratio of zero and the other trust shall have an inclusion ratio of 1.

“(iii) REGULATIONS.—The term ‘qualified severance’ includes any other severance permitted under regulations prescribed by the Secretary.

“(C) TIMING AND MANNER OF SEVERANCES.—A severance pursuant to this paragraph may be made at any time. The Secretary shall prescribe by forms or regulations the manner in which the qualified severance shall be reported to the Secretary.”.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to severances after the date of the enactment of this Act.

SEC. 4. MODIFICATION OF CERTAIN VALUATION RULES.

(a) GIFTS FOR WHICH GIFT TAX RETURN FILED OR DEEMED ALLOCATION MADE.—Paragraph (1) of section 2642(b) of the Internal Revenue Code of 1986 (relating to valuation rules, etc.) is amended to read as follows:

“(1) GIFTS FOR WHICH GIFT TAX RETURN FILED OR DEEMED ALLOCATION MADE.—If the allocation of the GST exemption to any transfers of property is made on a gift tax return filed on or before the date prescribed by section 6075(b) for such transfer or is deemed to be made under section 2632 (b)(1) or (c)(1)—

“(A) the value of such property for purposes of subsection (a) shall be its value as finally determined for purposes of chapter 12 (within the meaning of section 2001(f)(2)), or, in the case of an allocation deemed to have been made at the close of an estate tax inclusion period, its value at the time of the close of the estate tax inclusion period, and

“(B) such allocation shall be effective on and after the date of such transfer, or, in the case of an allocation deemed to have been made at the close of an estate tax inclusion period, on and after the close of such estate tax inclusion period.”.

(b) TRANSFERS AT DEATH.—Subparagraph (A) of section 2642(b)(2) of such Code is amended to read as follows:

“(A) TRANSFERS AT DEATH.—If property is transferred as a result of the death of the transferor, the value of such property for purposes of subsection (a) shall be its value as finally determined for purposes of chapter 11; except that, if the requirements prescribed by the Secretary respecting allocation of post-death changes in value are not met, the value of such property shall be determined as of the time of the distribution concerned.”.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 1431 of the Tax Reform Act of 1986.

SEC. 5. RELIEF PROVISIONS.

(a) IN GENERAL.—Section 2642 of the Internal Revenue Code of 1986 is amended by adding at the end the following new subsection:

“(g) RELIEF PROVISIONS.—

“(1) RELIEF FOR LATE ELECTIONS.—

“(A) IN GENERAL.—The Secretary shall by regulation prescribe such circumstances and procedures under which extensions of time will be granted to make—

“(i) an allocation of GST exemption described in paragraph (1) or (2) of subsection (b), and

“(ii) an election under subsection (b)(3) or (c)(5) of section 2632.

Such regulations shall include procedures for requesting comparable relief with respect to

transfers made before the date of enactment of this paragraph.

“(B) BASIS FOR DETERMINATIONS.—In determining whether to grant relief under this paragraph, the Secretary shall take into account all relevant circumstances, including evidence of intent contained in the trust instrument or instrument of transfer and such other factors as the Secretary deems relevant. For purposes of determining whether to grant relief under this paragraph, the time for making the allocation (or election) shall be treated as if not expressly prescribed by statute.

“(2) SUBSTANTIAL COMPLIANCE.—An allocation of GST exemption under section 2632 that demonstrates an intent to have a zero inclusion ratio with respect to a transfer or a trust shall be deemed to be an allocation of so much of the transferor's unused GST exemption as produces, to the extent possible, a zero inclusion ratio. In determining whether there has been substantial compliance, all relevant circumstances shall be taken into account, including evidence of intent contained in the trust instrument or instrument of transfer and such other factors as the Secretary deems relevant.”.

(b) EFFECTIVE DATES.—

(1) RELIEF FOR LATE ELECTIONS.—Section 2642(g)(1) of the Internal Revenue Code of 1986 (as added by subsection (a)) shall apply to requests pending on, or filed after, the date of the enactment of this Act.

(2) SUBSTANTIAL COMPLIANCE.—Section 2642(g)(2) of such Code (as so added) shall take effect on the date of the enactment of this Act and shall apply to allocations made prior to such date for purposes of determining the tax consequences of generation-skipping transfers with respect to which the period of time for filing claims for refund has not expired. No negative implication is intended with respect to the availability of relief for late elections or the application of a rule of substantial compliance prior to the enactment of this amendment.

• Mr. BREAU. Mr. President, I am pleased to join my colleague from the Senate Finance Committee, Senator MACK, in introducing legislation designated to address past problems with the allocation of the generation-skipping transfer (GST) exemption, and to provide for automatic allocations going forward.

Under current law, taxpayers must make affirmative allocations of the GST exemption for transfers to a trust. As a result, many taxpayers have not made timely allocations and face the prospect of losing a significant portion of the exemption's benefit. This legislation is designed to assure that taxpayers get the full benefit of the law by making GST exemption allocations automatic for transfers to a trust and to give taxpayers the opportunity to cure past allocations which were not made on a timely basis.

This legislation was included in the tax bill that was sent to the President earlier this summer. It enjoys Republican and Democratic support on both sides of the hill. I urge its inclusion in the next tax bill sent to the White House. •

By Mr. McCAIN (for himself, Mr. THOMPSON, Mr. LIEBERMAN, and Mr. ABRAHAM):

S. 1977. A bill to review, reform, and terminate unnecessary and inequitable Federal subsidies; to the Committee on Governmental Affairs.

CORPORATE SUBSIDY REFORM COMMISSION ACT
OF 1999

• Mr. McCAIN. Mr. President, I rise today to introduce legislation to establish a process to eliminate and reform federal subsidies and tax advantages received by corporations. This bill, “The Corporate Subsidy Reform Commission Act” is identical to a bill that was reported out of the Senate Governmental Affairs Committee in May, 1997. I am pleased to have as cosponsors Senators THOMPSON, LIEBERMAN, and ABRAHAM.

I would like to briefly describe the major provisions of the Corporate Subsidy Reform Commission Act. It defines inequitable subsidies as those provided to corporations without a reasonable expectation that they will return a commensurate benefit to the public.

The Act excludes any subsidies that are primarily for research and development, education, public health, safety, or the environment. Also excluded are subsidies or tax advantages necessary to comply with international trade or treaty obligations.

The Act would create a nine-member commission nominated by the President and the Congressional leadership. Federal agencies would be required to submit to the Commission, at the time of the Administration's next budget, a list of subsidies and tax advantages that it believes are inequitable. The Commission will provide recommendations to either terminate or reduce the corporate subsidies. The President has the authority under the Act to either terminate the process, or submit the Commission's recommendations to the Congress as a legislative initiative.

The Congress would then have four months to review the Commission's recommendations which have been endorsed by the President. At that time, the actions of all involved committees in each respective body would be sent to the floor for debate, under expedited procedures.

Many federal subsidies and special-interest tax breaks for corporations are unnecessary, and do not provide a fair return to the taxpayers who bear the heavy burden of their cost. If a corporation is receiving taxpayer-funded subsidies or tax breaks that are unsupported by a compelling benefit to the public, the subsidy should be ended.

Our nation is just now beginning to pay down a national debt of over \$5 trillion. Every American shoulders an unconscionable amount of debt—somewhere in the range of \$19,000 each—not due to any profligate spending of their own, but because of the fiscal irresponsibility of their elected officials in Congress. The citizens who expect leadership and accountability from their representatives have gotten special inter-

est pandering in return. This is devastating to our nation's fiscal stability, and crippling to the ability of the Congress to respond to truly urgent social needs such as health care, education, and national security.

Let me note a couple of estimates of this scope of unjustified federal subsidies to corporations that illustrates how expensive this burden is. When I first introduced this legislation, the CATO Institute had identified 125 federal programs that provided over \$85 billion in industry subsidies. The Progressive Policy Institute identified an additional \$30 billion in tax loopholes for major industries.

Unfortunately, the pervasive system of pork-barreling and special interest legislating is speeding along unabated in Washington. Instead of pursuing our nation's priorities in a bipartisan manner, both parties continue to legislate, posture, and spend for partisan advantage. I have worked hard during my service in the Senate to eliminate wasteful earmarks in appropriations bills. Yet this year alone, more than \$13 billion in pork barrel spending was approved by the Senate. I was also dismayed at the inclusion of numerous special-interest tax breaks contained in the comprehensive tax bill passed by the Congress this year, then vetoed.

Mr. President, I want to state openly that I would strongly prefer to eliminate corporate subsidies and inequitable tax subsidies without resorting to a commission. I would rather have every committee in the House and Senate open the next session of Congress by expeditiously examining their areas of jurisdiction for unwarranted corporate pork. Then, each respective body could engage in a full and thorough debate on the merits of each subsidy, and vote on their termination or modification. However, I regret that approach is unlikely to occur, because of the difficulty in resisting the requests of the special interests. The bill I am introducing today represents a practical approach to establishing not only a credible process to identify corporate pork, but to then take the important next step of achieving real reductions on behalf of over-taxed constituents.

I look forward to this bill being brought before the Senate Governmental Affairs Committee early next year. To ensure that the Senate Committee on Finance has an opportunity to evaluate any tax policy modifications contained in this Act, I have agreed to a sequential referral consent request with the leadership of those two committees. I am hopeful that this bill represents the beginning of a serious and productive process to alleviate the public burden of unnecessary corporate subsidies and tax breaks.

By Mr. DOMENICI:

S. 1978. A bill to direct the Secretary of Veterans Affairs to establish a national cemetery for veterans in the Albuquerque, New Mexico, metropolitan area; to the Committee on Veterans' Affairs.

ALBUQUERQUE NATIONAL CEMETERY
LEGISLATION

Mr. DOMENICI. Mr. President, it is with great pleasure and honor that I rise today to introduce a bill to create a National Veterans Cemetery in Albuquerque, New Mexico.

The men and women who have served in the United States Armed Forces have made immeasurable sacrifices for the principles of freedom and liberty that make this Nation unique throughout civilization. The service of veterans has been vital to the history of the Nation, and the sacrifices made by veterans and their families should not be forgotten.

These veterans at the very least deserve every opportunity to be buried at a National Cemetery with their fellow comrades. However, the Santa Fe National Cemetery, which serves the Northern two thirds of New Mexico, is rapidly approaching maximum capacity.

Unfortunately, even though the Senate has already passed my legislation to extend the useful life of the Santa Fe National Cemetery by authorizing the use of flat grave markers the life of the Cemetery will only be extended to 2008. Consequently, I would submit that it is not too soon to be planning or the day when Santa Fe will no longer be available.

Before I continue, I would like to take a moment to talk about the Santa Fe National Cemetery. I believe all New Mexicans can be proud of the Santa Fe National Cemetery that has grown from 39/100 of an acre to its current 77 acres.

The cemetery first opened in 1868 and within several years was designated a National Cemetery in April of 1875. Men and women who have fought in all of nation's wars hold an honored spot within the hallowed ground of the cemetery.

With that said, I believe now is the right time to begin looking for another suitable site to serve as the last resting place for those New Mexico veterans who gave of themselves to protect the American ideals of liberty and freedom. The need to begin planning becomes even more pressing by virtue of the fact that more than half of New Mexico's 180,000 veterans live in the Albuquerque/Santa Fe area and internments are expected to peak in 2008.

Consequently, I am introducing legislation today to create a National Veterans Cemetery in Albuquerque, New Mexico. I also want to compliment Congresswoman Heather Wilson who offered this far-sighted legislation in the House of Representatives last week with the knowledge that there is only

a finite amount of space available over the long term at the existing national cemetery in Santa Fe.

The Bill simply directs the Secretary of Veterans Affairs to establish a national cemetery in the Albuquerque metropolitan area and to submit a report to Congress setting forth a schedule for establishing the cemetery.

Mr. President, in conclusion I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTABLISHMENT OF NATIONAL CEMETERY.

(A) IN GENERAL.—The Secretary of Veterans Affairs shall establish, in accordance with chapter 124 of title 38, United States Code, a national cemetery in the Albuquerque, New Mexico, metropolitan area to serve the needs of veterans and their families.

(b) REPORT.—As soon as practicable after the date of the enactment of this Act. The Secretary shall submit to Congress a report that sets forth a schedule for the establishment of the national cemetery under subsection (a) and an estimate of the costs associated with the establishment of the national cemetery.

By Mr. CONRAD (for himself and Mr. MOYNIHAN):

S. 1979. A bill to amend the Internal Revenue Code of 1986 and the Employee Retirement Income Security Act of 1974 to provide that restrictions on application of State laws to pension benefits shall not apply to State laws prohibiting individuals from benefitting from crimes involving the death of pension plan participants; to the Committee on Finance.

THE SLAYER STATUTE ACT

• Mr. CONRAD. Mr. President, I rise to address an oversight in the Employment Retirement Income Security Act (ERISA) brought to my attention by a constituent of mine in Grand Forks, North Dakota.

On October 14, 1997, Betty Rambel disappeared. Two days later, the burnt-out shell of her car was found. Inside the trunk was an unrecognizable body. On October 24, 1997, using dental records, the body was identified as Betty. That day, her husband, Steve, was arrested for her murder.

Steve Rambel's trial took place in November of 1998, roughly a year ago. After a week-long trial the jury found him guilty of murder in the second degree, assault with a deadly weapon, and arson. Steve was sentenced to life in prison on March 5, 1999.

Even once is too often, yet this sort of situation occurs more frequently than that: people are killed by people they trust. We read the headlines, are bombarded with the lurid details, and our thoughts move to other matters when the killer is convicted and sen-

tenced. However, for the other victims of these crimes—the family and friends of the victim—the nightmare drags on. In the midst of the shock, the anger, the inconsolable sorrow of their loss, these victims have to pick up the pieces of their lives and go through the business of getting back on their feet. I rise today to speak about the “business” of moving on.

With her sister gone and her brother-in-law in jail, Phyllis Marden assumed responsibility for the care of her minor niece and nephew. In the midst of settling her deceased sister's estate, Phyllis was notified that she was named as the second beneficiary to Betty's pension benefits. When coming to agreement with her sister's employer on the award of benefits, Ms. Marden was upset to find that, although it is prohibited by state law, under ERISA her sister's killer can lay future claim to her pension benefits. Justifiably disturbed by this oversight in federal law, Phyllis contacted my office.

ERISA preempts state laws that govern the award of pension benefits, even clear-cut rulings like those made against Steven Ramble. To correct this situation and others like it, we have drafted a bill which would waive the ERISA preemption in cases where a state's “slayer statute” applies to the application of benefits. This bill simply provides that individuals will not have access to ERISA benefits as a result of crimes they commit causing the death of pension plan participants. While many insurance plans already have language to this effect, ERISA does not. The aim of the bill is to codify the direction of the court in recent decisions of this issue and the Internal Revenue Service decision made on this matter in February 24, 1999, private letter ruling.

While no one thinks that killers should benefit from their victims' pension plans, some suggest that waiving the ERISA preemption in these cases might start us down a “slippery slope,” where we begin waiving the ERISA preemption to support and enforce social policy. They would prefer to deal with these matters on a case-by-case basis. I understand this line of reasoning; however, I strenuously disagree. I side with the Phyllis Mardens of America.

Individuals subjected to these tragic, uncommon circumstances have been through enough both emotionally and financially; they should not be responsible for added legal costs on a clear-cut issue. At a time like this, they should not be expected to realize that they need a lawyer familiar with the intricacies of ERISA.

I have alluded to the fact that not all lawyers are familiar with the available legal remedies to these problems; ERISA is notoriously complex. A bright line should be drawn that—without affecting the ERISA preemption on the whole—allows survivors of this specific sort of crime relief from further

emotional and financial hardship at the hands of the perpetrator. I feel that this bill makes that sort of clear distinction.

A day does not pass that Betty is not on Phyllis's mind. Phyllis understands that this bill will not affect her situation—she is already paying her legal bills. However, she knows that someone else will have to go through the legal process she has been through. This bill will remove an obstacle from their path and get them on their way home.●

By Mr. BAUCUS (for himself, Mr. HARKIN, Mr. DASCHLE, Mr. KERREY, Mr. DURBIN, Mr. JOHNSON, Mr. WELLSTONE, Mr. CONRAD, Mr. ROCKEFELLER, Mr. BRYAN, Mr. REID, Mr. LEAHY, Mr. WYDEN, and Mrs. MURRAY):

S. 1980. A bill to amend the Rural Electrification Act of 1936 to ensure improved access to the signals of local television stations by multichannel video providers to all households which desire such service in unserved and underserved rural areas by December 31, 2006; to the Committee on Agriculture, Nutrition, and Forestry.

21ST CENTURY RURAL UTILITY SERVICE RURAL DEVELOPMENT ENHANCEMENT THROUGH LOCAL INFORMATION ACT

● Mr. BAUCUS. Mr. President, along with Senators HARKIN, DASCHLE, KERREY, DURBIN, JOHNSON, WELLSTONE, CONRAD, ROCKEFELLER, BRYAN, REID, LEAHY, WYDEN, and MURRAY, I am pleased to introduce a bill today on behalf of our country's rural satellite consumers. This is a bill to amend the Rural Electrification Act of 1936, appropriately entitled, "the 21st Century Rural Utility Service Rural Development Enhancement Through Local Information Act."

We all know that modern technology has made it possible to broadcast TV programming directly from satellites. Nationwide, over 11 million households subscribe to satellite TV, and that number increases by over 2 million households a year.

Rural areas have come to depend on the network coverage that satellites provide. In Montana, where over 35 percent of homes depend on satellite broadcasting for their TV reception, this development has been a real boon.

While satellite broadcasting has improved the quality of life for folks in rural America, it hasn't been perfect. Satellite systems haven't been able to carry local broadcast stations. So local viewers haven't always been able to get local broadcasting.

And this is not just a problem for satellite subscribers. It's a problem for the local TV broadcasters and for the fabric of local communities. Local broadcasters play a key role in our communities.

They provide local news, local weather, and public service programs. View-

ers depend on these broadcasts to find out about what's going on in their community. When the school board, PTA, and city council are meeting. Or when there's a parade or a fund-raiser for their church or civic groups.

Local broadcasters are vital to our local economies. They provide jobs, and they allow local businesses to grow through advertising. In short, the importance of local broadcasting is evident in all parts of community life.

And they also provide network programming: NBC, ABC, CBS, and FOX. Nineteen of the twenty TV stations in Montana are affiliated with one of these networks, or with the Public Broadcasting System.

These stations air national news, sports and entertainment at times of the day when people with jobs and kids can watch.

Without these local broadcasts, you might miss the evening network news because it comes on before you get home from work, or because it airs late at night. People want local network coverage because it works in their lives.

Until now, technology has not provided for rebroadcast of local signals by satellites. Many rural residents haven't been able to get decent reception over the air.

Of course, we in the Senate cannot change technology or geography. What we can do is change the law. We can make local into local broadcasting a reality, and we should.

Last spring, we passed H.R. 1554. At the time, we neglected an important responsibility. The language we passed would have required the turn-off of network programming to many rural satellite viewers.

It would have done nothing to help the many local broadcasts in smaller cities and towns. A big oversight.

Following the vote, I wrote a letter to the conference asking that it pay attention to the needs of the many viewers, communities, businesses and stations that had been ignored. Twenty-three of my colleagues, from both sides of the aisle, signed the letter.

As you know, Mr. President, yesterday the House passed the omnibus appropriations bill, and the Senate is slated to take the same vote this evening. Mr. President, I was very disappointed when I learned that the ever important loan guarantee provision was pulled out of the Conference Report on the Satellite bill at the last minute. That is why I'm introducing this bill today, because this loan guarantee will help America's 11 million rural satellite consumers. It's time for us as lawmakers to say "we care about those folks up in 2 Dot that simply want to watch local news." This is our chance to expand rural access so that no matter how large or small your town is, you're going to be able to enjoy the benefits of Satellite TV.

This bill includes a loan guarantee that will make it possible for all local stations to be broadcast on satellite. Not just those in the very largest cities and towns. Without this, the other "local into local" provisions of the Satellite Home Viewer Act are an empty promise to the rural and small town Americans who depend on satellites.

Mr. President, I look forward to holding hearings on this bill during our adjournment and coming back to see a swift resolution to this issue in January. It is time, no, it's overtime, for us to act on this important issue.●

By Mr. KENNEDY:

S. 1981. A bill to amend title XI of the Public Health Service Act to provide for the use of new genetic technologies to meet the health care needs of the public; to the Committee on Health, Education, Labor, and Pensions.

GENETICS AND PUBLIC HEALTH SERVICES ACT

Mr. KENNEDY. Mr. President, advances in biomedical science and technology in this century have given us many tools to improve our understanding of the causes of disease, and to develop better strategies to prevent and treat human illness. The recent explosion of knowledge in genetics offers us the newest and most powerful weapons in the war against disease and suffering.

The legislation I am introducing, the Genetics and Public Health Services Act, will increase the federal, state and local public health resources needed to translate genetic information and technology into strategies to improve public health.

Our national investment in science, and in particular in the National Institutes of Health, is reaping important dividends for the entire country. As a result of the Human Genome Project and other public and private sector research, we soon may have access to the entire human genetic code. From work accomplished so far, scientists have begun to develop a greater understanding of how genes contribute to the development of common diseases, such as cancer, diabetes, hypertension, depression, heart disease and many other illnesses. Genetic information and technology have enormous potential for improving our efforts to promote health and combat disease.

Based on current understanding of genes and human disease, we know that at least 65 percent of Americans have or will have a health problem for which there is a clear genetic contribution. Some have rare, but serious, conditions—such as cystic fibrosis, sickle cell disease or phenylketonuria. Many more have common disorders—asthma, diabetes, cancer, heart disease, stroke and depression—in which genetic predisposition plays an important role.

Genetic information can help us to understand and identify those at risk

for serious diseases and conditions, and help doctors monitor their health in order to diagnose and treat the diseases before they cause irreversible injury or death.

Advancing our understand of genetics will revolutionize the treatment of disease. For example, understanding the genetic factors that contribute to Alzheimer's disease will help us to understand why some patients seem to respond to a new treatment, while others do not. Genetic information may soon be able to predict the types of individuals who have intolerable side effects from certain therapies. Doctors will be able to use genetic information to choose safer and more effective treatments that are tailored to each individual.

Medical scientists are now beginning to think about genetic-based strategies to prevent illness, too. Understanding how genes contribute to the development of disease will give us new ways to intervene before disease develops. We will be able to use new therapies to prevent stroke, heart disease and many other conditions that cause disability and premature death.

We have an unprecedented opportunity to use the expanding knowledge in genetics to improve health care. Scientific discoveries based on genetic information will change the face of health care in the future. But we lack the resources and systems needed today to translate that information into effective steps to diagnose, treat, and ultimately prevented disease.

In order to realize the potential benefits of genetic information and technology, we must invest the resources needed to translate this knowledge into practical approaches to health care. We must do this quickly, to keep pace with the explosion of knowledge coming from public and private sector scientists.

This legislation accomplishes these goals by creating two new grant programs in the Department of Health and Human Services. The first provides grants to states to develop and maintain ways to safely and effectively use genetic information in their state and local public health programs. The second grant program focuses on the translation of new genetic information and technologies to practical public health strategies that can be used in public and private health care.

The grant program for states will support methods to incorporate genetics at every level of state and local public health systems. Each state and territory has a unique population and a unique public health program. This proposal provides states with the support and flexibility to design approaches tailored to their specific needs and existing resources. States may use funds to establish and maintain essential resources, such as information systems, service programs, and

other fundamental elements. States will be required to monitor, evaluate and report on the impact of programs and systems funded by the Act.

Responsible use of genetic information must be based on scientific data. The second grant program created by this legislation addresses the need for ongoing development and evaluation of public health strategies that use genetic information and technology. The bill creates a demonstration program for public and private non-profit organizations to test innovative approaches for using genetic information to improve people's health, and to evaluate the suitability of such approaches for incorporation into state and local public health programs.

Broad input from all parties is a key ingredient for successful and safe use of genetic information to improve public health. Individuals must not be coerced to participate in genetic testing. It is important to involve the public in local, state and federal decisions about how to use genetic information in developing public health policy.

Evidence suggests that many people are afraid to take advantage of available genetic tests because they fear discrimination in the workplace or in the health insurance market. Until we pass legislation to stop such discrimination, those fears are grounded in reality. We know that steps can be taken to protect the confidentiality of genetic information and to better educate the public about the issues surrounding genetic testing. This legislation requires each state to show how it plans to involve the public in the design and implementation of its proposal. The legislation also establishes a federal advisory committee to assist the Secretary of Health and Human Services in the implementation and oversight of programs under this Act.

Public participation is essential. Our system has failed if we offer population-wide testing for predisposition to stroke, but fail to educate individuals who must decide whether to be tested. Our system has failed if we implement population-wide testing for predisposition to breast cancer, but fail to provide access to the care that is needed to reduce the risk of developing disease.

Effective integration of genetics into public health systems must build on current efforts of the private and the public sector, including the work of many federal agencies. These include the achievements of the Human Genome Project at the National Institutes of Health, the Food and Drug Administration's oversight of certain aspects of genetic testing, the ongoing work of the Secretary's Advisory Committee on Genetic Testing, and the contributions of the project on the Ethical Legal and Social Implications of the Human Genome Project at the Department of Energy. Our new Fed-

eral commitment to safe and effective use of new genetic information and technology in the public health system will also draw significantly upon the expertise of the Health Resources and Services Administration. Translating genetic information and technology into practice will benefit as well from the expertise of the Centers for Disease Control and Prevention in disease surveillance and in developing and testing new public health strategies.

This legislation emphasizes the need to educate both health care providers and the general public. It also provides the structure and resources to include genetics in all aspects of public health—from the development of policy to the delivery of services. We must ensure that our entire public health system is ready and able to respond to the challenge of using genetic information for improving health.

The Genetics and Public Health Services Act is supported by leading public health and genetics organizations, including the American Public Health Association, the American College of Medical Genetics, the National Society of Genetic Counselors, and the American Society of Human Genetics. The Alliance of Genetic Support Groups—representing those who live with genetic diseases—has written eloquently about the need to improve the resources dedicated to integrating genetics into public health. I am confident this support will grow in the coming months.

Genetics research has brought us to an era of limitless possibility. The 21st century will be the century of life sciences. I hope my colleagues will join me in this effort to take advantage of this unprecedented opportunity to improve America's health. I ask unanimous consent that a summary of the bill and letters of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE GENETICS AND PUBLIC HEALTH SERVICES ACT

Amends the Public Health Service Act to (1) establish, expand and maintain resources and expertise needed for safe and effective use of genetic information and technology in state and local public health programs and (2) support essential applied research and systems development to translate new and emerging genetic information into practical public health strategies.

BLOCK GRANTS, APPLIED RESEARCH AND DEMONSTRATION PROJECTS

Creates a new federal-state matching block grant program to (1) develop systems that promote access to quality genetic services regardless of race, ethnicity, and ability to pay; (2) establish, maintain, or supervise programs to reduce the mortality and morbidity for heritable disorders in the population of the state; (3) identify and develop a network of experts within state and county health agencies to assess the need for and assure the referral to or provision of quality genetic services; (4) promote understanding among

the public and health care professionals of genetic disorders; and (5) provide a mechanism for public input on state-designed genetic policies and programs.

Establishes new authority to develop and evaluate strategies to use emerging genetic information and technology to improve the public health.

Application requirements and procedures

Block grants: In general, individual states will apply for and receive the block grants; however, two or more states may submit a joint multi-state application.

Applied research/demonstration projects: Eligible entities are states and public or private non-profit organizations, which may partner with other entities in the private sector.

ESTABLISHES AN ADVISORY COMMITTEE

Members include representatives from other appropriate federal agencies, the clinical genetics community, research community, private sector, the public, and state health agencies. The Committee shall (1) assist the Secretary in the implementation of the Act, (2) assist with coordination among participating agencies and (3) maintain involvement of the broader health community in the development and oversight of related Public Health and Genetics programs.

AUTHORIZATION AND ALLOCATIONS

Authorizes \$100,000,000 for each of fiscal years 2000 through 2009. Seventy percent is dedicated to state block grant programs, evaluation activities and the Advisory Committee. Thirty percent of the total allocation is set-aside for funding demonstration projects. States are eligible for a minimum of up to \$400,000 annually from the block grant; allocations in excess of \$400,000 are determined by a formula based upon population. Funds may be expended for two fiscal years after initial award; unspent funds may be reallocated. States must provide \$2 for every \$3 federal dollars.

REPORTS

States report annually to HHS on the activities supported by the block grant. HRSA and CDC submit an annual report to the Advisory Committee on activities supported by the Act; this report is transmitted by the Advisory Committee with comments to the Secretary and to Congress.

AMERICAN PUBLIC HEALTH ASSOCIATION,

Washington, DC, November 9, 1999.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, DC.

DEAR SENATOR KENNEDY: The American Public Health Association (APHA), representing over 50,000 public health professionals dedicated to advancing the nation's health is pleased with your introduction of the Genetics and Public Health Services Act.

This legislation would amend the Public Health Service Act to expand public health resources needed to translate genetic information and technology into practical strategies to improve the public health. APHA strongly supports the safe and effective integration of genetic information and technology into public health practice.

Specifically, the legislation would provide funding to states to develop and maintain resources needed to use genetic information and technology at all levels of public health systems. The bill would support the development of expertise within state and county health agencies to evaluate the potential impact of public health strategies based on genetic information, to assess the need for genetic services, to provide expert input for

policy development, and to assure appropriate referral to or provision of quality genetic services regardless of race, ethnicity or ability to pay.

APHA looks forward to working with you in moving this important legislation forward. Thank you again for your leadership on this important public health matter.

Sincerely,

MOHAMMAD N. AKHER,
Executive Director.

ALLIANCE OF GENETIC SUPPORT GROUPS,
Washington, DC, November 10, 1999.

Senator EDWARD KENNEDY,
U.S. Senate,
Washington DC.

DEAR SENATOR KENNEDY: On behalf of the members of the Alliance of Genetic Support Groups, I am writing to express our strong interest in increasing resources for the necessary expansion of genetic services within state, federal and local public health systems.

The Alliance of Genetic Support Groups is a national coalition of individuals, families and professionals working together to enhance the lives of everyone with genetic conditions. The Alliance mission is to bring the "people perspective" to the forefront of discussions about access to quality healthcare, privacy, discrimination and research. Representing 280 support groups of individuals and families with genetic conditions and professional organizations, the Alliance acts on behalf of over three million individuals and families.

We know, through our membership network and callers to our Genetics Helpline, that resources are desperately needed to address the disparities across the state and federal public health systems.

We want to emphasize that genetics, from a public health perspective, is much more than simply genetic testing. Vastly increased resources are needed to prepare public health systems to deliver comprehensive and quality genetic services. We need to train public health professionals, educate the public, create family-centered public policies and develop a comprehensive care system that links people to all the services they need—before, after and as a result of genetic testing.

We applaud your commitment to address these concerns, as well as others close to our members' hearts, about genetic discrimination, privacy and access to quality health care. The Alliance of Genetic Support Groups deeply appreciates all that you have done and are continuing to do to ensure the translation of genetic knowledge into improved public health.

Sincerely,

MARY E. DAVIDSON,
Executive Director.

AMERICAN COLLEGE
OF MEDICAL GENETICS
Bethesda, MD, November 10, 1999.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, DC.

DEAR SENATOR KENNEDY: As President of the American College of Medical Genetics (ACMG), I am writing to express our deep appreciation and support for your efforts to address the need for more extensive resources and services for public health genetics at the state and federal levels.

The ACMG is a professional organization representing board-certified clinical and laboratory geneticists. We are the newest specialty to be recognized by the American

Board of Medical Specialties, and we have full representation in the House of Delegates of the American Medical Association.

As I recently testified before the Secretary's Advisory Committee on Genetic Testing, knowledge of genetics has expanded rapidly thanks to the enormous international investment in the Human Genome Project. However, little attention has been paid to the crucial issue of integrating it into health care delivery. Medical geneticists are uniquely aware of the need for a thoughtful and organized approach to the translation of achievements in research so that all physicians can more effectively address the problems of individuals who suffer from or have a predisposition toward diseases caused by genetic defects. It is increasingly clear that virtually every common (or rare) disease has a genetic component, thereby making every American citizen a potential beneficiary of medical genetic services. Thus the tools to prevent and to effectively treat diabetes, cancer, hypertension, heart disease, Alzheimer's, asthma, and so many others, will depend not only on knowledge and technology, but also on a systematic integration of these into our health care system at all levels.

The bill you have introduced (Genetic and Public Health Services Act) provides the resources and organization that can unite the expertise of geneticists and public health officials and help us enter the next century with tools to dramatically improve the public health.

Sincerely,

R. RODNEY HOWELL,
President.

NATIONAL SOCIETY OF
GENETIC COUNSELORS, INC.,
Wallingford, PA, November 16, 1999.

Senator EDWARD M. KENNEDY,
U.S. Senate,
Washington, DC.

DEAR SENATOR KENNEDY: The National Society of Genetic Counselors (NSGC) is pleased to write this letter of support for a bill you are introducing to establish "The Genetics and Public Health Services Act."

The National Society of Genetic Counselors is the leading voice, authority and advocate for the genetic counseling profession and represents over 1700 genetic counselors. Genetic counselors are master's degree level trained healthcare professionals. We work with patients to help them understand the genetics of their condition and implications for other family members, coordinate evaluations, testing and care and link patients with supportive resources. In our work with patients, we translate complex genetic information into understandable terms and promote autonomous decision-making about their healthcare. Additional information about the NSGC can be found on our website (<http://www.nsgc.org>).

Advances are rapidly being made on the identification of gene mutations that cause diseases and genetic conditions. The Human Genome Project, which was initiated in 1990, is mapping the location of all genes. The wealth of genetic information generated by the Human Genome Project will require wide dissemination. Strategies must be developed to translate this genetic information into quality healthcare. Clearly, there is a great need for the development of programs that will ensure that patients are appropriately referred and have access to quality genetic services regardless of race, ethnicity and ability to pay. It will also be important to develop programs that will ease the physical

burden associated with genetic conditions and improve treatment.

We would like to express our appreciation for your past efforts on healthcare issues, particularly your efforts with the Kennedy-Kassebaum bill to address the risk of genetic discrimination. With the introduction of "The Genetics and Public Health Services Act," you demonstrate foresight in anticipating the greater need for genetic services, once again showing your commitment to quality healthcare for all of us.

Sincerely,

WENDY R. UHLMANN,
President.

THE AMERICAN SOCIETY
OF HUMAN GENETICS,
Bethesda, MD, November 10, 1999.

Hon. EDWARD M. KENNEDY,
U.S. Senate, Washington, DC.

DEAR SENATOR KENNEDY: As President of the American Society of Human Genetics (ASHG), I am writing to express our deep appreciation and support for your efforts to address the need for more extensive resources and services for public health genetics at the state and local levels.

The ASHG is a professional organization representing a wide spectrum of human genetics professionals including clinical and laboratory geneticists, genetic counselors, nurses and others interested in the many phases of human genetics studies.

As was recently stated before the Secretary's Advisory Committee on Genetic Testing, knowledge of genetics has expanded rapidly thanks to the enormous international investment in the Human Genome Project. However, little attention has been paid to the crucial issue of integrating this knowledge into health care delivery. Medical geneticists are uniquely aware of the need for a thoughtful and organized approach to the translation of achievements in research, so that all physicians can more effectively address the problems of individuals who suffer from or have a predisposition to diseases caused by genetic defects. It is increasingly clear that genetic factors are important for virtually every common condition that affects large segments of the population. Thus, the capability to prevent and effectively treat diabetes, cancer, hypertension, heart disease, Alzheimer's, asthma, and many others, will depend not only on expanding knowledge and technology, but also on a systematic integration of these advances into our health care system at all levels.

The bill you have introduced (Genetic and Public Health Services Act) provides the resources and organization that can unite the expertise of geneticists and public health officials and provide the means to dramatically improve the health of the people by the provision of quality genetic services.

Sincerely,

UTA FRANCKE,
President.

By Mrs. MURRAY (for herself,
Mr. CRAIG, Mr. SMITH of Oregon,
Mrs. BOXER, and Mrs.
FEINSTEIN):

S. 1983, a bill to amend the Agricultural Trade Act of 1978 to increase the amount of funds available for certain agricultural trade programs; to the Committee on Agriculture, Nutrition, and Forestry.

THE AGRICULTURAL MARKET ACCESS AND
DEVELOPMENT ACT

Mrs. MURRAY. Mr. President, I rise today with Senators CRAIG, SMITH of

Oregon, BOXER, and FEINSTEIN to introduce the Agricultural Market Access and Development Act.

Mr. President, farmers and ranchers in our nation are hurting. Rural communities in my home state of Washington have been severely impacted by the current crisis in agriculture. The causes are complex and diverse, and have been discussed at great length on the floor of the United States Senate. Low prices, the loss of markets in Asia, foreign trade barriers, dumping, and industry concentration are just a few of the difficulties farmers and ranchers, the Administration, and Members of Congress are struggling to overcome.

I am pleased Congress acted to provide emergency assistance as part of the fiscal year 2000 agriculture appropriations act. However, while this package was desperately needed, it left our many so-called "minor crop" producers across the country. It failed to reform our nation's policy on unilateral sanctions. And it didn't compel us to dedicate time to really resolve long-term issues that will put American agriculture on a more solid foundation. One long-term issue that deserves attention is federal support for market access and development.

Today, I am introducing the Agricultural Market Access and Development Act to ensure our producers have the resources they need to expand their overseas markets. My bill would authorize the Secretary of Agriculture to spend up to \$200 million—but not less than the current \$90 million—for the Market Access Program. And it would set a floor of \$35 million for spending on the foreign Market Development "Cooperator" Program.

While many Members of Congress and producers have advocated increased funding for MAP and the Cooperator Program, these efforts have been complicated by our work to balance the budget and meet other important national commitments. At the same time, the agricultural community is frustrated over the use—or lack of use—of the Export Enhancement Program.

Debate will continue on the merits of using the Export Enhancement Program. Nevertheless, I believe we cannot afford to continue wasting the precious dollars we target toward agricultural trade. That is exactly what is happening now: hundreds of millions of dollars in the Export Enhancement Program remain unspent and unused while foreign governments heavily subsidize and protect their agricultural economies to the detriment of American producers.

My bill seeks to recover some of our lost trade resources and convert them into new opportunities for our farmers and ranchers. My bill would give the Secretary of Agriculture the authority to direct a percentage of unspent Export Enhancement Program dollars to

market access and development programs within the Commodity Credit Corporation. If less than 20 percent of funds authorized for the Export Enhancement Program are spent by July 1 of a given fiscal year, the Secretary could direct up to 50 percent of unspent EEP funds to other programs. If less than 50 percent—but more than 20 percent—of funds authorized for EEP are spent by July 1 of a given fiscal year, the Secretary could direct up to 20 percent of unspent EEP funds to other programs.

Mr. President, I am introducing this legislation today to advance the discussion on using all of our trade resources. The numbers included in my bill will be subject to further discussion and I welcome it. However, I believe this legislation represents a serious effort to use our scarce resources wisely.

Our current trade negotiations on agriculture show that we must be willing and able to use federal resources to promote trade. If we do not, our negotiations and our producers cannot succeed.

As we head into the Seattle Round of the World Trade Organization this fall, we need to commit ourselves to promoting trade and expanding market access. Without this commitment, we will lose opportunities to market our products overseas. Without this commitment, the changes we made to our farm policy in 1996 will not have a chance in the world of succeeding.

As I said before, Mr. President, agricultural producers in my state of Washington are hurting. My state is home to more than 200 "minor" crops. Washington state is known for its productive apple industry. Unfortunately, that industry is in the midst of a terrible economic crisis. The loss of markets in Asia, non-frozen apple juice concentrate dumping by China, oversupply, poor weather conditions in 1998, and generally low prices are driving hundreds of family farms out of business.

This Congress needs to do a better job of addressing the plight of all commodity producers, not just those who grow major commodities. My legislation is a step in the right direction. It seeks to increase funding for the Market Access Program, which is popular among fruit and vegetable growers. In fact, it is one of the few federal programs that benefit fruit and vegetable producers. Since this Congress has shown its reluctance to target meaningful federal aid to minor crop producers, the least we can do is strengthen the voluntary programs that work for these producers. If we do not, we will be failing to promote economic stability in many rural communities.

However, my bill is not just intended to help fruit and vegetable producers. It also encourages transferring unused trade dollars to the Foreign Market

Development Program, which is used by program commodities. Both MAP and FMD represent the kind of federal-industry partnerships we should be encouraging at a time of limited government resources.

Mr. President, let me briefly address one criticism of the Market Access Program: the issue of whether it is primarily a program that benefits large corporations. Congress reformed MAP—known before the 1996 farm bill as the Market Promotion Program—in 1996 to ensure that large corporations with no connections to producers could not access MAP funds. I strongly supported that change.

The new law did allow for the program's continued use by farmers' cooperatives, some of which are major industry players. However, it is clear to me, and to others who follow the farm economy, that encouraging the development of farmers' cooperatives is one of the few bright spots in our efforts to keep family farms on the land. Therefore, while opponents will continue to point to a few examples of entities they believe in no way should be involved in the program, I believe my colleagues should keep the broader picture in mind. MAP deserves our support.

Next year, Congress should address long-term agricultural issues. And one of those issues should be the transfer of unused Export Enhancement Program funds to market access and development programs. I urge my colleagues to join me in this effort.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1983

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Agricultural Market Access and Development Act of 1999".

SEC. 2. MARKET ACCESS PROGRAM.

Section 211(c)(1) of the Agricultural Trade Act of 1978 (7 U.S.C. 5641(c)(1)) is amended by striking "and not more than \$90,000,000 for each of fiscal years 1996 through 2002," and inserting "not more than \$90,000,000 for each of fiscal years 1996 through 1999, and not less than \$90,000,000 nor more than \$200,000,000 for each of fiscal years 2000 through 2002."

SEC. 3. USE OF EXPORT ENHANCEMENT PROGRAM FUNDS FOR MARKET ACCESS OR DEVELOPMENT PROGRAMS.

Section 301(e) of the Agricultural Trade Act of 1978 (7 U.S.C. 5651) is amended by adding at the end the following:

"(3) USE OF EXPORT ENHANCEMENT PROGRAM FUNDS FOR MARKET ACCESS OR DEVELOPMENT PROGRAMS.—

"(A) LESS THAN 20 PERCENT USE.—If on July 1 of a fiscal year less than 20 percent of the maximum amount of funds authorized to carry out the program established under this section have been expended during that fiscal year to carry out the program established under this section, the Commodity

Credit Corporation may use not more than 50 percent of the unexpended amount to carry out market access and development programs of the Commodity Credit Corporation during that fiscal year.

"(B) LESS THAN 50 PERCENT USE.—If on July 1 of a fiscal year less than 50 percent, but more than 20 percent, of the maximum amount of funds authorized to carry out the program established under this section have been expended during that fiscal year to carry out the program established under this section, the Commodity Credit Corporation may use not more than 20 percent of the unexpended amount to carry out market access and development programs of the Commodity Credit Corporation during that fiscal year."

SEC. 4. FOREIGN MARKET DEVELOPMENT COOPERATOR PROGRAM.

Section 703 of the Agricultural Trade Act of 1978 (7 U.S.C. 5723) is amended to read as follows:

"SEC. 703. FUNDING.

"The Secretary shall use to carry out this title for each of fiscal years 2000 through 2002 not less than \$35,000,000 of the funds of the Commodity Credit Corporation."

• Mr. SMITH of Oregon. Mr. President, I rise before the Senate today to express my support for legislation, introduced by Senator MURRAY and others, that would allow the U.S. Department of Agriculture to allocate to the Market Access Program unused Export Enhancement Program funds.

I have long been a supporter of the Market Access Program, which was designed to promote American agricultural products in foreign markets. Since its inception, it has proven to be a model program and has successfully fostered the growth of American agriculture producers through the expansion of exports. For smaller states like Oregon, the Market Access Program has played a critical role in getting the word out on an array of agricultural goods that otherwise have difficulty penetrating overseas markets. Many Oregon commodities, such as grass seed, tree fruits, and potatoes have benefitted greatly in recent years from the Market Access Program funding. For example, last year the Market Access Program enabled a delegation of Oregon grass seed growers to travel to China to meet with government officials interested in finding quality grass seed to stabilize river banks near the Three Gorges Dam project on the Yangtze River. There are numerous other examples where Oregon commodities have been able to make good use of these federal dollars.

Despite the achievements of the Market Access Program in recent years, funding for the program has been capped at \$90 million. I am pleased today to cosponsor this bill which authorizes the Secretary of Agriculture to increase the Market Access Program funding up to a total of \$200 million using unapportioned Export Enhancement Program funds.

This proposal has widespread support in my state from farmers and the agricultural groups that represent them.

they recognize, as I do, that expanding markets overseas will be key to restoring the farm economy.

Mr. President, I am hopeful that the Senate will take up this issue early in the next session. I urge my colleagues to join in support of this legislation to enhance American agricultural export efforts and the family farms that depend upon them. •

By Mr. TORRICELLI:

S. 1985. A bill to amend the Internal Revenue Code of 1986 to lower the adjusted gross income threshold for deductible disaster casualty losses to 5 percent, to make such deduction an above-the-line deduction, and to allow an election to take such deduction for the preceding or succeeding year; to the Committee on Finance.

• Mr. TORRICELLI. Mr. President, I rise today to introduce the Disaster Victims Tax Relief Act. This legislation will help mitigate the losses that hundreds of thousands of Americans incur each year as a result of natural disasters, and helps clear the path towards full recovery.

My home state of New Jersey is not known as a place which suffers tropical storms or hurricanes with great frequency. However, this past September, many of my constituent witnessed nature's fury first hand. Hurricane Floyd, one of the largest storms in recent history, battered much of New Jersey, along with the several other Eastern states, with winds in excess of 140 miles per hour and flash downpours which caused extensive flooding. To date, the flooding caused by this disaster has inflicted more than \$500 million in damages in New Jersey alone, and it is estimated that this figure may exceed more than \$1 billion when the final costs are calculated. In terms of economic damages, New Jersey was the second most heavily damaged state as a result of Floyd.

Natural disasters, such as the one we recently witnessed, too often cause people to lose their homes and the businesses that were made successful through a lifetime of hard work. This pain is exacerbated by the fact that they are still required to meet a heavy tax burden for that year. It is unreasonable to expect these unfortunate Americans to meet their full tax responsibilities after suffering a cataclysmic disaster such as a hurricane such as a hurricane or flood. While our current tax code includes a provision that addresses this situation, qualification requirements ensure that the overwhelming majority of victims cannot utilize the provision to their benefit.

Under current law, an individual may deduct uninsured damages or "casualty losses" incurred from a natural disaster so long as those losses exceed 10 percent of their adjusted gross income (AGI). Unfortunately, many victims of

disasters have found that this threshold is too high for them to qualify. Compounding this situation is the fact that only the small percentage of taxpayers who itemize their deductions are effectively eligible to claim their disaster losses as a deduction. This is troubling because 75 percent of taxpayers who do not itemize, comprised mostly of lower and middle class families who need this benefit most, cannot participate.

The bill I introduce today is straight forward. First it would reduce the current AGI threshold from 10 percent to 5 percent. Second, it would make the deductions available an "above the line" deduction. These two provisions would enable the majority of American taxpayers, who do not itemize their returns, to benefit. Third, my bill would institute a 2-year "carry back or forward" provision which would allow people who incur casualty losses to claim the deductions on either the previous year's return, or they can defer and claim the losses either the following year or the year after. Finally this bill is narrowly tailored to provide relief to those people who need it most; those who live in a federally declared disaster area. This will help avoid abuse of the provision.

Mr. President, people who have emerged from earthquakes, tornadoes, hurricanes and floods are confronted with the daunting task of rebuilding their lives in the face of overwhelming economic loss and the emotional trauma of losing everything they own. Their tax burden should not be one of the obstacles that they must overcome in order to embark on the road to recovery. This bill will help ensure that this is not the case. I would urge my colleagues in the Senate to fully support this legislation.●

By Mr. DASCHLE (for himself, Mr. HATCH, Mr. BROWNBACK, Mr. HARKIN, Mr. JOHNSON, Mr. DORGAN, Mr. BAUCUS, Mr. CONRAD, Mr. BINGAMAN, Mr. VOINOVICH, and Mr. BURNS):

S. 1988. A bill to reform the State inspection of meat and poultry in the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

NEW MARKETS FOR STATE-INSPECTED MEAT ACT
OF 1999

Mr. DASCHLE. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1988

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "New Markets for State-Inspected Meat Act of 1999".

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Review of State meat and poultry inspection programs.

TITLE I—MEAT INSPECTION

Sec. 101. Federal and State cooperation on meat inspection for intrastate distribution.

Sec. 102. State meat inspection programs.

TITLE II—POULTRY INSPECTION

Sec. 201. Federal and State cooperation on poultry inspection for intrastate distribution.

Sec. 202. State poultry inspection programs.

TITLE III—GENERAL PROVISIONS

Sec. 301. Regulations.

Sec. 302. Termination of authority to establish interstate inspection programs.

SEC. 2. REVIEW OF STATE MEAT AND POULTRY INSPECTION PROGRAMS.

(a) IN GENERAL.—Not later than September 30, 2001, the Secretary of Agriculture shall conduct a comprehensive review of each State meat and poultry inspection program, which shall include—

(1) a determination of the effectiveness of the State program; and

(2) identification of changes that are necessary to enable future transition to a State program of enforcing Federal inspection requirements as described in the amendments made by sections 102 and 202.

(b) COMMENT FROM INTERESTED PARTIES.—In designing the review described in subsection (a), the Secretary of Agriculture shall, to the maximum extent practicable, obtain comment from interested parties.

(c) FUNDING.—

(1) IN GENERAL.—There are authorized to be appropriated such sums as are necessary to carry out this section.

(2) AVAILABLE FUNDS.—Notwithstanding any other provision of law, only funds specifically appropriated under paragraph (1) may be used to carry out this section.

TITLE I—MEAT INSPECTION

SEC. 101. FEDERAL AND STATE COOPERATION ON MEAT INSPECTION FOR INTRASTATE DISTRIBUTION.

(a) REDESIGNATION.—

(1) IN GENERAL.—The Federal Meat Inspection Act is amended—

(A) by redesignating title III (21 U.S.C. 661 et seq.) as title V and moving that title to the end of that Act;

(B) by redesignating section 301 (21 U.S.C. 661) as section 501;

(C) in title V (as redesignated by subparagraph (A)), by striking the title heading and inserting the following:

"TITLE V—FEDERAL AND STATE COOPERATION ON MEAT INSPECTION FOR INTRASTATE DISTRIBUTION";

and

(D) in the fourth sentence of section 501(c)(1) (as redesignated by subparagraph (B)), by striking "section 301 of the Act" and inserting "subsection (a)(4)".

(2) CONFORMING AMENDMENTS.—

(A) Section 7(c) of the Federal Meat Inspection Act (21 U.S.C. 607(c)) is amended in the second sentence by striking "section 301 of this Act" and inserting "section 501(a)(4)".

(B) Section 24 of the Federal Meat Inspection Act (21 U.S.C. 624) is amended in the last sentence by striking "section 301 of this Act" and inserting "section 501(a)(4)".

(C) Section 205 of the Federal Meat Inspection Act (21 U.S.C. 645) is amended by striking "section 301 of this Act" and inserting "section 501(a)(4)".

(3) EFFECTIVE DATE.—This subsection takes effect on October 1, 2001.

(b) REPEAL.—

(1) IN GENERAL.—Title V of the Federal Meat Inspection Act (as amended by subsection (a)(1)) is repealed.

(2) CONFORMING AMENDMENTS.—

(A) Section 7(c) of the Federal Meat Inspection Act (21 U.S.C. 607(c)) (as amended by subsection (a)(2)(A)) is amended in the second sentence by striking "section 501(a)(4)" and inserting "section 413".

(B) Section 24 of the Federal Meat Inspection Act (21 U.S.C. 624) (as amended by subsection (a)(2)(B)) is amended in the last sentence by striking "section 501(a)(4)" and inserting "section 413".

(C) Section 205 of the Federal Meat Inspection Act (21 U.S.C. 645) (as amended by subsection (a)(2)(C)) is amended by striking "section 501(a)(4)" and inserting "section 413".

(3) EFFECTIVE DATE.—Except as provided in section 302, this subsection takes effect on October 1, 2002.

SEC. 102. STATE MEAT INSPECTION PROGRAMS.

(a) IN GENERAL.—The Federal Meat Inspection Act (as amended by section 101(a)(1)(A)) is amended by inserting after title II (21 U.S.C. 641 et seq.) the following:

"TITLE III—STATE MEAT INSPECTION PROGRAMS

"SEC. 301. POLICY AND FINDINGS.

"(a) POLICY.—It is the policy of Congress to protect the public from meat and meat food products that are adulterated or misbranded and to assist in efforts by State and other government agencies to accomplish that policy.

"(b) FINDINGS.—Congress finds that—

"(1) the goal of a safe and wholesome supply of meat and meat food products throughout the United States would be better served if a consistent set of requirements, established by the Federal Government, were applied to all meat and meat food products, whether produced under State inspection or Federal inspection;

"(2) under such a system, State and Federal meat inspection programs would function together to create a seamless inspection system to ensure food safety and inspire consumer confidence in the food supply in interstate commerce; and

"(3) such a system would ensure the viability of State meat inspection programs, which should help to foster the viability of small establishments.

"SEC. 302. APPROVAL OF STATE MEAT INSPECTION PROGRAMS.

"(a) IN GENERAL.—Notwithstanding any other provision of this Act, the Secretary may approve a State meat inspection program and allow the shipment in commerce of carcasses, parts of carcasses, meat, and meat food products inspected under the State meat inspection program in accordance with this title.

"(b) ELIGIBILITY.—

"(1) IN GENERAL.—To receive or maintain approval from the Secretary for a State meat inspection program in accordance with subsection (a), a State shall—

"(A) implement a State meat inspection program that enforces the mandatory ante-mortem and postmortem inspection, reinspection, sanitation, and related Federal requirements of titles I, II, and IV (including the regulations issued under those titles); and

"(B) enter into a cooperative agreement with the Secretary in accordance with subsection (c).

“(2) ADDITIONAL REQUIREMENTS.—

“(A) IN GENERAL.—In addition to the requirements specified in paragraph (1), a State meat inspection program reviewed in accordance with section 2 of the Federal Meat and Poultry State Inspection Requirements Act of 1999 shall implement, not later than October 1, 2002, all recommendations from the review, in a manner approved by the Secretary.

“(B) REVIEW OF NEW STATE MEAT INSPECTION PROGRAMS.—

“(i) DEFINITION OF NEW STATE MEAT INSPECTION PROGRAM.—In this subparagraph, the term ‘new State meat inspection program’ means a State meat inspection program that is not approved in accordance with subsection (a) between October 1, 2001, and September 30, 2002.

“(ii) REVIEW REQUIREMENT.—Not later than 1 year after the date on which the Secretary approves a new State meat inspection program, the Secretary shall conduct a comprehensive review of the new State meat inspection program, which shall include—

“(I) a determination of the effectiveness of the new State meat inspection program; and

“(II) identification of changes necessary to ensure enforcement of Federal inspection requirements.

“(iii) IMPLEMENTATION REQUIREMENTS.—In addition to the requirements specified in paragraph (1), to continue to be an approved State meat inspection program, a new State meat inspection program shall implement all recommendations from the review conducted in accordance with this subparagraph, in a manner approved by the Secretary.

“(C) COOPERATIVE AGREEMENT.—Notwithstanding chapter 63 of title 31, United States Code, the Secretary may enter into a cooperative agreement with a State that establishes the terms governing the relationship between the Secretary and the State meat inspection program and provides for the following:

“(1) PROVISIONS CONSISTENT WITH THIS ACT.—The State will adopt (including adoption by reference) provisions identical to titles I, II, and IV (including the regulations issued under those titles).

“(2) MARKING OF PRODUCT.—

“(A) OFFICIAL MARKS.—State-inspected and passed meat and meat food products will be marked under the supervision of a State inspector with the official mark and be deemed to have been inspected by the Secretary for the purposes of this Act and to have passed the inspection.

“(B) ADDITIONAL MARKS.—In addition to the official mark, State-inspected and passed meat and meat food products may be marked with the mark of State inspection, in accordance with requirements issued by the Secretary.

“(3) LABELING REQUIREMENTS.—The State will comply with all labeling requirements issued by the Secretary governing meat and meat food products inspected under the State meat inspection program.

“(4) AUTHORITY OF THE SECRETARY.—The Secretary shall have authority—

“(A) to detain and seize livestock, carcasses, parts of carcasses, meat, and meat food products under the State meat inspection program;

“(B) to obtain access to facilities, records, livestock, carcasses, parts of carcasses, meat, and meat food products of any person, firm, or corporation that slaughters, processes, handles, stores, transports, or sells meat or meat food products inspected under the State meat inspection program to determine compliance with this Act (including the regulations issued under this Act); and

“(C) to direct the State to conduct any activity authorized to be conducted by the Secretary under this Act (including the regulations issued under this Act).

“(5) OTHER TERMS.—The cooperative agreement shall include such other terms as the Secretary determines to be necessary to ensure that the actions of the State and the State meat inspection program are consistent with this Act (including the regulations issued under this Act).

“(d) ADDITIONAL REQUIREMENTS.—

“(1) IN GENERAL.—A State may impose additional requirements on establishments under the State meat inspection program, as approved by the Secretary.

“(2) RESTRICTION ON ESTABLISHMENT SIZE.—The Secretary shall authorize a State to establish the maximum size of establishments that the State will accept into the State meat inspection program.

“(e) REIMBURSEMENT OF STATE COSTS.—The Secretary may reimburse the State for not more than 60 percent of the State's costs of meeting the Federal requirements for the State meat inspection program.

“(f) SAMPLING.—

“(1) SALMONELLA SAMPLING AND TESTING.—To the extent that the Secretary requires establishments to meet microbiological performance standards for Salmonella, the Secretary shall sample and test for Salmonella in establishments subject to inspection under the State meat inspection program.

“(2) OTHER SAMPLING AND TESTING.—In addition to the activities described in paragraph (1), the Secretary may perform other sampling and testing of meat and meat food products in establishments described in that paragraph.

“(g) NONCOMPLIANCE.—If the Secretary determines that a State meat inspection program does not comply with this title or the cooperative agreement under subsection (c), the Secretary shall take such action as the Secretary determines to be necessary to ensure that the carcasses, parts of carcasses, meat, and meat food products in the State are inspected in a manner that effectuates this Act (including the regulations issued under this Act).

“SEC. 303. AUTHORITY TO TAKE OVER STATE MEAT INSPECTION PROGRAMS.

“(a) NOTIFICATION.—If the Secretary has reason to believe that a State is not in compliance with this Act (including the regulations issued under this Act) or the cooperative agreement under section 302(c) and is considering the revocation or temporary suspension of the approval of the State meat inspection program, the Secretary shall promptly notify and consult with the Governor of the State.

“(b) SUSPENSION AND REVOCATION.—

“(1) IN GENERAL.—The Secretary may revoke or temporarily suspend the approval of a State meat inspection program and take over a State meat inspection program if the Secretary determines that the State meat inspection program is not in compliance with this Act (including the regulations issued under this Act) or the cooperative agreement.

“(2) PROCEDURES FOR REINSTATEMENT.—A State meat inspection program that has been the subject of a revocation may be reinstated as an approved State meat inspection program under this Act only in accordance with the procedures under section 302(b)(2)(B).

“(c) PUBLICATION.—If the Secretary revokes or temporarily suspends the approval of a State meat inspection program in accordance with subsection (b), the Secretary shall publish the determination under that subsection in the Federal Register.

“(d) INSPECTION OF ESTABLISHMENTS.—Upon the expiration of 30 days after the date of publication of a determination under subsection (c), an establishment subject to a State meat inspection program with respect to which the Secretary makes a determination under subsection (b) shall be inspected by the Secretary.

“SEC. 304. EXPEDITED AUTHORITY TO TAKE OVER INSPECTION OF STATE-INSPECTED ESTABLISHMENTS.

“Notwithstanding any other provision of this title, if the Secretary determines that an establishment operating under a State meat inspection program is not operating in accordance with this Act (including the regulations issued under this Act) or the cooperative agreement under section 302(c), and the State, after notification by the Secretary to the Governor, has not taken appropriate action within a reasonable time as determined by the Secretary, the Secretary may immediately determine that the establishment is an establishment that shall be inspected by the Secretary, until such time as the Secretary determines that the State will meet the requirements of this Act (including the regulations) and the cooperative agreement with respect to the establishment.

“SEC. 305. ANNUAL REVIEW.

“(a) IN GENERAL.—The Secretary shall develop and implement a process to review annually each State meat inspection program approved under this title and to certify the State meat inspection programs that comply with the cooperative agreement entered into with the State under section 302(c).

“(b) COMMENT FROM INTERESTED PARTIES.—In designing the review process described in subsection (a), the Secretary shall solicit comment from interested parties.

“SEC. 306. FEDERAL INSPECTION OPTION.

“(a) IN GENERAL.—An establishment that operates in a State with an approved State meat inspection program may apply for inspection under the State meat inspection program or for Federal inspection.

“(b) LIMITATION.—An establishment shall not make an application under subsection (a) more than once every 4 years.”

(b) RESTAURANTS AND RETAIL STORES.—Title IV of the Federal Meat Inspection Act is amended—

(1) by redesignating section 411 (21 U.S.C. 681) as section 414; and

(2) by inserting after section 410 (21 U.S.C. 680) the following:

“SEC. 411. RESTAURANTS AND RETAIL STORES.

“(a) LIMITATION ON APPLICABILITY OF INSPECTION REQUIREMENTS.—The provisions of this Act requiring inspection of the slaughter of animals and the preparation of carcasses, parts of carcasses, meat, and meat food products shall not apply to operations of types traditionally and usually conducted at retail stores and restaurants, if the operations are conducted at a retail store, restaurant, or similar retail establishment for sale of such prepared articles in normal retail quantities or for service of the articles to consumers at such an establishment.

“(b) CENTRAL KITCHEN FACILITIES.—

“(1) IN GENERAL.—For the purposes of this section, operations conducted at a central kitchen facility of a restaurant shall be considered to be conducted at a restaurant if the central kitchen of the restaurant prepares meat or meat food products that are ready to eat when they leave the facility and are served in meals or as entrees only to customers at restaurants owned or operated by the same person, firm, or corporation that owns or operates the facility.

“(2) EXCEPTION.—A facility described in paragraph (1) shall be subject to section 202

and may be subject to the inspection requirements of title I for as long as the Secretary determines to be necessary, if the Secretary determines that the sanitary conditions or practices of the facility or the processing procedures or methods at the facility are such that any of the meat or meat food products of the facility are rendered adulterated.

"SEC. 412. ACCEPTANCE OF INTERSTATE SHIPMENTS OF MEAT AND MEAT FOOD PRODUCTS.

"Notwithstanding any provision of State law, a State or local government shall not prohibit or restrict the movement or sale of meat or meat food products that have been inspected and passed in accordance with this Act for interstate commerce.

"SEC. 413. ADVISORY COMMITTEES FOR FEDERAL AND STATE PROGRAMS.

"The Secretary may appoint advisory committees consisting of such representatives of appropriate State agencies as the Secretary and the State agencies may designate to consult with the Secretary concerning State and Federal programs with respect to meat inspection and other matters within the scope of this Act."

(c) **EFFECTIVE DATE.**—This section takes effect on October 1, 2001.

TITLE II—POULTRY INSPECTION

SEC. 201. FEDERAL AND STATE COOPERATION ON POULTRY INSPECTION FOR INTRASTATE DISTRIBUTION.

(a) **REDESIGNATION.**—

(1) **IN GENERAL.**—Section 5 of the Poultry Products Inspection Act (21 U.S.C. 454) is redesignated as section 34 and moved to the end of that Act.

(2) **INTRASTATE PROGRAM.**—Section 34 of the Poultry Products Inspection Act (as redesignated by paragraph (1)) is amended by striking the section heading and inserting the following:

"SEC. 34. FEDERAL AND STATE COOPERATION ON POULTRY INSPECTION FOR INTRASTATE DISTRIBUTION."

(3) **CONFORMING AMENDMENTS.**—

(A) Section 8(b) of the Poultry Products Inspection Act (21 U.S.C. 457(b)) is amended in the second sentence by striking "section 5 of this Act" and inserting "section 34(a)(4)".

(B) Section 11(e) of the Poultry Products Inspection Act (21 U.S.C. 460(e)) is amended by striking "section 5 of this Act" and inserting "section 34(a)(4)".

(4) **EFFECTIVE DATE.**—This subsection takes effect on October 1, 2001.

(b) **REPEAL.**—

(1) **IN GENERAL.**—Section 34 of the Poultry Products Inspection Act (as redesignated by subsection (a)(1)) is repealed.

(2) **CONFORMING AMENDMENTS.**—

(A) Section 8(b) of the Poultry Products Inspection Act (21 U.S.C. 457(b)) (as amended by subsection (a)(3)(A)) is amended in the second sentence by striking "section 34(a)(4)" and inserting "section 33".

(B) Section 11(e) of the Poultry Products Inspection Act (21 U.S.C. 460(e)) (as amended by subsection (a)(3)(B)) is amended by striking "section 34(a)(4)" and inserting "section 33".

(3) **EFFECTIVE DATE.**—Except as provided in section 302, this subsection takes effect on October 1, 2002.

SEC. 202. STATE POULTRY INSPECTION PROGRAMS.

(a) **IN GENERAL.**—The Poultry Products Inspection Act (21 U.S.C. 451 et seq.) (as amended by section 201(a)(1)) is amended by inserting after section 4 the following:

"SEC. 5. STATE POULTRY INSPECTION PROGRAMS.

"(a) **POLICY.**—It is the policy of Congress to protect the public from poultry products

that are adulterated or misbranded and to assist in efforts by State and other government agencies to accomplish that policy.

"(b) **FINDINGS.**—Congress finds that—

"(1) the goal of a safe and wholesome supply of poultry products throughout the United States would be better served if a consistent set of requirements, established by the Federal Government, were applied to all poultry products, whether produced under State inspection or Federal inspection;

"(2) under such a system, State and Federal poultry inspection programs would function together to create a seamless inspection system to ensure food safety and inspire consumer confidence in the food supply in interstate commerce; and

"(3) such a system would ensure the viability of State poultry inspection programs, which should help to foster the viability of small official establishments.

"(c) **APPROVAL OF STATE POULTRY INSPECTION PROGRAMS.**—

"(1) **IN GENERAL.**—Notwithstanding any other provision of this Act, the Secretary may approve a State poultry inspection program and allow the shipment in commerce of poultry products inspected under the State poultry inspection program in accordance with this section and section 5A.

"(2) **ELIGIBILITY.**—

"(A) **IN GENERAL.**—To receive or maintain approval from the Secretary for a State poultry inspection program in accordance with paragraph (1), a State shall—

"(i) implement a State poultry inspection program that enforces the mandatory ante-mortem and postmortem inspection, reinspection, sanitation, and related Federal requirements of sections 1 through 4 and 6 through 33 (including the regulations issued under those sections); and

"(ii) enter into a cooperative agreement with the Secretary in accordance with paragraph (3).

"(B) **ADDITIONAL REQUIREMENTS.**—

"(i) **IN GENERAL.**—In addition to the requirements specified in subparagraph (A), a State poultry inspection program reviewed in accordance with section 2 of the Federal Meat and Poultry State Inspection Requirements Act of 1999 shall implement, not later than October 1, 2002, all recommendations from the review, in a manner approved by the Secretary.

"(ii) **REVIEW OF NEW STATE POULTRY INSPECTION PROGRAMS.**—

"(I) **DEFINITION OF NEW STATE POULTRY INSPECTION PROGRAM.**—In this clause, the term 'new State poultry inspection program' means a State poultry inspection program that is not approved in accordance with paragraph (1) between October 1, 2001, and September 30, 2002.

"(II) **REVIEW REQUIREMENT.**—Not later than 1 year after the date on which the Secretary approves a new State poultry inspection program, the Secretary shall conduct a comprehensive review of the new State poultry inspection program, which shall include—

"(aa) a determination of the effectiveness of the new State poultry inspection program; and

"(bb) identification of changes necessary to ensure enforcement under the new State poultry inspection program of Federal inspection requirements.

"(III) **IMPLEMENTATION REQUIREMENTS.**—In addition to the requirements specified in subparagraph (A), to continue to be an approved State poultry inspection program, a new State poultry inspection program shall implement all recommendations from the review conducted in accordance with this

clause, in a manner approved by the Secretary.

"(3) **COOPERATIVE AGREEMENT.**—Notwithstanding chapter 63 of title 31, United States Code, the Secretary may enter into a cooperative agreement with a State that establishes the terms governing the relationship between the Secretary and the State poultry inspection program and provides for the following:

"(A) **PROVISIONS CONSISTENT WITH THIS ACT.**—The State will adopt (including adoption by reference) provisions identical to sections 1 through 4 and 6 through 33 (including the regulations issued under those sections).

"(B) **MARKING OF PRODUCT.**—

"(i) **OFFICIAL MARKS.**—State-inspected and passed poultry products will be marked under the supervision of a State inspector with the official mark and be deemed to have been inspected by the Secretary for the purposes of this Act and to have passed the inspection.

"(ii) **ADDITIONAL MARKS.**—In addition to the official mark, State-inspected and passed poultry products may be marked with the mark of State inspection, in accordance with requirements issued by the Secretary.

"(C) **LABELING REQUIREMENTS.**—The State will comply with all labeling requirements issued by the Secretary governing poultry products inspected under the State poultry inspection program.

"(D) **AUTHORITY OF THE SECRETARY.**—The Secretary shall have authority—

"(i) to detain and seize poultry and poultry products under the State poultry inspection program;

"(ii) to obtain access to facilities, records, and poultry products of any person that slaughters, processes, handles, stores, transports, or sells poultry products inspected under the State poultry inspection program to determine compliance with this Act (including the regulations issued under this Act); and

"(iii) to direct the State to conduct any activity authorized to be conducted by the Secretary under this Act (including the regulations issued under this Act).

"(E) **OTHER TERMS.**—The cooperative agreement shall include such other terms as the Secretary determines to be necessary to ensure that the actions of the State and the State poultry inspection program are consistent with this Act (including the regulations issued under this Act).

"(4) **ADDITIONAL REQUIREMENTS.**—

"(A) **IN GENERAL.**—A State may impose additional requirements on official establishments under the State poultry inspection program, as approved by the Secretary.

"(B) **RESTRICTION ON ESTABLISHMENT SIZE.**—The Secretary shall authorize a State to establish the maximum size of official establishments that the State will accept into the State poultry inspection program.

"(5) **REIMBURSEMENT OF STATE COSTS.**—The Secretary may reimburse the State for not more than 60 percent of the State's costs of meeting the Federal requirements for the State poultry inspection program.

"(6) **SAMPLING.**—

"(A) **SALMONELLA SAMPLING AND TESTING.**—To the extent that the Secretary requires official establishments to meet microbiological performance standards for Salmonella, the Secretary shall sample and test for Salmonella in official establishments subject to inspection under the State poultry inspection program.

"(B) **OTHER SAMPLING AND TESTING.**—In addition to the activities described in subparagraph (A), the Secretary may perform other

sampling and testing of poultry products in official establishments described in that subparagraph.

“(7) NONCOMPLIANCE.—If the Secretary determines that a State poultry inspection program does not comply with this section, section 5A, or the cooperative agreement under paragraph (3), the Secretary shall take such action as the Secretary determines to be necessary to ensure that the poultry products in the State are inspected in a manner that effectuates this Act (including the regulations issued under this Act).

“(d) ANNUAL REVIEW.—

“(1) IN GENERAL.—The Secretary shall develop and implement a process to review annually each State poultry inspection program approved under this section and to certify the State poultry inspection programs that comply with the cooperative agreement entered into with the State under subsection (c)(3).

“(2) COMMENT FROM INTERESTED PARTIES.—In designing the review process described in paragraph (1), the Secretary shall solicit comment from interested parties.

“(e) FEDERAL INSPECTION OPTION.—

“(1) IN GENERAL.—An official establishment that operates in a State with an approved State poultry inspection program may apply for inspection under the State poultry inspection program or for Federal inspection.

“(2) LIMITATION.—An official establishment shall not make an application under paragraph (1) more than once every 4 years.

“SEC. 5A. AUTHORITY TO TAKE OVER STATE POULTRY INSPECTION ACTIVITIES.

“(a) AUTHORITY TO TAKE OVER STATE POULTRY INSPECTION PROGRAMS.—

“(1) NOTIFICATION.—If the Secretary has reason to believe that a State is not in compliance with this Act (including the regulations issued under this Act) or the cooperative agreement under section 5(c)(3) and is considering the revocation or temporary suspension of the approval of the State poultry inspection program, the Secretary shall promptly notify and consult with the Governor of the State.

“(2) SUSPENSION AND REVOCATION.—

“(A) IN GENERAL.—The Secretary may revoke or temporarily suspend the approval of a State poultry inspection program and take over a State poultry inspection program if the Secretary determines that the State poultry inspection program is not in compliance with this Act (including the regulations issued under this Act) or the cooperative agreement.

“(B) PROCEDURES FOR REINSTATEMENT.—A State poultry inspection program that has been the subject of a revocation may be reinstated as an approved State poultry inspection program under this Act only in accordance with the procedures under section 5(c)(2)(B)(ii).

“(3) PUBLICATION.—If the Secretary revokes or temporarily suspends the approval of a State poultry inspection program in accordance with paragraph (2), the Secretary shall publish the determination under that paragraph in the Federal Register.

“(4) INSPECTION OF ESTABLISHMENTS.—Upon the expiration of 30 days after the date of publication of a determination under paragraph (3), an official establishment subject to a State poultry inspection program with respect to which the Secretary makes a determination under paragraph (2) shall be inspected by the Secretary.

“(b) EXPEDITED AUTHORITY TO TAKE OVER INSPECTION OF STATE-INSPECTED OFFICIAL ESTABLISHMENTS.—Notwithstanding any other

provision of this title, if the Secretary determines that an official establishment operating under a State poultry inspection program is not operating in accordance with this Act (including the regulations issued under this Act) or the cooperative agreement under section 5(c)(3), and the State, after notification by the Secretary to the Governor, has not taken appropriate action within a reasonable time as determined by the Secretary, the Secretary may immediately determine that the official establishment is an establishment that shall be inspected by the Secretary, until such time as the Secretary determines that the State will meet the requirements of this Act (including the regulations) and the cooperative agreement with respect to the official establishment.”.

(b) RESTAURANTS AND RETAIL STORES, ACCEPTANCE OF INTERSTATE SHIPMENTS OF POULTRY PRODUCTS, AND ADVISORY COMMITTEES FOR FEDERAL AND STATE PROGRAMS.—The Poultry Products Inspection Act (21 U.S.C. 451 et seq.) is amended by inserting after section 30 the following:

“SEC. 31. RESTAURANTS AND RETAIL STORES.

“(a) LIMITATION ON APPLICABILITY OF INSPECTION REQUIREMENTS.—The provisions of this Act requiring inspection of the slaughter of poultry and the processing of poultry products shall not apply to operations of types traditionally and usually conducted at retail stores and restaurants, if the operations are conducted at a retail store, restaurant, or similar retail establishment for sale of such prepared articles in normal retail quantities or for service of the articles to consumers at such an establishment.

“(b) CENTRAL KITCHEN FACILITIES.—

“(1) IN GENERAL.—For the purposes of this section, operations conducted at a central kitchen facility of a restaurant shall be considered to be conducted at a restaurant if the central kitchen of the restaurant prepares poultry products that are ready to eat when they leave the facility and are served in meals or as entrees only to customers at restaurants owned or operated by the same person that owns or operates the facility.

“(2) EXCEPTION.—A facility described in paragraph (1) shall be subject to section 11(b) and may be subject to the inspection requirements of this Act for as long as the Secretary determines to be necessary, if the Secretary determines that the sanitary conditions or practices of the facility or the processing procedures or methods at the facility are such that any of the poultry products of the facility are rendered adulterated.

“SEC. 32. ACCEPTANCE OF INTERSTATE SHIPMENTS OF POULTRY PRODUCTS.

“Notwithstanding any provision of State law, a State or local government shall not prohibit or restrict the movement or sale of poultry products that have been inspected and passed in accordance with this Act for interstate commerce.

“SEC. 33. ADVISORY COMMITTEES FOR FEDERAL AND STATE PROGRAMS.

“The Secretary may appoint advisory committees consisting of such representatives of appropriate State agencies as the Secretary and the State agencies may designate to consult with the Secretary concerning State and Federal programs with respect to poultry product inspection and other matters within the scope of this Act.”.

(c) EFFECTIVE DATE.—This section takes effect on October 1, 2001.

TITLE III—GENERAL PROVISIONS

SEC. 301. REGULATIONS.

Not later than October 1, 2001, the Secretary of Agriculture may promulgate such

regulations as are necessary to implement the amendments made by sections 102 and 202.

SEC. 302. TERMINATION OF AUTHORITY TO ESTABLISH AN INTERSTATE INSPECTION PROGRAMS.

If the Secretary of Agriculture has not approved any State meat inspection program or State poultry inspection program by entering into a cooperative agreement under title III of the Federal Meat Inspection Act and sections 5 and 5A of the Poultry Products Inspection Act (as amended by this Act) by September 30, 2002, sections 101(b), 102, 201(b), and 202, and the amendments made by those sections, are repealed effective as of that date.

By Mr. KOHL:

S. 1989. A bill to ensure that employees of traveling sales crews are protected under the Fair Labor Standards Act of 1938 and under other provisions of law; to the Committee on Health, Education, Labor, and Pensions.

TRAVELING SALES CREW PROTECTION ACT

Mr. KOHL. Mr. President, today I have introduced legislation to crack down on abuses in the traveling sales crew industry. These companies employ crews who travel from city to city selling products door to door. Often times, however, these companies mistreat their workers and violate local, state, and federal labor law. Because they rapidly move from state to state, enforcement efforts are difficult if not impossible for local authorities.

The plight of the workers in this business came home to me, and the citizens of Wisconsin, as a result of a particularly tragic crash in March of this year. A van carrying 14 young people overturned due to reckless driving, killing seven and injuring the others, many seriously. The driver had a suspended license and a series of violations. Unfortunately this is not an isolated incident. Since 1992, forty-two sales people have been killed or injured in similar crashes. The company involved in the Wisconsin crash had 92 labor violations and 105 violations for soliciting without a license.

Regrettably, there is more to these companies than just bad driving records. In 1987 Senator ROTH, as part of the Permanent Subcommittee on Investigations looked into this industry, and was appalled at what he found. Incidents of verbal and physical abuse of workers were widespread. Young people were coerced into continuing to sell long after they wanted to leave through threats and taunts from their employees. When sellers were able to get free they were often unpaid or denied the bus ticket home they were promised when they signed up.

The compensation system for the workers was also rigged to ensure that workers could not leave. Prospective sellers were promised big bucks when they were recruited, but soon found that decent pay was difficult to come by. Sellers were paid on a commission basis according to their sales, but they

were also charged by the company for their accommodations and fined for small infractions like showing up late to meetings or sleeping on the van. Salespeople were not paid in a timely manner, but their earnings were kept on "paper" and the employees only drew a daily allowance to pay for food. Employees were seldom allowed to see the paper work that tracked their earnings so they had little idea about how much they are entitled. Many found that they were not able to keep up with the sales and fell in debt to the company. After working 12 hours days, six days a week for months, employees actually owed the company money! These young people became indentured servants, working long hours for only room and board.

In the twelve years since Senator ROTH's investigation, nothing has changed. These abuses continue, and Congress should act.

In the Wisconsin case the company's record of disregard for local and state laws was a signal of their disdain for the safety of their workers. This company should not have been allowed to continue to operate with this kind of record. Government needed to step in earlier, before this tragedy occurred, instead of picking up the pieces afterward.

I am not one to frivolously engage in regulating business, but in this case the need for federal involvement is clear. Because of the mobility of these companies, states cannot crack down on these groups alone. They need federal help to eliminate the unscrupulous actors in the industry.

The Traveling Sales Crew Protection Act would take important steps to eliminate employers who abuse their workers. First, it would no longer allow minors to be employed in this line of work. Door to door sales can be dangerous work and combined with the long hours and hazardous travel, creates a job too dangerous for children. Second, the bill would narrowly eliminate the exemption under the Fair Labor Standards Act for these specific kinds of operations. Covering these employees with minimum wages laws and overtime requirements protects them from becoming indentured servants to their employers through complex compensation systems. This provision is carefully crafted to cover only traveling sales crews, individuals who sell over the road, or at trade shows would be unaffected. Lastly the bill creates a licensing procedure through the Department of Labor to monitor those engaged in supervising and running these operations.

These measures are important steps forward in a nationwide effort to eliminate this particularly abusive form of worker exploitation. I hope I will have my colleagues support as I try to make the painful crash in Janesville, the last chapter in this shameful story.

Mr. President, I ask unanimous consent that the text of my legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1989

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Traveling Sales Crew Protection Act".

TITLE I—FAIR LABOR STANDARDS ACT OF 1938

SEC. 101. APPLICATION OF PROVISIONS TO CERTAIN OUTSIDE SALESMAN.

(a) IN GENERAL.—Section 13 of the Fair Labor Standards Act of 1938 (29 U.S.C. 213) is amended by adding at the end the following:

"(k) For purposes of subsection (a)(1), and notwithstanding any other provision of law, the term 'outside salesman' shall not include any individual employed in the position of a salesman where the individual travels with a group of salespeople, including a supervisor, team leader or crew leader, and the employees in the group do not return to their permanent residences at the end of the work day."

(b) LIMITATION ON CHILD LABOR.—Section 12 of the Fair Labor Standards Act of 1938 (29 U.S.C. 212) is amended by adding at the end the following:

"(e) No individual under 18 years of age may be employed in a position requiring the individual to engaged in door to door sales or in related support work in a manner that requires the individual to remain away from his or her permanent residence for more than 24 hours."

(c) RULES AND REGULATIONS.—The Secretary of Labor may issue such rules and regulations as are necessary to carry out the amendments made by this section, consistent with the requirements of chapter 5 of title 5, United States Code.

TITLE II—PROTECTION OF TRAVELING SALES CREWS

SEC. 201. PURPOSE.

It is the purpose of this title—

(1) to remove the restraints on interstate commerce caused by activities detrimental to traveling sales crew workers;

(2) to require the employers of such workers to register under this Act; and

(3) to assure necessary protections for such employees.

SEC. 202. DEFINITIONS.

In this title:

(1) CERTIFICATE OF REGISTRATION.—The term "Certificate of Registration" means a Certificate issued by the Secretary under section 203(c)(1).

(2) EMPLOY.—The term "employ" has the meaning given such term by section 3(g) of the Fair Labor Standards Act of 1938 (29 U.S.C. 201(g)).

(3) GOODS.—The term "goods" means wares, products, commodities, merchandise, or articles or subjects of interstate commerce of any character, or any part or ingredient thereof.

(4) PERSON.—The term "person" means any individual, partnership, association, joint stock company, trust, cooperative, or corporation.

(5) SALE, SELL.—The terms "sale" or "sell" include any sale, exchange, contract to sell, consignment for sale, shipment for sale, or other disposition of goods.

(6) SECRETARY.—The term "Secretary" means the Secretary of Labor.

(7) TRAVELING SALES CREW WORKER.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the term "traveling sales crew worker" means an individual who—

(i) is employed as a salesperson or in related support work;

(ii) travels with a group of salespersons, including a supervisor; and

(iii) is required to be absent overnight from his or her permanent place of residence.

(B) LIMITATION.—The term "traveling sales crew worker" does not include—

(i) any individual who meets the requirements of subparagraph (A) if such individual is traveling to a trade show or convention; or

(ii) any immediate family member of a traveling sales crew employer.

SEC. 203. REGISTRATION OF EMPLOYERS AND SUPERVISORS OF TRAVELING SALES CREW WORKERS.

(a) REGISTRATION REQUIREMENT.—

(1) IN GENERAL.—No person shall engage in any form of employment of traveling sales crew workers, unless such person has a certificate of registration from the Secretary.

(2) SUPERVISORS.—A traveling sales crew employer shall not hire, employ, or use any individual as a supervisor of a traveling sales crew, unless such individual has a certificate of registration from the Secretary.

(3) DISPLAY OF CERTIFICATE OF REGISTRATION.—Each registered traveling sales crew employer and each registered traveling sales crew supervisor shall carry at all times while engaging in traveling sales crew activities a certificate of registration from the Secretary and, upon request, shall exhibit that certificate to all persons with whom they intend to deal.

(b) APPLICATION FOR REGISTRATION.—Any person desiring to be issued a certificate of registration from the Secretary, as either a traveling sales crew employer or traveling sales crew supervisor, shall file with the Secretary a written application that contains the following:

(1) A declaration, subscribed and sworn to by the applicant, stating the applicant's permanent place of residence, the type or types of sales activities to be performed, and such other relevant information as the Secretary may require.

(2) A statement identifying each vehicle to be used to transport any member of any traveling sales crew and, if the vehicle is or will be owned or controlled by the applicant, documentation showing that the applicant is in compliance with the requirements of section 204(d) with respect to each such vehicle.

(3) A statement identifying, with as much specificity as the Secretary may require, each facility or real property to be used to house any member of any traveling sales crew and, if the facility or real property is or will be owned or controlled by the applicant, documentation showing that the applicant is in compliance with section 204(e) with respect to each such facility or real property.

(4) A set of fingerprints of the applicant.

(5) A declaration, subscribed and sworn to by the applicant, consenting to the designation by a court of the Secretary as an agent available to accept service of summons in any action against the applicant, if the applicant has left the jurisdiction in which the action is commenced or otherwise has become unavailable to accept service.

(c) ISSUANCE OF CERTIFICATE OF REGISTRATION.—

(1) IN GENERAL.—In accordance with regulations, and after any investigation which the Secretary may deem appropriate, the Secretary shall issue a Certificate of Registration, as either a traveling sales crew

employer or traveling sales crew supervisor, to any person who meets the standards for such registration.

(2) **REFUSAL TO ISSUE OR RENEW, SUSPENSION AND REVOCATION.**—The Secretary may refuse to issue or renew, or may suspend or revoke, a Certificate of Registration if the applicant for or holder of the Certificate—

(1) has knowingly made any misrepresentation in the application for such Certificate of Registration;

(2) is not the real party in interest with respect to the application or Certificate of Registration and the real party in interest is a person who—

(A) has been refused issuance or renewal of a Certificate;

(B) has had a Certificate suspended or revoked; or

(C) does not qualify for a Certificate under this section;

(3) has failed to comply with this title or any regulation promulgated under this title;

(4) has failed—

(A) to pay any court judgment obtained by the Secretary or any other person under this title or any regulation promulgated under this title; or

(B) to comply with any final order issued by the Secretary as a result of a violation of this title or any regulation promulgated under this title;

(5) has been convicted within the 5 years preceding the date on which the application was filed or the Certificate was issued—

(A) of any crime under Federal or State law relating to the sale, distribution or possession of alcoholic beverages or narcotics, in connection with or incident to any traveling sales crew activities;

(B) of any crime under Federal or State law relating to child abuse, neglect, or endangerment; or

(C) of any felony under Federal or State law involving robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, murder, rape, assault with intent to kill, assault which inflicts grievous bodily injury, prostitution, peonage, or smuggling or harboring individuals who have entered the United States illegally;

(6) has been found to have violated paragraph (1) or (2) of section 274A(a) of the Immigration and Nationality Act (8 U.S.C. 1324a(a)(1) or (2));

(7) has failed to comply with any bonding or security requirements as the Secretary may establish; or

(8) has failed to satisfy any other requirement which the Secretary may by regulation establish.

(d) **ADMINISTRATIVE PROCEEDINGS AND JUDICIAL REVIEW.**—

(1) **IN GENERAL.**—A person who is refused the issuance or renewal of a Certificate or Registration, or whose Certificate of Registration is suspended or revoked, shall be afforded an opportunity for an agency hearing, upon a request made within 30 days after the date of issuance of the notice of refusal, suspension, or revocation. If no hearing is requested as provided for in this subsection, the refusal, suspension, or revocation shall constitute a final and unappealable order.

(2) **HEARING.**—If a hearing is requested under paragraph (1), the initial agency decision shall be made by an administrative law judge, with all issues to be determined on the record pursuant to section 554 of title 5, United States Code, and such decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of intent to modify or vacate the decision of the administrative law judge shall be issued

to the parties within 90 days after the decision of the administrative law judge. A final order which takes effect under this paragraph shall be subject to review only as provided under paragraph (3).

(3) **REVIEW BY COURT.**—Any person against whom an order has been entered after an agency hearing under this subsection may obtain review by the United States district court for any district in which the person is located, or the United States District Court for the District of Columbia, by filing a notice of appeal in such court within 30 days from the date of such agency order, and simultaneously sending a copy of such notice by registered mail to the Secretary. The Secretary shall promptly certify and file in such court the record upon which the agency order was based. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States code. Any final decision, order, or judgment of such District Court concerning such review shall be subject to appeal as provided for in chapter 83 of title 28, United States Code.

(e) **TRANSFER OR ASSIGNMENT OF CERTIFICATE; EXPIRATION; RENEWAL.**—

(1) **LIMITATION.**—A Certificate of Registration may not be transferred or assigned.

(2) **EXPIRATION AND EXTENSION.**—

(A) **EXPIRATION.**—Unless earlier suspended or revoked, a Certificate of Registration shall expire 12 months from the date of issuance.

(B) **EXTENSION.**—A Certificate of Registration may be temporarily extended, at the Secretary's discretion, by the filing of an application with the Secretary at least 30 days prior to the Certificate's expiration date.

(3) **RENEWAL.**—A Certificate of Registration may be renewed through the application process provided for in subsections (b) and (c).

(f) **NOTICE OF ADDRESS CHANGE; AMENDMENT OF CERTIFICATE OF REGISTRATION.**—During the period for which a Certificate of Registration is in effect, the traveling sales crew employer or supervisor named on the Certificate shall—

(1) provide to the Secretary within 30 days a notice of each change of permanent place of residence; and

(2) apply to the Secretary to amend the Certificate of Registration whenever the person intends to—

(A) engage in any form of traveling sales crew activity not identified on the Certificate;

(B) use or cause to be used any vehicle not covered by the Certificate to transport any traveling sales crew worker; or

(C) use or cause to be used any facility or real property not covered by the Certificate to house any traveling sales crew worker.

(g) **FILING FEE.**—The Secretary shall require the payment of a fee by an employer filing an application for the issuance or renewal of a Certificate of Registration. The amount of the fee shall be \$500 for a Certificate for an employer and \$50 for a Certificate for a supervisor. Sums collected pursuant to this section shall be applied by the Secretary toward reimbursement of the costs of administering this title.

SEC. 204. OBLIGATIONS OF EMPLOYERS OF TRAVELING SALES CREW WORKERS.

(a) **DISCLOSURE OF TERMS AND CONDITIONS OF EMPLOYMENT.**—

(1) **WRITTEN DISCLOSURE.**—At the time of recruitment, each traveling sales crew worker shall be provided with a written disclosure of the following information, which shall be

accurate and complete to the best of the employer's knowledge:

(A) The place or places of employment, stated with as much specificity as possible.

(B) The wage rate or rates to be paid.

(C) The type or types of work on which the worker may be employed.

(D) The period of employment.

(E) The transportation, housing, and any other employee benefit to be provided, and any costs to be charged to the worker for each such benefit.

(F) The existence of any strike or other concerted work stoppage, slowdown, or interruption of operations by employees at the place of employment.

(G) Whether State workers' compensation insurance is provided and, if so, the name of the State workers' compensation insurance carrier, the name of the policyholder of such insurance, the name and the telephone number of each person who must be notified of an injury or death, and the time period within which such notice must be given.

(2) **RECORDS AND STATEMENTS.**—Each employer of traveling sales crew workers shall—

(A) with respect to each such worker, make, keep, and preserve records for 3 years of the—

(i) basis on which wages are paid;

(ii) number of piecework units earned, if paid on a piecework basis;

(iii) number of hours worked;

(iv) total pay period earnings;

(v) specific sums withheld and the purpose of each sum withheld; and

(vi) net pay; and

(B) provide to each worker for each pay period, an itemized written statement of the information required under subparagraph (A).

(b) **PAYMENT OF WAGES WHEN DUE.**—Each traveling sales crew worker shall be paid the wages owed that worker when due. The payment of wages shall be in United States currency or in a negotiable instrument such as a bank check. The payment of wages shall be accompanied by the written disclosure required by subsection (a)(2)(B).

(c) **COSTS OF GOODS, SERVICES, AND BUSINESS EXPENSES.**—

(1) **PROHIBITION.**—No employer of traveling sales crew workers shall—

(A) require any worker to purchase any goods or services solely from such employer; or

(B) impose on any worker any of the employer's business expenses, such as the cost of maintaining and operating a vehicle used to transport the traveling sales crew.

(2) **INCLUSION AS PART OF WAGES.**—An employer may include as part of the wages paid to a traveling sales crew worker the reasonable cost to the employer of furnishing board, lodging, or other facilities to such worker, so long as—

(A) such facilities are customarily furnished by such employer to the employees of the employer; and

(B) such cost does not exceed the fair market value of such facility and does not include any profit to the employer.

(d) **SAFETY AND HEALTH IN TRANSPORTATION.**—

(1) **STANDARDS.**—An employer of traveling sales crew workers shall provide transportation for such workers in a manner that is consistent with the following standards:

(A) The employer shall ensure that each vehicle which the employer uses or causes to be used for such transportation conforms to the standards prescribed by the Secretary under paragraph (2) and conforms to other

applicable Federal and State safety standards.

(B) The employer shall ensure that each driver of each such vehicle has a valid and appropriate license, as provided by State law, to operate the vehicle.

(C) The employer shall have an insurance policy or fidelity bond in accordance with subsection (c).

(2) **PROMULGATION BY SECRETARY.**—The Secretary shall prescribe, by regulation, such safety and health standards as may be appropriate for vehicles used to transport traveling sales crew workers. In establishing such standards, the Secretary shall consider—

(A) the type of vehicle used;

(B) the passenger capacity of the vehicle;

(C) the distance which such workers will be carried in the vehicle;

(D) the type of roads and highways on which such workers will be carried in the vehicle;

(E) the extent to which a proposed standard would cause an undue burden on an employer of traveling sales crew workers; and

(F) any standard prescribed by the Secretary of Transportation under part II of the Interstate Commerce Act (49 U.S.C. 301 et seq.) or any successor provision of subtitle IV of title 49, United States Code.

(e) **SAFETY AND HEALTH IN HOUSING.**—An employer of traveling sales crew workers shall provide housing for such workers in a manner that is consistent with the following standards:

(1) If the employer owns or controls the facility or real property which is used for housing traveling sales crew workers, the employer shall be responsible for ensuring that the facility or real property complies with substantive Federal and State safety and health standards applicable to that housing. Prior to occupancy by such workers, the facility or real property shall be certified by a State or local health authority or other appropriate agency as meeting applicable safety and health standards. Written notice shall be posted in the facility or real property, prior to and throughout the occupancy by such workers, informing such workers that the applicable safety and health standards are met.

(2) If the employer does not own or control the facility or real property which is used for housing traveling sales crew workers, the employer shall be responsible for ensuring that the owner or operator of such facility or real property complies with substantive Federal and State safety and health standards applicable to that housing. Such assurance by the employer shall include the verification that the owner or operator of such facility or real property is licensed and insured in accordance with all applicable State and local laws. The employer shall obtain such assurance prior to housing any workers in the facility or real property.

(f) **INSURANCE OF VEHICLES; WORKERS' COMPENSATION INSURANCE.**—

(1) **INSURANCE.**—An employer of traveling sales crew workers shall ensure that there is in effect, for each vehicle used to transport such workers, an insurance policy or a liability bond which insures the employer against liability for damage to persons and property arising from the ownership, operation, or the causing to be operated of such vehicle for such purpose. The level of insurance or liability bond required shall be determined by the Secretary considering at least the factors set forth in subsection (d)(2) and any relevant State law.

(2) **WORKERS' COMPENSATION.**—If an employer of traveling sales crew workers is the

employer of such workers for purposes of a State workers' compensation law and such employer provides workers' compensation coverage for such workers as provided for by such State law, the following modifications to the requirements of paragraph (1) shall apply:

(A) No insurance policy or liability bond shall be required of the employer if such workers are transported only under circumstances for which there is workers' compensation coverage under such State law.

(B) An insurance policy or liability bond shall be required of the employer for all circumstances under which workers' compensation coverage for the transportation of such workers is not provided under such State law.

SEC. 205. ENFORCEMENT PROVISIONS.

(a) **CRIMINAL SANCTIONS.**—An employer who willfully and knowingly violates this title, or any regulation promulgated under this title, shall be fined not more than \$10,000 or imprisoned for not to exceed 1 year, or both. Upon conviction for any subsequent violation of this title, or any such regulation, an employer shall be fined not more than \$50,000 or imprisoned for not to exceed 3 years, or both.

(b) **JUDICIAL ENFORCEMENT.**—

(1) **INJUNCTIVE RELIEF.**—The Secretary may petition any appropriate district court of the United States for temporary or permanent injunctive relief if the Secretary determines that this title, or any regulation promulgated under this title, has been violated.

(2) **SOLICITOR OF LABOR.**—Except as provided in section 518(a) of title 28, United States Code, relating to litigation before the Supreme Court, the Solicitor of Labor may appear for and represent the Secretary in any civil litigation brought under this title, but all such litigation shall be subject to the direction and control of the Attorney General.

(c) **ADMINISTRATIVE SANCTIONS; PROCEEDINGS.**—

(1) **CIVIL MONEY PENALTY.**—Subject to paragraph (2), an employer that violates this title, or any regulation promulgated under this title, may be assessed a civil money penalty of not more than \$10,000 for each such violation.

(2) **DETERMINATION OF PENALTY.**—In determining the amount of any penalty to be assessed under paragraph (1), the Secretary shall take into account—

(A) the previous record of the employer in terms of compliance with this title and the regulations promulgated under this title; and

(B) the gravity of the violation.

(3) **PROCEEDINGS.**—

(A) **IN GENERAL.**—An employer that is assessed a civil money penalty under this subsection shall be afforded an opportunity for an agency hearing, upon request made within 30 days after the date of issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. If no hearing is requested as provided for in this paragraph, the assessment shall constitute a final and unappealable order.

(B) **ADMINISTRATIVE LAW JUDGE.**—If a hearing is requested under subparagraph (A), the initial agency decision shall be made by an administrative law judge, and such decision shall become the final order unless the Secretary modifies or vacates this decision. Notice of intent to modify or vacate the decision of the administrative law judge shall be issued to the parties within 90 days after the decision of the administrative law judge. A

final order which takes effect under this paragraph shall be subject to review only as provided for under subparagraph (C).

(C) **REVIEW.**—An employer against whom an order imposing a civil money penalty has been entered after an agency hearing under this section may obtain review by the United States district court for any district in which the employer is located, or the United States District Court for the District of Columbia, by filing a notice of appeal in such court within 30 days from the date of such order and simultaneously sending a copy of such notice by registered mail to the Secretary. The Secretary shall promptly certify and file in such court the record upon which the penalty was imposed. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code. Any final decision, order, or judgment of such District Court concerning such review shall be subject to appeal as provided in chapter 83 of title 28, United States Code.

(D) **FAILURE TO PAY.**—If any person fails to pay an assessment after it has become a final and unappealable order under this paragraph, or after the court has entered final judgment in favor of the agency, the Secretary shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.
